We want reconciliation, harmony and the right to have open and free elections in Angola. In this regard, we are no different than the people of the District of Columbia who, for many years, fought to obtain Home Rule and voting rights. In the District of Columbia, after many years of effort, you now have an elected mayor, city council, school board and other local offices. That's what we want in Angola. The right to have elections to make our leaders accountable. What is wrong with that?

Contrary to the views of our opponents, UNITA shares the same desires for self determination as do the people of the District of Columbia. Just as your Congress ended the bondage of the District by enacting Home Rule, we hope that it will give UNITA aid so that we might release ourselves from the bondage of the MPLA's slavery.

Also, here in America, you have the right to free speech, religion and other basic freedoms of which we still dream and fight. In Angola, we have the repressive MPLA government which is propped up by the Soviet Union, Cuban troops numbering over 35,000, 1,500 Soviet advisors, 2,000 North Koreans, 2,500 East Germans and over a thousand Portuguese mercenaries. How would you like that in your backyard? You would not in the District, Maryland or Virginia, and we do not want it in Angola. That's what this fight is all about.

As you know, there have been a few demonstrators during my visit. In your country you have the right, we do not. These demonstrators are very interesting. They demonstrate against me and UNITA—one man and one organization. Let them come to Angola and see how well they would do against 1,000 Soviet tanks, 200 Soviet Mig fighters and 160 Soviet helicopters. Then again, they had better stay in your country because if they come to Angola, they probably would end up driving the tanks and flying the helicopters and Migs against us for the Soviets.

If I can do anything today, I would like to correct some of the misconceptions and misinformation which has been circulated by our opponents and their allies in your country. I specifically direct your attention to the article from the Washington Afro American newspaper of December 28, 1985, which is in your packets, regarding a letter my Foreign Secretary, Mr. Chitunda, sent to Mr. Randall Robinson of TransAfrica.

As Mr. Chitunda stated, the allegations and statements made against UNITA by TransAfrica have been false, and misleading and only serve to confuse Americans, particularly black Americans. Today, I want to set the record straight.

One of the most successful tactics of our opponents, both black and white, has been to distort the truth regarding my relationship with South Africa. We are called puppets of the South African government. These allegations are an insult to the intelligence of black and white Americans. Our opponents feel that if they mention South Africa, black Americans will not look at the merits of our case. Apparently, I have more respect for the intelligence of black Americans then they do.

We accepted South Africa assistance because of the geopolitical realities of Southern Africa in which South Africa is by far the dominant economic and military power. Our critics know this but it would not suit their purposes to say otherwise.

They use South Africa as an issue against me and know full well that several black African states have ties to South Africa due to economic necessity. I do not hear criticisms of Mugabe in Zimbabwe for being a puppet of South Africa because he has a South African Trade Official in the Country.

I challenge you as black journalists and all reporters to start asking these questions. Scrutinize my views and positions, but please be just as diligent in examining the contradictions of those who criticize me. Is not that the role of a journalist? Do not judge me by a double standard!

The silence of UNITA's critics and the press on these and other issues is deafening and is probably nowhere more apparent than in the Cuban presence in my country. Here, we can see just how crafty the Soviets are. They give $2 billion in military assistance to the MPLA government, have the battles fought by predominatly dark skinned Cuban troops with white officers, all in the name of denying freedom and democracy to black Angolans.

I have no doubt that if there were free and open elections held today in my country that UNITA would have the votes of not only 65% of the people who now support us, but also the other 35%. We should at least have the chance to lose in a fair and open election process.

And what kind of government does UNITA believe in? UNITA would not allow the Soviets to strip our sea lane waters of the MPLA; UNITA would not have been in the disgraceful position of being one of the few countries in the United Nations which did not condemn the Russians for the Korean airline disaster; UNITA would not have allowed the Russians to use our airfields to launch spy missions against the British in the Faulklands crises; UNITA would not name streets after Karl Marx as has the MPLA and, UNITA would not join the Soviets in boycotting the Olympics. If there is any pupped in Angola, it is the MPLA government which allows Moscow and Havana to pull its strings.

Unfortunately, there are still too many in the United States, for whatever reason, who do not understand the real issues in our struggle. They hide behind the phony smoke-screen of South Africa saying that they are concerned about black South Africans, yet, they don't seem to care about black Angolans killing other black Angolans with Russia aid. Does a black life mean less if taken by a black Angolan or Cuban than if by a white South African? Does the color of the killer determine the degree of protest?

Finally, let me answer those who have called me a tribalists, a communist, a marxist and so many other names. First, I can not be communist and a puppet of South Africa. I am a Christian. How can I be a total of the CIA and at the same time be a marxist. And, just look around you and see how many we have from UNITA here today. They are from different tribes in different parts of our country. Our support is based upon nationhood and not tribalism. So, the critics are wrong again.

I challenge my critics and those of UNITA to come to Angola and see for themselves. To see all of us working together and fighting together as you have seen in the photographs in the back of the room. You will see how we help ourselves in food, health care, agriculture. You will see how we get and use our weapons—65% of which are captured. Come and see how my guerilla training in China has helped our effort. China was the best in Guerilla warfare and so I went to train with the best.

I am Jonas Savimbi and I want Angola free. For that and because of the forces we fight, I have been criticized and UNITA is attacked and are judged by a double standard of morality. All I want for Angola is what you have in America—a system of democratic institutions with people living in harmony.

In conclusion, I believe that America's vision was best characterized by the crew of the shuttle that met with disaster last week. There were women, white men, an Asian and a black American. That crew said all there is to say about your country. I want a country in Angola that is free so that we too can have the same kind of society. Thank you very much and God be with you.

THE INEQUITY OF THE TAX REFORM ACT OF 1984

HON. ROBERT LINDSAY THOMAS

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. THOMAS of Georgia. Mr. Speaker, I rise in strong support of legislation being introduced today by my friend and colleague, the Honorable DOUG BARNARD. This bill relates to a major inequity that has come about through an Internal Revenue Service interpretation of a provision of the Tax Reform Act of 1984.

This inequity centers on the imposition of a tax on persons riding on corporate aircraft in seats that would have otherwise gone unoccupied on business-related flights. In the past, corporate aircraft operators routinely have allowed the family members of employees or others to occupy these empty seats. But under the new IRS ruling, the persons "hitching" a ride would be subject to a tax, and the aircraft owner would be subject to a nightmare of determinations and accounting procedures.

In some cases, a passenger would be subject to a tax on one portion of a trip, but not on another. In some cases, as many as 13 separate accounting procedures will be necessary to conform with the rules as they apply to a trip. In short, this will be a regulatory jungle of monumental proportions.

Clearly, this was not the intent of Congress. Commercial airlines and railroads can offer their unsold seats to employees and their fam-

ilies without such a tax. But corporate aircraft owners cannot, even though the trip is strictly business related and would be made with or without the empty seats filled.

In addition to the obvious inequity here, I am strongly opposed to the IRS regulations because of the powerful negative impact this will have on the market and the manufacture of corporate aircraft. In my own congressional district, the Gulfstream Aerospace Corp., employs 3,400 highly skilled persons with an annual payroll of $90 million. Any regulation that further burdens corporate aircraft owners will have a chilling effect on the operation of Gulfstream and similar facilities.

Mr. Speaker, I should point out that this is the worst possible time for general aviation manufacturers to suffer additional problems. Those manufacturers are already reeling under the poorest sales year since the industry began keeping records in 1945. They are being swamped by subsidized foreign imports, a crisis of liability insurance and radically altered marketing conditions. In 1978, our Nation produced 17,811 general aviation aircraft. In 1981, they produced 9,457. Based on projections from the first quarter of this year, the total sales for 1986 are estimated at only 1,400.

Clearly, the last thing general aviation needs today is yet another regulatory burden, particularly a burden will neither generate significant revenue nor was ever intended by the Congress to be implemented in the first place.

INTRODUCTION OF THE CONCURRENT RESOLUTION ON THE ESSENTIAL AIR SERVICE PROGRAM

HON. JOHN PAUL HAMMERSCHMIDT

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. HAMMERSCHMIDT. Mr. Speaker, today I am introducing a concurrent resolution expressing the sense of Congress that the Essential Air Service [EAS] Program should be maintained for at least the 10-year period for which it was authorized.

When Congress adopted the Airline Deregulation Act of 1978, it was concerned that giving the airlines new freedom over their routes and fares would result in the abandonment of air service to small communities. To prevent this, it included in the new law a provision to guarantee essential air service to these communities. Under this provision, any community that was listed on an airline's certificate when the Deregulation Act was passed was guaranteed essential air service, even if a subsidy had to be paid to an air carrier to provide it.

The law stated that the EAS guarantee was to remain in effect for a 10-year period; that is, until October 24, 1988.

For the past 2 years, however, the administration has proposed to eliminate this guarantee ahead of schedule. By doing so, they are asking us to break the 10-year commitment we made to the small communities of this Nation. The very existence of these proposals has cast doubt on the future of the EAS guarantee and has caused some airlines to reconsider their participation in the EAS Program, to the detriment of the communities involved.

In addition, there are rumors that the Department of Transportation [DOT] may reorganize their EAS Division in a way that could undermine the guarantees in the law.

It should be noted that the amount of Federal funds needed to support the EAS Program is very small and has been decreasing. A few years ago, more than $100 million per year was spent on this program. But during fiscal year 1985, only $33.6 million of a $41.4 million appropriation was needed. The President's budget estimates that $37.8 million will be spent during the current fiscal year, although actual expenditures may be somewhat less than that. Since carryover funds remain from prior year appropriations, the amount needed to fund the program in fiscal year 1986 could be reduced even further.

There are now about 50 small air carriers that receive the subsidy payments to serve about 150 small communities in 40 States. If the subsidy payments were to end, these communities would almost certainly lose all air service and be cut off from the Nation's air transportation system.

In addition, there are more than 400 communities in almost every State, territory, and possession that benefit from the essential Air Service Program even though their air service is not subsidized. These are communities for which the law requires DOT to establish essential air service levels. An airline serving one of these communities cannot terminate or reduce service below the established EAS levels unless it first gives advance notice to the community and to DOT. When DOT receives this notice, it must then prohibit that airline from terminating or reducing its service until a replacement carrier can begin service. This protects these communities from sudden and unannounced interruptions in air service. Without the essential Air Service Program, this protection would be gone.

The administration justifies its proposal to eliminate the EAS Program "in light of the overall success of airline deregulation." While it may be that the Nation's overall experience with airline deregulation has been successful, many small communities have not shared in this success. Indeed, this was to be expected and that is precisely why the EAS provision was included in the Deregulation Act. Although many small communities are now served by new commuter air carriers without reliance on EAS subsidy payments, most continue to benefit from the underlying EAS service guarantees and advance notice requirements in the current law. Others do depend on the EAS subsidy payments for their sole air link to the Nation's air transportation system. More importantly, these communities have the right to expect that we will live up to the 10-year air service guarantee that Congress gave them in 1978.

For these reasons, I invite Members of Congress to join me and other members of the Committee on Public Works and Transportation as cosponsors of the EAS resolution. If you are interested, please contact our Aviation Subcommittee staff at extension 63220.

THERE GOES THE NEIGHBORHOOD

HON. TIMOTHY E. WIRTH

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. WIRTH. Mr. Speaker, I call to your attention and to the attention of my colleagues the following editorial which appeared in the January 6 edition of Broadcasting magazine, and an enlightening letter in response by Dr, Dale L. Kunkel, a research fellow at the Center for Research on the Influences of Television on Children, at the University of Kansas, which appeared in the January 21 edition of Broadcasting.

Dr. Kunkel expresses his very compelling thoughts on the issue of children's programming which is designed solely for the promotion of toy lines, commonly known as "program-length commercials." I wholeheartedly agree with Dr. Kunkel that such a practice raises serious questions relating to the ever increasing commercialization of children's programming, and the ability of children to differentiate between programs and commercial content. In fact, I have introduced legislation which would direct the Federal Communications Commission [FCC] to begin an official inquiry assessing these questions and others related to the program-length commercial format.

Dr. Kunkel's thoughtful letter comes from the perspective of one who has extensively studied children's television programming, and who has greatly assisted the members and staff of the House Telecommunications Subcommittee in our analysis of this critical issue. I encourage my colleagues to read it.

[From the Broadcasting Magazine, Jan. 6, 1986]

THERE GOES THE NEIGHBORHOOD

This may come under the heading of shoveling sand against the sea, but we are constrained to protest the practice of inserting commercial messages in the context of dramatic programming in exchange for goods or services and even cash. The subject popped to mind last week during a CBS made-for-TV movies in which the hero, for no valid dramatic purpose, was diverted to pick up his Hertz car at a counter conspicuously so labeled. Whatever suspension of disbelief existed at that moment burst instantly in the realization that someone had just sold out something.

We're all long since inured to the blatant commercial bazaar that exists in game shows, with product mention and payoffs the order of the day. But one hopes it's not too late to head off the practice in other parts of the programming spectrum. This medium's big enough to pay its own way.

[From the Broadcasting magazine, Jan. 21, 1986]

COMMERCIAL CRITIC

EDITOR: I couldn't agree more with your Jan. 6 editorial, "There goes the neighborhood," which describes the growing practice of incorporating commercial messages within the content of entertainment programing. The incident that prompted the editorial was, in your words, a scene from a recent TV movie "in which the hero, for no

valid dramatic purpose, was diverted to pick up his Hertz car at a counter conspicuously so labeled." You needn't have looked so long or hard, however, to find a single such scene on which to base your commentary. A glance at virtually any of the first-run syndicated children's programs currently airing would reveal the unabashed promotion lines of toy products upon which these programs are based.

Such programing, commonly labeled as "program-length commercials" or "product-driven shows," has turned the standard practice of program/product liaisons on its head. Previously, programs were conceived and developed based on their ability to provide children with worthwhile entertainment and perhaps even some positive social values, with program-related products following the emergence of a show's popularity. Today, the decision to move forward on children's program proposals centers primarily on the new show's ability to attract the collaboration of a major toy manufacturer in the early conceptualization stages. Program themes and characters are then products that are constantly featured within the body of every program episode. Who needs 30-second commercials when you can have 30 minutes of product promotion instead?

It is only through the absolute abdication of any regulatory oversight of children's television by the present FCC that this type of programing arrangement has been allowed to emerge.

As your editorial so aptly states, "The medium's big enough to pay its own way." Given your concern with the growing commercialization found within adult dramatic program content, I think it only fair and consistent that you also speak out against the proliferation of program-length commercials in children's television.—*Dale L. Kunkel, research fellow, Center for Research on the Influences of Television on Children, University of Kansas, Lawrence.*

CUBAN INDEPENDENCE DAY

HON. DANTE B. FASCELL

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. FASCELL. Mr. Speaker, today, May 20th, marks the 84th anniversary of Cuban independence and the first anniversary of Radio Marti. The convergence of these two significant events underscores a vital message for all of us—that freedom is fragile at best, that once won, it is never guaranteed, but must be protected and nurtured by each succeeding generation.

Clearly, there would be no need for Radio Marti if the freedom so valiantly wrested from colonial Spain by Jose Marti, Maximo Gomez, Antonio Maceo, and countless other Cuban patriots many years ago had not, in our lifetime, been stolen from the people by Fidel Castro and his followers.

Twenty-seven years of Communist dictatorship have not quenched the Cuban people's thirst for freedom. This burning desire is kept alive in the hearts of the island's captive people and by the hundreds of thousands of Cubans who were forced from their homeland, often with little more than the clothes on their backs, to take refuge in the United States. And it is kept alive by the Voice of America's Radio Marti which is the only source of balanced and unbiased information available to the citizens of Cuba.

Cuban Independence Day marks the culmination of a 30-year struggle to free this lovely island from domination by a foreign power, Spain. A foreign power in effect dominates Cuba again today—and so the struggle continues. Ultimately, the result will be the same, because no amount of repression can kill the longing of the people to live in dignity and freedom.

Many of those who fled Cuba in the past few decades represented that nation's brightest and best, and Fidel Castro's loss has become this nation's gain. Dedicated and hard-working, these exiles readily assimilated into south Florida; our traditions and values were theirs, and they soon became loyal and constructive citizens of this country. Cuban-Americans have enriched the econony, culture, politics, and lifestyle of their new homeland, and we are all the better for it.

Their successes are everywhere, from soaring bank buildings and thriving small businesses to the Cuban-American National Foundation, a group of prominent civic leaders and businessmen, chaired by Mr. Jorge Mas Canosa, who monitor human rights violations in Cuba and provide accurate information and research on issues to the media and the Congress.

Truth is a mighty weapon in the struggle for liberty and it is the weapon Castro fears most. For this reason, he has bitterly opposed Radio Marti. And for this reason, if for no other, Radio Marti deserved our support.

Today, as we join in celebrating Cuban Independence Day, we honor as well the vitality of the Cuban people and the contributions they have made to their adopted homeland. Above all, we share in their dreams that Cuba again will be made free.

To this end, all Americans, regardless of heritage, have a stake. To this cause, we share a common dedication.

GEORGE NELSON, LABOR'S ADVOCATE

HON. STAN LUNDINE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. LUNDINE. Mr. Speaker, several weeks ago, my uncle, George Nelson, died in Wilmington, NC, where he retired after serving as legislative director for the International Association of Machinists and Aerospace Workers for 30 years.

Ever since I was a young boy, I knew that being a lobbyist wasn't necessarily a dirty job. Uncle George was the only lobbyist I knew and he was a kindly, honest man with a wonderful sense of humor. When I was just learning to talk, he taught me how to say "International Association of Machinists" which amazed adults when they first encountered my uncle and me.

Later, during the 1950's and 1960's, when there were only a few lobbyists in this town, Uncle George took me around, introducing me to some of the great and powerful public servants of the day. I remember once sitting in the chair of then Vice President Johnson on the Senate side of the Capitol.

George Nelson really believed in labor's cause. He fought for better health care legislation starting in the 1940's. He was a strong supporter of the mediation process to resolve disputes.

He was a charter member of Local 1558 of the IAM in Jamestown, NY. His advocacy of labor's cause as a young man sometimes resulted in severe discomfort for my conservative grandmother.

According to family legend, George once got a large crowd to come to the Brooklyn Square section of Jamestown to hear then Senator Wagner speak on wage and hour laws; when George got home, Grandma sent him to bed without any supper.

George was a real character. He will be long remembered in Washington, particularly by his colleagues at the Machinists Union. They sent me the following biography which I wanted to share with the current Members of Congress, most of whom came here since George Nelson retired:

George R. Nelson, known as the dean of organized labor's lobbyists on Capitol Hill until his retirement in 1976, died Saturday, May 8, 1986. He was 75.

During his 30 years as legislative director for the International Association of Machinists and Aerospace Workers (IAM), Nelson played key roles in every legislative battle in which organized labor was engaged.

During the 1940s, he fought against the Taft-Hartley amendments to the National Labor Relations Act and later was credited with tempering Landrum-Griffin amendments to that act which made those amendments more palatable to organized labor.

In the 1950s, Nelson was credited with playing a key role with both Congress and the then AFL (American Federation of Labor) to win legislation that set up group health programs for federal government employees.

He was a member of the President's Committee on National Employ the Handicapped programs, labor chairman of the Cooperative Health Federation of America and a member of the Public Health Association.

During World War II, he served as labor member both for the Federal Manpower Commission and the U.S. Treasury Department's War Bond Division.

In addition to representing IAM members before Congress, Nelson also served as the union's liaison with the Federal Mediation and Conciliation Service and kept records on arbitrators and any precedent-setting decisions they made during his career.

A native of Jamestown, New York, Nelson was a charter member of IAM Local 1558, Jamestown, which he joined in March, 1936.

After holding nearly every elective position in that local, including local president, he was elected business agent of IAM District 65 in Jamestown in October 1941. Local 1558 is affiliated with the district.

He was appointed to the International Union Staff with the title of Grand Lodge Representative September 1, 1946. Because of his lobbying skills, he was immediately assigned as legislative representative, the post he held for 30 years until his retirement in 1976.

H.R. 2505

HON. WILLIAM W. COBEY, JR.

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. COBEY. Mr. Speaker, I am pleased to announce that today the House of Representatives passed H.R. 2505, a private relief bill on behalf of Mr. Kenneth David Franklin, of Raleigh, NC. This action has come about after 4 years of tireless efforts by Mr. Franklin.

In 1979, Mr. Franklin found himself in an unfortunate situation, when after working for the Department of Justice for 7 years, was forced to leave this position due to a progressive neuromuscular disease. At this time he was misinformed that he was ineligible for disability retirement benefits. Therefore, Mr. Franklin, believing that it would serve him no advantange to keep his funds in the system, withdrew his money from the Federal Retirement System.

A few years later and again having to leave a subsequent job, Mr. Franklin found himself in a catch-22 situation. Because he had not adequately contributed to his second job in the previous 10 years, he was not able to qualify for Social Security disability benefits. At the same time, he was still not able to qualify for any disability retirement. Mr. Franklin's attempts to rectify and failing to qualify for either source of retirement income was continually denied.

Even though the Office of Personnel and Management recognized that Mr. Franklin was in this difficult situation through no fault of his own, they were not able to act, lacking the authority to waive the regulations. Pursuing every avenue of possible relief to no avail, Mr. Franklin was left with no choice other than to seek private relief legislation.

This bill merely permits Mr. Franklin to apply for disability retirement and redeposit his funds in the Federal Retirement System. I am pleased to be able to see justice recited in this situation. Mr. Franklin has been extremely patient in awaiting this long overdue opportunity.

U.S. CUSTOMS COMMISSIONER HAS HURT INTERNATIONAL WAR ON DRUGS

HON. RONALD D. COLEMAN

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. COLEMAN of Texas. Mr. Speaker, the war against international drug smuggling may have been damaged irreparably by the recent irresponsible comments and unsubstantiated charges against Mexico by the United States Commissioner of Customs, William von Raab. As reported in the attached article by the Dallas Morning News, Mr. von Raab's testimony before the Senate Foreign Relations Committee, which contained numerous errors and used unsubstantiated rumors from informants as fact, has hurt relations with our third largest trading partner and ally. Tragically, the Commissioner may well have angered the Mexican Government to the point where it may refuse to continue to cooperate, and as we all know, without cooperation from Mexico, the war on drugs is hopeless.

The von Raab affair has once again underscored the fact that the administration has no Mexico policy. It raises the question: Who is in charge of relations with Mexico? Is it the Commissioner of Customs? Does the United States Secretary of State or the Department of State have any influence or impact on United States policy toward Mexico? Why is the Customs Commissioner allowed to testify before the Senate Foreign Relations Committee to deliberately and personally insult the President of Mexico and falsely accuse a Texas bank of laundering narcotics profits?

Mr. Speaker, top DEA officials characterize Mr. Von Raab as being out of control, not in command of the facts, and unable to be reined in. Is this any way to run an agency, much less our policy toward a major Western ally and southern neighbor? Mr. Speaker, the von Raab affair and the embarrassment it has brought to the Customs Service, the Department of the Treasury, and our international credibility should cause the Commissioner, at the very least, to consider the consequences of his ill-advised actions and to take immediate steps to repair the damage he has caused.

[From the Dallas (TX) Morning News, May 16, 1986]

U.S. OFFICIALS ASSAIL CUSTOMS CHIEF FOR CHARGES

WASHINGTON.—State Department and Justice Department officials declared angrily Thursday that William von Raab, commissioner of the U.S. Customs Service, may have harmed the war against international drug smuggling by making unsubstantiated charges against Mexican officials.

One U.S. official accused von Raab of "reporting rumor as fact" in testimony Monday and Tuesday before a Senate subcommittee investigating the role of Mexico in the U.S. drug trade.

"If we had a way of reining him in, we would do it," said one top U.S. drug enforcement official. "He's certainly not doing us any favors." Von Raab's office declined comment.

But a Customs Service spokesman admitted Thursday that von Raab was wrong when he said at the subcommittee hearings that illegal drug money had made a bank in the border town of Presidio the sixth-largest in Texas.

"It's not true," customs spokesman Jim Mahan acknowledged in response to an inquiry. "It was bad intelligence that came in to us from one of our field offices. I won't go any further than that."

In his testimony, von Raab also told the Senate subcommittee that Gov. Rodolfo Felix Valdes of the Mexican state of Sonora owns four ranches that grow opium and marijuana.

But administration officials who specialize in Mexican affairs said Thursday that informants had told U.S. officials that it was another governor, Antonio Toledo Corro of Sinaloa, who had the ranches and had entertained fugitive Miguel Felix Gallardo, who is accused of the 1985 murder of U.S. narcotics agent Enrique Camarena.

In Tucson on Thursday, the *Arizona Daily Star* published an interview with Felix Valdes in which he denied the allegation and said he was considering a libel suit.

The governor told the *Star* he suffered "irreparable political damage" and was "personally attacked and defamed for absolutely no reason."

Felix Valdes said he didn't own a "square meter of farmland in Sonora, much less four ranches."

In Washington Thursday, some U.S. officials—all of whom spoke on the condition they not be named—said that even the tips that von Raab repeated accurately are just that—tips from informants—and have not been nailed down.

One example was the assertion that members of Mexican President Miguel de la Madrid's family were involved in the drug trade. The tip, one source said, is that a cousin of the president has been smuggling narcotics from Colombia to Mexico City under cover of diplomatic immunity.

"We've heard those rumors, second- or third-hand—hell, von Raab got them from us—but it is not the kind of thing that even in the U.S. we could go into court on," one federal law enforcement official said. "Von Raab has absolutely astounded a lot of people at Justice and the DEA (Drug Enforcement Administration)."

Ironically, it was Drug Enforcement Administration Administrator John Lawn who originally pushed von Raab to get involved in the issues surrounding official Mexican involvement in drug trafficking after Enrique Camarana was kidnapped and tortured to death by Mexican drug dealers who were assisted by Mexican police.

But now they don't know how to turn him off, they said. And in repeating unverified statements given to the Drug Enforcement Administration by confidential informants, von Raab is doing much more harm than good, officials said Thursday.

During the subcommittee hearing, von Raab said the Presidio bank had a "cash flow of $7.1 million." Customs spokesman Mahan said Thursday that he could not explain what von Raab meant, or thought he meant, by the statistic.

"I don't know how that got into our report, but we apologize for it," Mahan said of von Raab's statement. "We have egg on our face, and I admit it."

Jose D. Leyva, vice president of First Presidio Bank, the only financial institution in the town of 2,500, said Wednesday his bank had total assets of $11.2 million. By comparison, Republic Bank of Dallas, one of the state's largest, had assets of $15.8 billion at the end of 1985.

The bank's cash flow is less than $2 million a year, according to bank President Richard Stack.

Texas Banking Commissoner James Sexton said he doubted the Presidio bank was among the largest of 888 state banks in Texas. The median total assets among Texas state banks is $45 million, Sexton said.

The claim "about us being the sixth-largest (bank in Texas), it's plain ridiculous," Slack said Thursday. "We're ready for inspection any time they want to come down and inspect us. We comply strictly with the law in this laundering business."

Federal law requires a bank to report any transaction of over $10,000 in an effort to deter the laundering of illegal profits.

In Washington, one top federal law enforcement official said Thursday that the Drug Enforcement Administration was worried that, in the next 24 hours, the Mexican government might tell the agency, which is allowed to operate in Mexico, to leave. "And

we don't want to leave," the official said. "Then we'd really have problems."

In a protest announced Thursday by the Mexican Embassy in Washington, Mexico accused the United States of sowing "suspicion, distrust and animosity" between the two countries by publicly suggesting that government corruption in Mexico is contributing to a sharp increase in cross-border drug smuggling.

The protest, addressed to Secretary of State George Shultz and delivered to the State Department Wednesday night, said the statements by senior U.S. officials at the Senate subcommittee hearings represented a "distorted view of Mexican reality" and constituted "a clear and unacceptable violation of Mexican sovereignty."

The protest note reiterated Mexico's view that the United States is not doing enough to combat drug production on its own territory and to crack down on domestic distribution and consumption.

INTRODUCTION OF SMALL BUSINESS DISASTER LOAN IMPROVEMENT ACT

HON. JIM ROSS LIGHTFOOT

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. LIGHTFOOT. Mr. Speaker, I'd like to call to my colleagues' attention a problem facing many rural communities. You've heard lots about the farm crisis and our farmers, but there's a neglected segment of rural communities that is hurting right along with the farmer: small business. As you can imagine, when farmers don't have cash for purchases, small town merchants' business dries up. Whether the merchant sells farm-related products or not, the rural small business needs help.

We're putting billions into farm programs, but the rural small businesses are left to fend for themselves. In many cases, the effects of dropping land values, 6 years of high interest rates, and dramatically reduced sales have caused many rural small businesses to close their doors. It's hard for a small business to survive for long on a 40 percent drop in sales.

For that reason, today I'm introducing legislation to expand the criteria for SBA nonphysical disaster loans. The economic problems facing rural small businesses are through no fault of their own, and in most cases, can be traced to the effects of Government action. But rural banks—already struggling themselves—are seldom in a position to help out ailing small businesses in their communities. The SBA can fill this gap but has refused to do so.

As you may be aware, programs have existed within SBA for the past few years to meet this need, but most applications have been denied.

Therefore, the legislation I am introducing will expand the criteria to make it easier for small businesses to qualify for economic disaster loans. We've had a program in place for the past several years to provide loans to businesses which have been hurt by such things as the PIK Program or the farm crisis, but the SBA, in most cases, has found excuses to refuse the applications which businesses file.

This bill will make it harder for SBA to turn those applications down. It will define that: One, a decrease in operating capital of over 25 percent over 1 year's time, or two, a decrease in sales volume over a 6-month period following some Federal action such as PIK, or the laying off of employees, are criteria that SBA must consider in determining eligibility for these disaster loans.

The bill will also prevent SBA from denying the loans, as they have been, on the basis of preexisting debt. This criteria alone has prevented many small business in rural America from qualifying over the past few years. The bill will be retroactive, as well, to 1982, so that those small businesses who were denied PIK-related disaster assistance will be able to reapply.

I ask your help in making these programs work. I urge my colleagues to join me in cosponsoring the SBA Disaster Loan Improvement Act.

TRIBUTE TO ROBERT M. EBERHARDT

HON. NORMAN D. SHUMWAY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. SHUMWAY. Mr. Speaker, at this time I would like to request that my colleagues join with me in paying tribute to Robert M. Eberhardt, who is about to receive the Distinguished Good Citizen Award from the Boy Scouts of America, Forty-Niner Council in Stockton, CA.

The Distinguished Good Citizen Award is bestowed upon those individuals who have demonstrated outstanding service to youth in the community. Bob Eberhardt is exceptionally well qualified to join the impressive ranks of those who have received this respected tribute.

While Bob's community service and volunteer contributions of time and effort have encompassed virtually every area of civic endeavor, his efforts on behalf of youth are particularly noteworthy. A strong and long-term supporter of Boy Scouts, Bob was especially instrumental in promoting scouting ideals. His dedicated work has benefited not only young scouts themselves, but also those trained for scouting as a career. Through his service with the University of the Pacific's Board of Regents, Bob Eberhardt played a strong role in encouraging the training program for such careers at UOP.

A past director of the Boys Club of Stockton, Bob always has provided a fine example for youth to emulate. Few individuals can claim his outstanding record of achievement, or his equally respected roster of giving. He is a successful professional, an admired family man, and a man who always finds time to share his knowledge, experience, and leadership abilities with every worthy civic cause.

Bob Eberhardt always demonstrates what I consider to be an American ideal: Sharing his own success with others, and paving the way for young Americans to follow in his footsteps. I am strongly committed to the spirit of volunteerism in America, and Bob Eberhardt exemplifies the importance of that ideal. More importantly, his tireless contributions have demonstrated how positive and beneficial volunteerism can be in molding good citizenship for future generations.

I am pleased and proud to count Bob Eberhardt among my good friends, and to have the honor of representing him in the Congress. I know that my colleagues will be pleased to join with me in congratulating Bob for this most recent acknowledgement of his numerous achievements, and in expressing appreciation to him for his admirable work.

TAIWAN SHOULD FREE MR. YAO

HON. JIM LEACH

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. LEACH of Iowa. Mr. Speaker, I recently had the privilege to visit with Chou Ching-yu, a distinguished member of the Taiwan National Assembly and a leading democratic opposition figure and human rights advocate on the island, who is visiting the United States as a participant in the International Visitor Program sponsored by the United States Information Agency (USIA).

A psychiatric social worker by profession, Chou Ching-yu is the wife of Yao Chia-wen, a distinguished human rights lawyer who is presently serving the seventh year of a 12-year prison sentence handed down by the authorities in Taiwan in the wake of the 1979 human rights day rally in Kaohsiung.

It is an embarrassment to our age that any government anywhere finds the advocacy of human rights and democracy a challenge to its legitimacy. Although Taiwan properly prides itself on its strong anticommunist stance and its alliance with the free world, the government's commitment to democratic values and principles is unimpressive. The continued incarceration of democratic oppositionists like Mr. Yao is an embarrassment to friends of Taiwan and a stumbling block to internal reconciliation. The much appreciated release of Lin Yi-hsiung and Rev. Kao Chun-ming make it difficult to understand why the authorities in Taiwan have refused thus far to commute Mr. Yao's sentence.

Along with my colleagues concerned for the future of Taiwan, I would respectfully urge Taiwanese authorities to reconsider Mr. Yao's case. His continued incarceration is disproportionately important because it is perceived by the American people as a test of our mutual commitment to freedom and democratic values. In the absence of formal diplomatic ties between the United States and Taiwan, the closeness of ties between the American people and the people of Taiwan rests heavily on perceptions. To the degree that a government finds it necessary or convenient to imprison individuals for defending democratic rights it cannot help but find its reputation tarnished and its friendship valued less highly.

In meeting with Chou Ching-yu, I was struck by her remarkable spirit in the face of the personal hardships she and her husband have

suffered. Out of adversity has emerged a courageous commitment to national politics. Drawing on her professional experience as a psychiatric social worker, Chou Ching-yu has ministered to the needs of other political prisoners and their families. To that end, she established in 1981 the Taiwan Care Center which arranges for visits to political prisoners, medical assistance, financial help at the time prisoners are released, and encouragement and support for the families of those being held. The center also publishes "Care" magazine, a much respected periodical. Chou Ching-yu's initiative serves as a model for her own island and for countries where citizens are placed in jail for upholding the fundamental rights of citizenship. Chou Ching-yu's efforts to work with the families of political prisoners is a credit to the Taiwanese people and a tribute to all who carry the torch of democratic ideals.

Again, Mr. Speaker, it is my hope that the authorities in Taiwan, in a spirit of compassion and tolerance for democratic dissent, will review the case of Mr. Yao and authorize his early release.

Thank you.

NATIONAL TOURISM WEEK

HON. TOBY ROTH

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. ROTH. Mr. Speaker, among the many countries on Earth, the United States indisputably contains some of the grandest, most scenic, and most beautiful of natural treasures. These sites are home to numerous outdoor activities. Furthermore, the United States also contains some of the most developed and exciting urban areas anywhere. Our own wealth of natural and manmade resources has enabled the travel and tourism industry to become America's third largest retail industry.

Travel and Tourism accounts for some stunning economic and employment data. For example, most firms which benefit from travel and tourism are small businesses. They provide jobs for people in the food services, the lodging businesses, and the transportation industries, among others. Travellers collectively spent $229 billion on these services. In my own home State, Wisconsinites count on tourists to support 106,000 jobs, or 5.8 percent of all jobs in Wisconsin.

Among the locations that draw visitors to Wisconsin are the Northwoods and Door County, two prime outdoor locations for fishing, camping, and nature watching. These popular places are promoted in Rand McNally's new book, "Vacation Places Rated—Finding the Best Vacation Place in America," as among the top vacation spots in the Nation. The importance of these areas to Wisconsin's economic well-being is almost immeasurable.

Tourism has a social, as well as an economic, benefit. Travel allows for interaction among the diverse people of the United States. Besides helping reduce our balance-of-trade deficit, foreign visitors bring an important form of social interaction to Americans by traveling in the United States. They bring an international perspective to the country that only helps Americans to understand foreign attitudes. The social benefits entail a mutual understanding by travelers and residents of various cultures, mannerisms, backgrounds, and experiences. This occurs through the sampling of new cuisines and the viewing of local heritage.

I am pleased that this week, May 18–24, 1986, has been recognized as National Tourism Week by the Congress and by the President. Travel and tourism should properly be recognized as the prominent economic and social force it truly is. Through such recognition we show our approval of the industry and support the small businessmen who constitute a large part of the industry.

These hardworking men and women are notable in their devotion and commitment to the tourists; they make sure that attractions are in functioning order and they make facilities safe for mass use. The trade they inspire serves not only their financial goals, but also serves the whole Nation by stimulating employment and by producing tax revenue. And of course, the social aspect of their work must also be highly regarded.

The travel industry plays an important role in our Nation. This year the dedication of tour operators, travel agents, restauranteurs, and hotel owners will be all the more necessary since they will host one of the largest tourist groups in recent memory. The United States will attract an enormous number of foreign visitors because of the attractive exchange rate of their currency against the dollar. Furthermore, more Americans will choose to travel domestically this year and catch the spirit of seeing all of what these United States have to offer. Gas prices promise to be low all summer, so Americans as well as foreign guests will be traveling to various tourist areas relatively cheaply.

All these factors could add up to a banner year for the Nation's tourism industry. We are taking a step in the right direction toward promoting the economic and social benefits of tourism by celebrating National Tourism Week. The theme of this week is "Tourism Works for America." I certainly agree that it does. As a member of the Steering Committee of the Congressional Travel and Tourism Caucus, I urge my colleagues to give their strongest possible support to an industry whose health is crucial to our economy.

CHRISTIAN ADVOCATES FOR PUBLIC EDUCATION

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. RODINO. Mr. Speaker, last Saturday I was pleased to attend the First Annual Teachers Brunch, held by the Christian Advocates for Public Education of Essex County at the Bethany Baptist Church in Newark.

The brunch was held to encourage and support teachers and school administrators in their efforts to maintain quality education in the community.

C.A.P.E. was established in 1981, with the help of fine people like Beverly Dunston-Scott, now its president, and Dr James Scott, pastor of the Bethany Baptist Church. Its mission is the establishment of a network of parents, children, teachers and administrators to focus on overcoming obstacles to teaching and learning.

Mr. Speaker, I commend Beverly and James Scott and the other members of C.A.P.E. who have worked hard to make Newark a better place to teach and learn. I commend to you the following Statement of Purposes and Objectives of C.A.P.E.:

CHRISTIAN ADVOCATES FOR PUBLIC EDUCATION, INC.

PURPOSES AND OBJECTIVES

The Christian Advocates for Public Education (C.A.P.E.) is an interchurch group of men and women concerned about public education and strives to establish a network among persons who seek to apply Christian ethics to educational issues. The group represents several Protestant Churches in Essex County. There is no attempt to convert children or parents to a religious philosophy. C.A.P.E.'s concern reflects the belief in the human worth and dignity of all God's children.

PURPOSES

To establish a network among churches, families and schools that: (a) encourages parental participation in the education of their children; (b) strengthens parent/child relationships; (c) provides positive male and female role models for children of various ages; and (d) addresses major problems impeding learning and self-discipline.

OBJECTIVES

1. To provide a supportive environment for one and two parent families that addresses problems and pressures of child-rearing, and offers constructive methods for dealing with these problems/issues.
2. To develop an understanding of communications as a two-way process between parents and children.
3. To increase parental understanding of human sexuality so that they may deal constructively with matters of dating, sexual behavior and problems of pregnancy.
4. To maximize existing strengths of parent/child relationships and propose alternative ways to discipline children.
5. To increase parent's understanding of their role and responsibility in nurturing self-discipline within their children.
6. To expand parental understanding of self-discipline as necessary for academic achievement and social growth.

LOMOND ELEMENTARY SCHOOL: AN EXAMPLE OF EXCELLENCE

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. STOKES. Mr. Speaker, I am very proud to announce to my colleagues that Lomond Elementary School in Shaker Heights is one of two schools in the 21st District of Ohio nominated for an award given by the U.S. Department of Education to the Nation's most exemplary elementary schools.

Lomond is a science and French magnet school, and it is indeed an outstanding elementary school. It is a visually exciting place

where student work is prominently displayed throughout the building and a student-centered, multicultural atmosphere is clearly projected. Lomond hosts a climate where learning is meaningful and exciting and parents, staff, and community members are encouraged to participate in and benefit from the learning experience.

It is the students, however, who reap the greatest benefit. The active, achievement-oriented environment of Lomond makes students eager to attend school. This is evidenced by the average daily attendance rate of 97 percent. The children are also mastering basic skills: Standardized Achievement Test scores for 1984–85 show that 92 percent of Lomond students were at or above grade level in math, 94 percent scored as well in reading. The school is ethnically and racially balanced and the 464 member student body includes five children from Japan, four from Poland, three from Taiwan, two from Korea, and one from mainland China which lends the school cultural diversity as well.

But what makes Lomond a unique school, Mr. Speaker, is the innovative, ambitious, and creative approach to learning taken by Principal Dr. Albert G. Roberts and his staff of 40 dedicated professionals. They are constantly seeking new ways to keep the students interested in learning and challenging them to reach for the sky.

For example, classroom lessons at each grade level are enhanced by special field experiences, using outside resources such as the Cleveland Zoo, Sea World, NASA, Shaker Lakes Nature Center, Cleveland Natural History Museum, Art Museum, SHHS Planetarium, and Severance Hall. In June, Lomond sixth graders will be going on an archeological dig with Case Western University. This past April, 49 Lomond pupils participated in an exchange program with school children from Canada. According to Principal Roberts, the goal of the exchange program was to help the youngsters develop a sense of the interdependence of the two countries and to foster a sense of respect for cultural differences.

Mr. Speaker, Lomond School also recognizes the importance of being a part of the community. For example, the school hosts a French breakfast so that neighborhood residents who don't have children in Lomond can visit and share in the excitement of active learning.

Perhaps the most important aspect of the Lomond School mission is its emphasis on science and French education which is integrated throughout the curriculum. At a time when there is national concern regarding American students' achievement in scientific disciplines, Lomond's concentration in that subject area encourages and promotes analytical thinking and problem solving—skills that will assist its students in all aspects of life. Similarly, the school's French and language programs improve communications skills and demonstrate to the children that the nations of the world are dependent on one another and that the knowledge and understanding of different cultures promotes global harmony.

Mr. Speaker, I am very proud that Lomond Elementary School has been recognized by the U.S. Department of Education and wish to extend my most sincere congratulations to Principal Dr. Albert G. Roberts, and the students, staff, and parents of Lomond School for distinguishing themselves and their community through the school's performance and selection in the exemplary elementary school competition.

BRIGHAM YOUNG UNIVERSITY CENTER FOR NEAR EASTERN STUDIES IN JERUSALEM

HON. RICHARD STALLINGS

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. STALLINGS. Mr. Speaker, I rise today to express my gratitude to 153 of my colleagues who have joined me in signing a letter to the Israeli Knesset regarding the building of the Brigham Young University Center for Near Eastern Studies in Jerusalem.

Mr. Speaker, Brigham Young University, a school with an outstanding academic tradition, is attempting to provide its students with a well-rounded education in many cultures. Because of this goal, BYU has established centers in many regions of the globe where students can spend one or two semesters during their education studying in a foreign country. BYU has centers in Europe, Asia, and Central America. In addition, BYU has a center in Israel for Near Eastern Studies. This facility is quite small and BYU is attempting to expand that facility.

The expansion of the BYU facility in Jerusalem has drawn fire from some orthodox Jews who feel that the BYU center could become a base for missionary activity for the church which sponsors BYU, the Church of Jesus Christ of Latter-day Saints. I understand this concern. However, BYU has a long-standing policy that its Jerusalem Center not be used as a base for proselytizing for the Mormon Church. The center's sole purpose is to serve as a facility for better educating students.

Last summer, I had an opportunity to travel to Israel to meet with leaders of the Israeli Government and the mayor of Jerusalem. I saw first hand the center which Brigham Young University is building and I also witnessed demonstrations by a small group of religious leaders protesting the BYU building. After talking with the demonstrators, it became apparent to me that there has been a misunderstanding between the two groups. The protestors did not want missionaries proselytizing, but they also failed to understand that the officials of BYU also did not want, nor would they allow, students at the center to proselyte Jews into the Mormon faith. The center which BYU is constructing is purely for academic purposes.

Because of my experience in Israel and my personal friendship with Jeffrey Holland, the president of BYU. I volunteered my help to BYU in securing a resolution to the confrontation in Jerusalem. Last month, I was approached by officials from Brigham Young University and asked if I would draft a letter from the Congresss of the United States to the Israeli Knesset requesting that progress on the BYU center not be impeded. I was pleased to assist in the drafting of this letter. I was joined by my colleague from California, the Honorable RON PACKARD, in asking other Members of Congress to sign this letter. I originally hoped that we could obtain 50 signatures, but I was overjoyed when 153 of my colleagues joined this effort, including the leadership of both political parties.

This letter reaffirms our commitment to Israel and its longstanding support of democracy and plurality. Israel has historically been a true friend and ally. This letter requests that Israel maintain its commitment to the basic freedoms, respect for human life, dedication to democractic principles and freedom of religion.

I am convinced that the hundreds of BYU students who travel to Israel to participate in this study program will serve as excellent ambassadors for both countries. I think it will help foster the spirit of understanding and cooperation between our two nations.

The letter who had delivered to the Knesset yesterday by President Holland and I understand that it was well received. I also have learned that a legal opinion was handed down yesterday by the office of the attorney general of Israel that stated that there was no possible way to revoke Brigham Young's current building permit or its permit to use the land. The center already has a building permit and approval from the mayor of Jerusalem.

In closing, I want to once again thank my colleagues who signed the letter. I know more Congressmen would have signed the letter if we had not been under such strict time constraints.

FRIENDSDAY BRINGS PEOPLE TOGETHER

HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. LEHMAN of Florida. Mr. Speaker, mental illiness is truly a community problem. It strikes people irrespective of age, income, race, religion or gender. Mental illness can destroy careers, disrupt families, separate friends, and ruin lives. Unfortunately, cutbacks have been made in Government mental health programs, stretching the resources of local mental health agencies to the limit.

The people of Dade County have found a way to help fill in the gaps in the fight against mental illness. On May 31, the Community Mental Health Agencies in Dade County will join with the MetroDade County Commission, the city of Miami, the city of Hialeah, Hospital, and thousands of caring and concerned citizens for the first annual Friendsday celebration.

Friendsday provides an opportunity for people to express their support and encouragement to those who are on the road to rehabilitation and recovery. It will include over 2,000 participants competing in a wide variety of athletic activities and will feature appearance by government leaders, well-known entertainers, members of the Miami Dolphins football team, and local media personalities.

Mr. Speaker, I want to commend everyone who has worked so hard to make Friendsday

a reality. Their efforts in our community demonstrate what friendship is all about.

STATEMENT HONORING DR. JAMES BIRREN, RETIRING DEAN AND DIRECTOR OF THE ANDRUS GERONTOLOGY CENTER, UNIVERSITY OF SOUTHERN CALIFORNIA

HON. EDWARD R. ROYBAL

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. ROYBAL. Mr. Speaker, I rise today before my colleagues to recognize and honor Dr. James Birren, distinguished educator, research scientist, and public activist in the field of gerontology. Over the last four decades Dr. Birren has helped to raise the country's awareness about the issues confronting older Americans. His commitment to the field of aging in both the policy arena and in academia has been consistently manifested at the the local, national, and international levels. Through Dr. Birren's leadership and innovation, the Andrus Gerontology Center at the University of Southern California, of which he is dean and director, was developed. It has evolved into the largest and most well respected academic gerontological center in the Nation.

The impact of Dr. Birren's work can be seen in the advancement of scientific knowledge concerning the basic processes of aging; in the building of organizations which respond to the needs of the elderly, and in the development of a multidisciplinary context in which to teach students both aging policy and practice methods. In his role as educator, Dr. Birren has conducted a tremendous amount of scholarly research and has written over 210 publications. He has also been a mentor to many fine students, two of whom are currently working as staff directors of the House and Senate Committees on Aging. Furthermore, as advisor and committee chairman of the White House Conferences on Aging, he has helped shape national policy.

Appropriately, Dr. Birren's accomplishments have been internationally recognized by numerous honors and awards. He was elected executive committee chairman of the International Association of Gerontology, was awarded the coveted Brookdale Foundation Award for Meritorious Research, and earned an honorary doctorate from the University of Gothenborg, Sweden, to name a few.

A career spanning this wide range of contribution and accomplishment is indeed unique. Despite his retirement as dean of the Ethel Percy Andrus Gerontology Center, Dr. Birren will continue to influence the field of gerontology through his teaching and research. Mr. Speaker, I ask my colleagues to join with me in wishing Dr. James Birren much success in his retirement. We are proud to honor an individual of such high caliber who has not only been a catalyst for scientific progress in the field of gerontology, but who has responded with so much energy and commitment to the needs of older Americans.

THE FIGHT AGAINST NEUROFIBROMATOSIS CONTINUES

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. CONTE. Mr. Speaker, today, I rise to draw the attention of my colleagues to a disease which attacks many Americans of all ages. Neurofibromatosis has historically been one of the least understood diseases which affect men and women worldwide. The first time that this disease was given serious and sober consideration was with the case of Joseph (John) Merrick, frequently referred to as the elephant man. So many people are well acquainted with this brave man's story that there is no reason for me to go into the details. Suffice it to say that with Mr. Merrick's case, nearly 100 years ago, the first honest attempts to understand this disease began, and this struggle has continued through today, when numerous areas of society are joining to find answers to the riddles posed by this neurological disorder.

The National Institute of Neurological and Communicative Disorders and Stroke has led the national research fight to find the causes and treatments of neurofibromatosis. This fiscal year, the NINCDS expects to spend over $3.7 million on research pertaining to neurofibromatosis and related neurogenetic disorders, including $559,000 for projects directly related to neurofibromatosis.

In the private sector neurofibromatosis research is supported by groups like The Neurofibromatosis Association, Inc. As well as promoting resarch into neurofibromatosis, NFA provides information and support to families inflicted with the disease and strives to educate the public about the various facets of neurofibromatosis.

A proclamation made by Governor Michael S. Dukakis of Massachusetts marked May 1986 as Neurofibromatosis Awareness Month in the Commonwealth of Massachusetts. I would like to take this opportunity to add my voice to Governor Dukakis'. With so many people working at so many levels, I remain confident that the mystery of neurofibromatosis can be solved, and that people throughout the world can be spared from the agony of this disease. It wil not be easy, but we have no alternative but to continue fighting neurofibromatosis.

LET'S COME TO GRIPS WITH THE REAL TRADE BARRIERS

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. CRANE. Mr. Speaker, the time has come for us to take a good hard look at the U.S. trade imbalance, what is causing it, and what we are doing about it. The House is about to consider major trade legislation. I urge my colleagues to consider carefully the impact of their votes. The enactment of any protectionist legislation such as the bill currently being considered is dangerous and ill advised. Protectionist measures invite retaliation by our trading partners, which will ultimately make it more, not less difficult to sell American goods abroad. All of this spells economic disaster. We dare not forget that the Great Depression was ushered in by a protectionist bill, the infamous Smoot-Hawley Act.

Instead of enacting protectionist legislation, we must come to grips with the fundamental issues that affect the trade imbalance. Among these is the question of productivity. Over the past 3 years, the rate of American productivity growth has increased from nearly zero to only 3 percent per year. Compare this to the performance of other industrialized countries such as Japan, which has sustained 8 percent annual productivity growth for a longer period. The result is that Japan's productivity has increased 45 percent more than that of the United States over the past 8 years.

What are the causes of our lackluster performance in productivity growth? Our low rate of capital formation is surely a factor. The rate of capital formation per worker in the United States in recent years has only been about one-third of that of Japan. Capital costs are also about 5 percentage points lower in Japan than in the United States.

Additional blame for this situation is the fact that we have created an environment that is not particularly conducive to industry growth. Excessive regulation, tax laws that penalize savings, and deficit spending by the Federal Government have all contributed to the evolution of this environment.

We have set up balky and excessively stringent regulations such as the corporate average fuel economy [CAFE] standards, which dictate to carmakers the fuel economy their products must meet. This hinders the ability of American automakers to compete and is the kind of decision that should be made in the marketplace, and not by the Government.

Our tax laws do not encourage either private citizens or corporations to save. As a result, the United States has one of the lowest rates of savings in the industrialized world. This means that there is less money available to finance growth.

And our deficit spending necessitates Government borrowing which further depletes the pool of funds available for capital expansion while pushing up interest rates and unnaturally inflating the dollar.

The net result of all of this is a system that enourages neither investment in tangible capital or in research and development. It is time we came to realize the comprehensive nature of our trade imbalance. No trade bill alone will solve all our trade problems, and a protectionist trade bill can only make them worse. Protectionist legislation is an invitation to disaster. Let us instead come to grips with the REAL trade barriers that we have erected ourselves.

George N. Hatsopoulos, in the May 14, 1986 Wall Street Journal, writes convincingly on the need for us to address our productivity crisis. I commend the article to my colleagues' attention and include it here.

[From the Wall Street Journal, May 14, 1986]

PRODUCTIVITY LAG IS REAL TRADE BARRIER

(By George N. Hatsopoulos)

What the U.S. has "lost" in trade imbalances over the past five years for the most part has been "found" by just five countries: Japan, West Germany, France, Italy and Canada. These gainers in market share are not low-wage, underdeveloped nations of the Third World. They have well-developed manufacturing sectors and relatively high standards of living. And they are gaining on the U.S. because of their increased productivity.

An overvalued dollar has often been cited as a cause for the U.S. trade crisis. Exchange rates have played a part, though they are cyclical and for the most part self-correcting.

What ought to occupy our attention now is U.S. industry's long-term problem of high costs, both for the production of existing products and the development of new ones. This disadvantage, which threatens to further worsen our trade balance in years to come, can be seen in cost comparisons between the U.S. and its major competitor, Japan.

JAPANESE PRODUCTIVITY

From 1977 to 1985, labor costs per unit of output in manufacturing rose 50% more in the U.S. than in Japan, even though real wage costs per hour rose by 20% *less* in the U.S. The gap is thus 70%, of which changes in the exchange rate account for only 25%.

The rest of the explanation lies in productivity. During the past three years America's manufacturers increased their rate of productivity growth from near zero to about 3% per year. However, Japan has registered 8% annual gains over a far longer period. As a result, its productivity has increased 45% more than that of the U.S. in the past eight years.

It is unlikely that U.S. manufacturers can sustain even the present 3% rate of productivity growth, because the recent gains were scored during an economic recovery. Moreover, proposed tax-reform legislation is likely to retard capital formation and further slow U.S. progress in this area.

Why does the U.S. lag in productivity growth? Until recently the explanation was that other countries started from a much lower base. This answer is no longer credible, however, for Japan's manufacturing productivity, in absolute terms, has actually reached that of the U.S.; yet its rate of growth has continued unabated.

Instead, the major reason can be found in America's sluggish rate of investment in both tangible and knowledge-related capital. Over the past few years, the rate of tangible capital formation per worker in the U.S. has been less than one-third of that in Japan. Athough no data exist on knowledge-related capital, the disparity there may be even greater.

Equally clear is the reason behind the poor U.S. record of investment. It is the high cost of capital—the threshold rate of return from an investment adjusted for inflation—required to cover payments demanded by investors and lenders and to satisfy all tax liabilities. The primary determinant of capital formation is the cost of capital relative to the cost of labor. By my calculation using a formula developed by Profs. Dale Jorgenson of Harvard and Robert Hall of Stanford, the real cost of capital in Japan in 1984 (latest data available) was only 2½%. In the U.S., it was 7½%.

Capital costs are much lower in Japan because the financial environment is more favorable to industry than in America. Although Japan has a higher corporate tax rate and no investment tax credit, such disadvantages are greatly outweighed by what's afforded by Japan's financial system. Japan's national savings rate is much higher than America's. In Japan, debt vehicles that would be considered equity in the U.S. allow much more leveraging of capital. No Glass-Steagall Act exists to prevent bankers from lending to companies in which they hold an interest. And, of course, equity appreciation is not subject to a capital gains tax, which encourages companies to retain earnings rather than distribute them as dividends.

This system, and not any break in direct corporate taxation, provides industry with lower real interest rates, a lower real cost of equity, and access to a much greater proportion of investment funds having tax-deductible returns than does the U.S. financial system at a comparable risk.

The U.S. is now nearly 45% worse off in the productivity war than it was in 1977. Next year the difference will be 50%, the following year 55%, and so on until we cure our fundamental weakness. Time alone won't correct this problem.

With Japan's cost of capital only one-third that of the U.S., it is not surprising that Japanese managers invest more and can afford to undertake longer-term projects than can their U.S. competitors. So fundamental differences in managerial culture are not necessary to explain Japan's takeoff. Any manager who acts rationally in the U.S. environment of high capital cost—even a Japanese manager coming here—would have to invest less because that policy provides the optimum benefit to shareholders.

High-technology industries provide no refuge for the U.S. in its struggle to regain competitive advantage. The Japanese are now actively targeting such industries for special marketing, research and development, and investment support, just as they have done in the past with steel, automobiles and other basic industries. America may be even more vulnerable in the high-tech sector, relative to traditional industries, because its cost of capital disadvantage is even greater for intangible investments, (i.e., knowledge capital) than it is for plant equipment and other physical assets, which have enjoyed higher levels of tax credits.

It may require five to 10 years of R&D to introduce products based on new technology. Such investments are undertaken only in an environment where costs, especially capital costs, are low enough to justify the wait.

U.S. trade deficits must be cut if America is not to accumulate so much foreign debt it will be hard pressed to pay it off. In the short run this is going to require not only the continuing wage restraint but a further fall in the dollar. Parity in unit labor costs would require its decline to about 140 yen from about 160 yen currently. But the bigger concern remains productivity.

For now, U.S. manufacturers will have to offer significant price concessions to regain their market share. The disparity in productivity growth between that of the U.S. and that of other industrialized nations will maintain the cost pressure on U.S. manufacturers that has led them in the past to curtail development at the expense of product equality.

The perennial victim of the U.S.'s chronically weak productivity growth is, of course, the American worker. According to the 1986 Economic Report to the President, real hourly earnings in the U.S. have remained unchanged for the past 15 years.

In the long term, America's competitive position can be restored only through a comprehensive national campaign designed to close its enormous investment gap. No single measure can resolve the problem—the U.S. must use all the tools at its disposal, including credit, tax and monetary policy.

Increased capital formation can be achieved only by lowering the cost of capital, which in turn requires raising our national rate of savings. Higher savings demand that we curtail consumption in the short run in order to provide the resources needed for the long-term expansion.

CHALLENGE OF THE 1980'S

Some might suggest that little can be done to modify ingrained behavior patterns sufficiently to stimulate the needed boost in national savings. In fact, America's response to the energy crisis provides ample proof that seemingly intractable habits can change dramatically, once a consensus for action has been created. Through a combination of economic forces and concerted policy initiatives responding to the 1973 oil embargo, the U.S. has been able to arrest the seemingly relentless rise in energy demand that was once widely thought to be an essential ingredient of economic growth. In 1985, Americans consumed virtually the same amount of energy as they did in 1973—and produced 35% more goods and services.

America's productivity challenge of the 80s is no less threatening than the energy crisis of the 70s. Eliminating the many subsidies that encourage consumption at the expense of capital formation will not be an easy task. Only awareness and understanding will see us through.

Mr. Hatsopoulos is chairman of Thermo Electron of Waltham, Mass.

CHAMBERS ELEMENTARY SCHOOL: AN EDUCATIONAL SUCCESS STORY

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. STOKES. Mr. Speaker, a success story is currently unfolding in my district that I would like to bring to the attention of my colleagues. The characters involved include some of my youngest constituents, a group of dedicated educators, and a resourceful, creative, and committed elementary school principal. The story is presently taking place at Chambers Elementary School, in East Cleveland, OH, which has recently been selected as a finalist in the U.S. Department of Education competition for excellence in elementary schools. Clearly, this honor is well-deserved.

Mr. Speaker, I have visited Chambers on several occasions. The children are bright, curious, and eager to learn. The teachers are interested, caring, and they challenge the children. The principal, J. Joseph Whelan, is an innovator and acutely sensitive to the needs of his students and staff. During his first 13

years as principal of Chambers he was forced to operate in a deteriorating school building that was consistently cited for safety building code violations. A grassroots community movement finally forced the board of education to seek a bond issue that resulted in the construction of a new building for Chambers.

Mr. Speaker, I participated in the groundbreaking ceremony for the new school, and believe that the start of a new building also represented a fresh start for the children of East Cleveland. Principal Whelan has taken good advantage of the new building and the accompanying uplifted attitudes and spirits of the staff and children to implement new programs which have enabled the students to excel in that environment.

The progress of Chambers Elementary School was recently detailed in an article appearing in the Cleveland Plain Dealer. I submit this article for inclusion in the CONGRESSIONAL RECORD, and salute Chambers Elementary School on being selected as a finalist in the Education Department's excellence in elementary schools competition.

[From the Plain Dealer, Apr. 26, 1986]

E. CLEVELAND SCHOOL DRAWS A BEAD ON EXCELLENCE

(By Terry Fuchs)

The odds against East Cleveland's Chambers Elementary School are more than most schools could probably beat.

Each year, one fourth of the school's 760 pupils are new students, which often means they are below grade level in basic skills.

About two-thirds of the pupils come from single-parent homes, where they may not always get support needed to do well in school.

Three-quarters are from low-income families and often arrive at school without proper clothing.

But Chambers has managed to overcome these odds. As proof of its efforts, the school is a finalist in the U.S. Education Department's competition for excellence in elementary schools.

The extra effort can be seen everywhere.

During the winter, Principal J. Joseph Whelan stands at the school entrance handing out mittens to pupils from needy families.

At the beginning of the year, teachers call parents to introduce themselves. And throughout the year Whelan and teachers enforce a strict homework policy. All of this is to encourage parental involvement.

But more obvious of all, there is the new school.

Ten years ago Chambers was an overcrowded, crumbling, three-story brick building on Shaw Ave. Paint and plaster were peeling; pipes and wires were exposed. City building inspectors had cited the school for safety building code violations.

There was one girls' and one boys' restroom for 1,028 pupils.

"We organized a parent group and always had someone at the school board meetings," said Lucille Wooden, who had a grandson at the school. "We spent a year and a half badgering them (the school board)."

They successfully pressured the board to seek a bond issue for building improvements, which passed in 1978.

In the summer of 1982 the old building was demolished. In its place is now a barren field, awaiting a playground and parking lot. In the fall of 1982, the new, $4 million school opened its doors.

Upon entering the brown-brick, multilevel building, it's almost possible to forget it's a school. A lobby leads into an atrium with plants and numerous wall hangins.

Each grade's classrooms, from kindergarten through sixth grade, are identified by a different color, as is the gymnasium and cafeteria.

Whelan, who began his 17-year tenure as principal at the old school, says the new building, with its new atmosphere, has improved the attitudes of both pupils and staff. "The children feel safe and happy; they feel good in here," he said.

Whelan also likes to show off the other "extras" he feels contribute to Chambers' success.

A special program teaches pupils at the all-black school about the Statue of Liberty. "We feel that blacks do not really know what the statue is all about, since it (the statue) is more of an ethnic thing, for people coming over from Europe, when the blacks were already here," Whelan said.

Each Friday, Whelan invites six pupils to have lunch with him "to eat and talk about me and my personal life. And they do ask about my personal life!" he said, laughing.

A scholarship fund was established in memory of Annette Lawrence, a Chambers teacher murdered three years ago. A $500 college scholarship is awarded each year to a senior high school student, and a computer is given to a sixth-grade pupil.

Teachers are honored for perfect attendance and for years of service. Whelan gives them flowers at least once a month to show his appreciation for their work.

On May 1 and 2, U.S. Education Department evaluators will visit Chambers as part of an elementary school recognition program. The evaluators will visit classes, meet with staff, and talk to members of the community. Chambers, along with Shaker Heights' Lomond Elementary School and North Olmsted's Forest Elementary School, is one of the 257 finalst schools throughout the nation.

The winning schools will be named in June, and representatives from them will be invited to Washington for a national recognition ceremony and receive a specially designed flag. There is no pre-determined number of winners, according to Patricia McKee, director of the recognition program.

A TRIBUTE TO ANITA HIRSCH

HON. HOWARD L. BERMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. BERMAN. Mr. Speaker, I rise today to pay tribute to a truly outstanding individual, Anita Hirsch. For many years Anita has been an inspiration to those of us who are deeply committed and dedicated to the cause of Soviet Jewry.

On May 18, Anita will be honored at the annual dinner of the Community Relations Committee of the Jewish Federal Council for her tireless leadership on behalf of Soviet Jews. As the Representative for California's 26th District, and as one who feels honored to have Anita as a close friend, I ask my colleagues to join me in paying tribute to this exceptional member of the southern California community.

Anita has journeyed to and from the Soviet Union with great frequency since her first trip in 1981. Her travels have been made for the purpose of maintaining a life link between Jews of the free world and those who live under the oppression of the Soviet Government.

Functioning in a diplomatic behind-the-scenes manner, Anita operates in a way that is always consistent with the overall objectives of the organized Soviet Jewry movement in this country. She participates on a national, as well as an international level—attending meetings on Soviet Jewry in Europe, Israel, Washington DC, and New York.

In Los Angeles, she is a driving force behind the Commission on Soviet Jewry of the Community Relations Committee. It was her hard work that made possible the concept and production of "A Tribute to Soviet Jews," which was published in connection with the 1984 Olympic games in Los Angeles.

As a member of the briefing committee of the Commission on Soviet Jewry, which prepares travelers for their visits to the Soviet Union, Anita contributes the insight and knowledge acquired through her extensive travels. Her intimate understanding of the culture and customs of the Soviet Union, as well as her friendship with both European and American activists make her an invaluable committee member.

Through the selfless dedication of Anita Hirsch, hope is nourished for hundreds of Soviet Jews. It is with great pleasure and honor that I join with my colleagues and the Jewish Federation Council to pay tribute to Anita Hirsch for her many years of dedication, guidance, wisdom and commitment to the cause of Soviet Jewry.

JACK SHILLINGER HONORED BY NATIONAL CEREBRAL PALSY GROUP

HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. LEHMAN of Florida. Mr. Speaker, at the 1986 Annual Conference of United Cerebral Palsy Associations held in New Orleans earlier this month, Jack Shillinger, a friend and constitutent, received the President's Award for the outstanding contributions he has made to United Cerebral Palsy and for his work on behalf of people—particularly children—with cerebral palsy.

If ever an award was well-deserved, it is this one.

Jack Shillinger has worked selflessly over 20 years for cerebral palsy people as an association adviser, organizer, fund raiser and board member. From time to time, he has been asked to lend his special skills to help other cerebral palsy groups in Florida and around the Nation. His efforts have made a big impact on our community and on the lives of hundreds of families and individuals.

A modest person, Jack Shillinger never sought public recognition over the years, choosing instead to take personal satisfaction in his community service work for cerebral palsy people and Temple Israel of Greater Miami. You can't keep such a distinguished

record of service and accomplishment hidden forever, though. It is heartwarming to know that Jack was chosen for this award, because in his case, the "outstanding contributions" mentioned in the award are all true.

I know my colleagues join me in extending to Jack and his wife, Marjorie, our heartiest congratulations and thanks for a job well done.

ETHICS IN GOVERNMENT ACT

HON. GERRY SIKORSKI

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. SIKORSKI. Mr. Speaker, today I join with two of my distinguished colleagues in the Senate, Senator GARY HART and Senator DAVID BOREN, in introducing legislation to toughen existing Government ethics laws by placing certain White House offices off-limits to former executive staff members who become lobbyists.

The Ethics in Government Act bars former Government officials from influencing agencies, bureaus or departments to which they were attached on issues on which they were personally and substantially involved. But under existing law, integral parts of the White House operation have been deemed independent entities.

Our legislation would define the Office of the President as consisting of the Office of Management and Budget, the National Security Council, the Council of Economic Advisors, the Council of Environment Quality, the Office of Science and Technology, the United States Trade Representative and the White House Office of Policy Development.

Over the last 5 years, we have seen that the administration places little emphasis on ethics enforcement and ethics compliance and has little concern that ethics laws are being broken. Our legislation will prevent former White House officials from strolling through the corridors of the executive office buildings, trading on their influence, twisting arms and collecting on past favors.

Mr. Speaker, in addition to introducing this legislation, as chairman of the Subcommittee on Investigations of the Committee on Post Office and Civil Service, I have called on the General Accounting Office to examine the factual and legal basis for the creation of these ethics loopholes in the Executive Office and similar ones throughout the Federal Government.

WHEN WILL THE JAPANESE LEARN TO PLAY FAIR IN TRADE?

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. STARK. Mr. Speaker, last week Japanese Prime Minister Nakasone ordered his Government to draw up emergency measures to help small- and medium-sized export-oriented companies handle the recent increases in the value of the yen. While no specific actions have been agreed on, they could include special loans to those companies and interest rate cuts to devalue the currency.

Clearly, the Japanese think they are facing a trade crisis, but last year their trade surplus was roughly $60 billion. What might they do if their books start to balance?

Mr. Speaker, it's about time the Japanese faced up to their responsibilities as an economic power in an increasingly interdependent world. They cannot continue their xenophobic mercantilistic practices and expect the rest of the world, on whom they depend for their prosperity, to be willing or even able to continue to deal with them. There are grave economic problems around the world—a huge trade deficit here, crushing foreign debt in Latin America, stagnation in most developing countries—and the Japanese continue to turn a blind eye and stash away their horde of gold.

Think of the benefit to our economy if the Japanese would open up their markets and let U.S. companies sell there on a fair basis. Think of the help to Latin America if they would invest their $60 billion surplus in productive projects there instead of in short-term securities here. To date, though, they have been unwilling even to discuss these matters seriously. What can they be thinking of?

Mr. Speaker, I'd also like to know just what of import was discussed at the recent economic summit in Tokyo. It's awfully tough to have substantive economic discussions with the Japanese if our leaders spend their whole time directing war whoops at Libya or condemning the Soviets for their nuclear accident. That may be important but it's not really relevant. The gathering in Tokyo was billed as an economic summit and precious little economics was discussed. That's unfortunate. Another opportunity wasted by the Reagan administration.

MASSACHUSETTS BAY COMMUNITY COLLEGE—A QUARTER CENTURY OF EXCELLENCE

HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. FRANK. Mr. Speaker, on June 1 Massachusetts Bay Community College will conduct its commencement exercises. While graduation day at any institution of higher education is an important occasion, much deserving of celebration, June 1 will mark a special anniversary for MMBC. On that date, in addition to commemorating the completion of their studies, the graduating students, along with their families and school officials, will salute MMBC's 25th year of operation. I would like to add my voice to the many others which will be commending this fine school for its many years of excellence and service to the State of Massachusetts.

Located in Wellesley, MA since 1973, the college—which was founded in 1961—has consistently offered a high quality of educational instruction to the cities and towns west of Boston. Nearly 10,000 students have graduated from MBCC during that period, and more than 100,000 have enrolled in college courses since its inception. From a modest graduating class of 77 students in 1963, a class of more than 500 will receive more than 40 different degrees on June 1.

Mr. Speaker, the mission of Massachusetts Bay Community College, as described in the catalog for the current academic year, has been "to serve as a comprehensive student-centered, open access institution with a strong commitment to excellence in all its offerings." There is no doubt that this mission has been fulfilled in the years since 1961, and I am confident that the college will continue to meet that high standard as it expands its many course offerings and increases the opportunities it offers for life-long learning.

I would like to commend the students, faculty, administration, trustees, and staff of Massachusetts Bay Community College for their association with a quarter century of excellence, and to join them in looking forward to the next 25 years.

HONORING ROBERT McNEIL, SAN GABRIEL VALLEY NAACP'S DISTINGUISHED CITIZEN

HON. ESTEBAN EDWARD TORRES

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. TORRES. Mr. Speaker, I ask my colleagues in Congress to join me in honoring the service and dedication of Robert McNeil, a member of the Baldwin Park City Council.

On June 7, 1986, Mr. McNeil will receive the Distinguished Citizen Award from the San Gabriel Valley Branch of the National Association for the Advancement of Colored People [NAACP]. He will receive this award at the NAACP's San Gabriel Valley Branch Annual Awards and Freedom Fund Banquet. The proceeds from the banquet will enable the San Gabriel Valley NAACP to expand its community activities in the East Valley and begin much needed youth programs during the 1986–87 fiscal year.

Mr. Speaker, it is an honor for me to recognize my friend, Councilman Robert McNeil from the city of Baldwin Park. He was first elected to the city council in 1978 and has served continuously for over 8 years. As a councilman for Baldwin Park he serves as first vice president to the League of California Cities, chairman of the board of the Mid-Valley Manpower Consortium, and as a member of the transportation commission for the Southern California Association of Governments. He has consistently worked to better the well-being of the residents of Baldwin Park.

Councilman McNeil is a native of Lillington, NC, and attended A&T University of Greensboro as well as Hampton Institute in Hampton, VA. He came to California with his wife, Julia, in 1964 and settled in Baldwin Park where they raised their family. He started working at Baldwin Park Post Office and recently retired from the Los Angeles County Assessor's Office as a real estate appraiser.

Since moving to Baldwin Park, Councilman McNeil has been exceptionally active. He has

been involved with the local PTA, school sports clubs and the Lions Club. His efforts helped organize and bring the first City of Hope Auxiliary to Baldwin Park. He is recognized by his friends and neighbors as a leader of the community.

Mr. Speaker, I want to commend the dedication and commitment Councilman McNeil has given to the city of Baldwin Park. His leadership has furthered the reputation and economic status of the city. I want to congratulate him for receiving the NAACP's Distinguished Citizen Award.

FRANKLIN H. GOTTSHALL TO BE HONORED

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. YATRON. Mr. Speaker, on June 4, 1986, the Boyertown Area Historical Society will honor one of the most notable contributors to the preservation of the historical and cultural heritage of eastern Pennsylvania, Mr. Franklin H. Gottshall. An octogenarian, Mr. Gottshall has spent a lifetime observing and chronicling the rich and varied history of our area.

In the course of his life, Mr. Gottshall has pursued a number of interests and, to this day, he is still a master craftsman, a teacher, and a lecturer. He is the author of 16 highly acclaimed books and is widely recognized as one of the most distinguished authorities on the history and culture of our area. Though in his eighth decade, he still continues to work and write each day and often contributes articles to esteemed national periodicals.

The Boyertown Area Historical Society will be honoring Mr. Gottshall for his immeasurable contribution to our knowledge and understanding of the history of the eastern region and its multifaceted cultural heritage. Mr. Speaker, I know my colleagues will join me in commending Mr. Franklin H. Gottshall for his life's work and dedication to the preservation of eastern Pennsylvania's history and culture and in wishing him continued success and happiness.

JOHN SANDERS OF DANVILLE, IL HONORED

HON. TERRY L. BRUCE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. BRUCE. Mr. Speaker, on June 21, 1986, the United States sends a scholar, John Sanders of Danville, IL to Israel for the 6 weeks Seminars Abroad Program. This program, funded through the Fulbright Foundation, has awarded these grants since 1946 in an effort to foster better understanding between the people of the United States and other countries. Toward that end, we could send no finer American representative than John Sanders.

John has taught for more than 30 years and has been recognized many times in his profession. The Governor of Illinois named John as a master teacher. He also received the teacher of the year award at Danville High School and has been recognized for his excellence in teaching by the University of Chicago and Illinois State University.

John is literally an inspiration to his colleagues. Last fall he was asked to deliver the keynote address at a New York teachers conference. His address, "What Do I Do? I Teach" was reminiscent of his earlier speech in Illinois. "I Teach Because I Love People."

In these statements, John points out that love of humanity, and pride in one's profession are the core that leads to true excellence in education. This is the excellence that John Sanders has practiced in Illinois for over 30 years.

One of America's recent heros, Christa McAuliffe, said "I touch the future, I teach." John Sanders has touched the lives and altered the future of thousands in his long career and those of us privileged to live with him here in central Illinois are better for it.

His roles have been many: Husband, his wife Judith, also at Danville High School; father, three sons, Kevin, Kerry, and John; grandfather to Sharon, Heather, and Justin; teacher; and now Fulbright scholar.

Mr. Speaker, Danville and the State of Illinois, take great pride in the excellent scholar we send to Israel to represent American ideas, as well as American ideals, John Sanders.

A TRIBUTE TO MR. ROBERT LEE PAGE

HON. HOWARD COBLE

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. COBLE. Mr. Speaker, I would like to take this opportunity to congratulate one of my constituents, Mr. Robert Lee Page, who has been named the 1986 North Carolina Small Businessman of the Year by the U.S. Small Business Administration. Mr. Page represents a success story that I think my colleagues would like to know.

Mr. Page is the president of Replacements, Ltd., a business which locates and sells discontinued crystal and china. During the past 4 years, he turned what began as a weekend hobby into a multimillion-dollar business. Replacements, Ltd., opened in the back room of a brick building on Holbrook Street in Greensboro with only one part-time employee and earned $52,000 in sales during the first year. Today, the business, still located on Holbrook Street, but now in an 18,000-square-foot facility, employs 50 people and had sales of $4 million in the past year.

I feel that Mr. Page is an excellent choice for the SBA honor. The success of Replacements, Ltd., is a perfect example of how important small businesses are to our economy. Robert Lee Page took an interest in collecting crystal and china and turned it into a thriving business that employs 50 people and serves more than 170,000 clients. Since serving on the House Small Business Committee, I have seen how small businesses create most of the new jobs in our economy, and that's why it's important to recognize successful firms such as Replacements, Ltd.

Mr. Page is also active in the Greensboro community. He has contributed to Greensboro area athletic teams and the Triad Council on Alcohol and Drug Awareness, and has sponsored an Indian foster child for 15 years. I am pleased that the SBA selected someone as worthy as Robert Lee Page. I am also pleased that the Sixth District is the home of the 1986 Small Business Person of the Year winner.

REMEMBERING NYDIA MEYERS

HON. CARL D. PURSELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. PURSELL. Mr. Speaker, I rise today in memory of an outstanding woman who played an important role in one of the communities I represent from Michigan's Second District.

Earlier this month, Mr. Speaker, Mrs. Nydia Meyers passed away at the age of 73. As I mentioned, she was an outstanding woman who long will be remembered by the people of Tecumseh, MI.

Dr. Meyers' work in cancer research continues to be recognized in the science community. Holding degrees from the University of Michigan and Stanford, Dr. Meyers taught for 25 years both here in America and abroad—teaching at all levels, I might add.

Her teaching experience included serving as head of the chemistry department at Findlay College in Findlay, OH.

Born in Russia, Dr. Meyers married another outstanding person, Mr. Allen Meyers. Mr. Meyers was an aviation pioneer. He designed and built the Meyers 200, a widely acclaimed plane which was well known in aviation circles.

He ran his business, and promoted aviation in general, from the Al Meyers Airport in Tecumseh.

Since his death 10 years ago, Mrs. Meyers has been active carrying on the memory of her husband. A fitting job since Nydia Meyers, herself, was an airplane enthusiast, holding both personal and commercial pilot licenses.

Through the Allen H. Meyers Foundation, she has given thousands of dollars to students for tuition and other college expenses.

She was an active member of the Tecumseh Chamber of Commerce and recently was appointed to the Michigan Historical Commission/Michigan Historical Observation Committee for the State's 150th-year celebration.

At the time of her death, Mrs. Meyers was involved with preparations for a community-wide celebration of the 50th anniversary of the Al Meyers Airport.

Mr. Speaker, I think it only fitting that I pay tribute to Dr. Meyers at this time.

On July 4, members of the Tecumseh and Lenawee County community will gather in a tribute to a woman whose tireless efforts have helped make life a little nicer for so many. I ask my colleagues to join with me in saying thank you to Nydia Meyers, thank you for doing all you did.

CREDIT UNION LEADER TO RETIRE

HON. SANDER M. LEVIN

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. LEVIN of Michigan. Mr. Speaker, it is a privilege for me to pay tribute to Don Murray, who is retiring after nearly 40 years of service to the credit union movement. Don Murray has served Credit Union ONE as treasurer-manager since 1948 when it was known as the Ferndale Co-op Credit Union. Credit Union ONE is now 75,000 members strong, its growth complimented by the dedication and professionalism of Mr. Murray.

In 1985, he was inducted into the Michigan Credit Union League Hall of Fame and received their distinguished service award. Mr. Murray has served as a trustee of the League of Housing Foundation since 1970, and is a charter member of the League Life Insurance Co. He has served in several positions with the Michigan Credit Union League and the national organization over the years.

On May 22, he will be honored by his family, colleagues, and friends for his years of service and commitment to the development of the credit union system, and his outstanding leadership. I congratulate Mr. Murray on his career accomplishments, and wish him a healthy and happy retirement.

REAL TRADE REFORM

HON. DAN COATS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. COATS. Mr. Speaker, there should be no one in this Chamber who would seriously argue against the need to reform our trade laws. I have been supporting a series of measures designed to help solve America's trade problems, which I would like to take a moment to discuss.

First, recognizing that a substantial component of our massive trade deficit is a result of an extensive list of industry-specific unfair trade barriers, I cosponsored and supported H.R. 3131, the Telecommunications Trade Act, which seeks to obtain reciprocal treatment for U.S. telecommunications exports.

On a broader scale, the Energy and Commerce Committee, on which I serve, has documented counterfeiting, quota fraud, targeting, dumping, subsidization, other tariff and nontariff barriers to U.S. exports, copyright and trademark theft, and predatory import surges as elements of our trading situation that can, and must, be resolved if we are to begin to stop the job and economic losses our U.S. industries are facing.

I think our inability to respond to these practices is partly a result of our trade policy decisionmaking apparatus which is too divided and cumbersome. Some 25 departments and agencies administer our trade laws. This structure needs to be consolidated. Therefore, I introduce H.R. 4383 to establish a single, unified Department of Trade to do just that.

Finally, and most importantly, our trade laws are not geared to providing balanced, speedy, and effective relief. They need to be modernized to respond to the new realities of world trade. If trade remedies or negotiating leverage are available too little or too late, they may as well not be available at all. If there is no real impetus for our trade officials to act, no pressure to seek solutions, there will be no progress in reducing our trade deficit.

For all of these reasons, I joined in the efforts of the Energy and Commerce Committee last fall to draft a bipartisan, far-reaching and fair trade reform bill. We carefully excluded from that bill mandatory tariffs and quotas, performance requirements, sector-specific relief, industrial policy, and GATT violative remedies or requirements. We introduced H.R. 3777, the Trade Law Modernization Act, and that bill was ordered reported by our committee on November 25, 1985, by an overwhelming bipartisan majority.

I hoped that H.R. 3777 would be the broad reform bill around which a bipartisan majority in the Ways and Means Committee and the House could rally. I hoped Congress could present a bill like H.R. 3777 to the President with overwhelming support. In my work on this issue, I, along with my Republican and Democratic colleagues have sought to solve our trade problems with realistic legislation that could be enacted into law. We wanted action, not political posturing and not political confrontation.

Now I am deeply disappointed this is not what is occurring. The legislative process on trade reform has deteriorated into partisan, political posturing by the majority. The Democrats have presented to this House a bill that adopts many of the reforms originated in H.R. 3777, but the bill goes much farther to include controversial, radical, and highly protectionist provisions that do not achieve the result of fair and realistic change.

H.R. 4800 has generated business community concern and opposition, adverse reactions from our trading partners, and threats of retaliation. In particular, the sections of the bill requiring tariffs and quotas against countries with high trade balances with the United States, without regard to which products are traded fairly or unfairly with the United States, are not trade law reform—they truly turn trade law on its head. I do not see these changes as necessary or desirable. I feel the same way about sections requiring adherence to world labor standards even if we don't impose those standards in the United States, and those sections establishing a council in Industrial Competitiveness—an undisguised attempt to impose industrial policy on American taxpayers—who don't want or need it.

H.R. 4800 is bad trade law because it is excessively protectionist. We need good trade law reform. I have proposed to President Reagan a three-point program to help solve our trade problems. In addition to a Department of Trade, the basic principles of the program are reciprocity and tough, but fair, trade laws and enforcement.

I think there is congressional and public support for these principles of reciprocity and effective laws that are strongly enforced, not for partisan, unworkable attacks on the world trading system. I hope the House will repudiate the politics so obvious in H.R. 4800, I am supporting legislation which will do just that—the Trade Expansion and Competitiveness Act of 1986, H.R. 4830, the Republican alternative to H.R. 4800. This legislation is going to be offered as a substitute to H.R. 4800.

H.R. 4830 is good trade law reform, without going too far. It speaks to every one of the problems we tackled in H.R. 3777. It takes strong action to establish reciprocity and open markets, stop fraud and counterfeiting, and allow U.S. officials to act, and act quickly, to stop unfair trade practices. Adoption of this substitute will tell the world the U.S. Congress is serious about changing our trade laws and improving our trading sitution. Nothing in this bill is political—nor is it meant to be. Our industries don't need politics—they need our help. Our unemployed workers don't partisanship—they need an answer that has a chance of becoming law. The substitute provides help and answers. I urge my colleagues to support it.

I want to cite one example of the difference between the Democrat bill and the Republican substitute which illustrates the many ineffective provisions within H.R. 4800. H.R. 4800 purports to help open world markets to U.S. goods, but it contains a provision that is specifically designed to place additional restrictions on exports of Alaskan oil. This looks like a market-closing action to me. It will prevent the United States from acting in a positive way to increase exports and reduce the trade deficit. It this is trade reform, the United States is in trouble. Needless to say, our Republican substitute avoids this kind of fortress America attitude.

I hope this House will adopt the substitute. It is a good bill, and its adoption will keep Members on both sides of the aisle from having to choose between a clear effort to polarize Members on a key issue, and the necessity for real trade law reform now.

NATIONAL SCIENCE WEEK

HON. DON RITTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. RITTER. Mr. Speaker, May 11 to 17 is designated as National Science Week to honor our past scientific endeavors. In my own district, the Northhampton Junior High School participated in the nationwide launch of 175,000 weather tracking balloons to mark the beginning of the second annual National Science Week. As a former scientist and a member of the Science and Technology Committee, I am fully aware of how these past achievements have provided the United States with its current high standard of living and quality of life. America's scientific leadership is recognized worldwide and America's contributions to science is evident by the 124 Nobel prizes awarded to American scientists and engineers since the mid 1940's. These awards and the technological benefits that occurred since 1945 reflect the strong, long-term U.S. investment in science and technology by the Federal Government and its partner—industrial America.

This investment did not pay dividends in the first year nor in the fifth year. We are reaping the benefits today—just look at the products and possible products coming from out investment in recombinant DNA research—new drugs to fight cancer, new weather and disease-resistant plants and novel industrial products such as metal ore recovery microbes. The investment in semiconductors research in the 1940–50's now provides computers in cars to optimize performance and to reduce pollution.

But what about our future? Do we continue to follow what is apparently a sharp investment strategy and provide adequate support for our ongoing basic research and invest in the development of our future scientists? The National Science Foundation, under the direction of Mr. Erich Block, has taken the initiative to increase the support of the U.S. science infrastructure and to develop highly innovative programs like the Engineering Research Centers to accelerate the transition of basic research to industrial use. The Franklin Institute Science Museum and Planetarium in Philadelphia, PA, under the direction of Mr. Joel Bloom, have created a wonderfully stimulating "Hands On" science exhibit for children of all ages 8 to 14. This exhibit is now here in Congress and will travel to other science museums throughout the country. The museum also has created complete kits and instructions to assist science teachers in the elementary schools to demonstrate scientific principles in a hands-on fun way.

It is approaches like these which will provide the United States with a continuing strong science base and enable us to compete effectively in the global marketplace and allow us to celebrate National Science Week in the future.

GRANITE MONUMENT UNVEILED IN MACON, GA

HON. J. ROY ROWLAND

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. ROWLAND of Georgia. Mr. Speaker, earlier this month a granite monument was unveiled at a park in Macon, GA, to the memory of Marine Sgt. Rodney M. Davis.

Nineteen years ago, Sergeant Davis gave his life to save the members of his platoon in the Quang Nam Province of Vietnam. When a live grenade was thrown into their midst, the young sergeant didn't hesitate—he smothered the explosion with his own body.

ROTC students at Northeast High School, which used to be the Peter G. Appling High School where Sergeant Davis graduated in 1961, led the efforts to raise the money to erect the monument. A number of students were on hand for the unveiling, as were Sergeant Davis' mother, Mrs. Ruth Davis, and other family members and friends.

Sergeant Davis is an inspiration to all of us in Macon and middle Georgia. He is especially an inspiration to many young people. The unveiling of this monument, Mr. Speaker, makes this a very special Memorial Day period for our area of Georgia.

LEGISLATION TO DESIGNATE THE SOL BLATT, SR., POST OFFICE IN BARNWELL, SC

HON. BUTLER DERRICK

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. DERRICK. Mr. Speaker, I have introduced legislation today which would designate the U.S. post office to be constructed in Barnwell, SC, as the "Soloman Blatt, Sr., Post Office."

Solomon Blatt, "Speaker Emeritus" of the South Carolina House of Representatives, died on May 14, 1986, at the age of 91. As I indicated in my remarks of last week, Sol had a tremendous influence on my life. I will always be grateful for the opportunity I had to serve with him in the South Carolina General Assembly. He instilled in me certain principles which I know I will continue to follow throughout my career.

Sol was a man who dedicated his life to public service. Barnwell County respected his outstanding leadership ability as evidenced by the fact he served in the State legislature from 1933 till his death.

Mr. Speaker, it would be a fitting tribute to name the new post office in Barnwell after Sol Blatt, Sr. A companion measure has been introduced in the Senate by Messrs. THURMOND and HOLLINGS. I hope that my colleagues in the House will expeditiously consider and support passage of this legislation.

THE PEARL ARMELIN EDGERLY FOUNDATION

HON. RONALD V. DELLUMS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. DELLUMS. Mr. Speaker, I would like to commend the founders of the Pearl Armelin Edgerly Foundation of Oakland, CA. This foundation is committed to building the future. Specifically, it is committed to assisting the need to complete their education in various fields of human endeavor, including education, health, economic development and small business.

The Pearl Armelin Edgerly Foundation is a non-profit entity which will function in the private sector in an effort to meet a share of the challenge posed by the continuing cutbacks in Government programs which have traditionally met the needs of the poor in this country. The foundation hopes to serve as a conduit for private funds, functioning to breath life into the vital building blocks of our society—the individuals whose education, whose health, and whose ability to function effectively will determine the very future of our Nation.

I commend the Edgerly Foundation founders as it launches its funding efforts in Oakland, CA. We wish it every possible success.

A TRIBUTE TO DETECTIVE SERGEANT RALPH BROWN

HON. WALTER E. FAUNTROY

OF THE DISTRICT OF COLUMBIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. FAUNTROY. Mr. Speaker, I would like to bring to the attention of my colleagues, the retirement of a public servant, Detective Sergeant Ralph Francis Brown, who has distinguished himself as a outstanding member of the District of Columbia Metropolitan Police Department.

A native of Louisburg, NC, Ralph Francis Brown moved his family to Washington, DC, after graduating from North Carolina A&T University with an Associates Degree, and serving his country for 2 years in the United States Army.

He began his law enforcement career with the DC Metropolitan Police Department as a foot patrolman at the Sixth District, where he performed his duties with distinction, and was promoted to detective. His next promotion was to sergeant and he was transferred to the Second District. Continuing up the ranks, Ralph Brown was made a plainsclothes detective sergeant and moved to the Sex Squad at Police Headquarters. Culminating his career as a Detective Sergeant, Ralph Brown retires effective May 21, 1986, from the Detective Unit at the Sixth District.

Mr. Speaker, I want to commend the commitment and dedication Detective Sergeant Ralph Brown has given to the law enforcement profession. Indeed, he has served as a positive role model for our youth and has helped to fight crime, making the streets and neighborhoods safe for all the citizens of the District of Columbia. He will be missed by his fellow officers and all who have been touched by this personal involvement and leadership. I wish he, his wife, Johnnie Elaine, and their two daughters, Thursday and Sharon, all the best in the many years to come.

RECIPIENTS OF THE LON O. HOCKER TRIAL LAWYER MEMORIAL AWARD

HON. RICHARD A. GEPHARDT

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. GEPHARDT. Mr. Speaker, in 1954, Mary Hocker established the Lon O. Hocker Trial Lawyer Memorial Award in memory of her husband, as outstanding St. Louis trial lawyer. Since then, the award has been bestowed upon lawyers under age 36 who have demonstrated unusual proficiency in the art of trial advocacy.

I am pleased to recognize, at this time, the 1985 recipients of the award: G. Stephen Long, Thomas DeVoto and John Morthland. These gentleman have proven their adeptness and mastery of the American legal system.

Mr. Long has a B.A. degree cum laude in government from Harvard University and received his J.D. degree from the University of

Wisconsin. He has practiced law in the Kansas City area since 1979 with the firm of Shughart, Thomson & Kilroy, P.C.

Mr. DeVoto received his B.A. degree from Fairfield University and his J.D. degree from St. Louis University. He is a partner in the St. Louis law firm of Wuestling & James.

Mr. Morthland received his B.S. degree in business administration from the University of Missouri-Columbia and his J.D. degree from Loyola University. He is a partner in the Hannibal firm of Wasinger, Parsham & Morthland.

I congratulate these young men who have set goals for others to follow. They have demonstrated their proficiency, and like those before them, will move ahead to aid our judicial system as it guards all American freedom and liberties.

Mr. Speaker. A special individual prompted Mary Hocker to establish this award and three special individuals have received it. I wish them the best of luck in the future.

CELEBRATING CUBAN INDEPENDENCE DAY AND THE FIRST ANNIVERSARY OF RADIO MARTI

HON. LAWRENCE J. SMITH

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. SMITH of Florida. Mr. Speaker, it is with great pleasure that I rise today to mark two important anniversaries of which the Cuban people are very proud. On May 20, 1902—84 years ago—the United States granted Cuba its iindependence, ushering in an era of democracy and liberty for the people of that beautiful island which was shattered by the Communist takeover by Castro in 1959. Eighty-three years later, on May 20, 1985, the United States inaugurated Radio Marti, sending hopes for freedom and liberty once again to the people of Cuba.

It is fitting that we should celebrate both anniversaries on the same day. Jose Marti and other Cuban patriots devoted their lives to bringing about a government with democratic principles—with freedom of the press, freedom of assembly, freedom of religion, and freedom of thought. These courageous individuals fought to bring the spirit of liberty to Cuba—a goal now shared by Radio Marti. In 1 year, this radio program has become the voice of democracy for millions of people living under the Communist rule of Fidel Castro.

On this first anniversary of Radio Marti, the people of the United States renew their pledge of freedom with their Cuban neighbors. On this day of independence, we salute the brave Cuban patriots who fought to bring democracy to their nation. It is a day of great pride and hope for the Cuban people and a symbol for democracy and freedom in Latin America.

TRIBUTE TO DR. ROBERT DOUDS

HON. WILLIAM M. THOMAS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. THOMAS of California. Mr. Speaker, my fellow Representatives. Friends and family of a well-known and highly respected physician in my district gathered recently on the sad occasion of his death.

Dr. Robert Douds was a general practitioner in Bakersfield for 42 years. He began a career in medicine when the friendly family doctor wasn't as rare as it is today. He maintained a small-town doctor's warmth throughout his long career by truly caring about the well-being of every one of his patients.

He came to California from Kentucky after graduation from the University of Louisville School of Medicine in 1934. He served his 1-year internship in Fresno, CA before coming to Bakersfield. Dr. Douds served his residency at what was then called Kern General Hospital. General Hospital has since been renamed Kern Medical Center.

After the attack of Pearl Harbor Dr. Douds put his special talent to use in serving his country. He joined the Army and served in the medical corps. After World War II Douds returned to Bakersfield and started his private practice.

Mr. Douds retained his license to practice medicine even after his retirement and was an active member of the Kern County Medical Society, the California Medical Association, the American Medical Association, and the Academy of Family Practice.

He is missed not only by his friends and family but also by the many members of the Bakersfield community whose lives he touched by his professional caring, and his easy-going and positive outlook on life.

GOLD MEDAL FOR JOE KITTINGER

HON. BILL McCOLLUM

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. McCOLLUM. Mr. Speaker, I and all of the Fifth District of the State of Florida which I represent in this body are honored to have a true American hero as a neighbor and friend. The time has arrived for the U.S. Congress to join the numerous public and private organizations which have recognized the outstanding achievements of Joe Kittinger by issuing a Congressional gold medal in his behalf.

The Congressional Gold Medal has been awarded by this body for exceptional contributions in the field of air and space exploration on several occasions. The Wright brothers, Charles Lindberg, General "Billy" Mitchell, and two different teams of balloonists who crossed the Atlantic Ocean are among the recipients of our Nation's highest civilian award. Joe Kittinger, a name well-known in central Florida and throughout aviation circles, has accomplished tremendous feats which favorably compare with those of this small gold medal club.

Joe, a native of Orlando, FL, has been flying aircraft since 1949, lighter-than-air balloons since 1955 and hot-air balloons since 1964. He is currently chief of operations for Rosie O'Grady's flying circus.

From 1949 to 1978, he served with the U.S. Air Force. Joe flew 483 missions during his three tours of duty in Vietnam and spent nearly 1 year as a prisoner of the North Vietnamese. The Silver Star, the Legion of Merit, the Distinguished Flying Cross, and the Bronze Star are only the beginning of a long list of decorations Joe earned during his military career.

Joe is also the holder of several world records which include the highest parachute jump, the longest parachute free fall and the first man to break the speed of sound without an aircraft or space vehicle. In September 1984, Joe completed the first solo trans-Atlantic flight from Maine to Italy in the 10-story Rose O'Grady balloon of peace. At the young age of 58, Joe has plenty of time to go after his other goals which include a solo trans-Pacific balloon flight among other things.

By issuing a Congressional Gold Medal for Joe Kittinger, we will accomplish much more than paying tribute to this great man. We will be recognizing the rare spirit which has made and will continue to make America the envy of all nations. I urge my colleagues to join me in awarding a Congressional Gold Medal to Joe Kittinger.

CHERNOBYL—THE INTERNATIONAL COVERUP

HON. GERALD B.H. SOLOMON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 20, 1986

Mr. SOLOMON. Mr. Speaker, exactly 2 weeks ago today, when the world was horrified to learn about what was happening at the Chernobyl nuclear power station in the Soviet Union, the Soviet representative to the United Nations stood in the general assembly hall to address the nations of the world. Among other issues, he spoke on the subject of peace—and with a straight face, shamelessly, he solemnly declared that the most important international challenge in today's world is "to prevent the world from sliding towards a nuclear catastrophe . . . ."

Big words for the representative of a regime that was at that very moment perpetrating the biggest coverup of modern times. All of the Ambassador's words about "nuclear catastrophe," "relaxation of international tension," and "peaceful cooperation beneficial for all countries" were being betrayed by his own government even as he spoke.

Mr. Speaker, I have risen before in this House to say that behind all of Mr. Gorbachev's smiles and well-tailored suits—behind his carefully-crafted public image—there beats the heart of just one more brutal Communist thug. Once again all of the sham and duplicity with which the Soviets treat their own people—let alone everybody else—have been exposed.

Today our Congress pays tribute to Anatoly Shcharansky. If there is anything that his life and witness can teach us it is this: We can only trust the Soviet Communists to do one thing—to act like Soviet Communists. They respect nothing but strength. They fear nothing except the truth.

I hope that from Anatoly Shcharansky's visit, coming as it does on the heels of the Soviet coverup at Chernobyl, we will recognize anew the sinister and devious character of the Soviet system—that there is no convergence of mutal and lasting interests between ourselves and the Soviet leaders. One side or the other must ultimately prevail. The Soviet challenge is more than merely economic or political competition—it represents the most brutal assault ever launched against the Judeo-Christian ethic and every other standard of civilized behavior.

HOUSE OF REPRESENTATIVES—*Wednesday, May 21, 1986*

The House met at 11 a.m.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

We pray, O God, that we will not have to see evil in other people in order to feel good about ourselves. May not our righteousness come by seeing the mistakes of others and making comparisons that come to our favor. Rather, O gracious God, may we accept responsibility for our own lives and do justly, love mercy, and ever walk humbly with You. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Hallen, one of its clerks, announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 2672) "An act to redesignate the New York International and Bulk Mail Center in Jersey City, New Jersey, as the 'New Jersey International and Bulk Mail Center', and to honor the memory of a former postal employee by dedicating a portion of a street at the New York International and Bulk Mail Center in Jersey City, New Jersey, as 'Michael McDermott Place'."

The message also announced that the Senate disagrees to the amendment of the House to the concurrent resolution (S. Con. Res. 120) "Concurrent resolution setting forth the congressional budget for the United States Government for the fiscal years 1987, 1988, and 1989," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. DOMENICI, Mrs. KASSEBAUM, Mr. BOSCHWITZ, Mr. ANDREWS, Mr. QUAYLE, Mr. GORTON, Mr. CHILES, Mr. HOLLINGS, Mr. JOHNSTON, Mr. SASSER, and Mr. METZENBAUM to be the conferees on the part of the Senate.

The message also announced that the Senate had passed a concurrent resolution of the following title, in which the concurrence of the House is requested:

S. Con. Res. 142. Concurrent resolution authorizing a technical correction to be made in the enrollment of the bill H.R. 2672.

PERMISSION TO OFFER AMENDMENTS EN BLOC PRINTED IN THE RECORD ON MAY 20, 1986, TO H.R. 4800, TRADE AND INTERNATIONAL ECONOMIC POLICY REFORM ACT OF 1986

Mr. JEFFORDS. Mr. Speaker, I ask unanimous consent that I may be permitted to offer the amendments en bloc printed in the RECORD of May 20, 1986, to H.R. 4800, in lieu of the amendments printed on May 15, 1986.

The SPEAKER. Is there objection to the request of the gentleman from Vermont?

There was no objection.

SEQUESTRATION OF LOAN GUARANTEE COMMITMENTS

The SPEAKER. Pursuant to the provisions of clause 5, rule I, the unfinished business is the question of suspending the rules and passing the Senate bill, S. 2416, as amended.

The Clerk read the title of the Senate bill.

The SPEAKER. The question is on the motion offered by the gentleman from Mississippi [Mr. MONTGOMERY] that the House suspend the rules and pass the Senate bill, S. 2416, as amended, on which further proceedings were postponed on Tuesday, May 20, 1986, and on which the yeas and nays are ordered.

The vote was taken by electronic device and there were—yeas 398, nays 0, not voting 35, as follows:

□ 1125

Mr. COUGHLIN and Mr. BEREUTER changed their votes from "nay" to "yea."

So (two-thirds having voted in favor thereof) the rules were suspended and the Senate bill, as amended, was passed.

The result of the vote was announced as above recorded.

The title of the Senate bill was amended so as to read: "An act to revise further the limitation applicable to chapter 37 of title 38, United States Code, for fiscal year 1986, for the purpose of implementing any order issued by the President for such fiscal year under any law providing for the sequestration of new loan guarantee commitments, and for other purposes."

A motion to reconsider was laid on the table.

PERSONAL EXPLANATION

Mrs. COLLINS. Mr. Speaker, I was unavoidably absent on rollcall No. 130, the vote on the motion to suspend the rules and pass the bill S. 2416 to raise the ceiling on Veterans' Administration home loan guarantee programs.

I support the measure. I would have voted aye on its passage.

PERSONAL EXPLANATION

Mr. KOSTMAYER. Mr. Speaker, I was in Pennsylvania yesterday for the primary election. My flight to Washington, DC, was unavoidably delayed, causing me to miss today's first vote on S. 2416, a bill to permanently exempt the Veterans' Administration home loan guarantee program from the sequestration process mandated by Gramm-Rudman. However, had I been present, I would have voted for S. 2416.

A similar House bill (H.R. 4775) was laid on the table.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mrs. Emery, one of his secretaries.

PERMISSION FOR SUBCOMMITTEE ON INTERGOVERNMENTAL RELATIONS AND HUMAN RESOURCES OF THE COMMITTEE ON GOVERNMENT OPERATIONS TO MEET ON TOMORROW DURING 5-MINUTE RULE

Mr. WEISS. Mr. Speaker, I ask unanimous consent that the Subcommittee on Intergovernmental Relations and Human Resources of the Committee on Government Operations be permitted to meet tomorrow during the 5-minute rule.

I have cleared this with the ranking minority member of the subcommittee, the gentleman from Pennsylvania [Mr. WALKER], and he has no objection.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

APPOINTMENT OF CONFEREES ON SENATE CONCURRENT RESOLUTION 120, CONCURRENT RESOLUTION ON THE BUDGET—FISCAL YEAR 1987

Mr. GRAY of Pennsylvania. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate Concurrent Resolution (S. Con. Res. 120) setting forth the congressional budget for the U.S. Government for the fiscal years 1987, 1988, and 1989, with the House amendment thereto, insist on the House amendment, and agree to the conference asked by the Senate.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania? The Chair hears none, and appoints the following conferees: Messrs. GRAY of Pennsylvania, WRIGHT, DERRICK, WILLIAMS, WOLPE, RUSSO, JENKINS, LEATH of Texas, and SCHUMER, Mrs. BOXER, Messrs. MACKAY, SLATTERY, LATTA, and KEMP, Mrs. MARTIN of Illinois, Ms. FIEDLER, and Messrs. GRADISON, LOEFFLER, MACK and GOODLING.

PERMISSION FOR COMMITTEE ON THE JUDICIARY TO HAVE UNTIL 5 P.M., FRIDAY, MAY 30, 1986, TO FILE REPORT ON H.R. 4801, SENTENCING GUIDELINES ADJUSTMENT ACT OF 1986

Mr. BERMAN. Mr. Speaker, I ask unanimous consent that the Committee on the Judiciary file a report on H.R. 4801, Sentencing Guidelines Adjustment Act of 1986, during the recess of the House, by 5 p.m. on Friday, May 30, 1986.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

TRADE AND INTERNATIONAL ECONOMIC POLICY REFORM ACT OF 1986

The SPEAKER. Pursuant to House Resolution 456 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the further consideration of the bill, H.R. 4800.

□ 1130

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 4800) to enhance the competitiveness of American industry; and for other purposes, with Mr. BEILENSON in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee of the Whole rose on Tuesday, May 20, 1986, all time for general debate had expired.

Pursuant to the rule, the bill is considered as having been read for amendment under the 5-minute rule. The amendments printed in section 2 of House Resolution 456, agreed to by the House on May 15, 1986, are considered as having been adopted.

No other amendments to the bill are in order except the following amendments printed in the CONGRESSIONAL RECORD of May 15, 1986, except amendment numbered (12) shall be the text of H.R. 4830 in lieu of being printed in the RECORD, and except amendment numbered (10) shall be printed in the CONGRESSIONAL RECORD of May 20, 1986, in lieu of the CONGRESSIONAL RECORD of May 15, by, and if offered by the designated Members or their designees, which shall be considered only in the following order, shall be considered as having been read, shall not be subject to amendment or to a demand for a division of the question, and each amendment shall be debatable for 30 minutes, or 1 hour in the case of amendments (8) and (12), the time to be equally divided and controlled by the proponent of

the amendment and a Member opposed thereto:

(1) The amendment by Representative CRANE to subtitle A of title I;

(2) The two amendments by Representative FRENZEL to subtitles A and B of title I;

(3) The amendment by Representative AUCOIN to title I;

(4) The amendment by Representative DINGELL to title II;

(5) The amendment by Representative COLEMAN of Texas to title III;

(6) The amendment by Representative ROTH to title III;

(7) The two amendments by Representative BONKER to title IV;

(8) The amendment by Representative WYLIE to title IV;

(9) The amendment by Representative EVANS of Illinois to title V;

(10) The amendment by Representative JEFFORDS to title V;

(11) The amendment by Representative BROYHILL to title VII; and

(12) The amendment by Representative MICHEL.

The text of H.R. 4800, as amended, is as follows:

H.R. 4800

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE AND TABLE OF CONTENTS.

(a) SHORT TITLE.—This Act may be cited as the "Trade and International Economic Policy Reform Act of 1986".

(b) TABLE OF CONTENTS.—

TITLE I—TRADE LAW AMENDMENTS

Subtitle A—Enforcement of United States Trade Agreement Rights and Response to Foreign Trade Practices

Sec. 111. Reference to the Trade Act of 1974.
Sec. 112. Determinations requiring action.
Sec. 113. Export targeting.
Sec. 114. Investigatory procedures.
Sec. 115. Mandatory initiation of certain investigations by Trade Representative.
Sec. 116. Recommendations for Presidential action by Trade Representative.
Sec. 117. Modification and termination of actions.
Sec. 118. Barriers to market access.
Sec. 119. Mandatory negotiations and action regarding foreign countries having excessive and unwarranted trade surpluses with the United States.
Sec. 120. Conforming amendments and effective date.

Subtitle B—Relief From Injury Caused by Import Competition, Subsidies, Dumping, and Unfair Trade Practices

CHAPTER 1—RELIEF FROM INJURY BY IMPORT COMPETITION

Sec. 121. Import relief.
Sec. 122. Adjustment Assistance Trust Fund.
Sec. 123. Expedited consideration of petitions for adjustment assistance.
Sec. 124. Market disruption.

CHAPTER 2—AMENDMENTS TO THE COUNTERVAILING AND ANTIDUMPING DUTY LAWS

Sec. 131. Reference.
Sec. 132. Processed agricultural products.
Sec. 133. Definition of domestic subsidy.
Sec. 134. Material injury and threat of material injury.
Sec. 135. Resource input subsidies.
Sec. 136. Diversionary dumping.
Sec. 137. Downstream product monitoring.
Sec. 138. Private remedy for injury resulting from dumping.
Sec. 139. Miscellaneous amendments.

CHAPTER 3—INTELLECTUAL PROPERTY RIGHTS

Sec. 141. Congressional findings and purposes.
Sec. 142. Protection under the Tariff Act of 1930.
Sec. 143. Action regarding foreign market access barriers affecting intellectual property.
Sec. 144. Negotiating objectives regarding intellectual property rights.

Subtitle C—Trade Negotiating Objectives and Authority

Sec. 151. Reference to Trade Act of 1974.
Sec. 152. Overall and principal trade negotiating objectives of the United States.
Sec. 153. Extension of trade agreement authority.
Sec. 154. Agreements regarding nontariff barriers to, other distortions of, trade.
Sec. 155. Compensation authority.
Sec. 156. Tariff agreements with Canada.
Sec. 157. Time for submission of certain reports.
Sec. 158. Negotiating objectives regarding high technology access.

Subtitle D—Functions of the United States Trade Representative

Sec. 161. Trade policy functions.
Sec. 162. Fair Trade Advocates Branch.
Sec. 163. Trade policy agenda.

Subtitle E—Miscellaneous Trade Law Provisions

Sec. 171. Imports affecting national security.
Sec. 172. Reallocation of GSP benefits to Latin American debtor nations.
Sec. 173. Transfer of authority under GSP to the United States Trade Representative.
Sec. 174. Appointment of Chairman and Vice Chairman of International Trade Commission.
Sec. 175. Scofflaw penalties for multiple customs laws offenders.
Sec. 176. Metallurgical coal exports to Japan.
Sec. 177. Steel imports.
Sec. 178. Import monitoring by the International Trade Commission; technical amendments.

TITLE II.—INTERNATIONAL TRADE IN TELECOMMUNICATIONS PRODUCTS AND SERVICES

Sec. 201. Short title.
Sec. 202. Findings and purposes.
Sec. 203. Negotiating objectives.
Sec. 204. Investigation of foreign telecommunications trade barriers.
Sec. 205. Action by the President in response to investigations by Trade Representative.
Sec. 206. Review of trade agreement implementation by Trade Representative.
Sec. 207. Consultations.
Sec. 208. General trade agreement authority.
Sec. 209. Compensation authority.
Sec. 210. Definition of telecommunications product.
Sec. 211. International obligations.

TITLE III—EXPORT ENHANCEMENT

Sec. 301. Short title.
Sec. 302. Findings and purposes.

Subtitle A—Export Promotion

Sec. 311. United States and Foreign Commercial Service.
Sec. 312. Diplomatic missions.
Sec. 313. Market development cooperator program.
Sec. 314. Agricultural trade policy.
Sec. 315. Agricultural trade research and reports.
Sec. 316. Export-Import Bank.
Sec. 317. Country reports on economic policy and trade practices.
Sec. 318. Authorization of appropriations.

Subtitle B—Export Controls

Sec. 321. Oil exports to noncontiguous countries.
Sec. 322. National security controls.
Sec. 323. Enforcement.
Sec. 324. Authorization of appropriations.
Sec. 325. GAO report.

Subtitle C—Debt, Development, and World Growth

Sec. 331. International negotiations.
Sec. 332. Trade liberalization in developing countries.
Sec. 333. Overseas Private Investment Corporation.
Sec. 334. Trade and Development Program.
Sec. 335. Countertrade.

Subtitle D—Protection of United States Business Interests Abroad

Sec. 341. Protection of United States intellectual property.

Subtitle E—Miscellaneous Provisions

Sec. 351. Trading with the Enemy Act.
Sec. 352. Budget Act.

TITLE IV—BANKING COMMITTEE PROVISIONS

Subtitle A—Competitive Exchange Rate Act of 1986

Sec. 401. Short title.
Sec. 402. Findings and purposes.
Sec. 403. International negotiations on exchange rate reform.
Sec. 404. Strategic currency reserve.
Sec. 405. Reporting requirements.
Sec. 406. Congressional recognition of the recommendations of the International Monetary Fund.
Sec. 407. Definitions.

Subtitle B—International Debt, Trade, and Financial Stabilization Act

CHAPTER 1—SHORT TITLE; PURPOSES; AND DEFINITIONS

Sec. 411. Short title.
Sec. 412. Purposes.
Sec. 413. Definitions.

CHAPTER 2—MEASURING THE IMPACT OF THE DEBT CRISIS ON WORLD TRADE, DEVELOPMENT, AND FINANCIAL STABILITY

Sec. 416. Findings.

CHAPTER 3—INCREASING WORLD BANK EFFECTIVENESS

Sec. 421. Rapid loan disbursements.
Sec. 422. Structural adjustment lending.
Sec. 423. Reducing capital flight.
Sec. 424. Increasing World Bank lending resources.

CHAPTER 4—INCREASING WORLD TRADE AND ECONOMIC GROWTH

Sec. 426. Trade liberalization in developing countries.
Sec. 427. Increased trade and investment in developing nations.

CHAPTER 5—INSURING THE STABILITY OF THE INTERNATIONAL FINANCIAL SYSTEM
Sec. 431. Private capital sources for developing nations.
Sec. 432. Mobilization of private capital.
CHAPTER 6—MULTILATERAL INVESTMENT GUARANTEE AGENCY
Sec. 436. Short title.
Sec. 437. Acceptance of membership.
Sec. 438. Governor and Alternate Governor.
Sec. 439. Applicability of Bretton Woods Agreements Act.
Sec. 440. Restrictions.
Sec. 441. Federal reserve banks as depositories.
Sec. 442. Jurisdiction of United States courts and enforcement of arbitral awards.
Sec. 443. Force and effect of Convention.
Sec. 444. Full faith and credit for arbitral awards; jurisdiction.
CHAPTER 7—INTER-AMERICAN DEVELOPMENT BANK
Sec. 446. Merger of inter-regional and ordinary capital.
Sec. 447. Waiver of country program limitations under new replenishment agreement under certain conditions.
Subtitle C—Competitive Tied Aid Fund Act
Sec. 451. Short title.
Sec. 452. Competitive tied aid fund.
Subtitle D—Council on Industrial Competitiveness Act
Sec. 461. Short title.
Sec. 462. Findings and purposes.
Sec. 463. Council established.
Sec. 464. Duties of the Council.
Sec. 465. Membership.
Sec. 466. Executive director and staff.
Sec. 467. Powers of the Council.
Sec. 468. Effects of imports on domestic industries.
Sec. 469. Reports.
Sec. 470. Authorization of appropriations.
Sec. 471. Definitions.
TITLE V—EDUCATION AND TRAINING FOR AMERICAN COMPETITIVENESS
Sec. 501. Short title.
Sec. 502. Findings and purposes.
Subtitle A—Education for American Competitiveness
Sec. 511. Authorization of appropriations.
Sec. 512. Definitions.
CHAPTER 1—EDUCATION AND TRAINING TO STRENGTHEN THE COMPETITIVENESS OF DOMESTIC INDUSTRY
Sec. 521. Program authorized.
Sec. 522. Allotment to States.
Sec. 523. State plans.
Sec. 524. Literacy training.
Sec. 525. Vocational training services.
Sec. 526. Education in mathematics, science, or foreign languages.
Sec. 527. Eligible service providers.
Sec. 528. Limitation on administrative costs.
CHAPTER 2—POSTSECONDARY EDUCATION PROGRAMS TO IMPROVE INSTRUCTION IN MATHEMATICS, SCIENCE, AND FOREIGN LANGUAGE
Sec. 531. Programs authorized.
Sec. 532. Selection of grant recipients.
Sec. 533. Applications.
Sec. 534. Summer institutes and workshops.
Sec. 535. Acquisition and use of equipment.
Sec. 536. Educational partnership programs.
CHAPTER 3—EDUCATIONAL TELECOMMUNICATIONS
Sec. 541. National educational telecommunications demonstration program.
Subtitle B—Training for Industrial Competitiveness
Sec. 551. Authorization of appropriations.
Sec. 552. Training programs under Job Training Partnership Act.
Sec. 553. Job banks.
Sec. 554. Studies.
TITLE VI—AGRICULTURAL TRADE
Subtitle A—Improvement of Agricultural Trade Policy and Market Development Activities
Sec. 601. Purpose of subtitle.
Sec. 602. Designation of the Department of Agriculture as lead agency for agricultural trade.
Sec. 603. Consultation by the Secretary of Agriculture.
Sec. 604. Reorganization of the Department of Agriculture.
Sec. 605. Conforming amendments to title 5, United States Code.
Sec. 606. Transfer of entities to the Foreign Agricultural Service and establishment of commodity division.
Sec. 607. Establishment of the General Sales Manager's Office.
Sec. 608. Establishment of office to monitor trade practices.
Sec. 609. Establishing an office to provide assistance to victims of unfair trade practices.
Sec. 610. Provision of technical assistance in trade negotiations.
Sec. 611. Long term agricultural trade strategy reports.
Sec. 612. Declaration of policy respecting food aid and market development.
Sec. 613. Reporting by the Secretary of Agriculture.
Sec. 614. Establishment of Office of Food Aid Policy.
Sec. 615. Commodities for cooperator organizations.
Sec. 616. Department of Agriculture contract authority for individuals abroad.
Sec. 617. Limitation on spending authority.
Sec. 618. Export enhancement program.
Sec. 619. Implementation of certain sections of 1129 and 1167 of the Food Security Act.
Subtitle B—Domestic Markets for Agricultural Commodities and Products
Sec. 631. Study relating to honey.
Sec. 632. Rose study report.
Sec. 633. Determining material interference caused by imported tobacco.
Sec. 634. Import inventory.
Sec. 635. Sense of Congress—action in response to foreign import restrictions on United States citrus fruits and beef products.
Subtitle C—Miscellaneous
Sec. 651. Class I and II milk.
Sec. 652. Protection of quality of export grain.
Sec. 653. Findings and sense of Congress with respect to European Community.
TITLE VII—FOREIGN CORRUPT PRACTICES AND ADJUSTMENT PLAN REVIEW
Sec. 701. Foreign Corrupt Practice Act amendments.
Sec. 702. Adjustment plan review.
TITLE VIII—TARIFF AND CUSTOMS PROVISIONS
Subtitle A—Miscellaneous Tariff and Customs Provisions
Sec. 801. Reference.
CHAPTER 1—PERMANENT CHANGES IN TARIFF TREATMENT
Sec. 811. Importation of furskins.
Sec. 812. Salted and dried plums.
Sec. 813. Grapefruit.
Sec. 814. Carroted furskins.
Sec. 815. Tariff treatment of certain types of plywood.
Sec. 816. Broadwoven fabrics of man-made fibers.
Sec. 817. Uranium hexaflouride (UF_6).
Sec. 818. Silicone resins and materials.
Sec. 819. Classification of naphtha and motor fuel blending stocks.
Sec. 820. Television apparatus and parts.
Sec. 821. Bicycle-type and exerciser-type speedometers.
Sec. 822. Marking of watches and watch components.
Sec. 823. Casein.
CHAPTER 2—TEMPORARY CHANGES IN TARIFF TREATMENT
Sec. 831. Color couplers and coupler intermediates.
Sec. 832. Potassium 4-sulfobenzoate.
Sec. 833. 2,2'-oxamido bis-[ethyl3-(3,5-di-tert-butyl-4-hydroxyphenyl)-propionate].
Sec. 834. Dicyclohexylbenzothiazylsulfenamide.
Sec. 835. 2,4 dichloro-5-sulfamoyl benzoic acid.
Sec. 836. Derivates of N-[4-(2-hydroxy-3-phenoxypropoxy)phenyl]acetamide.
Sec. 837. 1,2-dimethyl 1-3,5-diphenylpyrazolium methyl sulfate (dibenzoquat methyl sulfate).
Sec. 838. Dicofol.
Sec. 839. Certain knitwear fabricated in Guam.
Sec. 840. 3,7-bis(dimethylamino)-phenazathionium chloride.
Sec. 841. 3,5 dinitro-o-toluamide.
Sec. 842. Secondary butyl chloride.
Sec. 843. Certain nonbenzenoid vinyl acetate-vinyl chloride-ethylene terpolymer.
Sec. 844. Tungsten ore.
Sec. 845. Certain stuffed toy figures.
Sec. 846. Certain plastic sheeting.
Sec. 847. Duty free entry of personal effects and equipment of participants and officials involved in the 10th Pan American Games.
Sec. 848. Doll wig yarns.
Sec. 849. Carding and spinning machines.
Sec. 850. Certain bicycle parts.
Sec. 851. 1-(3-Sulfopropyl) pyridinium hydroxide.
Sec. 852. d-6-Methoxy-α-methyl-2-naphthaleneacetic acid and its sodium salt.
Sec. 853. Certain pesticides.
Sec. 854. Cholestyramine resin USP.
Sec. 855. 3-amino-3-methyl-1-butyne.
Sec. 856. Maneb, zineb, mancozeb, and metiram.
Sec. 857. Nicotine resins.
Sec. 858. Hosiery knitting needles.
Sec. 859. Extension of certain existing suspensions.
CHAPTER 3—OTHER CUSTOMS AND EFFECTIVE DATE PROVISIONS
Sec. 861. GSP treatment of watches.
Sec. 862. Marking of containers of imported mushrooms.
Sec. 863. Customs services at Pontiac/Oakland, Michigan, airport.
Sec. 864. Ethyl Alcohol and mixtures thereof for fuel use.

Sec. 865. Customs bond cancellation standards.
Sec. 866. Relief of the W. M. Keck Observatory project, Mauna Kea, Hawaii.
Sec. 867. Relief of Rukert Marine Corporation of Baltimore, Maryland.
Sec. 868. Relief of Minemet, Inc., New York.
Sec. 869. Effective dates.

Subtitle B—Implementation of Nairobi Protocol

CHAPTER 1—SHORT TITLE, PURPOSE, REFERENCE, AND EFFECTIVE DATE

Sec. 871. Short title.
Sec. 872. Purpose.
Sec. 873. Reference.
Sec. 874. Effective date.
Sec. 875. Retroactive application.

CHAPTER 2—AMENDMENTS TO IMPLEMENT THE NAIROBI PROTOCOL

Sec. 881. Repeal of 1982 Act.
Sec. 882. Treatment of printed matter and certain other articles.
Sec. 883. Visual and auditory material.
Sec. 884. Tools for scientific instruments or apparatus.
Sec. 885. Articles for the blind and for other handicapped persons.

CHAPTER 3—AUTHORITY TO MODIFY CERTAIN DUTY-FREE TREATMENT ACCORDED UNDER THIS SUBTITLE

Sec. 891. Authority to limit certain duty-free treatment.
Sec. 892. Authority to expand certain duty-free treatment accorded under section 102.
Sec. 893. Changes to TSUS to implement Florence Agreement provision.
Sec. 894. Statistical information.

TITLE I—TRADE LAW AMENDMENTS

Subtitle A—Enforcement of United States Rights Under Trade Agreements and Response to Certain Foreign Trade Practices

SEC. 111. REFERENCE TO THE TRADE ACT OF 1974.

Unless otherwise provided, whenever in this chapter an amendment or repeal is expressed in terms of an amendment to, or repeal of, a title, section, subsection, or other provision, the reference shall be considered to be made to a title, section, subsection, or other provision of the Trade Act of 1974 (19 U.S.C. 2101 et seq.).

SEC. 112. DETERMINATIONS REQUIRING ACTION.

Section 301 (19 U.S.C. 2411) is amended as follows:

(1) Subsection (a) is amended—

(A) by redesignating paragraph (2) as paragraph (5); and

(B) by striking out paragraph (1) and inserting the following:

"(1) MANDATORY ACTION.—

"(A) IN GENERAL.—If the President on his own motion determines, or the United States Trade Representative (hereinafter in this chapter referred to as the 'Trade Representative') determines under section 304(a), that—

"(i) the rights of the United States under any trade agreement are being denied; or

"(ii) an act, policy, or practice of a foreign country—

"(I) is inconsistent with the provisions of, or otherwise denies benefits to the United States under, any trade agreement, or

"(II) is unjustifiable and burdens or restricts United States commerce (including commerce between the United States and another foreign country),

the President, subject to subparagraph (B), shall take action under subsection (b) or (c), or both, and shall take all other appropriate and feasible action within his power, to enforce such rights or to obtain the elimination of such act, policy, or practice. Such action shall be devised so as to affect goods or services of the foreign country involved in an amount that is equivalent in value to, and necessary to eliminate fully, the burden or restriction being imposed by that country on United States commerce.

"(B) EXCEPTION.—The President is not required to take action under subparagraph (A) in any case in which—

"(i) the Contracting Parties to the General Agreement on Tariffs and Trade (hereinafter in this title referred to as the 'GATT') have determined, or a panel of experts has reported to the Contracting Parties, that—

"(I) the rights of the United States under a trade agreement are not being denied; or

"(II) the act, policy, or practice is not a violation of, or inconsistent with, the rights of the United States, or does not deny, nullify, or impair benefits to the United States under any trade agreement; or

"(ii) the President finds that—

"(I) the foreign country is taking satisfactory measures to grant the rights of the United States under a trade agreement,

"(II) the foreign country has agreed to eliminate or phase out the act, policy, or practice, or has agreed to an imminent solution, that is satisfactory to the President, to the burden or restriction on United States commerce,

"(III) it is impossible for the foreign country to achieve the results described in subclause (I) or (II), as appropriate, but the foreign country agrees to provide to the United States compensatory trade benefits that are satisfactory to the President, or

"(IV) such action is not in the national economic interest of the United States because it would result in United States economic interests being more adversely affected if action were taken under this subclause than if not, and he includes the reasons for such finding in the report required under paragraph (D).

"(C) EXPORT TARGETING.—If—

"(i) the Trade Representative determines that a policy or practice of export targeting by a foreign country exists with respect to a class or kind of merchandise under investigation; and

"(ii) the United States International Trade Commission (hereinafter in this chapter referred to as the 'Commission') determines under subsection (d) of section 302 that imports or sales for importation of that merchandise are causing the injury, threat of injury, or retardation described in paragraph (1) of that subsection to an industry in the United States;

the President shall take all appropriate and feasible action within his power to obtain the elimination of, or to offset fully the injurious effects of, such export targeting (or both obtain such elimination and offset such effects). Such action shall consist of—

"(I) action under subsection (b) or (c), or both;

"(II) the entry into an agreement under which the foreign country provides an imminent solution to the burden or restriction on United States commerce, or compensatory trade benefits satisfactory to the President;

"(III) administrative actions, and, if necessary, proposed legislation, to implement any other government action which would restore or improve the international competitive position of the industry that has been injured or threatened with injury; or

"(IV) any combination of the actions listed in subclauses (I), (II), and (III).

Any action taken under subsection (b) or (c) shall be devised so as to affect goods or services of the foreign country involved in an amount that is equivalent in value to, and necessary to eliminate fully, the burden or restriction imposed by that country on United States commerce not otherwise eliminated or offset under this subparagraph. The action under this subparagraph shall, to the extent possible, reflect the full benefit level of the policy or practice of export targeting to the beneficiary over the period during which it has an effect.

"(D) REPORT TO CONGRESS.—The President shall promptly report in writing to Congress with respect to each action taken (or the reasons why no action was taken)—

"(i) to enforce the rights of the United States or to eliminate the acts, policies, and practices described in subparagraph (A); or

"(ii) to eliminate or offset the policy or practice described in subparagraph (C).

"(2) DISCRETIONARY ACTION.—If the President on his own motion determines, or the Trade Representative determines under section 304(a), that an act, policy, or practice of a foreign country is unreasonable or discriminatory and burdens or restricts United States commerce (including commerce between the United States and another foreign country); the President, if he determines that action by the United States is appropriate, shall take all appropriate and feasible action within his power to obtain the elimination of that act, policy, or practice.

"(3) EFFECT IF ACTION REQUIRED TO BE TAKEN UNDER SECTION 311.—The President may not take any action under paragraph (1) or (2) with respect to a foreign country during any time during which action is required to be taken regarding that country under section 311.

"(4) UNITED STATES AGRICULTURAL EXPORTS.—Before determining to take action to restrict imports under this subsection, the President shall take into account the likely impact that such action will have on United States agricultural exports. A statement regarding the likely impact, if any, of an import restricting action on United States agricultural exports shall be included in the notice of the determination required to be published under subsection (d).".

(2) Subsection (b) is amended—

(A) by amending that part that precedes paragraph (1) to read as follows: "For purposes of carrying out paragraphs (1) and (2) of subsection (a), the President is authorized to—";

(B) by striking out the period at the end of paragraph (2) and inserting "; or "; and

(C) by inserting after paragraph (2) the following:

"(3) withdraw or refrain from proclaiming under title V—

"(A) the designation of such foreign country as a beneficiary developing country; or

"(B) the designation of any product of such foreign country as an eligible article.".

(3) Paragraph (1) of subsection (c) is amended by striking out "may" and inserting "is authorized to".

(4) Subsection (d) is amended—

(A) by amending the first sentence of paragraph (1) to read as follows: "If the President determines to take action on his own motion under subsection (a)(1) or (2), the President shall publish notice of the determination, including the reasons therefor, in the Federal Register."; and

(B) by amending paragraph (2) to read as follows:

"(2) ACTION AFTER RECOMMENDATION.—

"(A) IN GENERAL.—Unless subparagraph (B) applies, the President, within 30 days after the date he receives the recommendation of the Trade Representative under section 304, shall—

"(i) determine what action, if any, he will take under this section; and

"(ii) implement the action.

"(B) DELAY IN DETERMINING OR IMPLEMENTING ACTION.—Subject to subparagraph (C), the President may delay determining the action he will take, or delay implementing action, under subsection (b) or (c), or both—

"(i) if either—

"(I) in the case of an investigation initiated under section 302(b), the petitioner requests such delay, or

"(II) in the case of an investigation initiated under section 302(c), such delay is requested by the domestic industry that would benefit from the action; or

"(ii) the President determines that substantial progress is being made to grant the rights or to achieve a satisfactory solution with respect to the act, policy, or practice concerned.

"(C) LIMITATION ON DELAY AND IMPLEMENTATION.—No delay under subparagraph (B)—

"(i) in determining what action to take;

"(ii) in implementing an action; or

"(iii) in both determining and implementing an action;

may exceed 90 days.

"(D) NOTICE.—The President shall promptly cause notice to be published in the Federal Register of—

"(i) each determination made under subparagraph (A);

"(ii) each delay decided upon under subparagraph (B); and

"(iii) the reasons for the determination or delay.".

(5) Subsection (e) is amended—

(A) by striking out "For purposes of this section," and inserting "For purposes of this chapter,";

(B) by amending paragraph (3) to read as follows:

"(3) UNREASONABLE.—The term 'unreasonable' means any act, policy, or practice which, while not necessarily in violation of or inconsistent with the international legal rights of the United States, is otherwise deemed to be unfair and inequitable. The term includes, but is not limited to, toleration of cartels, and any act, policy, or practice that—

"(A) denies internationally recognized worker rights which include—

"(i) the right of association,

"(ii) the right to organize and bargain collectively,

"(iii) a prohibition on the use of any form of forced or compulsory labor,

"(iv) a minimum age for the employment of children, and

"(v) acceptable conditions of work with respect to minimum wages, hours of work, and occupational safety and health;

"(B) denies fair and equitable—

"(i) market opportunities,

"(ii) opportunities for the establishment of an enterprise, or

"(iii) provision of adequate and effective protection of intellectual property rights."; and

(C) by adding at the end thereof the following new paragraphs:

"(7) FOREIGN COUNTRY.—The term 'foreign country' includes any foreign instrumentality.

"(8) EXPORT TARGETING.—The term 'export targeting' means any government plan or scheme consisting of a combination of coordinated actions, whether carried out severally or jointly, that are bestowed on a specific enterprise, industry, or group thereof the effect of which is to assist the enterprise, industry, or group to become more competitive in the export of a class or kind of merchandise.

"(9) INTERESTED PERSONS.—For purposes of sections 301(d)(1), 302(b)(2)(B), 304(b)(1), and 307(b), the term 'interested persons' includes, but is not limited to, domestic firms and workers, representatives of consumer interests, and United States product exporters that may be affected.".

SEC. 113. EXPORT TARGETING.

Section 302 (19 U.S.C. 2412) is amended as follows:

(1) Subsection (b)(2) is amended to read as follows:

"(2) AFFIRMATIVE DETERMINATION.—

"(A) INITIATION.—If the Trade Representative determines to initiate an investigation with respect to a petition he shall initiate an investigation with respect to the issues raised. If the investigation is with regard to alleged export targeting, the Trade Representative shall immediately transmit to the Commission a copy of the petition or, if the investigation is initiated by motion of the Trade Representative, a written statement describing the issues under investigation.

"(B) NOTICE.—The Trade Representative shall publish a summary of the petition in the Federal Register and shall, as soon as possible, provide opportunity for the presentation of views by interested persons concerning the issues, including a public hearing—

"(i) within the thirty-day period after the date of the determination (or on a date after such period if agreed to by the petitioner) if a public hearing within such period is requested in the petition; or

"(ii) at such other time if a timely request therefor is made by the petitioner or by any interested person.

"(C) SPECIAL RULES IN EXPORT TARGETING INVESTIGATIONS.—

"(i) TIME FOR DETERMINATION.—If a petition alleges export targeting, the Trade Representative must make a determination regarding the allegation within 180 days after the date on which the investigation is initiated. The Trade Representative shall publish notice of the determination in the Federal Register. The Trade Representative may consult with appropriate Federal agencies in making that determination.

"(ii) TERMINATION.—If the determination of—

"(I) the Trade Representative under clause (i) is negative; or

"(II) the Commission under section 302(d)(1) is negative;

the Trade Representative shall terminate the investigation.".

(2) The following new subsection is added at the end thereof:

"(d) INJURY CAUSED BY EXPORT TARGETING.—

"(1) DETERMINATION BY COMMISSION.—No later than the 180th day after the date on which the Trade Representative transmits to the Commission under subsection (b)(2)(A) a copy of a petition or a written statement regarding alleged export targeting with respect to a class or kind of merchandise, the Commission shall make a determination (and report the determination and the basis therefor to the Trade Representative) regarding whether—

"(A) an industry in the United States is materially injured, or is threatened with material injury; or

"(B) the establishment or growth of an industry in the United States is being materially retarded;

by reason of imports of that merchandise or by reason of sales (or the likelihood of sales) of that merchandise for importation.

"(2) MATERIAL INJURY.—

"(A) IN GENERAL.—The term 'material injury' means harm which is not inconsequential, immaterial, or unimportant.

"(B) VOLUME AND CONSEQUENT IMPACT.—In making determinations under this subsection, the Commission shall consider, among other factors—

"(i) the volume of imports or sales of the merchandise which is the subject of the investigation;

"(ii) the effect of imports or sales of that merchandise on prices in the United States for like products; and

"(iii) the impact of imports or sales of such merchandise on domestic producers of like products.

"(C) EVALUATION OF VOLUME AND PRICE EFFECTS .—For purposes of this subsection—

"(i) VOLUME.—In evaluating the volume of imports or sales of merchandise, the Commission shall consider whether the volume of imports or sales of the merchandise, or any increase in that volume, either in absolute terms or relative to production or consumption in the United States is significant.

"(ii) PRICE.—In evaluating such effect of imports or sales of the merchandise on prices, the Commission shall consider—

"(I) whether there has been significant price undercutting by the imported merchandise as compared with the price of like products of the United States; and

"(II) whether the effect of imports or sales of such merchandise otherwise depresses prices to a significant degree or prevents to a significant degree price increases that otherwise would have occurred.

"(iii) IMPACT ON AFFECTED INDUSTRY.—In examining the impact on the affected industry involved in the investigation, the Commission shall evaluate all relevant economic factors which have a bearing on the state of the industry, including, but not limited to—

"(I) actual and potential decline in output, sales, market share, profits, productivity, return on investments, and utilization of capacity;

"(II) factors affecting domestic prices;

"(III) actual and potential negative effects on cash flow, inventories, employment, wages, growth, ability to raise capital, outlays for research and development, and investment; and

"(IV) decreases in sales or prices, or both, of United States exports of like products in third country markets.

"(3) THREAT OF MATERIAL INJURY.—

"(A) IN GENERAL.—In determining whether an industry in the United States is threatened with material injury by reason of imports (or sales for importation) of the merchandise under investigation, the Commission shall consider, among other relevant economic factors—

"(i) any increase in production capacity or existing unused capacity in the exporting country under investigation that is likely to result in a significant increase in imports of the merchandise to the United States;

"(ii) any rapid increase in United States market penetration and the likelihood that the penetration will increase to an injurious level;

"(iii) the probability that imports of the merchandise under investigation will enter the United States at prices that will have a

depressing or suppressing effect on domestic prices of like products;

"(iv) any substantial increase in inventories of the merchandise in the United States; and

"(v) any other demonstratable adverse trends that indicate the probability that the importation (or sales for importation) of such merchandise will be the cause of actual injury.

"(B) BASIS FOR DETERMINATION.—Any determination by the Commission under this subsection that an industry in the United States is threatened with material injury shall be made on the basis of the evidence that the threat of material injury is real and that actual injury is imminent. Such a determination may not be made on the basis of mere conjecture or supposition.

"(4) ADDITIONAL FACTORS.—The Commission shall also take into account, in addition to the factors under paragraph (2)(B)(iii), such information as may be available to it as to actual or potential sales by the country under investigation to third country markets and the impact of such sales on the affected industry, including the impact on sales or prices of like products of the United States to such third country markets.

"(5) STANDARD FOR DETERMINATION.—The presence or absence of any factor which the Commission is required to evaluate under paragraph (2)(C) or (3) shall not necessarily give decisive guidance with respect to the determination of material injury by the Commission.

"(6) REMEDIES UNDER TARIFF ACT OF 1930.—If, in the course of an investigation conducted under this subsection, the Commission has reason to believe that a foreign government is engaged in any action or practice for which relief is available under section 303 or title VII of the Tariff Act of 1930, the Commission shall inform the administering authority and the Trade Representative. The Trade Representative shall consult with the petitioner, if any, regarding the advisability and desirability of taking action under the appropriate provisions of section 303 or title VII of the Tariff Act of 1930.".

(3) The side heading for such section is amended by striking out "initiation of".

SEC. 114. INVESTIGATORY PROCEDURES.

(a) PETITION DETERMINATIONS.—The second sentence of section 301(d)(1) (19 U.S.C. 2411(d)(1)) is amended by inserting "by interested persons" after "presentation of views".

(b) OBTAINING INFORMATION.—Section 302 (19 U.S.C. 2412) is further amended by adding at the end thereof the following new subsection:

"(e) OBTAINING INFORMATION.—

"(1) IN GENERAL.—With respect to any investigation initiated under subsection (b)(2), the Trade Representative shall direct to the foreign countries relevant to the investigation such inquiries as the Trade Representative considers appropriate for the purpose of obtaining information relevant to the determinations and recommendations required under section 304(a).

"(2) VERIFICATION AND USE OF BEST INFORMATION OTHERWISE AVAILABLE.—The Trade Representative may, as to any information furnished in response to an inquiry under paragraph (1), request that the foreign country furnishing such information provide such documentation, or permit such verification, of the information as the Trade Representative considers appropriate. With respect to any information requested in an inquiry under paragraph (1) which is either—

"(A) not furnished in a timely manner;

"(B) is furnished in incomplete or inadequate form; or

"(C) is not documented or verified to the extent considered sufficient by the Trade Representative;

the Trade Representative may disregard all or any part of such information, and instead utilize the best information otherwise available for purposes of making the determinations and recommendations required under section 304(a).".

(c) DELAY OF CONSULTATION REQUEST.—Section 303(b)(1)(A) (19 U.S.C. 2413(b)(1)(A)) is amended by inserting ", after consulting with the petitioner," after "may".

(d) RECOMMENDATIONS.—Section 304(b) (19 U.S.C. 2414(b)) is amended—

(1) by striking out "Before recommending that the President take action under section 301" and inserting "Before making a recommendation to the President under subsection (a) on what action, if any, he should take under section 301, including action";

(2) by amending paragraph (1) to read as follows:

"(1) shall provide opportunity (after giving not less than 30 days notice thereof) for the presentation of views by interested persons, and such opportunity shall include a public hearing, if requested by any interested person;"; and

(3) by redesignating paragraphs (2) and (3) as paragraphs (3) and (4), respectively; and

(4) by inserting after paragraph (1) the following new paragraph:

"(2) shall, if a policy or practice of export targeting is involved, consult with representatives of the United States industry and workers affected by the policy or practice, and with other interested persons, with respect to the nature of the appropriate remedial action, including possible affirmative measures to enhance the international competitiveness of that industry;".

SEC. 115. MANDATORY INITIATION OF CERTAIN INVESTIGATIONS BY TRADE REPRESENTATIVE.

Section 302(c) (19 U.S.C. 2412(c)) is amended by adding at the end thereof the following new paragraph:

"(3) MANDATORY INITIATION.—Within 90 days after an act, policy, or practice is identified under section 181(b)(1) as having significant adverse impact on United States exports, the Trade Representative, if the act, policy, or practice—

"(A) is considered by the Trade Representative as likely being an act, policy, or practice described in section 301(a)(1)(A); and

"(B) is not otherwise the subject of an investigation under this title;

shall consult with interested persons and shall initiate an investigation under subsection (b)(2) regarding that act, policy, or practice if the Trade Representative determines that—

"(i) such consultations indicate that action under this subchapter would likely result in expanded export opportunities for United States products;

"(ii) action under this subchapter would not likely result in United States exports suffering significant adverse effects because of displacement in export markets, foreign retaliation, or foreign action that is similar to action that could be taken under this subchapter; and

"(iii) it is in the economic interest of the United States to initiate such an investigation.".

SEC. 116. RECOMMENDATIONS FOR PRESIDENTIAL ACTION BY TRADE REPRESENTATIVE.

Section 304(a) (19 U.S.C. 2414(a)) is amended—

(1) by redesignating paragraphs (2) and (3) as paragraphs (3) and (4), respectively;

(2) by striking out all that precedes subparagraph (A) in paragraph (1) and inserting the following:

"(1) IN GENERAL.—On the basis of the investigation under section 302, and the consultations (and the proceedings, if applicable) under section 303, and subject to subsection (b), the Trade Representative shall—

"(A) determine whether—

"(i) the rights to which the United States is entitled under any trade agreement are being denied, or

"(ii) any act, policy, or practice described in section 301(a) exists; and

"(B) if the determination under subparagraph (A) is affirmative, and, if the investigation was with regard to alleged export targeting, the Commission made an affirmative determination under section 302(d) regarding injury, the threat of injury, or retardation, recommend to the President what action the President should take under section 301.

"(2) TIME FOR MAKING DETERMINATIONS AND RECOMMENDATIONS.—The Trade Representative shall make the determination and recommendation, if required, under paragraph (1) not later than—"; and

(3) by amending paragraph (2) (as added by paragraph (2))—

(A) by inserting ", or 9 months after the date of the investigation initiation, whichever first occurs" before the semicolon in subparagraph (C), and

(B) by striking out "12 months" in subparagraph (D) and inserting "9 months (11 months in the case of a petition alleging export targeting)"; and

(4) by striking out "paragraph (1)" each place it appears in paragraphs (3) and (4) (as redesignated by paragraph (1)) and inserting "paragraph (2)".

SEC. 117. MODIFICATION AND TERMINATION OF ACTIONS.

Title III is amended by adding at the end thereof the following new section:

"SEC. 307. MODIFICATION AND TERMINATION OF ACTIONS.

"(a) IN GENERAL.—The President may modify or terminate an action taken under section 301 if—

"(1) the Contracting Parties to the GATT have determined, or a panel of experts has reported to the Contracting Parties, that—

"(A) the action violates, or is inconsistent with, the international obligations of the United States, or

"(B) the foreign act, policy, or practice to which the action responds—

"(i) is not a violation of a trade agreement, or

"(ii) is not inconsistent with the provisions of, or otherwise does not otherwise deny, nullify, or impair benefits to the United States under, any trade agreement; or

"(2) the President determines that—

"(A) the foreign act, policy, or practice has been eliminated or is being phased out in a manner satisfactory to the President, or

"(B) on the basis of review and assessment under subsection (b), the action is not effective or its continuation is not in the national economic interest.

"(b) BIENNIAL REVIEW AND ASSESSMENT.—The Trade Representative shall, on a bien-

nial basis, review and assess the results of each action taken under section 301.

On the basis of such review, the Trade Representative shall recommend that such modifications and terminations be made under subsection (a) as he considers appropriate. During the review, the Trade Representative shall consult with the petitioner, if any, and other interested persons affected by the action under review concerning its effectiveness and whether any modification or termination of the action is indicated.

"(c) NOTICE; REPORT TO CONGRESS.—The President shall promptly cause notice to be published in the Federal Register of, and report in writing to Congress with respect to, any modification or termination of an action under subsection (a) and the reasons therefor.".

SEC. 118. BARRIERS TO MARKET ACCESS.

Section 181(b)(1) (19 U.S.C. 2241(b)(1)) is amended—

(1) by inserting "and the Committee on Foreign Affairs" after "Ways and Means" in the first sentence; and

(2) by adding at the end thereof the following new sentence: "Commencing with the analysis and estimate required to be submitted on or before October 30, 1986, the Trade Representative shall identify those acts, policies, and practices included in the analysis that had significant adverse impact on United States exports during the reporting period.".

SEC. 119. MANDATORY NEGOTIATIONS AND ACTION REGARDING FOREIGN COUNTRIES HAVING EXCESSIVE AND UNWARRANTED TRADE SURPLUSES WITH THE UNITED STATES.

(a) IN GENERAL.—Title III is amended by adding at the end thereof the following:

"Subchapter B—Special Provisions Regarding Trade Deficits

"SEC. 311. MANDATORY NEGOTIATIONS AND ACTION REGARDING FOREIGN COUNTRIES HAVING EXCESSIVE AND UNWARRANTED TRADE SURPLUSES.

"(a) DETERMINATION OF EXCESSIVE TRADE SURPLUS COUNTRIES.—

"(1) DETERMINATIONS.—The Commission, on the basis of the best available trade data, shall—

"(A) determine whether each major exporting country is an excessive trade surplus country for 1985 and for each year occurring within the period beginning on January 1, 1987, and ending December 31, 1990; and

"(B) determine if the percentage obtained by dividing—

"(i) the deficit of the United States, if any, in the merchandise balance of trade between the United States and the rest of the world during each of such years, by

"(ii) the gross national product of the United States for such year,

is less than 1.5 percent.

"(2) REPORTS.—The Commission shall make the determinations required under paragraph (1), and prepare and submit to the Trade Representative a report thereon, by April 1 of the year after the year with respect to which the determinations apply; except that the determinations for 1985 must be made, and the report submitted, by December 1, 1986.

"(3) PUBLICATION IN FEDERAL REGISTER.—Each report submitted to the Trade Representative under paragraph (2) shall be published in the Federal Register.

"(4) SUSPENSION OF APPLICATION OF SECTION.—For any year for which the Commission reports that the percentage referred to in paragraph (1)(B) is less than 1.5 percent—

"(A) no determinations are required under subsection (b)(1) for that year; and

"(B) no actions may be taken under subsection (e) during that year.

"(b) DESIGNATION OF EXCESSIVE AND UNWARRANTED TRADE SURPLUS COUNTRIES.—

"(1) DETERMINATIONS.—The Trade Representative shall, during the 15-day period beginning on the day after the day on which a report is submitted under subsection (a)(2) (but before January 1, 1987, with respect to the report submitted for 1985), determine whether each major exporting country identified as an excessive trade surplus country in the report maintained, during the year to which the report applies, a pattern of unjustifiable, unreasonable, or discriminatory trade policies or practices that have a significant adverse effect on United States commerce and contribute to the excessive trade surplus of that country. In making determinations under this paragraph, the Trade Representative shall take into account—

"(A) information submitted under section 181;

"(B) the recommendations, if any, for action made under section 304 with respect to that country;

"(C) countervailing duty and antidumping duty actions taken under section 303 and title VII of the Tariff Act of 1930 with respect to merchandise of that country;

"(D) adverse determinations under the GATT relating to that country; and

"(E) any other relevant information pertaining to the trade practices or policies of that country, including, but not limited to, the existence of discriminatory government procurement, excessive government regulation designed to discriminate against imported products, governmental tolerance of extensive dumping in foreign markets, export subsidy and targeting policies, excessive tariff barriers, and any other illegal trade barrier.

"(2) DESIGNATION.—If not designated as an excessive and unwarranted trade surplus country for the preceding year, a major exporting country with respect to which affirmative determinations are made under subsection (a)(1) and paragraph (1) for the same year shall, on the last day of the 15-day period referred to in paragraph (1), be designated as an excessive and unwarranted trade surplus country for such same year and such designation shall remain in effect until terminated.

"(3) TERMINATION OF DESIGNATIONS.—The designation of a major exporting country as an excessive and unwarranted trade surplus country shall terminate if a negative determination is made by the Commission under subsection (a)(1) with respect to any year, or by the Trade Representative under paragraph (1) with respect to any year. The termination shall apply for the year in which either of such negative determinations is made and shall continue in effect until affirmative determinations, if any, regarding that country are made under subsection (a)(1) and paragraph (1) with respect to the same year.

"(4) LIST.—The Trade Representative shall publish in the Federal Register, by the 10th day after the last day of the 15-day period referred to in paragraph (1), a list of all major exporting countries the designations of which as excessive and unwarranted trade surplus countries have not been terminated.

"(c) SURPLUS REDUCTION GOALS.—

"(1) FOR COUNTRIES DETERMINED TO BE EXCESSIVE AND UNWARRANTED TRADE SURPLUS COUNTRIES FOR 1985.—With respect to any major exporting country designated as an excessive and unwarranted trade surplus country for 1985, the surplus reduction goals are—

"(A) a bilateral trade surplus during 1987 in an aggregate value not exceeding 90 percent of the bilateral trade surplus of that country for 1985; and

"(B) a bilateral trade surplus for each year after 1987 in an aggregate value not exceeding 90 percent of the amount of the bilateral trade surplus of that country for the preceding year that would have occurred if the surplus reduction goal for the preceding year had been met.

"(2) FOR OTHER COUNTRIES.—With respect to any major exporting country designated as an excessive and unwarranted trade surplus country for any year (hereafter in this paragraph referred to as the 'designation year') after 1986, the surplus reduction goals are—

"(A) a bilateral trade surplus during the year after the designation year in an aggregate amount not exceeding 90 percent of the bilateral trade surplus of that country for the designation year; and

"(B) a bilateral trade surplus for each year thereafter in an aggregate amount not exceeding 90 percent of the amount of the bilateral trade surplus of that country for the preceding year that would have occurred if the surplus reduction goal for the preceding year had been met.

"(d) NEGOTIATIONS.—

"(1) IN GENERAL.—During the 60-day period after the 15-day period referred to in subsection (b)(1), the Trade Representative shall enter into negotiations with each foreign country that was designated as an excessive and unwarranted trade surplus country on the last day of that 15-day period under subsection (b)(2) for the purpose of entering into a bilateral trade agreement to achieve the surplus reduction goals set forth in subsection (c).

"(2) EXTENSION.—If the Trade Representative considers that further negotiations with a foreign country are necessary to reach an agreement that will achieve the surplus reduction goals referred to in subsection (c), the Trade Representative may extend the 60-day period referred to in paragraph (1) by not more than an additional 60 days.

"(e) PRESIDENTIAL ACTION.—If the Trade Representative is unable to enter into a trade agreement under subsection (d) with an excessive and unwarranted trade surplus country to achieve the surplus reduction goals set forth in subsection (c), the President, after the close of the 60-day negotiating period (or the last day of that period as extended under subsection (d)(2)), shall take such of the following actions with respect to that country that he considers necessary or appropriate to achieve the surplus reduction goals:

"(1) Suspend, withdraw, or prevent the application of benefits of trade agreement concessions to carry out any trade agreement with that country.

"(2) Direct customs officers to assess duties or impose other import restrictions on the products of that country for such time, in such an amount, and to such a degree as the President determines appropriate.

"(3) Negotiate agreements (including, but not limited to, orderly marketing agreements) with that country.

"(4) Take administrative action, and if necessary, propose legislation, to implement any other government action which would

restore or improve the international competitive position of United States industries with that country;

except if the action taken under any of paragraphs (1) through (4) with respect to any year does not achieve the surplus reduction objective for that year, the President, for the next year, shall impose such quantitative restrictions on the importation into the United States of the products of that country as are necessary to ensure that the reduction goal for the next year is achieved. The President shall take into account the effect that action proposed to be taken under this subsection may have on existing bilateral trade agreements.

"(f) SURPLUS GOAL REDUCTION AND WAIVER.—

"(1) IN GENERAL.—Subject to paragraph (2), the President may—

"(A) reduce the surplus reduction goal under subsection (c) for any excessive and unwarranted trade surplus country for any year if the President—

"(i) considers that, because of balance of payment difficulties (including debt repayments), the country cannot meet the goal for that year without suffering significant economic harm; and

"(ii) develops a plan of action for otherwise achieving the fundamental purposes of this section; or

"(B) waive the taking of any action under subsection (e) with respect to any excessive and unwarranted trade surplus country for any year if he—

"(i) considers that the taking of any such action would cause substantial harm to the national economic interest of the United States, and

"(ii) develops a plan of action for otherwise achieving the fundamental purposes of this section.

"(2) CONDITIONS AFFECTING REDUCTIONS AND WAIVERS.—

"(A) CONGRESSIONAL NOTIFICATION.—No reduction under paragraph (1)(A) or waiver under paragraph (1)(B) for any year with respect to any excessive and unwarranted trade surplus country shall have force and effect unless the President submits to the Congress within 10 days after the close of the period referred to in subsection (e) a document stating his intention to implement such a reduction or waiver and containing the plan of action required under such paragraph for achieving the fundamental purposes of this section.

"(B) CONGRESSIONAL DISAPPROVAL.—No reduction under paragraph (1)(A) or waiver under paragraph (1)(B) for any year with respect to any excessive and unwarranted trade surplus country shall have force and effect if a joint resolution described in section 152(a)(1)(C) is enacted within the 60-day period beginning on the date on which the document referred to in subparagraph (A) regarding the reduction or waiver is submitted to Congress.

"(g) ROUNDING OF TRADE STATISTICS.—For purposes of this section, any trade statistic or limitation shall—

"(1) be rounded off to the nearest billion dollars; and

"(2) shall be adjusted to reflect the fact that certain products of the United States may not, under law, be exported.

"(h) ADMINISTRATION.—

"(1) IN GENERAL.—The President shall apply the actions taken under subsection (e) on such intra-annual bases as the President considers appropriate to achieve the purposes of this section.

"(2) MONITORING.—The Secretary of the Treasury and the Commission shall undertake such intra-annual monitoring and analysis of the imports to the United States of products of excessive and unwarranted trade surplus countries with respect to which trade agreements entered into under subsection (d) and actions under subsection (e) are in force as may be necessary for purposes of evaluating the efficacy of the actions. The results of all such monitoring and analysis shall be immediately submitted to the President and the Trade Representative.

"(3) CPI ADJUSTMENT.—For each year after 1986, the Trade Representative shall adjust the dollar limitation set forth in subsection (i)(2) and (5) to reflect the percentage increase or decrease in the Consumer Price Index, published by the Bureau of Labor Statistics of the Department of Labor, for the preceding year.

"(i) DEFINITIONS.—For purposes of this section—

"(1) The term 'excessive trade surplus country' means any major exporting country which has—

"(A) a bilateral export percentage for the year that exceeds 175 percent, and

"(B) a bilateral trade surplus for the year that exceeds the bilateral trade surplus limitation for such country for the year.

"(2) A foreign country is a major exporting country for a year if the aggregate value of the merchandise trade between such foreign country and the United States during such year is more than $7,000,000,000.

"(3) The term 'foreign country' includes any instrumentality of a foreign country.

"(4) The term 'bilateral export percentage' means, with respect to any foreign country for any year, the percentage determined by dividing—

"(A) the aggregate value of nonpetroleum products of such country exported to the United States during such year; by

"(B) the aggregate value of nonpetroleum products of the United States imported into such country during such year.

"(5) The term 'bilateral trade surplus' means, with respect to any foreign country for any year, an excess of—

"(A) the aggregate value of nonpetroleum products of such country exported to the United States during such year; over

"(B) the aggregate value of nonpetroleum products of the United States imported into such country during such year;

if such excess is at least $3,000,000,000.

"(6) The term 'bilateral trade surplus limitation' means, with respect to any foreign country for any year, the amount determined by multiplying—

"(A) the bilateral trade surplus of such country for the preceding year; by

"(B) 90 percent.

"(7) The term 'nonpetroleum product' means any merchandise other than merchandise classified to division 33 of the Standard International Trade Classification (revision II) published by the United Nations.

"(8) The term 'value' means—

"(A) with respect to merchandise imported into the United States, the customs valuation under the Tariff Act of 1930 of those imports, plus all freight, insurance, and other charges incurred regarding the importation (excluding United States tariffs and import excise taxes), and

"(B) with respect to merchandise imported into a foreign country, the transaction prices of such imports plus the freight, insurance, and other charges determined by the Secretary of the Treasury that are incurred in placing the exports alongside the carriers at the United States ports of export.

"(9) The term 'entered' means entered, or withdrawn from warehouse, for consumption in the customs territory of the United States.

"(10) The term 'entry' includes any withdrawal from warehouse.

"(11) The term 'best trade data available' means—

"(A) with regard to data on the international trade of the United States, official trade information, including the estimates required under section 181, of the United States Government, and

"(B) with regard to data on the international trade of any other country, data that the Commission determines is the most reliable data available for the period under consideration, and may include estimates if the actual data required by this section, or the forms of the data required by this section, are not directly available.

"(12) Any article that is grown, produced, or manufactured in a country is a product of such country.

"(13) Any reference to a year in this section shall be treated as a reference to a calendar year.

"(j) TERMINATION OF EFFECT OF SECTION.—Neither this section nor any action taken, or agreement entered into, under the authority of this section shall have force and effect after December 31, 1990.".

(b) CONFORMING AMENDMENTS.—Section 152(a)(1) (19 U.S.C. 2192(a)(1)) is amended—

(1) by striking out "and" at the end of subparagraph (A);

(2) by striking out the period at the end of subparagraph (B) and inserting "; and"; and

(3) by adding after subparagraph (B) the following:

"(C) a joint resolution of the two Houses of Congress, the matter after the resolving clause of which is as follows: 'That the Congress does not approve the reduction or waiver (under section 311 of the Trade Act of 1974) described in the document transmitted to Congress on .', the blank space being filled with the appropriate date.".

SEC. 120. CONFORMING AMENDMENTS AND EFFECTIVE DATE.

(a) CONFORMING AMENDMENTS.—Title III is further amended—

(1) by striking out "United States Trade Representative (hereinafter in this chapter referred to as the 'Trade Representative')" in section 301(c)(2)(B) and section 302(a)(1) and inserting "Trade Representative";

(2) by amending the table of contents by—

(A) inserting before the entry for section 301 the following:

"Subchapter A—General Provisions", and

(B) by adding at the end of the entries for title III the following:

"Sec. 307. Modification and termination of actions.

"Subchapter B—Special Provisions Regarding Trade Deficits

"Sec. 311. Mandatory negotiations and action regarding foreign countries having excessive and unwarranted trade surpluses.";

(3) by striking out "Initiation of" in the entry for section 302 in the table of contents;

(4) by striking out "an interested party" in section 305(b) and inserting "a person"; and

(5) by striking out "or instrumentality" each place it appears.

(b) EFFECTIVE DATE.—

(1) Unless otherwise provided in paragraphs (2) and (3), this chapter and the amendments made by it take effect on the date of the enactment of this Act.

(2) The amendments made by sections 112 and 114(d) apply to—

(A) petitions filed, and investigations initiated on his own motion by the United States Trade Representative, under section 302 of the Trade Act of 1974 on or after the date of the enactment of this Act; and

(B) petitions filed, and investigations self-initiated by the Trade Representative, under such section 302 before such date of enactment if by that date no recommendation had been made under section 30— regarding the petition or investigation.

(c) RECOMMENDATIONS BY TRADE REPRESENTATIVE.—The amendments made by paragraphs (1), (2), and (4) of section 116 apply to petitions and investigations described in paragraphs (1) and (2) of subsection (b). The amendments made by paragraph (3) of section 116 apply to petitions and investigations described in paragraph (1) of subsection (b).

Subtitle B—Relief From Injury Caused by Import Competition, Subsidies, Dumping, and Unfair Trade Practices

CHAPTER 1—RELIEF FROM INJURY CAUSED BY IMPORT COMPETITION

SEC. 121. IMPORT RELIEF.

(a) IN GENERAL.—Chapter 1 of title II of the Trade Act of 1974 (19 U.S.C. 2251-2253) is amended to read as follows:

"CHAPTER 1—IMPORT RELIEF

"SEC. 201. PETITION FOR RELIEF.

"(a) FILING.—A petition for eligibility for import relief for the purpose of facilitating orderly adjustment to import competition may be filed with the Commission by an entity, including a trade association, firm, certified or recognized union, or group of workers, which is representative of an industry. The petition shall—

"(1) include a statement describing the specific purposes for which import relief is being sought, which may include such objectives as facilitating the orderly transfer of resources to alternative uses and other means of adjustment to new conditions of competition;

"(2) if critical circumstances are alleged to exist, include information supporting that allegation; and

"(3) if desired by the petitioner, request that an industry adjustment plan be prepared under section 203.

"(b) DISTRIBUTION OF COPIES OF PETITIONS.—Whenever a petition is filed under subsection (a), the Commission shall promptly transmit copies of the petition to the Trade Representative and the agencies directly concerned.

"(c) EMERGENCY ACTION IF PERISHABLE PRODUCTS INVOLVED.—A person that files a petition under subsection (a) alleging import competition from a perishable product may also file a request with the Secretary of Agriculture in accordance with section 209 for emergency action under that section.

"SEC. 202. PRELIMINARY DETERMINATION REGARDING CRITICAL CIRCUMSTANCES.

"(a) IN GENERAL.—If a petition filed under section 201(a) alleges that critical circumstances exist, the Trade Representative shall, within 30 days after the date of filing, make a preliminary determination regarding whether there is the likelihood that such circumstances exist. The Trade Representative shall promptly publish notice of the determination in the Federal Register.

"(b) ACTION IF DETERMINATION AFFIRMATIVE.—If the preliminary determination under subsection (a) is affirmative, the Trade Representative shall—

"(1) order the suspension of the liquidation of all articles subject to the determination that are entered, or withdrawn from warehouse for consumption, on or after the date of publication of notice in the Federal Register under subsection (a); and

"(2) may order the posting of a cash deposit, bond, or other security, in such amount as he considers appropriate, for the ent../ of articles to which such suspension of liquidation applies.

"(c) DURATION OF ACTION.—

"(1) The Trade Representative shall terminate a suspension of liquidation ordered under subsection (b)(1), and release any bond or other security, and refund any cash deposit, required under subsection (b)(2) when—

"(A) the Commission determines under section 204 that critical circumstances do not exist;

"(B) a denial of import relief for the industry concerned under section 206 becomes final; or

"(C) if the Commission determined that critical circumstances do exist and import relief of a kind not referred to in paragraph (2) is provided under section 206, the order implementing the relief may so provide.

"(2) If the Commission determined that critical circumstances do exist and import relief described in section 210(2)(A)(i) or (ii) is provided under section 206, the increase in, or imposition of, duties under that relief shall apply to articles with respect to which liquidation was suspended under subsection (b)(1).

"(d) CRITICAL CIRCUMSTANCES.—For purposes of this section, critical circumstances exist if a substantial increase (absolutely or relatively) in the quantity of an article being imported into the United States over a relatively short period of time has led to circumstances in which a delay in the taking effect of import relief would cause harm that would significantly impair the effectiveness of such relief.

"(e) PERISHABLE PRODUCTS EXCLUDED.—Action may not be taken under this section with respect to any article that is a perishable product under section 209.

"SEC. 203. INDUSTRY ADJUSTMENT PLANS.

"(a) APPOINTMENT OF INDUSTRY ADJUSTMENT ADVISORY GROUP.—If the petitioner indicates under section 201(a)(3) that it wishes that an industry adjustment plan be prepared, the Trade Representative shall promptly—

"(1) establish an industry adjustment advisory group (hereinafter referred to in this section as the 'group') for the industry concerned; and

"(2) after consultation with the petitioner, appoint the membership of the group which shall consist of—

"(A) not less than 2, but not more than 4, individuals who are representative of the workers in the industry,

"(B) not less than 2, but not more than 4, individuals who are representative of firms within the industry, one of which shall be representative of small business firms,

"(C) 1 representative for the communities that are, or will likely be, dislocated by the injury, or the threat thereof, to the industry caused by import competition,

"(D) 1 individual who is knowledgeable regarding the special concerns of consumers of articles of the kind produced by the industry, and

"(E) 1 representative from each of the Department of Labor, the Department of Commerce, and the Department of Agriculture (if injury, or the threat thereof, to an agricultural industry is alleged).

The Trade Representative, or a designee of the Trade Representative, shall chair the group.

"(b) FUNCTION OF GROUP.—The group shall undertake to prepare, and submit to the Commission, an industry adjustment plan for the industry concerned. The last day on which a plan may be submitted by the group to the Commission is the 120th day after the day on which the petition is filed under section 201(a).

"(c) PLAN CONTENTS.—The industry adjustment plan for an industry should contain—

"(1) an assessment of the current problems of the industry (including, but not limited to, an assessment of the ability of producers in the industry to generate the adequate capital needed to modernize their domestic plants and equipment), and a strategy to enhance its competitiveness;

"(2) objectives, and specific steps that workers and firms could usefully undertake, to improve the ability of the industry to compete or to assist the industry to adjust to new competitive conditions; and

"(3) actions which may be taken by the appropriate Federal agencies under existing authority, or under new legislation, to assist—

"(A) in achieving the objectives referred to in paragraph (2), and

"(B) in remedying the dislocation to workers and communities caused by the serious injury, or threat thereof, caused by import competition.

To the extent practicable, objectives and steps referred to in paragraph (2) that are developed under a plan shall be designed to ensure that the industry concerned will be able to operate viably after import relief under this chapter is terminated.

"(d) INTENTIONS REGARDING PLAN IMPLEMENTATION.—If a plan is prepared under this section for an industry, the Trade Representative, after submission of the plan to the Commission under subsection (b) and before the close of the period referred to in section 205(b), shall seek to obtain, on a confidential basis, information from workers and from firms in the industry regarding—

"(1) how the workers and firms intend to act upon the objectives and steps specified in the plan; and

"(2) any other actions the workers or firms, or both, intend to take which will foster such objectives.

The Trade Representative shall transmit such information to the Commission, the Secretary of Labor, and the Secretary of Commerce on a confidential basis. The Trade Representative shall include with such confidential information any other information obtained by the Trade Representative on the capability, referred to in subsection (c)(1), of the industry to generate capital.

"(e) ADMINISTRATIVE SUPPORT.—The Trade Representative and, if appropriate, the Secretary of Labor, the Secretary of Commerce, and the Secretary of Agriculture shall provide appropriate administrative support to each group established under subsection (a).

"(f) NO EFFECT IF PLAN NOT REQUESTED OR PREPARED.—Neither—

"(1) the absence of a request by a petitioner that an industry adjustment plan be prepared under this section; nor

"(2) the failure of a group to prepare an industry adjustment plan;

may be taken into account by the Commission or Trade Representative in making any determination, or taking any action, under this chapter.

"SEC. 204. INVESTIGATIONS BY COMMISSION.

"(a) IN GENERAL.—Upon—

"(1) the filing of a petition under section 201(a);

"(2) the request of the President or the Trade Representative;

"(3) resolution of either the Committee on Ways and Means of the House of Representatives or the Committee on Finance of the Senate; or

"(4) its own motion;

the Commission shall promptly make an investigation to determine whether an article is being imported into the United States in such increased quantities as to be a substantial cause of serious injury, or the threat thereof, to the domestic industry producing an article like or directly competitive with the imported article.

"(b) ECONOMIC FACTORS.—

"(1) In making determinations under subsection (a), the Commission shall take into account all economic factors which it considers relevant, including (but not limited to)—

"(A) with respect to serious injury, the significant idling of productive facilities in the industry, the inability of a significant number of firms to operate domestic production facilities at a reasonable level of profit, and significant unemployment or underemployment within the industry;

"(B) with respect to threat of serious injury—

"(i) a decline in sales,

"(ii) a decrease in market share,

"(iii) a higher and growing inventory (whether maintained by domestic producers, importers, wholesalers, or retailers),

"(iv) a downward trend in production, profits, wages, or employment (or increasing underemployment) in the domestic industry concerned,

"(v) the extent to which the United States market is the focal point for the diversion of exports of the article concerned by reason of restraints on exports of such article to or on imports of such article into third country markets, and

"(vi) the inability of producers in the domestic industry to generate adequate capital to finance the modernization of their domestic plants and equipment.

"(C) with respect to substantial cause, an increase in imports (either actual or relative to domestic production) and a decline in the proportion of the domestic market supplied by domestic producers.

"(2) The presence or absence of any factor which the Commission is required to evaluate in subparagraphs (A) and (B) of paragraph (1) is not necessarily dispositive of whether an article is being imported into the United States in such increased quantities as to be a substantial cause of serious injury, or the threat thereof, to the domestic industry.

"(c) DETERMINATION OF DOMESTIC INDUSTRY.—For purposes of subsection (a), in determining the domestic industry producing an article like or directly competitive with an imported article, the Commission shall—

"(1) in the case of a domestic producer which also imports, treat as part of such domestic industry only its domestic production;

"(2) in the case of a domestic producer which produces more than one article, treat as part of such domestic industry only that portion or subdivision of the producer which produces the like or directly competitive article; and

"(3) in the case of one or more domestic producers who produce a like or directly competitive article in a major geographic area of the United States and whose production facilities in such area for such article constitute a substantial portion of the domestic industry in the United States and primarily serve the market in such area, and where the imports are concentrated in such area, treat as such domestic industry only that segment of the production located in such area.

"(d) OTHER MATTERS PERTAINING TO INVESTIGATIONS.—In the course of any investigation under subsection (a), the Commission shall—

"(1) for the purpose of assisting the Trade Representative in making determinations under section 205, investigate and report on efforts being made, or planned to be made, or both, by firms and workers in the industry to compete more effectively with imports;

"(2) investigate any factor which in its judgment may be contributing to increased imports of the article under investigation, and, whenever in the course of its investigation the Commission has reason to believe that the increased imports are attributable in part to circumstances which come within the purview of subtitles A and B of title VII or section 337 of the Tariff Act of 1930, or other remedial provisions of law, the Commission shall promptly notify the appropriate agency so that such action may be taken as is otherwise authorized by such provisions of law; and

"(3) after reasonable notice, hold public hearings and afford interested parties an opportunity to be present, to present evidence, and to be heard at such hearings.

"(e) IMPORT RELIEF DETERMINATIONS.—

"(1) If the Commission finds with respect to any article, as a result of its investigation, the serious injury or threat thereof described in subsection (a), the Commission shall—

"(A) determine the method and extent of import relief for the industry which is necessary to prevent or remedy that injury or threat; and

"(B) if the petition alleged critical circumstances, determine if critical circumstances exist.

"(2) If an industry adjustment plan for the industry was prepared under section 203, the Commission shall take the contents of the plan into account in making determinations under paragraph (1)(A).

"(f) REPORT BY COMMISSION.—

"(1) The Commission shall report to the Trade Representative its findings, and the basis therefor, with respect to each investigation undertaken under subsection (a). The report shall be made at the earliest practicable time, but not later than 6 months after the date on which the petition is filed, or resolution is received, or the motion is adopted, as the case may be.

"(2) The Commission shall include in the report required under paragraph (1)—

"(A) any dissenting or separate views by members of the Commission regarding the findings;

"(B) the import relief determination made under subsection (e);

"(C) if an industry adjustment plan was prepared under section 203, a copy of the plan; and

"(D) an estimate of the effect of the recommended import relief on consumers and on competitors in the domestic markets.

"(3) The Commission, after submitting any report to the Trade Representative under paragraph (1), shall promptly make it available to the public (with the exception of information which the Commission determines to be confidential) and cause a summary thereof to be published in the Federal Register.

"(4) Within 48 hours after the Commission finds with respect to any article the serious injury or threat thereof described in subsection (a), it shall notify the Secretary of Labor and the Secretary of Commerce of—

"(A) the finding;

"(B) the identity of the domestic producers and products within the scope of the finding; and

"(C) all nonconfidential information obtained by the Commission during the investigation that may be relevant to a determination of eligibility for adjustment assistance under chapters 2 and 3.

"(5) Except for good cause determined by the Commission to exist, no investigation for the purposes of this section shall be made with respect to the same subject matter as a previous investigation under this chapter, unless 1 year has elapsed since the Commission made its report to the President or the Trade Representative as the case may be of the results of such previous investigation.

"SEC. 205. ACTION BY TRADE REPRESENTATIVE AFTER INVESTIGATION.

"(a) IN GENERAL.—

"(1) After receiving a report from the Commission containing an affirmative finding under section 204 that increased imports have been a substantial cause of serious injury or the threat thereof with respect to an industry, the Trade Representative, subject to section 206, shall, unless he determines that the provision of import relief is not in the national economic interest of the United States, provide import relief to the extent that, and for such time (not to exceed 5 years) as, he determines necessary to prevent or remedy the serious injury or the threat thereof to the industry and to facilitate the orderly adjustment to competitive conditions by the industry.

"(2) If an industry adjustment plan was prepared under section 203, the Trade Representative may condition the provision of the import relief on compliance by workers or firms, or both, in the industry with such elements of the plan as he considers appropriate.

"(b) TIME LIMITATIONS.—The Trade Representative shall make the determinations necessary to carry out paragraph (1) or (2), as the case may be, of subsection (a) within 60 days (30 days in the case of a supplemental report under subsection (d)) after receiving a report from the Commission containing an affirmative finding under section 204 (or a finding under section 204 which he considers to be an affirmative finding, by reason of section 330(d) of the Tariff Act of 1930, within such 60-day (or 30-day) period); except that if information or advice is requested under subsection (e), the Trade Representative shall make the determinations necessary to carry out paragraph (1) or (2) within 30 days after the information or advice is received.

"(c) FACTORS AFFECTING PROVISION OF IMPORT RELIEF.—In determining whether to provide, and the method and duration of, import relief under subsection (a)(1), the Trade Representative shall take into account, in addition to such other considerations as he may consider relevant—

"(1) information and advice from the Secretary of Labor on the extent to which workers in the industry have applied for, are receiving, or are likely to receive adjustment assistance under chapter 2 or benefits from other manpower programs;

"(2) information and advice from the Secretary of Commerce on the extent to which firms in the industry have applied for, are receiving, or are likely to receive adjustment assistance under chapter 3;

"(3) the probable effectiveness of the provision of adjustment assistance under chapters 2 and 3 in remedying the dislocation to workers and communities caused by the serious injury or threat thereof to the industry;

"(4) the contents of the industry adjustment plan, if any, prepared under section 203;

"(5) the probable effectiveness of import relief as a means to promote adjustment, the efforts being made or to be implemented by the industry concerned to adjust to import competition, and other considerations relative to the position of the industry in the Nation's economy;

"(6) the effect of import relief on consumers (including the price and availability of the imported article and the like or directly competitive article produced in the United States) and on competition in the domestic markets for such articles;

"(7) information and advice from the Secretary of Agriculture on the likely effect of the import relief on the agricultural exports of the United States;

"(8) the effect of import relief on the international economic interests of the United States;

"(9) the impact on United States industries and firms as a consequence of any possible modification of duties or other import restrictions which may result from international obligations with respect to compensation;

"(10) the geographic concentration of imported products marketed in the United States;

"(11) the extent to which the United States market is the focal point for exports of such article by reason of restraints on exports of such article to, or on imports of such article into, third country markets; and

"(12) the economic and social costs which would be incurred by taxpayers, communities, and workers, if import relief were or were not provided.

"(d) SUPPLEMENTAL REPORT.—The Trade Representative may, within 15 days after the date on which he receives an affirmative finding of the Commission under section 204 with respect to an industry, request additional information from the Commission. The Commission shall, as soon as practicable but in no event more than 30 days after the date on which it receives the Trade Representative's request, furnish additional information with respect to such industry in a supplemental report.

"SEC. 206. CONDITIONS AND LIMITATIONS REGARDING IMPORT RELIEF.

"(a) CONGRESSIONAL REVIEW.—

"(1) On the day the Trade Representative makes the import relief determination necessary to carry out section 205(a), the Trade Representative shall transmit to Congress a document describing that relief. If the import relief to be provided by the Trade Representative differs from the import relief recommended by the Commission under section 204(e), he shall state the reason for the difference. The document shall also set forth the opinion of the Trade Representative regarding the likely impact, if any, that such import relief will have on agricultural exports of the United States.

"(2) On the day on which the Trade Representative determines under section 205(a) that the provision of import relief to a domestic industry is not in the national economic interest of the United States, the Trade Representative shall transmit to Congress a document setting forth such determination and the reasons why, in terms of the national economic interest, he is not providing import relief and also what other steps he is taking, beyond adjustment assistance programs immediately available to help the industry to overcome serious injury and the workers to find productive employment.

"(3) On the day on which the Trade Representative implements any import relief under section 205 not reported under paragraph (1), he shall transmit to Congress a document setting forth the action he is taking and the reasons therefor.

"(4) If the Trade Representative reports under paragraph (1) that the import relief being provided differs from the import relief recommended by the Commission under section 204(e), or that import relief will not be provided, the import relief recommended by the Commission under section 204(e) shall take effect (as provided in paragraph (5)) upon enactment of a joint resolution described in section 152(a)(1)(A) within the 90-day period beginning on the date on which the document referred to in paragraph (1) is transmitted to the Congress.

"(5) If the contingency set forth in paragraph (4) occurs, the Trade Representative shall (within 30 days after the enactment of the joint resolution referred to in paragraph (4)) provide the import relief that was recommended by the Commission under section 204(e).

"(b) TIME FOR TAKING EFFECT.—Import relief (other than through orderly marketing agreements) under this chapter shall be ordered, or otherwise implemented, and take effect within 15 days after the import relief determination date unless the Trade Representative announces on such date his intention to negotiate one or more orderly marketing agreements in which case import relief shall be implemented and take effect within 90 days after the import relief determination date.

"(c) ORDERLY MARKETING AGREEMENTS.—

"(1) If the Trade Representative provides import relief other than through orderly marketing agreements, he may, after such relief takes effect, negotiate orderly marketing agreements with foreign countries, and may, after such agreements take effect, suspend or terminate, in whole or in part, any import relief previously provided.

"(2) If the Trade Representative negotiates an orderly marketing agreement and such agreement does not continue to be effective, he may, consistent with the limitations contained in section 207(a), provide any other import relief described in section 210(2).

"(3) For purposes of this subsection, the term 'import relief determination date' means the date of the Trade Representative's determination under section 205(a).

"(d) TREATMENT OF CERTAIN SUSPENSIONS OF DUTY.—

"(1) The suspension of—

"(A) item 806.30 or 807.00 of the Tariff Schedules of the United States with respect to an article; and

"(B) the designation of any article as an eligible article for purposes of title V;

shall be treated as an increase in duty under section 210(2)(A)(i).

"(2) No order providing for a suspension referred to in paragraph (1) with respect to any article shall be made by the Trade Representative, or recommended by the Commission under section 204(e), unless the Commission, in addition to making an affirmative determination with respect to such article under section 204(a), determines in the course of its investigation under section 204 that the serious injury (or threat thereof) substantially caused by imports to the domestic industry producing a like or directly competitive article results from, as the case may be—

"(A) the application of item 806.30 or item 807.00, or

"(B) the designation of the article as an eligible article for the purposes of title V.

"(e) REGULATIONS.—

"(1) The Trade Representative shall by regulations provide for the efficient and fair administration of any the import relief provided under this chapter.

"(2) In order to carry out an orderly marketing agreement concluded to carry out this chapter, the Trade Representative may prescribe regulations governing the entry or withdrawal from warehouse of articles covered by such agreement. In addition, in order to carry out any orderly marketing agreement concluded under this chapter with one or more countries accounting for a major part of United States imports of the article covered by such agreements, including imports into a major geographic area of the United States, the Trade Representative may issue regulations governing the entry or withdrawal from warehouse of like articles which are the product of countries not parties to such agreement.

"(3) Regulations prescribed under this subsection shall, to the extent practicable and consistent with efficient and fair administration, insure against inequitable sharing of imports by a relatively small number of the larger importers.

"SEC. 207. EXTENSION, MODIFICATION, AND TERMINATION OF IMPORT RELIEF.

"(a) EXTENSION, MODIFICATION, AND TERMINATION.—Any import relief provided under this chapter—

"(1) shall, unless extended under paragraph (3), terminate no later than the close of the day which is 5 years after the day on which import relief with respect to the article in question first took effect pursuant to this section;

"(2) if provided for a period of more than 3 years, shall, to the extent feasible, be phased down during the period of such relief, with the first reduction of relief taking effect no later than the close of the day which is 3 years after the day on which such relief first took effect;

"(3) may be extended by the Trade Representative at a level of relief no greater than the level in effect immediately before such extension, for one period of not more than 3 years if the Trade Representative determines, after taking into account the advice received from the Commission under subsection (b) and after taking into account the considerations described in section 204(c),

that such extension is in the national interest; and

"(4) shall be terminated by the Trade Representative if he determines, after taking into account the advice received from the Commission under subsection (b) and after seeking advice of the Secretary of Commerce and the Secretary of Labor (and the Secretary of Agriculture if an agricultural product is involved), that such reduction or termination is in the national interest.

"(b) COMMISSION REVIEW.—

"(1) So long as any import relief remains in effect, the Commission shall keep under review developments with respect to the industry concerned (including the progress and specific efforts made by the firms in the industry concerned to adjust to import competition). The Commission shall submit to the Trade Representative, and make available to the public, a report on the review undertaken under this paragraph for the first biennial period, and each annual period thereafter, that the import relief is in effect.

"(2) Upon request of the Trade Representative or upon its own motion, the Commission shall advise the Trade Representative of its judgment as to the probable economic effect on the industry concerned of the extension, reduction, or termination of the import relief.

"(3) Upon petition on behalf of the industry concerned, filed with the Commission not earlier than the date which is 9 months, and not later than the date which is 6 months, before the date any import relief provided under this chapter is to terminate by reason of the expiration of the initial period therefor, the Commission shall advise the Trade Representative of its judgment as to the probable economic effect on such industry of such termination.

"(4) In advising the Trade Representative under paragraph (2) or (3) as to the probable economic effect on the industry concerned, the Commission shall take into account all economic factors which it considers relevant, including the considerations set forth in section 205(c) and the progress and specific efforts made by the industry concerned to adjust to import competition.

"(5) Advice by the Commission under paragraph (2) or (3) shall be given on the basis of an investigation during the course of which the Commission shall hold a hearing at which interested persons shall be given a reasonable opportunity to be present, to produce evidence, and to be heard.

"SEC. 208. MISCELLANEOUS PROVISIONS.

"(a) ARTICLES TO WHICH CHAPTER NOT APPLICABLE.—No investigation may be made under section 204 with respect to an article which has received import relief under this chapter unless 2 years have elapsed since the last day on which such import relief was provided with respect to that article.

"(b) OTHER PROVISIONS.—

"(1) Actions by the Trade Representative to this chapter may be taken without regard to the provisions of section 126(a) of this Act but only after consideration of the relation of such actions to the international obligations of the United States.

"(2) If the Commission treats as the domestic industry production located in a major geographic area of the United States under section 204(b)(3)(C), then the Trade Representative shall take into account the geographic concentration of domestic production and of imports in that area in providing import relief, if any, which may include actions authorized under paragraph (1).

"SEC. 209. EMERGENCY ACTION REGARDING IMPORTS OF PERISHABLE PRODUCTS.

"(a) IN GENERAL.—If a petition is filed with the Commission under section 201 alleging injury from imports of a perishable product, the petitioner may also file, at any time during the 150-day period after the date of filing under such section, a request with the Secretary of Agriculture (hereinafter in this section referred to as the 'Secretary') that emergency action be taken under subsection (d) with respect to that product.

"(b) DETERMINATION BY SECRETARY.—Within 20 days after a request is filed under subsection (a), the Secretary, after consultation with the Trade Representative and after providing opportunity for the presentation of views by interested parties, shall decide—

"(1) whether there is reason to believe that the perishable product is being imported into the United States in such increased quantities as to be a substantial cause of serious injury, or the threat thereof, to the domestic industry producing a perishable product like or directly competitive with the imported product; and

"(2) if the decision under paragraph (1) is affirmative, whether emergency action under subsection (c) is warranted.

For purposes of paragraph (1), normal seasonable fluctuations in imports of a perishable product may not be treated as being a substantial cause of serious injury or the threat thereof.

"(c) NEGATIVE DECISION.—(1) If a negative decision is made under subsection (b) regarding a request, the Secretary shall immediately publish notice of the decision in the Federal Register and advise the person who filed the request of the decision.

"(2) After a negative decision is made under subsection (b), a request may be refiled with the Secretary. A request may be refiled one or more times, but a refiling may not be made—

"(A) sooner than the 30th day after the date of a negative decision; or

"(B) after the 150th day after the date on which the petition was initially filed under section 201.

"(d) AFFIRMATIVE DECISION.—(1) If an affirmative decision is made under subsection (b) regarding a request, the Secretary shall—

"(A) determine the method and extent of emergency action to be imposed with respect to imports of the perishable product concerned that is necessary to prevent injury to the domestic industry;

"(B) immediately submit notice of the determination to the Trade Representative; and

"(C) unless the Trade Representative decides within 7 days after the date of such notice that the taking of emergency action under this section to the domestic industry is not in the national economic interest, order the Commissioner of Customs to take such action with respect to imports of the perishable products.

"(2)(A) Except as provided in subparagraph (B), emergency action under this section may consist of either or both of the following:

"(i) An increase in, or the imposition of, a duty on the perishable product.

"(ii) A modification of, or the imposition of, a quantitative limitation on the importation into the United States of the perishable product.

"(B) If a decision by the Secretary under subsection (b) covers any article that is a perishable product—

"(i) of a beneficiary country within the meaning of paragraph (5) of section 213(f) of the Caribbean Basin Economic Recovery Act (19 U.S.C. 2703(f)(5)); or

"(ii) of Israel within the meaning of subsection (e) of section 404 of the Tariff and Trade Act of 1984 (19 U.S.C. 2112 note);

the Secretary may take with respect to that product only the emergency action authorized under such section 213(f) or section 404, as the case may be.

"(e) REQUEST FOR TERMINATION OF EMERGENCY ACTION.—(1) Any person who is adversely affected by the taking of emergency action may, on or after the 30th day after the day such action first took effect, request the Secretary to terminate the action.

"(2) Within 20 days after a request is filed under paragraph (1), the Secretary, after consultation with the Trade Representative and after providing opportunity for the presentation of views by interested persons, shall decide whether changed circumstances warrant the termination of the emergency action.

"(3) If a negative decision is made under paragraph (2) regarding a request, the Secretary shall immediately publish notice of the decision in the Federal Register and advise the person who filed the request of the decision. After a negative decision under paragraph (2) is made, a request may be refiled with the Secretary. A request may be refiled one or more times, but a refiling may not be made—

"(A) sooner than the 30th day after the date of a negative determination; or

"(B) after the day on which the Commission issues its report under section 204(f) regarding the petition filed under section 201.

"(4) If an affirmative determination is made under paragraph (2) regarding a request, the Secretary shall order the Commissioner of Customs to immediately terminate the action.

"(f) TERMINATION OF EMERGENCY ACTION.—Unless terminated under subsection (e)(4), emergency action that is taken under subsection (c) with respect to an imported perishable product may not remain in effect after the date on which—

"(1) the Commission reports under section 204(f) that it did not find the serious injury or threat thereof described in section 204(a) to the industry;

"(2) the denial of import relief for the industry under section 206 becomes final; or

"(3) import relief for the industry first takes effect under section 205(a) or 206(a)(5) except that the Secretary may terminate such action whenever he determines that because of changed circumstances such action is no longer warranted.

"(g) DEFINITION OF PERISHABLE PRODUCT.—For purposes of this section, the term 'perishable product' has the same meaning that is given that term under section 404(e) of the Tariff and Trade Act of 1984 (12 U.S.C. 2112 note).

"SEC. 210. DEFINITIONS.

"As used in this chapter:

"(1) The term 'Commission' means the United States International Trade Commission.

"(2)(A) The term 'import relief' means one or more of the following actions with respect to an imported article:

"(i) Subject to subparagraph (B), the ordering of an increase in, or the imposition of, any duty on the article.

"(ii) Subject to subparagraph (B), the ordering of a tariff-rate quota on the article.

"(iii) The ordering of a modification of, or the imposition of, any quantitative restriction on the importation into the United States of the article.

"(iv) The negotiation, conclusion, and carrying out of orderly marketing agreements with foreign countries limiting the export from foreign countries and the importation into the United States of the article.

"(B) No order issued to implement import relief described in clause (i) or (ii) of subparagraph (A) shall be made increasing a rate of duty to (or imposing) a rate which is more than 50 percent ad valorem above the rate (if any) existing at the time of the order.

"(C) The import relief specified in clauses (iii) and (iv) of subparagraph (A) may not be provided to any industry at the same time.

"(3) The term 'industry' includes producers located in the United States insular possessions.

"(4) The phrase 'significant idling of productive facilities' includes the closing of plants or the underutilization of production capacity.

"(5) The term 'substantial cause' means a cause which is important and not less than any other cause.

"(6) The term 'Trade Representative' means the United States Trade Representative."

(b) CONFORMING AMENDMENTS.—

(1) TRADE ACT OF 1974.—The Trade Act of 1974 is amended as follows:

(A) Section 123(b)(4) (19 U.S.C. 2133(b)(4)) is amended by striking out "203(h)" and inserting "207(a)".

(B) section 127(b) (19 U.S.C. 2137(b)) is amended by striking out "203" and inserting "205".

(C) Sections 224 and 264 (19 U.S.C. 2274 and 2354) are each amended—

(i) by striking out "201" in subsection (a) and inserting "204";

(ii) by striking out "201" in subsection (b) and inserting "204(f)"; and

such section 264 is amended by striking out "201(b)" in subsection (c) and inserting "204(a)".

(D) Section 406 (19 U.S.C. 2436) is amended—

(i) by striking out "201(a)(1)" in subsection (a)(1) and subsection (d) and inserting "201(a)";

(ii) by striking out "subsections (a)(2), (b)(3), and (c) of section 201" in subsection (a)(2) and inserting "sections 201(b) and 204(c) and (d)(3)";

(iii) by amending subsection (b)—

(I) by striking out "sections 202 and 203" each place it appears and inserting "section 205", and

(II) by striking out "201(b)" and inserting "204(a)"; and

(iv) by striking out "202 and 203" in subsection (c) and inserting "205".

(2) CARIBBEAN BASIN ECONOMIC RECOVERY ACT.—Section 213 of the Caribbean Basin Economic Recovery Act (19 U.S.C. 2703) is amended—

(A) by amending subsection (e)(1)—

(i) by striking out "President may by proclamation" and inserting "United States Trade Representative", and

(ii) by striking out "proclaimed pursuant to section 203" and inserting "provided under chapter 1 of title II";

(B) by striking out "President under section 201(d)(1)" in subsection (e)(2) and inserting "United States Trade Representative under section 204";

(C) by striking out "(a) and (c) of section 203" in subsection (e)(3) and inserting "chapter 1 of title II";

(D) by amending subsection (e)(4)—

(i) by striking out "proclamation" and inserting "import relief",

(ii) by striking out "made under subsections (a) and (c) of section 203" and inserting "provided under chapter 1 of title II"; and

(iii) by striking out "201(b)" each place it appears and inserting 204";

(E) by amending subsection (e)(5)—

(i) by striking out "proclamation issued pursuant to section 203" and inserting "import relief provided under chapter 1 of title II", and

(ii) by striking out "subsections (h) and (i) of section 203" and inserting "section 207";

(F) by amending subsection (f)(2) by striking out "President" each place it appears and inserting "United States Trade Representative;

(G) by amending subsection (f)(4)—

(i) by amending subparagraph (A) by striking out "proclamation" and inserting "provision", and by striking out "202(a)(1)" and inserting "205", and

(ii) by striking out "the President makes a determination pursuant to section 203(b)(2)" in subparagraph (B) and inserting "the United States Trade Representative makes a determination under section 206(a)(2)".

(3) TARIFF AND TRADE ACT OF 1984.—

(A) Section 307(b)(4) of the Tariff and Trade Act of 1984 (19 U.S.C. 2114d(4)) is amended by striking out "actions taken under 203" and inserting "import relief provided under chapter 1 of title II.

(B) Title IV of the Tariff and Trade Act of 1984 is amended—

(i) by amending section 403—

(I) by striking out "President under section 201(d)(1)" in subsection (b) and inserting "United States Trade Representative under section 204",

(II) by striking out "subsections (a) and (c) of section 203" in subsections (c) and (d) and inserting "chapter 1 of title II",

(III) by striking out "section 203" in subsection (e)(1) and inserting "chapter 1 of title II", and

(IV) by striking out "subsections (h) and (i) of section 203" in subsection (e)(2) and inserting "subsections (a) and (b) of section 207"; and

(ii) by amending section 404—

(I) by striking out "President" each place it appears therein and inserting "United States Trade Representative";

(II) by striking out "proclamation of import relief under section 202(a)(1)" and inserting "provision of import relief under chapter 1 of title II", and

(III) by striking out "President makes a determination under section 203(b)(2)" and inserting "United States Trade Representative makes a determination under section 205(a)".

(4) TARIFF ACT OF 1930.—Section 330(d) of the Tariff Act of 1930 (19 U.S.C. 1330(d)) is amended—

(A) by amending paragraph (1)—

(i) by striking out "201" and inserting "204", and

(ii) by striking out "(b)(1)" and inserting "(a)";

(B) by amending paragraph (2)—

(i) by striking out "President" each place it appears and inserting "United States Trade Representative",

(ii) by striking out "201" the first place it appears and inserting "204",

(iii) by striking out "201(d)(1)" and inserting "204(e)",

(iv) by striking out "202 and 203" each place it appears and inserting "205" and 206", and

(v) by striking out "203(b)" in subparagraph (B) and inserting "206(a)"; and

(C) by striking out "203(c)(1)" in paragraph (4) and inserting "206(a)(4)".

(5) TABLE OF CONTENTS.—The entry for such chapter 1 in the table of contents to the Trade Act of 1974 is amended to read as follows:

"CHAPTER 1—IMPORT RELIEF

"Sec. 201. Petition for relief.
"Sec. 202. Provisional import relief if critical circumstances exist.
"Sec. 203. Industry adjustment plans.
"Sec. 204. Investigations by commission.
"Sec. 205. Action by trade representative after investigation.
"Sec. 206. Conditions and limitations regarding import relief.
"Sec. 207. Extension, modification, and termination of import relief.
"Sec. 208. Miscellaneous provisions.
"Sec. 209. Emergency action regarding imports of perishable products.
"Sec. 210. Definitions.".

(c) PERISHABLE ARTICLES.—Section 404(e) of the Trade and Tariff Act of 1984 (19 U.S.C. 2112 note) is amended—

(1) by striking out "and" at the end of paragraph (5);

(2) by striking out the period at the end of paragraph (6) and inserting "; and"; and

(3) by adding at the end thereof the following:

"(7) Chinese gooseberries provided for in item 149.48 of the TSUS.".

(d) EFFECTIVE DATE.—The amendments made by subsections (a) and (b) shall take effect on the date of the enactment of this Act and shall apply with respect to petitions filed under chapter 1 of title II of the Trade Act of 1974 on or after that date. Any petition filed under section 201 of such chapter before such date of enactment, and with respect to which the United States International Trade Commission did not make a finding before such date with respect to serious injury or the threat thereof, may be withdrawn and refiled, without prejudice, by the petitioner if the petitioner wishes to seek import relief in conjunction with an industry adjustment plan under section 203 (as amended by subsection (a)).

SEC. 122. ADJUSTMENT ASSISTANCE TRUST FUND.

(a) ESTABLISHMENT.—There is established in the Treasury of the United States a trust fund to be known as the Adjustment Assistance Trust Fund (hereinafter in this section referred to as the "Trust Fund").

(b) TRANSFERS TO FUND.—The Secretary of the Treasury shall transfer, at least quarterly, to the Trust Fund out of the general fund of the Treasury of the United States amounts determined by the Secretary of the Treasury to be equivalent to the amounts received into the general fund that are attributable to—

(1) the imposition of import relief under chapter 1 of title II of the Trade Act of 1974 of a kind described in section 210(2)(A) (i) and (ii) of that Act; and

(2) the public auctioning of import licenses under section 1102 of the Trade Agreements Act of 1979 (19 U.S.C. 2581).

(c) EXPENDITURES FROM FUND.—Amounts in the Trust Fund shall only be available—

(1) to carry out section 231 of title II of the Trade Act of 1974; and

(2) to the extent provided for in advance by appropriation Acts, to carry out chapters 2 and 3 of such title II (except section 231).

(d) DISPOSITION OF SURPLUS AMOUNTS.—Any amount remaining in the Trust Fund at the close of a fiscal year shall be deposited into the general fund of the Treasury as miscellaneous receipts.

SEC. 123. EXPEDITED CONSIDERATION OF PETITIONS FOR ADJUSTMENT ASSISTANCE.

(a) PETITIONS BY WORKERS.—Subchapter A of chapter 2 of title II of the Trade Act of 1974 (19 U.S.C. 2271 et seq.) is amended—

(1) by amending section 221(a) to read as follows:

"(a)(1) A petition for certification of eligibility to apply for adjustment assistance under this chapter may be filed with the Secretary of Labor (hereinafter in this chapter referred to as the 'Secretary') by a group of workers or by their certified or recognized union or other duly authorized representative.

"(2) If the petitioning group of workers is in a domestic industry with respect to which the United States International Trade Commission (hereinafter in this chapter referred to as the 'Commission') has determined, within 3 years before the date of the petition, under section 203(a) that an imported article is the substantial cause of serious injury, or threat thereof, to that industry, the Secretary shall give expedited consideration to the petition. For purposes of this paragraph, a tie vote by the Commissioners on a petition may not be treated as an affirmative determination.

"(3) Upon receipt of the petition, the Secretary shall promptly publish notice in the Federal Register that he has received the petition and initiated an investigation."; and

(2) by striking out "International Trade Commission (hereafter referred to in this chapter as the 'Commission')" in section 224(a).

(b) PETITIONS BY FIRMS.—Section 251(a) of the Trade Act of 1974 (19 U.S.C. 2341 et seq.) is amended to read as follows:

"(a)(1) A petition for certification of eligibility to apply for adjustment assistance under this chapter may be filed with the Secretary of Commerce (hereinafter in this chapter referred to as the 'Secretary') by a firm or its representative.

"(2) If the petitioning firm is in a domestic industry with respect to which the United States International Trade Commission has determined, within 3 years before the date of the petition, under section 203(a)(1) that an imported article is the substantial cause of serious injury, or threat thereof, to that industry, the Secretary shall give expedited consideration to the petition. For purposes of this paragraph, a tie vote by the Commission on a petition may not be treated as an affirmative determination.

"(3) Upon receipt of the petition, the Secretary shall promptly publish notice in the Federal Register that he has received the petition and initiated an investigation.".

SEC. 124. MARKET DISRUPTION.

Section 406 of the Trade Act of 1974 (19 U.S.C. 2436) is amended—

(1) by striking out "President" each place it appears in paragraphs (3) and (4) of subsection (a), and in subsections (b), (c), and (d), and inserting "United States Trade Representative";

(2) by striking out "Communist country" each place it appears therein and inserting "non-market economy country"; and

(3) by amending subsection (e) to read as follows:

"(e) For purposes of this section, the term 'non-market economy country' means any country dominated or controlled by communism."; and

(4) by adding at the end thereof the following new subsections:

"(f)(1) For purposes of this section, market disruption exists within a domestic industry whenever an article is being imported into the United States in such increased quantities (either absolutely or relatively) as to be an important cause of material injury or the threat thereof, to the domestic industry providing an article like or directly competitive with the imported article.

"(2) In making its determination under paragraph (1), the Commission shall consider, among other factors—

"(A) the volume of imports of the merchandise which is the subject of the investigation;

"(B) the effect of imports of the merchandise on prices in the United States for like or directly competitive articles;

"(C) the impact of imports of such merchandise on domestic producers of like or directly competitive articles; and

"(D) evidence of disruptive pricing practices, or other efforts to unfairly manage trade patterns.

"(3) For purposes of paragraph (2)—

"(A) In evaluating the volume of imports of merchandise, the Commission shall consider whether the increase in the volume of imports of the merchandise, either in absolute terms or relative to production or consumption in the United States, is significant.

"(B) In evaluating the effect of imports of such merchandise on prices, the Commission shall consider whether—

"(i) there has been significant price undercutting by the imported merchandise as compared with the price of like products of the United States, and

"(ii) the effect of imports of such merchandise otherwise depresses prices to a significant degree or prevents price increases, which otherwise would have occurred, to a significant degree.

"(C) In examining the impact on the affected industry, the Commission shall evaluate all relevant economic factors which have a bearing on the state of the industry, including, but not limited to—

"(i) actual and potential decline in output, sales, market share, profits, productivity, return on investments, and utilization of capacity.

"(ii) factors affecting domestic prices, and

"(iii) actual and potential negative effects on cash flow, inventories, employment, wages, growth, ability to raise capital, and investment.

"(4) In making its determination under paragraph (1), the Commission shall, where appropriate, cumulate imports from 2 or more non-market economy countries subject to investigation under this section.

"(g) The Commission may recommend, in addition to other relief available under this section, a variable tariff based on a comparison of average domestic producer prices and average import prices.

"(h) The Trade Representative may deny import relief with respect to imports from a non-market economy country only if the provision of such relief would have a serious negative impact on the domestic economy.".

CHAPTER 2—AMENDMENTS TO THE COUNTERVAILING AND ANTIDUMPING DUTY LAWS

SEC. 131. REFERENCE TO THE TARIFF ACT OF 1930.

Unless otherwise provided, whenever in this chapter an amendment or repeal is expressed in terms of an amendment to, or repeal of, a title, subtitle, section, subsection, or other provision, the reference shall be considered to be made to a title, subtitle, section, subsection, or other provision of the Tariff Act of 1930 (19 U.S.C. 1671 et seq.).

SEC. 132. PROCESSED AGRICULTURAL PRODUCTS.

(a) DEFINITION OF INDUSTRY.—Section 771(4) (19 U.S.C. 1677(4)) is amended by adding at the end thereof the following new subparagraph:

"(E) INDUSTRY PRODUCING PROCESSED AGRICULTURAL PRODUCTS.—

"(i) IN GENERAL.—In an investigation involving a processed agricultural product produced from any raw agricultural product, the producers or growers of the raw agricultural product may be considered part of the industry producing the processed product if—

"(I) the processed agricultural product is produced from the raw agricultural product through a single continuous line of production; and

"(II) there is a substantial coincidence of economic interest between the producers of the raw agricultural product and the producers of the processed agricultural product based upon relevant economic factors, which may, in the discretion of the Commission, include price, market value added by the producers, or other economic interrelationships (regardless of whether such coincidence of economic interest is based upon any legal relationship).

"(ii) PROCESS.—For the purposes of this subparagraph, the processed agricultural product shall be considered to be processed from a raw agricultural product through a single continuous line of production if—

"(I) the raw agricultural product is substantially or completely devoted to the production of the processed agricultural product; and

"(II) the processed agricultural product is produced substantially or completely from the raw product.

"(iii) EVALUATION OF FACTORS.—For purposes of this subparagraph, in evaluating the factors relevant to the question of coincidence of economic interest, the Commission shall—

"(I) if price is taken into account, consider the degree of correlation between the price of the raw agricultural product and the price of the processed agricultural product; and

"(II) if market value added by the producers is taken into account, consider whether the value of the raw agricultural product constitutes a significant percentage of the value of the processed agricultural product.

"(iv) RAW AGRICULTURAL PRODUCT.—For purposes of this subparagraph, the term 'raw agricultural product' means any farm, forest, or fishery product.".

(b) DEFINITION OF MATERIAL INJURY.—Section 771(7)(F) (19 U.S.C. 1677(7)(F)) is amended—

(1) by striking out "and" at the end of subclause (VII);

(2) by striking out the period at the end of subclause (VIII) and inserting ", and"; and

(3) by adding at the end thereof the following:

"(IX) in any investigation under this title which involves imports of both a raw agri-

cultural product (within the meaning of paragraph (4)(E)(iv)) and any product processed from such raw agricultural product, the likelihood that an affirmative determination by the Commission with respect to either the raw agricultural product or the processed agricultural product (but not both) would result in an increase in the imports of the other agricultural product to an injurious level.".

(c) DEFINITION OF INTERESTED PARTIES.—Section 771(9) (19 U.S.C. 1677(9)) is amended—

(1) by striking out "and" at the end of subparagraph (E) and inserting in lieu thereof a comma;

(2) by striking out the period at the end of subparagraph (F) and inserting in lieu thereof ", and"; and

(3) by adding at the end thereof the following new subparagraph:

"(G) in any investigation under this title involving an industry engaged in producing a processed agricultural product, as defined in paragraph (4)(E), a coalition or trade association which is representative of either processors or processors and producers.".

(d) CONFORMING AMENDMENTS.—

(1) Section 702(b)(1) and 732(b)(1) (19 U.S.C. 1671a(b)(1) and 1673(a)(b)(1)) are each amended by striking out "subparagraph (C), (D), or (E) of section 771(9)" each place it appears and inserting in lieu thereof "subparagraph (C), (D), (E), (F), or (G) of section 771(9)".

(2) Subsections (g)(2) and (h)(1) of sections 704 and 734 (19 U.S.C. 1671c; 1673c) are each amended by striking out "subparagraphs (C), (D), (E), and (F)" and inserting in lieu thereof "subparagraph (C), (D), (E), (F), or (G)".

(3) Section 514 (19 U.S.C. 1514) is amended by striking out "as defined in section 771(9)(C), (D), (E), and (F) of this Act".

(4) Subsection (a) of section 516 (19 U.S.C. 1516(a)) is amended by adding at the end thereof the following new paragraph:

"(3) Any producer of a raw agricultural product who is considered under section 771(4)(E) to be part of the industry producing a processed agricultural product of the same class or kind as the designated imported merchandise shall, for purposes of this section, be treated as an interested party producing such processed agricultural product.".

SEC. 133. DEFINITION OF DOMESTIC SUBSIDY.

Section 771(5)(B) of the Tariff Act of 1930 (19 U.S.C. 1677(5)(B)) is amended—

(1) by striking out clauses (i) and (ii) and inserting the following new clause:

"(i) The provision of capital, loans, loan guarantees, goods, or services at preferential rates or on terms inconsistent with commercial considerations."; and

(2) by redesignating clauses (iii) and (iv) as clauses (ii) and (iii), respectively.

SEC. 134. MATERIAL INJURY AND THREAT OF MATERIAL INJURY.

Section 771(7) (19 U.S.C. 1677(7)) is amended—

(1) by amending clause (iv) of subparagraph (C) to read as follows:

"(iv) CUMULATION.—For purposes of clauses (i) and (ii), the Commission shall cumulatively assess the volume and effect of imports from two or more countries of like products if such imports compete with each other, and with like products of the domestic industry, in the United States market, and if such imports—

"(I) are subject to any investigation under section 303, 701, or 731;

"(II) are subject to any final order or suspension agreement resulting from an investigation under section 303, 701, or 731; or

"(III) were entered before any quantitative restraint was imposed on the importation of like products, if such restraint was the basis on which a petition filed under section 303, 701, or 731 was withdrawn after the administering authority made an affirmative preliminary determination on the petition.

Subclauses (II) and (III) apply only if the order, agreement, or restraint concerned came into effect within the 12-month period ending on the date the investigation with respect to which this clause is being applied is initiated.";

(2) by amending clause (i) of subparagraph (F) (as amended by section 132(b))—

(A) by inserting the following before the comma at the end of subclause (I): "provided by a foreign country and effects likely to be caused by the subsidy";

(B) by striking out "and" at the end of subclause (VIII);

(C) by striking out the period at the end of subclause (IX) and inserting in lieu thereof ", and"; and

(D) by adding at the end thereof the following new subclauses:

"(X) any government plan or scheme consisting of a combination of coordinated government actions, whether carried out severally or jointly, that are bestowed on a specific enterprise, industry, or group thereof the effect of which is to assist the enterprise, industry, or group to become more competitive in the export of the merchandise; and

"(XI) the extent to which the United States is a focal point for exports of the merchandise by reason of restraints on exports of the merchandise to, or on imports of the merchandise into, third country markets.";

(3) by adding at the end of paragraph (F) the following new clauses:

"(iii) CUMULATION.—To the extent practicable, for purposes of clause (i) (III) and (IV), the Commission shall cumulatively assess the volume and effect of imports from two or more countries of like products if such imports—

"(I) compete with each other, and with like products of the domestic industry, in the United States market; and

"(II) are subject to any investigation under section 303, 701, or 731.

"(iv) EFFECT OF DUMPING IN THIRD-COUNTRY MARKETS.—In investigations under subtitle B, the Commission shall consider whether dumping in third country markets, as evidenced by findings or antidumping remedies in other GATT member markets against the same class or kind of merchandise manufactured or exported by the same party as under investigation, suggests a threat of material injury to the domestic industry. In the course of its investigation, the Commission shall request information from the foreign manufacturer, exporter, or United States importer concerning this issue. If the foreign manufacturer, exporter, or United States importer does not provide specific and convincing information to establish that there is no threat of injury to the United States industry, then the Commission may draw adverse inferences. For purposes of this clause, the term 'GATT member market' means any country which is a signatory to The Agreement on Implementation of Article VI of the General Agreement on Tariffs and Trade (relating to antidumping measures), and the European Community shall be treated as being one country."; and

(4) by adding at the end thereof the following:

"(G) SPECIAL RULES FOR FUNGIBLE PRODUCTS.—

"(i) IN GENERAL.—The Commission shall not determine that there is no material injury, or no threat of material injury, to United States producers of a fungible product by reason of imports (or sales or offers of sale for importation) of that fungible product solely on the basis of evidence that—

"(I) sales or offers of sale of the imported merchandise were not the first sales or offers at a reduced price in the relevant market;

"(II) price declines of similar magnitude occurred in other comparable markets (including submarkets or localities) where there is a relationship between the prices in such markets and the prices in the import impacted market;

"(III) United States producers also import the merchandise under investigation; or

"(IV) United States producers of the product are profitable.

"(ii) DEFINITION.—For the purposes of this clause, the term 'fungible product' means merchandise sold by weight or volume without significant product differentiation in such merchandise whether produced by foreign or domestic producers.".

SEC. 135. RESOURCE INPUT SUBSIDIES.

(a) IN GENERAL.—Subtitle D (19 U.S.C. 1677 et seq.) is amended—

(1) by adding at the end of section 771(5) the following:

"(C) Any resource input subsidy provided for under section 771B."; and

(2) by adding after section 771A the following new section:

"SEC. 771B. RESOURCE INPUT SUBSIDIES.

"(a) GENERAL RULE.—A resource input subsidy exists if—

"(1) a product (hereinafter referred to in this section as an 'input product')—

"(A) is provided or sold by a government or a government-regulated or controlled entity within a country (hereinafter referred to in this section as 'exporting country'), for input use within that country, at a domestic price that—

"(i) is lower than the fair market value of the input product; and

"(ii) is not freely available, by reason of government regulation or control, to United States producers for purchase of the input product for export to the United States; and

"(B) would, if sold at the fair market value, constitute a significant portion of the total cost of the manufacture or production of the merchandise in or for which the input product is used; or

"(2) the right to remove or extract a product (hereinafter in this section referred to as the 'removal right') is provided or sold by a government or a government-regulated or controlled entity within a country and—

"(A) that product is for input use within that country;

"(B) the removal right is provided or sold at a domestic price that is lower than the fair market value of that right, and

"(C) the product to which the removal right applies would, if that right was sold at a fair market value, constitute a significant portion of the total cost of the manufacture or production of the merchandise in or for which the product is used.

"(b) AMOUNT OF RESOURCE INPUT SUBSIDIES.—

"(1) IN GENERAL.—The amount of a resource input subsidy is the difference between the domestic price of an input product, or of a removal right, and the fair market value of that product, or right, respectively.

"(2) EXCLUSIONS.—For purposes of this section, the terms 'domestic price' and 'fair market value' do not include, with respect to an input product, the costs incident to the transportation and handling required to move the product from its point of production to the respective domestic or foreign destination.

"(c) DEFINITIONS AND RULES.—For purposes of this section—

"(1) FAIR MARKET VALUE.—The term 'fair market value' means—

"(A) with respect to an input product, the price that, in the absence of government regulation or control, a willing buyer would pay a willing seller for that product from the exporting country in an arms-length transaction; and

"(B) with respect to a removal right, the price that, in the absence of government regulation or control, a willing buyer would pay a willing seller in an arms-length transaction for the removal right in the country providing or selling the right.

"(2) RULES FOR INPUT PRODUCTS.—In determining the fair market value of an input product, the administering authority shall take into account—

"(A) the export price of the product;

"(B) the prices at which the product is generally available in world markets;

"(C) the current market clearing price at which the product can be sold competitively by the exporting country in the markets of other countries (including the United States) that are non-State-controlled-economy-country markets; and

"(D) the availability to the exporting country of markets described in paragraph (C).

"(3) RULES FOR REMOVAL RIGHTS.—In determining the fair market value of a removal right, the administering authority shall take into account—

"(A) the price paid in the exporting country for a comparable removal right not subject to government regulation or control;

"(B) the price paid in the exporting country for a comparable removal right sold or offered for sale through a process of competitive bidding; and

"(C) the price paid for a comparable removal right in comparable regions of countries other than the exporting country.

"(4) INPUT USE.—The term 'input use' refers to the use (directly or indirectly) of an input product in the manufacture or production of any class or kind of merchandise that is the subject of an investigation under this title.".

(b) INJURY TEST REQUIRED IN ALL CASES IN WHICH RESOURCE INPUT SUBSIDIES ARE ALLEGED.—Notwithstanding subsection (b) of section 303 of the Tariff Act of 1930 (19 U.S.C. 1303), sections 703(a) and 705(b) of that Act (relating to injury determinations by the United States International Trade Commission) shall apply to any investigation under that section in which the existence of resource input subsidies under section 771B of that Act is alleged.

(c) CONFORMING AMENDMENT.—The table of contents for title VII is amended by inserting after the entry for section 771A the following:

"Sec. 771B. Resource input subsidies.".

(c) EFFECTIVE DATE.—The amendments made by subsection (a) shall apply with respect to investigations initiated by petition or the administering authority under subtitle A of title VII of the Tariff Act of 1930 on or after the date of the enactment of this title.

SEC. 136. DIVERSIONARY DUMPING.

(a) IN GENERAL.—Subtitle B (19 U.S.C. 1673 et seq.) is amended by adding at the end thereof the following new section:

"SEC. 739. DIVERSIONARY DUMPING.

"(a) DEFINITION OF DUMPED INPUT PRODUCT.—For purposes of this section, the term 'dumped input product' means a class or kind of merchandise to which there applies either—

"(1) an antidumping duty order issued under section 736(a), or

"(2) an international arrangement or agreement described in subsection (c)(2)(B) which was entered into after at least a preliminary affirmative determination under section on 733(b) was made.

"(b) IN GENERAL.—If the administering authority finds, during an investigation under this subtitle, that—

"(1) a dumped input product is incorporated into, or otherwise used in the manufacture or production of, the merchandise that is the subject of the investigation; and

"(2) the manufacturer or producer of such merchandise purchased the dumped input product for a price that is less than the adjusted foreign market value of that product;

the administering authority shall determine the diversionary dumping benefit for the merchandise and apply that benefit in determining the foreign market value of the merchandise under section 773(a).

"(c) DIVERSIONARY DUMPING BENEFIT.—

"(1) IN GENERAL.—The amount of a diversionary dumping benefit for merchandise is the difference, if any, by which—

"(A) the adjusted foreign market value of the dumped input product concerned exceeds

"(B) the price for which the manufacturer purchased the dumped input product.

"(2) ADJUSTED FOREIGN MARKET VALUE.—The adjusted foreign market value for a dumped input product is—

"(A) if an antidumping duty order issued under section 736(a) applies to the product, the foreign market value used to determine the current antidumping duty imposed on the product; or

"(B) if the investigation regarding the dumped input product under this subtitle was terminated or suspended because of the entry into force with respect to the United States of any international arrangement or agreement that contains quantitative restrictions on, or other terms and conditions relating to, the importation into the United States of the product, the foreign market value of the product as determined by the administering authority on the basis of the best available information, including any information gathered in the previous investigation of the dumped input product and the allegations contained in the petition filed with respect to such investigation.".

(b) CONFORMING AMENDMENTS.—

(1) Section 773(a) (19 U.S.C. 1677b(a)) is amended by striking out "increased by," and inserting "increased by the amount of any diversionary dumping benefit determined under section 739(a) and by,".

(2) The table of contents for subtitle B is amended by inserting after the entry for section 738 the following.

"Sec. 739. Diversionary dumping.".

SEC. 137. DOWNSTREAM PRODUCT MONITORING. ZH4800.007

Subtitle D (19 U.S.C. 1677 et seq.) (as amended by section 135) is amended by adding at the end thereof the following:

"SEC. 780. DOWNSTREAM PRODUCT MONITORING.

"(a) DEFINITIONS.—As used in this section—

"(1) The term 'component part' means an imported article that—

"(A) during the 5-year period before the date on which a petition is filed under subsection (b) has been subject to—

"(i) an order issued under this title imposing a countervailing duty or antidumping duty of 15 percent ad valorem or higher, or

"(ii) an agreement entered into under section 704 or 734 after a preliminary affirmative determination under section 703(b) or 733(b)(1) was made involving an estimated net subsidy or net dumping margin of 15 percent ad valorem or higher; and

"(B) because of its inherent characteristics is routinely used as a major part, component, assembly, subassembly, or material in other manufactured articles.

"(2) The term 'downstream product' means any imported manufactured article into which is incorporated any component part.

"(b) PETITION REQUESTING MONITORING.—

"(1) IN GENERAL.—A domestic producer of an article that is like a component part or a downstream product may petition the administering authority to designate a downstream product for monitoring under subsection (c). The petition shall specify—

"(A) the downstream product;

"(B) the component product incorporated into such downstream product; and

"(C) reasons for suspecting the likely diversion, as a result of the imposition of antidumping or countervailing duties, of exports of the component part to the United States into increased production and exportation to the United States of such downstream product.

"(2) ACTION ON PETITIONS.—Within 14 days after receiving a petition, the administering authority shall determine whether there is a reasonable likelihood that imports into the United States of the downstream product will increase as an indirect result of any diversion with respect to component parts. In making such a determination, the administering authority may, if appropriate, take into account such factors as—

"(A) the value of the component part in relation to the value of the downstream product;

"(B) the extent to which the component part has been substantially transformed as a result of its incorporation into the downstream product; and

"(C) the relationship between the producers of component parts and producers of downstream products.

"(3) PUBLICATION OF DETERMINATION.—The administering authority shall publish notice of each determination under paragraph (2) in the Federal Register.

"(4) DETERMINATIONS NOT SUBJECT TO JUDICIAL REVIEW.—A determination by the administering authority under paragraph (2) is not subject to judicial review.

"(c) ITC MONITORING.—

"(1) NOTICE TO ITC.—The administering authority shall immediately inform the Commission of an affirmative determination under subsection (b)(2) regarding a downstream product.

"(2) MONITORING.—The Commission shall immediately commence the monitoring of

the levels of trade in downstream products regarding which notice is received under paragraph (1). If the Commission finds that imports of a downstream product being monitored increased during any calendar quarter by 5 percent or more over the preceding quarter, the Commission shall analyze that increase in the context of overall economic conditions in that product sector.

"(3) REPORTS.—The Commission shall make quarterly reports to the administering authority regarding the monitoring and analyses undertaken under paragraph (2). The Commission shall make the reports available to the public.

"(d) ACTION ON BASIS OF MONITORING REPORTS.—The administering authority shall review the information in the reports prepared by the Commission under subsection (c) and—

"(1) consider the information in determining whether to initiate an investigation under section 702(a) or 732(a) regarding any downstream product; and

"(2) request the Commission to cease monitoring any downstream product if the information indicates that imports into the United States are not increasing and there is no reasonable likelihood of diversion with respect to component parts.".

(b) The table of contents for title VII is amended by adding at the end of the following:

"Sec. 780. Downstream product monitoring.".

SEC. 138. PRIVATE REMEDY FOR INJURY RESULTING FROM DUMPING.

(a) IN GENERAL.—Subtitle B (19 U.S.C. 1673 et seq.) is amended by inserting after section 739 the following new section:

"SEC. 740. PRIVATE REMEDY FOR INJURY RESULTING FROM DUMPING.

"(a) DEFINITIONS.—For purposes of this section—

"(1) The term 'court' means the Court of International Trade.

"(2) The term 'eligible party' means a manufacturer, producer or wholesaler of a product in the United States that is a like product to a class or kind of merchandise with respect to which an antidumping order was issued under section 736.

"(3) The term 'less than fair value' means the extent to which the foreign market value as defined in section 773 exceeds United States price as defined in section 772.

"(b) CAUSE OF ACTION.—

"(1) IN GENERAL.—An eligible party that suffers economic loss by reason of the importation and sale at less than fair value by the defendant of merchandise of the class or kind referred to in subsection (a)(2) may bring an action for damages in the court against any of the following:

"(A) Any manufacturer of the merchandise.

"(B) Any exporter, importer or consignee who knew or had reason to know that the merchandise was sold at less than fair value.

"(c) DAMAGES.—

"(1) IN GENERAL.—In any action brought under subsection (b), the eligible party, upon a finding of liability on the part of the defendant, is entitled to recover actual damages for the economic loss sustained by the eligible party.

"(2) CALCULATION OF DAMAGES.—In calculating damages for purpose of this section, the court shall give regard to economic loss to the eligible party resulting from the importation into the United States and sale of less than fair value merchandise during a period of 3 years the date of the publication of the order referred to in subsection (a)(2).

"(d) TIME FOR BRINGING ACTION.—

"(1) IN GENERAL.—Except as provided in paragraphs (2) and (3), an action may not be brought under this section unless commenced within two years after the date on which the order under section 736 is published in the Federal Register.

"(2) TOLLING OF LIMITATION.—The running of the limitations in paragraph (1) shall be suspended while any judicial review or remand of an affirmative determination under subsection (a) or (b) of section 735 is pending and until a decision upon that review is rendered.

"(3) An action may not be commenced until more than 30 days after an order under section 736 is published in the Federal Register. If an action is commenced in the court under section 516(A), no action may be brought under this section until the exhaustion of all appeals.".

(b) CONFORMING AMENDMENT.—The table of contents for subtitle B is amended by adding at the end thereof the following:

"Sec. 740. Private remedy for injury resulting from dumping.".

SEC. 139. MISCELLANEOUS AMENDMENTS.

(a) APPLICATION OF COUNTERVAILING AND ANTIDUMPING DUTIES TO GOVERNMENTAL IMPORTATIONS.—Section 771 (19 U.S.C. 1677) is further amended by adding at the end thereof the following new paragraph:

"(18) APPLICATION TO GOVERNMENTAL IMPORTATIONS.—Merchandise imported by, or for the use of, an agency of the United States Government is not exempt from the imposition of countervailing duties or antidumping duties under this title.".

(b) ACCESS TO INFORMATION.—Section 777 (19 U.S.C. 1677f) is amended—

(1) by amending subsection (b)(1)(B)(ii) to read as follows:

"(ii) a statement to the administering authority that certain types of business proprietary, privileged, or classified information should not be released under administrative protective order, or a statement to the Commission that information should not be released under administrative protective order.";

(2) by amending subsection (c)(1)—

(A) by amending subparagraph (A) to read as follows:

"(A) IN GENERAL.—Upon receipt of an application (before or after receipt of the information requested) which describes in general terms the information requested and sets forth the reasons for the request, the administering authority shall make all confidential information presented to, or obtained by it, during a proceeding (except privileged information, classified information, and information of a type which the administering authority determines should not be released under administrative protective order) available under a protective order described in subparagraph (B), regardless of when the information is submitted during a proceeding. The Commission may make confidential information submitted by any other party to the investigation available under a protective order described in subparagraph (B)."; and

(B) by adding at the end thereof the following new subparagraphs:

"(C) TIME LIMITATION.—The administering authority shall determine whether to make information available under this paragraph not later than 14 days (or 21 days if the statements described in subsection (b)(1)(B)(ii) are submitted with such information) after the date on which an application for disclosure is submitted under subparagraph (A). If the determination is affirmative, confidential information already submitted to the administering authority shall be made available, subject to the terms and conditions of the protective order, on the date such determination occurs. Confidential information submitted to the administering authority after such determination shall be served as required by subsection (d).

"(D) FAILURE TO DISCLOSE.—If a person submitting information refuses to disclose confidential information (except privileged information, classified information, or information of a type which the administering authority determines should not be released under protective order) pursuant to a protective order described in subparagraph (B), the administering authority shall return the information, and any nonconfidential summary thereof, to the person submitting it and shall not consider them."; and

(3) by adding at the end thereof the following new subsections:

"(d) SERVICE.—Any party submitting information to the administering authority during a proceeding shall, at the same time, serve the information upon all other parties to the proceeding. The administering authority shall not accept any such information that is not accompanied by a certificate of service. Confidential information shall only be served upon parties that are subject to protective order; however, a nonconfidential summary thereof shall be served upon all other parties.

"(e) NOTIFICATION.—The administering authority shall, within 14 days of receipt, notify all parties of the submission of information relevant to the proceeding by a person who is not a party to the proceeding.

"(f) TIMELY SUBMISSIONS.—Information shall be submitted to the administering authority during the course of a proceeding on a timely basis and shall be subject to comment by other parties within such reasonable time as the administering authority shall provide. If information is submitted without an adequate opportunity for other parties to comment thereon, the administering authority shall return the information to the party submitting it and shall not consider it.".

(c) DRAWBACK TREATMENT.—

(1) Section 779 (19 U.S.C. 1677h) is amended by striking out "shall be treated as any other customs duties." and inserting "may not be treated as being regular customs duties.".

(2) The section heading for such section 779 is amended by striking out "DRAWBACKS" and inserting "DRAWBACK TREATMENT".

(3) The table of contents for title VII is amended by striking out "Drawbacks." in the entry for section 779 and inserting "Drawback treatment.".

(d) CERTIFICATION OF SUBMISSIONS IN COUNTERVAILING AND ANTIDUMPING PROCEEDINGS.—

(1) Subtitle D (19 U.S.C. 1677 et seq.) (as amended by sections 135 and 137) is amended by adding at the end thereof the following new section:

"SEC. 781. CERTIFICATION OF SUBMISSIONS.

"Any person providing factual information to the administering authority or the Commission in connection with a proceeding under this title on behalf of the petitioner or any other interested party shall certify that such information is accurate and complete to the best of that person's knowledge.".

(2) CONFORMING AMENDMENT.—The table of contents for title VIII is amended by inserting at the end thereof the following:

"Sec. 781. Certification of submissions.".

(e) STANDARD OF DETERMINATION.—Section 771(7)(E) is amended to read as follows:

"(E) STANDARD FOR DETERMINATION.—The presence or absence of any factor which the Commission is required to evaluate under subparagraph (C) or (D) shall not necessarily give decisive guidance with respect to the determination by the Commission of material injury.".

CHAPTER 3—INTELLECTUAL PROPERTY RIGHTS

SEC. 141. CONGRESSIONAL FINDINGS AND PURPOSES.

(a) FINDINGS.—The Congress finds that—

(1) international protection of intellectual property rights is vital to the international competitiveness of United States persons that rely on intellectual property protection;

(2) United States persons that rely on intellectual property protection are among the most advanced and competitive in the world;

(3) the existing protection under section 337 of the Tariff Act of 1930 against unfair trade practices is cumbersome and costly and has not provided United States owners of intellectual property rights with adequate protection against foreign companies violating such rights;

(4) the upcoming multilateral trade negotiations provide—

(A) a forum in which foreign market access for United States persons that rely on intellectual property protection can be enhanced, and

(B) an opportunity to develop and strengthen international rules and procedures for intellectual property right protection and enforcement;

(5) foreign barriers, including restrictions and conditions on investment, permits and various other regulatory restrictions on business operations, seriously impede the ability of the United States persons that rely on intellectual property protection to operate overseas thereby harming the economic interests of the United States.

(b) PURPOSES.—The purpose of this chapter are—

(1) to provide for the development, with appropriate consultations, of an overall strategy to foster open international markets for United States persons that rely on intellectual property protection, and the authority to carry out such strategy through strengthened unilateral, bilateral, and multilateral efforts and the use of all appropriate instruments to achieve the objectives set forth in this chapter;

(2) to amend section 337 of the Tariff Act of 1930 to make it a more effective remedy for the protection of United States intellectual property rights; and

(3) to set forth principal United States negotiating objectives for multilateral and bilateral agreements in order to strengthen and expand international rules and procedures for intellectual property rights protection and enforcement and to enhance foreign market access.

SEC. 142. PROTECTION UNDER THE TARIFF ACT OF 1930.

(a) IN GENERAL.—Section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) is amended as follows:

(1) Subsection (a) is amended to read as follows:

"(a)(1) Subject to paragraph (2), the following are unlawful, and when found by the Commission to exist shall be dealt with, in addition to any other provision of law, as provided in this section:

"(A) Unfair methods of competition and unfair acts in the importation of articles (other than articles provided for in subparagraphs (B), (C), and (D)) into the United States, or in the sale of such articles by the owner, importer, consignee, or agent of either, the threat or effect of which is—

"(i) to destroy or substantially injure an industry, in the United States;

"(ii) to impair or prevent the establishment of such an industry; or

"(iii) to restrain or monopolize trade and commerce in the United States.

"(B) The unauthorized importation into the United States, or the unauthorized sale within the United States after importation, of articles that—

"(i) infringe a valid and enforceable United States patent or a valid United States copyright registered under title 17, United States Code; or

"(ii) are made, produced, processed, or mined under, or by means of, a process covered by the claims of a valid and enforceable United States patent.

"(C) The importation into the United States, or the sale within the United States after importation, of articles that infringe a valid and enforceable United States trademark registered under the Trademark Act of 1946, if the manufacture or production of the article was unauthorized.

"(D) The importation of a semiconductor chip product in a manner that constitutes infringement of a mask work registered under chapter 9 of title 17, United States Code.

"(2) Subparagraphs (B), (C), and (D) of paragraph (1) apply only if an industry in the United States, relating to the articles, patent, copyright, trademark, or mask work concerned, exists or is in the process of being established.

"(3) For purposes of paragraph (2), an industry in the United States shall be considered to exist if there is in the United States, with respect to the articles, patent, copyright, trademark, or mask work concerned—

"(A) significant investment in plant and equipment;

"(B) significant employment of labor or capital; or

"(C) substantial investment in its exploitation, including engineering, research and development, or licensing.".

(2) Subsection (c) is amended by inserting before the period in the first sentence the following: ", except that the Commission may, by issuing a consent order or on the basis of a settlement agreement, terminate any such investigation, in whole or in part, without making such a determination".

(3) Subsection (e) is amended—

(A) by striking out "If" in the first sentence and inserting "(1) If"; and

(B) by adding at the end thereof the following new paragraphs:

"(2) A complainant may petition the Commission for the issuance of an order under this subsection. The Commission shall make a determination with regard to such petition by no later than the 90th day after the date on which the Commission's notice of investigation is published in the Federal Register. The Commission may extend the 90-day period for an additional 60 days in a case it designates as a more complicated case. The Commission shall publish in the Federal Register its reasons why it designated the case as being more complicated. The Commission may require the petitioner to post a bond as a prerequisite to the issuance of an order under this subsection.

"(3) The Commission may grant preliminary relief under this subsection or subsection (f) with respect to a violation involving a registered trademark, copyright, or mask work or a patent, to the same extent as preliminary injunctions and temporary restraining orders may be granted under the Federal Rules of Civil Procedure.".

(4) Subsection (f) is amended—

(A) by striking out "In lieu of" in paragraph (1) and inserting "In addition to, or in lieu of,"; and

(B) by striking out "$10,000" in paragraph (2) and inserting "$100,000".

(5) Such section is further amended—

(A) by striking out "President" each place it appears in subsection (g) and inserting "United States Trade Representative";

(B) by redesignating subsections (g), (h), (i), and (j) as subsections (i), (j), (k), and (l), respectively; and

(C) by inserting after subsection (f) the following new subsection:

"(g)(1) If—

"(A) a complaint is filed against a person under this section;

"(B) the complaint and a notice of investigation are served on the person;

"(C) the person fails to respond to the complaint and notice or otherwise fails to appear to answer the complaint and notice;

"(D) the person fails to show good cause why the person should be not be found in default; and

"(E) the person seeks relief affecting solely that person,

the Commission shall presume the facts alleged in the complaint to be true and shall, upon request, issue an exclusion from entry or a cease and desist order, or both, which affects only that person unless, after considering the effect of such exclusion or order upon the public health and welfare, competitive conditions in the United States economy, the production of like or directly competitive articles in the United States, and United States consumers, the Commission finds that such exclusion or order should not be issued.

"(2) A general exclusion from entry of the articles concerned, regardless of the source or importer of the article, may be issued if—

"(A) no person appeared to contest an investigation concerning a violation of the provisions of this section, and

"(B) such a violation is established by substantial, reliable, and probative evidence.

"(h) The Commission may by rule prescribe sanctions for abuse of discovery and abuse of process to the extent authorized by Rule 11 and Rule 37 of the Federal Rules of Civil Procedure.".

(6) Subsection (j) (as redesignated by paragraph (4)(A) of this section) is amended—

(A) by inserting "(1)" before the first sentence; and

(B) by adding at the end the following:

"(2) If any person who has previously been found by the Commission, on the basis of a contested proceeding, to be in violation of this section petitions the Commission for a determination that the peititioner is no longer in violation of this section or for a modification or rescission of an exclusion from entry or order under subsection (d), (e), (f), or (g)—

"(A) the burden of proof in any proceeding before the Commission regarding such petition shall be on the petitioner; and

"(B) relief may be granted by the Commission with respect to such petition—

"(i) on the basis of new evidence or evidence that could not have been presented at the prior proceeding, or

"(ii) on grounds which would permit relief from a judgment or order under the Federal Rules of Civil Procedure.".

(7) Subsection (k) (as redesignated by paragraph (4)(A) of this section) is amended—

(A) by striking out "claims of United States letters patent" in the first sentence and inserting "proceeding under subsection (a)(1) (B), (C), or (D)"

(B) by striking out "a patent owner" in the second sentence and inserting "an owner of the patent, copyright, trademark, or mask work".

(8) Such section is further amended by adding at the end the following:

"(m)(1) Information submitted to the Commission or exchanged among the parties in connection with proceedings under this section which is designated as confidential by the person submitting it may not be disclosed (except under a protective order issued under regulations of the Commission which authorizes limited disclosure of such information) to any person (other than a person described in paragraph (2)) without the consent of the person submitting it.

"(2) Notwithstanding the prohibition contained in paragraph (1), information referred to in that paragraph may be disclosed to—

"(A) an officer or employee of the Commission who is directly concerned with carrying out the investigation in connection with which the information is submitted, or

"(B) an officer or employee of the United States Customs Service who is directly involved in administering an exclusion from entry under this section resulting from the investigation in connection with which the information is submitted.".

(b) TECHNICAL AMENDMENTS.—Section 337 (as amended by subsection (a)) is further amended—

(1) by amending subsection (c)—

(A) by striking out "(d) or (e)" and inserting "(d), (e), or (f)",

(B) by striking out "or (f)" and inserting "(f), or (g)", and

(C) by striking out "and (f)" and inserting "(f), and (g)";

(2) by striking out "or (f)" each place it appears in subsection (i) and inserting "(f), or (g)";

(3) by striking out "(g)" in subsection (j) and inserting "(i)"; and

(4) by striking out "or (f)" in subsection (k) and inserting "(f), or (g)".

(c) CONFORMING AMENDMENT.—The Act entitled "An Act to limit the importation of products made, produced, processed, or mined under process covered by unexpired valid United States patents, and for other purposes", approved July 2, 1940 (54 Stat. 724, 19 U.S.C. 1337a) is repealed.

(d) EFFECTIVE DATE.—

(1) IN GENERAL.—Subject to paragraphs (2) and (3), the amendments made by this chapter shall apply with respect to findings made by the United States International Trade Commission under section 337 of the Tariff Act of 1930 on or after the date of the enactment of this Act.

(2) INVESTIGATIONS.—In the case of any investigation under section 337 of the Tariff Act of 1930 which must be completed by the International Trade Commission within 6 months after the date of the enactment of this Act, the Commission may, upon determining and declaring that the investigation is complicated, take up to an additional 3 months beyond the original statutory deadline to complete the investigation.

SEC. 143. ACTION REGARDING FOREIGN MARKET ACCESS BARRIERS AFFECTING INTELLECTUAL PROPERTY.

(a) IDENTIFICATION OF FOREIGN COUNTRIES MAINTAINING BARRIERS.—

(1) Within 12 months after the date of the enactment of this Act, and on an annual basis thereafter, the United States Trade Representative (hereinafter in this section referred to as the "Trade Representative") shall identify those foreign countries that, in the judgment of the Trade Representative, maintain the most significant barriers or impediments to market access for United States persons that rely on intellectual property protection.

(2) For purposes of making an identification under paragraph (1) with respect to any foreign country, the Trade Representative shall—

(A) identify and analyze the acts, policies, and practices of that country which constitute significant barriers to, or distortions of, United States intellectual property that is—

(i) protected by patents, copyrights, and mask works, and

(ii) exported or licensed by United States persons that rely on intellectual property protection;

(B) estimate the trade-distorting impact on United States commerce of the acts, policies, or practices of that country that are contained in the annual report required under section 181 of the Trade Act of 1974;

(C) decide whether the potential market in that country for United States persons that rely on intellectual property protection is substantial; and

(D) take into account such other information as may be submitted under subsection (e) by United States persons that rely on intellectual property protection or by other sources.

(b) NEGOTIATING PRIORITIES AND TIMETABLE.—

(1) The Trade Representative shall—

(A) determine those foreign countries (hereinafter in this section referred to as "priority countries") identified under subsection (a) to which priority should be given in conducting consultations and negotiations under subsection (c); and

(B) establish a timetable for carrying out such consultations and negotiations with such priority countries.

(2) For purposes of determining priority countries under paragraph (1), the Trade Representative may—

(A) select only those foreign countries identified under subsection (a) that—

(i) have the largest potential markets for United States persons that rely on intellectual property protection, or

(ii) have the most onerous acts, policies, or practices that deny fair and equitable market access to United States persons that rely on intellectual property protection,

if the Trade Representative considers that available resources are inadequate, particularly in view of other principal negotiating objectives, to pursue effectively consultations and negotiations with all countries identified under subsection (a)(1); and

(B) exempt any foreign country if the Trade Representative considers that consultations and negotiations with that country would be detrimental to the interests of the United States.

(c) NEGOTIATIONS TO OBTAIN MARKET ACCESS—

(1) The President shall direct the Trade Representative to enter into consultations and negotiations with the priority countries, in accordance with the timetable established under subsection (a)(1)(B), in order to seek trade agreements which provide for the harmonization, reduction, elimination, or prohibition of restrictions, barriers, fees, or other trade-distorting acts, policies, or practices in order that United States persons that rely upon intellectual property protection will obtain fair and equitable market access to such countries.

(2) During the 5-year period beginning on the date of the enactment of this Act, the President may enter into bilateral or multilateral trade agreements with foreign countries which meet the objective under paragraph (1). Such agreements shall be subject to section 102(c), (d), (e), and (f) and section 151 of the Trade Act of 1974.

(d) OTHER ACTION.—

(1) If the President is not able to enter into a trade agreement providing for fair and equitable market access for United States persons that rely on intellectual property protection with a priority country within 2 years after the date on which it is determined to be such a country under subsection (b)(1)(A), the President shall take such actions as he deems appropriate, including but not limited to, any action under subsection (b) or (c) of section 301 of the Trade Act of 1974, with respect to any product or service of such country.

(2) The President may defer action under paragraph (1) upon providing written certification to the Congress, at 12-month intervals, that the consultations or negotiations with that priority country are making substantial progress.

(e) REPORT TO CONGRESS.—On or before the date which is 2 years after the date of the enactment of this Act, and every 2 years thereafter, the President shall notify the appropriate committees of the Congress of the extent and effect of the efforts undertaken during that period to obtain fair and equitable market access in each of the priority countries for United States persons that rely upon intellectual property protection. Such notification, which shall be in the form of a written report, shall include—

(1) information with respect to any action taken, or proposed to be taken, and the results thereof, under existing authority to eliminate or reduce the acts, policies, or practices identified in the report required under section 181 of the Trade Act of 1974 which restrict or distort market access to each such country including, but not limited to—

(A) any action under section 301 or other provision of the Trade Act of 1974, and

(B) any negotiation or consultation under subsection (c) or under section 102 of the Trade Act of 1974;

(2) if action referred to in paragraph (1) was not taken, an explanation of the reasons therefor; and

(3) recommendations to the Congress of any additional legislative authority or other action which the President believes is necessary and appropriate to obtain foreign market access for United States persons that rely on intellectual property protection.

(f) REQUIRED CONSULTATIONS.—The Trade Representative shall consult with the appropriate committees of the Congress, other interested agencies, United States persons that rely on intellectual property protection, and appropriate committees established under section 135 of the Trade Act of

1974, and shall provide an opportunity for the presentation of views by other interested parties—

(1) before identifying the significant barriers and distortions under subsection (a), determining priority countries under subsection (b)(1)(A), and establishing the timetable under subsection (b)(1)(B);

(2) in conducting negotiations under subsection (c);

(3) in developing the report required under subsection (e); and

(4) for purposes of determining under subsection (d) whether action by the President is appropriate under any provision of the Trade Act of 1974 with respect to any act, policy, or practice referred to in subsection (a)(2) of a priority country.

(g) DEFINITION.—For purposes of this section, the phrase "United States persons that rely upon intellectual property protection" means—

(1) citizens or nationals of the United States;

(2) corporations, partnerships, or other legal entities organized or existing under the law of any State or the District of Columbia, or under Federal law; or

(3) any subsidiary or division, if located in the United States, of any entity referred to in paragraph (2);

whose principal line of business—

(A) involves the creation, production, or licensing of literary or artistic works which are copyrighted,

(B) is the manufacture of products that are patented or for which there are process patents, or

(C) is the manufacture of semiconductor chip products for which a mask work is registered under chapter 9 of title 17, United States Code.

SEC. 144. NEGOTIATING OBJECTIVES REGARDING INTELLECTUAL PROPERTY RIGHTS.

(a) IN GENERAL.—Chapter 1 of title I is amended by inserting after section 104A the following new section:

"SEC. 104B. NEGOTIATING OBJECTIVES WITH RESPECT TO INTELLECTUAL PROPERTY RIGHTS.

"Principal United States negotiating objectives under section 102 shall be—

"(1) to seek enactment and effective enforcement by foreign countries of laws which adequately recognize and protect intellectual property under copyrights, patents, trademarks, mask works and trade secrets; and

"(2) to develop and strengthen bilateral and multilateral international rules and dispute settlement procedures against trade-distorting practices arising from inadequate national protection and enforcement of intellectual property rights, including—

"(A) early adoption of the GATT Anti-Counterfeiting Code, and concurrent development in the GATT, in cooperation with international technical organizations such as the World Intellectual Property Organization (WIPO), of substantive norms and standards for the protection and enforcement of other forms of intellectual property, and

"(B) the supplementing and strengthening of standards for protection and enforcement in existing international intellectual property conventions, including expansion to cover new and emerging technologies and elimination of discrimination or unreasonable exceptions or pre-conditions to protection.".

(b) CONFORMING AMENDMENT.—The table of contents for such chapter 1 is amended by inserting after the entry for section 104A the following:

"Sec. 104B. Negotiating objectives with respect to intellectual property rights.".

Subtitle C—Trade Negotiating Objectives and Authority

SEC. 151. REFERENCE TO TRADE ACT OF 1974.

Unless otherwise provided, whenever in this subtitle an amendment or repeal is expressed in terms of an amendment to, or repeal of, a title, section, subsection, or other provision, the reference shall be considered to be made to a title, section, subsection, or other provision of the Trade Act of 1974 (19 U.S.C. 2101 et seq.).

SEC. 152. OVERALL AND PRINCIPAL TRADE NEGOTIATING OBJECTIVES OF THE UNITED STATES.

(a) OVERALL TRADE NEGOTIATING OBJECTIVES.—(1) The overall trade negotiating objectives of the United States under sections 101 and 102 of the Trade Act of 1974 (19 U.S.C. 2111 and 2112) are as follows:

(A) To achieve a more open, fair, and nondiscriminatory international trading system with respect to goods, services, and related foreign investment in which the benefits of trade are shared more fully within trading countries, as well as among them.

(B) To obtain equitable and reciprocal competitive opportunities, in general as well as in individual sectors, for United States manufacturing, mining, agriculture, and services in foreign markets.

(C) To expand and improve the rules and procedures of the General Agreement on Tariffs and Trade (hereafter in this section referred to as the "GATT") in order to restore the confidence of governments and private sectors in the relevance and effectiveness of the international trading system and its institutions.

(b) PRINCIPAL TRADE NEGOTIATING OBJECTIVES.—The principal trade negotiating objectives of the United States under sections 101 and 102 of the Trade Act of 1974 are as follows:

(1) To improve the dispute settlement mechanisms and procedures of the GATT so as to ensure the expeditious and decisive resolution of all types of disputes covered by GATT rules.

(2) To strengthen the GATT rules pertaining to subsidy practices and countervailing measures by—

(A) prohibiting the use of export subsidies on primary products;

(B) treating as subsidies prohibited under such rules resource subsidies, subsidized inputs, and other forms of government intervention that have the effect of subsidizing domestic producers and causing injury or other adverse effects to foreign interests;

(C) sanctioning the imposition of special penalty measures to discourage, rather than merely offset, the persistent use by governments of subsidy practices which cause injury to foreign producers; and

(D) in cases in which subsidies on exports to a third country market lead to the displacement of another country's exports, authorizing the country suffering displaced exports to impose countervailing measures on imports of the subsidizing country (preferably on a like or similar product) equivalent to the amount of displacement.

(3) To enhance the GATT through—

(A) the adoption of an article of the GATT declaring that the denial of internationally recognized worker rights is an unjustifiable means for a country or any of its industries to gain competitive advantage in international trade;

(B) the amendment of one or more existing articles of the GATT to affirm the principle set forth in subparagraph (A); or

(C) the adoption and implementation of a code on internationally-recognized worker rights (as defined in section 502(a)(4) of the Trade Act of 1974).

(4) To strengthen the GATT rules pertaining to dumping practices and antidumping measures by—

(A) developing procedures to determine and effective measures to deter and counteract diversionary dumping practices through the use of dumped inputs which are injurious to foreign producers;

(B) expediting procedures in order to provide more timely antidumping relief, particularly for products with short-life cycles;

(C) developing effective means to counteract dumping practices which displace sales in third country markets; and

(D) authorizing the imposition of special sanctions to deter repetitive dumping practices by manufacturers, producers, or exporters.

(5) To develop rules to limit and counteract industrial export targeting practices which are injurious to foreign producers.

(6) To bring about greater balance between international trade benefits and obligations and the fuller participation of developing countries in the international trading system by—

(A) reducing and eliminating the reliance of developing countries on special and differential treatment from developed countries; and

(B) requiring developing countries, commensurate with their attaining more advanced and competitive levels of economic development—

(i) to provide reciprocal benefits, and

(ii) to assume equivalent obligations with respect to their import and export practices.

(7) To develop principles, rules, and procedures regarding, and to reduce barriers and other distortions affecting, those kinds or conditions of international trade not presently or adequately covered, including—

(A) barriers to trade in services and high technology products, requirements or restrictions affecting investment flows and high technology transfers, and other barriers referred to in section 104A of the Trade Act of 1974; and

(B) protection and enforcement of intellectual property rights referred to in section 104B of the Trade Act of 1974;

in order to create an international system that reflects and addresses, on a comprehensive basis, present and future trade and trading practices.

(8) To achieve more open and fair conditions of trade in agricultural commodities by—

(A) developing, strengthening, and clarifying rules to discipline restrictive and trade-distorting import and export practices; and

(B) eliminating and reducing substantially specific constraints to fair and open trade, such as tariffs, quantitative restrictions, export subsidies, and other nontariff practices.

(9) To improve the operation and expand the coverage of, and the participation of countries in, the agreements concluded in the Tokyo Round of GATT negotiations.

(10) To strengthen the GATT rules regarding the conditions and procedures for applying all types of safeguard measures taken by governments to limit injurious import competition in order to ensure trans-

parency and to promote adjustment in the use of such measures.

(11) to develop principles, rules, and procedures concerning offsets and other countertrade requirements in order to minimize any adverse effect of such requirements on domestic products and industries;

(12) To promote world market access on an equitable and reciprocal basis by achieving the maximum reduction, elimination, or harmonization of existing specific tariff and nontariff trade barriers to exports, particularly—

(A) those barriers that are identified from time-to-time in the analyses and estimates required under section 181 of the Trade Act of 1974; and

(B) those disparities in tariff levels which impede access to particular export markets.

(13) To develop rules that impose a greater responsibility on countries with large and persistent current account surpluses to undertake policy changes aimed at restoring current account equilibrium, including expedited implementation of trade agreements where feasible and appropriate.

(14) To develop mechanisms to assure greater coordination, consistency, and cooperation between international trade and monetary systems and institutions.

(c) AGREEMENTS TO ACHIEVE OBJECTIVES.—The overall and principal objectives listed in subsections (a) and (b) are to be achieved, to the maximum extent feasible, through multilateral trade agreements (negotiated with both developed countries and developing countries) that provide, on a reciprocal and mutually advantageous basis, for—

(1) the reduction, elimination, or harmonization of barriers to, and other distortions of, international trade; and

(2) the development, clarification, or extension of principles, rules, and procedures governing that trade;

except that bilateral agreements and other agreements of kinds other than multilateral agreements should be negotiated to achieve such objectives in circumstances where the use of such other kinds of agreements would be more effective or appropriate, or the entering into of multilateral agreements is not feasible.

SEC. 153. EXTENSION OF TRADE AGREEMENT AUTHORITY.

(a) BASIC EXTENSION.—

(1) TARIFF REDUCTION.—Section 101 (19 U.S.C. 2111) is amended—

(A) by striking out "5-year period" in subsection (a)(1) and inserting "14-year period"; and

(B) by striking out "January 1, 1975" each place it appears therein and inserting "January 1, 1987".

(2) NONTARIFF BARRIER REDUCTION OR ELIMINATION.—Section 102(b)(1) (19 U.S.C. 2112(b)(1)) is amended by striking out "13-year period" and inserting "14-year period".

(b) ADDITIONAL EXTENSION.—If before November 3, 1988, the United States Trade Representative submits to the Committee on Ways and Means of the House of Representatives and the Committee on Finance of the Senate a report certifying that—

(1) sufficient progress has been made under the authority of sections 101 and 102 of the Trade Act of 1974 to justify the continuation of negotiations under such sections; and

(2) such a continuation of negotiations is likely to achieve the overall and principal United States negotiating objectives set forth in section 172;

then, effective January 3, 1989, sections 101(a)(1) and 102(b)(1) of the Trade Act of 1974 are each amended by striking out "14-year period" and inserting "16-year period".

(c) TARIFF AGREEMENTS REGARDING ARTICLES NOT DESIGNATED AS ELIGIBLE ARTICLES UNDER THE GSP.—Section 101 (19 U.S.C. 2111) is further amended—

(1) by inserting "except as provided in subsection (d)," before "may proclaim" in subsection (a)(2); and

(2) by adding at the end thereof the following new subsection:

"(d)(1) The President may not proclaim, under the authority of this section, the reduction or elimination of any duty on any article that, on the date of the enactment of the Comprehensive Trade Policy Act of 1986, was not designated as an eligible article under title V.

"(2) For purposes of subsections (c), (d), (e), (f), and (g) of section 102 and section 151, any provision of a trade agreement entered into under subsection (a)(1) that reduces or eliminates a duty on any article to which paragraph (1) applies shall be treated as a trade agreement entered into under section 102.".

SEC. 154. AGREEMENTS REGARDING NONTARIFF BARRIERS TO, AND OTHER DISTORTIONS OF, TRADE.

(a) CUSTOMS ACTION UNDER CERTAIN TRADE AGREEMENTS.—Section 102(b) (19 U.S.C. 2112(b)) is amended by adding at the end thereof the following new paragraph:

"(5) In the implementation of any bilateral trade agreement entered into with a foreign country under paragraph (2)(A) or (4)(A), the Commissioner of Customs shall issue such rules and regulations as are necessary to prevent the transshipment through the country of articles subject to quantitative import restrictions under United States law.".

(b) CONSULTATION WITH COMMITTEES.—The second sentence of section 102(c) is amended to read as follows: "Such consultation shall include the nature of the agreement, how and to what extent the agreement will achieve the overall and principal United States negotiating objectives set forth in section 152 of the Trade and International Economic Policy Reform Act of 1986, and all matters relating to the implementation of the agreement under subsections (d) and (e).".

(c) PREREQUISITE FOR ENTRY INTO FORCE OF TRADE AGREEMENTS.—Section 102(e)(2)(B) is amended to read as follows:

"(B) a statement—

"(i) that the agreement achieves overall and principal United States negotiating objectives set forth in section 152 of the Trade and International Economic Policy Reform Act of 1986; and

"(ii) of his reasons as to—

"(I) how and to what extent the agreement achieves the negotiating objectives referred to in clause (i), and why and to what extent the agreement does not achieve other such negotiating objectives,

"(II) how the agreement serves the interests of United States commerce, and

"(III) why the implementing bill and proposed administrative action is required or appropriate to carry out the agreement; and"

(d) FAST TRACK.—

(1) The first sentence of section 102(f) is amended—

(A) by striking out "may recommend" and inserting in lieu thereof "shall recommend"; and

(B) by striking out "is consistent" and inserting in lieu thereof "is appropriate and consistent".

(2) Subsections (c) through (f) of section 102 of the Trade Act of 1974 shall not have effect, and no trade agreement entered into under subsection (b) of section 102 (other than a trade agreement provided for in paragraph (4) of that subsection) may enter into force with respect to the United States, during the period beginning on the date of the enactment of the Trade and International Economic Policy Reform Act of 1986 and ending on the earlier of—

(A) the date on which the international conference on the exchange rate system, referred to in section 403 of the Competitive Exchange Rate Act of 1986, is convened; or

(B) the date on which the President reports to the Congress in writing that the conference referred to in section 403 of the Competitive Exchange Rate Act of 1986 cannot be convened because of the unwillingness of one or more of the major currency countries to participate in such a conference.

(e) TECHNICAL AMENDMENT.—Section 102(g)(1) is amended to read as follows:

"(1) the term 'barrier' includes any duty or import restriction;".

SEC. 155. COMPENSATION AUTHORITY.

Section 123(a) (19 U.S.C. 2133(a)) is amended to read as follows—

"(a) Whenever any action taken under chapter 1 of title II or chapter 1 of title III, by statute, or through any tariff reclassification increases or imposes any duty or other import restriction, the President—

"(1) may enter into trade agreements with foreign countries or instrumentalities for the purpose of granting new concessions as compensation in order to maintain the general level of reciprocal and mutually advantageous concessions; and

"(2) may proclaim such modification or continuance of any existing duty, or such continuance of existing duty-free or excise treatment, as he determines to be required or appropriate to carry out any such agreement;

but only if the entering into of any such agreement is necessary or appropriate to meet the international obligations of the United States.".

SEC. 156. TARIFF AGREEMENTS WITH CANADA.

(a) IN GENERAL.—Chapter 2 of title I is amended by inserting at the end thereof the following new section:

"SEC. 129. NEGOTIATION OF CERTAIN MISCELLANEOUS TARIFF AGREEMENTS WITH THE GOVERNMENT OF CANADA.

"(a) In order to facilitate negotiations with respect to a trade agreement with the Government of Canada authorized pursuant to subsection (b)(4) of section 102, the President may, subject to the provisions of subsections (b), (c), and (d) of this section—

"(1) enter into tariff agreements relating to the items listed in this section; and

"(2) may proclaim the modification or elimination of any existing duty on these items as he deems appropriate.

"(b) The President shall exercise his authority under this section only with respect to articles provided for in the following items of the Tariff Schedules of the United States (19 U.S.C. 1202):

"(1) Frozen cranberries (provided for in item 146.71).

"(2) Dialysis cyclers (provided for in item 709.17).

"(3) Packaging goods for tea (described in headnote 2 to subpart A of part 11 of schedule 1).

"(4) Dried fababeans (provided for in items 140.11 and 140.16).

"(5) Cat litter (provided for in items 256.90 and 512.24).

"(6) Mechanics tool boxes (provided for in item 706.62).

"(7) Medical tubing (provided for in item 772.65).

"(8) Synthetic fireplace materials (provided for in item 792.32).

"(9) Spirits (provided for in items 169.21 and 169.22).

"(10) Miners safety lamps, components, and battery chargers (provided for in items 683.80 and 682.60).

"(11) Computerized paper cutter control retrofit units (provided for in items 685.90 and 676.15).

"(c) The President shall exercise his authority to proclaim changes in existing duties under this section only to the extent that tariff concessions of approximately equivalent value are granted by the Government of Canada in exchange for reductions authorized under this section.

"(d) The President may exercise the authority granted under this section only during the 5-year period beginning on the date of the enactment of this section.".

(b) CONFORMING AMENDMENT.—The table of contents of chapter 2 of title I is amended by adding at the end thereof the following:

"Sec. 129. Negotiation of certain miscellaneous trade agreements with the Government of Canada.".

SEC. 157. TIME FOR SUBMISSION OF CERTAIN REPORTS.

Section 135(e) (19 U.S.C. 2155(e)) is amended—

(1) by inserting after "United States" in the second sentence the following: "and achieves the overall and principal negotiating objectives set forth in section 152 of the Trade and International Economic Policy Reform Act of 1986;"; and

(2) by inserting after the first sentence the following new sentence: "Each report, if it applies to a trade agreement entered into under section 102, shall be provided under the preceding sentence not later than the date on which the draft of the implementing bill for the agreement is submitted to Congress under section 102(e).".

SEC. 158. NEGOTIATING OBJECTIVES REGARDING HIGH TECHNOLOGY ACCESS.

Section 104A (19 U.S.C. 2114b) is amended—

(1) by redesignating subsection (d) as subsection (e); and

(2) by inserting after subsection (c) the following new subsection.

"(d) ACCESS TO HIGH TECHNOLOGY.—

"(1) IN GENERAL.—Principal United States negotiating objectives shall be to obtain the elimination or reduction of foreign barriers to, and foreign government acts, policies, or practices which limit, equitable access by United States persons to foreign-developed technology, including barriers, acts, policies, or practices which have the effect of—

"(A) restricting the participation of United States persons in government-supported research and development projects;

"(B) denying equitable access by United States persons to government-held patents;

"(C) requiring the approval or agreement of government entities, or imposing other forms of government intervention, as a condition for the granting of licenses to United States persons by foreign persons (except for approval or agreement which may be necessary for national security purposes to control the export of critical military technology); and

"(D) otherwise denying equitable access by United States persons to foreign-developed technology or contributing to the inequitable flow of technology between the United States and its trading partners.

"(2) DOMESTIC OBJECTIVES.—In pursuing the objectives described in paragraph (1), the United States shall take into account the policies of the United States Government in licensing or otherwise making available to foreign persons technology and other information developed by United States laboratories.".

Subtitle D—Functions of the United States Trade Representative

SEC. 161. TRADE POLICY FUNCTIONS.

(a) TRADE REPRESENTATIVE.—Section 141(c) of the Trade Act of 1974 (19 U.S.C. 2171(c)) is amended to read as follows:

"(c)(1) The United States Trade Representative shall—

"(A) have primary responsibility for developing, and for coordinating the implementation of, United States international trade policy, including commodity matters, and, to the extent they are related to international trade policy, direct investment matters;

"(B) serve as the principal advisor to the President on international trade policy and shall advise the President on the impact of other policies of the United States Government on international trade;

"(C) have lead responsibility for the conduct of, and shall be the chief representative of the United States for, international trade negotiations in which the United States participates;

"(D) issue policy guidance to departments and agencies on basic issues of policy and interpretation arising in the exercise of international trade functions, to the extent necessary to assure the coordination of international trade policy and consistent with any other law;

"(E) act as the principal spokesman of the President on international trade;

"(F) be chairman of the interagency trade organization established under section 242(a) of the Trade Expansion Act of 1962, and shall consult with and be advised by such Committee in the performance of his functions.".

(b) INTERAGENCY TRADE ORGANIZATION.—Section 242(a) of the Trade Expansion Act of 1962 (19 U.S.C. 1872(a)) is amended to read as follows:

"(a) The President shall establish an interagency organization to assist him in carrying out the functions vested in him by the trade laws and to advise the United States Trade Representative in carrying out his functions under section 141 of the Trade Act of 1974. Such organization shall be composed of the following:

"(1) The Trade Representative, who shall be chairperson.

"(2) The Secretary of Commerce.

"(3) The Secretary of State.

"(4) The Secretary of the Treasury.

"(5) The Secretary of Agriculture.

"(6) The Secretary of Labor.

The Trade Representative may invite representatives from other agencies, as appropriate, to attend particular meetings if subject matters of specific functional interest to such agencies are under consideration. It shall meet at such times and with respect to such matters as the President or the Chairman shall direct.".

SEC. 162. FAIR TRADE ADVOCATES BRANCH.

Section 141 of the Trade Act of 1974 (19 U.S.C. 2171 et seq.) is amended by adding at the end thereof the following new subsection:

"(g) FAIR TRADE ADVOCATES BRANCH.—

"(1) There is established in the Office a Fair Trade Advocates Branch (hereinafter referred to as the 'Branch') which shall assist qualifying industries in obtaining remedies and benefits under the trade laws—

"(A) by preparing and initiating cases (other than those which, in the opinion of the Branch, are frivolous) for qualifying industries under the trade laws;

"(B) acting as an advocate in proceedings regarding such cases before the respective agencies responsible for administering the trade laws; and

"(C) in pursuing administrative and judicial appeals,where appropriate, of such cases.

"(2) For purposes of this subsection—

"(A) The term 'qualifying industry' means—

"(i) any small business which, in the judgment of the Branch, due to its small size has neither the adequate internal resources nor the financial ability to obtain qualified legal or technical assistance;

"(ii) any industry which, because of its competitive position or location in export markets would suffer serious adverse economic impact, including reprisals, if it pursued on its own a case under a trade law; or

"(iii) any industry whose case, in the judgment of the Branch, is meritorious for policy or other reasons, and the industry lacks adequate resources to obtain remedies against unfair trade practices.

A decision by the Branch regarding whether any industry is a qualifying industry under this subsection is not reviewable by any other agency or by any court.

"(B) The term 'trade law' means the following:

"(i) Title VII of the Tariff Act of 1930 (19 U.S.C. 1671 et seq., relating to the imposition of countervailing duties and antidumping duties).

"(ii) Section 337 of the Tariff Act of 1930 (19 U.S.C. 1337, relating to unfair practices in import trade).

"(3) Each agency responsible for administering a trade law shall provide technical and other assistance to the Branch to enable it to prepare and file petitions and applications to obtain the remedies and benefits that may be available under that law.".

SEC. 163. TRADE POLICY AGENDA.

(a) IN GENERAL.—By no later than March 1 of each year, the United States Trade Representative shall submit in writing (in confidence if appropriate) to the Committee on Ways and Means of the House of Representatives and the Committee on Finance of the Senate (hereinafter referred to as the "Committees") a statement of—

(1) the trade policy objectives and priorities of the United States for the year, and the reasons therefor;

(2) the actions proposed or anticipated to be undertaken during the year to achieve such objectives, including actions under the authority of the trade laws and any negotiations contemplated with foreign countries; and

(3) any proposed legislation necessary or appropriate to achieve such objectives.

(b) CONSULTATION BEFORE STATEMENT.—Before submitting the statement required under subsection (a) for any year, the United States Trade Representative shall seek advice from the appropriate sector advisory committees established under section 135 of the Trade Act of 1974 (19 U.S.C. 2155) and shall consult with the Committees.

(c) CONSULTATION AFTER STATEMENT.—The United States Trade Representative and the officials of other Federal agencies, as appropriate, shall consult periodically with the Committees with respect to the objectives and priorities set forth in the statement required under subsection (a) for any year regarding the status and results of the actions undertaken, and any development which may require, or result in, changes to any of such objectives or priorities.

Subtitle E—Miscellaneous Trade Law Provisions

SEC. 171. IMPORTS AFFECTING NATIONAL SECURITY.

(a) AMENDMENT TO TEA OF 1962.—Section 232(b) of the Trade Expansion Act of 1962 (19 U.S.C. 1862(b)) is amended—

(1) by inserting "(1)" before "Upon request";

(2) by amending the third sentence by striking out "one year" and inserting "90 days (180 days if the Secretary determines that the investigation is extraordinarily complicated)";

(3) by striking out the last sentence; and

(4) by adding at the end thereof the following:

"(2) If the Secretary finds under paragraph (1) that an article is being imported into the United States in such quantities or under such circumstances as to threaten to impair the national security, he shall advise the President of that finding in the report required under paragraph (1). Within 30 days after receiving the report, the President shall—

"(A) determine whether he concurs with the advice of the Secretary;

"(B) if he concurs, determine the nature and duration of the action that, in his judgment, must be taken to adjust the imports of the article and its derivatives so that such imports will not threaten to impair the national security; and

"(C) report in writing to the Congress the reasons for the determination under subparagraph (A), or under both subparagraphs (A) and (B), as the case may be.

"(3) If the President determines under paragraph (2)(B) to take action to adjust imports of an article and its derivatives, the President shall implement that action no later than the 15th day after the day on which he determines to take action under paragraph (2)(B).".

(b) APPLICATION OF AMENDMENTS.—The amendments made by subsection (a) apply with respect to—

(1) investigations that are requested or applied for, or initiated by the Secretary of Commerce on his own motion, under section 232(b) of the Trade Expansion Act of 1962 on or after the date of the enactment of this Act; and

(2) any advice submitted by the Secretary of Commerce to the President before such date of enactment under such section 232(b) to the effect that imports of an article threaten to impair the national security, and with respect to which no action was taken by the President under such section on that advice before such date.

For purposes of applying paragraph (2), a report containing advice to the President shall be treated as having been received by the President under paragraph (1) of such section on the date of the enactment of this Act.

SEC. 172. REALLOCATION OF GSP BENEFITS TO LATIN AMERICAN DEBTOR NATIONS.

Section 504(c)(3) of the Trade Act of 1974 (19 U.S.C. 2464(c)(3)) is amended—

(1) by redesignating subparagraphs (C) and (D) as subparagraphs (D) and (E), respectively;

(2) by inserting after subparagraph (B) the following new paragraph:

"(C)(i) Not earlier than January 4, 1987, the President shall waive the application of this subsection with respect to any eligible article of any beneficiary developing country that—

"(I) qualifies for waiver under subparagraphs (A) and (B);

"(II) is located in the Western hemisphere south of the United States;

"(III) is determined by the President to have difficulty servicing the debt it owes to foreign or multilateral sources; and

"(IV) has not less than 20 percent of the debt that it owes to foreign or multilateral sources held by any combination of United States banks, the International Monetary Fund, and the World Bank.

"(ii) The aggregate value of articles to which waivers made under clause (i) may apply for any calendar year may not exceed the aggregate value of the articles with respect to which countries, on the basis of exports during the preceding calendar year, are no longer treated under this subsection as beneficiary developing countries.

"(iii) The President shall allocate the aggregate value waived under clause (i) for any calendar year among beneficiary developing countries referred to in that clause. In making any such allocation, and in deciding which eligible articles to which allocation applies, the President shall give great weight to—

"(I) the amount of foreign and multilateral debt of each such country, relative to the gross national product of that country;

"(II) the estimated percentage of export earnings that each country would be required to devote to servicing foreign and multilateral debt under existing contracts; and

"(III) the trade surplus that each country holds with the United States, relative to that country's level of debt outstanding to foreign or multilateral sources."; and

(3) by striking out "subparagraph (A)" in subparagraph (E)(i) and (ii) (as redesignated under paragraph (1)) and inserting "subparagraphs (A) and (C)".

SEC. 173. TRANSFER OF AUTHORITY UNDER GSP TO THE UNITED STATES TRADE REPRESENTATIVE.

Title V of the Trade Act of 1974 (19 U.S.C. 2461 et seq.) is amended—

(1) by striking out "President" each place it appears and inserting "United States Trade Representative";

(2) By amending subsection (a) of section 502—

(A) by striking out "with respect to which there is in effect an Executive order or Presidential Proclamation" in paragraph (1) and inserting "which is designated",

(B) by striking out "of the United States designating such country" in paragraph (1),

(C) by striking out the parenthetical clause in paragraph (2), and

(D) by striking out "by Executive order or Presidential Proclamation" in paragraph (3).

(3) by amending subsection (a) of section 503—

(A) by amending the second sentence to read as follows: "Before any such list is furnished to the Commission, there shall be in effect a designation of beneficiary developing countries under section 502."; and

(B) by striking out "by Executive order or Presidential proclamation" in the last sentence; and

(4) by amending subsection (b) of section 504 by striking out "issues an Executive order or Presidential proclamation revoking" in the last sentence and inserting "revokes".

SEC. 174. APPOINTMENT OF CHAIRMAN AND VICE CHAIRMAN OF THE UNITED STATES INTERNATIONAL TRADE COMMISSION.

(a) IN GENERAL.—Section 330(c) of the Tariff Act of 1930 (19 U.S.C. 1330(c)) is amended as follows:

(1) Paragraph (1) is amended to read as follows:

"(1) The President shall appoint, by and with the advice and consent of the Senate, the chairman and vice chairman of the Commission from among the members of the Commission not ineligible, under paragraph (3), for appointment.".

(2) Paragraph (3) is amended—

(A) by amending subparagraph (A) to read as follows:

"(3)(A) The President may not appoint as chairman of the Commission for any term any commissioner who is a member of the political party of which the chairman of the Commission for the immediately preceding term is a member.";

(B) by striking out "designate" in subparagraph (B) and in the first sentence in subparagraph (C) and inserting "appoint"; and

(C) by striking out the last sentence of subparagraph (C).

(b) APPLICATION.—The amendments made by subsection (a) apply to each appointment of a chairman and vice chairman of the United States International Trade Commission that is made after March 31, 1986.

SEC. 175. SCOFFLAW PENALTIES FOR MULTIPLE CUSTOMS LAW OFFENDERS.

(a) ORDERS BY SECRETARY OF THE TREASURY.—

(1) The Secretary of the Treasury (hereinafter in this section referred to as the "Secretary") shall by order prohibit any person who is a multiple customs law offender from—

(A) introducing, or attempting to introduce, foreign goods into the customs territory of the United States; and

(B) engaging, or attempting to engage, any other person for the purpose of introducing, on behalf of the multiple customs law offender, foreign goods into such customs territory.

If the multiple customs law offender is a firm, corporation, or other legal entity, the order shall apply to all officers and principals of the entity. The order shall also apply to any employee or agent of the entity if that employee or agent was directly involved in the violations of the customs laws concerned.

(2) The prohibition contained in an order issued under paragraph (1) shall apply during the period which begins on the 60th day after the date on which the order is issued and ends on the third anniversary of that 60th day.

(b) IDENTIFICATION OF MULTIPLE CUSTOMS LAW OFFENDERS.—Each Federal agency shall notify the Secretary of all final convictions and assessments made incident to the enforcement of the customs laws under jurisdiction of that agency.

(c) PENALTY.—Whoever violates, or knowingly aids or abets the violation of, an order issued by the Secretary under this section shall be fined not more than $250,000 or imprisoned not more than 10 years, or both.

(d) RULES.—The Secretary shall prescribe rules to carry out this section, including rules governing the procedures to be used in

issuance of orders under subsection (a). Such rules shall also include a list of the customs laws.

(e) DEFINITIONS.—For purposes of this section:

(1) The term "multiple customs law offender" means a person that, during any period of 7 consecutive years occurring after the date of the enactment of this Act, was either convicted of, or assessed a civil penalty for, 3 separate violations of one or more customs laws finally determined to involve gross negligence, fraud, or criminal culpability.

(2) The term "customs law" means any Federal law providing a criminal or civil penalty for an act, or failure to act, regarding the introduction of, or the attempt to introduce, foreign goods into the customs territory of the United States; including, but not limited to, sections 496 and 1001 (but only with respect to customs matters), and any section of chapter 27, of title 18, United States Code, and section 592 of the Tariff Act of 1930.

SEC. 176. METALLURGICAL COAL EXPORTS TO JAPAN.

It is the sense of Congress that—

(1) the objectives of the November 1983 Joint Policy Statement on Energy Cooperation, as it relates to United States exports of metallurgical coal to Japan, have not been achieved;

(2) the President should seek to establish reciprocity with Japan with respect to metallurgical coal exports and steel product imports;

(3) to that end the President should direct the United States Trade Representative to negotiate an agreement with Japan under which Japan will import United States metallurgical coal in quantities equivalent to that used in the production of Japanese steel products that are exported to the United States; and

(4) the President should report to the Congress by November 1, 1987, regarding the results of the outcome of any negotiation undertaken in response to this section.

SEC. 177. STEEL IMPORTS.

Section 805 of the Steel Import Stabilization Act is amended—

(1) by redesignating subsection (c) as subsection (d); and

(2) by inserting after subsection (b) the following new subsection:

"(c)(1) Any steel product that is manufactured in a country that is not party to a bilateral arrangement from steel which was melted and poured in a country that is party to a bilateral arrangement (hereinafter in this subsection referred to as an 'arrangement country') will be treated for purposes of the quantitative restrictions under that arrangement as if it were a product of the arrangement country.

"(2) If the Customs Service, in applying paragraph (1), is provided with valid documentation of the nature and amount of the steel product exported by an arrangement country to a country that—

"(A) is not an arrangement country; and

"(B) has transformed the product for export to the United States;

the Customs Service shall treat such documented product, for purposes of enforcing quantitative restrictions, as if it were a product of the arrangement country.".

SEC. 178. IMPORT MONITORING BY THE INTERNATIONAL TRADE COMMISSION; TECHNICAL AMENDMENTS.

(a) MONITORING OF IMPORTS.—The United States International Trade Commission shall, beginning on the date of the enactment of this Act, monitor imports into the United States for the purposes of identifying, ranking, and providing analysis with respect to, those classes or kinds of imported merchandise that may pose potential significant problems from import competition for United States industries, based on such factors as changes in net trade balances of the articles concerned and evidence of increasing import penetration of the domestic market. The Commission shall submit to the Committee on Ways and Means a quarterly report regarding the monitoring required under this subsection.

(b) CONFIDENTIAL INFORMATION.—The first sentence of section 332(g) of the Tariff Act of 1930 (19 U.S.C. 1332(g)) is amended by striking out ", and shall report to Congress" and inserting ". However, the Commission may not release information which the Commission considers to be confidential business information unless the party submitting the confidential business information had notice, at the time of submission, that such information would be released by the Commission, or such party subsequently consents to the release of the information. The Commission shall report to Congress".

(c) PAPERWORK REDUCTION.—Section 330 of the Tariff Act of 1930 (19 U.S.C. 1330) is amended by adding at the end thereof the following new subsection:

"(f) The Commission shall be considered to be an independent regulatory agency for purposes of chapter 35 of title 44, United States Code.".

TITLE II—INTERNATIONAL TRADE IN TELECOMMUNICATIONS PRODUCTS AND SERVICES

SEC. 201. SHORT TITLE.

This title may be cited as the "Telecommunications Trade Act of 1986".

SEC. 202. FINDINGS AND PURPOSES.

(a) FINDINGS.—The Congress finds that—

(1) rapid growth in the world market for telecommunications products and services will continue for several decades;

(2) the United States can improve prospects for—

(A) the growth of—

(i) United States exports of telecommunications products and services, and

(ii) export-related employment and consumer services in the United States, and

(B) the continuance of the technological leadership of the United States,

by undertaking a program to achieve an open world market for trade in telecommunications products, services, and investment;

(3) most foreign markets for telecommunications products, services, and investment are characterized by extensive government intervention (including restrictive import practices and discriminatory procurement practices) which adversely affect United States exports of telecommunications products and services and United States investment in telecommunications;

(4) unfair and discriminatory trade practices in foreign countries have resulted in, and continue to threaten, the loss of jobs in the United States telecommunications industry;

(5) the open nature of the United States telecommunications market, accruing from the liberalization and restructuring of such market, has resulted, and will continue to result, in a dramatic increase in imports of telecommunications products and a growing imbalance in competitive opportunities for trade in telecommunications; and

(6) unless this imbalance is corrected through the achievement of fully competitive market opportunities for United States telecommunications products and services in foreign markets, the United States should avoid granting continued open access to the telecommunications products and services, and other products and services, of such foreign countries in the United States market.

(b) PURPOSES.—The purposes of this title are—

(1) to foster the economic and technological growth of and employment in the United States telecommunications industry and all United States persons who benefit from a high quality telecommunications network;

(2) to ensure that countries which have made commitments to open telecommunications trade fully abide by those commitments; and

(3) to achieve a more open world trading system for telecommunications products and services through negotiation and achievement of fully competitive market opportunities for United States telecommunications exporters and their subsidiaries in those markets in which barriers exist to free international trade.

SEC. 203. NEGOTIATING OBJECTIVES.

(a) PRIMARY OBJECTIVES.—The primary negotiating objectives of the United States under this title regarding telecommunications products and services are to provide for—

(1) the nondiscriminatory procurement of telecommunications products and related services by foreign entities that provide local exchange telecommunications services which are owned, regulated, or controlled by foreign governments;

(2) assurances that any requirement for the registration of telecommunications products, which are to be located on customer premises, for the purposes of—

(A) attachment to a telecommunications network in a foreign country, and

(B) the marketing of the products in a foreign country,

be limited to the certification by the manufacturer that the products meet the standards established by the foreign country for preventing harm to the network or network personnel;

(3) transparency of, and open participation in, the standards-setting processes used in foreign countries with respect to telecommunications products;

(4) the ability to have telecommunications products, which are to be located on customer premises, approved and registered by type, and, if appropriate, the establishment of procedures between the United States and foreign countries for the mutual recognition of type approvals;

(5) access to the basic telecommunications network in foreign countries on reasonable and nondiscriminatory terms and conditions (including non-discriminatory prices) for the provision of value-added services by United States suppliers; and

(6) monitoring and effective dispute settlement provisions regarding matters referred to in paragraphs (1) through (5).

(b) SECONDARY OBJECTIVES.—The secondary negotiating objectives of the United States under this title regarding telecommunications products and services are to obtain—

(1) national treatment for telecommunications products and services that are provided by United States firms;

(2) most-favored-nation treatment for such products and services;

(3) nondiscriminatory procurement policies with respect to such products and services and the inclusion under the Agreement on Government Procurement of the procurement (by sale or lease by government-owned or controlled entities) of all telecommunications products and services;

(4) the reduction or elimination of customs duties on telecommunications products;

(5) the elimination of subsidies, dumping, violations of intellectual property rights, and other unfair trade practices that distort international trade in telecommunications products and services;

(6) the elimination of investment barriers that restrict the establishment of foreign-owned business entities which market such products and services; and

(7) monitoring and dispute settlement mechanisms to facilitate compliance with telecommunications trade agreements.

SEC. 204. INVESTIGATIONS OF FOREIGN TELECOMMUNICATIONS TRADE BARRIERS.

(a) REQUIRED INITIAL INVESTIGATIONS.—

(1) The United States Trade Representative (hereinafter in this title referred to as the "Trade Representative"), in consultation with the Secretary of Commerce and the interagency trade organization established under section 242(a) of the Trade Expansion Act of 1962 (19 U.S.C 1872), shall undertake an investigation with respect to each foreign country for the purposes of—

(A) identifying and analyzing those acts, policies, and practices in the markets of that foreign country that deny fully competitive market opportunities to telecommunications products and services of United States firms; and

(B) establishing, on the basis of the analysis under subparagraph (A) and after taking into consideration—

(i) the needs of the affected United States industries,

(ii) the competitiveness of United States industries in domestic and world markets,

(iii) the progress being made to expand market opportunities under existing agreements or ongoing negotiations, and

(iv) the availability of appropriate incentives and effective remedies,

the specific primary and secondary negotiating objectives specified in section 203 that should be pursued in negotiations under section 205 in order to obtain fully competitive market opportunities in that foreign country for telecommunications products and services of United States firms.

(2) The Trade Representative may exclude any foreign country from the investigations required to be conducted under paragraph (1) if the Trade Representative determines that the potential market in that country for United States telecommunications products and services is not substantial.

(3) The Trade Representative shall complete each investigation required to be undertaken under paragraph (1) by no later than the 180th day after the date of the enactment of this Act.

(b) OTHER INVESTIGATIONS.—If at any time after the investigations required under subsection (a) are completed the Trade Representative—

(1) on his own motion, considers that there is reason to believe that any act, policy, or practice in the market of a foreign country is such as to deny fully competitive market opportunities to telecommunications products or services of United States firms; or

(2) accepts a petition filed by an interested party alleging that any act, policy, or practice described in paragraph (1) exists;

the Trade Representative may undertake an investigation with respect to the foreign country concerned for the purposes described in subparagraphs (A) and (B) of subsection (a)(1). An investigation undertaken under this subsection shall be completed within 180 days after the date on which the Trade Representative commences the investigation under paragraph (1) or the petition is filed under paragraph (2).

(c) REVIEW OF MARKETS OF COUNTRIES INITIALLY EXCLUDED FROM INVESTIGATION.—The Trade Representative shall—

(1) at least annually, review the potential market for United States telecommunications products and services in countries that were excluded from investigation under subsection (a) and with respect to which no investigation has been initiated under subsection (b); and

(2) if he considers any such country to have a market for United States telecommunications products and services which is substantial, undertake, and complete within 180 days, an investigation for the purposes described in subparagraphs (A) and (B) of subsection (a)(1) regarding that country.

(d) REPORT TO CONGRESS.—The Trade Representative shall submit to the Committee on Ways and Means of the House of Representatives and the Committee on Finance of the Senate a report on the investigations undertaken under subsections (a), (b), and (c). Each report shall be submitted within 30 days after the investigation is completed.

SEC. 205. ACTION BY THE PRESIDENT IN RESPONSE TO INVESTIGATIONS BY TRADE REPRESENTATIVE.

(a) IN GENERAL.—After—

(1) all investigations required under section 204(a) are completed (and in no case later than the 180th day after the date of the enactment of this Act); and

(2) each investigation undertaken under section 204(b) or (c) is completed;

the President shall enter into negotiations with the foreign country or countries subject to investigation for the purpose of entering into bilateral or multilateral trade agreements, as appropriate, under section 208 which achieve the specific primary and secondary negotiating objectives that were established under section 204(a)(1)(B) with regard to such countries.

(b) ACTIONS TO BE TAKEN IF NO AGREEMENT OBTAINED.—

(1) If the President is unable during the negotiating period to enter into a trade agreement or agreements under section 208 with a foreign country which achieve the specific primary and secondary negotiating objectives established for that country under section 204(a)(1)(B), the President, by no later than the close of the negotiating period—

(A) shall take whatever actions are authorized under paragraph (3) that are necessary and appropriate to achieve the purposes of the primary objectives not covered by agreement; and

(B) may take whatever actions are authorized under paragraph (3) that are necessary to achieve the secondary objectives not covered by agreement.

(2) In taking action under paragraph (1)(A) and (B), the President shall first take those actions which most directly affect trade in telecommunications products and services with the country concerned.

(3) The President is authorized to take any of the following actions under paragraph (1)(A) and (B):

(A) Terminate, withdraw, or suspend any portion of any trade agreement entered into under—

(i) the Trade Act of 1974;

(ii) section 201 of the Trade Expansion Act of 1962; or

(iii) section 350 of the Tariff Act of 1930;

with respect to any duty or import restriction imposed by the United States on any telecommunications product.

(B) Take any action described in section 301 of the Trade Act of 1974.

(C) Prohibit the Federal Government from purchasing specified telecommunications products.

(D) Increase domestic preferences under title III of the Act of March 3, 1933 (41 U.S.C. 10a, et seq.) for purchases by the Federal Government of specified telecommunications products.

(E) Suspend any waiver of domestic preferences under title III of the Act of March 3, 1933 (41 U.S.C. 10a, et seq.) which may have been extended pursuant to the Trade Agreements Act of 1979 with respect to telecommunications products or any other products.

(F) Order the appropriate Federal officials to deny Federal funds or Federal credits for purchases of specified telecommunications products of any specified foreign country.

(G) Suspend, in whole or in part, benefits accorded articles from specified foreign countries under title V of the Trade Act of 1974 (19 U.S.C. 2461, et seq.).

(4) Notwithstanding section 125 of the Trade Act of 1974 and any other provision of law, if any portion of a trade agreement described in paragraph (3)(A) is terminated, withdrawn, or suspended under paragraph (1) with respect to any duty imposed by the United States, the rate of such duty determined by the President up to the rate provided for in rate column number 2 of the Tariff Schedules of the United States shall apply to such products after the date on which such termination, withdrawal, or suspension takes effect.

(5) No action taken under paragraph (1) shall affect any binding obligations under any written contract entered into before the date of the enactment of this Act, to which any citizen or national of the United States is a party.

(6) Any action the President decides to take under subparagraph (3) of this subsection shall be treated as an action necessary to implement a trade agreement for the purposes of section 151 and subsections (c), (d), (e), (f), and (g) of section 102 of the Trade Act of 1974.

(c) NEGOTIATING PERIOD.—

(1) For purposes of subsection (b), the term "negotiating period" means—

(A) with respect to a foreign country investigated under section 204(a), the 18-month period beginning on the date of the enactment of this Act; and

(B) with respect to a foreign country investigated under section 204 (b) or (c), the 12-month period beginning on the date the investigation was completed.

(2) The negotiating period with respect to a foreign country may be extended by not more than two 12-month periods. An extension of the negotiating period shall take effect if (and only if)—

(A) the President, not less than 90 days before the negotiating period expires (or if

extended previously, before the first extension period expires), submits to the House of Representatives and the Senate—

(i) a draft of a negotiating period extension bill, and

(ii) a statement that—

(I) substantial progress is being made in negotiations with the foreign country concerned, and

(II) further negotiations are necessary to reach an agreement which meets the specific primary and secondary negotiating objectives established under section 204(a)(1)(B) with regard to that country; and

(B) before the expiration of the negotiating period (or the first extension thereof), a negotiating period extension bill is enacted into law.

(3) For purposes of this subsection, the term "negotiating period extension bill" means a bill of either House of Congress the matter after the enacting clause of which is as follows: "That the Congress approves the extension for 12 months of the negotiating period with that was requested by the President on .", the first blank space being filled with the name of the foreign country concerned, and the second blank space being filled with the date on which the submissions to Congress under paragraph (2)(A) regarding the extension were made.

(4) On the day on which submissions to Congress under paragraph (2)(A) regarding an extension are made, the negotiating period extension bill submitted by the President shall be introduced (by request) in the House by the majority leader of the House, for himself and the minority leader of the House, or by Members of the House designated by the majority leader and minority leader of the House; and shall be introduced (by request) in the Senate by the majority leader of the Senate, for himself and the minority leader of the Senate, or by Members of the Senate designated by the majority leader and minority leader of the Senate. If either House is not in session on the day on which such a trade agreement is submitted, the implementing bill shall be introduced in that House, as provided in the preceding sentence, on the first day thereafter on which that House is in session. Such bills shall be referred by the Presiding Officer of the respective Houses to the Committee on Ways and Means and the Committee on Finance.

(5) Subsections (d) through (g) of section 151 of the Trade Act of 1974 apply to any agreement period extension bill. Any reference in such subsections to an implementing bill shall be treated as a reference to a negotiating period extension bill.

(d) MODIFICATION AND TERMINATION AUTHORITY.—The President may modify or terminate any action taken under subsection (b) if, and only if, the foreign country concerned enters into a trade agreement under section 208 which achieves the specific negotiating objective regarding which such action was taken.

(e) REPORT.—The President shall promptly inform the House Committee on Ways and Means and the Senate Committee on Finance of any action taken under subsection (b) or of the modification or termination of any such action under subsection (d).

SEC. 206. REVIEW OF TRADE AGREEMENT IMPLEMENTATION BY TRADE REPRESENTATIVE.

(a) DEFINITION.—For purposes of this section, the term "trade agreement" means—

(1) a trade agreement entered into under section 208 that is in force with respect to the United States; and

(2) a trade agreement regarding telecommunications products or services that was in force with respect to the United States on the date of the enactment of this Act.

(b) PERIODIC REVIEW.—

(1) The Trade Representative shall review each trade agreement to determine whether any act, policy, or practice of the foreign country—

(A) is not in compliance with the terms of the agreement; or

(B) otherwise denies, within the context of the terms of the trade agreement, to telecommunications products and services of United States firms fully competitive market opportunities in that foreign country.

(2) The Trade Representative shall carry out the reviews required under paragraph (1)—

(A) with respect to each trade agreement described in subsection (a)(1), within 6 months after the agreement enters into force with respect to the United States, and annually thereafter; and

(B) with respect to each trade agreement described in subsection (a)(2), within 18 months after the date of the enactment of this Act, and annually thereafter.

(c) REVIEW FACTORS.—

(1) In undertaking reviews under subsection (a), the Trade Representative shall consider any evidence of actual patterns of trade (including United States exports of telecommunications products to a foreign country and sales and services related to those products) that do not reflect patterns of trade which would reasonably be anticipated to flow from the concessions or commitments of such country based on the international competitive position and export potential of such products and services.

(2) The Trade Representative shall consult with the United States International Trade Commission in regard to the actual patterns of trade described in paragraph (1).

(d) ACTION IN RESPONSE TO AFFIRMATIVE DETERMINATION.—If the Trade Representative makes an affirmative determination under subsection (b) with respect to any act, policy, or practice of a foreign country, the Trade Representative shall take whatever action authorized under paragraph (e) that is necessary—

(1) to offset fully such act, policy, or practice, and

(2) to restore the balance of concessions in telecommunications products and services trade between the United States and such foreign country;

except that the Trade Representative may not take any action under subsection (e) on the basis of a review under subsection (b) regarding a trade agreement described in subsection (a)(2) before the President takes action under section 205(b)(3) with respect to any country.

(e) AUTHORIZED ACTIONS.—

(1) The Trade Representative is authorized to take the following actions under subsection (d):

(A) Terminate, withdraw, or suspend any portion of any trade agreement entered into under—

(i) the Trade Act of 1974,

(ii) section 201 of the Trade Expansion Act of 1962, or

(iii) section 350 of the Tariff Act of 1930,

with respect to any duty or import restriction imposed by the United States on any telecommunications product.

(B) Take any action under section 301 of the Trade Act of 1974.

(2) Actions described in paragraph (1) may be taken under subsection (d) with respect to other than telecommunications products and services only if—

(A) the Trade Representative has taken all feasible actions described in subparagraphs (A) and (B) of paragraph (1) with respect to telecommunications products and services; and

(B) the applicable objectives established in section 204(a)(1)(B) have not been achieved.

(3) Notwithstanding section 125 of the Trade Act of 1974 and any other provision of law, if any portion of a trade agreement is terminated, withdrawn, or suspended under paragraph (1)(A) with respect to any duty imposed by the United States on any product, the rate of such duty determined by the United States Trade Representative up to the rate provided for in rate column number 2 of the Tariff Schedules of the United States shall apply to such products after the date on which such termination, withdrawal, or suspension takes effect.

(4) Any action the Trade Representative decides to take under paragraph (1) shall be treated as necessary to implement a trade agreement for the purposes of section 151 and subsections (c), (d), (e), (f) and (g) of section 102 of the Trade Act of 1974.

(f) ACTIONS NOT TO AFFECT CERTAIN CONTRACTUAL OBLIGATIONS.—No action taken under this section shall affect any binding obligations under any written contract entered into before the date of the enactment of this Act, to which any citizen or national of the United States is a party.

(g) MODIFICATION AND TERMINATION AUTHORITY.—The Trade Representative may modify or terminate any action taken under subsection (e) if, and only if, he determines that the foreign country has taken appropriate remedial action regarding the act, policy, or practice concerned.

(h) REPORT.—The Trade Representative shall promptly inform the House Committee on Ways and Means and the Senate Committee on Finance of any actions taken under subsection (c) or of the modification or termination of any such action under subsection (g).

SEC. 207. CONSULTATIONS.

(a) ADVICE FROM DEPARTMENTS AND AGENCIES.—For purposes of determining appropriate action under section 205(b) or 206(d), the President and the Trade Representative shall consult with the Secretary of Commerce and the interagency trade organization established under section 242(a) of the Trade Expansion Act of 1962 (19 U.S.C. 1872).

(b) ADVICE FROM THE PRIVATE SECTOR.—The—

(1) Trade Representative, in conducting investigations and establishing negotiating objectives under section 204, and for purposes of determining appropriate action under section 206(d); and

(2) President, for purposes of determining appropriate action under section 205(b);

shall provide the opportunity for presentation of views by any interested party, including appropriate committees established under section 135 of the Trade Act of 1974.

(c) CONSULTATIONS WITH CONGRESS AND OFFICIAL ADVISORS.—For purposes of conducting negotiations under section 205(a), the President shall keep appropriate committees of the Congress, as well as appropriate committees established pursuant to section 135 of the Trade Act of 1974, currently informed with respect to—

(1) the negotiating priorities and objectives for each country involved;

(2) the assessment of negotiating prospects, both bilateral and multilateral; and

(3) any United States concessions which might be included in negotiations to achieve the objectives described in section 205.

SEC. 208. GENERAL TRADE AGREEMENT AUTHORITY.

(a) IN GENERAL.—During the 42-month period beginning on the date of enactment of this Act, the President may enter into trade agreements, for purposes of achieving the primary and secondary negotiating objectives established under section 204(a)(1)(B), with foreign countries. The trade agreements may provide for—

(1) the harmonization, reduction, or elimination of—

(A) duties, or

(B) restrictions on, barriers to, or other distortions of international trade, or

(2) the prohibition of, or limitations on the imposition of—

(A) duties, or

(B) restrictions on, barriers to, or other distortions of international trade.

(b) AGREEMENT TREATED IN SAME MANNER AS AGREEMENT UNDER SECTION 102 OF THE TRADE ACT OF 1974.—

(1) For purposes of section 151 and subsections (c), (d), (e), (f), and (g) of section 102 of the Trade Act of 1974, any trade agreement entered into under subsection (a) (other than a trade agreement provided for under paragraph (2)) shall be treated as a trade agreement entered into under section 102 of the Trade Act of 1974.

(2) The President may by proclamation implement any trade agreement entered into under subsection (a) that provides solely for unilateral concessions by a foreign country to the United States.

(c) APPLICATION OF AGREEMENT BENEFITS.—Notwithstanding any other provision of law, any agreement entered into under this section may provide that the benefits and obligations of such agreement—

(1) apply solely to the parties to the agreement, or

(2) not apply uniformly to all parties to such agreement.

SEC. 209. COMPENSATION AUTHORITY.

(a) IN GENERAL.—If—

(1) the President takes action under section 205(b); or

(2) the Trade Representative takes action under section 206(d); and

(3) such action is found to be inconsistent with the international obligations of the United States, including the obligations under the General Agreement on Tariffs and Trade;

the President may enter into trade agreements with the foreign country concerned for the purpose of granting new concessions as compensation for such action in order to maintain the general level of reciprocal and mutually advantageous concessions.

(b) AGREEMENT TREATED IN SAME MANNER AS AGREEMENT UNDER SECTION 102 OF THE TRADE ACT OF 1974.—For purposes of section 151 and subsections (c), (d), (e), (f), and (g) of section 102 of the Trade Act of 1974, any trade agreement entered into under subsection (a) shall be treated as a trade agreement entered into under section 102 of the Trade Act of 1974.

SEC. 210. DEFINITION OF TELECOMMUNICATIONS PRODUCT.

For purposes of this title, the term "telecommunications product" means any paging alerting device provided for in item 685.70 of the Tariff Schedules of the United States (19 U.S.C. 1202), as in effect on November 14, 1985, and any article that is classified under the following item numbers of such Schedules:

684.57	684.67	685.28	688.17
684.58	684.80	685.30	688.41
684.59	685.16	685.32	707.90
684.65	685.24	685.34	
684.66	685.25	685.48	

SEC. 211. INTERNATIONAL OBLIGATIONS.

Nothing in this title may be construed to require the President and the United States Congress to act in a manner inconsistent with the legal obligations of the United States, including the General Agreement on Tariffs and Trade.

TITLE III—EXPORT ENHANCEMENT

SEC. 301. SHORT TITLE.

This title may be cited as the "Export Enhancement Act of 1986".

SEC. 302. FINDINGS AND PURPOSES.

(a) FINDINGS.—The Congress makes the following findings:

(1) While a free and open world trading system has contributed substantially to world growth and prosperity in the 20th century, current macroeconomic policies and trade imbalances seriously threaten that system.

(2) The world trading system cannot be sustained without balanced and continued growth policies among the United States and its trading partners.

(3) World economic growth requires both a monetary system which fosters and supports stable exchange rates and the coordination of macroeconomic policies among industrialized countries.

(4) The United States trade deficit in 1985 of $148,500,000,000 threatens the long-term economic well-being of the United States.

(5) The unchecked bilateral trade imbalances between the United States and its trading partners could jeopardize the political, strategic, and economic relationships of the United States with other countries, relationships which are vital to world stability and peace.

(6) In order to provide more balanced and sustainable economic growth in the United States and abroad, the United States must lower its trade deficit by implementing macroeconomic and trade policies which facilitate and expand export opportunities.

(7) As real gross national product has risen by 12 percent since 1980, manufactured exports have stagnated and agricultural exports have fallen by nearly 30 percent, so that an estimated 1,500,000 jobs have been lost.

(8) The significant decline in recent years in the volume and value of agricultural exports makes the development and implementation of an effective United States agricultural trade policy imperative.

(9) The indebtedness of third world countries not only poses risks for United States banks with long-term loans to developing countries, but is responsible for the loss of $18,200,000,000 in exports and an estimated 500,000 in jobs between 1980 and 1983.

(10) In spite of the continuing need to expand exports, current Federal Government export promotion and facilitation programs are not sufficient to meet the challenge of competition from other countries for world markets.

(11) United States and Foreign Commercial Service Officers are often accorded insufficient status abroad, and are frequently diverted from their primary duty of promoting United States exports in order to perform export licensing duties.

(12) The activities of the Overseas Private Investment Corporation and the Trade and Development Program serve important United States development assistance and international economic objectives.

(13) Inadequate protection of and enforcement procedures for United States intellectual property interests abroad have resulted in the counterfeiting of United States trademarks and the piracy of United States copyrights, patents, and mask works, acts which violate basic international principles of fair trade, cause trade distortions due to lost sales by countries whose companies have developed the counterfeited or pirated goods, pose health and safety threats to consumers, and have caused a loss of United States jobs.

(b) PURPOSES.—The purposes of this title are—

(1) to promote world growth as a means of improving the standard of living in the United States and abroad;

(2) to broaden overseas markets for United States exports;

(3) to emphasize the importance for United States exports of establishing a stable and competitive dollar;

(4) to increase United States exports by—

(A) strengthening the United States and Foreign Commercial Services;

(B) improving the regulation of export trading companies;

(C) providing for tied aid export financing to counter foreign tied aid credits; and

(D) streamlining export controls for national security purposes; and

(5) restoring the markets for United States exports in developing countries by—

(A) committing the United States to world growth;

(B) broadening the authority of the Overseas Private Investment Corporation to help increase economic activity in developing countries; and

(C) enhancing the resources of the Trade and Development Program.

Subtitle A—Export Promotion

SEC. 311. UNITED STATES AND FOREIGN COMMERCIAL SERVICE.

(a) ESTABLISHMENT.—

(1) IN GENERAL.—The Secretary of Commerce shall establish, within the International Trade Administration, the United States and Foreign Commercial Service. The Secretary shall, to the greatest extent practicable, transfer to the Commercial Service the functions of the United States and Foreign Commercial Services.

(2) ASSISTANT SECRETARY OF COMMERCE AND DIRECTOR GENERAL.—The head of the Commercial Service shall be the Assistant Secretary of Commerce and Director General of the Commercial Service, who shall be appointed by the President, by and with the advice and consent of the Senate.

(3) COORDINATION WITH FOREIGN POLICY OBJECTIVES.—The Secretary shall take the necessary steps to ensure that the activities of the Commercial Service are carried out in a manner consistent with United States foreign policy objectives, and the Secretary shall consult regularly with the Secretary of State in order to comply with this paragraph.

(4) AUTHORITY OF CHIEF OF MISSION.—All activities of the Commercial Service shall be subject to section 207 of the Foreign Service Act of 1980 (22 U.S.C. 3927).

(b) STATEMENT OF PURPOSE.—The purpose of the Commercial Service is to promote and protect United States business interests abroad. In pursuit of this purpose, the Com-

mercial Service shall place primary emphasis on the promotion of exports of goods and services from the United States, particularly by small businesses and medium-sized businesses, by carrying out activities such as—

(1) identifying United States businesses with the potential to export goods and services and providing such businesses with advice and information on establishing export businesses;

(2) providing United States exporters with information on economic conditions, market opportunities, and the legal and regulatory environment within foreign countries;

(3) providing United States exporters with information and advice on the necessary adaptation of product design and marketing strategy to meet the differing cultural and technical requirements of foreign countries;

(4) providing United States exporters with actual leads and contacts within foreign countries;

(5) assisting United States exporters in locating reliable sources of business services in foreign countries;

(6) assisting United States exporters in their dealings with foreign governments and enterprises owned by foreign governments; and

(7) assisting the coordination of the efforts of State and local agencies and private organizations which seek to promote United States business interests abroad so as to maximize their effectiveness and minimize the duplication of efforts.

(c) OFFICES.—

(1) IN GENERAL.—The Commercial Service shall consist of a headquarters office, district offices located in major United States cities, and foreign offices located in major foreign cities.

(2) HEADQUARTERS.—The headquarters of the Commercial Service shall provide such managerial, administrative, research, and other services as the Secretary considers necessary to carry out the purposes of the Commercial Service.

(3) DISTRICT OFFICES.—The Secretary shall establish district offices of the Commercial Service in any United States city in a region in which the Secretary determines that there is a need for Federal Government export assistance.

(4) FOREIGN OFFICES.—(A) The Secretary shall, after consultation with the Secretary of State, establish foreign offices of the Commercial Service. These offices shall be located in foreign cities in regions in which the Secretary determines there are significant business opportunities for United States exporters.

(B) The Secretary shall, in consultation with the Secretary of State, assign to the foreign offices Commercial Officers and such other personnel as the Secretary considers necessary. In employing Commercial Officers and such other personnel, the Secretary shall use the Foreign Service personnel system in accordance with the Foreign Service Act of 1980. The Secretary shall designate a Commercial Officer as head of each foreign office.

(C) Upon the request of the Secretary, the Secretary of State shall attach the Commercial Officers and other employees of each foreign office to the diplomatic mission of the United States in the country in which that foreign office is located, and shall obtain for them diplomatic privileges and immunities equivalent to those enjoyed by Foreign Service personnel of comparable rank and salary.

(D) For purposes of official representation, the senior Commercial Officer in each country shall be considered to be the senior United States commercial representative in that country, and the United States chief of mission in that country shall accord that officer all privileges and responsibilities attending such a position.

(E) The Secretary of State is authorized, upon the request of the Secretary, to provide office space, equipment, facilities, and such other administrative and clerical services as may be required for the operation of the foreign offices. The Secretary is authorized to reimburse or advance funds to the Secretary of State for such services.

(d) RANK OF COMMERCIAL OFFICERS IN FOREIGN MISSIONS.—

(1) MINISTER-COUNSELOR.—(A) The Secretary shall, within 6 months after the date of the enactment of this Act, submit to the President and the Congress a list of those United States missions abroad which the Secretary determines to be commercially significant or to be located in a geographical area of commercial importance to the United States.

(B) Notwithstanding any other provision of law, the Secretary of State shall accord the diplomatic title of Minister-Counselor to the senior Commercial Officer assigned to any of the missions designated under subparagraph (A).

(2) CONSUL GENERAL.—In any United States consulate in which a vacancy occurs in the position of Consul General, the Secretary of State, in consultation with the Secretary shall consider filling that vacancy with a Commercial Officer if the primary functions of the consulate are of a commercial nature and if there are significant business opportunities for United States exporters in the region in which the consulate is located.

(e) REPORT BY THE PRESIDENT.—Within 1 year after the date of the enactment of this Act, the President shall submit a report to the Congress containing an evaluation of existing export promotion services of the Department of Commerce, recommendations for improving those services, and proposals for new export promotion services.

(f) INFORMATION DISSEMINATION.—In order to carry out subsection (b)(7), to lessen the cost of distribution of information produced by the Commercial Service, and to make that information more readily available, the Secretary should establish a system for distributing that information in those areas where no district offices of the Commercial Service are located. Distributors of the information should be State export promotion agencies. The distribution system should be consistent with cost recovery objectives of the Department of Commerce.

(g) AUDITS.—The Inspector General of the Department of Commerce shall perform a general audit of the operations of the Commercial Service within 1 year after the date of the enactment of this Act, and within every 2-year period thereafter. The Inspector General shall report to the Congress the results of each such audit. In addition to an overview of the activities and effectiveness of Commercial Service operations, the audit shall include—

(1) an evaluation of the current placement of domestic personnel and recommendations for transferring personnel among district offices; and

(2) an evaluation of the current placement of foreign-based personnel and recommendations for transferring such personnel in response to newly emerging business opportunities for United States exporters.

(h) REPORT BY THE SECRETARY.—Not later than January 1, 1987, the Secretary shall submit a report to the Committee on Foreign Affairs of the House of Representatives and the appropriate committee of the Senate on the feasibility and desirability, progress to date, the present status, and the 5-year outlook of the comprehensive integration of the functions and personnel of the foreign and domestic export promotion operations within the International Trade Administration of the Department of Commerce.

(i) DEFINITIONS.—For purposes of this section—

(1) the term "Secretary" means the Secretary of Commerce;

(2) the term "Commercial Service" means the United States and Foreign Commercial Service;

(3) the term "United States exporter" means—

(A) a United States citizen;

(B) a corporation, partnership, or other association created under the laws of the United States or of any State; or

(C) a foreign corporation, partnership, or other association, more than 95 percent of which is owned by persons described in subparagraphs (A) and (B),

that is engaged in exporting goods or services produced in the United States;

(4) the term "small business" means any small business concern as defined under section 3 of the Small Business Act (15 U.S.C. 632);

(5) the term "State" means any of the several States, the District of Columbia, or any commonwealth, territory, or possession of the United States; and

(6) the term "United States" means the several States, the District of Columbia, and any commonwealth, territory, or possession of the United States.

SEC. 312. DIPLOMATIC MISSIONS.

(a) IN GENERAL.—(1) The Secretary of State and the Secretary of Commerce shall periodically review the current number of personnel assigned to United States diplomatic missions outside the United States to determine whether an adequate number of such personnel are engaged in economic or commercial duties to assist United States exporters and businesses doing business outside the United States. Whenever the Secretary of State and the Secretary of Commerce determine such number to be insufficient, they shall take such steps as may be necessary to increase the number of such personnel by adjustment of resources and personnel and other appropriate measures.

(2) The Secretary of State and the Secretary of Commerce should extend the length of assignment required of personnel described in paragraph (1) in order to ensure greater continuity in promoting United States exports.

(b) REPORTS.—Each chief of a United States diplomatic mission to a country which is an important United States trading partner and which has significant potential for United States export sales shall, not later than 1 year after the date of the enactment of this Act, and every 12 months thereafter, prepare and transmit to the President and to the Congress a report describing—

(1) the strategy used by such mission to expand United States exports; and

(2) the efforts of such mission to assist United States industries in expanding export sales and in improving their market position relative to other foreign competitors.

SEC. 313. MARKET DEVELOPMENT COOPERATOR PROGRAM.

(a) AUTHORITY TO ESTABLISH PROGRAM.—Title II of the Export Administration Amendments Act of 1985 (15 U.S.C. 4051 and following) is amended—

(1) by redesignating sections 202 and 203 as sections 203 and 204, respectively; and

(2) by inserting after section 201 the following:

"SEC. 202. MARKET DEVELOPMENT COOPERATOR PROGRAM.

"(a) AUTHORITY TO ESTABLISH PROGRAM.—In order to—

"(1) identify market opportunities,

"(2) introduce new products and processes,

"(3) eliminate trade and technical barriers, and

"(4) improve economic and trade relations between the United States and other countries,

the Secretary of Commerce is authorized to establish a Market Development Cooperator Program. The purpose of the program is to develop, maintain, and expand foreign markets for nonagricultural goods and services prod ced in the United States.

"(b) MARKET DEVELOPMENT COOPERATOR PROGRAM.—The Secretary of Commerce is authorized to enter into contracts with—

"(1) nonprofit industry organizations,

"(2) trade associations,

"(3) State departments of trade and their regional associations, including centers for international trade development, and

"(4) private industry firms or groups of firms in cases where no entity described in paragraph (1), (2), or (3) represents that industry,

(in this section referred to as 'cooperators') to engage in activities in order to carry out the purposes set forth in paragraphs (1) through (4) of subsection (a). The costs of activities under such a contract shall be shared equitably among the Department of Commerce, the cooperator involved, and, whenever appropriate, foreign businesses. The Department of Commerce shall undertake to support direct costs of activities under such a contract, and the cooperator shall undertake to support indirect costs of such activities. Activities under such a contract shall be carried out by the cooperator with the approval and assistance of the Secretary.

"(c) BUDGET ACT.—Contracts may be entered into under this section in a fiscal year only to such extent or in such amounts as are provided in appropriations Acts.".

(b) DEFINITION OF EXPORT PROMOTION PROGRAM.—Section 201(d) of the Export Administration Amendments Act of 1985 (15 U.S.C. 4051(d)) is amended—

(1) in paragraph (3) by striking "and";

(2) in paragraph (4) by striking the period and inserting "; and"; and

(3) by adding at the end the following:

"(5) the Market Development Cooperator Program established under section 202.".

SEC. 314. AGRICULTURAL TRADE POLICY.

(a) STATEMENT OF POLICY.—It is the policy of the United States—

(1) to provide, through all possible means, agricultural commodities and the products thereof for export at competitive prices, with full assurance of quality and reliability of supply;

(2) to support the principle of free trade and the promotion of fair trade in agricultural commodities and the products thereof;

(3) to support fully the negotiating objectives set forth in section 152(b) of this Act to eliminate or reduce substantially constraints to fair and open trade in agricultural commodities and the products thereof;

(4) to utilize fully statutory authority to counter aggressively unfair foreign trade practices and to use all other available means, including export restitution, export bonus programs, and, if necessary, restrictions on United States imports of foreign agricultural commodities and the products thereof, in order to encourage fair and more open trade; and

(5) to provide for increased representation of United States agricultural trade interests in the formulation of national fiscal and monetary policy affecting trade.

(b) AMENDMENTS TO P.L. 480.—

(1) WOOD AND WOOD PRODUCTS.—Section 104(b)(1) of the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1704(b)(1)) is amended in the first sentence by inserting "(including wood and wood products of the United States)" after "agricultural commodities".

(2) DEFINITION.—Section 108(i) of the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1708(i)) is amended—

(A) in paragraph (1) by striking "and";

(B) in paragraph (2) by striking the period and inserting "; and"; and

(C) by adding at the end the following:

"(3) the terms 'private sector development activity' and 'private enterprise investment' include the construction of low- and medium-income housing and shelter."

(c) MARKET DEVELOPMENT ACTIVITIES.—In order to improve the market development activities of the USDA, the following shall apply:

(1) In order to provide enhanced trade policy and international economic information, the Secretary is authorized to expand the number of agricultural counselors, attaches, assistant attaches, and other diplomatic representatives of the USDA overseas. The Secretary shall, to the maximum extent possible, assign agricultural marketing specialists or agricultural trade officers in overseas posts that offer short- or long-term market potential for United States agricultural commodities or products thereof and that are not served by an Agricultural Trade Office, agricultural trade officer, or agricultural marketing specialist.

(2) The Secretary shall assist departments of agriculture of the States in supporting the export efforts of private companies, including the stationing of marketing specialists in States or regions as a part of the normal rotation of these specialists between Washington, D.C. and overseas locations.

(d) AMENDMENT TO THE AGRICULTURAL TRADE AND EXPORT POLICY COMMISSION ACT.—Section 1224 of the Agricultural Trade and Export Policy Commission Act (Public Law 98-412) is amended by striking "sixty" and inserting "ninety".

SEC. 315. AGRICULTURAL TRADE RESEARCH AND REPORTS.

(a) RESEARCH.—There are authorized to be appropriated to the Secretary of Agriculture such sums as may be necessary to conduct research that would enhance the long-term competitiveness in world markets of United States agricultural commodities and the products thereof.

(b) REPORTS.—The Secretary of Agriculture shall—

(1) monitor research and trade practices carried out by foreign countries to promote the export of agricultural commodities and the products thereof; and

(2) report annually to the Congress concerning—

(A) trends in the comparative position of the United States and foreign countries in the export of agricultural commodities and the products thereof, organized by major commodity group and including a comparative analysis of the cost of production of such commodities and products;

(B) new developments in research conducted by foreign countries that may affect the competitiveness of United States agricultural commodities and the products thereof;

(C) the level of subsidies provided by foreign countries and the United States to promote the export of agricultural commodities and the products thereof; and

(D) the marketing in nonmarket economies of United States agricultural commodities and the products thereof.

SEC. 316. EXPORT-IMPORT BANK.

(a) FINDINGS.—The Congress makes the following findings:

(1) The actual level of support provided by the Export-Import Bank to United States exporters has decreased significantly since 1980, including a reduction from $5,400,000,000 in direct loans in fiscal year 1981 to $1,500,000,000 in direct loans in fiscal year 1984.

(2) The value of nonagricultural United States exports supported by the Export-Import Bank, in relation to all such exports, has also declined consistently during the last 5 years, from approximately 13 percent in 1980 to approximately 7 percent in 1985.

(3) The level of official financing provided by the governments of other industrialized countries to their exporters is typically from 25 to 40 percent of the nonagricultural exports from those countries.

(4) The programs of the Export-Import Bank, especially the direct loan program, enable United States exporters to compete in world markets on the basis of quality, price, and service, and are often crucial to the success of export endeavors. Export-Import Bank programs are particularly important for high technology products and large scale projects that are very capital intensive or that require longer terms.

(b) STATEMENT OF POLICY.—It is the sense of the Congress that the availability of adequate and flexible financing provided by the United States Government for United States exports contributes to the maintenance and expansion of United States exports and at the same time can serve to reverse the trend toward overseas production.

SEC. 317. COUNTRY REPORTS ON ECONOMIC POLICY AND TRADE PRACTICES.

The Secretary of State shall, not later than January 31 of each year, prepare and transmit to the Committee on Foreign Affairs and the Committee on Ways and Means of the House of Representatives, and to the Committee on Foreign Relations and the Committee on Finance of the Senate a detailed report regarding the economic policy and trade practices of each country with which the United States has an economic or trade relationship. The Secretary may direct the appropriate officers of the Department of State who are serving overseas, in consultation with appropriate officers or employees of other departments and agencies of the United States, including the Department of Agriculture and the Department of Commerce, to coordinate the preparation of such information in a country in order to prepare the report under this section. The report shall identify and describe, with respect to each country—

(1) the macroeconomic policies of the country and their impact on the overall growth in demand for United States exports;

(2) the impact of macroeconomic and other policies on the exchange rate of the country and the resulting impact on price competitiveness of United States exports;

(3) any change in structural policies (including tax incentives, regulations governing financial institutions, production standards, and patterns of industrial ownership) that may affect the country's growth rate and its demand for United States exports;

(4) the management of the country's external debt and its implications for trade with the United States;

(5) acts, policies, and practices that constitute significant barriers to United States exports or foreign direct investment in that country by United States persons, as identified under section 181(a)(1) of the Trade Act of 1974 (19 U.S.C. 2241(a)(1));

(6) acts, policies, and practices that provide direct or indirect government support for exports from that country;

(7) the extent to which the country's laws and enforcement of those laws afford adequate protection to United States intellectual property, including patents, trademarks, copyrights, and mask works; and

(8) the country's laws and enforcement of those laws with respect to internationally recognized worker rights (as defined in section 502(a)(4) of the Trade Act of 1974), the conditions of worker rights in any sector which produces goods and in which United States capital is invested and the extent of such investment, and the extent to which the goods produced under these conditions are imported into the United States.

SEC. 318. AUTHORIZATION OF APPROPRIATIONS.

Section 203 of the Export Administration Amendments Act of 1985, as redesignated by section 104(a)(1) of this Act, is amended (effective October 1, 1986) by striking "$113,273,000 for each of the fiscal years 1985 and 1986" and inserting "$123,922,000 for each of the fiscal years 1987 and 1988".

Subtitle B—Export Controls

SEC. 321. OIL EXPORTS TO NONCONTIGUOUS COUNTRIES.

Section 7(d)(1) of the Export Administration Act of 1979 (50 U.S.C. App. 2406(d)(1)) is amended to read as follows: "(1) No domestically produced crude oil may be exported from the United States, subject to paragraph (2) of this subsection. The prohibition contained in the preceding sentence shall not apply to—

"(A) crude oil which is exported to an adjacent foreign country to be refined and consumed in that country in exchange for the same quantity of crude oil being exported from that country to the United States; except that, with respect to domestically produced crude oil transported by pipeline over rights-of-way granted pursuant to section 203 of the Trans-Alaska Pipeline Authorization Act (43 U.S.C. 1652), such exchange must result through convenience or increased efficiency of transportation in lower prices for consumers of petroleum products in the United States as described in paragraph (2)(A)(ii) of this subsection, or

"(B) crude oil which is temporarily exported for convenience or increased efficiency of transportation across parts of an adjacent foreign country and reenters the United States.".

SEC. 322. NATIONAL SECURITY CONTROLS.

(a) MULTIPLE LICENSE AUTHORITY.—Section 4(a)(2)(A) of the Export Administration Act of 1979 (50 U.S.C. App. 2403(a)(2)(A)) is amended in the first sentence by inserting "(except the People's Republic of China)" after "controlled countries".

(b) AUTHORITY FOR REEXPORTS.—Section 5(a) of such Act (50 U.S.C. App. 2404(a)) is amended by adding at the end the following:

"(4) No authority or permission to reexport any goods subject to the jurisdiction of the United States may be required—

"(A) to or from any country which maintains export controls on such goods cooperatively with the United States pursuant to the agreement of the group known as the Coordinating Committee or pursuant to an agreement described in subsection (k) of this section, except that the Secretary may require a license for the reexport of such goods to such end users as the Secretary may specify by regulation, or

"(B) from any country when the goods to be reexported are incorporated in other goods and—

"(i) do not exceed $10,000 in value, and

"(ii) do not constitute more than 20 percent of the value of the goods in which they are incorporated.".

(c) EXPORTS OF LOW TECHNOLOGY ITEMS.—Section 5(b)(2) of such Act (50 U.S.C. App. 2404(b)(2)) is amended to read as follows:

"(2) No authority or permission to export may be required under this section for the export to any country other than a controlled country of any goods or technology which is at such a level of performance characteristics that the export of the goods or technology, were it made pursuant to the agreement of the group known as the Coordinating Committee, would require only notification of participating governments of the Committee. The Secretary may require any person exporting any such goods or technology to a country other than a controlled country to notify the Department of Commerce of those exports.".

(d) LIST REVIEWS.—

(1) CONTROL LIST.—Section 5(c)(3) of such Act (50 U.S.C. App. 2404(c)(3)) is amended—

(A) in the first sentence—

(i) by striking "shall review" and inserting "shall conduct partial reviews of"; and

(ii) by striking "year" and inserting "calendar quarter";

(B) in the second sentence—

(i) by striking "annual" the first place it appears and inserting "quarterly"; and

(ii) by striking "annual" the second place it appears;

(C) in the third and fifth sentences by striking "such" and inserting "each"; and

(D) by adding at the end the following: "All goods and technology on the list shall be reviewed at least once each year.".

(2) LIST OF MILITARILY CRITICAL TECHNOLOGIES.—Section 5(d)(5) of such Act (50 U.S.C. App. 2404(d)(5)) is amended in the first sentence by striking "at least annually" and inserting "on an ongoing basis".

(e) CONTROL LIST REDUCTION.—Section 5(c) of such Act (50 U.S.C. App. 2404(c)) is amended by adding at the end the following:

"(4) The Secretary, in consultation with the Secretary of Defense, shall, on the basis of subsections (b)(2), (f), (g), and (m) of this section, and on the basis of such other criteria and procedures as the Secretary, in consultation with the Secretary of Defense, considers appropriate, identify those goods subject to export controls under this section which contribute least directly to the military potential of any controlled country and which in the aggregate constitute approximately 40 percent of all goods subject to export controls under this section. The goods so identified shall include all medical instruments and equipment, and goods so widely available to the general public in retail outlets that the export controls on those goods are rendered ineffective in achieving their purpose. The number of goods subject to export controls under this section shall be determined on the basis of Schedule B of the Statistical Classification of Domestic and Foreign Commodities Exported by the United States (as issued by the Bureau of the Census). The Secretary shall submit to the Congress and to the Coordinating Committee, within 1 year after the date of the enactment of this subsection, a list of the goods identified under the first sentence (by the Schedule B number referred to in the third sentence), together with the total number of goods subject to export controls under this section. Notwithstanding any other provision of this Act, of the total number of goods subject to export controls under this section (as submitted under the preceding sentence)—

"(A) 10 percent of such goods, as identified by the Secretary at the time the list is submitted, shall, 90 days after the date of submission of the list, no longer be subject to export controls under this section and shall, at the end of that 90-day period, be removed from the control list;

"(B) an additional 10 percent of such goods, as identified by the Secretary at the time the list is submitted, shall, 1 year after the end of the 90-day period referred to in subparagraph (A), no longer be subject to export controls under this section and shall, at the end of that 1-year period, be removed from the control list; and

"(C) an additional number of such goods, constituting approximately 20 percent of such goods, shall, 2 years after the end of the 90-day period referred to in subparagraph (A), no longer be subject to export controls under this section and shall, at the end of that 2-year period, be removed from the control list,

except to the extent a law is enacted retaining export controls on any goods referred to in subparagraph (A), (B), or (C), as the case may be.".

(f) FOREIGN AVAILABILITY.—

(1) AVAILABILITY IN PARTICULAR COUNTRIES.—Section 5(f) of the such Act (50 U.S.C. 2404(f)) is amended—

(A) in the first sentence of paragraph (1) by inserting "including sources within any such country and" after "sources outside the United States,";

(B) in the second sentence of paragraph (1)—

(i) by striking "controlled countries" and inserting "a country to which exports are controlled under this section"; and

(ii) by inserting "to that country" before "during the period of such foreign availability";

(C) in paragraph (4), by inserting in the first sentence "with respect to controlled countries (other than the People's Republic of China)" after "maintained under this section";

(D) by redesignating paragraphs (5) through (7) as paragraphs (6) through (8), respectively; and

(E) by inserting after paragraph (4) the following:

"(5) In any case in which export controls on goods or technology are maintained under this section with respect to the People's Republic of China or any other coun-

try other than a controlled country notwithstanding foreign availability to that country, on account of a determination of the President that the absence of the controls would prove detrimental to the national security of the United States, the Secretary of State shall actively pursue negotiations under subsection (k) with the government of the country involved. One goal of such negotiations shall be to secure the cooperation of that country in imposing and enforcing export controls, comparable to those imposed under this section, on the export of the goods or technology with respect to which there is foreign availability to that country. If an agreement is reached pursuant to such negotiations and the Secretary of State determines, 1 year after the country involved has maintained such export controls, that such controls are comparable to those imposed under this section, Secretary may not, while that determination is effective, require a validated license for the export of the goods or technology involved to that country.".

(2) FOREIGN AVAILABILITY DETERMINATIONS.—Section 5(f)(3) of such Act (50 U.S.C. App. 2404(f)(3)) is amended by inserting after the second sentence the following:

"In a case in which an allegation is received from an export license applicant, the Secretary shall respond in writing to the applicant, and publish in the Federal Register, within 30 days after receipt of the allegation, that—

"(A) the foreign availability does exist and the requirement of a validated license has been removed or the applicable steps are being taken under paragraph (4) or (5);

"(B) the foreign availability may exist but further examination of the issue is necessary in order to make a determination; or

"(C) the foreign availability does not exist.

In the case in which subparagraph (B) applies, the Secretary shall, within 6 months after the initial response and publication, respond in writing to the applicant and publish in the Federal Register, that—

"(i) the foreign availability does exist and the requirement of a validated license has been removed or the applicable steps are being taken under paragraph (4) or (5); or

"(ii) the foreign availability does not exist.

In any case in which the publication is not made within that 6-month period, the Secretary may not require a license for the export of the goods or technology with respect to which the foreign availability allegation was made.".

(3) TECHNICAL ADVISORY COMMITTEE DETERMINATIONS.—Section 5(h)(6) of such Act (50 U.S.C. App. 2404(h)(6)) is amended—

(A) in the first sentence by striking "controlled countries, from sources outside the United States," and inserting "a country to which exports are controlled under this section, from sources outside the United States, including sources within any such country and";

(B) in subparagraph (A) by inserting "to the country involved" after "goods or technology";

(C) in subparagraph (B) by striking "or" and inserting "in a case in which foreign availability exists to controlled countries (other than the People's Republic of China),";

(D) by redesignating subparagraph (C) as subparagraph (D); and

(E) by inserting after subparagraph (B) the following:

"(C) negotiations in accordance with subsection (f)(5) are being conducted in the case of foreign availability to the People's Republic of China or any other country other than a controlled country, or".

(4) TECHNICAL AMENDMENT.—Section 14(a)(8) of such Act (50 U.S.C. App. 2413(a)(8)) is amended by striking "5(f)(5)" and inserting "5(f)(6)".

(g) DEFINITION OF AVAILABILITY.—Section 5 of such Act (50 U.S.C. App. 2404) is amended by adding at the end the following:

"(r) AVAILABILITY DEFINED.—For purposes of subsections (d), (f), and (h) of this section, the term 'available in fact to controlled countries' includes availability of any goods or technology in any country—

"(1) from which the goods or technology is not restricted for export to any controlled country; or

"(2) in which such export restrictions are determined by the Secretary of Commerce to be ineffective.".

(h) INDUSTRY REPRESENTATIVE TO COCOM.—Section 5(i) of such Act (50 U.S.C. App. 2404(i)) is amended by adding at the end the following:

"For purposes of reviews of the list referred to in paragraph (1), the President shall include as part of the United States delegation to the Coordinating Committee representatives of industry who are knowledgeable with respect to the items being reviewed.".

SEC. 323. ENFORCEMENT.

Section 12(a)(2)(B) of the Export Administration Act of 1979 (50 U.S.C. App. 2411(a)(2)(B)) is amended by adding at the end the following: "The Customs Service may not seize or detain for more than 10 days any shipment of goods or technology which the Secretary has determined are eligible for export under a general license under section 4(a)(3).".

SEC. 324. AUTHORIZATION OF APPROPRIATIONS.

(a) IN GENERAL.—Section 18(b) of the Export Administration Act of 1979 (50 U.S.C. App. 2417(b)) is amended to read as follows:

"(b) AUTHORIZATION.—There are authorized to be appropriated to the Department of Commerce to carry out the purposes of this Act—

"(1) $40,935,000 for the fiscal year 1987, of which $12,746,000 shall be available only for enforcement, $2,000,000 shall be available only for foreign availability assessments under subsections (f) and (h)(6) of section 5, and $26,189,000 shall be available for all other activities under this Act;

"(2) $40,935,000 for the fiscal year 1988, of which $12,746,000 shall be available only for enforcement, $2,000,000 shall be available only for foreign availability assessments under subsections (f) and (h)(6) of section 5, and $26,189,000 shall be available for all other activities under this Act; and

"(3) such additional amounts for each of the fiscal years 1987 and 1988 as may be necessary for increases in salary, pay, retirement, other employee benefits authorized by law, and other nondiscretionary costs.".

(b) ENFORCEMENT ACTIVITIES OF THE CUSTOMS SERVICE.—Section 12(a)(6) of the Export Administration Act of 1979 (50 U.S.C. App. 2411(a)(6)) is amended by striking "$12,000,000 in the fiscal year 1985 and not more than $14,000,000 in the fiscal year 1986" and inserting "$14,000,000 in the fiscal year 1987 and not more than $14,000,000 in the fiscal year 1988".

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect on October 1, 1986.

SEC. 325. GAO REPORT.

The Comptroller General of the United States shall conduct an evaluation of activities of the Department of Defense conducted pursuant to the Presidential Directive of January 4, 1985, regarding the review of export license applications, under the Export Administration Act of 1979, for the export of goods and technology to countries other than controlled countries. One purpose of the study is to determine if Department of Defense activities provide information about the diversion of United States technology from sources outside the United States to controlled countries that would not otherwise be available to other agencies with enforcement responsibilities under that Act. The study shall include a review of all Department of Defense activities in determining export control policy, making foreign availability determinations, and reviewing the control list, and the relationship between the Department of Defense and other agencies responsible for implementing the Export Administration Act of 1979. In conducting the study, the Comptroller General shall make a special effort to gather information from United States exporters, particularly those that have had applications for proposed exports to countries other than controlled countries reviewed by the Department of Defense. The Comptroller General shall submit a report on the evaluation to the Congress not later than 6 months after the date of the enactment of this Act. If necessary, the report may be submitted on a classified basis.

Subtitle C—Debt, Development, and World Growth

SEC. 331. INTERNATIONAL NEGOTIATIONS.

(a) MULTILATERAL NEGOTIATIONS.—The President and the Secretary of the Treasury shall take the necessary steps to continue ongoing negotiations with West Germany, the United Kingdom, France, and Japan, as well as to initiate negotiations with other countries through appropriate multilateral organizations, including the Organization for Economic Cooperation and Development, the United Nations, and the International Monetary Fund, in order to—

(1) coordinate macroeconomic policies of the major industrial countries so as to promote stable exchange rates and growth patterns;

(2) achieve expansionist economic policies and agreements which have the specific purpose of increasing the size of the market for exports from the United States and developing countries;

(3) promote growth-oriented economic policies in both developed and developing countries;

(4) encourage both developed and developing countries to base growth on a balance of foreign and domestic demand and to discourage excessive reliance by those countries on exports for growth; and

(5) advise the trading partners of the United States that the United States is prepared to retaliate against countries, in an equivalent manner, in cases involving unfair trade practices.

(b) INTERNATIONAL ECONOMIC OR TRADE DISCUSSIONS.—

(1) DECLARATION OF THE UNITED STATES OBJECTIVE.—The Congress hereby declares that a key objective of the United States in its participation in economic summits and international meetings on economics or trade is to obtain the agreement of the participants in any such summit or meeting to adopt growth-oriented national economic

policies and to take such actions as may be necessary to increase the size of the market for exports from the United States and developing countries.

(2) EXECUTIVE ACTIONS.—The President and the Secretaries of the Treasury and State shall seek to place discussions with respect to the agreement described in paragraph (1) on the agenda of any economic summit or international economic meeting to which the United States is a party and shall report to the Congress on any success they may have had in achieving such agreement at any such meeting.

SEC. 332. TRADE LIBERALIZATION IN DEVELOPING COUNTRIES.

(a) SENSE OF CONGRESS.—It is the sense of the Congress that increases in the development of, and the achievement of prosperity for, developing countries and the recovery of the economic strength of the United States and the other industrialized countries can only be assured if world trade is expanded and market access for all countries is increased.

(b) DECLARATION OF POLICY.—The Congress declares it to be the policy of the United States that any foreign assistance provided by the United States to developing countries shall be consistent with and supportive of long-term trade liberalization in those countries.

SEC. 333. OVERSEAS PRIVATE INVESTMENT CORPORATION.

(a) REAFFIRMATION OF SUPPORT FOR OPIC.—The Congress reaffirms its support for the Overseas Private Investment Corporation as a United States Government agency serving important development assistance goals. In order to enhance the Corporation's ability to meet these goals, the Overseas Private Investment Corporation should increase its loan guaranty and direct investment programs.

(b) INCREASE IN GUARANTIES AND DIRECT INVESTMENTS.—

(1) LOAN GUARANTIES.—Section 235(a) of the Foreign Assistance Act of 1961 (22 U.S.C. 2195(a)) is amended—

(A) by redesignating paragraph (5) as paragraph (6); and

(B) by inserting after paragraph (4) the following:

"(5) Subject to paragraphs (2), (3), and (4), the Corporation shall issue at least $200,000,000 in guaranties under section 234(b) in each fiscal year, to the extent that there are eligible projects which meet the Corporation's criteria for such guaranties.".

(2) DIRECT INVESTMENT.—Section 235(b) of the Foreign Assistance Act of 1961 is amended—

(A) by striking the comma after "Act of 1981" and inserting a period; and

(B) by striking "and the Corporation shall use" and all that follows through "funding" and inserting the following:

"The Corporation shall make loans in amounts of not less than $25,000,000 under section 234(c) in each fiscal year, to the extent that there are eligible projects which meet the Corporation's criteria for such loans".

(c) INCREASE IN STAFF.—In increasing the guarantee and direct investment programs provided by the amendments made by subsection (b), the Congress expects that the Overseas Private Investment Corporation will increase its professional and administrative staff to the extent necessary to administer fully those expanded programs.

SEC. 334. TRADE AND DEVELOPMENT PROGRAM.

(a) REAFFIRMATION OF SUPPORT FOR TRADE AND DEVELOPMENT PROGRAM.—The Congress reaffirms its support for the Trade and Development Program, and believes that the Program's ability to support high priority development projects in developing countries would be enhanced by an increase in the funds authorized for the Program as well as by a clarification of the Program's status as a separate component of the International Development Cooperation Agency.

(b) INCREASE IN AUTHORIZATION AND ESTABLISHMENT AS SEPARATE AGENCY.—Section 661 of the Foreign Assistance Act of 1961 (22 U.S.C. 2421) is amended—

(1) in subsection (b)—

(A) by striking "(b)" and inserting "(c)"; and

(B) by striking "$20,000,000 for fiscal year 1987" and inserting "$25,000,000 for fiscal year 1987"; and

(2) by inserting after subsection (a) the following:

"(b) The purposes of this section shall be carried out by the Trade and Development Program, which shall be a separate component agency of the International Development Cooperation Agency. The Trade and Development Program shall not be an agency within the Agency for International Development or any other component agency of the International Development Cooperation Agency.".

SEC. 335. COUNTERTRADE.

(a) FINDING.—The Congress finds that developing countries are relying increasingly on countertrade as a means of sustaining imports as well as foreign markets in the short-term, and as a means of developing new export industries and exploiting underdeveloped natural resources in the long-term.

(b) ESTABLISHMENT OF INTERAGENCY GROUP.—The President shall establish an interagency group on countertrade, to be composed of such Government departments and agencies as the President considers appropriate. The Secretary of Commerce shall be the chairman of the interagency group. The interagency group shall review United States policy on countertrade and shall make recommendations to the President and the Congress on the use of countertrade as a mechanism for enhancing bilateral United States foreign economic assistance programs and on expanding the information available on countertrade, including information on export opportunities.

Subtitle D—Protection of United States Business Interests Abroad

SEC. 341. PROTECTION OF UNITED STATES INTELLECTUAL PROPERTY.

It is the sense of the Congress that—

(1) the Secretary of State, the United States Trade Representative, and the relevant United States Ambassadors should engage in immediate discussions with the appropriate countries to reduce instances of piracy of copyrights, patents, and mask works and counterfeiting of trademarks, to obtain adherence to existing international conventions for the protection of copyrights, patents, and trademarks, to work toward the development of an international convention for mask works, and to gain the participation and support of those countries in the development of international intellectual property codes in future multilateral trade negotiations;

(2) the Secretary of State should urge international technical organizations, such as the World Intellectual Property Organization, to provide expertise and cooperate fully in developing effective standards, in the General Agreement on Tariffs and Trade, for the international protection of intellectual property rights;

(3) the President should take immediate and forceful action against those countries which are not prepared to commit formally to immediate improvements in their protection of United States intellectual property; and

(4) development assistance programs administered by the Agency for International Development, especially the reimbursable development program, should, in cooperation with the Copyright Office and the Patent and Trademark Office, include technical training for officials responsible for the protection of patents, copyrights, trademarks, and mask works in those countries that receive such development assistance.

Subtitle E—Miscellaneous Provisions

SEC. 351. TRADING WITH THE ENEMY ACT.

(a) TERMINATION OF OFFICE OF ALIEN PROPERTY.—(1) The Trading with the Enemy Act is amended by striking subsections (b) through (e) of section 39 (50 U.S.C. App. 39) and inserting the following new subsection:

"(b) The Attorney General shall cover into the Treasury, to the credit of miscellaneous receipts, all sums from property vested in or transferred to him under this Act—

"(1) which he receives after the date of the enactment of the Export Enhancement Act of 1986, or

"(2) which he received before that date and which, as of that date, he had not covered into the Treasury for deposit in the War Claims Fund, other than any such sums which the Attorney General determines in his discretion are the subject matter of any judicial action or proceeding.".

(2) Subsection (f) of such section is amended—

(A) by striking "(f)" and inserting "(c)"; and

(B) by striking "through (d)" and inserting "and (b)".

(b) REMOVAL OF REPORTING REQUIREMENT.—Section 6 of such Act (50 U.S.C. App. 6) is amended in the next to last sentence by striking ": *Provided further,*" and all that follows through the end of the section and inserting a period.

(c) IMPORTATION OF PUBLICATIONS, ETC.—Section 5(b) of such Act (50 U.S.C. App. 5(b)) is amended by adding at the end the following new paragraph:

"(4) The authority granted to the President in this subsection does not include the authority to regulate or prohibit directly or indirectly the importation (commercial or otherwise) of publications, films, posters, phonograph records, photographs, microfilms, microfiche, tapes, or other informational materials from any country.".

SEC. 352. BUDGET ACT.

Any new spending authority (within the meaning of section 401 of the Congressional Budget Act of 1974) which is provided under this title shall be effective for any fiscal year only to the extent or in such amounts as are provided in appropriation Acts.

TITLE IV—BANKING COMMITTEE PROVISIONS

Subtitle A—Competitive Exchange Rate Act of 1986

SEC. 401. SHORT TITLE.

This subtitle may be cited as the "Competitive Exchange Rate Act of 1986".

SEC. 402. FINDINGS AND PURPOSES.

(a) FINDINGS.—The Congress hereby finds that—

(1) the continuing United States merchandise trade deficit, which is projected to exceed $140,000,000,000 in 1985, jeopardizes the competitive position of many United States industries;

(2) the agriculture and basic manufacturing sectors of the economy and even the best firms in the high technology industry and service sector are losing markets to foreign competitors which, once lost, are not easily regained;

(3) an important factor contributing to our current trade crisis has been the United States dollar, the rise in which over earlier years contributed substantially to our current trade deficit;

(4) the foreign indebtedness of the United States is rapidly escalating as the United States—

(A) has gone from being a $150,000,000,000 net creditor nation as of the end of 1982 to being a debtor nation; and

(B) is continuing to go further into debt at the rate of $10,000,000,000 per month;

(5) a sudden and severe drop in the dollar would reignite inflation and increase interest rates which could choke off our economic recovery;

(6) a relatively stable exchange rate for the dollar at competitive levels is desirable and should be encouraged;

(7) coordinated intervention which is reinforced by changes in domestic economic policy can, under appropriate circumstances, shift exchange rates in desirable directions;

(8) developments since the September 22, 1985, meeting of the United States, Japan, West Germany, France, and the United Kingdom (commonly known as the Group of Five) are a promising example of such intervention;

(9) the actual exchange rate of the dollar cannot be brought into alignment with its competitive exchange rate unless—

(A) the Federal budget deficit is reduced;

(B) some modification is made in the existing international exchange rate system; and

(C) the macroeconomic policies of the major industrialized nations are well coordinated;

(10) it would be useful to supplement the efforts described in paragraph (9) with appropriate strategic intervention by the United States in foreign exchange markets as part of a coordinated international strategic intervention effort involving the other major industrialized countries;

(11) the Secretary of the Treasury and the Board of Governors of the Federal Reserve System should—

(A) cooperate with the other major industrialized countries in the international currency markets, and

(B) use appropriate strategic intervention to the extent required to achieve and maintain the exchange rate of the dollar at a level that reflects international competitive relationships;

(12) the Secretary of the Treasury has major responsibility within the executive branch for—

(A) formulating domestic economic policy;

(B) representing the United States in international economic negotiations regarding exchange rates and coordination of domestic economic policies; and

(C) intervening on behalf of the United States in currency markets;

(13) in the past, Congress has established negotiating priorities for representatives of the United States to international trade negotiations; and

(14) the United States currently lacks a forum for discussion of policies affecting the exchange rates of the dollar.

(b) PURPOSES.—The purposes of this subtitle are—

(1) to encourage the President to seek to confer and negotiate with other countries through an international conference to recommend proposals to reform the exchange rate system so as to obtain—

(A) better coordination of macroeconomic policies, and

(B) greater stability in trade and current account balances and in the exchange rates of the dollar and other currencies;

(2) to provide for internationally coordinated strategic intervention in currency markets, when appropriate, in order to adjust the exchange rates of the dollar and other currencies so as to ensure that American industry is competitive in world markets; and

(3) to increase the accountability of the President for the impact of exchange rates on trade competitiveness.

SEC. 403. INTERNATIONAL NEGOTIATIONS ON EXCHANGE RATE REFORM.

(a) POLICY.—A top priority of the United States in international economic negotiations shall be the achievement of a competitive exchange rate for the dollar.

(b) INTERNATIONAL CONFERENCE ON EXCHANGE RATE SYSTEM.—The President shall seek to confer and negotiate with other countries through an international conference on the exchange rate system, either through a newly created mechanism or an existing mechanism such as the International Monetary Fund or the Organization for Economic Cooperation and Development—

(1) to review the existing international exchange rate system;

(2) to develop a program for reform of that system to provide for long-term exchange rate stability and an agenda for implementing such program; and

(3) to recommend proposals to achieve—

(A) better coordination of macroeconomic policies of the major industrialized nations; and

(B) greater stability in trade and current account balances and in the exchange rates of the dollar and other currencies.

SEC. 404. STRATEGIC CURRENCY RESERVE.

(a) ESTABLISHMENT.—The Secretary shall establish a Strategic Currency Reserve within the stabilization fund established by section 5302(a)(1) of title 31, United States Code, consisting of assets denominated in foreign currencies purchased through intervention in the exchange markets. Such assets shall be accumulated and used as part of a coordinated international strategy to achieve competitive exchange rates for the dollar and other currencies and exchange rate stability.

(b) PURCHASES AND SALES OF FOREIGN CURRENCY.—The Secretary, in consultation with the Chairman of the Board, shall purchase and sell foreign currencies at such times as any such purchase or sale would be most effective and in such amounts as will not expose the Treasury to unacceptable losses—

(1) to offset speculative movements of the actual exchange rate of the dollar away from its competitive exchange rate; or

(2) to assist the gradual movement of the actual exchange rate of the dollar toward its competitive exchange rate.

(c) INTERNATIONAL COORDINATION.—Purchases and sales under subsection (b) shall be coordinated with other countries to the extent possible.

SEC. 405. REPORTING REQUIREMENTS.

(a) REPORTS REQUIRED.—In furtherance of the purposes of this subtitle, the Secretary, after consultation with the Chairman of the Board, shall submit to the Committee on Banking, Finance and Urban Affairs of the House of Representatives and the Committee on Banking, Housing, and Urban Affairs of the Senate, within 30 days of the enactment of this subtitle and on April 20 and September 20 of each year thereafter, independent written reports.

(b) CONTENTS OF REPORT.—Each report submitted under subsection (a) shall contain—

(1) a determination of the approximate changes in the actual exchange rate of the dollar which would be required, as of the time of the report, in order to attain a balance in the United States merchandise trade account and a balance in the United States current account;

(2) in any case in which the actual exchange rate of the dollar exceeds the exchange rate for the dollar which would be consistent with either a merchandise trade balance or a current account balance, an assessment of the effects such excess exchange rate has on production, employment, and international competitive performance among United States manufacturing, agricultural, and mining industries;

(3) an evaluation of the conditions that cause the actual exchange rate of the dollar to exceed the competitive exchange rate;

(4) recommendations for changing United States economic policy in order to attain an appropriate and sustainable balance in the current account, together with an assessment of the costs and benefits which would accompany any such change;

(5) any recommendation for changes in United States policies which was made by the International Monetary Fund on the occasion of the most recent consultation requested by such Fund under Article IV of the Fund's Articles of Agreement, together with an explanation of how the Secretary has implemented or plans to implement any such recommendations or why it is economically sound to ignore any such recommendation;

(6) a report on any progress made by the Secretary and any other officer or employee of the United States (in the United States or abroad) in—

(A) adjusting the actual exchange rate of the dollar toward its competitive exchange rate, including the effect of any intervention in foreign exchange markets on such actual exchange rate; and

(B) achieving long-term reform of the international exchange rate system to reduce instability and disequilibrium in exchange rates;

(7) a statement of the objectives and plans of the Secretary with respect to—

(A) the pursuit of domestic economic policies which are consistent with the achievement of an appropriate and sustainable current account balance;

(B) the policy on intervention in foreign exchange markets; and

(C) any negotiations with other countries on any reform in the international exchange rate system,

including any obstacles that would delay any progress with regard to any such objective or plan;

(8) an assessment of the impact currency transactions under this subtitle have had on foreign exchange markets; and

(9) a detailed statement of the reasons for any lack of progress regarding international negotiations on the reform of the exchange rate system, and, if exchange rate reform negotiations have not gone forward by the beginning of any negotiations concerning the General Agreement on Tariffs and Trade, a detailed statement of the reason for the delay in such negotiating efforts.

(c) COUNTRY-BY-COUNTRY ANALYSIS.—

(1) IN GENERAL.—Each report under subsection (a) shall also contain an analysis of—

(A) the extent to which the actual exchange rate of the currency of each country described in paragraph (2) differs from the competitive exchange rate of each such currency; and

(B) any trend or policy which affects any such exchange rate or the international capital flows between or among any such countries and the United States.

(2) PARAGRAPH (2) COUNTRIES.—The countries referred to in paragraph (1) are Canada, Japan, Germany, and any other country with which the United States has substantial bilateral trade competition or bilateral capital flows.

(d) CONSULTATION WITH CONGRESS.—The Secretary shall consult with the Committee on Banking, Finance and Urban Affairs of the House of Representatives and the Committee on Banking, Housing, and Urban Affairs of the Senate on the report after the report has been received by the respective Committees. After receiving such report and consulting with the Secretary, each such Committee shall submit to its respective body a report containing its view and recommendations with respect to the Secretary's intended policies.

SEC. 406. CONGRESSIONAL RECOGNITION OF THE RECOMMENDATIONS OF THE INTERNATIONAL MONETARY FUND.

Upon completion of any consultation with the United States requested by the International Monetary Fund under Article IV of the Fund's Articles of Agreement, the Secretary shall transmit to the Congress—

(1) all official United States documents submitted to the Fund in the course of that consultation; and

(2) all official Fund documents arising from that consultation.

SEC. 407. DEFINITIONS.

For purposes of this subtitle—

(1) SECRETARY.—The term "Secretary" means the Secretary of the Treasury.

(2) BOARD.—The term "Board" means the Board of Governors of the Federal Reserve System.

(3) COMPETITIVE EXCHANGE RATE.—The term "competitive exchange rate" means the set of exchange rates that would be consistent with an appropriate and sustainable balance in the current account, as determined by the Secretary based on an appropriate methodology that takes into account the appropriate factors which provide the most opportune prospect for economic growth in the United States.

Subtitle B—International Debt, Trade, and Financial Stabilization Act

CHAPTER 1—SHORT TITLE; PURPOSES; AND DEFINITIONS

SEC. 411. SHORT TITLE.

This subtitle may be cited as the "International Debt, Trade, and Financial Stabilization Act".

SEC. 412. PURPOSES.

The purposes of this subtitle are as follows:

(1) Alleviate the current international debt crisis in order to make the debt situation of developing countries more manageable and permit the resumption of sustained growth in those countries.

(2) Expand the world trading system and raise the level of exports from the United States to the developing countries in order to reduce the United States trade deficit and foster economic expansion and an increase in the standard of living in the developing nations.

(3) Increase the stability of the world financial system and insure the safety and soundness of United States depository institutions.

(4) Provide a clear statement of support for the United States debt initiative for the heavily indebted developing countries, including an expanded role for the World Bank and other multilateral development banks in resolving the current debt crisis and achieving sustained growth and development for the developing nations.

(5) Provide explicit directions to the President and the Secretary of the Treasury about the initiatives which should be undertaken by the United States to resolve the international debt crisis and achieve the twin goals of enhancing the stability of the world financial system and expanding world trade and development.

SEC. 413. DEFINITIONS.

For purposes of this subtitle—

(1) MULTILATERAL DEVELOPMENT BANK.—The term "multilateral development bank" means the International Bank for Reconstruction and Development, the Inter-American Development Bank, the African Development Bank, and the Asian Development Bank.

(2) WORLD BANK.—The term "World Bank" means the International Bank for Reconstruction and Development.

(3) STRUCTURAL ADJUSTMENT LENDING.—The term "structural adjustment lending" means lending for broad macroeconomic stability and in support of structural economic reforms, including lending for trade liberalization, mobilization of domestic and foreign capital, and institutional reform to expand the private sector.

(4) TRADE AND INVESTMENT LIBERALIZATION.—The term "trade liberalization" means the reduction of tariff and non-tariff barriers to imports and the reduction of barriers to foreign direct and portfolio investment.

CHAPTER 2—MEASURING THE IMPACT OF THE DEBT CRISIS ON WORLD TRADE, DEVELOPMENT, AND FINANCIAL STABILITY

SEC. 416. FINDINGS.

The Congress hereby finds the following:

(1) The indebtedness of developing countries represents a grave threat to—

(A) the health and viability of the world trading system because it prevents sustained growth in the developing world while seriously eroding the trading posture and the economic well-being of the United States; and

(B) the stability of the international financial system and the safety and soundness of United States depository institutions.

(2) With respect to trade—

(A) the United States trade deficit with developing countries, which amounted to $53,000,000,000 in 1984, has cost over 1,000,000 jobs in the United States since 1980;

(B) the burden of public and private debt now borne by the developing nations—

(i) seriously limits their capacity to import goods and service from the United States; and

(ii) is a major contributing factor to the current United States trade deficit;

(C) since the beginning of the debt crisis in 1982, the developing nations have relied heavily on import substitution and export promotion to improve their own balance of payments which has exacerbated the United States trade deficit with the developing nations, thereby fueling the pressures within the United States for protectionist legislation;

(D) the developing nations were the fastest-growing market for United States goods before the debt crisis began and they remain the largest future potential market for United States exports; and

(E) trade and investment barriers must be decreased in developing countries if United States exports are to expand and if those nations are to resume sustained growth.

(3) With respect to the stability of the world financial system—

(A) the amount of the debt which developing countries owe to both private and public creditors is now approaching $900,000,000,000 which constitutes a debt service burden on the developing countries which is politically unsustainable and potentially disruptive to the world financial system;

(B) the amount of the debt which developing countries owe to commercial banks worldwide is over $600,000,000,000 of which $134,000,000,000 is owed to commercial banks in the United States;

(C) the exposure of the 100 largest United States banks to developing country debt is equal to 110 percent of the aggregate equity capital of those banks and the exposure of certain major United States banks exceeds that ratio;

(D) the indebtedness of developing countries has doubled since 1980;

(E) much of the proceeds of commercial loans which were made to the developing nations in the 1970's and early 1980's was used for purposes which did not increase the capital generating capacity of the borrowing nations with the result that some of these borrowers cannot manage their debt on the terms originally negotiated; and

(F) the debt service requirements of the debt of developing countries have resulted in a net transfer of capital from the developing countries to the industrialized nations since 1982 (in 1984 alone, the developing nations sent almost $15,000,000,000 more back to the developed world than they received) and this capital flow situation cannot be sustained over the long term.

(4) Partly because the markets for raw commodities upon which the economies of the nonindustrialized nations are necessarily dependent are expected to remain depressed over the next few years, the problems associated with the debt service burdens of developing countries are likely to grow worse without sustained cooperative efforts on the part of the developing and developed countries;

(5) The recent and dramatic drop in the price of oil, which will benefit most developing countries, will increase financing difficulties for some debtor countries, such as Mexico.

(6) Capital flight, which has been caused in part by—

(A) a lack of domestic confidence in the economies of developing countries, particularly the financial sectors of such economies; and

(B) United States fiscal and monetary policies in effect since 1980 which have resulted in an overvalued dollar, excessive def-

icit spending, and historically high real interest rates,

is another component of the problem confronting the debtor developing countries and credible estimates suggest that if, in the case of at least some of the developing countries, the indigenous capital which is now held abroad were repatriated to such countries, those countries would have a significantly lower external debt.

(7) Indebted developing countries have significantly improved their current account balances since the beginning of the debt crisis, but such improvements have been made at the cost of—

(A) declining standards of living which fail to provide for the basic human needs of the citizens of such countries with a concomitant rise in political discontent; and

(B) an exacerbated trade deficit for the United States with a concomitant rise in protectionist sentiment.

(8) The debt initiative unveiled by the Secretary of the Treasury James Baker in Seoul, Korea, in October of 1985 was a positive shift in United States policy toward an emphasis on the need for achieving growth in the debtor nations through—

(A) the adoption of sound, growth-oriented economic policies by the debtor nations;

(B) an increase in world trade; and

(C) increased and more effective project and adjustment lending by the multilateral development banks and increased lending by the commercial banks;

(9) If the debt initiative is to achieve its stated goals, the Congress must act to provide a clear statement of United States policy on international debt management and trade liberalization and to provide direction to the President and other executive officers of the United States in carrying out such policy.

(10) A resolution of the current international debt problem will require—

(A) an increase in the flow of private capital, in both debt and equity form, to the developing countries; and

(B) an increase in the role played by the public sector and the commercial financial institutions in providing assistance to the developing countries and in managing the international debt situation.

(11) The World Bank and the regional multilateral development banks are the appropriate institutions to lead and coordinate the international efforts to resolve the current developing country debt situation, but, to succeed, the multilateral development banks will—

(A) require additional resources;

(B) need to develop more innovative lending practices; and

(C) need the political support of the United States.

CHAPTER 3—INCREASING WORLD BANK EFFECTIVENESS

SEC. 421. RAPID LOAN DISBURSEMENTS.

In order to provide a rapid infusion of needed capital into developing countries—

(1) FULL RELEASE OF COMMITTED LOAN FUNDS AT BEGINNING OF PROJECT PERIOD.—The Secretary of the Treasury shall instruct the United States Executive Director of the World Bank to initiate discussions with other directors of such bank and to propose that a temporary adjustment be made in the current disbursement practices of such bank so as to permit, for a period of not more than 4 years, full release of committed loan funds to the central bank of any recipient country at the beginning of a project period, when such action is appropriate and is requested by the recipient country, to the extent that—

(A) adequate accounting safeguards can be maintained to insure that the terms of the respective loan agreements are honored; and

(B) the recipient country adequately describes how the accelerated disbursement of such funds will contribute to long-term economic growth.

(2) INCREASES IN MULTILATERAL DEVELOPMENT BANKS' SHARES OF PROJECT LOANS.—The Secretary of the Treasury shall instruct the United States Executive Directors of the multilateral development banks to initiate discussions with other Directors of their respective banks and to propose that each bank's share of any project loan already approved and awaiting disbursement should be immediately increased by such amount as the Directors of each such bank determine to be appropriate, taking into account the current ability of the recipient country to meet its counterpart funding requirements.

SEC. 422. STRUCTURAL ADJUSTMENT LENDING.

(a) DIRECTIONS TO UNITED STATES EXECUTIVE DIRECTOR OF THE WORLD BANK.—In order to promote the economic policy adjustments which are needed to assist developing countries, the Secretary of the Treasury shall instruct the United States Executive Director of the World Bank to initiate discussions with other directors of the bank and to propose that—

(1) an increase be made in the amount of structural adjustment lending by the World Bank and any percentage limitation on the number of structural adjustment loans in the World Bank's lending portfolio be removed, except that such Director shall make it clearly understood that United States policy does not favor the displacement or replacement of project lending by structural adjustment lending but the addition of structural adjustment lending to the bank's loan mix;

(2) appropriate action be taken by the bank to ensure that the aims of structural adjustment lending can be achieved;

(3) the conditionality of structural adjustment lending should include innovative requirements designed to minimize any adverse impact of such lending on the lowest income groups in the developing countries, including a requirement that each country receiving such lending establish a fund to be used for guaranteeing private loans to microenterprise borrowers within such country; and

(4) appropriate action be taken by the bank to ensure that structural adjustment lending is consistent with environmentally sound and responsible development practices that lead to sustainable long-term management of the natural resources of these countries.

(b) SMALL-SCALE CREDIT.—The Secretary of the Treasury shall instruct the United States Director of the World Bank to enter into negotiations with other Directors of such Bank and to propose that a fund be established within the World Bank for purposes of making small-scale credit available to lower income groups in developing countries which have had no access to such credit. To the extent appropriate, the extension of any credit through such fund to a borrower in a developing country should be coordinated with the guarantee fund described in subsection (a)(3) with respect to such country.

(c) REPORT BY THE SECRETARY OF THE TREASURY.—

(1) REPORT REQUIRED.—The Secretary of the Treasury shall, before the end of the 1-year period beginning on the date of the enactment of this subtitle and in conjunction with and consultation with the United States Executive Director of the World Bank, prepare and transmit a report to the Committee on Banking, Finance and Urban Affairs of the House of Representatives and the Committee on Foreign Relations of the Senate on the effectiveness of increased reliance on structural adjustment lending as a means of achieving economic reforms.

(2) CONTENTS OF REPORT.—The report prepared under paragraph (1) shall include—

(A) information about the extent to which structural adjustment lending has increased domestic savings rates, liberalized trade, encouraged direct investment in developing countries, and reduced capital flight; and

(B) economic and demographic data on the impact of structural adjustment lending on various income groups within the recipient countries, particularly the impact of such lending on the provision of resources to meet the basic human needs of the lowest income groups, including the need for adequate nutrition and basic health care.

SEC. 423. REDUCING CAPITAL FLIGHT.

(a) SENSE OF THE CONGRESS.—It is the sense of the Congress that—

(1) past and continuing transfers of capital from developing countries pose a problem of great importance for which a solution must be found before the international debt crisis can be resolved and economic growth in developing countries can be enhanced and sustained; and

(2) the United States Executive Director of the World Bank should—

(A) initiate discussions with other directors of the bank for the purpose of developing policy proposals for both developed countries and developing countries, respectively, which, if implemented, would reduce the level of capital transfers from the developing countries by enhancing incentives to invest in developing countries and thereby reduce the impact of such capital flight on the economies of such countries; and

(B) report any such proposal which is applicable with respect to the United States to the Secretary of the Treasury and the Chairman of the Board of Governors of the Federal Reserve System.

(b) INSTRUCTIONS TO UNITED STATES EXECUTIVE DIRECTORS OF MULTILATERAL DEVELOPMENT BANKS.—The Secretary of the Treasury shall instruct the United States Executive Directors of the multilateral development banks to initiate discussions with other directors of their respective banks and to propose that each such bank increase lending for the purpose of reforming the financial sectors of indebted developing countries with particular emphasis on increases in loans for activities which would have the effect of enlarging the capital markets and encouraging domestic savings in those countries.

SEC. 424. INCREASING WORLD BANK LENDING RESOURCES.

(a) WORLD BANK LENDING AFFILIATE.—The President shall initiate negotiations with other member nations of the World Bank—

(1) to provide for the establishment by the World Bank of a banking entity or affiliate for which the World Bank would initially provide $1,000,000,000 in capital from its own capital account;

(2) to authorize such banking entity or affiliate—

(A) to offer for public subscription such amount of stock in such entity or affiliate as the directors of the World Bank may determine to be appropriate; and

(B) to borrow such amounts as may be determined by the directors of the World Bank to be appropriate and to issue bonds, notes, and other evidence of indebtedness for the amounts borrowed; and

(3) to authorize such banking entity or affiliate to make or guarantee loans to the extent the total amount of disbursed or guaranteed loans outstanding at any time does not exceed an amount equal to 5 times the amount of capital and surplus of such entity or affiliate.

(b) STUDY AND REPORT BY THE SECRETARY OF THE TREASURY.—

(1) STUDY REQUIRED.—The Secretary of the Treasury shall conduct a study of the need for a general increase in the amount of capital of the World Bank.

(2) REPORT REQUIRED.—The Secretary of the Treasury shall prepare and transmit a report to the Committee on Banking, Finance and Urban Affairs of the House of Representatives and the Committee on Foreign Relations of the Senate on the conclusions reached by the Secretary in the course of conducting the study under paragraph (1) not later than November 1, 1986, or 60 days after the enactment of this subtitle, whichever date occurs later.

(3) CONTENTS OF REPORT.—The Secretary's report shall include—

(A) a detailed explanation of the reason for any recommendation of the Secretary for an increase in the amount of capital of the Bank and a general explanation of the Secretary's timetable and plans for presenting a request for such an increase to the Congress; and

(B) a discussion of the feasibility of achieving any such increase in capital exclusively through the use of callable capital rather than paid-in capital.

CHAPTER 4—INCREASING WORLD TRADE AND ECONOMIC GROWTH

SEC. 426. TRADE LIBERALIZATION IN DEVELOPING COUNTRIES.

(a) SENSE OF THE CONGRESS.—It is the sense of the Congress that the expansion and liberalization of world trade can make an important contribution to the development of, and the achievement of prosperity for, the developing nations and sustained growth in the United States and other nations.

(b) DECLARATION OF UNITED STATES POLICY.—The Congress declares it to be the policy of the United States that any assistance provided to developing nations shall be consistent with and supportive of long-term trade liberalization in those countries and in worldwide markets.

(c) DIRECTIONS TO UNITED STATES EXECUTIVE DIRECTORS OF MULTILATERAL DEVELOPMENT BANKS.—The Secretary of the Treasury shall instruct the United States Executive Directors of the multilateral development banks—

(1) to initiate discussions with other directors of their respective banks and to propose that all new loans or guarantees entered into by the respective banks shall be consistent with, and in all feasible cases shall be conditioned upon, the reduction of existing trade and investment barriers or limitations on access to the markets of the recipient countries;

(2) to vote against any loan the making of which would be inconsistent with the long-term advancement of trade liberalization and increased market access within recipient countries, and that, while it is in the interest of the United States to promote development in developing countries and remove barriers to trade and investment, the promotion of such development through the sustained use of any form of governmental subsidies the effect of which is to give producers in such countries an unfair advantage over producers in developed countries or other developing countries is contrary to the interests of the United States;

(3) to initiate discussions with other directors of their respective banks and to propose that the structural adjustment loans and the sectoral loans described in title II not be approved until an assessment of the extent to which the extension of such loans will promote trade liberalization and increase market access is made by the staff of the respective bank and presented to the Executive Directors of such bank;

(4) to take actions to assure that United States firms are fully informed of bidding opportunities in countries receiving loans from the respective banks;

(5) to take actions to assure that United States firms can focus on projects in which they have a particular interest or competitive advantage and to permit them to complete and have an equal opportunity in submitting timely and conforming bidding documents;

(6) to thoroughly investigate any complaints from United States bidders about the awarding of multilateral development bank procurement contracts to ensure that all multilateral development bank contract procedures and rules are observed and that United States firms are treated fairly;

(7) to promote opportunities for exports of goods and services from the United States; and

(8) to ensure that project loans by the respective multilateral development banks for commodities, materials, or products do not contribute to a surplus in world markets in which—

(A) the prices of such commodities, materials, or products are low or are falling; and

(B) the commodities, materials, or products could cause material injury to United States producers of the same, similar, or competing commodities, materials, or products.

(d) COORDINATION OF WORLD BANK ACTIONS WITH ACTIONS UNDER GATT.—The Secretary of the Treasury shall instruct the United States Director of the World Bank to initiate discussions with other directors of such bank and to propose that the bank coordinate its actions more closely with the actions taken by the Contracting Parties to the General Agreements on Tariffs and Trade (GATT) in order to ensure that, if actions taken under such General Agreements have the effect of liberalizing trade, such actions are rewarded by appropriate additional public and private capital from the World Bank.

(e) COOPERATION OF GATT PARTIES IN PREPARATION OF COUNTRY-BY-COUNTRY REVIEW.—The Secretary of the Treasury shall instruct the United States Director of the World Bank to initiate discussions with other directors of such bank and to propose that, in acquiring information for and in the preparation of the bank's annual country-by-country review, the bank seek the cooperation and the participation of the representatives of the Contracting Parties to the General Agreements on Tariffs and Trade (GATT).

(f) APPOINTMENT OF FOREIGN COMMERCIAL OFFICERS.—

(1) APPOINTMENT.—The Secretary of the Treasury, in conjunction with the Secretary of Commerce, shall appoint a foreign commercial officer to serve with each of the United States Executive Directors of multilateral development banks.

(2) DUTIES OF OFFICERS.—It shall be the duty of each foreign commercial officer to assist the United States Executive Director with respect to whom such officer has been appointed in carrying out the duties of such Executive Director described in paragraphs (4), (5), (6), and (7) of subsection (c).

SEC. 427. INCREASED TRADE AND INVESTMENT IN DEVELOPING NATIONS.

(a) MULTILATERAL NEGOTIATIONS.—The President and the Secretary of the Treasury shall seek to continue ongoing negotiations with West Germany, the United Kingdom, France, and Japan (commonly known as the "Group of 5") as well as to initiate negotiations with other countries within appropriate multilateral organizations, including the Organization for Economic Cooperation and Development, in order to—

(1) coordinate macroeconomic policies of the major industrial countries so as to promote non-inflationary economic growth and stable exchange rates;

(2) achieve sustained non-inflationary economic growth and thereby increase the size of the market for exports from the United States and developing countries;

(3) promote growth-oriented economic policies in both developed and developing countries; and

(4) encourage both developed and developing countries to base growth on a balance of foreign and domestic demand and to discourage excessive reliance by those countries on exports for growth.

(b) INTERNATIONAL ECONOMIC OR TRADE DISCUSSIONS.—

(1) DECLARATION OF UNITED STATES OBJECTIVE.—The Congress hereby declares that a key objective of the United States in its participation in economic summits and international meetings on economics or trade is to encourage industrial countries to pursue policies which will promote non-inflationary economic growth and to increase the size of the market for exports from the United States and the developing countries.

(2) EXECUTIVE ACTIONS.—The President and the Secretary of the Treasury shall seek to place discussions with respect to the agreement described in paragraph (1) on the agenda of any economic summit or international economic meeting to which the United States is a party and shall report to the Congress on any success they may have had in achieving such agreement at that meeting.

(c) PURCHASE OF OIL FROM DEVELOPING COUNTRIES.—In light of the current dislocation in the world oil markets which has had a significant effect on heavily indebted developing countries which are oil exporters, the Secretary of the Treasury, in conjunction with the Secretary of Energy, shall initiate consultations with Japan, West Germany, France, the United Kingdom, and any other country which holds debt of developing countries for the purpose of examining possible options for reducing the debt burden of developing countries which export oil. Such options should include—

(1) the possibility of increasing the amount of purchases of, and the inventorying of, oil from such developing countries, including Mexico, Venezuela, and Nigeria; and

(2) the possibility of using the oil reserves of such developing countries as collateral for new loans to such countries or as payment for existing debt of such countries.

To the extent appropriate, such consultations should be conducted in conjunction with, and should draw on the expertise of, the International Energy Administration. Such Secretaries shall periodically advise and consult with the appropriate committees of the Congress on the progress of such consultations.

(d) BARTERING OF AGRICULTURAL COMMODITIES FOR OIL.—The President shall, to the maximum extent possible, arrange for acquisitions of petroleum from debtor developing countries through the barter of surplus agricultural commodities.

CHAPTER 5—INSURING THE STABILITY OF THE INTERNATIONAL FINANCIAL SYSTEM

SEC. 431. PRIVATE CAPITAL SOURCES FOR DEVELOPING NATIONS.

(a) STUDY REQUIRED.—The Secretary of the Treasury, working in conjunction with the Chairman of the Board of Governors of the Federal Reserve System and the Comptroller of the Currency, shall explore the changes in the structure of United States capital markets and the regulation of private financial institutions which would be necessary in order to bring about a lasting resolution of the international debt crisis in a manner which is consistent with both increased growth in debtor nations and increased stability of the United States financial system.

(b) TOPICS TO BE INCLUDED IN STUDY.—The study conducted by the Secretary of the Treasury, in conjunction with the Chairman of the Board of Governors of the Federal Reserve System and the Comptroller of the Currency, shall include an analysis of the following proposals:

(1) Amendment of the National Bank Act and any regulatory change which may be necessary to permit longer writeoff periods for losses associated with loans to debtor developing countries.

(2) Statutory or regulatory changes which may be appropriate—

(A) to encourage the growth of a secondary market in developing country debt;

(B) to provide security for the existing commercial bank debt of less developed countries; or

(C) to create a discount facility for such debt.

(3) Statutory, regulatory, or treaty changes that would be required to create a new fund or funds to be administered by the multilateral development banks—

(A) in which shares could be purchased by financial institutions; and

(B) the assets of which would be used to create new lending capacity for developing nations.

(4) Payment of a portion of the debt service obligations of developing countries in local currencies.

(5) Evaluation of any other options which would have the effect of increasing the utilization of domestic and international capital markets in addition to the commercial banks to provide capital for developing nations, and an assessment of how the World Bank might implement such options.

(c) REPORT TO CONGRESS.—The Secretary of the Treasury, in conjunction with the Chairman of the Board of Governors of the Federal Reserve System and the Comptroller of the Currency, shall prepare and transmit a report to the Committee on Banking, Finance and Urban Affairs of the House of Representatives and the Committee on Banking, Housing, and Urban Affairs of the Senate before the end of the 3-month period beginning on the date of the enactment of this subtitle on the advisability of implementing any of the proposals analyzed in the study conducted pursuant to subsection (a) together with any recommendation of such Secretary for legislation which the Congress should consider.

SEC. 432. MOBILIZATION OF PRIVATE CAPITAL.

(a) MULTILATERAL DEVELOPMENT BANK ACTION.—The Secretary of the Treasury shall instruct the United States Executive Directors of the multilateral development banks to initiate discussions with other directors of their respective banks and to propose that—

(1) greater use of co-financing be made by each such bank to encourage increased commercial bank participation in lending by such bank; and

(2) steps be taken to make credits available to satisfy the capital needs of private, income-generating, small businesses or microenterprises owned by the very poorest individuals in the developing countries.

(b) INCREASE IN WORLD BANK'S ROLE AS INTERMEDIARY.—The Secretary of the Treasury shall instruct the United States Executive Director of the World Bank to initiate discussions with other directors of the bank and to propose that steps be taken to increase the bank's role as an intermediary and coordinator in generating new capital and creating new capital instruments, particularly drawing on world securities and capital markets, for the benefit of developing countries.

CHAPTER 6—MULTILATERAL INVESTMENT GUARANTEE AGENCY

SEC. 436. SHORT TITLE.

This chapter may be cited as the "Multilateral Investment Guarantee Agency Act".

SEC. 437. ACCEPTANCE OF MEMBERSHIP.

The President is hereby authorized to accept membership for the United States in the Multilateral Investment Guarantee Agency (hereinafter in this chapter referred to as the "Agency") provided for by the Convention Establishing the Multilateral Investment Guarantee Agency (hereinafter in this chapter referred to as the "Convention") deposited in the archives of the International Bank for Reconstruction and Development (hereinafter in this chapter referred to as the "Bank").

SEC. 438. GOVERNOR AND ALTERNATE GOVERNOR.

The Governor and Alternate Governor of the Bank, appointed under section 3 of the Bretton Woods Agreements Act, shall serve as Governor and Alternate Governor, respectively, of the Agency.

SEC. 439. APPLICABILITY OF BRETTON WOODS AGREEMENTS ACT.

The provisions of section 4 of the Bretton Woods Agreements Act shall apply with respect to the Agency to the same extent as such provisions apply to the Bank and the International Monetary Fund. Reports with respect to the Agency under paragraphs (5) and (6) of section 4(b) of such Act shall be included in the reports made pursuant to such paragraphs after the date the United States accepts membership in the Agency.

SEC. 440. RESTRICTIONS.

Unless authorized by law, neither the President nor any person or agency shall, on behalf of the United States—

(1) subscribe to shares of stock of the Agency;

(2) vote for or agree to any amendment of the Convention which increases the obligations of the United States, or which changes the purpose or functions of the Agency; or

(3) make a loan or provide other financing to the Agency.

SEC. 441. FEDERAL RESERVE BANKS AS DEPOSITARIES.

Any Federal Reserve bank which is requested to do so by the Agency shall act as its depositary or as its fiscal agent, and the Board of Governors of the Federal Reserve System shall supervise and direct the carrying out of these functions by the Federal Reserve banks.

SEC. 442. JURISDICTION OF UNITED STATES COURTS AND ENFORCEMENT OF ARBITRAL AWARDS.

(a) VENUE.—For the purposes of any civil action which may be brought within the United States, its territories or possessions, or the Commonwealth of Puerto Rico, by or against the Agency in accordance with the Convention (including an action brought to enforce an arbitral award against the Agency), the Agency shall be deemed to be an inhabitant of the Federal judicial district in which—

(1) its principal office within the United States is located; or

(2) its agent appointed for the purpose of accepting service or notice of service is located.

(b) JURISDICTION.—Any action described in subsection (a) to which the agency is a party shall be deemed to arise under the laws of the United States. The district courts of the United States, including the courts enumerated in section 460 of title 28, United States Code, shall have original jurisdiction of any such action.

(c) REMOVAL.—Whenever the Agency is a defendant in any action in a State court, it may at any time before the trial thereof remove the action into the appropriate district court of the United States in the manner provided in section 1446 of title 28, United States Code.

SEC. 443. FORCE AND EFFECT OF CONVENTION.

Articles 43 through 48 of the Convention shall have full force and effect in the United States, its territories and possessions, and the Commonwealth of Puerto Rico, upon the entry into force of the Convention for the United States.

SEC. 444. FULL FAITH AND CREDIT FOR ARBITRAL AWARDS; JURISDICTION.

(a) IN GENERAL.—Any award of an arbitral tribunal resolving a dispute arising under Article 57 or Article 58 of the Convention shall create a right arising under a treaty of the United States. The pecuniary obligations imposed by such an award shall be enforced and shall be given the same full faith and credit as if the award were a final judgment of a court of general jurisdiction of one of the several States. The provisions of title 9, United States Code, shall not apply to enforcement of awards rendered pursuant to the Convention.

(b) JURISDICTION.—The district courts of the United States (including the courts enumerated in section 460 of title 28, United States Code) shall have exclusive jurisdiction over actions and proceedings under subsection (a), regardless of the amount in controversy.

CHAPTER 7—INTER-AMERICAN DEVELOPMENT BANK

SEC. 446. MERGER OF INTER-REGIONAL AND ORDINARY CAPITAL.

The Inter-American Development Bank Act (22 U.S.C. 283) is amended by adding at the end thereof the following new section:

"SEC. 32. The United States Governor of the Inter-American Development Bank is hereby authorized to agree to and to accept the amendments to the Articles of Agreement in the proposed resolution entitled 'Merger of Inter-regional and Ordinary Capital Resources'.".

SEC. 447. WAIVER OF COUNTRY PROGRAM LIMITATIONS UNDER NEW REPLENISHMENT AGREEMENT UNDER CERTAIN CONDITIONS.

The Secretary of the Treasury shall instruct the United States Executive Director of the Inter-American Development Bank to initiate discussions with other directors of such bank and to propose that a provision be included in any replenishment agreement which is negotiated after the date of enactment of this subtitle which would allow the directors of such bank to waive any country program limitation contained in such replenishment agreement if the directors determine that—

(1) the waiver would not deprive any other country of any resources which are available under such agreement for such country; and

(2) the country for which the waiver would be made has—

(A) a need for the resources which the waiver would make available; and

(B) the capacity to absorb such additional resources.

Subtitle C—Competitive Tied Aid Fund Act

SEC. 451. SHORT TITLE.

This subtitle may be cited as the "Competitive Tied Aid Fund Act".

SEC. 452. COMPETITIVE TIED AID FUND.

The Export-Import Bank Act of 1945 (12 U.S.C. 635 et seq.) is amended by adding at the end thereof the following new section:

"SEC. 15. COMPETITIVE TIED AID FUND.

"(a) FINDINGS.—The Congress hereby finds that—

"(1) tied and partially untied aid credits offered by other countries are being used in a predacious manner to distort competitive markets and undercut American exporters;

"(2) the predacious use of tied and partially untied aid credits undermines export credit discipline under the Arrangement on Guidelines for Officially Supported Export Credits established through the Organization for Economic Cooperation and Development; and

"(3) the establishment of a temporary Competitive Tied Aid Fund in the Treasury of the United States to target the export markets of countries which exploit or abuse tied or partially untied aid credits for commercial purposes and which impede progress in negotiating greater discipline over the use of such credits will facilitate negotiations to eliminate the use of such credits for commercial purposes and will thereby help protect American exporters from unfair and predacious official export competition.

"(b) COMPETITIVE TIED AID FUND.—

"(1) ESTABLISHMENT BY SECRETARY OF THE TREASURY.—In order to provide a means for inducing other countries to pursue negotiations on a comprehensive arrangement to restrict the use of tied aid and partially untied aid credits for commercial purposes, the Secretary of the Treasury shall establish a fund in the Treasury of the United States to be known as the 'Competitive Tied Aid Fund', consisting of such amounts as may be appropriated to the Fund.

"(2) EXPENDITURES FROM FUND.—Amounts in the Fund may be used to supplement the financing of United States exports to foreign markets which are actual or potential export markets for any country which—

"(A) engages in predacious official export financing through the use of tied or partially untied aid credits; and

"(B) impedes negotiations to eliminate the use of such credits for commercial purposes.

"(3) ADDITIONAL REQUIREMENTS.—In carrying out this section, the Secretary—

"(A) should avoid using the total amount in the Fund to provide financing for only 1 or 2 export projects;

"(B) should seek to use amounts in the Fund to make financing available only for United States exports that would be reasonably competitive in the absence of the predatory export financing practices of the other country; and

"(C) shall ensure that amounts in the Fund are used only to assist exportation by persons described in paragraph (1), (2), or (3) of section 238(c) of the Foreign Assistance Act of 1961 (22 U.S.C. 2198(c)).

"(4) CONSULTATION WITH ADVISORY COUNCIL.—The Secretary shall consult with the National Advisory Council on International Monetary and Financial Policies in—

"(A) determining the foreign countries which offer predacious tied or partially untied aid credits and which impede negotiations to restrict their use to legitimate foreign aid; and

"(B) reviewing proposed transactions under this section.

"(5) POLICY AND PROCEDURE GUIDELINES.—The Secretary shall establish policy and procedure guidelines for the development and implementation of the Fund. In establishing such guidelines, the Secretary shall—

"(A) devise a method for determining the number of American jobs which will be created or retained through assistance from the Fund, and give such factor consideration in making assistance available; and

"(B) describe the method of publicizing the availability of assistance from the Fund, and the terms and conditions under which such assistance is available to both large and small exporters.

"(c) DEFINITIONS.—For purposes of this section—

"(1) TIED AID AND PARTIALLY UNTIED AID CREDIT.—The terms 'tied aid credit' and 'partially untied aid credit' mean any official credit which has a grant element greater than zero percent, as determined by the Development Assistance Committee of the Organization for Economic Cooperation and Development, and which is, in fact or in effect, tied to—

"(A) the procurement of goods or services from the donor country, in the case of tied aid credit; or

"(B) the procurement of goods or services from a restricted number of countries, in the case of partially untied aid credit.

"(2) SECRETARY.—The term 'Secretary' means the Secretary of the Treasury.

"(3) FUND.—The term 'Fund' means the Competitive Tied Aid Fund established pursuant to subsection (b)(1).

"(d) REPORT TO CONGRESS.—The Secretary shall transmit to the Congress, on a quarterly basis, a report setting forth the activities carried out under this section. Each such report shall include—

"(1) information on applications used by the Secretary for making assistance available under subsection (b)(2);

"(2) information on the disposition of such applications;

"(3) an identification of the foreign governments whose behavior the Secretary is trying to influence by the use of such assistance, and an explanation of why the assistance involved is deemed likely to influence that behavior;

"(4) evidence that clearly demonstrates that assistance under subsection (b)(2) has been used for the purposes of this section;

"(5) information on any progress that has been made in negotiations on agreements within the Organization for Economic Cooperation and Development to limit the use of tied aid credits and partially untied aid credits;

"(6) information on the extent to which tied aid credits and partially untied aid credits are being used at the time of such report by major trading countries within such Organization, the terms of such any credits, and the market sectors with respect to which such credits are being used; and

"(7) information on the extent to which assistance under this section has been effective—

"(A) in discouraging the use of tied aid credits and partially untied aid credits for commercial purposes by other countries; and

"(B) in helping to protect United States exporters from unfair and predacious official export competition.

"(e) AUTHORIZATION OF APPROPRIATIONS.—

"(1) IN GENERAL.—There is hereby authorized to be appropriated to the Fund for the fiscal year beginning on October 1, 1986, $300,000,000. Except as provided in paragraph (2), such sums shall remain available until expended.

"(2) RESCISSION AUTHORITY.—

"(A) DETERMINATION BY PRESIDENT.—If the President determines that any amount appropriated to the Fund is not required to achieve the purpose of the Fund, the President shall transmit a special message of such determination to the Congress in the manner provided in section 1012(a) of the Impoundment Control Act of 1974.

"(B) SPECIAL MESSAGE.—Any message under this paragraph shall be treated as a special message under such section for purposes of such Act.

"(f) EXPORT-IMPORT BANK.—

"(1) IMMEDIATE IMPLEMENTATION.—Until such time as the funds authorized to be appropriated under subsection (e) become available for expenditure, the Bank shall make aggressive use of the Bank's authority to offer tied aid credits, in accordance with any recommendation of the Secretary of the Treasury as to how such credits could most effectively and efficiently promote the purposes of this section.

"(2) SUBSEQUENT REIMBURSEMENT.—The Bank shall be reimbursed for the cost of any tied aid credits the Bank authorizes pursuant to this subsection from the appropriated funds authorized by this section, when such funds become available.".

Subtitle D—Council on Industrial Competitiveness Act

SEC. 461. SHORT TITLE.

This subtitle may be cited as the "Council on Industrial Competitiveness Act".

SEC. 462. FINDINGS AND PURPOSES.

(a) The Congress hereby finds that—

(1) the preeminence of the United States in international industrial competition is seriously threatened and the insulation of United States domestic markets from international competition is at an end;

(2) the United States has been slow to accept and adapt to the reality of a highly competitive global marketplace and to regard the industrial development of com-

peting countries as a challenge and an opportunity for its own economic growth;

(3) some major consequences of this failure to adapt are unnecessary plant closings, high unemployment, and a deterioration in the quality of jobs available for American workers;

(4) to be successful in the world arena, the United States must address the erosion of comparative advantage of its basic industries in a number of areas, including innovation, investment, and productivity;

(5) efforts to reverse the decline of American industry have been hindered by a number of factors, including—

(A) a long-term decline in relative productivity growth;

(B) insufficient capital investment in the revitalization of basic industries and in the commercialization and diffusion of new technologies;

(C) a lack of adequate patient capital to invest in smaller, innovative firms;

(D) insufficient investment in civilian research and development in comparison with our major competitors;

(E) a series of systemic inefficiencies in the management and organization of business, including adversarial labor-management relations and short-term time horizons; and

(F) a serious erosion in the institutional support for production, including a lack of high quality domestic and international economic data needed to—

(i) reveal sectoral strengths and weaknesses;

(ii) identify potential new markets and future trends; and

(iii) provide necessary information regarding the industrial strategies of our foreign competitors;

(6) helping to support the competitiveness of United States industries is a proper and necessary role for government, working with the private sector;

(7) at present, industrial policy in the United States is composed of a variety of Government programs, subsidies, and regulatory oversight functions which often are not coordinated, cohesive, or consistent;

(8) while our economy benefits when business, labor, government, academia, and public interest groups work together cooperatively, there exists no effective, high-level forum for developing a consensus on economic policies;

(9) the decline in United States industrial competitiveness endangers the economic stability of the Nation;

(10) such decline also endangers the ability of the United States to maintain the defense industrial base which is necessary to the national security of the United States;

(11) progress on the issue of competitiveness requires a recognition that the world is moving rapidly toward the creation of an integrated and interdependent economy, a world economy in which the policies of one nation have a major impact on other nations;

(12) effective management of such an integrated world economy requires a significant increase in multilateral solutions to such issues as trade, tax, investment, and the distribution of world markets and world production;

(13) effective participation by the United States in this process has been inhibited by the lack of specific mechanisms—

(A) to identify the problems of particular industries and sectors; and

(B) to develop specific solutions to those sectoral problems within the broader range of national economic policies;

(14) such lack of specific mechanisms has been particularly harmful to those labor intensive industries which must compete with very low wages paid in foreign countries;

(15) it is now imperative that Government, business, labor, academia, and public interest groups act together to develop and coordinate long-range strategies for helping to assure the international competitiveness of United States industries; and

(16) such strategies should be balanced by—

(A) encouraging the development of emerging industries which can provide substantial economic growth and employment; and

(B) directing resources into the revitalization of mature and linkage industries.

(b) It is the purpose of this subtitle—

(1) to develop recommendations for long-range strategies for promoting the international competitiveness of United States industries; and

(2) to establish the Council on Industrial Competitiveness which will—

(A) gather and analyze information regarding the competitiveness of United States industries;

(B) create an institutional forum where national leaders with experience and background in business, labor, government, academia, and public interest activities will—

(i) identify economic problems inhibiting the competitiveness of United States industries;

(ii) develop long-term strategies to address such problems; and

(iii) create a broad consensus in support of such strategies; and

(C) make recommendations on issues crucial to the development of coordinated industrial strategies.

SEC. 463. COUNCIL ESTABLISHED.

There is established in the executive branch of the Government an independent agency to be known as the Council on Industrial Competitiveness.

SEC. 464. DUTIES OF THE COUNCIL.

The duties of the Council are—

(1) to develop and promote policies which enhance the productivity and international competitiveness of United States industries;

(2) to assess private sector requests for governmental assistance or relief and to recommend, as a condition of such assistance or relief—

(A) those actions of the private sector which will ensure that the applicant involved, by receiving the assistance or relief, will become internationally competitive in the future; and

(B) any adjustment commitments which should be entered into by relevant parties, such as management and employees of the applicant, shareholders, creditors, suppliers and dealers, and financial institutions, to ensure that the applicant will become internationally competitive in the future;

(3) to collect and analyze relevant domestic and international data concerning current and future economic trends and market opportunities;

(4) to monitor the changing nature of the United States industrial economy and its capacity—

(A) to provide marketable goods and services in domestic and international markets; and

(B) to respond to international competition;

(5) to prepare and publish reports containing the recommendations of the Council with respect to industrial development priorities;

(6) to create a forum or forums where national leaders with experience and background in business, labor, academia, public interest activities, and Government will—

(A) identify national economic problems;

(B) develop recommendations to address such problems; and

(C) create a broad consensus in support of such recommendations;

(7) to establish industry subcouncils of public and private leaders to develop similar long-term strategies for sectors of the economy;

(8) to provide policy recommendations and guidance to the Congress, the President, and the Federal departments and agencies regarding specific issues concerning industrial strategies;

(9) to annually report to the President and the Congress—

(A) on the state of the national economy;

(B) on the status of major sectors of the national economy; and

(C) on the effect of existing Government policies on industries;

(10) to review and evaluate specific policy recommendations developed by the industry subcouncils and transmit such recommendations to the implementing agencies concerned; and

(11) to evaluate existing Government policies and business practices in terms of the competitive impact of such policies and practices.

SEC. 465. MEMBERSHIP.

(a) The Council shall be composed of sixteen members as follows:

(1) Four members appointed by the President, who shall be heads of Federal departments or agencies, Members of Congress, or representatives of State or local governments.

(2) Four members appointed by the President, by and with the advice and consent of the Senate—

(A) who shall be national leaders with experience and background in business, including at least one individual selected from the small business community; and

(B) who shall have a broad understanding of the United States economy and the United States position in the world economy.

(3) Four members appointed by the President, by and with the advice and consent of the Senate—

(A) who shall be national leaders with experience and background in the labor community; and

(B) who shall have a broad understanding of the United States economy and of the United States position in the world economy.

(4) Four members appointed by the President, by and with the advice and consent of the Senate, each of whom—

(A) shall be selected from the academic community or have been active in public interest activities; and

(B) shall have a broad understanding of the United States economy and of the United States position in the world economy.

(b) The Council shall not commence its duties until all the members specified in paragraphs (2), (3), and (4) of subsection (a) have been appointed and have qualified.

(c)(1) A vacancy in the Council shall be filled in the same manner in which the original appointment was made.

(2)(A) Any member appointed to fill a vacancy occurring before the expiration of the term for which such member's predecessor

was appointed shall be appointed only for the remainder of such term.

(B) A member may serve after the expiration of such member's term until such member's successor has taken office.

(d)(1) No member may serve more than two consecutive terms.

(2) Members of the Council may be removed by the President only for malfeasance in office.

(e) Not more than nine members of the Council shall be of the same political party.

(f)(1) Members appointed under paragraphs (2) through (4) of subsection (a) shall be appointed for terms of six years.

(2) Of the members first appointed under paragraphs (2) through (4) of subsection (a)—

(A) three shall be appointed for a term of two years;

(B) three shall be appointed for a term of three years;

(C) three shall be appointed for a term of four years; and

(D) three shall be appointed for a term of six years; as designated by the President at the time of appointment.

(g)(1) Each member of the Council who is not otherwise in the service of the Government of the United States or any State or local government—

(A) shall receive a sum not to exceed an amount equivalent to the compensation paid at level II of the Executive Schedule, pursuant to section 5313 of title 5, United States Code, prorated on a daily basis for each day spent in the work of the Council; and

(B) shall be paid actual travel expenses, and per diem in lieu of subsistence expenses when away from his usual place of residence, in accordance with section 5703 of such title.

(2) Each member of the Council who is otherwise in the service of the Government of the United States or any State or local government shall serve without compensation in addition to that received for such other service, but while engaged in the work of the Council shall be paid actual travel expenses, and per diem in lieu of subsistence expenses when away from his usual place of residence, in accordance with subchapter 1 of chapter 57 of title 5, United States Code.

(h) Nine members of the Council constitute a quorum, except that a lesser number may hold hearings if such action is approved by a two-thirds vote of the entire Council.

(i)(1) The Council shall elect, by a two-thirds vote of the entire Council, a Chairman from among the individuals appointed under paragraphs (2) through (4) of subsection (a).

(2) The Chairman shall serve full time.

(j) The Council shall meet at the call of the Chairman or a majority of its members, except that the Council shall meet not less than six times during each calendar year.

(k)(1) Each member of the Council shall designate one alternate representative to attend any meeting that such member is unable to attend.

(2) In the course of attending any such meeting, an alternate representative shall be considered a member of the Council for all purposes, including voting.

(l)(1) Except as provided in subsection (j), no action whatsoever (whether involving administrative or personnel matters, establishing policy, or any other type of action) shall be taken by the Council unless approved by two-thirds of the entire membership of the Council.

(2)(A) If a two-thirds consensus, as required under paragraph (1), cannot be reached on a matter referred to the Council by the President, or either House of the Congress, the Council shall transmit a report to the President and both Houses of the Congress explaining why a consensus could not be reached on such matter.

(B) Such report shall include all information gathered by the Council on such matter and a list of potential policy options for addressing the concern involved.

(m) The Council may procure temporary and intermittent services under section 3109(b) of title 5, United States Code, but at rates for individuals not to exceed the daily equivalent of the maximum annual rate of basic pay for GS-16 of the General Schedule.

(n) Upon request of the Council, the head of any other Federal agency is authorized to detail, on a reimbursable basis, any of the personnel of such agency to the Council to assist the Council in carrying out its duties under this subtitle.

(o)(1) An individual may not be appointed as a member of the Council if, at any time within the 1-year period ending on the date on which any such appointment would otherwise be effective, such individual has acted as an agent or attorney for, or performed any other professional service for or on behalf of, the government of any foreign country, any agency or instrumentality of the government of a foreign country, or any foreign political party.

(2) If, after an individual is appointed as a member of the Council, such individual acts or performs in any manner or capacity described in paragraph (1), such individual shall cease to be a member of the Council as of the date such individual acts or performs in such manner or capacity.

SEC. 466. EXECUTIVE DIRECTOR AND STAFF.

(a)(1) The principal administrative officer of the Council shall be an Executive Director, who shall be appointed by the Council.

(2) The Council shall consult with the President and leaders of the Congress before appointing an individual to the position of Executive Director.

(3) The Executive Director shall serve full time.

(b) Within the limitations of the Council's appropriations, the Executive Director may appoint the personnel of the Council in accordance with the civil service and classification laws.

SEC. 467. POWERS OF THE COUNCIL.

(a) The Council may, for the purpose of carrying out the provisions of this subtitle, hold such hearings, sit and act at such times and places, take such testimony, and receive such evidence, as the Council considers appropriate. The Council may administer oaths or affirmations to witnesses appearing before the Council.

(b) If so authorized by the Council, any member or agent of the Council may take any action which the Council is authorized to take under this section.

(c)(1)(A) The Council may secure directly from any department or agency of the United States information necessary to enable the Council to carry out the provisions of this subtitle.

(B) Upon request of the Chairman of the Council, the head of such department or agency shall furnish such information to the Council.

(2) In any case in which the Council receives any information from a department or agency of the United States, the Council shall not disclose such information to the public unless such department or agency is authorized to disclose such information pursuant to Federal law.

(d) The Council may accept, use, and dispose of gifts or donations of services or property.

(e) The Council may use the United States mails in the same manner and under the same conditions as other departments and agencies of the United States.

(f) The Administrator of General Services shall provide to the Council, on a reimbursable basis, such administrative support services as the Council may request.

(g)(1) The Council shall establish, when and for such period of time as the Council deems appropriate, industry subcouncils of public and private leaders representing the major economic interests affected by sectoral policies.

(2) Subcouncil members shall serve on a part-time basis.

(3)(A) Such subcouncils shall examine the competitive problems facing individual industries in the economy and develop recommendations regarding long-term strategies which could improve the competitiveness of such industries.

(B) In the course of developing recommendations, the industry subcouncils shall hold such hearings, sit and act at such times and places, take such testimony, and receive such evidence as such subcouncils consider appropriate.

(4)(A) The industry subcouncils shall report their findings and recommendations to the Council.

(B) Where appropriate, each of the subcouncil's reports shall assess the effectiveness of employee ownership as one of the tools and long-term strategies for improving the competitive problems facing the industry.

(C) The Council shall review the findings and recommendations of the subcouncils in preparing the Council's recommendations.

SEC. 468. EFFECTS OF IMPORTS ON DOMESTIC INDUSTRIES.

(a) The Council shall examine and make available to the public all international agreements on foreign trade that have been agreed to by the United States.

(b) The Council shall continuously monitor, and maintain public records regarding, the effect of imports on all major United States industries and on such other United States industries as may be specified by the Council.

SEC. 469. REPORTS.

(a) Not later than one year after the date of the enactment of this subtitle, the Council shall transmit a report to both Houses of the Congress and the President containing recommendations of the Council for changes in any Federal policy necessary to implement effective industrial strategies.

(b)(1) The Council shall annually prepare and transmit to the President and to each House of the Congress a report setting forth—

(A) the major industrial development priorities of the United States;

(B) the policies needed to meet such priorities; and

(C) a summary of existing Government policies affecting industries.

(2) Such report shall contain a statement of the findings and conclusions of the Council during the previous fiscal year, together with any recommendations of the Council for such legislative or administrative actions as the Council considers appropriate.

(c)(1) Upon receipt by either House of the Congress, the report shall be referred to the appropriate committee or committees of each House.

(2) The Council shall consult with each such committee with respect to such report and, following such consultation, each such committee shall submit to its respective House a report setting forth the views and recommendations of such committee with respect to the report of the Council.

SEC. 470. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated for fiscal year 1987 not to exceed $25,000,000 to carry out the provisions of this subtitle.

SEC. 471. DEFINITIONS.

For purposes of this subtitle—

(1) the term "Council" means the Council on Industrial Competitiveness established under section 463;

(2) the term "member" means a member of the Council on Industrial Competitiveness; and

(3) the term "United States" means the several States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, the Virgin Islands, the Northern Mariana Islands, the Trust Territory of the Pacific Islands, American Samoa, and any other territory or possession of the United States.

TITLE V—EDUCATION AND TRAINING FOR AMERICAN COMPETITIVENESS

SEC. 501. SHORT TITLE.

This title may be cited as the "Education and Training for American Competitiveness Act".

SEC. 502. FINDINGS AND PURPOSES.

(a) FINDINGS.—The Congress finds that—

(1) the relationship between a strong and vibrant educational system and a healthy national economy is inseparable in an era in which economic growth is dependent on technology and is imperiled by increased foreign competition;

(2) our Nation's once undisputed pre-eminence in international trade is facing unprecedented challenges from competitor nations (A) whose trade positions are abetted by unfair economic and market factors, such as low employee wages and failure to recognize, and abide by, fundamental labor rights, and (B) who have given priority to the relationship between education and economic growth in areas such as high technology industries;

(3) our standing in the international marketplace is being further eroded by the presence in the workforce of millions of Americans who are functionally, or technologically, illiterate or who lack the mathematics, science, foreign language, or vocational skills needed to adapt to the structural changes occurring in the global economy;

(4) our competitive trade position is also being eroded by declines in the number of students taking advanced courses in mathematics, science, and foreign languages and by the lack of modern technical and laboratory equipment in our institutions of higher education;

(5) restoring our competitiveness and enhancing our productivity will require that all workers possess basic educational skills and that many others possess highly specific skills in mathematics, science, foreign languages, and vocational areas; and

(6) our Nation must recognize the substantial impact that an investment in human capital will have on increasing productivity.

(b) PURPOSES.—It is therefore the purpose of this title to establish national programs designed—

(1) to improve our productivity and competitive position by investing in human capital;

(2) to assist out-of-school youth and adults who are functionally illiterate in obtaining the basic skills needed for them to become productive workers in a competitive economy;

(3) to help educational institutions prepare those engaged either directly or indirectly in trade-related fields by improving and expanding instruction in mathematics, science, and foreign languages and by modernizing laboratory and technical equipment;

(4) to enhance the skills of workers affected, or about to be affected, by foreign competition, in order to prevent dislocation within existing industries and to strengthen emerging domestic industry; and

(5) to accomplish such purposes without impairing the availability of funds to carry out existing programs that address the needs of dislocated workers, such as title III of the Job Training Partnership Act and the trade adjustment assistance provisions of the Trade Act of 1974.

Subtitle A—Education for American Competitiveness

SEC. 511. AUTHORIZATION OF APPROPRIATIONS.

There is authorized to be appropriated to carry out this subtitle, for fiscal year 1987 and for each succeeding fiscal year, $500,000,000 of which—

(1) 80 percent shall be available to carry out chapter 1; and

(2) 20 percent shall be available to carry out chapter 2.

SEC. 512. DEFINITIONS.

As used in this subtitle—

(1) the term "Secretary" means the Secretary of Education;

(2) the terms "local educational agency", "State board", and "State educational agency" have the meanings given such terms by section 521(19), (28), and (30) of the Carl D. Perkins Vocational Education Act;

(3) the term "institution of higher education" has the meaning given by section 481(a)(1) of the Higher Education Act of 1965;

(4) the term "community-based organization" has the meaning given such term by section 4(5) of the Job Training Partnership Act; and

(5) the term "State" includes the District of Columbia and Puerto Rico.

CHAPTER 1—EDUCATION AND TRAINING TO STRENGTHEN THE COMPETITIVENESS OF DOMESTIC INDUSTRY

SEC. 521. PROGRAM AUTHORIZED.

From the funds appropriated to carry out this chapter, the Secretary shall make grants to State educational agencies in accordance with the requirements of this chapter to assist in the establishment and operation of programs to improve the education and skills of our current and future workers in those areas that will enhance their productivity and competitiveness.

SEC. 522. ALLOTMENT TO STATES.

(a) FORMULA FOR ALLOTMENT.—From the amount appropriated to carry out this chapter for any fiscal year, the Secretary shall—

(1) allot one-half of such amount among the States with approved plans under section 523 on the basis of the relative number of unemployed individuals who reside in each such State as compared to the total number of such individuals who reside in all such States; and

(2) allot one-half of such amount among such States on the basis of the relative number of adult individuals who reside in each such State and who—

(A) do not have a certificate of graduation from a school providing secondary education (or its equivalent); and

(B) are not currently required to be enrolled in school;

as compared to the total number of such individuals who reside in all such States.

(b) DATA BASES.—The Secretary shall determine—

(1) the number of individuals described in subsection (a)(1) in the same manner as such individuals are determined for purposes of section 301(b)(1) of the Job Training Partnership Act (29 U.S.C. 1601(b)(1)); and

(2) the number of individuals described in subsection (a)(2) in the same manner as such individuals are determined for purposes of section 305(a) of the Adult Education Act (20 U.S.C. 1204(a)).

SEC. 523. STATE PLANS.

(a) SUBMISSION OF PLANS.—Any State that desires to obtain an allotment under section 522 shall submit to the Secretary a plan that complies with the requirements of this section. Such plan shall be submitted by the State educational agency after approval by the State board (if the State board is a separate agency).

(b) CONTENTS OF PLAN.—A State plan shall contain—

(1) a description of the services to be provided under, and the relative portions of funds available under this subtitle to be used for, sections 524, 525, and 526;

(2) a description of—

(A) the methods by which the services will be made available to those areas of the State in greatest need for such services; and

(B) the criteria by which the areas in greatest need will be determined;

(3) a description of the criteria and methods that will be used to select service providers from among those eligible under section 527;

(4) a description of the criteria, methods, and procedures that will be used to identify and qualify eligible recipients of such services;

(5) assurances that the State will comply with the administrative cost limitations contained in section 528;

(6) assurances that the funds provided under this chapter will be used so as to supplement and not to supplant funds available from State and local and other Federal sources; and

(7) such other information and assurances as the Secretary may require by regulation.

(c) APPROVAL OF PLANS.—The Secretary shall approve a plan submitted under this section unless the Secretary finds, after notice and opportunity for a hearing on the record, that the plan does not comply with the requirements of this section.

(d) COORDINATION WITH JOB TRAINING PROGRAMS.—Each State is authorized and encouraged to include in its plan under this section provisions to improve the coordination of services provided under this chapter with the services provided under part H of title IV of the Job Training Partnership Act (as added by subtitle B of this title).

SEC. 524. LITERACY TRAINING.

Funds made available under this chapter may be used, in accordance with the provisions of an approved plan, to provide literacy training—

(1) to unemployed or underemployed individuals who need to learn or improve their basic skills in order to enhance their employability;

(2) to displaced workers in order to assist them to enter into adult basic education or to benefit from additional job training or retraining;

(3) to illiterate adults; and

(4) to illiterate, out-of-school youth who are not enrolled in other education programs.

SEC. 525. VOCATIONAL TRAINING SERVICES.

Funds made available under this chapter may be used, in accordance with the provisions of an approved plan, to provide vocational training—

(1) to workers who have been or who are about to be adversely affected by foreign competition, in order to assist such workers to obtain and retain employment and to upgrade their job skills;

(2) to unemployed or underemployed individuals in order to assist them to obtain and retain employment in new, expanding, or export-related industries or businesses;

(3) to current employees in existing industries and businesses in order to make such industries and businesses more competitive; and

(4) to individuals in order to assist their entry into, or advancement in, high technology occupations or to meet the technological demands of other industries or businesses.

SEC. 526. EDUCATION IN MATHEMATICS, SCIENCE, OR FOREIGN LANGUAGES.

Funds made available under this chapter may be used, in accordance with the provisions of an approved plan, to provide elementary or secondary level instruction in mathematics, science, or a foreign language through—

(1) programs that are designed to address needs for such instruction that are not being met by programs receiving assistance under the Education for Economic Security Act through such activities as (A) partnerships in education with business, industry, and labor; (B) interdisciplinary programs in such subject areas; and (C) advanced or supplementary instruction in such areas in after-school and summer programs;

(2) programs to enable students to begin preparation for advanced courses and careers in mathematics, science, engineering, and technology; and

(3) programs that develop the specific technological and foreign language skills required by local industries and businesses.

SEC. 527. ELIGIBLE SERVICE PROVIDERS.

A State educational agency may enter into an agreement with any one or more of the following for the provision of services under this chapter—

(1) local educational agencies;

(2) eligible recipients of funds under the Adult Education Act;

(3) eligible recipients of funds under the Carl D. Perkins Vocational Education Act;

(4) the State board; or

(5) other agencies or organizations (including community-based organizations) within the State providing educational and training services as described in this chapter.

SEC. 528. LIMITATION ON ADMINISTRATIVE COSTS.

Not more than 5 percent of the amount paid under this chapter to any State educational agency for any fiscal year may be used by such agency to cover the costs of administering the programs under this chapter.

CHAPTER 2—POSTSECONDARY EDUCATION PROGRAMS TO IMPROVE INSTRUCTION IN MATHEMATICS, SCIENCE, AND FOREIGN LANGUAGE

SEC. 531. PROGRAMS AUTHORIZED.

From the funds available to carry out this chapter, the Secretary shall make grants in accordance with the requirements of this chapter to institutions of higher education—

(1) to establish and operate a summer institute or workshop under section 534;

(2) to acquire special equipment or operate a workshop under section 535;

(3) to establish and operate educational partnership programs under section 536; or

(4) to perform a combination of the activities referred to in paragraphs (1), (2), and (3).

SEC. 532. SELECTION OF GRANT RECIPIENTS.

(a) COMPETITIVE SELECTION.—The Secretary shall award grants under this chapter competitively, on the basis of the quality of the proposal contained in the institution's application under section 533.

(b) LIMITATIONS ON AWARDS.—In making awards under subsection (a), the Secretary shall ensure that—

(1) one-half of the funds awarded will be used for activities under sections 534 and 536, and one-half for activities under section 535;

(2) there is an equitable geographic distribution of the funds awarded under this chapter; and

(3) the award to any institution or consortium of institutions is not less than $100,000 or more than $500,000 for any fiscal year.

SEC. 533. APPLICATIONS.

An institution of higher education or consortium of such institutions that desires to obtain a grant under this chapter shall submit an application to the Secretary that contains—

(1) a description of the activities that will be performed in accordance with section 534, 535, or 536 (or any combination thereof) with funds made available under this chapter;

(2) assurances that the institution will obtain from donors, or otherwise provide from non-Federal sources, not less than one-half of the costs of the programs conducted with funds made available under this chapter;

(3) a description of the resources available to meet the requirements of paragraph (2); and

(4) such other information and assurances as the Secretary may require by regulation.

SEC. 534. SUMMER INSTITUTES AND WORKSHOPS.

(a) USE OF FUNDS.—Funds made available by grant under this chapter may be used—

(1) for summer institutes that provide for intensive training in foreign languages and cultures critical to the national economy—

(A) for secondary and postsecondary school students;

(B) for language teachers and faculty to improve language proficiency and pedagogical techniques; and

(C) for American international business persons, on a cost reimbursement basis, to improve their effectiveness in doing business abroad;

(2) for intensive workshops for preservice and in-service math and science teachers and faculty to demonstrate the most recent developments in science, technology, and mathematics and their application to improve our economic development, particularly as related to businesses and industries engaged in substantial export or foreign trade activities; and

(3) for stipends for individuals described in subparagraph (A) and (B) of paragraph (1) while attending institutes conducted under such paragraph.

(b) STUDY ABROAD.—An institution of higher education using funds to provide the training described in subsection (a)(1) is authorized and encouraged to provide such training in a foreign country and to use the resources provided by such country to comply with the requirements of section 533(2).

(c) WORKSHOP PLANNING.—An institution of higher education using funds to provide the workshops described in subsection (a)(2) is authorized and encouraged to involve units of State and local government, labor, business, and industry in the planning for such workshops.

SEC. 535. ACQUISITION AND USE OF EQUIPMENT.

Funds made available by a grant under this subtitle may be used—

(1) for the purchase of laboratory and other special equipment suitable for use in providing undergraduate classroom instruction in mathematics or science, or both; and

(2) for workshops for secondary and vocational school teachers and postsecondary institution faculty on the use of such equipment.

SEC. 536. EDUCATIONAL PARTNERSHIP PROGRAMS.

(a) USE OF FUNDS.—Funds made available pursuant to this chapter may be used for costs associated with establishment and operation of educational partnerships between institutions of higher education and local educational agencies to provide advanced instruction to students in the areas of mathematics, science, and computer technology.

(b) SPECIFICALLY PERMITTED USES.—Permissible uses of funds under this section include—

(1) costs associated with entering into resource sharing with government, private business, industry, and institutions;

(2) stipends or salary supplements for university faculty and staff involved in the educational partnership program under this subtitle;

(3) development of curriculum that provides superior preparation in any one or more of the areas of mathematics, science, and technology;

(4) acquisition of textbooks, materials, and supplies to be utilized in instructional programs to be used under this subtitle; and

(5) additional transportation costs for students as a result of their participation in the educational partnership program under this subtitle.

(c) USE FOR GENERAL OVERHEAD PROHIBITED.—Funds made available pursuant to a grant under this section may not be used in connection with the general overhead costs of the applicant.

CHAPTER 3—EDUCATIONAL TELECOMMUNICATIONS

SEC. 541. NATIONAL EDUCATIONAL TELECOMMUNICATIONS DEMONSTRATION PROGRAM.

(a) PROGRAM AUTHORITY.—The Secretary of Education is hereby authorized to provide grant assistance to a non-profit State corporation to pay the Federal share of the costs of the design, development, and construction, including renovation, of a model, regional advanced educational telecommunications network and technology resource centers. Such centers shall enable private and public post-secondary educational institutions, elementary and secondary school systems, libraries, and other institutions in the region to share educational resources and improve and expand instruction in

mathematics, science, foreign languages, vocational education, continuing education, and basic and remedial educational skills.

(b) MATCHING REQUIREMENT.—Financial assistance made available under this section shall be matched by State funds and funds from other sources.

(c) SEPARATE AUTHORIZATION.—There are hereby authorized to be appropriated (in addition to sums authorized by section 511) such sums as may be necessary to carry out the provisions of this section. Funds appropriated pursuant to this section shall remain available until expended.

Subtitle B—Training for Industrial Competitiveness

SEC. 551. AUTHORIZATION OF APPROPRIATIONS.

(a) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out this subtitle $500,000,000 for fiscal year 1987 and such sums as may be necessary for each succeeding fiscal year.

(b) ALLOCATION OF APPROPRIATIONS.—From the funds appropriated pursuant to subsection (a)—

(1) 60 percent shall be available to carry out section 492 of the Job Training Partnership Act (as added by section 552 of this Act);

(2) 20 percent shall be available to carry out section 493 of such Act (as so added);

(3) 9 percent shall, subject to subsection (c), be available to carry out section 494 of such Act (as so added);

(4) 10 percent shall, subject to subsection (c), be available to carry out section 505 of such Act (as added by section 553 of this Act); and

(5) one percent shall be available to carry out section 554 of this Act.

(c) LIMITATIONS ON DURATION.—Notwithstanding subsection (b)—

(1) the allocation required by paragraph (3) of such subsection shall be required only for fiscal years 1987 and 1988; and

(2) the allocation required by paragraph (4) of such subsection shall be required only for fiscal years 1987 through 1990.

Funds which remain unallocated by reason of paragraphs (1) and (2) of this subsection shall be reallocated by apportioning such funds among paragraphs (1) and (2) of subsection (b) proportionately.

SEC. 552. TRAINING PROGRAMS UNDER THE JOB TRAINING PARTNERSHIP ACT.

(a) AMENDMENT.—Title IV of the Job Training Partnership Act is amended by adding at the end thereof the following new part:

"PART H—TRAINING FOR INDUSTRIAL COMPETITIVENESS

"USE OF FUNDS

"SEC. 491. From the funds available to carry out this part, the Secretary shall—

"(1) provide training and employment assistance to trade-impacted workers in accordance with section 492;

"(2) provide financial and technical assistance to labor-management committees in accordance with section 493; and

"(3) establish demonstration programs to improve worker adjustment to changing world markets in accordance with section 494.

"TRADE-IMPACTED WORKER ASSISTANCE

"SEC. 492. (a)(1) The Congress finds that—

"(A) the vast majority of trade-impacted workers are production employees of manufacturing industries and agriculture whose income losses and barriers to reemployment are generally higher than those for other dislocated workers;

"(B) programs of assistance for trade-impacted workers are most effective when delivered before or soon after the dislocations occur; and

"(C) because import and export competition tends to affect employment opportunities in entire industries and not merely in specific firms, and because the skills, work experience, and barriers to reemployment are similar for dislocated workers from a given industry, industry-wide programs of adjustment assistance are the most efficient way to aid trade-impacted workers.

"(2) It is the purpose of this section to assist individuals injured by import competition to adjust to new economic circumstances and to find stable productive employment.

"(b)(1) From the funds available to carry out this section, the Secretary shall, on a competitive basis, provide financial assistance to programs established under this section that provide training and employment assistance to workers in industries that are determined by the Secretary, in accordance with subsection (e), to have been adversely affected by international trade.

"(2) For purposes of applying for such financial assistance, eligible applicants shall be public or private nonprofit entities (including, but not limited to, administrative entities under section 103(b)(1)(B) of this Act, State and local government agencies, labor organizations, industry associations, joint labor-management committees, and community-based organizations) and consortia of any such entities.

"(c) An individual shall be eligible for services under this section if such individual—

"(1) is or was employed in such an industry; and

"(2) meets the criteria contained in section 302(a) of this Act.

"(d)(1) An eligible individual under subsection (c) may be provided with—

"(A) intensive job search assistance;

"(B) basic skills training and other educational assistance;

"(C) job training;

"(D) job development;

"(E) training in jobs skills for which demand exceeds supply;

"(F) supportive services, including commuting assistance and financial and personal counseling;

"(G) pre-layoff assistance; and

"(H) relocation assistance.

"(2) Such an individual may also receive a subsistence stipend during enrollment in a program described in paragraph (1) if that individual is unemployed and is not currently receiving unemployment compensation or trade readjustment allowances.

"(3) Services provided under this section shall be in addition to, and shall be coordinated with, services provided under title III of this Act and shall supplement and not supplant any other federally assisted training assistance or services.

"(e) The Secretary shall, by regulation, prescribe criteria for determining if an industry, including agriculture, has been adversely affected by international trade. Such criteria shall provide for the consideration of the extent to which—

"(1) significant numbers of employees, including farmers, have become, or are likely to become, unemployed or underemployed for significant periods of time;

"(2) imports of goods produced or manufactured by the industry have increased or exports of such goods have decreased;

"(3) the sales and production rates of the industry have substantially declined, either in absolute terms or in relation to the total sales and production of goods in the United States; and

"(4) the industry is recognized as needing protection under laws or practices designed to protect United States industries from unfair foreign competition.

"JOINT LABOR-MANAGEMENT TRAINING PROGRAMS

"SEC. 493. (a) From the funds available to carry out this section, the Secretary shall award, on a competitive basis, grants to labor-management committees to provide not more than one-half of the cost of establishing and operating programs of training, retraining, and education for eligible workers.

"(b)(1) To be eligible for a grant under this section, a labor-management committee shall demonstrate to the Secretary in its application that—

"(A)(i) the committee was established by a voluntary cooperative agreement, between the employer and the employees employed at or operating out of a single site, that complies with the requirements of subsection (d), and (ii) the employer has certified that it will comply with the terms of such agreement;

"(B) the committee does not have, as one of its purposes, the discouragement of the exercise of rights contained in section 7 of the National Labor Relations Act (29 U.S.C. 157) or the interference with collective bargaining in any plant or industry;

"(C) the employer is undertaking a modernization or other production adjustment program in order to remain or become competitive in international markets;

"(D) the employer has undertaken to provide or to secure from non-Federal sources the remaining one-half of the costs of programs under this section;

"(E) the programs to be provided will be in addition to training programs already provided or required to be provided;

"(F) an identification of (i) the persons or agencies from whom services will be obtained for employees under this section and (ii) the specific services that will be provided; and

"(G) a description of any arrangements that have been made with the administrative entity for a service delivery area in the vicinity for the purpose of—

"(i) obtaining information concerning (and improved access to) educational and training services available in the locality, such as institutional skill training, on-the-job training, training programs operated by employers or labor organizations, or on-site, industry-specific training supportive of industrial or economic development;

"(ii) providing, through the service delivery area, local providers of education and training with information concerning the needs of the committee for their services; and

"(iii) assessing such training and educational needs, providing information and recommendations regarding such needs to local educational and training service providers, and matching such training needs to the programs available.

"(2) For purpose of programs under this section, an eligible worker is a worker who is or may be at risk of losing employment because of skill obsolescence or because of a modernization or other production adjustment program which his or her employer is undertaking in order to remain or become competitive in international markets.

"(c) A labor-management committee may use funds under this section to provide to or obtain for eligible workers any one or more of the following services:

"(1) early warning adjustment services in the event of mass layoffs or plant closings including such services as personal and financial counseling, referral to community services, career counseling, job search assistance, job development, retraining, and relocation assistance;

"(2) aptitude testing and career counseling;

"(3) on-the-job training;

"(4) institutional training;

"(5) tuition assistance;

"(6) upgrading of skills; and

"(7) education, including basic skills and literacy training as well as more advanced education intended to increase the proficiency and adaptability of workers in a changing work environment.

"(d) The cooperative agreement providing for the establishment of a labor-management committee meets the requirements of this subsection if the agreement—

"(1) provides that there shall be at least as many representatives of employees on the committee as there are representatives of the employer;

"(2) provides that where eligible employees have designated one or more exclusive representatives under the National Labor Relations Act, each of those representatives shall serve on the committee as representatives of those employees;

"(3) provides that eligible employees who have not designated an exclusive representative under the National Labor Relations Act may be represented on the committee by such a representative or by one of such employees as chosen in a secret ballot election, except that the ratio of the number of employee representatives chosen pursuant to this paragraph to the number of representatives selected under paragraph (2) may not exceed the ratio of the number of employees who are not represented by an exclusive representative as provided under the National Labor Relations Act to the number of employees who are so represented;

"(4) provides that all decisions of the committee shall be by mutual agreement of a majority of the employer representatives and a majority of employee representatives on the committee; and

"(5) provides that (A) committees may designate, by mutual agreement of employer and employee representatives on the committee, one individual, not otherwise employed by or under contract to the employer, to act as chairperson of the committee, and (B) where such an individual is not so designated, the chairperson shall be designated by mutual agreement of the employer and employee representatives on the committee from among the employee representatives on the committee.

"(e) Upon approval of a grant request but prior to providing any funds, the Secretary shall require the committee and the employer to enter into a contract with the Secretary to perform the services for which the Secretary is providing funds under this section.

"(f) The Secretary shall not provide any additional financial assistance to any committee after receiving notice from the chairperson selected under subsection (d)(5) that the representatives of either the employer or the employees on the committee, or both, have expressed, in writing, an unwillingness to participate in the further activities of the committee. A chairperson shall so notify the Secretary within 10 days after receiving an expression of such unwillingness, unless it is earlier withdrawn.

"(g)(1) Nothing in this subsection shall be construed to affect the terms or conditions of any collective bargaining agreement, whether entered into before or after the date of entry into an agreement under subsection (d).

"(2) No money or other things of value provided by an employer to a committee pursuant to this section shall be held to be a violation of paragraph (1) or (2) of section 302(a) of the Labor Management Relations Act, 1947, or section 8(a)(2) of the National Labor Relations Act.

"DEMONSTRATION PROGRAMS

"SEC. 494. (a) From the funds available to carry out this section, the Secretary shall, within 6 months after the date of enactment of this section, establish programs to demonstrate the feasibility of providing worker retraining payments, not to exceed $4,000 each, to workers who—

"(1) are or were employed in an industry determined (under section 492) to have been adversely affected by international trade, and

"(2) meet the criteria contained in section 302(a) of this Act,

in order to permit such workers to purchase their own job search, education, training, and retraining services from providers who are certified for such purpose by a State job training coordinating council.

"(b) Programs established under subsection (a) shall be established in a manner which—

"(1) provides a suitable cross section of employees by income, education, job experience, and occupation;

"(2) assesses the relative cost and benefits of providing assistance through direct payments to participants as compared to providing assistance through delivery of services to participants; and

"(3) evaluate such programs in terms of the performance standards established by the Secretary pursuant to section 106(g) of this Act.

"(c) The Secretary shall submit a report evaluating the success of the demonstration programs established pursuant to this section to the Congress not later than 6 months after the conclusion of the study under this section.".

(b) CLERICAL AMENDMENT.—The table of contents of such Act is amended by inserting at the end of the matter relating to title IV of such Act the following:

"PART H—TRAINING FOR INDUSTRIAL COMPETITIVENESS

"Sec. 491. Use of funds.
"Sec. 492. Trade-impacted worker assistance.
"Sec. 493. Joint labor-management training programs.
"Sec. 494. Demonstration programs.".

SEC. 553. JOB BANKS.

(a) AMENDMENT.—Title V of the Job Training Partnership Act is amended by adding at the end thereof the following new section:

"STATE JOB BANK SYSTEMS

"SEC. 505. (a) The Secretary shall carry out this section with sums available pursuant to section 551 of the Education and Training for American Competitiveness Act.

"(b) The Secretary shall make such sums available through the United States Employment Service for the development and implementation of job bank systems in each State. Such systems shall be designed to use computerized electronic data processing and telecommunications systems for such purposes as—

"(1) identifying job openings and referring jobseekers to job openings, with continual updating of such information;

"(2) providing information on occupational supply and demand; and

"(3) utilization of such systems by career information delivery systems (including career counseling programs in schools).

"(c) Wherever possible, computerized data systems developed with assistance under this section shall be capable of utilizing software compatible with other systems (including management information systems and unemployment insurance and other income maintenance programs) used in the administration of employment and training programs. In developing such systems, special consideration shall be given to the advice and recommendations of the State occupational information coordinating committees (established under section 422(b) of the Carl D. Perkins Vocational Education Act), and other users of such systems for the various purposes described in subsection (b) of this section.".

(b) CLERICAL AMENDMENT.—The table of contents of such Act is amended by inserting after the item relating to section 504 the following:

"Sec. 505. State job bank systems.".

SEC. 554. STUDIES.

(a) BENEFIT PORTABILITY.—The Secretary of Labor shall, within 6 months after the date of enactment of this Act, commence a study of methods of implementing portability for pensions and health benefits for dislocated workers. Such study shall also evaluate the benefits of providing early retirement benefits without penalty for older dislocated workers. A report on the study conducted under this subsection shall be submitted to the Congress not later than 18 months after such date of enactment.

(b) DATA ON MASS LAYOFFS.—Section 462(e) of the Job Training Partnership Act is amended—

(1) by striking out "and" at the end of paragraph (3);

(2) by striking out the period at the end of paragraph (4) and inserting in lieu thereof "; and"; and

(3) by adding at the end thereof the following:

"(5) the mass layoffs or closings that are caused by or substantially related to international trade.".

(c) DATA ON DISPLACED FARMERS AND RANCHERS.—Section 462 of such Act is further amended by adding at the end the following new subsection:

"(f)(1) The Secretary shall develop, in coordination with the Secretary of Agriculture, statistical data relating to permanent dislocation of farmers and ranchers due to farm and ranch failures. Among the data to be included are—

"(A) the number of such farm and ranch failures;

"(B) the number of farmers and ranchers displaced;

"(C) the location of the affected farms and ranches;

"(D) the types of farms and ranches involved; and

"(E) the farm and ranch failures that are caused by or substantially related to international trade.

"(2) The Secretary shall publish a report based upon such data as soon as practicable after the end of each calendar year. Such

report shall include a comparison of data contained therein with data currently used by the Bureau of Labor Statistics in determining the Nation's annual employment and unemployment rates and an analysis of whether farmers and ranchers are being adequately counted in such employment statistics.".

(d) FAILURE TO PROVIDE INTERNATIONALLY RECOGNIZED WORKER RIGHTS.—(1) The Secretary of Labor shall conduct a study to identify the countries that fail to recognize and enforce, and the producers that fail to comply with, internationally recognized worker rights. The Secretary shall consult with the Secretary of State in identifying the countries that fail to recognize and enforce and the producers that fail to comply with such rights.

(2) A report on the study conducted under this subsection shall be submitted to the Congress annually.

(3) As used in this Act, the term "internationally recognized worker rights" includes—

(A) the right of association;

(B) the right to organize and bargain collectively;

(C) the right to be free from the use of any form of forced or compulsory labor;

(D) a minimum age for the employment of children; and

(E) acceptable conditions of work with respect to minimum wages, maximum hours of work, and occupational safety and health.

TITLE VI—AGRICULTURAL TRADE

Subtitle A—Improvement of Agricultural Trade Policy and Market Development Activities

SEC. 601. PURPOSE OF SUBTITLE.

It is the purpose of this subtitle to increase the effectiveness of the Department of Agriculture in agricultural trade policy formulation and implementation and in assisting United States agricultural producers participate in international agricultural trade, by reorganizing and strengthening the operations of the Department of Agriculture in these areas.

SEC. 602. DESIGNATION OF THE DEPARTMENT OF AGRICULTURE AS LEAD AGENCY FOR AGRICULTURAL TRADE.

(a) IN GENERAL.—Subject to subtitle D of title I of this Act, and except as provided in subsection (b), the Department of Agriculture shall have primary responsibility within the executive branch of the Federal Government with respect to all matters concerning agricultural trade and agricultural trade policy.

(b) EXCEPTION.—The designation made in subsection (a) does not limit the exercise by the Department of Commerce and the International Trade Commission of the responsibilities and authority assigned them with respect to the regulation of United States agricultural imports.

SEC. 603. CONSULTATION BY THE SECRETARY OF AGRICULTURE.

The Secretary of Agriculture shall, through such mechanism as the President shall establish by executive order, consult with the appropriate officials of the other agencies of the Federal Government to coordinate actions and programs of such agencies affecting agricultural trade policy with the programs of the Department of Agriculture and with the agricultural trade policy of the United States.

SEC. 604. REORGANIZATION OF THE DEPARTMENT OF AGRICULTURE.

(a) UNDER SECRETARY FOR TRADE AND INTERNATIONAL AFFAIRS.—(1) The President, by and with the advice and consent of the Senate, shall appoint in the Department of Agriculture an Under Secretary of Agriculture for Trade and International Affairs (hereinafter in this title referred to as the "Under Secretary for Trade").

(2) The Under Secretary for Trade shall—

(A) assume the duties relating to international affairs of the Under Secretary of Agriculture for International Affairs and Commodity Programs;

(B) serve as a member of—

(i) the Board of Directors of the Commodity Credit Corporation;

(ii) the Trade Policy Review Group; and

(iii) the Subcommittee on Food Aid of the Development Coordination Committee;

(C) direct—

(i) all programs and duties performed by the Office of International Cooperation and Development;

(ii) all programs or duties performed by the International Transportation Service Branch of the Office of Transportation; and

(iii) such programs or duties currently assigned to the Forest Service, the Soil Conservation Service, the Food Safety and Inspection Service, the Federal Grain Inspection Service, the Animal and Plant Health Inspection Service, and other agencies within the Department of Agriculture as the Secretary of Agriculture finds to be directly related to agricultural export sales, market development, and relevant technical assistance; and

(D) perform such other functions and duties as may be required by law or prescribed by the Secretary of Agriculture.

(b) UNDER SECRETARY FOR COMMODITY PROGRAMS.—(1) The President, by and with the advice and consent of the Senate, shall appoint in the Department of Agriculture an Under Secretary of Agriculture for Commodity Programs.

(2) The Under Secretary of Agriculture for Commodity Programs shall—

(A) assume the duties relating to commodity programs of the Under Secretary of Agriculture for International Affairs and Commodity Programs;

(B) serve as a member of the Board of Directors of the Commodity Credit Corporation; and

(C) perform such other functions and duties as may be required by law or prescribed by the Secretary of Agriculture.

(c) CONFORMING REPEAL.—Section 501(a) of the Agricultural Trade Act of 1978 (7 U.S.C. 2211a(a)) is repealed.

(d) ADDITIONAL ASSISTANT SECRETARIES OF AGRICULTURE.—The President, by and with the advice and consent of the Senate, may appoint in the Department of Agriculture up to two additional Assistant Secretaries of Agriculture to assist the Under Secretary for Trade.

SEC. 605. CONFORMING AMENDMENTS TO TITLE 5, UNITED STATES CODE.

Title 5, United States Code, is amended by—

(1) in section 5314, striking out

"Under Secretary of Agriculture for International Affairs and Commodity Programs." and inserting in lieu thereof the following:

"Under Secretary of Agriculture for Commodity Programs.

"Under Secretary of Agriculture for Trade and International Affairs."; and

(2) in section 5315, striking out "Assistant Secretaries of Agriculture (7)." and inserting in lieu thereof "Assistant Secretaries of Agriculture (9).".

SEC. 606. TRANSFER OF ENTITIES TO THE FOREIGN AGRICULTURAL SERVICE AND ESTABLISHMENT OF COMMODITY DIVISION.

(a) TRANSFER OF ENTITIES.—The International Economics Division of the Economic Research Service, and the World Agricultural Outlook Board, of the Department of Agriculture shall be entities within the Foreign Agricultural Service of the Department of Agriculture.

(b) ESTABLISHMENT OF COMMODITY DIVISION.—(1) The Secretary shall establish within the Foreign Agricultural Service a commodity division to promote value-added products not covered by cooperator agreements and to help to develop a cooperator organization to support the marketing role of the division.

(2) The work and activities of such division shall include market analysis for products described in paragraph (1), as well as market development.

(3) Any cooperator organization referred to in paragraph (1) shall be as broadly based as possible and shall include export trading companies and export management companies dealing in food products, as well as manufacturers and distributors of individual brands and product lines.

SEC. 607. ESTABLISHMENT OF THE GENERAL SALES MANAGER'S OFFICE.

(a) ESTABLISHMENT.—The Secretary of Agriculture shall establish in the Department of Agriculture an office to be known as the "Office of the General Sales Manager" and appoint a General Sales Manager to head such office. The General Sales Manager shall be under the direction of the Under Secretary for Trade.

(b) DUTIES.—The General Sales Manager shall assume responsibility for all programs or duties performed by the Foreign Agricultural Service with respect to—

(1) export sales;

(2) market development;

(3) agricultural trade offices; and

(4) the requirements of titles I and III of the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1691 et seq.).

SEC. 608. ESTABLISHMENT OF OFFICE TO MONITOR TRADE PRACTICES.

(a) ESTABLISHMENT WITHIN THE DEPARTMENT OF AGRICULTURE.—The Secretary of Agriculture shall establish an office within the Department of Agriculture to carry out the duties described in subsection (b) under the direction of the Under Secretary for Trade.

(b) DUTIES.—The office established under subsection (a) shall—

(1) continuously monitor and study trade practices carried out by other nations to promote the export of agricultural commodities and products; and

(2) submit quarterly reports of its findings to the Secretary of Agriculture.

(c) REPORTING BY THE SECRETARY.—(1) Within 15 days after receiving a report under subsection (b), the Secretary of Agriculture shall submit to the committees listed in paragraph (2) any report received under subsection (b)(2), together with the Secretary's findings and recommendations with respect to the level of subsidies provided by other nations and the United States to promote the export of agricultural commodities and products.

(2) Items described under paragraph (1) shall be reported to—

(A) the Committee on Agriculture, Nutrition, and Forestry, the Committee on Foreign Relations, and the Committee on Finance of the Senate; and

(B) the Committee on Agriculture, the Committee on Foreign Affairs, and the Committee on Ways and Means of the House of Representatives.

SEC. 609. ESTABLISHING AN OFFICE TO PROVIDE ASSISTANCE TO VICTIMS OF UNFAIR TRADE PRACTICES.

(a) ESTABLISHMENT WITHIN THE DEPARTMENT OF AGRICULTURE.—The Secretary of Agriculture shall establish an office within the Department of Agriculture to carry out the duties described in subsection (b) under the direction of the Under Secretary for Trade.

(b) DUTIES.—The office established under subsection (a) shall take the following actions with respect to United States citizens and organizations damaged by unfair agricultural trade practices and policies:

(1) The Office shall assist such persons in preparing cases before—

(A) the United States Trade Representative;

(B) the International Trade Commission;

(C) the United States Department of Commerce;

(D) the Court of International Trade; and

(E) any other similar agency.

(2) The Office shall provide and update information to such persons regarding the incidence and severity of such practices and policies.

(3) The Office shall inform such persons of any adverse effect on them caused by such practices and policies of which they are not aware.

(4)(A) The Office shall report information relating to such unfair trade practices and the effects of such practices to the appropriate Federal agency or agencies, together with a recommendation by the Secretary of Agriculture with regard to what actions should be initiated under the trade laws.

(B) Upon receipt of such information and recommendation, the appropriate Federal agency or agencies shall consult with the Secretary of Agriculture with regard to what actions, if any, will be initiated and the reasons therefor.

(c) REPORT.—The Secretary of Agriculture shall submit, with the information described in section 608(c), a report of the assistance provided under this section.

(d) COORDINATION.—The Office shall coordinate its activities with the Fair Trade Advocate established under title I of this Act.

SEC. 610. PROVISION OF TECHNICAL ASSISTANCE IN TRADE NEGOTIATIONS.

The Secretary of Agriculture shall provide technical services to the United States Trade Representative on matters pertaining to agricultural trade and with respect to international negotiations on issues related to agricultural trade.

SEC. 611. LONG TERM AGRICULTURAL TRADE STRATEGY REPORTS.

(a) PREPARATION; MATTERS TO BE INCLUDED.—(1) The Secretary of Agriculture shall prepare, and the President shall submit together with the budget for each fiscal year, a Long Term Agricultural Trade Strategy Report establishing recommended policy and spending goals for United States agricultural trade and exports for 1-year, 5-year, and 10-year periods, beginning on October 1 of the next fiscal year. Each such report shall include the following:

(A) Findings with respect to trends in the comparative position of the United States and other nations in the export of agricultural commodities and products, organized by major commodity group and including a comparative analysis of the cost of production of such commodities and products.

(B) Findings with respect to new developments in research conducted by other nations that may affect the competitiveness of United States agricultural commodities and products.

(C) Findings and recommendations with respect to the marketing in nonmarket economies of United States agricultural commodities and products.

(D) The agricultural trade goals for every agricultural commodity and value-added product produced in the United States for the period in question, expressed in both physical volume and monetary value.

(E) Recommended Federal policy and programs to achieve the agricultural trade goals.

(F) Recommended levels of Federal spending on international programs and activities of the Department of Agriculture to meet the agricultural trade goals.

(G) Recommended levels of Federal spending on programs and activities of agencies other than the Department of Agriculture to meet the agricultural trade goals.

(H) Recommended long-term strategies for growth in agricultural trade and exports—

(i) taking into account United States domestic competitiveness, trade negotiations, and international monetary and exchange rate policies; and

(ii) including specific recommendations with respect to export enhancement programs (including credit programs and export payment-in-kind programs), market development activities, and foreign agricultural and economic development assistance activities needed to implement such strategies.

(2) Provisions of each Long Term Agricultural Trade Strategy Report that relate to recommended levels of spending on international activities of the Department of Agriculture for the upcoming fiscal year shall be treated as the President's annual budget submission to Congress for such programs for such fiscal year, and shall be submitted in addition to the budget request for other programs of the Department of Agriculture for such fiscal year.

(3) The President shall include in each Long Term Agricultural Trade Strategy Report recommendations for such changes in legislation governing international programs of the Department of Agriculture as are required to meet the long term goals established in the Report.

(b) IDENTIFICATION OF CHANGES THAT MAY AFFECT PREVIOUS REPORTS.—The President, in each succeeding annual Long Term Agricultural Trade Strategy Report after the first such report, shall identify any such recommendations that might modify the long term policy contained in any previous such report.

(c) ESTABLISHMENT OF OFFICE.—The Secretary of Agriculture shall establish within the Department of Agriculture an Office of Agricultural Trade Policy Planning and Evaluation under the direction of the Under Secretary for Trade. Such office shall coordinate the preparation of the President's Long Term Agricultural Trade Strategy Report.

SEC. 612. DECLARATION OF POLICY RESPECTING FOOD AID AND MARKET DEVELOPMENT.

It is the policy of the United States to use food aid and agriculturally related foreign economic assistance programs more effectively to develop markets for United States agricultural commodities and products.

SEC. 613. REPORTING BY THE SECRETARY OF AGRICULTURE.

(a) REPORTING ON CERTAIN PROGRAMS.—The Secretary of Agriculture, after consultation with the Administrator of the United States Agency for International Development, shall report annually to Congress on the extent that food aid and agriculturally related foreign economic assistance programs of the previous year, other than direct feeding or emergency food aid, that are administered by Federal agencies or by nongovernmental entities serve direct market development objectives for United States agricultural commodities and products.

(b) SCOPE OF REPORTING REQUIREMENT.—The programs referred to in subsection (a) include—

(1) programs under the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1691 et seq.);

(2) programs under section 416 of the Agricultural Act of 1949 (7 U.S.C. 1431) and the Food for Progress Act of 1985 (7 U.S.C. 1736o); and

(3) technical and economic assistance programs carried out by United States Agency for International Development.

SEC. 614. ESTABLISHMENT OF OFFICE OF FOOD AID POLICY.

(a) ESTABLISHMENT.—The Secretary of Agriculture shall establish in the Department of Agriculture the Office of Food Aid Policy (hereinafter in this section referred to as the "Office").

(b) DIRECTOR.—The Secretary of Agriculture shall appoint a director of the Office who shall—

(1) serve under the direction of the General Sales Manager;

(2) develop in cooperation with the director of the Office of Agricultural Trade Policy Planning and Evaluation a comprehensive strategy for coordinating agriculturally related foreign economic assistance, food aid, and market development objectives for United States agricultural commodities and products;

(3) monitor the compliance of programs and policies of Federal agencies and related entities with the market development objectives of the Department of Agriculture; and

(4) serve as the principal staff representative of the Secretary of Agriculture in deliberations of the staff working group of the Subcommittee on Food Aid of the Development Coordination Committee.

SEC. 615. COMMODITIES FOR COOPERATOR ORGANIZATIONS.

The Secretary of Agriculture is authorized to make available to cooperator organizations commodities owned by the Commodity Credit Corporation, which shall be used by such cooperators in projects designed to expand markets for United States agricultural commodities and products.

SEC. 616. DEPARTMENT OF AGRICULTURE CONTRACT AUTHORITY FOR INDIVIDUALS ABROAD.

The Secretary of Agriculture may contract with individuals outside the United States for personal services to be performed outside the United States. Such individuals shall not be regarded as employees of the United States Government under any law, including any law administered by the Office of Personnel Management.

SEC. 617. LIMITATION ON SPENDING AUTHORITY.

Any new spending authority created by the amendments made by section 605 shall be effective for any fiscal year only to the

extent provided for in advance in appropriation Acts.

SEC. 618. EXPORT ENHANCEMENT PROGRAM.

Section 1127(b) of the Food Security Act of 1985 (7 U.S.C. 1736v) is amended by—

(1) striking out paragraph (2) and inserting in lieu thereof the following:

"(2) shall, to the extent that agricultural commodities and products thereof are to be provided to foreign purchasers during any fiscal year, give priority to all interested foreign purchasers who—

"(A) have traditionally purchased United States agricultural commodities and the products thereof; and

"(B) continue or begin to purchase such commodities and the products thereof on an annual basis in quantities greater than the level of purchases in a previous representative period;";

(2) striking out "and" at the end of paragraph (4);

(3) striking out the period at the end of paragraph (5) and inserting "; and" in lieu thereof; and

(4) adding at the end the following:

"(6) shall report to the Committee on Agriculture and the Committee on Foreign Affairs of the House of Representatives and the Committee on Agriculture, Forestry, and Nutrition of the Senate every 30 days a current list of countries provided agricultural commodities and products under this section and a justification for participation in this section.".

SEC. 619. IMPLEMENTATION OF SECTIONS OF 1129 AND 1167 OF THE FOOD SECURITY ACT.

It is the sense of Congress that the Department of Agriculture should expedite the implementation of sections 1129 and 1167 of the Food Security Act of 1985 (Public Law 99-198), relating to the barter of agricultural commodities. Congress recognizes the importance of barter programs in expanding agricultural trade, and emphasizes this importance to the Department.

Subtitle B—Domestic Markets for Agricultural Commodities and Products

SEC. 631. STUDY RELATING TO HONEY.

(a) STUDY.—The Secretary of Agriculture shall conduct a study to determine the effect of imported honey on United States honey producers, the availability of honey bee pollination within the United States, and whether imports of honey tend to interfere with or render ineffective the honey price support program of the Department of Agriculture.

(b) REPORT.—Not later than 60 days after the date of the enactment of this Act, the Secretary shall report the results of such study to the Committee on Agriculture and the Committee on Ways and Means of the House of Representatives and to the Committee on Agriculture, Nutrition, and Forestry and the Committee on Finance of the Senate.

SEC. 632. ROSE STUDY AND REPORT.

(a) STUDY.—The Secretary of Agriculture, in conjunction with the United States Trade Representative, not later than 120 days after the date of enactment of this Act, shall complete a study—

(1) to determine the effect of rose imports during the period beginning January 1, 1982, and ending with the most recent calendar quarter for which information is available, into the United States on the domestic rose growing industry; and

(2) to provide an economic analysis of factors of production and marketing of such imports.

(b) REPORT.—The Secretary shall report the results of the study conducted under subsection (a), as soon as the study is completed, to the Committee on Agriculture and the Committee on Ways and Means of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry and the Committee on Finance of the Senate.

SEC. 633. DETERMINING MATERIAL INTERFERENCE CAUSED BY IMPORTED TOBACCO.

Section 22(a) of the Agricultural Adjustment Act (7 U.S.C. 624(a)) is amended by adding at the end thereof the following: "For purposes of any investigation conducted with respect to tobacco, or articles containing tobacco, imported into the United States, the Commission shall take into account contributions and assessments imposed under sections 106A and 106B of the Agricultural Act of 1949 (7 U.S.C. 1445-1, 1445-2) on tobacco producers in determining whether such imported tobacco or articles materially interfere with the tobacco price support program carried out by the Department of Agriculture.".

SEC. 634. IMPORT INVENTORY.

(a) COMPILATION AND REPORT ON IMPORTS.—The Secretary of Agriculture, in consultation with the Secretary of Commerce, the International Trade Commission, the United States Trade Representative, and any other Federal agency, shall compile and report to the public statistics on the total value and quantity of imported raw and processed agricultural products.

(b) COMPILATION AND REPORT ON CONSUMPTION.—The Secretary shall also compile data on the total amount of production and consumption of domestically produced raw and processed agricultural products.

(c) ISSUING OF DATA.—The data required from the Secretary under this section shall be compiled and issued in a format that correlates statistics for the quantity and value of imported agricultural products to the production and consumption of domestic agricultural products. The Secretary shall issue this report on a quarterly basis.

SEC. 635. SENSE OF CONGRESS—ACTION IN RESPONSE TO FOREIGN IMPORT RESTRICTIONS ON UNITED STATES CITRUS FRUITS AND BEEF PRODUCTS.

(a) FINDINGS.—The Congress finds that—

(1) trade partners of the United States are engaging in unreasonable, unjustifiable, and discriminatory acts, policies, and practices, including the use of import quotas, that tend effectively to prohibit or unreasonably burden United States exports of—

(A) oranges, grapefruit, and other citrus fruits; and

(B) fresh, chilled, and frozen beef and other beef products; and

(2) such acts, policies, and practices deny access to such markets for United States producers of such exports, reduce agricultural exports and farm income, and contribute to the United States trade deficit and the Federal budget deficit.

(b) SENSE OF CONGRESS.—It is the sense of the Congress that if a country is found to engage, in violation of the General Agreement on Tariffs and Trade, in any such acts, policies, and practices against any such United States exports the President should take steps, including the imposition of import fees and duties, which will result in the exclusion of the importation of similar or other products from such country found to be in violation of the General Agreement on Tariffs and Trade into the United States until such acts, policies, and practices are eliminated.

Subtitle C—Miscellaneous

SEC. 651. CLASS I AND II MILK.

(a) IN GENERAL.—Notwithstanding any other provision of law, milk produced by dairies—

(1) owned or controlled by foreign persons or entities; and

(2) financed by or with the use of industrial revenue bonds;

shall not be classified as class I or class II milk for the purposes of the milk marketing program under provisions of the Agricultural Adjustment Act reenacted with amendments by Agricultural Marketing Agreement Act of 1937.

(b) REGULATIONS.—The Secretary of Agriculture shall prescribe regulations to carry out this section.

(c) LIMITATION.—This section shall not apply with respect to any dairy that has begun operation before May 6, 1986.

SEC. 652. PROTECTION OF QUALITY OF EXPORT GRAIN.

Section 6 of the United States Grain Standards Act (7 U.S.C. 78) is amended by adding at the end thereof the following:

"(c)(1) To protect the quality of grain exported from the United States, no dockage or foreign material (including dust or particles of whatever origin) once removed from grain shall be recombined with any grain when there is a possibility that the recombined product may be exported from the United States; and no dockage or foreign material of any origin may be added to any grain that may be exported when the result will be to reduce the grade or quality of the grain or to reduce its ability to resist spoilage.

"(2) Nothing in paragraph (1) shall be construed to prohibit—

"(A) the treatment of grain to suppress, destroy, or prevent insects and fungi injurious to stored grains;

"(B) the export of dockage or foreign material removed from grain when such dockage or foreign material is pelletized or a part of a processed ration for livestock, poultry, or fish and is exported separately and uncombined with any whole grain; and

"(C) the addition to grain of confetti, or any other material that serves the same purpose, in an amount necessary to facilitate identification of ownership or origin of a particular lot of grain.

"(3) Adjustment of the moisture content of grain that may be exported is permitted by the blending of such grain with a similar grain of different moisture content if the difference between the moisture contents of the grains being blended does not exceed 4 per centum, but the addition of water to grain that may be exported is prohibited except by aeration of such grain with natural air.".

SEC. 653. FINDINGS AND SENSE OF CONGRESS WITH RESPECT TO THE EUROPEAN COMMUNITY.

(a) FINDINGS.—Congress finds that—

(1) as part of the terms under which Spain and Portugal joined the European Community in January of this year, the European Community has imposed import quotas on oilseeds and oilseed products in Portugal, in violation of the General Agreement on Tariffs and Trade (hereinafter in this section referred to as "GATT");

(2) the European Community has imposed a quota requiring that Portugal purchase at least 15.5 percent of its grain from other European Community countries, in violation of the GATT;

(3) the European Community has replaced GATT-bound 20 percent tariffs on corn and grain sorghum imports entering Spain with the European Community's variable levy system, which is currently equivalent to a tariff of more than 100 percent, before negotiating compensation as agreed to previously and directed by international trade rules;

(4) the restrictions imposed by the European Community will impair access for as much as $1,000,000,000 worth of United States agricultural products to markets in Portugal and Spain, and adversely affect the economic livelihood of United States farmers and related industries;

(5) despite Cabinet-level approaches to the European Community in recent months, the European Community has been unwilling to rescind the illegal quotas or to compensate the United States for the damage caused by the higher tariffs;

(6) prior enlargements of the European Community in 1973 and 1981 have adversely affected United States agricultural exports to the Community;

(7) the President on March 31 announced his intention to use existing authority to respond to the restrictions of the European Community by imposing quotas and tariff increases or by withdrawing tariff bindings to produce equivalent restrictive effects or comparable loss of trade on European Community imports into the United States; and

(8) the President's proposed actions to defend legitimate United States trade interests are consistent with a free but fair trade policy.

(b) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) the administration should continue to firmly oppose actions by the European Community to—

(A) impose quotas on oilseeds and oilseed products in Portugal;

(B) impose a grain purchase requirement quota on Portugal; and

(C) place variable levies on corn and grain sorghum entering Spain before negotiating compensation; and

(2) unless the European Community rescinds the trade-restrictive measures referred to in paragraph (1) or the United States receives prompt and complete compensation for any loss of trade resulting from the enlargement of the European Community, the administration should take actions, such as the President has announced, to impose trade restrictions on a sufficient value of exports of the European Community to the United States to reestablish the balance of concessions under the GATT and other international trade agreements.

TITLE VII—FOREIGN CORRUPT PRACTICES AND ADJUSTMENT PLAN REVIEW

SEC. 701. FOREIGN CORRUPT PRACTICES ACT AMENDMENTS.

(a) PROHIBITED TRADE PRACTICES BY ISSUERS.—Section 30A of the Securities Exchange Act of 1934 (15 U.S.C. 78dd-1) is amended to read as follows:

"PROHIBITED FOREIGN TRADE PRACTICES BY ISSUERS

"SEC. 30A. (a) It shall be unlawful for any issuer which has a class of securities registered pursuant to section 12 of this title or which is required to file reports under section 15(d) of this title, or for any officer, director, employee, or agent of such issuer or any stockholder thereof acting on behalf of such issuer, to make use of the mails or any means or instrumentality of interstate commerce corruptly in furtherance of an offer, payment, promise to pay, or authorization of the payment of any money, or offer, gift, promise to give, or authorization of the giving of anything of value to—

"(1) any foreign official for purposes of—

"(A) influencing any act or decision of such foreign official in his official capacity, including a decision to fail to perform his official functions; or

"(B) inducing such foreign official to use his influence with a foreign government or instrumentality thereof to affect or influence any act or decision of such government or instrumentality,

in order to assist such issuer in obtaining or retaining business for or with, or directing business to, any person, including the procurement of legislative, judicial, regulatory, or other action in seeking more favorable treatment by a foreign government;

"(2) any foreign political party or official thereof or any candidate for foreign political office for purposes of—

"(A) influencing any act or decision of such party, official, or candidate in its or his official capacity, including a decision to fail to perform his or its official functions; or

"(B) inducing such party, official, or candidate to use its or his influence with a foreign government or instrumentality thereof to affect or influence any act or decision of such government or instrumentality,

in order to assist such issuer in obtaining or retaining business for or with, or directing business to, any person, including the procurement of legislative, judicial, regulatory, or other action in seeking more favorable treatment by a foreign government; or

"(3) any person, while knowing or recklessly disregarding that all or a portion of such money or thing of value will be offered, given, or promised, directly or indirectly, to any foreign official, to any foreign political party or official thereof, or to any candidate for foreign political office, for purposes of—

"(A) influencing any act or decision of such foreign official, political party, party official, or candidate in his or its official capacity, including a decision to fail to perform his or its official functions; or

"(B) inducing such foreign official, political party, party official, or candidate to use his or its influence with a foreign government or instrumentality thereof to affect or influence any act or decision of such government or instrumentality,

in order to assist such issuer in obtaining or retaining business for or with, or directing business to, any person, including the procurement of legislative, judicial, regulatory, or other action in seeking more favorable treatment by a foreign government.

"(b)(1) It shall be a defense to actions under subsection (a) that—

"(A) the payment was made for the purpose of expediting or securing the performance of a routine governmental action by a foreign official; or

"(B) the payment, gift, offer, or promise of anything of value that was made, was expressly permitted under a law or regulation of the government of the country involved.

"(2) For purposes of paragraph (1)(A), the term 'routine governmental action' means an action which is ordinarily and commonly performed by a foreign official and includes—

"(A) processing governmental papers, such as visas and work orders;

"(B) loading and unloading cargoes; and

"(C) scheduling inspections associated with contract performance,

and actions of a similar nature. 'Routine governmental action' does not include any decision by a foreign official on the question of whether, or on what terms, to award new business to or to continue business with a particular party, or the procurement of legislative, judicial, regulatory, or other action in seeking more favorable treatment by a foreign government.

"(c) An issuer may not be held vicariously liable, either civilly or criminally, for a violation of subsection (a) by its employee or agent, who is not an officer or director, if—

"(1) such issuer has established procedures which can reasonably be expected to prevent and detect, insofar as practicable, any such violation by such employee or agent, and

"(2) the officer and employee of the issuer with supervisory responsibility for the conduct of the employee or agent used due diligence to prevent the commission of the offense by that employee or agent.

Such issuer shall have the burden of proving by a preponderance of the evidence that it meets the requirements set forth in paragraphs (1) and (2).

"(d) Not later than one year after the date of the enactment of the Export Enhancement Act of 1986, the Attorney General, after consultation with the Commission, the Secretary of Commerce, the United States Trade Representative, the Secretary of State, and the Secretary of the Treasury, and after obtaining the views of all interested persons through public notice and comment procedures, shall determine to what extent compliance with this section would be enhanced and the business community would be assisted by further clarification of the preceding provisions of this section and may, based on such determination and to the extent necessary and appropriate, issue—

"(1) guidelines describing specific types of conduct, associated with common types of export sales arrangements and business contracts, which for purposes of the Department's present enforcement policy, the Attorney General determines would be in conformance with the preceding provisions of this section; and

"(2) general precautionary procedures which issuers may use on a voluntary basis to conform their conduct to the Department's present enforcement policy regarding the preceding provisions of this section.

The Attorney General shall issue the guidelines and procedures referred to in the preceding sentence in accordance with the provisions of subchapter II of chapter 5 of title 5, United States Code, and those guidelines and procedures shall be subject to the provisions of chapter 7 of that title.

"(e)(1) The Attorney General, after consultation with appropriate departments and agencies of the United States and after obtaining the views of all interested persons through public notice and comment procedures, shall establish a procedure to provide responses to specific inquiries by issuers concerning conformance of their conduct with the Department's present enforcement policy regarding the preceding provisions of this section. The Attorney General shall, within 30 days after receiving such a request, made in accordance with that procedure, issue an opinion in response to that request. The opinion of the Attorney General shall state whether or not certain specified prospective conduct would, for purposes of the Department's present enforcement policy, violate the preceding provisions of

this section. Additional requests for opinions may be filed with the Attorney General regarding other specified prospective conduct that is beyond the scope of conduct specified in previous requests. In any action brought under the applicable provisions of this Act, there shall be a rebuttable presumption that conduct, which is specified in a request by an issuer and for which the Attorney General has issued an opinion that such conduct is in conformity with the Department's present enforcement policy, is in compliance with the preceding provisions of this section. Such a presumption of compliance may be rebutted by a preponderance of the evidence. In considering the presumption of compliance for purposes of this subparagraph, a court shall weigh all relevant factors, including but not limited to whether the information submitted to the Attorney General was accurate and complete and whether it was within the scope of the conduct specified in any request received by the Attorney General. The Attorney General shall establish the procedure required by this paragraph in accordance with the provisions of subchapter II of chapter 5 of title 5, United States Code, and that procedure shall be subject to the provisions of chapter 7 of that title.

"(2) Any document or other material which is provided to, received by, or prepared in the Department of Justice or any other department or agency of the United States in connection with a request by an issuer under the procedure established under paragraph (1), shall be exempt from disclosure under section 552 of title 5, United States Code, and shall not be made publicly available regardless of whether the Attorney General responds to such a request or the issuer withdraws such request before receiving a response.

"(3) Any issuer who has made a request to the Attorney General under paragraph (1) may withdraw such request prior to the time the Attorney General issues an opinion in response to such request. Any request so withdrawn shall have no force or effect.

"(4) The Attorney General shall, to the maximum extent practicable, provide timely guidance concerning the Department's present enforcement policy with respect to the preceding provisions of this section to potential exporters and small businesses that are unable to obtain specialized counsel on issues pertaining to such provisions. Such guidance shall be limited to responses to requests under paragraph (1) concerning conformity of specified prospective conduct with the Department's present enforcement policy regarding the preceding provisions of this section and general explanations of compliance responsibilities and of potential liabilities under the preceding provisions of this section.

"(f) For purposes of this section—

"(1) the term 'foreign official' means any officer or employee of a foreign government or any department, agency, or instrumentality thereof, and any person acting in an official capacity for or on behalf of any such government or department, agency, or instrumentality;

"(2) a person meets the 'knowing' standard for purposes of subsection (a)(3) if—

"(A) that person is aware or substantially certain, or

"(B) that person is aware of a high probability, which he or she consciously disregards in order to avoid awareness or substantial certainty, and does not have an actual belief to the contrary,

that a third party will offer, pay, promise, or give anything of value to a foreign official, foreign political party or official thereof, or candidate for political office for purposes prohibited by subsection (a)(3);

"(3) a person meets the 'recklessly disregarding' standard of subsection (a)(3) if that person is aware of a substantial risk that a third party will offer, pay, promise, or give anything of value to a foreign official, foreign political party or official thereof, or candidate for political office for purposes prohibited by subsection (a)(3), but disregards that risk; and

"(4) the term 'substantial risk' means a risk that is of such a nature and degree that to disregard it constitutes a substantial deviation from the standard of care that a reasonable person would exercise in such a situation.".

(b) VIOLATIONS.—Section 32(c) of the Securities Exchange Act of 1934 (15 U.S.C. 78ff) is amended to read as follows:

"(c)(1)(A) Any issuer that—

"(i) violates section 30A(a) (1) or (2); or

"(ii) violates section 30A(a)(3) and meets the 'knowing' standards of that section (as defined by section 30A(f)(2)),

shall be fined not more than $2,000,000.

"(B) Any issuer that violates section 30A(a) shall be subject to a civil penalty of not more than $10,000 imposed in an action brought by the Commission.

"(2)(A) Any officer or director of an issuer, or stockholder acting on behalf of such issuer, who—

"(i) willfully violates section 30A(a) (1) or (2); or

"(ii) willfully violates section 30A(a)(3) and meets the 'knowing' standard of that section,

shall be fined not more than $100,000, or imprisoned not more than 5 years, or both.

"(B) Any employee or agent of an issuer who is a United States citizen, national, or resident or is otherwise subject to the jurisdiction of the United States (other than an officer, director, or stockholder acting on behalf of such issuer), and who—

"(i) willfully violates section 30A(a) (1) or (2); or

"(ii) willfully violates section 30A(a)(3) and meets the 'knowing' standard of that section,

shall be fined not more than $100,000, or imprisoned not more than 5 years, or both.

"(C) Any officer, director, employee, or agent of an issuer, or stockholder acting on behalf of such issuer, who violates section 30A(a) shall be subject to a civil penalty of not more than $10,000 imposed in an action brought by the Commission.

"(3) Whenever a fine is imposed under paragraph (2) upon any officer, director, employee, agent, or stockholder of an issuer, such fine may not be paid, directly or indirectly, by such issuer.".

(c) PROHIBITED TRADE PRACTICES BY DOMESTIC CONCERNS.—Section 104 of the Foreign Corrupt Practices Act of 1977 (15 U.S.C. 78dd-2) is amended to read as follows:

"PROHIBITED FOREIGN TRADE PRACTICES BY DOMESTIC CONCERNS

"SEC. 104. (a) PROHIBITION.—It shall be unlawful for any domestic concern, other than an issuer which is subject to section 30A of the Securities Exchange Act of 1934, or for any officer, director, employee, or agent of such domestic concern or any stockholder thereof acting on behalf of such domestic concern, to make use of the mails or any means or instrumentality of interstate commerce corruptly in furtherance of an offer, payment, promise to pay, or authorization of the payment of any money, or offer, gift, promise to give, or authorization of the giving of anything of value to—

"(1) any foreign official for purposes of—

"(A) influencing any act or decision of such foreign official in his official capacity, including a decision to fail to perform his official functions; or

"(B) inducing such foreign official to use his influence with a foreign government or instrumentality thereof to affect or influence any act or decision of such government or instrumentality,

in order to assist such domestic concern in obtaining or retaining business for or with, or directing business to, any person, including the procurement of legislative, judicial, regulatory, or other action in seeking more favorable treatment by a foreign government;

"(2) any foreign political party or official thereof or any candidate for foreign political office for purposes of—

"(A) influencing any act or decision of such party, official, or candidate in its or his official capacity, including a decision to fail to perform his official functions; or

"(B) inducing such party, official, or candidate to use its or his influence with a foreign government or instrumentality thereof to affect or influence any act or decision of such government or instrumentality,

in order to assist such domestic concern in obtaining or retaining business for or with, or directing business to, any person, including the procurement of legislative, judicial, regulatory, or other action in seeking more favorable treatment by a foreign government; or

"(3) any person, while knowing or recklessly disregarding that all or a portion of such money or thing of value will be offered, given, or promised, directly or indirectly, to any foreign official, to any foreign political party or official thereof, or to any candidate for foreign political office, for purposes of—

"(A) influencing any act or decision of such foreign official, political party, party official, or candidate in his or its official capacity, including a decision to fail to perform his or its official functions; or

"(B) inducing such foreign official, political party, party official, or candidate to use his or its influence with a foreign government or instrumentality thereof to affect or influence any act or decision of such government instrumentality,

in order to assist such domestic concern in obtaining or retaining business for or with, or directing business to, any person, including the procurement of legislative, judicial, regulatory, or other action in seeking more favorable treatment by a foreign government.

"(b) DEFENSES.—(1) It shall be a defense to actions under subsection (a) that—

"(A) the payment was made for the purpose of expediting or securing the performance of a routine governmental action by a foreign official; or

"(B) the payment, gift, offer, or promise of anything of value that was made was expressly permitted under any law or regulation of the government of the country involved.

"(2) For purposes of paragraph (1)(A), the term 'routine governmental action' means an action which is ordinarily and commonly performed by a foreign official and includes—

"(A) processing governmental papers, such as visas and work orders;

"(B) loading and unloading cargoes; and

"(C) scheduling inspections associated with contract performance,

and actions of a similar nature. 'Routine governmental action' does not include any decision by a foreign official on the question of whether, or on what terms, to award new business to or to continue business with a particular party, or the procurement of legislative, judicial, regulatory, or other action in seeking more favorable treatment by a foreign government.

"(c) DUE DILIGENCE.—A domestic concern which is not an individual may not be held vicariously liable, either civilly or criminally, for a violation of subsection (a) by its employee or agent, who is not an officer or director, if—

"(1) such domestic concern has established procedures which can reasonably be expected to prevent and detect, insofar as practicable, any such violation by such employee or agent, and

"(2) the officer and employee of the domestic concern with supervisory responsibility for the conduct of the employee or agent used due diligence to prevent the commission of the offense by that employee or agent.

Such domestic concern shall have the burden of proving by a preponderance of the evidence that it meets the requirements set forth in paragraphs (1) and (2). The first sentence of this subsection shall be considered an affirmative defense to actions under subsection (a).

"(d) GUIDELINES BY THE ATTORNEY GENERAL.—Not later than 6 months after the date of the enactment of the Export Enhancement Act of 1986, the Attorney General, after consultation with the Securities and Exchange Commission, the Secretary of Commerce, the United States Trade Representative, the Secretary of State, and the Secretary of the Treasury, and after obtaining the views of all interested persons through public notice and comment procedures, shall determine to what extent compliance with this section would be enhanced and the business community would be assisted by further clarification of the preceding provisions of this section and may, based on such determination and to the extent necessary and appropriate, issue—

"(1) guidelines describing specific types of conduct, associated with common types of export sales arrangements and business contracts, which for purposes of the Department's present enforcement policy, the Attorney General determines would be in conformance with the preceding provisions of this section; and

"(2) general precautionary procedures which domestic concerns may use on a voluntary basis to conform their conduct to the Department's present enforcement policy regarding the preceding provisions of this section.

The Attorney General shall issue the guidelines and procedures referred to in the preceding sentence in accordance with the provisions of subchapter II of chapter 5 of title 5, United States Code, and those guidelines and procedures shall be subject to the provisions of chapter 7 of that title.

"(e) OPINIONS OF THE ATTORNEY GENERAL.—(1) The Attorney General shall, within 30 days after receiving a request which relates to compliance with the preceding provisions of this section, review the proposed conduct and state the present enforcement intention of the Department of Justice. Such a statement shall be final and binding on the Department, subject to the discovery of new evidence with respect to the conduct.

"(2) Any document or other material which is provided to, received by, or prepared in the Department of Justice or any other department or agency of the United States in connection with a request by a domestic concern under the procedure established under paragraph (1), shall be exempt from disclosure under section 552 of title 5, United States Code, and shall not be made publicly available regardless of whether the Attorney General responds to such a request or the domestic concern withdraws such request before receiving a response.

"(3) Any domestic concern who has made a request to the Attorney General under paragraph (1) may withdraw such request prior to the time the Attorney General issues an opinion in response to such request. Any request so withdrawn shall have no force or effect.

"(4) The Attorney General shall, to the maximum extent practicable, provide timely guidance concerning the Department's present enforcement policy with respect to the preceding provisions of this section to potential exporters and small businesses that are unable to obtain specialized counsel on issues pertaining to such provisions. Such guidance shall be limited to responses to requests under paragraph (1) concerning conformity of specified prospective conduct with the Department's present enforcement policy regarding the preceding provisions of this section and general explanations of compliance responsibilities and of potential liabilities under the preceding provisions of this section.".

"(f) VIOLATIONS.—(1)(A) Any domestic concern that—

"(i) violates subsection (a)(1) or (2); or

"(ii) violates subsection (a)(3) and meets the 'knowing' standards of that subsection (as defined by subsection (h)(4)),

shall be fined not more than $2,000,000.

"(B) Any domestic concern that violates subsection (a) shall be subject to a civil penalty of not more than $10,000 imposed in an action brought by the Commission.

"(2)(A) Any officer or director of a domestic concern, or stockholder acting on behalf of such domestic concern, who—

"(i) willfully violates subsection (a)(1) or (2); or

"(ii) willfully violates subsection (a)(3) and meets the 'knowing' standard of that subsection,

shall be fined not more than $100,000, or imprisoned not more than 5 years, or both.

"(B) Any employee or agent of a domestic concern who is a United States citizen, national, or resident or is otherwise subject to the jurisdiction of the United States (other than an officer, director, or stockholder acting on behalf of such domestic concern), and who—

"(i) willfully violates subsection (a)(1) or (2); or

"(ii) willfully violates subsection (a)(3) and meets the 'knowing' standard of that section,

shall be fined not more than $100,000, or imprisoned not more than 5 years, or both.

"(C) Any officer, director, employee, or agent of a domestic concern, or stockholder acting on behalf of such domestic concern, who violates subsection (a) shall be subject to a civil penalty of not more than $10,000 imposed in an action brought by the Commission.

"(3) Whenever a fine is imposed under paragraph (2) upon any officer, director, employee, agent, or stockholder of a domestic concern, such fine may not be paid, directly or indirectly, by such domestic concern.".

"(g) INJUNCTIONS.—Whenever it appears to the Attorney General that any domestic concern or officer, director, employee, agent, or stockholder thereof is engaged, or is about to engage, in any act or practice constituting a violation of subsection (a), the Attorney General may bring a civil action in an appropriate district court of the United States to enjoin such act or practice, and upon a proper showing a permanent or temporary injunction or a temporary restraining order shall be granted without bond.

"(h) DEFINITIONS.—As used in this section—

"(1) the term 'domestic concern' means—

"(A) any individual who is a citizen, national, or resident of the United States; and

"(B) any corporation, partnership, association, joint-stock company, business trust, unincorporated organization, or sole proprietorship which has its principal place of business in the United States, or which is organized under the laws of a State of the United States or a territory, possession, or commonwealth of the United States;

"(2) the term 'foreign official' means any officer or employee of a foreign government or any department, agency, or instrumentality thereof, and any person acting in an official capacity for or on behalf of any such government or department, agency, or instrumentality;

"(3) the term 'interstate commerce' means trade, commerce, transportation, or communication among the several States, or between any foreign country and any State or between any State and any place or ship outside thereof, and such term includes the intrastate use of—

"(A) a telephone or other interstate means of communication, or

"(B) any other interstate instrumentality.

"(4) a person has 'knowledge' for purposes of subsection (a)(3) if—

"(A) that person is aware or substantially certain, or

"(B) that person is aware of a high probability, which he or she consciously disregards in order to avoid awareness or substantial certainty, and does not have an actual belief to the contrary,

that a third party will offer, pay, promise, or give any—

"(4) a person meets the 'knowing' standard for purposes of subsection (a)(3) if—

"(A) that person is aware or substantially certain, or

"(B) that person is aware of a high probability, which he or she consciously disregards in order to avoid awareness or substantial certainty, and does not have an actual belief to the contrary,

that a third party will offer, pay, promise, or give anything of value to a foreign official, foreign political party or official thereof, or candidate for political office for purposes prohibited by subsection (a)(3);

"(5) a person meets the 'recklessly disregarding' standard of subsection (a)(3) if that person is aware of a substantial risk that a third party will offer, pay, promise, or give anything of value to a foreign official, foreign political party or official thereof, or candidate for political office for purposes prohibited by subsection (a)(3), but disregards that risk; and

"(6) the term 'substantial risk' means a risk that is of such a nature and degree that

to disregard it constitutes a substantial deviation from the standard of care that a reasonable person would exercise in such a situation.".

(d) INTERNATIONAL AGREEMENT.—

(1) NEGOTIATIONS.—It is the sense of the Congress that the President should pursue the negotiation of an international agreement, among the largest possible number of countries, to govern persons from those countries concerning acts prohibited with respect to issuers and domestic concerns by the amendments made by this section. Such international agreement should include a process by which problems and conflicts associated with such acts could be resolved.

(2) REPORT TO CONGRESS.—(A) Within 1 year after the date of the enactment of this Act, the President, taking into consideration the report submitted under subsection (d), shall submit to the Congress a report on—

(i) the progress of the negotiations referred to in paragraph (1),

(ii) those steps which the executive branch and the Congress should consider taking in the event that these negotiations do not successfully eliminate the competitive disadvantage of United States businesses that results when persons from other countries commit the acts described in paragraph (1); and

(iii) possible actions that could be taken to promote cooperation by other countries in international efforts to prevent bribery of foreign officials, candidates, or parties in third countries.

(B) The President shall include in the report submitted under subparagraph (A)—

(i) any legislative recommendations necessary to give the President the authority to take appropriate action to carry out clauses (ii) and (iii) of subparagraph (A);

(ii) an analysis of the potential effect on the interests of the United States, including United States national security, when persons from other countries commit the acts described in paragraph (1); and

(iii) an assessment of the current and future role of private initiatives in curtailing such acts.

SEC. 702. ADJUSTMENT PLAN REVIEW.

(a) IN GENERAL.—If—

(1) an industry adjustment plan is prepared for a domestic industry under section 203 of the Trade Act of 1974 (hereinafter referred to as the "Act") incident to an investigation under section 204 of the Act; and

(2) import relief is provided to that industry under section 205 of the Act as a result of that investigation;

a review committee, consisting of the United States Trade Representative, the Secretary of Labor, the Secretary of the Treasury, and the Secretary of Commerce (who shall chair the committee) shall—

(A) monitor, on a continuing basis, actions taken by the workers and firms in the industry to improve the competitive position of the industry, including actions mentioned in information obtained under section 203(d) of the Act;

(B) make such recommendations for administrative action under existing statutory authority as may be necessary to achieve the objectives and steps that are specified in the plan; and

(C) after consultation with the industry adjustment advisory group that prepared the plan and with other appropriate industry advisory groups, submit to Congress such recommended legislation as the review committee considers necessary or appropriate for the purpose of achieving such objectives and steps.

(b) CONSULTATION AFTER REVIEW.—If the review committee determines under subsection (a) with respect to an industry adjustment plan that the firms or workers in the domestic industry are not implementing, or are implementing in an unsatisfactory manner, the objectives, steps, and actions specified in the plan (including actions mentioned in the information obtained under section 203(d) of the Act), the review committee shall consult with the firms and workers in the industry on an individual or joint basis, as appropriate.

(c) ACTION AFTER CONSULTATION.—

(1) If, after consultation under subsection (b) and after taking into account such other relevant information as may be available, the review committee determines that the failure to implement, or failure to implement satisfactorily, the objectives, steps, and actions referred to in subsection (b)—

(A) is not justified by changed circumstances; and

(B) has adversely affected overall implementation of the objectives and steps specified in the industry adjustment plan;

the Secretary of Commerce shall inform the United States Trade Representative of the determination and the United States Trade Representative shall then request the United States International Trade Commission to issue a report under section 207(b) of the Act within 60 days of the date of such request.

(2) After taking the report prepared by the Commission under paragraph (1) and the determination of the review committee into account, the United States Trade Representative shall—

(A) determine whether the import relief provided to the industry under section 205 of the Act should be terminated or modified; and

(B) may provide for the termination of the relief or for such modification of the relief as he considers necessary or appropriate.

TITLE VIII—TARIFF AND CUSTOMS PROVISIONS

SEC. 801. REFERENCE.

Whenever in this title an amendment or repeal is expressed in terms of an amendment to, or repeal of, a schedule, headnote, item, or other provision, the reference shall be considered to be made to a schedule, headnote, item, or other provision of the Tariff Schedules of the United States (19 U.S.C. 1202).

Subtitle A—Miscellaneous Tariff and Customs Provisions

CHAPTER 1—PERMANENT CHANGES IN TARIFF TREATMENT

SEC. 811. IMPORTATION OF FURSKINS.

Headnote 4 to subpart B of part 5 of schedule 1 is repealed.

SEC. 812. SALTED AND DRIED PLUMS.

Subpart B of part 9 of schedule 1 is amended—

(1) by amending the item description for item 149.26 to read as follows: "Dried, salted, or not salted but not otherwise further prepared"; and

(2) by striking out item 149.28 and inserting the following:

	"Otherwise prepared or preserved:		
149.30	Plums, soaked in brine and dried	2¢ per lb.	2¢ per lb.
149.31	Other	17.5% ad val.	35% ad val.".

SEC. 813. GRAPEFRUIT.

Subpart A of part 12 of schedule 1 is amended by—

(1) inserting after item 165.29 the following new items and the superior heading thereto, with the superior heading at the same indentation level as the superior heading "Orange" to items 165.27 and 165.29:

	"Grapefruit:		
165.31	Not concentrated and not made from a juice having a degree of concentration of 1.5 or more (as determined before correction to the nearest 0.5 degree).	20¢ per gal.	70¢ per gal.
165.34	Other	35¢ per gal.	70¢ per gal.";

and

(2) by redesignating items 165.32 and 165.36 as items 165.37 and 165.38, respectively.

SEC. 814. CARROTED FURSKINS.

Subpart D of part 15 of schedule 1 is amended—

(1) by amending item 186.20—

(A) by striking out "use, and carroted furskins" in the article description and inserting "use", and

(B) by striking out "15% ad val." in column 1 and inserting "Free"; and

(2) by inserting after item 186.20 the following new item:

"186.22	Carroted furskins	15% ad val.	35% ad val.".

SEC. 815. TARIFF TREATMENT OF CERTAIN TYPES OF PLYWOOD.

Headnote 1 of part 3 of schedule 2 is amended—

(1) in paragraph (b) by inserting immediately before the semicolon at the end thereof the following: "or any edge of which has been tongued, grooved, lapped, or otherwise worked";

(2) in paragraph (c) by inserting immediately before the semicolon at the end thereof the following: "or any edge of which has been tongued, grooved, lapped, or otherwise worked"; and

(3) in paragraph (e) by inserting before "chiefly" the following: "other than plywood, wood-veneer panels, or cellular panels,".

SEC. 816. BROADWOVEN FABRICS OF MAN-MADE FIBERS.

(a) AMENDMENT.—Subpart E of part 3 of schedule 3 is amended by striking out item 338.50 and inserting the following new items with the article description for item 338.60 at the same indentation level as the article description for item 338.40:

"338.60	Containing 85% or more by weight of continuous man-made fibers.	2¢ per lb. + 17.9% ad val.	81% ad val.
	Other:		
338.70	Weighing not more than 5 oz. per square yard	2¢ per lb. + 17.9% ad val.	81% ad val
338.80	Other	2¢ per lb. + 17.9% ad val.	81% ad val.".

(b) STAGING.—The rate of duty in column numbered 1 for each of items 338.60, 338.70, and 338.80 (as added by subsection (a)) shall be subject to all staged rate reductions for item 338.50 which were proclaimed by the President before the date on which the amendments made by subsection (a) take effect.

SEC. 817. URANIUM HEXAFLUORIDE (UF_6).

(a) AMENDMENT.—Subpart C of part 2 of schedule 4 is amended by redesignating item 422.52 as item 422.54, and by inserting after item 422.50 the following new items and the superior heading thereto, with the superior heading at the same indentation level as the article description for item 422.50:

	"Hexafluoride (UF_6):		
422.51	If imported for use in reactors in the United States and a product of a country that requires that uranium mined in that country be converted or upgraded into uranium hexafluoride (UF_6) before export.	$3 per lb	$3 per lb.
422.53	Other	Free	Free."

(b) TERMINATION.—Items 422.51 and 422.53 (as added by subsection (a)) shall cease to have force and effect, and the President shall by proclamation eliminate such items, and the superior heading thereto, when the President finds that no foreign country requires the conversion or upgrading of uranium mined in that country into uranium hexafluoride (UF_6) before export from that country.

SEC. 818. SILICONE RESINS AND MATERIALS.

(a) AMENDMENT.—Part 4 of schedule 4 is amended—

(1) by amending subpart A—

(A) by striking out "provided for in part 1C" in headnote 1 and inserting ", other than silicones, provided for in part 1", and

(B) by amending headnote 2 to read as follows:

"2. (a) The term 'synthetic plastics materials' in this subpart—

"(i) embraces products formed by the condensation, polymerization, or copolymerization of organic chemicals and to which an antioxidant, color, dispersing agent, emulsifier, extender, filler, pesticide, plasticizer, or stabilizer may have been added; and

"(ii) includes silicones (including fluids, resins, elastomers, and copolymers) whether or not such materials are solid in the finished articles.

"(b) The products referred to in (a) contain as an essential ingredient an organic substance of high molecular weight; and, except as provided in (a)(ii) of this headnote, are capable, at some stage during processing into finished articles, of being molded or shaped by flow and are solid in the finished article. The term includes, but is not limited to, such products derived from esters of acrylic or methacrylic acid; vinyl acetate, vinyl chloride resins, polyvinyl alcohol, acetals, butyral, formal resins, polyvinyl ether and ester resins, and polyvinylidene chloride resins; urea and amino resins; polyethylene, polypropylene, and other polyalkene resins; siloxanes, silicones, and other organo-silicon resins; alkyd, acrylonitrile, allyl, and formaldehyde resins, and cellulosic plastics materials. These synthetic plastics materials may be in solid, semi-solid, or liquid condition such as flakes, powders, pellets, granules, solutions, emulsions, and other basic crude forms not further processed.",

(C) by inserting after item 445.54 the following new item with the article description at the same indentation level as the article description for item 445.54:

"445.55	Silicone resins and materials.	3.9% ad val.	3.7% ad val.	25% ad val.".

and

(D) by redesignating item 445.56 as item 445.60; and

(2) by amending headnote 2 to subpart B by adding at the end thereof the following:

"(c) For the purpose of the tariff schedules, the term 'rubber' does not include silicones.".

(b) STAGING.—Effective with respect to articles entered, or withdrawn from warehouse for consumption, after December 31, 1986, item 445.55 is amended—

(1) by striking out "3.9% ad val." in column 1 and inserting "3.7% ad val."; and

(2) by striking out "3.7% ad val." in the "Special" column.

(c) CONSEQUENTIAL AMENDMENT.—(c) Whenever the rate of duty specified in column 1 for item 445.55 is reduced to the same level as the corresponding rate of duty specified in the column entitled "Special" for such item, or to a lower level, the rate of duty in such "Special" column shall be deleted.

SEC. 819. CLASSIFICATION OF NAPHTHA AND MOTOR FUEL BLENDING STOCKS.

Part 10 of schedule 4 is amended—

(1) by amending headnote 1 by inserting "motor fuel blending stocks," immediately after "except";

(2) by amending headnote 2—

(A) by striking out "and" at the end of subdivision (a);

(B) by striking out the period at the end of subdivision (b) and inserting "; and"; and

(C) by adding at the end thereof the following:

"(c) 'Motor fuel blending stock' (item 475.27) means any product (except naphthas provided for in item 475.35) derived primarily from petroleum, shale oil, or natural gas, whether or not containing additives, to be used for direct blending in the manufacture of motor fuel.";

(3) by inserting in numerical sequence the following new item:

"475.27	Motor fuel blending stocks	1.25¢ per gal	2.5¢ per gal.".	

and

(4) by amending 475.30 by striking out "fuel)" and inserting "fuel or motor fuel blending stocks)".

SEC. 820. TELEVISION APPARATUS AND PARTS.

(a) PERMANENT TREATMENT.—The headnotes to part 5 of schedule 6 are amended—

(1) by amending headnote 3 by striking out "assembled," in subparagraph (a) and inserting "assembled in its cabinet,";

(2) by redesignating headnotes 4, 5, and 6 as headnotes 5, 6, and 7, respectively; and

(3) by inserting after headnote 3 the following new headnote:

"4. Picture tubes imported in combination with, or incorporated into, other articles are to be classified in items 687.35 through 687.44, inclusive, unless they are—

"(i) incorporated into complete television receivers, as defined in headnote 3;

"(ii) incorporated into fully assembled units such as word processors, ADP terminals, or similar articles;

"(iii) put up in kits containing all the parts necessary for assembly into complete television receivers, as defined in headnote 3; or

"(iv) put up in kits containing all the parts necessary for assembly into fully assembled units such as word processors, ADP terminals, or similar articles.".

(b) TEMPORARY TREATMENT.—Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new items:

"912.14	Television picture tubes which would be included in assemblies provided for in item 684.96 but for headnote 4 to part 5, and not provided in item 912.16.	11% ad val.	No change	On or before 10/31/87"; and
"912.16	Television picture tubes, color, having a video display diagonal of less than 12 inches and under (provided for in item 687.35, part 5, schedule 6).	Free	No change	On or before 12/31/90".

SEC. 821. BICYCLE-TYPE AND EXERCISER-TYPE SPEEDOMETERS.

(a) AMENDMENT.—Subpart D of part 2 of schedule 7 is amended by striking out item 711.93 and inserting the following new item with the article description at the same indentation level as the article description for item 711.90:

"711.92	Bicycle-type and exerciser-type speedometers and parts thereof.	18.3% ad val.	17% ad val.	110% ad val.".

(b) STAGING.—

(1) the rate of duty in column numbered 1 for item 711.92 (as added by subsection (a)) shall be subject to all staged rate reductions for item 711.93 that were proclaimed by the President before the 15th day after the date of the enactment of this Act.

(2) whenever the rate of duty specified in column numbered 1 for such item 711.92 is reduced to the same level as the corresponding LDDC rate of duty specified in the column entitled "Special" for such item, or to a lower level, the LDDC rate of duty in such "Special" column shall be deleted.

SEC. 822. MARKING OF WATCHES AND WATCH COMPONENTS.

Headnote 4 to subpart E of part 2 of schedule 7 is amended to read as follows:

"4. Special Marking Requirements: Any movement or case provided for in this subpart, whether imported separately or attached to any article provided for in this subpart, shall not be permitted to be entered unless legibly and indelibly marked by cutting, die-sinking, engraving, stamping, or mold-marking (either indented or raised), as specified below:

"(a) Watch movements shall be marked on one or more of the bridges or top plates to show—

"(i) the name of the country of manufacture;

"(ii) the name of the manufacturer or purchaser; and

"(iii) in words, the number of jewels, if any, serving a mechanical purpose as frictional bearings.

"(b) Clock movements shall be marked on the most visible part of the front or back plate to show—

"(i) the name of the country of manufacture;

"(ii) the name of the manufacturer or purchaser; and

"(iii) the number of jewels, if any.

"(c) Watch cases shall be marked on the inside or outside of the back case, or, at the option of the manufacturer, bezels shall be marked, to show—

"(i) the name of the country of manufacture; and

"(ii) the name of the manufacturer or purchaser.

If the manufacturer chooses to mark the bezels, it shall be entitled to use an alphanumeric code to designate the name of the country of manufacture and the name of the manufacturer or purchaser, so long as each such code and its referent are not duplicative of any other code and referent and are subject to inspection by the public.

"(d) Clock cases provided for in this subpart shall be marked on the most visible part of the outside of the back to show the name of the country of manufacture.".

SEC. 823. CASEIN.

(a) HUMAN FOOD AND ANIMAL FEED USE.—Subpart D of part 4 of schedule 1 is amended by striking out item 118.45 and inserting the following:

	"Casein, caseinates, and milk protein concentrate for human food and animal feed use:			

118.46	Dried milk (described in items 115.45, 115.50, 115.55, and 118.05) which contains not over 5.5 percent by weight of butterfat and which is mixed with other ingredients, including but not limited to sugar, if such mixtures contain over 16 percent milk solids by weight, are capable of being further processed or mixed with similar or other ingredients and are not prepared for marketing to the retail consumers in the identical form and package in which imported..	1.3¢ per lb.....	5.5¢ per lb.
118.48	Other.....	0.2¢ per lb.....	5.5¢ per lb".

(b) INDUSTRIAL USE.—Subpart B of part 13 of schedule 4 is amended—

(1) by amending the superior heading to items 493.12, 493.14, and 493.17 to read as follows: "Casein and mixtures in chief value of casein (other than a product described in 118.45) for use other than in human food or animal feed:";

(2) by striking out the superior heading to items 493.14 and 493.17;

(3) by striking out item 493.14; and

(4) by aligning item 493.17 at the same indentation level as the article description for item 493.12.

CHAPTER 2—TEMPORARY CHANGES IN TARIFF TREATMENT

SEC. 831. COLOR COUPLERS AND COUPLER INTERMEDIATES.

Subpart B of part 1 of the Appendix is amended—

(1) by inserting ", but excluding 6,7-dihydroxy-2- naphthalene sulfonic acid sodium salt provided for in item 403.57," after "schedule 4" and before the paren in item 907.10; and

(2) by striking out "9/30/85" in each of items 907.10 and 907.12 and inserting in lieu thereof "12/31/90".

SEC. 832. POTASSIUM 4-SULFOBENZOATE.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"906.26	P-sulfobenzoic acid, potassium salt (provided for in item 404.28, part 1B, schedule 4).	Free.....	No change...	On or before 12/31/90".

SEC. 833. 2,2'-OXAMIDO BIS-[ETHYL 3-(3,5-DI-TERT-BUTYL-4-HYDROXYPHENYL)PROPIONATE].

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following item:

"907.09	2,2'-Oxamido bis-[ethyl 3-(3,5-di-tert- butyl-4- hydroxy-phenyl) propionate] (provided for in item 405.34, part 1B, schedule 4).	Free.....	No change...	On or before 12/31/90".

SEC. 834. DICYCLOHEXYLBENZOTHIAZYLSULFENAMIDE.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"906.45	Dicyclohexylbenzothiazylsulfen- amide (provided for in item 406.39, part 1B, schedule 4).	Free.....	No change...	On or before 12/31/90".

SEC. 835. 2,4 DICHLORO-5-SULFAMOYL BENZOIC ACID.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"906.48	2,4 Dichloro-5-sulfamoyl benzoic acid (provided for in item 406.56, part 1B, schedule 4).	Free.....	No change...	On or before 12/31/90".

SEC. 836. DERIVATIVES OF N-[4-(2-HYDROXY -3-PHENOXYPROPOXY)PHENYL]ACETAMIDE.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"907.11	Mixtures containing derivatives of N-[4-(2-hydroxy-3-phenoxypropoxy)phenyl] acetamide (provided for in item 407.16, part 1B, schedule 4).	Free.....	No change...	On or before 12/31/90".

SEC. 837. 1,2-DIMETHYL-3,5-DIPHENYL-1-H-PYRAZOLIUM METHYL SULFATE (DIFENZOQUAT METHYL SULFATE).

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"907.24	1,2-Dimethyl-3,5-diphenyl-1-h-pyrazolium methyl sulfate (difenzoquat methyl sulfate) (provided for in item 408.19, part 1C, schedule 4).	Free.....	No change...	On or before 12/31/90".

SEC. 838. DICOFOL.

Item 907.15 of the Appendix is amended to read as follows:

"907.15	1,1-Bis(4-chlorophenyl)-2,2,2, trichloroethanol (Dicofol) (provided for in item 408.28, part 1C, schedule 4).	Free.....	No change...	On or before 12/31/90".

SEC. 839. CERTAIN KNITWEAR FABRICATED IN GUAM.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"905.45	Sweaters that— (i) do not contain foreign materials in excess of the percentage of total value limitation contained in general headnote 3(a), and. (ii) are assembled in Guam, exclusively by United States citizens, nationals, or resident aliens, by joining together (by completely sewing, looping, linking, or other means of attaching) at least 5 otherwise completed major knit-to-shape component parts of foreign origin,. if entered before the aggregate quantity of sweaters described in (i) and (ii) that is entered during any 12-month period after October 31, 1985 exceeds the duty-free quantity for that period. The duty-free quantity—. (I) for the 12-month period ending October 31, 1986 is 161,600 dozen; and. (II) for any 12-month period thereafter is an amount equal to 101 percent of the duty-free quantity for the preceding 12-month period..	Free.....		Before 11/1/92".

SEC. 840. 3,7-BIS(DIMETHYLAMINO)-PHENAZATHIONIUM CHLORIDE.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"907.43	3,7-Bis(dimethylamino)-phenazathionium chloride (methylene blue) (provided for in item 409.74, part 1C, schedule 4).	Free.....	No change...	On or before 12/31/90".

SEC. 841. 3,5-DINITRO-O-TOLUAMIDE.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"906.42	3,5-Dinitro-o-toluamide (provided for in item 411.93, part 1C, schedule 4).	Free.....	No change...	On or before 12/31/90".

SEC. 842. SECONDARY BUTYL CHLORIDE.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"907.55	Secondary butyl chloride (provided for in item 429.47, part 2D, schedule 4).	Free.....	No change...	On or before 12/31/90".

SEC. 843. CERTAIN NONBENZENOID VINYL ACETATE-VINYL CHLORIDE-ETHYLENE TERPOLYMERS.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following item:

"907.83	Nonbenzenoid vinyl acetate-vinyl chloride-ethylene terpolymer, containing by weight less than 50 percent derivates of vinyl acetate (provided for in item 445.48, part 4A, schedule 4).	Free.....	No change...	On or before 12/31/90".

SEC. 844. TUNGSTEN ORE.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"910.95	Tungsten ore (provided for in item 601.54, part 1, schedule 6).	Free.....	No change...	On or before 12/31/90".

SEC. 845. CERTAIN STUFFED TOY FIGURES.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"912.32	Stuffed toy figures of animate objects (except dolls) not having a spring mechanism and not exceeding 25 inches in either length, width, or height (provided for in item 737.30, Part 5E, Schedule 7).	Free.....	No change...	On or before 12/31/90".

SEC. 846. CERTAIN PLASTIC SHEETING.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"915.10	Transparent plastic sheeting containing 30% or more of lead, by weight (provided for in item 774.55, part 12B, schedule 7).	Free.....	No change...	On or after 12/31/90".

SEC. 847. DUTY FREE ENTRY OF PERSONAL EFFECTS AND EQUIPMENT OF PARTICIPANTS AND OFFICIALS INVOLVED IN THE 10TH PAN AMERICAN GAMES.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"915.20	Personal effects of aliens who are participants in or officials of the Tenth Pan American Games, or who are accredited members of delegations thereto, or who are members of the immediate families of any of the foregoing, persons, or who are their servants; equipment for use in connection with such games; and other related articles as prescribed in regulations issued by the Secretary of the Treasury.	Free	Free	On or before 9/30/87".

SEC. 848. DOLL WIG YARNS.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"905.30	Grouped filaments and yarns, not textured, in continuous form, colored, of nylon or modacrylic, whether or not curled, of not less than 20 denier per filament, to be used in the manufacture of wigs for dolls (provided for in item 309.32 and 309.33, part 1E, schedule 3, or item 389.62, part 7B, schedule 3).	Free	No change	On or before 12/31/90".

SEC. 849. CARDING AND SPINNING MACHINES.

(a) IN GENERAL.—Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"912.03	Carding and spinning machines specially designed for wool, other than machines specially designed for the manufacture of combed wool (worsted) yarns (provided for in item 670.04, part 4E, schedule 6).	Free	No change	On or before 12/31/90".

(b) PARTS.—The headnote to Subpart E of part 4 of schedule 6 is amended by striking out "item 912.04" each place it appears and insert in lieu thereof "item 912.03 or 912.04".

SEC. 850. CERTAIN BICYCLE PARTS.

(a) IN GENERAL.—

(1) GENERATOR LIGHTING SETS.—Item 912.05 of the Appendix is amended by striking out "6/30/86" and inserting in lieu thereof "12/31/90".

(2) BICYCLE CHAINS.—Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"912.06	Bicycle chains (provided for in items 652.13 and 652.15, part 3F, schedule 6).	Free	No change	On or before 12/31/90".

(3) OTHER BICYCLE PARTS.—Item 912.10 of the Appendix is amended—

(A) by striking out "multiple free wheel sprockets" and inserting in lieu thereof "free wheel sprockets";

(B) by inserting "front and rear derailleurs, shift levers, cables and casings for derailleurs" immediately after "drum brakes";

(C) by inserting "and" after "frame lugs,";

(D) by striking out ", and parts of bicycles consisting of sets of steel tubing cut to exact length and each set having the number of tubes needed for the assembly (with other parts) into the frame and fork of one bicycle"; and

(E) by striking out "6/30/86" and inserting in lieu thereof "12/31/90".

(b) EXCEPTION TO CUSTOMS EXEMPTION APPLICABLE TO FOREIGN TRADE ZONES.—Section 3(b) of the Act of June 18, 1934 (commonly known as the Foreign Trade Zones Act, 19 U.S.C. 81c(b)), is amended by striking out "June 30, 1986" and inserting in lieu thereof "December 31, 1990".

SEC. 851. 1-(3-SULFOPROPYL) PYRIDINIUM HYDROXIDE.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following item:

"906.46	1-(3-Sulfopropyl) pyridinium hydroxide (provided for in item 406.42, part 1B, schedule 4).	Free	No change	On or before 12/31/90".

SEC. 852. d-6-METHOXY-α-METHYL-2-NAPHTHALENEACETIC ACID AND ITS SODIUM SALT.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"907.39	d-6-Methoxy-α-methyl-2-naphthaleneacetic acid and its sodium salt (provided for in item 412.22, part 1C, schedule 4).	Free	No change	On or before 12/31/90".

SEC. 853. CERTAIN PESTICIDES.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new items:

"907.26	Dinocap (provided for in item 408.16, part 1C, schedule 4).	Free	No change	On or before 12/31/90
907.27	Mixtures of 1,1-bis(4-chlorophenyl)-2,2,2-trichloroethanol (dicofol) and application adjuvants (provided for in item 408.36, part 1C, schedule 4).	Free	No change	On or before 12/31/90
907.28	Mixtures of Mancozeb and dinocap (provided for in item 408.38, part 1C, schedule 4).	Free	No change	On or before 12/31/90
907.29	Dinocap (provided for in item 408.38, part 1C, schedule 4).	Free	No change	On or before 12/31/90".

SEC. 854. CHOLESTYRAMINE RESIN USP.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"907.30	Cross-linked polyvinylbenzyltrimethyl-ammonium chloride (cholestyramine resin USP) (provided for in item 412.70, part 1C, schedule 4).	Free	No change	On or before 12/31/90".

SEC. 855. 3-AMINO-3-METHYL-1-BUTYNE.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"907.53	3-amino-3-methyl-1-butyne (provided for in item 425.52, part 2D, schedule 4).	Free	No change	On or before 12/31/90".

SEC. 856. MANEB, ZINEB, MANCOZEB, AND METIRAM.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"907.60	Maneb, zineb, mancozeb and metiram (provided for in item 432.15, part 2E, schedule 4).	Free	No change	On or before 12/31/90".

SEC. 857. NICOTINE RESINS.

Item 907.63 is amended—

(1) by amending the article description to read as follows: "Nicotine resin complex put up in measured doses in chewing gum form (provided for in item 438.02, part 3B, schedule 4)"; and

(2) by striking out "12/31/87" and inserting "12/31/90".

SEC. 858. HOSIERY KNITTING NEEDLES.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"912.12	Hosiery knitting needles (provided for in item 670.62, part 4E, schedule 6).	Free	No change	On or before 12/31/90".

SEC. 859. EXTENSION OF CERTAIN EXISTING SUSPENSIONS.

Each of the following items is amended by striking out the date in the effective date column and inserting "12/31/90":

(1) Item 903.60 (relating to mixtures of mashed or macerated hot red peppers and salt).

(2) Item 903.65 (relating to cantaloupes).

(3) Items 905.10 and 905.11 (relating to certain wools).

(4) Items 906.10 and 906.12 (relating to needlecraft display models).

(5) Item 907.01 (relating to triphenyl phosphate).

(6) Item 907.17 (relating to sulfapyridine).

(7) Item 911.25 (relating to synthetic rutile).

(8) Item 911.95 (relating to certain clock radios).

(9) Item 912.07 (relating to machines designed for heat-set, stretch texturing of continuous man-made fibers).

(10) Item 912.08 (relating to hosiery knitting machines).

(11) Item 912.09 (relating to double-headed latch needles).

(12) Items 912.30, 912.34, and 912.36 (relating to stuffed dolls, certain toy figures, and skins thereof).

(13) Item 912.45 (relating to umbrella frames).

(14) Items 903.70 and 903.80 (relating to crude feathers and down).

CHAPTER 3—OTHER CUSTOMS AND EFFECTIVE DATE PROVISIONS

SEC. 861. GSP TREATMENT OF WATCHES.

Section 503(c)(1)(B) of the Trade Act of 1974 (19 U.S.C. 2463(c)(1)(B)) is amended to read as follows:

"(B) watches, except those watches the United States Trade Representative specifically determines, after public notice and comment, will not cause material injury to watch manufacturing and assembly operations in the United States or the United States insular possessions,".

SEC. 862. MARKING OF CONTAINERS OF IMPORTED MUSHROOMS.

Imported preserved mushrooms shall not be considered to be in compliance with section 304 of the Tariff Act of 1930 (19 U.S.C. 1304) or any other law relating to the marking of imported articles unless the containers thereof indicate in English the country in which the mushrooms were grown.

SEC. 863. CUSTOMS SERVICES AT PONTIAC/OAKLAND, MICHIGAN, AIRPORT.

Section 236 of the Trade and Tariff Act of 1984 (19 U.S.C. 58b) is amended—

(1) by striking out "and" at the end of subsection (a)(1);

(2) by redesignating paragraph (2) of subsection (a) as paragraph (3); and

(3) by inserting after paragraph (1) of subsection (a) the following new paragraph:

"(2) the airport located at Pontiac/Oakland, Michigan, and"; and

(4) by striking out "20" in subsection (c).

SEC. 864. ETHYL ALCOHOL AND MIXTURES THEREOF FOR FUEL USE.

(a) IN GENERAL.—During the effective period of item 901.50 of the Tariff Schedules of the United States (19 U.S.C. 1202; hereinafter referred to in this section as the "Schedules"), and except as provided in subsection (b), no ethyl alcohol or a mixture thereof may be considered—

(1) for purposes of general headnote 3(a) of such Schedules, to be—

(A) the growth or product of an insular possession of the United States,

(B) manufactured or produced in an insular possession from materials which are growth, product, or manufacture of any such possession, or

(C) otherwise eligible for exemption from duty under such headnote as the growth or product of an insular possession; or

(2) for purposes of section 213 of the Caribbean Basin Economic Recovery Act, to be—

(A) an article that is wholly the growth, product, or manufacture of a beneficiary country,

(B) a new or different article of commerce which has been grown, produced, or manufactured in a beneficiary country,

(C) a material produced in a beneficiary country, or

(D) otherwise eligible for duty-free treatment under such Act as the growth, product, or manufacture of a beneficiary country;

unless the ethyl alcohol or mixture thereof is an indigenous product of that insular possession or beneficiary country.

(b) EXCEPTION.—

(1) Subject to the limitation in paragraph (2), subsection (a) shall not apply to ethyl alcohol that is—

(A) imported into the United States during calendar years 1987 and 1988; and

(B) produced in an azeotropic distillation facility located in an insular possession of the United States or a beneficiary country, if that facility was established before, and in operation on, January 1, 1986.

(2) The exception provided under paragraph (1) shall cease to apply during each of calendar years 1987 and 1988 to ethyl alcohol produced in a facility described in paragraph (1)(B) after 20,000,000 gallons of ethyl alcohol produced in that facility are entered into the United States during that year.

(c) DEFINITIONS.—For purposes of this section:

(1) The term "ethyl alcohol or a mixture thereof" means ethyl alcohol or any mixture thereof described in item 901.50 of the Appendix to the Schedules.

(2) Ethyl alcohol or a mixture thereof may be treated as being an indigenous product of an insular possession or beneficiary country only if the ethyl alcohol or a mixture thereof—

(A) has been both dehydrated and produced by a process of full-scale fermentation within that insular possession or beneficiary country; or

(B) has been dehydrated within that insular possession or beneficiary country from hydrous ethyl alcohol that includes hydrous ethyl alcohol which is wholly the product or manufacture of any insular possession or beneficiary country and which has a value not less than—

(i) 30 percent of the value of the ethyl alcohol or mixture, if entered during calendar year 1987 (except that this clause shall not apply to any ethyl alcohol or mixture which has been dehydrated in the United States Virgin Islands by a facility with respect to which (I) the owner has entered into a binding contract for the engineering and design of full-scale fermentation capacity, and (II) authorization for operation of a full-scale fermentation facility has been granted by the Island authorities before May 1, 1986),

(ii) 60 percent of the value of the ethyl alcohol or mixture, if entered during calendar year 1988, and

(iii) 75 percent of the value of the ethyl alcohol or mixture, if entered after December 31, 1988.

(d) AMENDMENT TO APPENDIX TO SCHEDULES.—The item designation for item 901.50 of the Appendix to the Schedules is amended to read as follows: "Ethyl alcohol (provided for in item 427.88, part 2D, schedule 4) or any mixture containing such ethyl alcohol (provided for in part 1, 2 or 10, schedule 4) if such ethyl alcohol or mixture is to be used as fuel or in producing a mixture of gasoline and alcohol, a mixture of a special fuel and alcohol, or any other mixture to be used as fuel (including motor fuel provided for in item 475.25), or is suitable for any such uses.".

(e) CONFORMING AMENDMENTS.—

(1) General headnote 3(a)(i) of the Schedules is amended by inserting "and except as provided in section 864 of the Trade and International Economic Policy Reform Act of 1986," after "part 7 of schedule 7,".

(2) Section 213(a)(1) of the Caribbean Basin Economic Recovery Act (19 U.S.C. 2703(a)(1)) is amended by inserting "and subject to section 864 of the Trade and International Economic Policy Reform Act of 1986," after "Unless otherwise excluded from eligibility by this title,".

(3) The headnotes to subpart A of part 1 of the Appendix to the Schedules are amended by adding at the end thereof the following:

"2. For purposes of item 901.50, the phrase 'is suitable for any such uses' does not include ethyl alcohol (provided for in item 427.88, part 2D, schedule 4) that is certified by the importer of record to the satisfaction of the Commissioner of Customs ('Commissioner') to be ethyl alcohol or a mixture containing such ethyl alcohol imported for uses other than fuel use or in producing such fuel related mixtures. If the importer of record certifies nonfuel use for purposes of establishing actual use or suitability under item 901.50, the Commissioner shall not liquidate the entry of ethyl alcohol until he is satisfied that the ethyl alcohol has in fact not been used for fuel use or use in producing such fuel related mixtures. If he is not satisfied within a reasonable period of time not less than 18 months of the date of entry, then the duties provided for in item 901.50 shall be payable retroactive to the date of entry. Such duties shall also become payable, retroactive to the date of entry, immediately upon the diversion to fuel use of any ethyl alcohol or ethyl alcohol mixture certified upon entry as having been imported for nonfuel use.".

SEC. 865. CUSTOMS BOND CANCELLATION STANDARDS.

Section 623(c) of the Tariff Act of 1930 (19 U.S.C. 1623(c)) is amended by adding at the end thereof the following new sentence: "In order to assure uniform, reasonable, and equitable decisions, the Secretary of the Treasury shall publish guidelines establishing standards for setting the terms and conditions for cancellation of bonds or charges thereunder.".

SEC. 866. RELIEF OF THE W.M. KECK OBSERVATORY PROJECT, MAUNA KEA, HAWAII.

The Secretary of the Treasury is authorized and directed to admit free of duty the following articles for the use of the California Association for Research in Astronomy in the construction of the optical telescope for the W.M. Keck Observatory Project, Mauna Kea, Hawaii:

(1) The telescope structure.

(2) The observatory domes, produced by Brittain Steel, Ltd., of Vancouver, British Columbia, Canada.

(3) The primary mirror blanks, produced by the Schott Glassworks, Frankfurt, Federal Republic of Germany.

If the liquidation of the entry of any such article has become final, the entry shall be reliquidated and the appropriate refund of duty made.

SEC. 867. RELIEF OF RUKERT MARINE CORPORATION OF BALTIMORE, MARYLAND.

(a) RELIQUIDATION AND REFUND.—Notwithstanding section 514 of the Tariff Act of 1930 (19 U.S.C. 1514) or any other provision of law, the entries listed in subsection (b) shall be reliquidated without liability of the importer of record for antidumping duties; and if any such duty has been paid, either through liquidation or compromise under section 617 of the Tariff Act of 1930 (19 U.S.C. 1617), refund thereof shall be made.

(b) ENTRIES.—The entries referred to in subsection (a) are as follows:

Entry Number	Date of Entry
144549	March 26, 1976
150297	April 27, 1976
152729	May 11, 1976
156068	May 26, 1976
161653	June 23, 1976
168759	July 30, 1976
173393	August 25, 1976
175173	September 3, 1976
178811	September 23, 1976
108842	November 18, 1976
113000	December 9, 1976
115229	December 21, 1976
120070	January 17, 1977
120908	January 20, 1977
121403	January 24, 1977
130005	March 10, 1977.

SEC. 868. RELIEF OF MINEMET, INC., NEW YORK.

Notwithstanding any provision of the Tariff Act of 1930 or any other provision of the law to the contrary, the Secretary of the Treasury shall reliquidate, as free of duty under item 911.12 of the Appendix to the Tariff Schedules of the United States, as in effect at the time of entry, the entries numbered 00329493 (dated March 16, 1979), 00329494 (dated March 13, 1979), 00329495 (dated March 28, 1979), and 00330003 (dated March 21, 1979), made at New York, New York, and covering tubular tin products, if a

certificate of actual use (remelt certificate) for the articles covered by the four entries is submitted to the United States Customs Service at the port of entry within 120 days from the date of enactment of this Act.

SEC. 869. EFFECTIVE DATES.

(a) IN GENERAL.—(1) Except as provided in paragraphs (2), through (6) and in subsection (b), the amendments made by subtitles B and C and sections 861 and 862 shall apply with respect to articles entered on or after the 15th day after the date of the enactment of this Act.

(2) Section 822 applies to articles entered on or after the 30th day after the date of the enactment of this Act.

(3) Section 839 applies to articles entered after October 31, 1985.

(4) Section 850 applies to articles entered after June 30, 1986.

(5) The amendment made by paragraphs (8) and (13) of section 859 and by section 864 applies to articles entered after December 31, 1986.

(6) The amendment made by sections 857(2) and 859(14) applies to articles entered after December 31, 1987.

(7) Section 863 takes effect January 1, 1987.

(b) RETROACTIVE APPLICATION.—(1) Notwithstanding section 514 of the Tariff Act of 1930 or any other provision of law, upon proper request filed with the customs officer concerned on or before the 90th day after the date of the enactment of this Act the entry of any article described in paragraph (2) shall be treated as provided in such paragraph.

(2)(A) In the case of the application of any amendment made by sections 814, 831, 838, 847, 857, and by paragraphs (1) through (7) and (9) through (12) of section 859 to any entry—

(i) which was made after the applicable date and before the 15th day after the date of the enactment of this Act; and

(ii) with respect to which there would have been no duty if the amendment made by such section applied to such entry;

such entry shall be liquidated or reliquidated as though such entry had been made on the 15th day after the date of the enactment of this Act.

(B) For purposes of subparagraph (A), the term "applicable date" means—

(i) in the case of section 857, November 14, 1984;

(ii) in the case of section 859(2), May 15, 1985;

(iii) in the case of section 859 (1), (3), (4),and (11), June 30, 1985;

(iv) in the case of sections 831, 838, and 859 (5) and (10), September 30, 1985;

(v) in the case of sections 814 and 859 (6), (9), and (12), December 31, 1985;

(vi) in the case of section 847, May 31, 1986; and

(vii) in the case of section 850, June 20, 1986.

(c) DEFINITIONS.—For purposes of this section—

(1) The term "entered" means entered, or withdrawn from warehouse for consumption, in the customs territory of the United States.

(2) The term "entry" includes any withdrawal from warehouse.

Subtitle B—Implementation of Nairobi Protocol

CHAPTER 1—SHORT TITLE, PURPOSE, REFERENCE, AND EFFECTIVE DATE

SEC. 871. SHORT TITLE.

This subtitle may be cited as the "Educational, Scientific, and Cultural Materials Importation Act of 1986".

SEC. 872. PURPOSE.

The purpose of this subtitle is—

(1) to provide for the implementation by the United States of the Protocol (S. Treaty Doc. 97-2, 9; hereinafter referred to in this Act as the "Nairobi Protocol") to the Agreement on the Importation of Educational, Scientific, and Cultural Materials (17 UST (pt. 2) 1835; commonly known as the "Florence Agreement");

(2) to clarify or modify the duty-free treatment accorded under the Educational, Scientific, and Cultural Materials Importation Act of 1982 (Public Law 97-446, 96 Stat. 2346-2349; hereinafter referred to in this title as the "1982 Act"), the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89-65, 80 Stat. 897 et seq.), and Public Law 89-634 (80 Stat. 879); and

(3) to continue the safeguard provisions concerning certain imported articles provided for in the 1982 Act.

SEC. 873. REFERENCE.

Whenever an amendment or repeal in this subtitle is expressed in terms of an amendment to, or repeal of, an item, headnote, or other provision, the reference shall be considered to be made to an item, headnote, or other provision of the Tariff Schedules of the United States (19 U.S.C. 1202; hereinafter in this subtitle referred to as the "TSUS").

SEC. 874. EFFECTIVE DATE.

This subtitle takes effect on, and the amendments to the TSUS made by it apply with respect to articles entered, or withdrawn from warehouse for consumption, on or after the latest of—

(1) the 15th day after the date of the enactment of this Act; or

(2) the 15th day after the deposit of the United States ratification of the Nairobi Protocol.

SEC. 875. RETROACTIVE APPLICATION.

Notwithstanding section 514 of the Tariff Act of 1930 or any other provision of law, upon proper request filed with the customs officer concerned on or before the 90th day after the effective date of this subtitle, in the application of the relevant provisions of this subtitle to the entry of any article—

(1) which was made on or after August 12, 1985, and before the effective date of this subtitle; and

(2) with respect to which there would have been no duty if the relevant provisions of this subtitle applied to such entry;

such entry shall be liquidated or reliquidated as though such entry had been made on or after the effective date of this subtitle.

CHAPTER 2—AMENDMENTS TO IMPLEMENT THE NAIROBI PROTOCOL

SEC. 881. REPEAL OF 1982 ACT.

The 1982 Act is repealed.

SEC. 882. TREATMENT OF PRINTED MATTER AND CERTAIN OTHER ARTICLES.

(a) Items 270.45 and 270.50 are redesignated as 270.46 and 270.48, respectively.

(b) Part 5 of schedule 2 is amended as follows:

(1) The following new item is inserted in numerical sequence:

"270.90	Catalogs of films, recordings, or other visual and auditory material of an educational, scientific, or cultural character.	Free	Free".

(2) Items 273.45 through 273.55 and the superior heading thereto are stricken and the following new item is inserted in lieu thereof:

"273.52	Architectural, engineering, industrial, or commercial drawings and plans, whether originals or reproductions.	Free	Free".

(3)(A) The superior heading to items 274.50 through 274.70, inclusive, is amended by inserting "(including developed photographic film; photographic slides; transparencies; holograms for laser projection; and microfilm, microfiches and similar articles except those provided for in item 737.52)" after "Photographs".

(B) The following new items are inserted in numerical sequence under the superior heading "Printed not over 20 years at time of importation:", and before and at the same hierarchical level as "Lithographs on paper:":

"274.55	Loose illustrations, reproduction proofs or reproduction films used for the production of books.	Free	Free
274.56	Articles provided for in items 270.05, 270.10, 270.25, 270.55, 270.63, 270.70, and 273.60 in the form of microfilm, microfiches, and similar film media.	Free	Free".

(C) Item 735.20 is stricken out and the following new items and superior heading thereto are inserted in lieu thereof:

	"Puzzles; game, sport, gymnastic, athletic, or playground equipment; all the foregoing, and parts thereof, not specially provided for:		
735.21	Crossword puzzle books, whether or not in the form of microfilm, microfiches, or similar film media.	Free	Free
735.24	Other	5.52% ad val.	40% ad val.".

(D) Item 737.52 is amended by inserting "(whether or not in the form of microfilm, microfiches, or similar film media)" after "Toy books".

(E) Item 830.00 is amended by inserting "; official government publications in the form of microfilm, microfiches, or similar film media" at the end of the article description thereof.

(F) Item 840.00 is amended by inserting ", whether or not in the form of microfilm, microfiches, or similar film media" after "documents".

SEC. 883. VISUAL AND AUDITORY MATERIAL.

(a) Headnote 1 of part 7 of schedule 8 is amended to read as follows:

"1. (a) No article shall be exempted from duty under item 870.30 unless either:

"(i) a Federal agency or agencies designated by the President determines that such article is visual or auditory material of an educational, scientific, or cultural character within the meaning of the Agreement for Facilitating the International Circulation of Visual and Auditory Materials of an Educational, Scientific, or Cultural Character (17 UST (pt. 2) 1578; Beirut Agreement), or

"(ii) such article—

"(A) is imported by, or certified by the importer to be for the use of, any public or private institution or association approved as educational, scientific, or cultural by a Federal agency or agencies designated by the

President for the purpose of duty-free admission pursuant to the Nairobi Protocol to the Florence Agreement, and

"(B) is certified by the importer to be visual or auditory material of an educational, scientific, or cultural character or to have been produced by the United Nations or any of its specialized agencies.

For purposes of subparagraph (i), whenever the President determines that there is or may be profitmaking exhibition or use of articles described in item 870.30 which interferes significantly (or threatens to interfere significantly) with domestic production of similar articles, he may prescribe regulations imposing restrictions on the entry under that item of such foreign articles to insure that they will be exhibited or used only for nonprofitmaking purposes.

"(b) For purposes of items 870.32 through 870.35, inclusive, no article shall be exempted from duty unless it meets the criteria set forth in subparagraphs (a)(ii) (A) and (B) of this headnote.".

(b) Item 870.30 is amended by inserting "(except toy models)", and by striking out "headnote 1" and inserting in lieu thereof "headnote 1(a)" after "models".

(c) The following new items and superior heading are inserted in numerical sequence in part 7 of schedule 8:

	"Articles determined to be visual or auditory materials in accordance with headnote 1 of this part:		
870.32	Holograms for laser projection; microfilm, microfiches, and similar articles.	Free	Free
870.33	Motion-picture films in any form on which pictures, or sound and pictures, have been recorded, whether or not developed.	Free	Free
870.34	Sound recordings, combination sound and visual recordings, and magnetic recordings; video discs, video tapes, and similar articles.	Free	Free
870.35	Patterns and wall charts; globes; mock-ups or visualizations of abstract concepts such as molecular structures or mathematical formulae; materials for programmed instruction; and kits containing printed materials and audio materials and visual materials or any combination of two or more of the foregoing.	Free	Free".

SEC. 884. TOOLS FOR SCIENTIFIC INSTRUMENTS OR APPARATUS.

Part 4 of schedule 8 is amended by adding in numerical sequence the following new item:

"851.67	Tools specially designed to be used for the maintenance, checking, gauging or repair of scientific instruments or apparatus admitted under item 851.60.	Free	Free".

SEC. 885. ARTICLES FOR THE BLIND AND FOR OTHER HANDICAPPED PERSONS.

(a) Items 825.00, 826.10, and 826.20 are repealed.

(b) Part 7 of schedule 8 is amended—

(1) by adding the following new headnote after headnote 2:

"3. For the purposes of items 870.65, 870.66, and 870.67—

"(a) The term 'blind or other physically or mentally handicapped persons' includes any person suffering from a permanent or chronic physical or mental impairment which substantially limits one or more major life activities, such as caring for one's self, performing manual tasks, walking, seeing, hearing, speaking, breathing, learning, and working.

"(b) These items do not cover—

"(i) articles for acute or transient disability;

"(ii) spectacles, dentures, and cosmetic articles for individuals not substantially disabled;

"(iii) therapeutic and diagnostic articles; or

"(iv) medicine or drugs."; and

(2) by inserting, in numerical sequence, the following new items:

	"Articles specially designed or adapted for the use or benefit of the blind or other physically or mentally handicapped persons:. Articles for the blind:		
870.65	Books, music, and pamphlets, in raised print, used exclusively by or for them.	Free	Free
870.66	Braille tablets, cubarithms, and special apparatus, machines, presses, and types for their use or benefit exclusively.	Free	Free
870.67	Other	Free	Free".

CHAPTER 3—AUTHORITY TO MODIFY CERTAIN DUTY-FREE TREATMENT ACCORDED UNDER THIS SUBTITLE

SEC. 891. AUTHORITY TO LIMIT CERTAIN DUTY-FREE TREATMENT.

(a) AUTHORITY TO LIMIT.—

(1) The President may proclaim changes in the TSUS to narrow the scope of, place conditions upon, or otherwise eliminate the duty-free treatment accorded under sections 884 and 885 with respect to any type of article the duty-free treatment of which has significant adverse impact on a domestic industry (or portion thereof) manufacturing or producing a like or directly competitive article, and provided the effect of such change is not inconsistent with the provisions of the relevant annexes of the Florence Agreement or the Nairobi Protocol.

(2) If the President proclaims changes to the TSUS under paragraph (1), the rate of duty thereafter applicable to any article which is—

(A) affected by such action, and

(B) imported from any source,

shall be the rate determined and proclaimed by the President as the rate which would then be applicable to such article from such source if this title had not been enacted.

(b) RESTORATION OF TREATMENT.—If the President determines that any duty-free treatment which is no longer in effect because of action taken under subsection (a) could be restored, in whole or in part, without a resumption of significant adverse impact on a domestic industry or portion thereof, the President may proclaim changes to the TSUS to resume such duty-free treatment.

(c) OPPORTUNITY TO PRESENT VIEWS.—Before taking an action under subsection (a) or (b), the President shall afford an opportunity for interested Government agencies and private persons to present their views concerning the proposed action.

(d) CONTINUATION OF PROCEEDINGS UNDER 1982 ACT.—Any action in effect or any proceeding in progress under section 166 of the 1982 Act on the day that Act is repealed shall be considered as an action or proceeding, and shall be continued or resumed, under this section.

SEC. 892. AUTHORITY TO EXPAND CERTAIN DUTY-FREE TREATMENT ACCORDED UNDER SECTION 312.

(a) EXPANSION OF DUTY-FREE TREATMENT.—If the President determines such action to be in the interest of the United States, he may proclaim changes to the TSUS in order to remove or modify any condition or restriction imposed under headnote 1 of part 7 of schedule 8 (as amended by section 313 of this Act), on the importation of articles provided for in items 870.30 through 870.35, inclusive (except as to articles entered under the terms of headnote 1(a)(i) of part 7 of schedule 8), in order to implement the provisions of annex C-1 of the Nairobi Protocol.

(b) EFFECTIVE DATE OF CHANGES.—Any change to the TSUS proclaimed under subsection (a) shall be effective with respect to articles entered, or withdrawn from warehouse for consumption, on or after the 15th day after the date on which the President proclaims such change.

SEC. 893. CHANGES TO TSUS TO IMPLEMENT FLORENCE AGREEMENT PROVISION.

(a) AMENDMENT OF ITEM 851.60.—Item 851.60 is amended by striking out "Instruments" and inserting in lieu thereof "Scientific instruments".

(b) HEADNOTE CHANGE.—Headnote 6 of part 4 of schedule 8 is amended—

(1) by amending subdivisions (a) and (b) to read as follows:

"6. (a) For purposes of item 851.60—

"(i) the term 'scientific instruments and apparatus' means scientific instruments and apparatus for deriving information from, or generating data necessary to, scientific experimentation by means of sensing, analyzing, measuring, classifying, recording, or similar operations; and

"(ii) the term 'scientific' means pertaining to the physical or life sciences and, under certain circumstances, to applied sciences. Such instruments and apparatus do not include materials or supplies, or ordinary equipment for use in building construction or maintenance or in supporting activities (such as administration or operating residential or dining facilities) of the institution seeking their entry under this item.

"(b) An institution desiring to enter an article under this item shall make an application therefor to the Secretary of Commerce, including therein (in addition to such other information as may be prescribed by regulation) a description of the article, the purposes for which the instrument or apparatus is intended to be used, the basis for the institution's belief that no instrument or apparatus of equivalent scientific value for such purposes is being manufactured in the United States (as to which the applicant shall have the burden of proof), and a statement that the institution either has already placed a bona fide order for such instrument or apparatus or has a firm intention to place an order therefor on or before the final day specified in paragraph (d) of this headnote. If the Secretary finds that the application is in accordance with pertinent regulations, he shall promptly forward copies thereof to the Secretary of Health and Human Services. If, at any time while its application is under consideration by the Secretary of Commerce or on appeal from a finding by him before the United States Court of Appeals for the Federal Circuit, the institution cancels an order for the instrument or apparatus covered by its application, or if it no longer has a firm intention to order such article, it shall promptly so notify the Secretary of Commerce or the Court, as the case may be.";

(2) by amending subdivision (c) by—

(A) striking out "Health, Education, and Welfare" and inserting in lieu thereof "Health and Human Services"; and

(B) by striking out, in the third sentence, "the Secretary of the Treasury and", and by striking out, in the last sentence, "the

Treasury" and inserting in lieu thereof "Commerce";

(3) Subdivision (e) is amended by striking out "Court of Customs and Patent Appeals" and inserting in lieu thereof "Court of Appeals for the Federal Circuit"; and

(4) Subdivision (f) is amended to read as follows:

"(f) The Secretary of Commerce may prescribe regulations to carry out his functions under this headnote.".

SEC. 894. STATISTICAL INFORMATION.

In order to implement effectively the provisions of section 891, the Secretary of the Treasury, in conjunction with the Secretary of Commerce, shall take such actions as are necessary to obtain adequate statistical information with respect to articles to which amendments made by section 885 apply, in such detail and for such period as the Secretaries consider necessary.

AMENDMENT OFFERED BY MR. CRANE

Mr. CRANE. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment offered by Mr. CRANE: On page 12, line 18, strike the word "because" and all that follows thereafter through line 24, and insert in lieu thereof: ", in which case the President must announce alternative measures which may include a continuation of negotiations".

On page 13, strike lines 6 through 14; on line 18, place a period after the word "targeting" and strike all that follows through line 21 on page 14. On page 21, beginning on line 4, strike section 113.

On page 19, strike line 9 and all that follows thereafter through line 9 on page 20.

Beginning on page 37, strike section 119.

The CHAIRMAN. Pursuant to House Resolution 456, the amendment is considered as having been read.

The gentleman from Illinois [Mr. CRANE] will be recognized for 15 minutes, and a Member opposed will be recognized for 15 minutes.

The Chair recognizes the gentleman from Illinois [Mr. CRANE].

Mr. CRANE. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I would like to summarize the four components of my amendment very quickly, and then I will elaborate on them one at a time.

First, it provides Presidential authority to reject the U.S. Trade Representative's recommendations on relief, but it requires the President to recommend alternative measures.

Second, it strikes separate procedures including the injury test for targeting, but maintains targeting as a cause of action under section 301.

Third, it strikes internationally recognized workers' rights as a cause of action under 301, the so-called Pease provision.

Finally, it strikes the provision that requires mandatory action in the form of quotas, surcharges, or voluntary restraints against foreign countries that have trade surpluses with the United States, the so-called Gephardt provision.

Taking them in order, Mr. Chairman, H.R. 4800 would transfer the decisionmaking authority to the U.S. Trade Representative, and thus require mandatory Presidential retaliation in certain 301 cases by an inflexible deadline. My amendment would maintain Presidential discretion to determine whether action under 301 was in the national economic interest. The President, unlike under existing law, would be required to announce alternative measures if he elected to exercise this discretionary authority.

I think that there are three basic reasons for accepting this provision.

First, the current administration is already using section 301 aggressively.

Second, retaliation must be selective and timely. Mandatory retaliation may be arbitrary and poorly timed for U.S. interests. An entire negotiating process could be undermined by this.

Finally, the President must retain the discretion to determine the dimensions of retaliation. This provision could force us to retaliate in an amount greater than the burden of restriction on commerce.

The targeting provision in H.R. 4800 would provide a separate ITC procedure and injury test under section 301 for targeting. My amendment would delete the special procedure but would maintain a general targeting definition as a cause of action under 301. Thus each case would have to be individually investigated and ruled on.

The reasons for this portion of the amendment are several.

□ 1135

First, the injury test is not required, nor should it be, for targeting or anything else that would be a cause of action under section 301. Including an injury test in section 301 would merge section 201 procedures into 301, which makes no sense since 301 is a market access remedy and not a domestic injury remedy.

Under H.R. 4800, all elements of targeting would constitute a violation of trade agreements, even though some elements, such as financing schemes, are not clearly covered by GATT. H.R. 4800 also makes action against targeting mandatory under section 201 if the ITC determines material injury.

The inflexible definition and mandatory retaliation will bring into question certain U.S. practices of Government-sponsored research and development, such as that done by NASA, the Department of Energy and the Department of Defense, that then leads to commercial development and use.

U.S. exporters of high technology and other products may be vulnerable if our trading partners adopt similar targeting provisions.

On the Pease provision, Mr. Chairman, this makes denial of internationally recognized worker rights an unfair practice actionable under section 301 and that includes such things as violation of freedom of association, violation of collective bargaining rights, violation of minimum wage laws, proper working conditions in terms of hours and wages and violation of occupational safety and health standards.

It seems to me that this provision, Mr. Chairman, should be deleted for the following reasons:

The United States, first of all, has not signed these international labor organization worker rights. It is irresponsible, it seems to me, to brand a violation of a standard as unfair when the United States is not even a party to the standards. If enacted, our export trade could be just as susceptible to arbitrary scrutiny and retaliation. I think worker rights questions are better pursued in the context of multilateral trade negotiations.

Finally, turning to the so-called Gephardt provision of the bill, this would force U.S. trading partners with "excessive and unwarranted" trade surpluses with the United States to reduce those surpluses by 10 percent a year for 4 years. Excessive surpluses are defined as a 175-percent ratio of exports to imports, a trade surplus with the United States of $3 billion, and a global trade surplus in the previous year. If a 10-percent reduction cannot be achieved with negotiations, it would have to be achieved with a unilateral imposition of tariffs or quotas. Trade in petroleum products is excluded because of its critical nature.

Based on 1985 figures, the proposal would target West Germany, Japan, and Taiwan, and could apply to Brazil, Korea, Italy, and Hong Kong. If applied only to West Germany, Japan, and Taiwan, however, it would require trade deficits reductions of $7.5 billion in 1987 and $25.8 billion between 1987 and 1990.

This provision is flawed for several reasons. First of all, it could force the United States to violate GATT if negotiations are unsuccessful.

Second, it is likely to result in significant U.S. import restrictions and foreign export restraints, but will do little to increase U.S. exports.

It would require U.S. trading partners to reduce their bilateral trade deficits by an amount greater than the total impact of their trade barriers. For example, in the case of Japan, Japan would be forced to reduce its deficit by $17 billion over the next 4 years, but Japanese import barriers are estimated to limit only $5 billion to $8 billion in U.S. sales. Thus, even if Japan eliminated all import restrictions, it would still need to reduce its bilateral deficit by an additional $9 billion to $12 billion, which would require significant export restraints.

Quantitative export restraints are the only certain method for meeting the levels, since the effect of eliminat-

ing import barriers is difficult to predict.

It could close U.S. access to markets in these countries. Because agricultural products comprise the leading exports from the United States, retaliation against U.S. products to the affected country.

It makes absolutely no economic sense, since trade imbalances may have nothing to do with unfair trade practices.

Import restrictions also, Mr. Chairman, will increase the dollar's value against the currency of the targeted country, making it harder to export. This will actually work to increase or aggravate our trade deficits.

This is most ironic at the present time when, vis-a-vis the German mark, the dollar is devalued 28 percent, and against the yen, it is down over 35 percent from 1 year ago.

Finally, Mr. Chairman, let me just quote from some of our journals that cover the spectrum from the Washington Post to the Wall Street Journal. The Washington Post editorially found most objectionable this so-called Gephardt amendment in the bill and objectionable for the reaons in part that I indicated.

Their final conclusion editorially was:

> Frustration rarely produces good legislation. This bill is a shin-kicker, intended to attract attention. In fact, it is succeeding very effectively. But among American industries, it will hurt the most competitive and help only the least competitive.

The Wall Street Journal describes it as an exercise in political grandstanding and says:

> One of its more mindless provisions would require 10-percent annual reductions in the U.S. trade deficits with Japan, Taiwan, and West Germany.

The New York Times says:

> It's time to fight back, by jingo. America won't put up with unfair foreign trade competition anymore. So say many Members of the House, including the Democratic leadership. They contend they knew the dangers of protectionism, yet what they propose instead will not help. On the contrary, it would shoot American consumers in the foot.

Then it goes on to say that one provision, sponsored by our colleague, the gentleman from Missouri [Mr. GEPHARDT], would seriously threaten the system of open world trade.

"Many industries abroad," they add, "would be delighted to have an excuse to get their governments to set quotas that limit exports to America—and then to raise prices. That's just what has happened with the quotas on Japanese cars. The big losers are American consumers."

I think on balance, Mr. Chairman, that there are profound reasons for opposing the bill in its entirety, but clearly my amendment is targeted toward one of the most objectionable features that came out of our own committee's contribution to this product; namely, the Ways and Means Committee.

I reserve the balance of my time, Mr. Chairman.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield 4 minutes to the gentleman from Ohio [Mr. PEASE].

The CHAIRMAN. Is the gentleman from Illinois opposed to the amendment?

Mr. ROSTENKOWSKI. I am opposed to the amendment, Mr. Chairman.

Mr. CHAIRMAN. The gentleman from Illinois [Mr. ROSTENKOWSKI] is recognized for 15 minutes and the gentleman from Ohio [Mr. PEASE] will be recognized for 4 minutes.

Mr. PEASE. Mr. Chairman, the only argument that we heard this morning from the gentleman from Illinois about the worker rights provision, of which I am the author, is that the United States has not signed some of the covenants of the International Labor Organization which constitute internationally recognized worker rights.

Mr. Chairman, I want to emphasize that although the United States has not ratified specifically some of the ILO covenants, just as it took us over 40 years to ratify just recently a genocide treaty, every one of the worker rights which are specified in this bill have been recognized in law or in the Constitution of the United States.

I will specify the rights: Freedom of association; that is guaranteed in our first amendment.

The right to join a union and bargain collectively: That is in National Labor Relations Act of 1935.

Prohibition on a slave, forced, or compulsory labor: The 13th amendment to the Constitution, the Taft-Hartley Act of 1947, and title 18 of the U.S. Criminal Code.

A minimum age for the employment of children: The Fair Labor Standards Act of 1938.

Minimum wage and hours of work: Similarly in the Fair Labor Standards Act of 1938.

Basic standards for health and safety: The Occupational Safety and Health Act of 1970.

So we have specifically for each one of the worker rights specified in this bill enshrined them either in the U.S. Constitution or in U.S. law.

Now, let me emphasize, Mr. Chairman, that the worker rights language is not a new initiative. It is an extension of existing trade law. The identical list of worker rights is already in U.S. law in relation to the Generalized System of Preferences and in the Overseas Private Investment Corporation.

Further, the new trade bill merely extends the definition of unfair trade practices which is already in section 301 of the Trade Act of 1974.

The existing section 301 defines as unreasonable or unfair three trade practices: Denial of market access, denial of the opportunity to establish a business, and failure to protect copyrights, patents, and so forth.

Note that these three practices are not a violation of GATT. The United States unilaterally labels them as unreasonable acts subject to action under section 301.

The new trade bill merely adds a fourth practice—repression of labor rights—to that list.

Mr. Chairman, the bottom line is this: Jobs in the towns and cities of every one of us are in jeopardy because of a flood of foreign imports coming in and often made by exploited labor.

What the author of this amendment is trying to tell us is that it is not unfair for goods to come into our market made by 12-year-old children sold into indentured servitude by their parents, children working 12 hours a day, 7 days a week, in sweatshops around Southeast Asia.

This year, next year, and the year after, each one of us is going to have to go back home and meet, unfortunately, with groups of workers who have lost their jobs because of foreign imports. Who among us wants to tell them that we do not think it is any of our business how much those kids who work in those sweatshops get paid?

Mr. ROSTENKOWSKI. Mr. Chairman, I yield 4 minutes to the gentleman from Missouri [Mr. GEPHARDT].

Mr. GEPHARDT. Mr. Chairman, I rise in opposition to the Crane amendment, which I believe would severely weaken this legislation. Most important, the Crane amendment would strike the amendment which I offered in committee and which was adopted by a wide margin.

Over the last several years, we have seen America's competitive position erode to the point where we face a trade crisis of historical proportions. We have been reduced to the position of the world's largest debtor nation will a whopping external debt of $101 billion last year—and rising.

We have seen the trade deficit quadruple to $148 billion last year—a figure that is expected to further increase to more than $170 billion this year.

We have seen the loss of more than 1.7 million manufacturing jobs during this administration. According to figures from the Bureau of Labor statistics, some States face disproportionate effects: My home State of Missouri has seen the loss of 35,100 jobs since 1979 in manufacturing; the neighboring State of Illinois, however, has seen their industrial base devastated with a loss of 290,500 manufacturing jobs since 1979.

We have seen more than half a million farms forced into foreclosure due to decreased export opportunities.

The amendment which I offered, now contained in section 119 of title I, is quite simple. It gives the President the tools to deal with unfair trading practices, and gives him goals for success. The amendment provides the President with the flexibility that is needed to respond to the problems in the international marketplace.

Most important, the amendment makes the President accountable to Congress and the American people for his failure to develop a strong, coherent trade agenda that not only seeks to open markets abroad for our products, but that also enhances the ability of American businesses to compete with imports on our own shores.

President Reagan only began to realize that we had a trade problem when concern in Congress reached the boiling point last year. He has responded to the problem of limited market access abroad with piecemeal actions and press releases. Yesterday, President Reagan had the audacity to release a final decision in the machine tool case—a case originally filed in March 1983, more than 3 years ago.

If anything, the President's action yesterday strengthens my belief that Congress is on the correct course in addressing this issue today. The trade issue should not be governed by press releases and politics—our country's economic future is at stake.

The United States is both a player and a referee in the world trading system. As a player, we must do the best we can to enhance export opportunities for our businesses. As a referee, we must ensure that the world trading system is open to all trading nations—industrialized and lesser-developed countries alike.

As a player, we must open markets to our products. That is what my amendment would do. This amendment has been widely misunderstood. Simply stated, the amendment would give the President the leverage he needs to leverage-open the markets of countries that have sought to exclude not only U.S. products, but those of all trading nations. Demanding freedom of access to other markets isn't protectionism, it's free trade.

Section 119 requires that countries be examined to determine if they have excessive trade surpluses—defined as a ratio of bilaterial exports over imports of 175 percent, and a total bilateral surplus with the United States in excess of $3 billion. If a country has an excessive trade surplus, the U.S. Trade Representative would be directed to examine the trading practices of that country to determine if they have a pattern of unfair barriers that have an adverse effect on trade.

If a country is found to have an excessive surplus and trade barriers that have a significant adverse effect on our balance of trade, the President would be directed to negotiate agreements with those countries to reduce their barriers so as to meet the surplus reduction goals in the bill—a 10 percent reduction in the bilateral trade surplus each year.

If the President was unable to negotiate agreements to meet the goals of the act, he would be given a variety of tools to achieve its goals. These tools include licensing, certification, withdrawal of trade benefits, imposition of duties, or any other avenue he wished to pursue.

If, after the first year, the President was still unable to meet the goals of the act, he would be directed to impose quantitative limitations on the imports from that country, either on a product-by-product basis, or across the board.

The President would be given the opportunity to waive the sanctions in the bill under either of two circumstances. A waiver would be subject to congressional disapproval and would not eliminate the duty of the President to negotiate agreements, or come up with an alternative action plan, to meet the objectives of the act.

A waiver could be issued if: First, a country has balance-of-payment difficulties; or second, the imposition of sanctions would not be in the economic interest of the United States.

The world trading system has no sanctions against countries who structure themselves to run up large surpluses. The major mercantilist culprits in the world economy today are Germany, Japan, Korea, and Taiwan. The countries cannot be expected to restructure themselves internally without a major push from the outside.

The case of Japan is worth exploring in detail, not because it is different from the others, but because it is more familiar. Recent events in Japan clearly show the internal pressures against change that are typical of all four countries.

Every year, soon before the annual economic summit, we have come to expect a propaganda barrage from Japan about major new changes in its trade posture. Yet, every year, Japan's trade surplus has expanded further. For the last 5 years, Japan's trade surplus has ballooned as fast relative to its economy as our monstrous trade deficit has swelled relative to our economy.

For this year's propaganda effort, Prime Minister Nakasone appointed a blue ribbon commission to propose changes in Japan's trade policy. Rather than focus on specific import restrictive practices, this commission looked at ways to change the structure of the Japanese economy to reduce the trade surplus and the dependence on exports. Many believe that last year's Gephardt-Bentsen-Rostenkowski bill contributed significantly to this needed change of emphasis by Japan.

Soon after the commission issued its report (that included a number of useful changes), Prime Minister Nakasone came to the United States to trumpet the report. He proclaimed that a new day has come to Japan and that they now had a concrete plan to bring down their export surplus by stimulating internal demand.

Meanwhile, back in Japan, business leaders were going into an uproar over the report. They encouraged a palace coup by the major aspirants in the LDP to become Prime Minister. Last week, that coup was completed and, according to many press accounts, Nakasone has become a lame duck with 6 more months in office.

It is important for the United States to continue to emphasize to Japan that we find its dependence on export surpluses unacceptable. Now, just as they are about to replace the Prime Minister, Congress should make clear that it expects Japan to carry out the thrust of the commission's report.

Likewise, it is important to send this message to the other egregious mercantilist countries. The economic structures of Germany, Korea, and Taiwan have become as dependent on export surpluses as that of Japan.

In the absence of congressional pressure last year, neither Germany nor Japan would have come to the Plaza Hotel to work out an agreement to raise their exchange rates. Likewise, if we don't keep up the pressure this year, Germany, Japan, Korea, and Taiwan will have no incentive to make the tough decisions internally to reduce their export dependence.

Treasury Secretary Baker gave some very pertinent testimony on this subject last week. According to him, the sharp decline in the dollar over the last year, and particularly since September, was the direct result of congressional activity to bring down the trade deficit. The rest of his testimony was discouraging and should lead us to redouble our efforts. He predicted that the decline in the dollar will not reduce our trade deficit this year and may not reduce it much more than $25 billion next year. In other words, without further changes, we could be left indefinitely with an annual trade deficit of $120 billion and foreign indebtedness growing $100 billion annually.

To make matters worse, Secretary Baker strongly hinted that the dollar should strengthen against the yen because of the difficulties that the strong yen was causing Japan. Germany is also complaining about the "weakness" of the dollar, despite their continuing large export surpluses and our huge deficits. They, too, would benefit from an effort to strengthen the dollar against the yen.

Our goal must be to achieve a more equitable trading relationship so that our trade deficit gets on a steady track toward balance and we reduce our foreign borrowing. At the same time, the four mercantilist countries must also move back toward balance from the other direction. We cannot sit back and wait for further declines in the dollar to accomplish all that. In fact, achieving better trade balances will require more attention to the internal structure of mercantilist countries and less to exchange rates. That's precisely what passage of this legislation would do.

□ 1150

Mr. CRANE. Mr. Chairman, I yield 3 minutes to the gentleman from Nebraska [Mr. DAUB].

Mr. DAUB. I thank the gentleman for yielding this time to me.

Mr. Chairman, the Gephardt amendment, I say to my colleagues, attempts to deal with our trade deficit first by a unilateral demand that other countries simply automatically just reduce their trade surpluses against us. Such unilaterism violates our own international obligations under GATT.

The Gephardt amendment is woefully uninformed since it assumes that the trade deficit is caused by trade policies of other countries. These policies allegedly include massive dumping, subsidization and other unfair trade acts. In fact, however, the trade deficit has been brought about primarily by the high dollar. In other words, the problem has been one of monetary not trade policy. The Gephardt amendment thereby applies a draconian solution, a mechanistic way of dealing with the trade deficit that is not only calculated to offend our trading partners but, as I said, it also rejects international efforts to solve these problems. It belies the genuine intention on the part of the United States to help launch and actively participate in a new round of multilateral trade negotiations.

Europe ranked No. 1 in agriculture purchases for a total of $6.5 billion. Japan ranked No. 2, for a total of $5.4 billion. And Taiwan ranked No. 7, for a total of $1.2 billion. That is a total among these three specifically targeted countries on whom mandatory retaliation and in 4 months countervailing duties would be imposed of $13 billion that would be taken away from the American farmer. That figure approaches the entire outlay for our Commodity Credit Corporation in 1985.

I would like my colleagues to remember one thing about the voluntary restraints that we entered into with Japan on automobile imports. The consumer price index increased 27 percent since we entered into that little deal. The increase in car prices in America has been 47 percent, an average of $1,600 per car. The Gephardt amendment is designed to get rid of jobs in our productive export sector while protecting jobs in failed parts of our industrial sector, and at the same time it is going to export more jobs. It is going to create, I guess, the best kind of politics here the majority party knows how to create—solving problems with inflation, shrinking the pie again instead of expanding the pie.

I hope my colleagues, particularly from agriculture country, will remember the lessons of inflationary antitrade policy which is going to raise the prices to consumers of toasters and cars and clothes and just about everything else that one can imagine.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield 2 minutes to the gentleman from New Jersey [Mr. GUARINI].

Mr. GUARINI. I thank the gentleman for yielding this time to me.

Mr. Chairman, I appreciate the opportunity to speak today to urge support for the targeting provisions of title I of H.R. 4800. These provisions are essential in updating our trade laws and making them responsive to our highly sophisticated world trading patterns and practices.

Government intervention has become an integral part of other nations' economic policies and a great threat to reestablishing an open trading system. The ITC has documented the existence of foreign industrial targeting practices by the Governments of Japan, European Community countries, Korea, Taiwan, Mexico, and Canada. Since the 1950's, the Japanese Government has given preferential and special tax loans and grants to aircraft/aerospace and computer industries. Since the 1970's they have placed high tariffs, restrictive quotas, and imposed investment restrictions to promote the semiconductor industry. The European Community has given special treatment to the coal, steel, and textile industries, while Brazil has concentrated on giving special benefits to the computer, electrical equipment, aerospace, and auto industries.

In H.R. 4800, we clearly define targeting and make action mandatory under section 301 in cases where injury is found. Section 301 is intended to provide relief from actions of foreign governments which "burden or restrict" U.S. commerce. Certainly, the loss of major market share due to foreign industrial targeting would be considered a "burden" on U.S. commerce.

The injury requirement for targeting under section 301 avoids frivolous petitions and allegations of industrial targeting. Mandatory action is important to assure U.S. industries that their Government is willing to defend them against unfair trade practices.

The targeting provisions of title I are essential in updating and modernizing our trade laws. They are an integral part of our efforts to combat unfair trade practices. For these reasons, I urge you to oppose any effort to delete or modify the targeting provisions.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield 2 minutes to the gentleman from Washington [Mr. BONKER].

Mr. BONKER. I thank the gentleman for yielding this time to me.

Mr. Chairman, I would like to commend the gentleman from Ohio [Mr. PEASE] for his persistent efforts to extend international protection for worker rights wherever they may be.

I think we should recognize that his provision in this bill does not break any new statutory ground. The 1984 Trade and Tariff Act directed the President, in reviewing countries' eligibility for GSP, to consider additional factors, including respect for worker rights. Last year, when Congress favorably acted on the OPIC reauthorization, we included similar criteria to further efforts to protect international worker rights.

So I think what we are doing today by rejecting the Crane amendment is to not only be consistent with previous acts of this body, but to take it a step further by trying to bring other countries to the bargaining table when it comes to worker rights.

Mr. Chairman, I would like to say a word about those on the other side who have complained over the years, sometimes bitterly, about forced labor or slave labor in Communist countries. It is always a big issue when it is brought to the floor that we ought to routinely criticize those Marxist regimes that engage in the exploitation of their workers, but I would maintain that exploitation of workers really adheres to no political label, whether it be a Marxist regime or a rightist dictatorship. If people are going to be exploited for economic gain, then we ought to deal with that problem through our bilateral relations and through multilateral organizations.

The provision is entirely consistent with present law and will help this country deal effectively with what we now recognize is an unfair trade practice in the exploitation of workers.

The CHAIRMAN. The gentleman from Illinois [Mr. CRANE] has 2 minutes remaining.

Mr. CRANE. Mr. Chairman, I yield the remainder of my time to my good friend and colleague, the gentleman from Minnesota [Mr. FRENZEL].

Mr. FRENZEL. I thank the gentleman for yielding this time to me.

Mr. Chairman, I have pointed out before that there are at least a dozen and a half elements in this bill that would be veto bait, and that the strong veto suggestions coming from the White House are not idle threats.

The three items that the gentleman from Illinois [Mr. CRANE], the ranking member of the Subcommittee on

Trade, seeks to strike in this particular amendment are three of the most offensive of those items to international trade and to the administration.

The first, on the subject of targeting, is something that does not belong in the act. There is no need to provide extra proof under section 301, proof of injury. It is an extra burden for American industry which American industry would prefer not to have.

The creation of mirror laws would mean that American semiconductors, computers, aircraft, satellites, ceramics, and other DOD and NASA items would be subject to compensation and retaliation, and American agriculture would be in the same position.

□ 1200

With respect to the Gephardt amendment, it is really the centerpiece of the Democrat election issue bill of 1986, otherwise described by the sage of Kansas, Mr. ROBERTS, as being the Press Release Opportunity Act.

It makes competitiveness and hard work an unfair act. It is based on the fundamental belief that America cannot compete. If we were in a revolutionary war, we would probably call it the give-up-the-ship amendment.

This is something that tells people who work hard and build up trade surpluses with us, which we would like to do with them some day if we can, that they are unfair traders.

Of the countries that are going to be affected in the first wave, the Federal Republic of Germany's greatest unfair practice is that they are part of the European Community's Common Agricultural Program. The European Community, like the United States, subsidizes agriculture. Hong Kong would be in the next wave of affected countries. It is almost spotless on the fairness issue.

No other portion of the bill is as great a threat to a real trade war as the Gephardt amendment.

The Pease amendment on internationally recognized labor standards, which of course, are not internationally recognized, is another attempt to force our culture on the rest of the world. What it says is that every country whose labor standards are different from the ideals established by the gentleman from Ohio [Mr. PEASE] is guilty of unfair trade practices. That is an absurd basis for trade laws, and particularly harsh, even punitive, on struggling third and fourth world countries.

Vote for the Crane amendment. It stops the flow of blood from three of the worst running sores in the bill. It won't cure the bill but it will improve it by at least 15 percent.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield the remaining time to the gentleman from Florida [Mr. GIBBONS], the chairman of the Subcommittee on Trade, to close debate.

The CHAIRMAN. The gentleman from Florida [Mr. GIBBONS] is recognized for 3 minutes.

Mr. GIBBONS. Mr. Chairman, the problem with the Crane amendment is that it takes us back to the status quo, and the status quo is not sufficient for the conditions today.

Through H.R. 4800, we serve notice on the world that we stick to the high principles of free and open and competitive trade. But we have changed our tactics. The tactics that we used in the 1940's were sufficient for the conditions of the 1940's but the tactics of the 1940's are not sufficient to the condition today.

So while we hold the principles of free and open and fair competitive trade high, we say that in order to enforce that, and in order to carry out that principle, we must change our tactics of enforcement of the law.

In 1947 and 1948, when these tactics were promulgated, the world was far different than today. There was not a surplus of consumer goods on the world market. There was not a surplus of high-technology goods available to the world. There was not a surplus of any kind of goods available to the world.

I can remember when I tried to buy a car and they were not available unless you had a certificate of necessity. I tried to buy a business suit to start my practice of law and what I got was really disreputable because there were not any consumer goods available. Clothing was still being rationed. Tires were still being rationed.

Consequently, there was no dumping of consumer goods on the world market in the 1940's. There was no subsidization of goods on the world market in the 1940's. We could have a rather relaxed attitude toward those practices.

Today, the world is awash with consumer goods, agricultural products, high-technology goods, and all kinds of capital products. Governments now are subsidizing into our market unfairly, targeting our market to take it away from us by unfair business practices and dumping their goods in here in conspiracies to take our market.

These are the kinds of problems we have got to face. We cannot have free trade, we cannot have competitive trade, unless we are willing to fight, with the tools of our trade law, those unfair business practices and unfair governmental practices that dominate today's market.

Mr. CRANE's amendment goes back to the status quo, which simply will not work. Therefore, the Crane amendment should be defeated.

I commend the gentleman from Ohio [Mr. PEASE] for breaching the sensitive subject of labor practices, practices such as hiring people at an unconscionably early age and working them for 16 or 17 hours a day. We have got to start looking at that and this is a fair start. It is discretionary, but it is a useful tool to encourage respect for human rights.

The Crane amendment should be defeated.

Mr. SEIBERLING. Mr. Chairman, I rise in strong support of the labor rights provisions of the committee bill, and in strong opposition to the amendment of the gentleman from Illinois [Mr. CRANE].

The committee bill defines as an unreasonable trade practice the denial of internationally recognized workers' rights. These rights include collective bargaining, child labor laws, and reasonable health and safety standards. Under the provision, the President would be given authority to reduce imports from countries which violate international labor standards. The American people, I believe, strongly support this approach. My latest questionnaire to all the residents of my district brought 7,200 responses, and indicated that not only do people want to tighten protection against unfair import practices (77 percent for, 15 percent against), but also that they want to curtail imports from countries with substandard worker and environmental protections (60 percent for, 25 percent against).

That the committee adopted the labor rights provisions is due in large measure to the efforts of my friend and colleague from Ohio, DON PEASE, who has almost single-handedly pushed the committee, and now the House, to take action on labor rights. DON PEASE has been a pioneer in exploring this aspect of the trade problem, and he deserves our admiration for bringing this issue so forcefully to our attention.

Enactment of the labor rights provisions will accomplish two important objectives. First, it will help stem the loss of U.S. jobs to countries which are all too ready to exploit their own people, condemning them to substandard working conditions and desperately low wages in order to obtain a trade advantage over the United States. Second, it will prod those countries to better the lot of their own labor force.

For those Members of this body who have complained long and loud about the difficulty of competing against dirt-cheap Third World wages, the labor rights provisions of H.R. 4800 will help to stop the standard of living of American workers from being inexorably undermined. For those who express concern about global unrest, the labor rights provisions will help undercut one of the key causes of such unrest—abject poverty in the developing countries of the world—by encouraging governments to provide a better standard of living for their workers.

Today, workers in Third World countries are going through all the agony that the developed countries went through in the early days of the industrial revolution in the late 18th and early 19th centuries. Workers in Third World countries are being exploited in the very same manner, and because they have not developed strong unions and laws to protect labor, indeed because their governments often systematically deny them their rights, we are forced with the spectre of workers in the United States, giving up their own standard of

living because of competition from these exploited industrial conditions.

It was these very same practices and conditions which gave rise to Marxism. If we really want to take action which will preserve American jobs and further the cause of peaceful democratic stability, then we will retain the labor rights provision in this bill. Its adoption will help accelerate a rise in work and living standards around the world while making it more likely that all compete on the same footing. I urge the rejection of any amendment to delete these provisions in the committee bill.

The CHAIRMAN. Under the rule, all time for debate on this amendment has expired.

The question is on the amendment offered by the gentleman from Illinois [Mr. CRANE].

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. CRANE. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 137, noes 276, not voting 20, as follows:

□ 1220

The Clerk announced the following pair:

On this vote:

Mr. Zschau for, with Mr. Davis against.

Messrs. FRANKLIN, RAY, SPENCE, ROGERS, and HUBBARD changed their votes from "aye" to "no."

Mr. HUGHES changed his vote from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. FRENZEL

Mr. FRENZEL. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment offered by Mr. FRENZEL: On page 57, strike line 17 and all that follows thereafter through line 13 on page 61. On page 404, strike line 14 and all that follows thereafter through line 3 on page 407.

On page 68, lines 12 and 22, and on page 69, lines 1, 10 and 17, strike "Trade Representative" and insert "President". Make conforming changes to maintain Presidential authority to provide relief.

On page 94, beginning on line 9, strike section 122.

The CHAIRMAN. Pursuant to the rule the amendment is considered as having been read.

Pursuant to House Resolution 456 the gentleman from Minnesota [Mr. FRENZEL] will be recognized for 15 minutes and a Member opposed will be recognized for 15 minutes.

The Chair recognizes the gentleman from Minnesota [Mr. FRENZEL].

Mr. FRENZEL. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, my first amendment relates to the trade remedy title of the bill, title I, subtitle B, chapter 1. The bill language is a revision of section 201 of the Trade Act of 1974, the "fair trade" law. Under this law, a company or industry may petition the Government for relief due to injury caused by rapidly increasing imports.

During the markup of the Ways and Means trade package, this section did receive a considerable amount of attention by those who sought to make some positive improvements, but all efforts to strike some kind of compromise failed. The three sections of my amendment were all offered as separate amendments but failed on a party-line vote.

Because I believe that the removal of these three items would make this section of the bill more attractive to the administration and to good trade policy. I think it is worth the Members' time to bring them up again for consideration by the full House in one amendment.

The first part of my amendment relates to the industry adjustment advisory groups established in the bill. The original Trade Subcommittee language was pure and simple industrial policy. The language was toned down between the subcommittee and full committee. However, in title VII, the foreign corrupt practices section, there is further language which would reinstate the industrial policy nature of title I.

This language is simply not necessary. The establishment of these kind of adjustment advisory groups would seem to raise some serious antitrust problems. I also fail to see why an industry adjustment plan is necessary, since a petitioner now can present an adjustment plan in a 201 petition. Also, the ITC considers adjustment on its own, whether or not a petitioner submits a plan, in the process of determining whether relief is necessary.

Mr. Chairman, I believe we have a fairly clear consensus in this country against industrial policy. This country just is not ready for more Government interference in the private sector. In fact the mood of the country seems to be in the other direction.

I also have yet to see a successful coordinated industrial policy in another country. If it doesn't work in other countries, why would it work here.

The second part of my amendment would maintain current Presidential authority to provide import relief. Right now the President reviews any ITC's decision that recommend import relief should be given and makes his own final decision based upon all considerations, including foreign policy. The President is the only person who has access to all of the factors that must be considered before giving relief. The final decision should remain with him.

I believe no President would design a bill which stripped his authority as this bill does. The final section of the amendment strikes the adjustment assistance trust fund. The trust fund would earmark any duties or quota auction funds for use in an expanded trade adjustment assistance program. The administration strongly opposes any earmarking of duties which has the effect of taking a program off budget. All Government programs should have to prove themselves through the normal appropriations process. They should not become entitlements.

Since there are few current duties that would be designated to trust fund, and no current funding from quota auctions, I am at a loss as to why we need this trust fund. Quota auctions were included in the subcommittee bill, but were removed due to serious opposition from the private sector.

Mr. Chairman, I do not believe that this amendment includes language that should be controversial. The intent is to strike sections of the bill that are not necessary.

I urge my colleagues to support this amendment.

Mr. Chairman, I reserve the balance of my time.

Mr. GIBBONS. Mr. Chairman, I rise in opposition to the Frenzel amendment.

The CHAIRMAN. The gentleman from Florida [Mr. GIBBONS] is recognized for 15 minutes.

Mr. GIBBONS. Mr. Chairman, I yield 4 minutes to the gentleman from New Jersey [Mr. GUARINI].

Mr. GUARINI. I thank the Chairman.

Mr. Chairman, the industry advisory group is a key tool in making section 201 useful. What it really basically does is call together industry, labor and government into a panel assisted by consumer and community interests and a small business representative. Where there is an industry that is pressed for hard times and they need help because of increased import competition, there is a partnership that is formed. We are all in this trade effort together to make our economy work.

Traditionally, labor has been antagonistic to industry and vice versa. Government has been a reluctant part of this whole marriage.

We have learned through MITI, which the Japanese have operated, that they have gotten together a strategy, not a national policy but a strategy for which their industries can prosper and which they can share information and which they can form a mechanism to present views other than the petitioner's view.

□ 1235

Now the administration currently can consider the petitioner's view and has a mechanism only for the petitioner. What we are really doing is broadening this whole cooperative partnership effort to extend it to other partners and other people in the industry.

So I think that it is really an essential part of modernizing our trade effort. It certainly is not an industrial policy, because we are dealing with the private sector.

We had an RFC, [Reconstruction Finance Corporation] which helped ailing industries. We do not have such a policy today. It worked very, very well. And what happened there was that we had a cooperative effort on the part of all parties to make an industry work where it was hurting.

I think it is about time that we learned a lesson from our trading partners and put together this team, this partnership, where we are all working toward a common purpose, and that is trying not to get an elite board, not picking winners or losers, but rather trying to develop a strategy for U.S. industries to modernize and adjust to increased import competition.

On these grounds, I urge you to vote against the Frenzel amendment.

Mr. GIBBONS. Mr. Chairman, I yield 4 minutes to the gentleman from Ohio [Mr. PEASE].

Mr. PEASE. Mr. Chairman, I rise in opposition to the Frenzel amendment, all three parts of it.

First of all, this amendment would strike from the bill a provision that creates industry adjustment advisory groups.

Section 201 of the Trade Act allows relief to be granted to American industries, relief in the form of quotas or tariffs, when those industries are heavily impacted by imports that are fairly traded.

We do not make that relief permanent. We make it temporary. The object is to give the industry a period of time to adjust and get back on its feet, modernize, go into new lines of products or whatever. And we want to use the period of time to make that industry more competitive.

We think it is important to have industry adjustment advisory groups which would get together labor, management and community people and to sit down and decide and advise the industry what needs to be done to become more competitive. Otherwise, we could be granting 3 or 4 or 5 years of relief with tariffs and quotas, and, at the end of that 5-year period, not be any further ahead than we were at the start. That is not the purpose of section 301.

I would emphasize that this is an industry adjustment advisory group; it is not industrial policy. It has no powers to require anything.

Second, the Frenzel amendment would strike from the bill a section which transfers power from the President to the U.S. Trade Representative in section 201 cases. The gentleman from Minnesota [Mr. FRENZEL] admits that the USTR will not make decisions which patently go against the desires of the President, and we understand that, too, But right now too often trade decisions are bound up in foreign policy considerations by the time they get to the White House. This is a different section of the law, but just yesterday, the White House agreed after 2½ years to try to take some action and help the machine tool industry. I dare say that the holdup was due to matters other than trade considerations.

In a way, this provision protects the President. He can allow the USTR to make decisions based on trade considerations and can say to a foreign secretary or ambassador, "This was not my decision. This was a decision of the USTR."

But when it comes down to a really important consideration that might le-

gitimately override the trade matter, then the President could certainly have an influence with his USTR.

Finally, the Adjustment Assistance Trust Fund, I think is important. We are here today discussing trade legislation because of this administration's callous, doctrinaire disregard for what happens to workers in factories that are closed down because of imports coming into this country.

What we say in section 201 is, yes, we believe in free trade; yes, we are going to allow imports; but also, yes, we are going to help the workers, the communities, the firms that are the victims of this trade policy, that lose jobs because of this. We need for that purpose an adjustment fund. That is what this bill provides.

Mr. FRENZEL. Mr. Chairman, I yield 2 minutes to the distinguished gentleman from Illinois [Mr. CRANE].

Mr. CRANE. Mr. Chairman, I thank the gentleman for yielding this time to me. I want to commend the gentleman for his insights on the committee, and again here in the Committee of the Whole House, with this particular amendment.

This advisory group we have heard likened to MITI, the Ministry of Industry and Trade in Japan. MITI does encourage cooperation over there, It encourages cooperation on the part of businesses to sit down and pool resources, to make R&D breakthroughs with a view to increasing productivity, a very positive thing that should be emulated here in the United States.

However, it seems to me that in this instance the advisory group we are creating is not designed to create new products to try to export into other markets. Rather, it is designed to try to prop up failing industries that are not being subjected to unfair trade practices, but rather are simply inefficient. In that sense, I do not see an analogy that is valid when discussing this advisory group that is created under H.R. 4800.

On the Presidential authority question, I could not again agree more with my colleague from Minnesota, because it seems to me that there are national interests that are affected from time to time, and they came forward very dramatically when Secretary of State Shultz was in Turkey recently. He wanted to talk bases and they wanted to talk textiles.

So there are considerations that go beyond the narrow scope of just individual economic concerns.

Finally, on the trust fund question, TAA has really been a great failure in terms of cost-benefit ratios. Only about 5 perent of the people who have utilized the Trade Adjustment Assistance Act moneys in the past have found new employment through that source. It is a faulty program.

Mr. Chairman, for all of these reasons, I think the amendment by the gentleman from Minnesota [Mr. FRENZEL] should be supported.

Mr. GIBBONS. Mr. Chairman, I yield 2 minutes to the gentlewoman from Ohio [Ms. KAPTUR].

Ms. KAPTUR. Mr. Chairman, I rise in opposition to the Frenzel amendment.

The issue for America is: How do we as a nation modernize and adjust our industrial and defense bases fast enough to meet the competition in so many threatened industries—in machine tools, steel, semiconductors, textiles, motor vehicles, shipping, and so many others?

I have believed for some time that this country lacks cohesive industry adjustment alternatives in which all interested parties—management, labor and government—can rally behind and work together for productivity improvements.

Under the committee bill, industries that are struggling with import competition have the option, just the option, to file a petition with the U.S. Government requesting relief in the form of tariffs or quotas. But if our Government is going to offer tariff protection to these industries, why not require that they live up to their end of the bargain?

The adjustment section of this bill finally offers the opportunity for our Government to use its authority to exact a quid pro quo for regaining competiveness. If America is going to regain market share in world markets, we must make temporary government regulatory authority part of the solution, not part of the problem. We cannot allow industries to leave a period of shelter in the same condition as when they petitioned for assistance. Quite honestly, it absolutely makes no sense to support any of our trade law remedies if they do not encourage efforts to regain competitiveness.

□ 1245

We cannot allow industries to leave a period of shelter in the same condition as when they petitioned for assistance. Quite honestly, it absolutely makes no sense to support any of our trade law remedies if they do not encourage efforts to regain competitiveness. The people in America beckoned for swift action to restore U.S. preeminence in world markets. The industry adjustments section of this bill is just the answer to their call.

I urge my colleagues to vote against the Frenzel amendment and for regaining industrial competitiveness in America.

Mr. FRENZEL. Mr. Chairman, I yield myself 4 minutes.

Mr. Chairman, we have enjoyed a brief but spirited debate on this particular amendment. Most of the excitement seems to center around the adjustment advisory groups, and I note that some members of the Ways and Means Committee are objecting to striking wording in title VII which they have already agreed to strike in the ways and means section. I must confess to some confusion about that particular matter.

I tried to explain to the body earlier that this language crept in through the Foreign Affairs Committee section of the bill. Clearly, I think it is against the wishes of a majority on the Ways and Means Committee.

I must repeat again that creating industrial policy groups is contrary to U.S. policy and contrary to the feelings of the people of the United States.

Yes, under section 201, it is useful to help industries down on their luck to regain their competitiveness through temporary assistance if they are willing to provide some self help. It is not a good idea to establish a committee composed mostly of people within the industry, that is, to put the fox in charge of the hencoop, and then to have them recommend the exact policy to restore that industry, and finally to make that industry-sponsored subsidy plan the standard for the world.

Yes, under the Ways and Means Committee bill industry-sponsored industrial policy is not mandatory. But please remember, in nearly every feature that was discretionary in present trade law, the Ways and Means Committee came back this year and said, "We must make them mandatory."

And what will happen in the future is that if these plans are not accepted by the USTR, next year we will be right back here with a bill saying we will now make them mandatory.

Finally, I want to talk about trade adjustment assistance.

The gentleman from Ohio [Mr. PEASE] has carried the lion's share of the burden in trying to keep a program alive. I concur with his desire to keep the program alive. I lack a good deal of his enthusiasm for various aspects of the program, however.

But we do have a TAA Program which was kept open by the Congress. Any of us could have objected to the unanimous-consent request and killed it. I did not, because I thought it was a good thing to have on the books, at least until we can find a better way to serve the TAA needs.

I have to remind the House that however juicy this sounds, and however much people who are out of work demand the benefits, and no matter how much the various trade unions who have taken advantage of it believe it is a good program, it is fair to say that over the past 3 years the people completing programs compared to the number starting or who have been enrolled in programs is somewhere around a ratio of 1 in 7. That is, the program has just not been successful.

We do need to repair it. It is not such a good program that we ought to make a pie available so that all of the blackbirds who want to eat the pie get in there and mess around with it before we know that the program works. Clearly the one we have now does not work.

Again, I state that my amendment only repeals an obsolete trust fund which has negligible financing. It does not affect our TAA Program at all.

My amendment should be passed.

Mr. Chairman, I reserve the balance of my time.

Mr. GIBBONS. Mr. Chairman, I yield 2½ minutes to the gentleman from Arizona [Mr. McCAIN].

Mr. McCAIN. I thank the gentleman for yielding.

Mr. Chairman, I rise in reluctant opposition to the Frenzel amendment. I emphasize "reluctance" because I believe that the gentleman from Minnesota [Mr. FRENZEL] is accurate in many of his statements made in his amendment. I believe the President should fashion American trade policy, as he has so well articulated.

However, if the President refuses to exercise powers granted to him, perhaps we need to make some changes.

As you undoubtedly are aware—and I would like to remind my colleagues from Minnesota—in 1984 the copper industry, utilizing section 201 of the Trade Act of 1974, filed for relief from injury caused by unfair import competition. The President denied relief, despite the findings of the International Trade Commission.

As you may recall, the ITC found that copper imports were a substantial cause of injury to the U.S. copper industry and recommended the imposition of import relief measures. The President and this administration rejected this or any other action.

I would like to say to my colleagues from Minnesota that I strongly believe that if there are industries in the United States that have been found to be victims of unfair trade competition, I refer specifically to the case of copper industries subsidized with American tax dollars through international organizations—I am speaking specifically of Chile, Zaire, and Zambia—which subsidize exports of copper so that they could dump them on the world market, thereby turning cities in this country and my state into ghost towns because of the shutdowns of the copper industry throughout this country, I would suggest that we probably need to take stronger measures in order to ensure that all of our industries, not just the copper industry, are allowed a level playing field.

I would suggest to the gentleman from Minnesota that if there is repetitions of findings of the ITC of unfair trade practices upon the part of our competitors and there is no action on the part of this or any other administration, then there will be a call for action on the part of the American people, and members of these industries which are the victims of unfair trade competitions will demand action, I think they deserve it.

Mr. FRENZEL. Mr. Chairman, I yield myself the remaining time.

Mr. Chairman, I thank the gentleman from Arizona for his good counsel, and I appreciate that extractive industries not only in his State, but all over the United States, and all over the world are suffering. It is mostly true of minerals like copper and other mined objects. The mining business is in a terrible state, and I sympathize with the problem in his district.

However, the gentleman does mention unfair trade practices. This section of the trade law of course, is in section 201, which refers to injured U.S. companies and industries, but there is no requirement or showing of unfair trade practice to get relief under this section of the act. All that is required is that one show injury, and upon that showing gain the President's approval for some sort of particular relief, which could be tariff, or quota, or VRA, or other kind of relief, whatever seems to be most appropriate under the circumstances.

My amendment only tries to get this industry group out of making trade policy. I believe that any industry has sufficient access now either to the Department of Commerce or to the USTR to be able to make recommendations under current circumstances.

But to give those industrial policy plans new stature under law means that there will be great pressure on the agencies involved to make those plans mandatory. If that occurs, we will be surrendering to industrial policy determinations made at the worst possible level, that is, by the benefited industries and their employees.

Mr. Chairman, I hope that the amendment will be accepted.

Mr. GIBBONS. Mr. Chairman, I yield 1 minute to the gentleman from Ohio [Mr. PEASE].

Mr. PEASE. I appreciate the gentleman yielding.

Mr. Chairman, I think it is important that we keep in mind what these advisory groups would do and not do and how far they are away from industrial policy.

The gentleman from Minnesota has just said if this happens and then if that happens and then if a third thing happens, then we get into industrial policy made at the wrong level by the wrong group.

But there are a couple of big "ifs" there. This bill does not provide for that. It provides for an industry advisory group made up of people from the industry, from worker groups, from communities which would sit down and try to figure out a way to salvage an industry, make it more competitive, allow it to go into different lines of production and return to health so that jobs and communities all across America can be preserved.

That is all we are trying to do with these groups.

Mr. GIBBONS. Mr. Chairman, I yield myself the balance of my time, to close debate.

The CHAIRMAN. The gentleman from Florida [Mr. GIBBONS] is recognized for 2 minutes.

Mr. GIBBONS. Mr. Chairman, I think we have heard enough reasons why the Frenzel amendment should be rejected. This is not industrial policy. This is just good sound quid pro quo. If you are going to give an industry some protection under the trade laws, you ought to get something out of that industry in the way of concessions from the people who are in the industry, and that is what this does. It is purely a voluntary procedure. I do not think it hurts the trade laws at all, and I would ask for a "no" vote on the Frenzel amendment.

The CHAIRMAN. Under the rule, all time for debate on this amendment has expired.

The question is on the amendment offered by the gentleman from Minnesota [Mr. FRENZEL].

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. FRENZEL. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 109, noes 306, not voting 18, as follows:

[Roll No. 132]

□ 1310

Mrs. VUCANOVICH, Mr. CRAIG, and Mrs. ROUKEMA changed their votes from "aye" to "no."

Mr. KINDNESS, Mrs. ROUKEMA, Mr. KRAMER, and Mr. HUNTER changed their votes from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. FRENZEL

Mr. FRENZEL. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment offered by Mr. FRENZEL: On page 111, beginning on line 12, strike section 135.

On page 19, between lines 15 and 16 insert the following: "(A) constitutes unfair government pricing of natural resources or of the right to remove or extract natural resources."

On page 119, beginning on line 1, strike section 137.

On page 123, beginning on line 5, strike section 138.

The CHAIRMAN. Pursuant to House Resolution 456, the amendment is considered as having been read.

The gentleman from Minnesota [Mr. FRENZEL] will be recognized for 15 minutes and a Member opposed will be recognized for 15 minutes.

The Chair recognizes the gentleman from Minnesota [Mr. FRENZEL].

Mr. FRENZEL. Mr. Chairman, this amendment is a little more exciting than the last two, because this deletes a section relating to natural resources in which Members who have interests in timber, oil, and other resource items will certainly have a great interest.

What my amendment does is strike the so-called natural resources portion of the bill in the countervailing duties section, and instead makes unfair Government pricing of natural resources or the right to remove or extract natural resources as a separate cause of action under 301.

My amendment still leaves two avenues to those industries which believe that they are being subjected to unfair practices. One would be to go forward under countervailing-duty laws as they exist today, which the timber industry is doing. As I understand the recent Department of Commerce ruling with respect to a case with Mexico relating to carbon black, there is some new hope that that will be successful.

□ 1320

Under my amendment, there would be a second option. That would be to file our case for unfair trade practices under section 301, as I already explained just a minute ago.

The bill, on the other hand, makes a unilateral definition of natural resource subsidy. Unfortunately, this bill is rife with unilateral definitions. It makes unilateral definitions for the United States of items that have a known definition in international law.

The risk that one runs when one does such a thing is that every other country in the world will pass the same kind of a law which will therefore make U.S. industries vulnerable under those particular laws which we ourselves invented.

The problem arose several years ago. The House passed a natural resources bill very similar to this in 1984, could not reconcile it with the Senate, and it was lost. So we have it back before us.

However, it is in worse form because of the timber section in which one of the tests for subsidy is whether another country's stumpage cost is lower than the stumpage cost in the highest cost region of the United States. That kind of comparison, of course, is an American selling price of the worst kind, and clearly violative of our international obligations.

The second thing my amendment does is strike the burdensome provisions on downstream product monitoring. For some reason the committee decided that the Department of Commerce, which does not have very much money, should spend lots of time monitoring imports where there has been a problem with dumping 5 years previously.

It is not a terrible part of the law, but it is not good use of scarce resources. We have precious few resources. We have about 130 people in the USTR. We have a small office over in Commerce and we have a few hundred people at the U.S. International Trade Commission. If we give them enough studies and monitoring to do, they will not be able to do the job that the Members of this House expect them to do in administering our trade laws.

Finally, I think another important feature of my amendment is that it strikes the provisions which establish a private cause of action in the Court of International Trade for damages against manufacturers, exporters, importers or cosignees for economic losses associated with imports sold at less than fair value.

This is the so-called Guarini amendment which says that in addition to

antidumping duties, the aggrieved company can go into court and sue and get damages awarded to it. Under our international treaties, it is quite clear that there is no additional penalty available other than the antidumping duties.

The problem, of course, is compounded by the fact that frequently our courts cannot reach across the ocean to the person who may have done the dumping. In such cases, under the Guarini amendment, the American company could sue an American importer, which will simply have the effect of raising costs of everybody.

Now, those of you who like trial lawyers and like to see large settlements and huge bonuses for lawyers will probably like this provision. I think American industry is scared of this feature with good reason, and very nervous that it is going to raise the cost of doing business both in America, and offshore, to a very high level.

Mr. Chairman, I yield myself 2 additional minutes and I yield to the gentleman from Illinois [Mr. CRANE].

Mr. CRANE. Mr. Chairman, I thank the gentleman for yielding.

Going back to making the natural resource subsidies actionable under section 301 and anticipating the probability of mirror legislation by other trading partners, thinking to some of our own cities that I believe probably would qualify; grazing rights, for example, on Federal lands, would it be the gentleman's understanding that would constitute a natural resource subsidy under the language of the bill?

Mr. FRENZEL. Under the definition of this bill, it is my judgment that that would be actionable against the U.S. company in the case of a mirror law in other countries.

Mr. CRANE. How about hydropower projects, TVA, for instance?

Mr. FRENZEL. Of course, that is an American subsidy which could be countervailed.

Mr. CRANE. And some of the prices on natural gas that are still under control?

Mr. FRENZEL. Well, that has been a problem and that is true. That will be covered if this bill were passed in another country.

Mr. CRANE. So any other country that had mirror legislation on the books could turn this particular language around, use our identical language and nail us for the same practices that we are using.

Mr. FRENZEL. In my judgment it would cover nearly every agricultural product that we sell abroad, would be countervailable with the passage of this kind of law in another country.

Mr. CRANE. I thank the gentleman.

Mr. FRENZEL. Mr. Chairman, I yield myself 1 additional minute.

I do so to explain to the body that it was not my first choice that we offer all these amendments in packages. It was something that was required by the Rules Committee and by the effort of the leadership to move the bill promptly forward. I apologize that we do not have time to attack each of these bad features separately. Unfortunately, under the rules we cannot.

Mr. Chairman, I reserve the balance of my time.

Mr. ROSTENKOWSKI. Mr. Chairman, I rise to oppose the amendment.

The CHAIRMAN. The gentleman from Illinois [Mr. ROSTENKOWSKI] is rcognized for 15 minutes.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield 3 minutes to the gentleman from Illinois [Mr. RUSSO].

Mr. RUSSO. Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from Minnesota and I would like to take this opportunity to deal with that portion of his amendment striking the downstream product monitoring provision contained in H.R. 4800.

We have known for some time that our antidumping and countervailing duty laws are being evaded by the further processing abroad of dumped or subsidized components through a technique known as diversionary downstream dumping.

The best way to describe this behavior is through example. Japanese fiber producers avoid the 23-percent antidumping duty now imposed on plied acrylic yarn by using surrogate processors in other countries. Shipments of cold finished bar from the European Community more than doubled when restraints were placed on that product's raw material, hot rolled bar.

In 1984, and again this year, we developed a remedy to deal with diversionary downstream dumping which occurs when a manufactured product containing a dumped input product is exported to the United States. Unfortunately, this provisions was dropped in conference because of administration objections. Two years have passed, and we have yet to recieve any indication from the executive branch that they take this problem seriously. So this year, in addition to again adopting a downstream dumping remedy, the Ways and Means Committee also approved a product monitoring provision enabling us to complete our defenses against diversionary dumping.

Many of the industries affected by downstream diversion are composed of small businesses. They simply do not have the resources to track diversion. Section 137 of the trade bill establishes a modest monitoring program that would give small business that information.

Companies making products like dumped or subsidized components could ask the Commerce Department to designate downstream products for monitoring. Only products made from components that are already subject to high dumping or subsidy findings would be eligible. Commerce would be required to simply act on the petitions. The monitoring function would be carried out by the International Trade Commission. The ITC would track imports of the monitored product and analyze those cases where imports increased by 5 percent or more in any quarter.

As I understand it, there are only about 25 products currently subject to dumping or countervailing duty orders or suspension agreements that would be eligibile for downstream monitoring. Of those products, about one-half are already being monitored under the Commerce Department's Steel Import Program.

So there is no major administrative problem in dealing with this monitoring.

During debate in full committee, a representative of the ITC stated that the monitoring would cause no significant administrative burden. Since the Commerce Department's role in the process is limited to the simple determination of whether diversion is likely, no significant strain on its resources will be caused by this provision. In fact, we have given the Commerce Department the power to terminate the monitoring process if they find that imports of the downstream product are not increasing and there is no reasonable likelihood of diversion.

So there really is no major administrative burden. We have tried to deal with the objections that the administration raised 2 years ago. We have dealt with them and again they do not want to help us on this issue of diversionary dumping. It is important that we finally do what is necessary to protect American industries. When we know there is diversionary dumping, we need to act and we need to act quickly.

Thus, the program represents a reasonable attempt to provide an early warning signal of possible diversionary practices. It works in tandem with the remedy we've created, a version of which was contained in the Republican substitute produced by the minority on the Ways and Means Committee. Today, we have an opportunity to confront forcefully an unfair trade practice that we rightly described as pernicious 2 years ago. I urge my colleagues to support this part of H.R. 4800 and oppose the Frenzel amendment.

Mr. GIBBONS. Mr. Chairman, I yield myself 2 minutes.

Mr. Chairman, when I heard the gentleman from Minnesota [Mr. FRENZEL] describe this provision, I hardly recognized it because the gentleman's description does not comply with what I see in the proposed statute here.

Let us go to page 111 and examine it. I would ask you to read it, because in

the 2 minutes I have I cannot read the whole thing to you and explain it, but let me say this. This is an antisubsidy section of the law, an antisubsidy section of the law. Subsidies are now and have been illegal under international law and under U.S. law for so long a time that man cannot remember.

What are we merely attempting to do here? Somehow our antisubsidy laws over the long years have been eroded by administrative interpretation and judicial interpretation and now a resource that a country finds in its treasury if it delivers it unfairly to a private producer is not counted as a subsidy anymore, but if they give a cash subsidy to a private producer, there is no doubt that it is a subsidy.

I ask you this question. In practical effect, is there any difference in taking a resource subsidy out of your treasury, an in-kind gift, and giving it away to a private business entity, or taking cash out of your treasury and giving it away to a private entity? That is the test that we are trying to meet.

This is a generic piece of legislation. It does not deal with any specific type of resource. It just says that if you have got a resource in your treasury and you are giving it away or selling at less than fair market value, then you have got to pay the subsidy penalty. That is all that it does.

Mr. RUSSO. Mr. Chairman, I yield 3 minutes to the gentleman from New Jersey [Mr. GUARINI].

Mr. GUARINI. Mr. Chairman, I rise in support of compensatory damages for illegal dumping where it has in fact been found by the ITC and by the Department of Commerce.

Where there is an injury, there must be a corresponding remedy. Now, under our law of 1916, we do in fact have treble damages and criminal violations for illegal dumping. The fact is that this has never been exercised because the level of proof is so high that it was almost impossible to prove the case, and because you have to show specific intent. There is no violation of GATT, because this has already been grandfathered in long before GATT ever came into existence in 1948.

Also, this is a private remedy. It is not between countries. It is between private parties.

In regard to whether or not it applies to American companies, if they are benefiting by illegal dumping, putting factories and workers out of work in other parts of our country, they should be held responsible. We should have the same level of test for them that applies to anyone else.

As far as lawyers are concerned, there are no legal fees that are prescribed in this particular bill. Also, it is going to be highly expensive to bring this kind of an action. It can only be brought after there has been a finding, a ruling by the ITC. It only goes back for 3 years for damages. There is a 2-year statute of limitations. It has been very, very carefully thought out.

□ 1335

Let me say it is the biggest deterrent we have in the 458 pages of our trade bill to assure protection to our industries here that are illegally being preyed upon by foreign companies that are forcing illegal practices on our companies and putting our people out of work.

It is not consistent. It is not protectionism. It already exists in our law, and I think it is about time we did have an effective cause of action which we could being here in our court system where a wrong has been perpetrated. If an American company feels that there is a problem, they can always get indemnified by that foreign manufacturer. There are safeguards and protections for our own companies here. It is about time that we did bring a cause of action and enforce our antidumping laws.

Mr. GIBBONS. Mr. Chairman, I yield 3 minutes to the gentleman from Arkansas [Mr. ANTHONY].

Mr. AuCOIN. Mr. Chairman, will the gentleman yield?

Mr. ANTHONY. I yield to the gentleman from Oregon.

Mr. AuCOIN. Mr. Chairman, I rise in opposition to the amendment.

There is great, great concern in the Northwest and elsewhere that American lumber producers are being forced to operate under the yoke of unfair competition from Canadian lumber manufacturers.

The unfairness arises from low-cost raw materials. In this case, the sale of stumpage from provincial forests in Canada at prices that may not represent fair market value.

Unfortunately, current law is unclear in determining whether natural resource subsidies are countervailable. The provision in H.R. 4800 authored by my colleague from Florida, Mr. GIBBONS, takes away this uncertainty.

American manufacturers should not be saddled with an unfair burden of competing against imports if the raw materials in those imports are subsidized, if the cost of those raw materials are a significant part of the overall product cost, and if the subsidy causes injury to domestic manufacturers.

This may well be the case with Canadian lumber. The American lumber industry has recently filed a countervailing duty case, and that case may well determine that a duty is in order. With hope, the natural resource subsidy provision in H.R. 4800 will clarify the issues in this case.

Mr. Chairman, in a period of record demand for softwood in the United States, mills throughout the Nation and especially in the Northwest are still struggling to compete. This legislation might help them overcome unfair competition. The amendment before us, however, would weaken this chance.

To address the unfair trading practices of other nations, in this case for products involving natural resources, I urge that this amendment be rejected.

Mr. ECKART of Ohio. Mr. Chairman, will the gentleman yield?

Mr. ANTHONY. I yield to the gentleman from Ohio.

Mr. ECKART of Ohio. I thank the gentleman for yielding.

Mr. Chairman, I rise in opposition to the amendment, which is an important section on which the gentleman from Arkansas assisted me.

I rise today in support of H.R. 4800, the omnibus trade bill, and against the Frenzel amendment. This amendment would delete one of the most important provisions of the bill: Section 138 of H.R. 4800, which would allow domestic companies a private cause of action for illegal dumping.

Currently, the only tool against illegal dumping are countervailing duties. While these are not very effective, most often they are too little, too late. It usually takes several years for the Department of Commerce to make a finding of dumping. Foreign firms, with no disincentive against dumping, continue to dump their goods into our markets during this period. Even if these foreign producers are hit with countervailing duties years after they began their illegal activities, they still are not adversely affected as they simply pass the duty on to the consumer.

Most importantly, our domestic firms witness their markets deterioration at the hands of foreign dumped goods. By the time that limited relief in the form of countervailing duties is received, our firms have lost significant market share to exports and, in some dire cases, our firms have even gone out of business. The best solution to remedy this dramatic problem is an economic disincentive to halt dumping and that is just what this provision in the bill, and similar to the Trade Law Improvement Act which I introduced with Representative TRAFICANT recently, is designed to do.

This provision of the omnibus trade bill is a microcosm of what this debate on trade is all about. It's all about jobs. This provision is not protectionism; instead, it gives the American business and the American worker a chance to compete fairly. This amendment would merely continue to facilitate the import invasion which has led to the loss of some 4 million American jobs, over 40,000 in northeast Ohio alone. I urge my colleagues to reject this amendment and vote in favor of this job saving legislation.

Mr. ANTHONY. I thank the gentleman for yielding this time to me.

Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from Minnesota [Mr. FRENZEL].

Both international and U.S. law recognize that subsidies distort the market and harm the world economy. Both international and United States law recognize that subsidized goods

should be subject to countervailing duties. There is no reason to treat natural resource subsidies any differently.

Mr. FRENZEL says that natural resource subsidies, the Government provision of resources at less than a fair market value, should be subject to action as unfair trade practices but not as countervailable subsidies. There is no reason to distinguish natural resource subsidies from other subsidies. Nor is there a rational basis to distinguish removal right subsidies from other natural resource subsidies in terms of available remedies. Indeed, if the United States imposes a remedy against natural resource pricing as an unfair trade practice, as opposed to action against an illegal subsidy, United States action may be subject to claims of compensation under the GATT.

Remedies against unfair trade practices are entirely discretionary with the President. Under the unfair trade practices provision, the President may choose not to act against a natural resource subsidy for any number of reasons unrelated to the issue of the subsidy itself.

Under current law, the President already has the authority to act against unfair trade practices, including unfair natural resource pricing, but no action has been taken. The number of outstanding trade disputes demonstrates the inability of discretionary unfair trade practices provisions to deal adequately with our current $150 billion trade deficit. Proposals to relegate natural resource subsidies to unfair trade remedies are obviously intended to prevent effective action against foreign subsidies which are costing U.S. jobs.

Countervailing duty decisions are made in public, quasijudicial proceedings which allow both sides to effectively present their case. If a foreign program is a subsidy and injures a U.S. industry, a duty should be placed upon goods benefiting from that subsidy. The procedural safeguards of the countervailing duty law are both necessary and adequate if natural resource subsidies are to be acted against effectively.

Natural resource subsidies are harming, among others, the U.S. lumber, petrochemical, cement, and fertilizer industries. There is no reason to delay action in making such subsidies countervailable. While the Commerce Department has recently issued an opinion indicating that it may now find natural resource subsidies countervailable, that decision is preliminary and should not prevent Congress from taking necessary action.

As Chairman GIBBONS has stated, if foreign governments are not subsidizing natural resources they have no reason to be concerned with this provision. If they are subsidizing, the United States should impose duties.

Mr. FRENZEL. Mr. Chairman, I yield 5 minutes to the distinguished gentleman from Louisiana [Mr. MOORE], who is the author of many of the splendid portions of the natural resource sections of the bill.

Mr. MOORE. I thank the gentleman for yielding this time to me.

Mr. Chairman, this bill has a lot of bad in it and it has a lot of good in it. This section is one of the good parts. It is one that should be retained.

I was the coauthor of these provisions that passed in the House trade bill in 1984 and were dropped in conference. I am sorry they were. I am privileged now to be a coauthor again, with the distinguished chairman of the Trade Subcommittee, in bringing this legislation, the natural resources title, back before you.

Let me tell my colleagues, the question is really a very simple one. It is a complicated bill. A lot of people are not familiar with all the terminology. A lot of people on the Committee on Ways and Means are not either. Do not feel lonesome.

What this simply says is this: If you believe that subsidizing a raw material that goes into a finished product ought to have a countervailing duty against it when it comes into this country in the amount of that subsidy, then you are for the bill and you are against this amendment. It is just that simple.

What we are trying to get at here is the situation where a foreign country is subsidizing a raw material, we call it a natural resource, that goes into a finished product. I do not see how anybody can justify that subsidy or say that is right. The trade law we have right now in this country says that when somebody subsidizes a finished product and it comes into the country, we put a countervailing duty on it in the amount of that subsidy, so they will not subsidize it. If somebody is subsidizing an automobile or whatever, we can put a countervailing duty on it in the amount of the subsidy.

This bill allows us to now do that for a raw material that goes into that finished product. Without this language, we will not be able to have a countervailing duty. There is something called the general availability test, which is something I find very hard to justify in our trade law. What it says is, if that natural resource is generally available to anybody who goes to that country, that subsidizing that natural resource, that is OK, that is not against our law. That, to me, is an export jobs provision that is in our own law.

What it says is, if you have a cement plant or an ammonia plant or a lumber mill and you can go to Canada or Mexico and they will sell you the natural resource below the market price and subsidize it for you, that is OK. But if you stay here in the United States and operate that same lumber mill and try to compete with them, that is just your tough luck.

That is why we need a countervailing duty on a natural resource subsidy. What many of the countries have learned, like Canada in the case of timber, is that they cannot subsidize the lumber itself. They know that. Mexico has learned in the case of natural gas they cannot subsidize the chemicals made from it, the ammonia. Venezuela has learned they cannot subsidize the finished product, gasoline, made from oil because we put a countervailing duty on it. But, aha, they have learned there is a loophole in our law we are trying to plug in this bill, and that hole is this:

You can subsidize the raw material from which it is made and that is OK. That is all right. You can sell the product then in the United States, undercut the American product, and it is all right under our law.

This provision of the bill blocks that and stops it. It is not automatic. It says, No. 1, somebody still has to file a complaint; No. 2, you have to find that in fact there was a subsidy of that raw material that it has sold below the free market price for what that material should be; and No. 3, you have sustained an injury. If you can prove that, as under existing law for finished products, you can get a countervailing duty.

So, my colleagues, do not be bamboozled or fooled. It is a very simple matter. If you want to authorize cheating on raw materials, you vote "yes" on the amendment. If you want to put a stop to it, vote for the bill and vote down the amendment.

Mr. GIBBONS. Mr. Chairman, I yield 2 minutes to the gentleman from Washington [Mr. BONKER].

Mr. BONKER. I thank the gentleman for yielding this time to me.

Mr. Chairman, I am sorry the gentleman from Minnesota had to lump all his items into one amendment, because I share many of his concerns, but I must part company with him on the resource subsidy issue.

The question is: Why is this provision necessary in the trade bill that is before us? It is important if we are going to establish a definitional standard on what constitutes a resource subsidy. Presently, the countervailing duty laws allow for relief when a foreign government is proven to have engaged in subsidized practices, like workers' wages or transportation, but there is no comparable provision or standard when it comes to resource subsidies. The result is that the rulings of the Department of Commerce are not very consistent.

If we look at just one case, involving carbon black, it was a decision out of ITA in favor of the foreign government the first time around, and that

was based on the Canadian lumber issue, and then subsequently they reversed their ruling on this case and now it appears that the Canadian lumber issue is up in the air again.

If there is not a single standard, if there is not a consistent means for the trade agencies to apply the trade laws, then we are going to have a great deal of uncertainty and inconsistency.

□ 1345

With respect to the Canadian issue, the Canadian provinces now have 35 percent of our market in wood products. Do they achieve that goal because they are more competitive? No. According to an ITC report, they are not more competitive. They are getting that sizable share of our market because they are subsidizing their resource.

In 1985, U.S. timber interests had to pay $105 per thousand board feet versus $10 per thousand board feet by our Canadian neighbors. The provision in the bill is not protectionist; it actually fills the gap by providing a definitional standard for what constitutes a resource subsidy.

That is why we should vote down the amendment.

Mr. FRENZEL. Mr. Chairman, I think the gentleman from Idaho [Mr. CRAIG] is expecting to get time from both sides, and I yield 1 minute to the distinguished gentleman from Idaho.

Mr. GIBBONS. Mr. Chairman, I yield 1 minute to the gentleman from Idaho [Mr. CRAIG].

The CHAIRMAN. The gentleman from Idaho [Mr. CRAIG] is recognized for 2 minutes.

Mr. CRAIG. Mr. Chairman, I rise today in opposition to the Frenzel amendment to delete section 135 of H.R. 4800.

It is almost a catch-22 position for me. H.R. 4800 has been windowdressed and made a political document, at a time when we need to pass constructive and helpful trade legislation.

While there are many provisions in H.R. 4800 I find hard to support, section 135 of the bill is needed to help rectify our current trade imbalance, with one or our major trade partners—Canada.

The administration has come full circle in recognizing the inherent trade problem that exists between Canada and the United States. It isn't the administration that presents the problems to our domestic timber industry; it is the Canadians' unwillingness to negotiate in good faith.

Subsidized Canadian lumbers have dramatically injured the United States softwood lumber industry. Over 650 U.S. softwood lumber mills have closed since 1977 and tens of thousands of U.S. workers have been forced out of work.

In my own State of Idaho, 20 mills have closed, displacing 3,000 workers and silencing many axes that used to be heard in Idaho's plentiful forests.

By eliminating section 135 in H.R. 4800, we are simply reverting back to our existing trade laws, making the issue of natural resource subsidies remedy actions as unfair trade practices under section 301 but not as counterviable subsidies.

Section 135 addresses the trade distorting effects resulting from subsidization of input products used in manufacturing products as well as the trade distorting effects resulting subsidization of removal rights.

The Frenzel amendment will not accomplish what we need to have done, in the area of subsidies given to raw products by our foreign trade partners.

Section 135 is the hammer the domestic timber industry needs to keep the saw mills humming and American homes being built by American timber.

To coin a popular phrase these days: "I just want to right the playing field so it is level" and we are competing equally.

Adoption of the Fenzel amendment will keep the playing field tilted, and our mills silent.

I urge my colleagues to reject my good friend of Minnesota, Mr. FRENZEL's amendment and support keeping section 135 in the bill.

Mr. FRENZEL. Mr. Chairman, to repeat, giving effect to the portion of my amendment that strikes the natural resources section, if you would follow the language of my amendment, natural resource subsidies could still be handled under the countervailing duty portion of the law and, in addition, there would be a separate cause of action under section 301, which is the unfair practices section.

There is plenty of room to attack natural resource subsidies from abroad which are unfair or that cause injury to U.S. companies or to our industry completely. What my amendment is aimed at is the unilateral description by the United States that something another country has done for 70 years is suddenly contrary to our trade laws.

We still ought to observe the international standard until we can amend the international standards which define subsidy. If the Canadians are guilty of unfair practices they can be countered under CVD laws, or, in my amendment, under section 301. Now I want to talk a little bit more on this private cause of action, the so-called Guarini amendment, to remind the Members of this body that in the old days, America used to be the country that had the most antidumping objections in the entire world.

In 1983 and 1984, we fell behind and we were only No. 2 as the world's biggest dumper. Last year, I am pleased to note that we have regained our stature as the world's No. 1 dumper. We had 63 cases against us. Japan, the No. 2 country and second-largest world trader, had only 62. That means that if other countries impose the Guarini burdens on our country, American commerce is going to find itself more penalized than any other country in the world.

Obviously, it is unworthy of us to burden our commerce with this tribute to the lawyers. I urge the adoption of my amendment.

Mr. GIBBONS. Mr. Chairman, I want to close by saying that I think there has been a good debate on this section. I think we have heard enough arguments to know that the Frenzel amendment should be rejected. It is very simple. This is an antisubsidy section. Subsidies have always been against the international rules. They have always been against our own rules. We should vote them down again.

I ask for a "no" vote on the Frenzel amendment.

The CHAIRMAN. Under the rule, all time for debate on this amendment has expired.

The question is on the amendment offered by the gentleman from Minnesota [Mr. FRENZEL].

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. FRENZEL. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic devise, and there were—ayes 79, noes 338, answered "present" 1, not voting 15, as follows:

□ 1405

The Clerk announced the following pair:

On this vote:

Mr. Zschau for, with Mr. Gephardt against.

Messrs. BURTON of Indiana, CHAPPIE, BROWN of Colorado, and KRAMER changed their votes from "aye" to "no."

Messrs. LIVINGSTON, EMERSON, and FIELDS changed their votes from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. AU COIN

Mr. AuCOIN. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment offered by Mr. AuCoin: Page 185, between lines 10 and 11, insert the following:

SEC. 179. SENSE OF CONGRESS REGARDING ACCESS TO THE JAPANESE SEMICONDUCTOR MARKET.

(a) CONGRESSIONAL FINDINGS.—The Congress finds that—

(1) the maintenance of a healthy domestic semiconductor industry is essential to the development of the United States economy and the preservation of the national security of the United States;

(2) the United States semiconductor industry is a world leader in semiconductor technology and has demonstrated its competitiveness in all markets to which it has had free access;

(3) in 1983, the Department of Commerce and the United States Trade Representative concluded that evidence "suggested that the intent of the Government of Japan . . . has been to offset the effects of liberalization" of the semiconductor market;

(4) on June 14, 1985, the Semiconductor Industry Association filed a petition with the United States Trade Representative requesting the President to take action to open the Japanese semiconductor market to United States semiconductor manufacturers, and July 11, 1985, the United States Trade Representative initiated an investigation into the allegations supporting such request;

(5) negotiations are underway with the Government of Japan to resolve the issue of free access to the Japanese semiconductor market, but such negotiations have not progressed; and

(6) the semiconductor trade issue should be resolved through a program to increase, rather than restrict, international semiconductor trade.

(b) SENSE OF CONGRESS.—In view of the findings under subsection (a), it is the sense of Congress that—

(1) The Government of Japan should allow United States semiconductor manufacturers full and substantial access to the Japanese semiconductor market; and

(2) the President should immediately—

(A) take all appropriate and feasible action in his power to achieve full and substantial access to the Japanese semiconductor market for United States semiconductor manufacturers, and

(B) determine if the actions of the Government of Japan in restricting access to its semiconductor market warrant Presidential action under section 301 of the Trade Act of 1974.

Amend the table of contents of the bill by inserting after the entry for section 178 the following:

"Sec. 179. Sense of Congress regarding access to the Japanese semiconductor market.".

The CHAIRMAN. Under the rule, the amendment is considered as read.

Pursuant to House Resolution 456, the gentleman from Oregon [Mr. AuCOIN] will be recognized for 15 minutes and a Member opposed thereto will be recognized for 15 minutes.

The Chair recognizes the gentleman from Oregon [Mr. AuCOIN].

Mr. AuCOIN. Mr. Chairman, almost 1 year ago the American Semiconductor Industry Association presented evidence to the United States Trade Representative that the Government of Japan had denied United States companies full access to Japanese markets.

Part of the American case rests on the fact that American manufacturers have won, through competition, 55 percent of the European semiconductor market while those same quality United States manufacturers have gained only 11 percent of Japan's market.

Moreover, it is interesting that in that European market, where American semiconductor manufacturers go head to head with Japanese competitors under the same rules, Americans have captured 55 percent of the market while the Japanese have 12 percent.

So when the United States manufacturers took that section 301 action against Japan, they asked the President to eliminate those barriers they feel they face.

Mr. Chairman, section 301 of the Trade Act of 1974 is designed to provide a quick, expedited resolution of disputes of this kind. But here we are, nearly a year later and the U.S. Government still has not officially determined whether or not the charges made by American industry do in fact have merit. If such an affirmative finding were to be made, the President

would have to decide whether or not to take reciprocal action against the Japanese. Personally, I would rather not see the President have to resort to retaliatory action against our friends in Japan.

I would rather see the United States and Japan reach an agreement by themselves whereby Japan would expand its market to competition from our semiconductor industry. But progress to that end has been excruciatingly slow. A few weeks ago it looked as if the discussions had truly reached an impasse; in fact there is no guarantee that it will not yet happen.

To make matters worse, Mr. Chairman, the United States Trade Representative has been reluctant to make a formal finding that Japan has in fact engaged in unfair trading practices.

The reason is probably the worst-kept secret in this town; namely, that there is disunity among the various departments within this administration on this question. Disunity among the Department of State, Department of Commerce, and even the Office of Management and Budget.

This has prevented a joint recommendation from reaching the President's desk. The amendment I offer is the same as a resolution I introduced just after the announcement that the Japanese-United States semiconductor negotiations had broken down. The amendment's purpose, Mr. Chairman, is to send a message to the parties involved in the issue.

The message to the Reagan Administration is that the semiconductor industry deserves an answer to its complaint from its own government. That is No. 1.

Second, it deserves from the Japanese Government something called good, old-fashioned, head-to-head free competition within the marketplace of Japan when it comes to semiconductors.

My amendment calls on the Government of Japan in sense-of-the-Congress language to guarantee full and substantial access to its markets for the United States semiconductor industry. There is no reason why our friends should not grant that which we grant to them. My amendment also directs the President of the United States to immediately determine if complaints made by the American Semiconductor Industry Association are valid and whether or not Japanese actions constitute unfair trade under section 301 of our trade laws.

Once a determination is made, the President would still have the option of ordering reciprocal action by the United States.

In other words, Mr. Chairman, my amendment calls on both parties in this situation to fish or cut bait on a matter of extreme importance not only to the semiconductor industry but in turn to the security posture and industrial competitiveness of America as a whole.

Many workers in the semiconductor sector are being laid off today because of lost opportunities, lost sales, and lost profits caused by alleged barriers and lack of market access abroad.

I hope my colleagues will join me in support of this amendment.

Mr. Chairman, I reserve the balance of my time.

The CHAIRMAN. Does any Member seek time in opposition to the amendment?

Mr. FRENZEL. Mr. Chairman, I make such a request.

The CHAIRMAN. The gentleman from Minnesota [Mr. FRENZEL] is recognized for 15 minutes.

Mr. FRENZEL. Mr. Chairman, I yield myself 3 minutes.

I yield to the distinguished gentleman from Arizona [Mr. MCCAIN].

Mr. MCCAIN. I thank the gentleman for yielding.

Mr. Chairman, I would like to congratulate the gentleman from Oregon on his amendment. I think it is timely, it is appropriate, it is an example of what our trade policy should be; breaking down the barriers that exist rather than erecting our own.

I am well acquainted with the semiconductor industry. It is the No. 1 employer in my district and State. I have visited numerous plants and facilities and have witnessed firsthand our state-of-the-art equipment, our process, and the facilities.

I would like to emphasize, Mr. Chairman, that our industry has been in a recession lately and a rather serious one. It is not because of a lack of productivity; it is not because of a lack of modernization, nor is it because of excess wages.

The semiconductor industry in the world holds 55 percent of the market in Europe, 50 percent in the Pacific rim outside of Japan, 83 percent of our domestic market, yet only 10 percent of the market in Japan is held by American semiconductors. It obviously does not square with our competitiveness worldwide.

□ 1420

The semiconductor industry is vital to our future competitiveness and to our national defense.

Mr. Chairman, I would suggest that if the United States is squeezed out of the semiconductor industry, it could have devastating effects on our ability to defend this Nation. I do not think we can tolerate further actions which have the effect of damaging this industry and diminishing its future.

I understand, as the gentleman from Oregon pointed out, that negotiations are taking place between the United States and Japan. I think we have reason for optimism. But I would like to remind this body that for 10 years the Japanese Government has assured our industry that they would have an increasing share of their market. It was 10 percent at that time; it remains 10 percent.

Mr. Chairman, I think that we need to send a message to the Japanese Government that the American people are serious, that we demand a level playing field on the semiconductor industry worldwide, as well as in Japan.

Mr. Chairman, I appreciate the gentleman from Oregon offering this amendment.

Mr. FRENZEL. Mr. Chairman, I yield myself 1 minute.

Mr. Chairman, the amendment of the gentleman from Oregon is also in the Republican substitute. It was put there through the good work of the gentleman from California [Mr. ZSCHAU], who is one of this body's resident semiconductor experts.

Mr. Chairman, I have no further requests for time from this side. It is unlikely that we shall seek a vote on this. I reserve the balance of my time.

Mr. AUCOIN. Mr. Chairman, I yield 3 minutes to the gentleman from Texas [Mr. PICKLE].

Mr. PICKLE. Mr. Chairman, I support the amendment offered by the gentleman from Oregon. I feel very strongly that the administration must quit dragging its feet and proceed with a positive determination that the semiconductor case merits action under section 301.

The semiconductor industry is a vital component in our electronics and manufacturing industry sectors. Semiconductors are used in every imaginable piece of equipment we manufacture. It is a high-technology product, R&D intensive, and dependent upon technological gains in order to satisfy our insatiable thirst for faster, better, more sophisticated machines. If we are to maintain our capability for technological advancements, then we must take steps to ensure a strong and viable semiconductor industry.

Time is running out on the semiconductor case. Negotiations with Japan have broken down because they insist on denying fair market access to our products. At the same time, the administration has not stated affirmatively that the case is actionable.

It seems that if the administration would make clear that it plans to take action under section 301—and retaliate if we are unable to reach a negotiated solution—then the Japanese might be more inclined to reach an agreement with us.

This amendment calls for an immediate resolution of this case. If the Japanese refuse to open their market then we should enforce existing laws which address this unfair trade practice.

I have communicated my strong feelings on this issue to the administration. An "aye" vote on this amend-

ment will indicate broad support for timely resolution of meritorious cases against foreign unfair trade practices. Concerns about unfair trade are not limited to heavy manufacturing industries. We need to get a handle on this problem and I urge an "aye" vote on this amendment.

Mr. AUCOIN. Mr. Chairman, I yield 1 minute to the gentleman from California [Mr. EDWARDS].

Mr. EDWARDS of California. Mr. Chairman, I rise in strong support of this semiconductor amendment to the omnibus trade bill; and, I compliment the gentleman from Oregon for introducing it.

Already, a year has gone by with a section 301 case pending on this important issue; and valiant efforts on the part of U.S. negotiators to resolve this pressing problem have been to no avail.

I understand the reluctance of the administration to issue a formal finding that our good friend and strong ally, the great country of Japan, is unduly protecting its domestic market from free trade in semiconductor chips.

However, the evidence really is uncontroverted; and, it is in the best interests of the valued friendship we have with Japan that this troubling issue be speedily resolved.

We need to let Japan know that our semiconductor industry, so vital to our economy and to our security, has the full backing of the United States Congess in its attempt to have free trade in the Japanese market. We need to give the President this additional tool to help bring this about.

I urge my colleagues to vote to adopt this amendment and do just that.

Mr. AUCOIN. Mr. Chairman, may I inquire of the Chair as to how much time I have remaining?

The CHAIRMAN. The gentleman from Oregon [Mr. AUCOIN] has 7 minutes remaining.

Mr. AUCOIN. Mr. Chairman, I yield 5 minutes to the gentleman from California [Mr. MINETA].

Mr. FAZIO. Mr. Chairman, will the gentleman yield?

Mr. MINETA. I yield to the gentleman from California.

Mr. FAZIO. Mr. Chairman, I rise in strong support of this amendment.

Mr. Chairman, this amendment reflects the provisions of a resolution, House Resolution 454, which I have cosponsored along with Mr. AUCOIN, Mr. MINETA, Mr. EDWARDS, and others. The amendment calls upon the Governments of Japan and the United States to resolve the pending section 301 semiconductor case.

Almost 1 year ago the United States semiconductor industry presented evidence to the USTR demonstrating that Japan had impeded the access to their market. A section 301 investigation was immediately initiated. Since then, the United States has been negotiating with Japan to convince them to expand their market.

Unfortunately, negotiations have broken down. Worse, the United States is reluctant to make a formal finding that Japan has, in fact, unduly protected their markets.

The semiconductor industry deserves action. Japan must open its markets or the United States should enforce United States laws to help respond to unfair trade practices.

One of our most innovative and productive industries has been unfairly inhibited in its development and growth. That limitation has impacted directly on my district through a loss of jobs both actual and potential.

The strong message this vote will provide can be used by our Trade Representative Clayton Yuetter to make clear to the Japanese that we will not tolerate a protectionist approach on still another high-technology trade issue.

Mr. MINETA. Mr. Chairman, I rise today to give my wholehearted support to the AuCoin amendment to the omnibus trade bill and to thank the gentleman from Oregon for offering it today.

After months of fruitless negotiation, talks between the United States and Japan trade representatives concerning semiconductors have reached an impasse. As a result, American semiconductor manufacturers are operating at a severe disadvantage. They cannot fully recover from the damages to the industry of past dumping actions by foreign semiconductor chip manufacturers; nor can they hope to gain greater access to markets in Japan without Japan first easing barriers that currently forestall free (and open trade. These are the problems our negotiators set out to address and yet an agreement still eludes us.

This is a high stakes game. Both the Japanese and the United States are keenly aware that semiconductors are the vital building blocks to all high technology products. Developing the most advanced, highest quality chips at reasonable prices guarantees domestic industries a secure place in the world marketplace. Competition between American and foreign manufacturers is healthy and is a great stimulant to the research and development capabilities of our own industries.

But, creating excess manufacturing capacity and then dumping chips at below market prices—a strategy attributable to Japanese chip producers—isn't healthy competition. Rather, it destabilizes the chip markets through illegal unfair means.

Our laws guard against these activities and the semiconductor industry is pursuing remedies, although not without some permanent losses in product lines.

Simultaneously, semiconductor manufacturers quite rightly are seeking to compete in the Japanese marketplace on a fair and equitable basis. This means that artificially contrived impediments designed to prevent entry of American products into their marketplace will ultimately have to give way to genuine competition among all manufacturers.

The merits of the products themselves, fair and reasonable pricing, and ready availability should be the factors determining sales of semiconductor chips—not a system which has as its primary prerequisite absolute protection of the home marketplace for domestic producers.

In Japan, our producers have achieved 11 percent of the semiconductor market; in Europe, our producers enjoy more than 50 percent of the market share. Surely, this illustrates our ability to compete successfully in parts of the world where free and open choices in product consumption can be made.

Our trade negotiators have been through a long and tedious negotiating process to resolve these semiconductor issues. This resolution is designed to give these negotiators further backing in their efforts. We want to demonstrate that the full force of Congress is behind efforts to expand accessibility to Japanese markets and to resolve dumping disputes.

Moreover, we expect the President to also give greater weight to these negotiations and to determine once and for all if indeed this inaccessibility to Japan's markets warrants further action under our trade laws—specifically section 301 of the Trade Act.

Last June, the Semiconductor Industry Association filed a petition with the U.S. Trade Representative and in July 1985 the trade Representative initiated investigations into the allegations set forth in SIA's findings. This investigation is still pending, notwithstanding acknowledgement by the Trade Representative that indeed the access question is a serious one—demanding constant negotiations over the past year. Therefore, it is time to formally act on this pending petition by the industry association.

I think this amendment today is a thoughtful and timely approach to a serious, long-term trade problem and I would urge my colleagues to vote for it.

The gentleman from Oregon [Mr. AUCOIN] has brought this matter up today, in the context of the omnibus trade bill, because success in commerce in cutting edge technology will benefit the entire Nation. Again, I thank him for his wise approach to a difficult issue.

□ 1430

Mr. AUCOIN. Mr. Chairman, I yield myself the remaining amount of time.

The CHAIRMAN. The gentleman from Oregon [Mr. AUCOIN] is recognized for 2 minutes.

Mr. AUCOIN. Mr. Chairman, I would just close by saying to my colleagues

that the Joint Economic Subcommittee on Economic Goals and Intergovernmental Policy took testimony on the effects of liberalization of the Japanese semiconductor market. What that testimony indicated was that such liberalization which is called for under my amendment could mean the creation of 17,000 to 27,000 new jobs here in America. Sales by United States firms in Japan could be expected to increase to a level of between $2.4 billion and $4.2 billion. It would boost worldwide sales for the U.S. industry from 11 to 24 percent.

For those reasons, Mr. Chairman, I urge adoption of my amendment, and I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Oregon [Mr. AuCoin].

The question was taken; and the Chairman announced that the ayes appeared to have it.

Mr. AuCOIN. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present. Pursuant to the provisions of clause 2 of rule XXIII, the Chair announces that he will reduce to a minimum of 5 minutes the period of time within which a vote by electronic device, if ordered, will be taken on the pending question following the quorum call. Members will record their presence by electronic device.

The call was taken by electronic device.

The following Members responded to their names:

[Roll No. 134]

□ 1455

So the amendment was agreed to.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. COLEMAN OF TEXAS

Mr. COLEMAN of Texas. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment offered by Mr. COLEMAN of Texas: Page 255, after line 9, insert the following new section (and redesignate existing section 352 as section 353):

SEC. 352. RELATIONS WITH MEXICO.

(a) FINDINGS.—The Congress finds that—

(1) Mexico and the continued stability of its governing structure is of vital strategic importance to the national security interests of the United States;

(2) while the economic, cultural, and historical ties between Mexico and the United States are both varied and strong, foreign relations between the governments of these countries continue to be carried out on an ad hoc basis and in a crisis-to-crisis context;

(3) the failure by the United States to establish a comprehensive and ongoing foreign policy with respect to Mexico manifests itself in legislative and administrative policies which often have unintended adverse or contradictory results in the two countries;

(4) the absence of an established United States foreign policy with respect to Mexico also works against the possible resolution of myriad bilateral issues now confronting the two countries; and

(5) in order to improve relations with Mexico, the United States Government must take actions, conducted in the spirit of mutual respect and cooperation, which prioritize its foreign and economic policies toward Mexico.

(b) UNITED STATES-MEXICO BILATERAL COMMISSION.—(1)(A) The President shall establish an interagency group to be known as the "United States-Mexico Bilateral Commission" (hereafter in this subsection referred to as the "Commission").

(B) Membership on the Commission shall be composed of the Secretary of State, the Secretary of the Treasury, the Attorney General, the Secretary of Commerce, and the the United States Trade Representative.

(C) The Chairman of the Commission shall be the Secretary of State (or a delegate of the Secretary).

(D)(i) The members of the Commission shall (not later than 3 months after the date of enactment of this Act) execute a written memorandum of understanding which includes the goal of the Commission. The goal of the Commission shall be—

(I) to serve as a formal mechanism by which economic relations between the United States and Mexico are conducted in a comprehensive manner which allows input from any concerned agency of the United States; and

(II) to provide a channel of communication between the Government of the United States and the Government of Mexico pertaining to economic relations.

(ii) Not later than six months after the the execution of the memorandum of understanding, each member of the Commission shall present to the Commission a review of all United States-Mexico issues which affect that member's agency. Each presentation shall include an assessment of, as well as recommendations for, action by that member.

(2)(A) Not later than three months after the date of the enactment of this Act, the President shall report to the Congress on the actions and the progress made to establish the Commission. The report shall include any necessary legislative recommendations to assist the President in establishing the Commission as well as a time certain for the Commission's establishment.

(B) Not later than six months after the date of enactment of this Act and every three months thereafter, the Chairman of the Commission shall report to the Congress on the activities of the Commission. Each such report shall include the specific projects, issues, and agency actions taken to achieve the goal of the Commission which occurred in the three-month period preceding the last such report as well as proposed projects, issues, and agency actions.

(3) The Commission shall endeavor to meet semiannually with representatives of Mexico in order to carry out the goal of the Commission.

(d) BILATERAL SUMMIT ON ECONOMIC RELATIONS.—(1) It is the sense of the Congress that, consistent with the goal of strengthening political and commercial relations between the United States and Mexico, a bilateral summit on economic relations as they pertain to trade and commerce, between these two countries should be held. The objectives of the summit should include—

(A) a discussion of the question of Mexico as a contracting party to the General Agreement on Tariffs and Trade;

(B) a discussion of the pending graduation from the Generalized System of Preferences of those Mexican products currently covered under such System;

(C) the promotion of direct investment in Mexico by United States businesses;

(D) the resolution of problems related to United States fishing rights within the territorial waters of Mexico;

(E) the resolution of problems related to the trucking and transportation of products between the United States and Mexico, including a discussion of the construction of international bridges as a means to help alleviate these trucking and transportation problems;

(F) a discussion of the possibility of eventually establishing a free-trade zone along both sides of the United States-Mexico border;

(G) promotion of the development of industry along the United States-Mexico border regions in order to encourage increased employment opportunities;

(H) a discussion of the policies related to the development of the petroleum industry and alternative energy sources in the United States and Mexico;

(I) a discussion of the issues related to pollution arising from sources within the United States or Mexico which affects the other country, including water pollution, air pollution, soil pollution, and sewage treatment;

(J) a discussion on the development and coodination of border crossings between the United States and Mexico;

(K) a review and evaluation of all joint research and development projects currently being conducted between the United States and Mexico at both private and public levels, including projects in the areas of business, health, technology, and public policy;

(L) a discussion of mutual problems and concerns that confront both the United States and Mexico in the development of a comprehensive national policy regarding immigration; and

(M) a discussion of mutual problems and concerns that confront both the United States and Mexico on the issues of external debt and foreign investment.

(2) The President is urged to enter into negotiations with representatives of the Government of Mexico for the purpose of commencing talks between the United States and Mexico in order to achieve the objectives described in paragraph (1).

The CHAIRMAN. Pursuant to House Resolution 456, the amendment is considered as having been read.

The gentleman from Texas [Mr. COLEMAN] is recognized for 15 minutes, and a Member opposed will be recognized for 15 minutes.

The Chair recognizes the gentleman from Texas [Mr. COLEMAN].

Mr. COLEMAN of Texas. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I am pleased to have the opportunity to offer this amendment to the full House for consideration and inclusion to H.R. 4800, the Trade and International Economic Policy Reform Act of 1986.

Since I first came to Washington, I discovered one of the major flaws in our foreign and trade policies: A failure to accord our relations with Mexico the priority status that they deserve. Despite the national security significance of Mexico particularly in view of their regional interest in Central America, plus the fact that Mexico is our third-largest international trading partner. Yet the United States continues to adopt a casual and fractured approach to bilateral relations with them.

Recent evidence of this unfortunate fact can be found in last week's public orgy of "Mexico bashing" engaged in by the United States Customs Commissioner and an Assistant Secretary of State. While much of what was alleged against officials of the Government of Mexico had to be subsequently retracted, the fact that relatively minor agency heads have the ability to publicly attack a neighbor and ally without administration oversight, highlights what I call the sorry state of affairs that typifies our relations with Mexico.

The amendment I am offering today deals primarily with taking positive steps on the part of this Government to improve relations with the Republic of Mexico on a wide range of concerns. The inclusion of this amendment to the omnibus trade bill is warranted due to the fact that when we speak of United States-Mexico relations, we are referring to a subject premised on a strong degree of trade and commerce.

The first portion of this amendment makes several findings with respect to the state of current United States-Mexico relations. In so doing, the essential point to be made is this: Trade and diplomatic relations with Mexico are not the foreign policy priority of the United States that they should be. As a result, the United States policy toward Mexico is characterized by individual agency responses to specific problems or crises involving Mexico in an ad hoc and fragmentary manner.

To remedy the absence of a consistent and comprehensive foreign policy toward the Republic of Mexico, the second portion of this amendment creates a Cabinet-level United States-Mexico Bilateral Commission. On the U.S. side, the Commission would be composed of the Departments of State, Justice, Commerce, and the Treasury as well as the Office of the U.S. Trade Representative.

Not limited to just the above-mentioned agencies, the Commission would serve as a formal mechanism by which relations with Mexico could be conducted in a comprehensive fashion and would allow for input from all concerned Federal agencies on a variety of bilateral issues. Significantly, the Commission will represent the establishment of formal and ongoing channels of communications between our two governments and be comprehensive in nature.

Chaired by the Secretary of State, the Commission will oversee the development of a Government-wide bilateral issues agenda representing an official compilation of all activities relative to Mexico. Regular reports on the Commission's work will be made to Congress so that there is enhanced information flow in this area to assist the formulation of legislation as needed.

By creating this Commission, we are not asking these agencies and departments to do something that they are not already mandated to do. What is novel in this approach is that for the first time, the United States Government would have the ability to speak with one voice relative to bilateral relations and policies with Mexico. Moreover, and by elevating the priority status afforded relations with Mexico, the work of these agencies and departments with regard to Mexico will become more than an afterthought.

This Commission is not designed to be yet another bureaucratic entity requiring massive amounts of taxpayer dollars to make it operational. Since all the participating members of the Commission are mandated and funded to do the work already, this amendment merely directs their energies into a more focused channel.

The third portion of this amendment calls for the United States and Mexico to conduct a bilateral economic summit—a course of action that would greatly assist the work of the Commission in assessing policy priorities and concerns. While the amendment lists numerous suggested topics for discussion at the summit, this agenda should not be considered exhaustive. Though such a summit would represent an enormous breakthrough in United States-Mexico relations, the Commission would provide the framework for the essential followup. Consequently, this amendment offers hope for the continuity of summitry in the field of bilateral relations with Mexico.

Regarding the list of subjects to be addressed at the summit, I would like to point out that in adopting this amendment, Congress would not be expressing an opinion on the merits or lack thereof of selected concepts to be discussed. Rather, it is my belief that these subjects are currently topics of concern between our two countries and must necessarily be evaluated on a bilateral basis.

Mr. Chairman, there is no doubt in my mind that trade legislation is long overdue. Neither can it be disputed that Mexico and our relations with them must be given more attention. United States relations with Mexico are substantially economic in nature and the overall health of our neighbor and ally is inextricably woven into the fabric of our southwestern border economy.

Adoption of this amendment would, I believe, send a positive signal to the Government of Mexico that this country is finally serious about accepting its responsibility in crafting a coherent and comprehensive foreign policy—a foreign policy that acknowledges the international dynamics at work in our bilateral relationship and, for the first time, commits the resources of our Nation to addressing these concerns.

Mr. Chairman, I would sincerely urge my colleagues on both sides of the aisle to lend their support to this amendment.

Mr. FASCELL. Mr. Chairman, will the gentleman yield?

Mr. COLEMAN of Texas. I yield to the distinguished chairman of the Committee on Foreign Affairs, the gentleman from Florida [Mr. FASCELL].

Mr. FASCELL. I thank the gentleman for yielding.

Certainly the time is appropriate for an amendment of this kind because of the evident strain in the relationships between the United States and Mexico. Both because of our closeness and because of our economic and trade difficulties, it is important to have the kind of relationship that is called for in this amendment.

□ 1505

So, on behalf of the Foreign Affairs Committee, I have no difficulty with the amendment. However, I do want to make one slight reservation. I am not sure that we ought to take an interagency working group and legislate it in statute. Nevertheless, I do not find that so objectionable as to want to reject the amendment. I think the concept is vital. I think the time for

summit discussion is now and I think it is appropriate to say so in legislation.

So with that slight reservation, I want to thank the gentleman for his leadership, as this is an important area that needs to be addressed.

Mr. COLEMAN of Texas. Mr. Chairman, I thank the gentleman from Florida for his support and that of his committee.

Mr. Chairman, I reserve the balance of my time.

The CHAIRMAN. Does any Member seek time in opposition to the amendment?

Mr. FRENZEL. I do, Mr. Chairman.

The CHAIRMAN. The gentleman from Minnesota [Mr. FRENZEL] is recognized for 15 minutes.

Mr. FRENZEL. Mr. Chairman, I yield 3 minutes to the distinguished gentleman from New Mexico [Mr. SKEEN].

Mr. SKEEN. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, I rise in support of this amendment offered by the gentleman from Texas.

You know, we were the greatest traders on this Earth at one time. The Yankee trader was known throughout this world, once we got this country established, and we have lost our touch. We particularly lost our touch in connection with some of the nations closest to us, one of them being Mexico. Those of us who live along that border I think are excruciatingly aware of just how far astray we have gone in dealing with our neighbors.

We treat Mexico many time as a territory of the United States, rather than as a country that should be dealt with on the basis of bipartisan negotiation.

I think that this amendment hits exactly to the heart of this problem, puts us in a better position. For many years the United States has had so many trade policies within Government; Customs had one trade policy, Treasury has another, the State Department has one and so on down the line.

It is now time to come together with a comprehensive trade policy in dealing with one of our nearest and dearest friends in our relations.

I think this amendment does exactly that. I know it is specific to Mexico. Maybe it is going to be argued that it is not appropriate, but I think it is extremely appropriate, because after all, they are the third greatest trading nation customer of the United States. I think it is time now that we treated them as equals and that we put this kind of trade negotiation on a much higher level than they are now.

I urge total support for this amendment and commend the gentleman for offering it.

Mr. COLEMAN of Texas. Mr. Chairman, I appreciate the comments of my colleague, the gentleman from New Mexico, who is a valued member of the Border Caucus and I think he brings a unique knowledge of the border region to this Congress.

Mr. Chairman, I am happy to yield to the gentleman from Florida [Mr. SMITH].

Mr. SMITH of Florida. Mr. Chairman, I thank the gentleman very much for yielding.

I would like to ask the gentleman whether or not he contemplates in this interagency group and the whole economic, social and other conversations and discussions that would take place would also include discussion of one of the most important subjects that we have between ourselves and the Mexicans, and that is the problem of drugs, illicit narcotics which have been flowing across the border of Mexico into the United States in late terms in even greater amounts than in previous years and the problems we have had with that are problems that need to be solved and need to be solved now.

The advent of heroin coming across, of cocaine, rock or crack, as we call it, and all the other new forms, including large new amounts of marijuana, have made a lot of people in the United States suspicious of the Government of Mexico.

I think that is one of the areas where mutual distrust can be turned into mutual cooperation. I would like to hear the gentleman's comments about the necessity of discussing that as part of this whole package.

Mr. COLEMAN of Texas. Mr. Chairman, I would say to the gentleman from Florida and to my colleagues that it is absolutely critical that we not have each individual agency head going about making statements that wind up having to be retracted, as they were this week to some extent, causing problems for our own Department of State and this administration and our country ultimately.

It seems important to me that we at long last find a vehicle, and I submit that it is the Economic Summit, it is a commission that can bring together the separate agency heads to deal with the very issues which the gentleman from Florida just mentioned, as well as the support that I received from the chairman of the Foreign Affairs Committee a moment ago.

This kind of a commission and this concept of ongoing discussion does solve those problems. What better place to take up the issues that concern so many Americans, concerning the illegal smuggling that goes on from one country to another.

I think it is extremely important that that be a topic of discussion and that is why I pointed out that certainly the list of items which are pertinent to a trade bill are not exhaustive.

Mr. SMITH of Florida. Mr. Chairman, if the gentleman will yield just a little further, I would also like to point out that we are in a crisis situation now in terms of our relations with Mexico and that part of the problem is drugs and that is a problem for us in the United States.

I had conversations, as the chairman of the Foreign Affairs Committee did, with the Mexican Ambassador to the United Nations. I think that his remarks are going to be hopefully rebutted by some of the things that may be discussed here, and that is the notion that Mexico believes that if it were not for the United States, there would be no drug problem in the world and no drug growing in Mexico. That is just not true. We need the Mexicans to begin to realize that in the 1980's drugs are going to be grown and sold even if it is elsewhere in the world besides here and that they need to help us more than they have been in the past in curing the problem of drugs flowing across the border.

I would hope that the gentleman, as this bill makes its way through the process, including the Senate, would allow for any amendments which would flesh out this pattern of cooperation on drugs to be placed in the bill.

Mr. COLEMAN of Texas. Mr. Chairman, I thank the gentleman for his remarks. I think they are pertinent and important. The Select Committee on Narcotics has been across the Southwest and I think has correctly reported some of the great difficulties in this area.

I thank the gentleman for his contribution.

Mr. SMITH of Florida. Mr. Chairman, I thank the gentleman for yielding.

Mr. COLEMAN of Texas. Mr. Chairman, I reserve the balance of my time.

Mr. McCAIN. Mr. Chairman, I support the amendment of my colleague from Texas. Last week's events make plain the need for greater communication between American and Mexican officials. We cannot afford to ignore Mexico, and we cannot afford to let our problems fester. The time has come to move away from incendiary statements about our neighbor. We must, instead, enhance cooperation in areas of mutual interest.

Differences between our two nations are not unsolvable. Our systems of government are not antithetical. Our economies are closely linked—Mexico is our third largest trading partner. Finally, our security can only be increased by cooperating with the Mexican Government in ensuring the stability of their nation.

As we prepare for the future, we must improve relations through an equal copartnership that will enhance the business, trade and social ties that bind our nations together. A United States-Mexican Bilateral Commission, and a summit between our two leaders, would greatly aid that process. This measure comes

at a critical time in relations between our two countries. I urge my colleagues to support the amendment.

Mr. FRENZEL. Mr. Chairman, as on the last amendment, I am unaware of objections on this side to the amendment. We believe there is no need to have a recorded vote on it. We wish the gentleman great success.

Mr. Chairman, I yield back the balance of my time.

Mr. COLEMAN of Texas. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas [Mr. COLEMAN].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. ROTH

Mr. ROTH. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment offered by Mr. ROTH: In title III, strike subtitle B and insert the following:

Subtitle B—Export Controls

SEC. 321. NATIONAL SECURITY CONTROLS.

(a) MULTIPLE LICENSE AUTHORITY.—Section 4(a)(2)(A) of the Export Administration Act of 1979 (50 U.S.C. App. 2403(a)(2)(A)) is amended in the first sentence by inserting "(except the People's Republic of China)" after "controlled countries".

(b) EXPORTS OF LOW TECHNOLOGY ITEMS.—Section 5(b)(2) of such Act (50 U.S.C. App. 2404(b)(2)) is amended to read as follows:

"(2) No authority or permission to export may be required under this section for the export to any country other than a controlled country of any goods or technology which is at such a level of performance characteristics that the export of the goods or technology, were it made pursuant to the agreement of the group known as the Coordinating Committee, would require only notification of participating governments of the Committee. The Secretary may require any person exporting any such goods or technology to a country other than a controlled country to notify the Department of Commerce of those exports.".

(c) LIST REVIEWS.—

(1) CONTROL LIST.—Section 5(c)(3) of such Act (50 U.S.C. App. 2404(c)(3)) is amended—

(A) in the first sentence—

(i) by striking "shall review" and inserting "shall conduct partial reviews of"; and

(ii) by striking "year" and inserting "calendar quarter";

(B) in the second sentence—

(i) by striking "annual" the first place it appears and inserting "quarterly"; and

(ii) by striking "annual" the second place it appears;

(C) in the third and fifth sentences by striking "such" and inserting "each"; and

(D) by adding at the end the following: "All goods and technology on the list shall be reviewed at least once each year.".

(2) LIST OF MILITARY CRITICAL TECHNOLOGIES.—Section 5(d)(5) of such Act (50 U.S.C. App. 2404(d)(5)) is amended in the first sentence by striking "at least annually" and inserting "on an ongoing basis".

(d) FOREIGN AVAILABILITY DETERMINATIONS.—Section 5(f)(3) of such Act (50 U.S.C. App. 2404(f)(3)) is amended by inserting after the second sentence the following:

"In a case in which an allegation is received from an export license applicant, the Secretary shall respond in writing to the applicant, and publish in the Federal Register, within 30 days after receipt of the allegation, that—

"(A) the foreign availability does exist and the requirement of a validated license has been removed or the applicable steps are being taken under paragraph (4);

"(B) the foreign availability may exist but further examination of the issue is necessary in order to make a determination; or

"(C) the foreign availability does not exist.

In the case in which subparagraph (B) applies, the Secretary shall, within 6 months after the initial response and publication, respond in writing to the applicant and publish in the Federal Register, that—

"(i) the foreign availability does exist and the requirement of a validated license has been removed or the applicable steps are being taken under paragraph (4); or

"(ii) the foreign availability does not exist.

In any case in which the application is not made within that 6-month period, the Secretary may not require a license for the export of the goods or technology with respect to which the foreign availability allegation was made.".

(e) AGREEMENTS ON EXPORT CONTROLS.—Section 5(k) of such Act (50 U.S.C. App. 2404(k)) is amended by adding at the end the following: "In any case in which such negotiations produce an agreement on export controls on any goods or technology which are comparable in practice to those export controls imposed under this section, and the Secretary of State determines, 1 year after the country involved has maintained such export controls, that such controls are comparable in practice to those imposed under this section, the Secretary may not, while that determination is effective, require a validated license for the export to that country of the goods or technology that are subject to the agreements.".

SEC. 322. AUTHORIZATION OF APPROPRIATIONS.

(a) IN GENERAL.—Section 18(b) of the Export Administration Act of 1979 (50 U.S.C. App. 2417(b)) is amended to read as follows:

"(b) AUTHORIZATION.—There are authorized to be appropriated to the Department of Commerce to carry out the purposes of this Act—

"(1) $35,935,000 for the fiscal year 1987, of which $12,746,000 shall be available only for enforcement, $2,000,000 shall be available only for foreign availability assessments under subsections (f) and (h)(6) of section 5, and $21,189,000 shall be available for all other activities under this Act;

"(2) $35,935,000 for the fiscal year 1988, of which $12,746,000 shall be available only for enforcement, $2,000,000 shall be available only for foreign availability assessments under subsections (f) and (h)(6) of section 5, and $21,189,000 shall be available for all other activities under this Act; and

"(3) such additional amounts for each of the fiscal years 1987 and 1988 as may be necessary for increases in salary, pay, retirement, other employee benefits authorized by law, and other nondiscretionary costs.".

(b) ENFORCEMENT ACTIVITIES OF THE CUSTOMS SERVICE.—Section 12(a)(6) of the Export Administration Act of 1979 (50 U.S.C. App. 2411(a)(6)) is amended by striking "$12,000,000 in the fiscal year 1985 and not more than $14,000,000 in the fiscal year 1986" and inserting "$14,000,000 in the fiscal year 1987 and not more than $14,000,000 in the fiscal year 1988".

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect on October 1, 1988.

SEC. 323. CAO REPORT.

The Comptroller General of the United States shall conduct an evaluation of activities of the Department of Defense conducted pursuant to the Presidential Directive of January 4, 1985, regarding the review of export license applications, under the Export Administration Act of 1979, for the export of goods and technology to countries other than controlled countries. One purpose of the study is to determine if Department of Defense activities provide information about the diversion of United States technology from sources outside the United States to controlled countries that would not otherwise be available to other agencies with enforcement responsibilities under the Act. The study shall include a review of all Department of Defense activities in determining export control policy, making foreign availability determinations, and reviewing the control list, and the relationship between the Department of Defense and other agencies responsible for implementing the Export Administration Act of 1979. In conducting the study the Comptroller General shall make a special effort to gather information from United States exporters, particularly those that have had applications for proposed exports to countries other than controlled countries reviewed by the Department of Defense. The Comptroller General shall submit a report on the evaluation to the Congress not later than 6 months after the date of the enactment of this Act. If necessary, the report may be submitted on a classified basis.

The CHAIRMAN. Pursuant to House Resolution 456, the gentleman from Wisconsin [Mr. ROTH] will be recognized for 15 minutes, and a Member opposed will be recognized for 15 minutes.

The Chair recognizes the gentleman from Wisconsin [Mr. ROTH].

Mr. ROTH. Mr. Chairman, I agree with the chairman that this is a very important amendment. This amendment strikes certain provisions now in the bill concerning out national security.

Why is this amendment necessary? The bill before us, without corrections, would seriously jeopardize our national security.

In a declassified report released 8 months ago, entitled "Soviet Acquisition of Significant Western Technology," it reveals that:

Over 5,000 Soviet military equipment and weapons systems projects each year benefit from Western technology and documents.

Over 60 percent of critical documents and hardware acquisitions by the Soviets are of United States origin.

In 1970, the Soviets did not even have one factory capable of producing integrated circuit boards. Then we went through the détente era and opened our technology supermarket to the KGB head buyers. Today the Soviets have 20 factories producing inte-

grated circuits, and we wonder why we have a $290 billion defense budget.

If you want a smaller defense budget and want an adequate defense for America's future, then this amendment is a must.

One of the provisions now in the bill would require an automatic 40-percent cut in the list of items that are controlled for national security purposes—40 percent.

This provision sets up an arbitrary formula which mandates tough cuts in our control list, even though the items on the list are known to contribute significantly to the military potential of our adversaries.

Can this House in good conscience condone this proposal? I do not think so.

Let me point out another provision now in the bill that would strap our national security export control efforts. The provision concerns reexport controls. If enacted, companies would no longer have to obtain permission from the Commerce Department to reexport their products if shipped to one our allies. Basically, once the produce is received by the first buyer, we would then no longer track the item.

Some of you have heard of Richard Mueller. He is the West German citizen wanted for having diverted tens of millions of dollars of high technology to the Soviet Union. Mueller set up a vast network of dummy companies to transfer technology from Western Europe to the Eastern bloc. At one point he had some 75 firms operating in Austria, France, Switzerland, the United States, the United Kingdom, and West Germany. If this provision stays in the bill, it will only make it easier for the Richard Muellers of the world to continue to sell millions of dollars worth of technology to the Soviets without ever having to worry about the consequences.

Another provision in the bill which my amendment strikes would expand the definition of foreign availability. For example, if a foreign product is freely available in one country, then it would have to be decontrolled for all other countries. For example, if a French supercomputer is found in Libya, then we would have to decontrol our supercomputers to the Soviet Union. I ask you, does that sound like a wise course? It does not to me and I do not think it does to you, either.

This amendment strikes those provisions which would endanger our national security. That is all it does.

Yes, we want American business and industry to sell overseas and to compete overseas. We want to sell with the verve of a door-to-door salesman, but we also have an obligation to protect our national security. That is why this amendment has been introduced, to help our exporters, but also to protect our national security.

My amendment is straightforward. It makes it easier for business to compete overseas and at the same time protect our sophisticated technology.

I ask you, for the good or our Nation, to support this amendment.

The CHAIRMAN. Does any Member seek time to opposition to the amendment?

Mr. BONKER. Mr. Chairman, I rise in opposition to the amendment

The CHAIRMAN. The Chair recognizes the gentleman from Washington [Mr. BONKER] for 15 minutes.

Mr. BONKER. Mr. Chairman, we seem to be back into the debate concerning the Export Administration Act and I believe it very clearly boils down to this question: How do we most effectively control truly critical military technology and still enable our high technology exporters to compete effectively in world markets?

In discussing the export control provisions in this bill, let us be clear about one thing. The committee provisions do not in any way jeopardize national security interests, but instead seek to streamline unnecessary export controls and remove low technology items from the control list.

Now, what are we talking about when we say low technology items? This hand-held calculator is one item that is on the control list. We have computerized chess games and other video games that are on the control list, home personal computers, telephones, and the wiring that goes into lightbulbs, over 200,000 items which are on that control list. It is little wonder that the Department of Commerce and the Department of Defense can effectively control goods and technology with unnecessary items such as these on the control list.

□ 1520

There is no way such items are going to enhance the Soviet Union's military capability. Perhaps some of these could disrupt their economic capability, but they certainly will not enhance their military capability.

What the provisions in the bill attempt to do is, over a period of time, remove these unnecessary items from the list through a methodical process that would take 3 years. Why 40 percent? The Secretary of Commerce, Malcolm Baldrige, has stated on several occasions publicly that "the list is too wide by perhaps as much as 30 to 40 percent."

So we are placing into the committee bill the 40-percent figure to which Secretary Baldrige refers. There is no way that the Commerce Department can effectively remove these items unless it is mandated by the Congress.

We have also attempted to deal with the foreign availability problem. That fact remains that we control items that are available and in circulations worldwide. We have previously placed provisions in the Export Administration Act that direct the Secretary to remove those items which are found to be available abroad if he could not negotiate successfully to have the other country control those items. Despite our good intent, the Commerce Department is not carrying out the law as intended, so we are putting more explicit language in this bill.

I would add, Mr. Chairman, that the business and trade community supports this title. While they have had serious questions about other sections of this legislation, they clearly support title III, and in particular the provisions on export policy control.

So I would urge Members to defeat the Roth amendment and make it possible for U.S. high-technology industries to reclaim their competitive position in the world.

Mr. Chairman, I rise in strong opposition to the amendment offered by the ranking minority member of the subcommittee, the gentleman from Wisconsin [Mr. ROTH].

The amendment strikes the most important provisions adopted by the Committee on Foreign Affairs to streamline unnecessary export controls and mandate that the executive branch carry out existing statutory directives to reduce the size of the unwieldly export control list.

Three years ago, the President's Commission on Industrial Competitiveness placed the cost of export controls at $12 billion annually. These self-imposed disincentives and barriers to U.S. exports must be carefully weighed so as to minimize unnecessary restraints in order to better protect U.S. national security, and the economic competitiveness of American industries.

As Mr. ROTH noted, Congress did labor long and hard to strike the appropriate balance between our security and economic needs in the reauthorization of the Export Administration Act. Over 2½ years of careful consideration by Congress culminated in enactment of the Export Administration Amendments Act of 1985, containing many important reforms of the export control process. Almost a year after enactment, however, the executive branch has failed to carry out these crucial reforms. It is largely due to the executive branch's repeated failures to implement the provisions of the act that these further amendments and clarifications are necessary.

I would like to briefly describe the national security export control provisions contained in title III of the bill which Mr. ROTH seeks to strike. I believe that his concern for the provisions adopted by the Committee on Foreign Affairs are unfounded, and will explain why these provisions actually serve to better protect U.S. national security interests, while streamlining the export licensing process.

The Roth amendment strikes section 322(b) of H.R. 4800, which amends the Export Administration Act of 1979, as amended, to eliminate the licensing requirement for reexport of goods to or from countries participating with the United States in Coordinating Committee for Multilateral Export Controls [Cocom] and other countries maintaining comparable

controls pursuant to section 5(k) of the act. Section 322(b) of the bill also eliminates reexport requirements for U.S. parts and components falling under certain de minimus limits.

Licensing of reexports among our allies who participate with the United States in multilateral controls is a duplicative paper exercise, since the United States has the opportunity to veto any proposed reexport of a Cocom-controlled good or technology. U.S. reexport controls continue to offend and irritate U.S. allies, aggravating resistance to the extraterritorial application of U.S. laws. In insisting on unilateral reexport controls the United States undermines its credibility and harms the cooperation and effectiveness within Cocom which the United States seeks to promote. The most recent expression of concern among U.S. allies on this issue is evidenced by a February 1986 resolution of the European Parliament stating that "products listed by Cocom and of U.S. origin should not require an additional reexport license if they are reexported from Cocom countries under Cocom rules." While eliminating the authority for the executive branch to require a reexport license for Cocom or cooperating countries, section 322(b) does enable the Secretary to require a license for the reexport of U.S. goods for particular end users specified by the Secretary in regulation, thereby ensuring continued discretion to control reexports to known diverters of controlled items.

This provision of the bill also addresses the problem of foreign manufacturers "designing out" U.S. parts and components from their products in order to avoid delays and costs of U.S. export controls. Such efforts to "de-Americanize" foreign products result in the elimination of U.S. firms from the world market for parts and components, and make it difficult for U.S. exporters to recover lost sales and market shares. Eliminating the requirement of prior authorization in certain situations before a foreign manufacturer may export products that incorporate U.S. origin parts and components, if their aggregate value in a foreign product is less than 20 percent or $10,000, recognizes the need for a distinction between inconsequential parts and major items. It has come to my attention that the executive branch has under consideration similar proposals to eliminate reexport authorization for parts and components; I strongly support and encourage such initiatives.

The Roth amendment also strikes section 322(e) of the bill before us. This section amends the Export Administration Act to require the Secretary of Commerce, in consultation with the Secretary of Defense, to identify approximately 40 percent of the goods on the control list which contribute least directly to the military potential of any controlled country, and to submit to Congress and Cocom a list of such items. Such goods are to be removed from the control list over a 3-year period, unless Congress acts to maintain controls on any particular items.

Some 200 broad categories of goods and technology, including technical data, which encompass hundreds of thousands of products are currently subject to validated license requirements under the act. Despite repeated congressional efforts to reduce the list gradually and selectively, the list continues to grow. In theory, each item on the control list was placed there because the export of the item could make a significant contribution to the military capability of a potential adversary. Unfortunately, the executive branch is extremely hesitant to remove any item from the list, even in light of technological advances among potential adversaries. In 1979, Congress mandated the Department of Defense to identify those technologies which are most critical to superior military capability, so that Commerce could decontrol less critical products. This effort to streamline our controls has not yet succeeded, due to the fact that the Militarily Critical Technologies List catalogs every modern industrial process. Congress also mandated indexing—a procedure to raise the technical parameters of controlled items as technology advances—which has yet to be implemented. In 1985, Congress mandated reductions of the list on the basis of foreign availability, low technology—as defined by agreement between the United States and our Cocom partners—embedded microprocessors, and other criteria.

In light of executive branch failure to implement each of these specific categories for removal from the list, and the failure of the effort to focus on the most militarily critical technologies, the committee is compelled to mandate the identification of a specific percentage of the list, based on the criterion of contributing least directly to military potential, for eventual removal, while leaving the identification of the items to executive branch discretion. Only in this manner can the U.S. Government reconcile the need to protect national security and to permit nonstrategic exports to take place. As was the case in 1979, and as is still the case now, less than 1 percent of the approximately 120,000 export applications for free world destinations are denied. Such figures are an alarming indication that the export licensing system is more a paper exercise than an instrument of control. Fewer controls, efficiently administered, will be more effective in protecting U.S. national security and economic competitiveness.

In addition, the Roth amendment strikes section 322(g) of the bill, which defines "available in fact to controlled countries" for the purposes of foreign availability to include availability in Western countries in which there are no restrictions on exports to the Soviet bloc, or in which those restrictions are ineffective. The need for this clarifying provision arises from the interpretation contained in executive branch regulations that inappropriately restricts the ability of exporters to submit allegations of foreign availability. Availability of goods in a Western country, including a Cocom country, if uncontrolled for export to the Soviet bloc or if such controls are determined by the Secretary of Commerce to be ineffective, constitutes foreign availability, and should be considered as such for the purpose of decontrol or negotiations. Maintaining controls on goods which are available from foreign suppliers neither denies the goods or technology to a controlled country nor furthers U.S. national security.

The Roth amendment also strikes section 322(h) of the bill, which requires the President to include as part of the U.S. delegation to Cocom, for the purposes of reviewing the control list, representatives of U.S. industry. Inclusion of knowledgeable industry representatives as part of the U.S. delegation will benefit U.S. participation in Cocom by improving the quality of technical assessments. U.S. Government personnel are not and cannot be knowledgable about the complex technical parameters of each controlled item. For this reason, other Cocom members have effectively utilized industry experts, with no apparent adverse consequencs. Appointment of industry representatives would be required for list review only, alleviating conflict-of-interest concerns which might be associated with review of exception cases. It is expected that industry participation at Cocom will reduce the incidence of confusing and overly restrictive regulations, which unnecessarily impede U.S. exporters.

Another important provision of H.R. 4800 which Mr. ROTH proposes to strike concerns the prohibition of the Customs Service from seizing or detaining for more than 10 days, goods or technology which the Secretary of Commerce has determined are eligible for export under a general license. This provision is prompted by concerns over recent reports of the Customs Service inappropriately detaining shipments which the Commerce Department has determined do not require a validated export license. Such unwarranted detentions do not serve U.S. interests, but instead obstruct legitimate exports. This provision does not limit the Customs Service's century's-old authority, but merely requires Customs to release after 10 days shipments of uncontrolled goods. The provision puts a time limit on the bureaucratic decisionmaking process to prevent indefinite delays for U.S. exporters.

Finally, the Roth amendment would revise section 324 of the bill, which authorizes appropriations to the Department of Commerce in each of the fiscal years 1987 and 1988 of $40,935,000, to reduce the authorized amount by $5 million in each fiscal year, reflecting the administration's request. The committee adopted the increased authorization to enable the Commerce Department to meet its increased responsibilities under the 1985 act and under this bill.

Mr. Chairman, I'd like to quote for my colleagues from the Committee on Foreign Affairs' report on reauthorization of the Export Administration Act in 1979:

The administration of export controls has not substantially improved since enactment of the Export Administration Amendments of 1977. The number of export license applications received by the Department of Commerce has been increasing at a rate of about 20 percent per year. * * * Meanwhile the number of applications requiring more time to process than the 90 days envisioned in the law is growing even faster. * * * Less than one-half of 1 percent of all applications received in 1978 were rejected. The committee finds these figures alarming for several reasons. First, they indicate that the export licensing bureaucracy is becoming inundated with more license applications than it can reach considered judgment on. The committee does not believe that the national security is well served by this situation. The ratio of licenses received to licenses denied indicates that far too much review is

undertaken for the amount of control achieved.

This statement was written in 1979 to reflect concerns about our export licensing system at that time. Yet, if we change the number of licenses and the years, the same description is applicable today. In over 7 years, there has been no substantial improvement or streamlining of the export licensing system. Meanwhile, the number of applications grow—to over 140,000 in 1986—and the paper exercise continues, resulting in delays and lost business opportunities for U.S. exporters. And with the increased paper burden comes the increased chance that truly strategic goods, which we must keep out of the hands of our adversaries, will slip through the cracks. The executive branch has been talking about improving our export control system for years, yet we see little evidence that the bureaucracy will change. With a trade deficit in excess of $150 billion, we can no longer wait for a streamlining of the licensing process; our national security and our future economic competitiveness demand action. For this reason, Congress must force the executive branch to implement previous mandates and reforms to streamline unnecessary export controls and remove low technology from the control list. This bill takes these necessary steps. I urge my colleagues to vote against the Roth amendment.

Mr. ROTH. Mr. Chairman, I yield 2 minutes to the gentleman from New Jersey [Mr. COURTER].

Mr. COURTER. I thank the gentleman for yielding this time to me.

Mr. Chairman, I stand in strong support of the Roth amendment and I really disagree with the previous speaker. I really believe that there is going to be a second May Day parade in Moscow if this amendment is not passed.

The bill, as far as I am concerned, has a meat-ax approach. The bill says that 40 percent of those sophisticated technologies that are military critical have to be eliminated from the control list, the military critical technologies list. I am not sure how that 40-percent figure was arrived at, but it seems to me it is similar to telling the Washington Redskins to remove 40 percent of their least effective offensive players. It is going to make a real difference.

It seems to me that those particular technologies that are placed on the list are placed on there because if they got in the wrong hands they would enhance our adversaries' military capabilities. To say that regardless of what those technologies are, 40 percent must be decontrolled, 40 percent of that particular list must be eliminated, is irrational. Maybe, and I am sure there are extreme items on that list that must be removed and should be removed because they are not important technologies, they are not militarily critical, but to say that across the board, the meat-axe approach, 40 percent of those items should be eliminated from controls, I think, is preposterous. I think we have to adopt the Roth amendment.

Second, the bill goes on and says that if a component is $10,000 or less, than there are no controls whatsoever, no licensing requirements whatsoever, for reexport, regardless of the acknowledged military criticality of the technology. So those small items, they can be laser technology, computer technology, diode technology, avionics technology, sensor technology, if the components are less than $10,000 they can be reexported from any allied country to a Communist country with no licensing requirement whatsoever, no controls whatsoever, no paper records.

I urge my colleagues to vote in favor of the logical amendment, the Roth amendment, to protect our national security.

Mr. BONKER. Mr. Chairman, I yield 2 minutes to the distinguished chairman of the Committee on Foreign Affairs, the gentleman from Florida [Mr. FASCELL].

Mr. FASCELL. I thank the gentleman for yielding time.

Mr. Chairman, I rise in opposition to the amendment. The fact is that there is nothing in this bill that would endanger national security. We still have to rely on the common sense of the people who are running this Government in this administration with respect to these matters.

As a matter of fact, the bill enhances national security because the executive branch would not waste time and resources in focusing on technology that is either outdated or should no longer be on the export control list. The problem is that once an item is put on the list, it stays forever, so today there are over 200,000 items on the list.

It just begs common sense to think that an item that was put on the list many years ago still has some critical military significance, such as a handheld calculator. It just does not make sense. It causes a tremendous amount of unnecessary work.

The Secretary of Commerce himself is the one who came up with the 40-percent figure. He estimated, and his department works with this every day, that we could cull at least 40 percent of the items from the list. Just think of the time and the paperwork that is involved if you keep those items on the list. It will take time and paperwork to get them off the list, admittedly, but at least it will free up time, not only for administration officials but also for companies which are literally breaking their backs trying to stay in business from having to cope with the process.

As far as report controls for Cocom is concerned, they involve duplication and unnecessary paperwork and there is nothing in the provision in the bill that would prevent our Government from tracking the end use of any item.

Mr. ROTH. Mr. Chairman, I yield 1 minute to the gentlewoman from Tennessee [Mrs. LLOYD].

Mrs. LLOYD. I thank the gentleman for yielding this time to me.

Mr. Chairman, I rise in strong support of the amendment of the gentleman from Wisconsin [Mr. ROTH].

The provisions in the bill as reported would do irreparable damage to our ability to control the flow of militarily critical technologies to our adversaries.

This year the President is requesting $320 billion for defense. We need huge defense budgets because of the threat we face from the military capabilities of the Soviet Union. Weapon systems are complex and costly. Much of the cost is attributable to the superior technologies we, in the United States, have developed. Conducting the research and applying the research for defense purposes is a very expensive proposition. One of the most effective means of holding defense costs down is to preclude the sale of the militarily critical technologies to the Warsaw Pact, thereby forcing the Soviets to incur the expense of developing these technologies—if they could develop them at all.

The bill as reported disrupts a carefully devised system balancing the benefits of free and open markets with restrictions on the flow of technology that can be used for military purposes. The current system was put together after a difficult conference on amendments to the Export Administration Act. The changes made at that time have not had a full opportunity to reach fruition, and the provisions in this bill would prevent that from ever occurring.

The amendment of the gentleman from Wisconsin deletes the most harmful of those provisions, and I urge Members to support the amendment.

Mr. BONKER. Mr. Chairman, I yield such time as he may consume to the gentleman from California [Mr. EDWARDS].

Mr. EDWARDS of California. I thank the gentleman for yielding time to me.

Mr. Chairman, I rise today in strong support of title III of the Trade and International Economic Policy Reform Act and in opposition to the Roth amendment. These provisions provide a necessary reform of the Nation's export control law. They will help to restore U.S. competitiveness by eliminating unnecessary controls on readily available technological items and reducing the size of the overgrown control list. With the trade deficit expected to exceed $150 billion this year, enactment of these reforms is critical.

I represent a portion of California known as Silicon Valley where innovate companies have been at the heart of the explosive develop-

ment of high technology, providing hundreds of thousands of new jobs and hundreds of millions of dollars in goods sold overseas. While these businesses once enjoyed healthy surpluses, they are now faced with deficits—something unthinkable just a few short years ago.

Export controls are undermining the competitiveness of American high-technology exports. Firms in my district and throughout the country are constantly faced with extensive licensing delays and bureaucratic hassles. The burdensome licensing process set up by our Government is giving American exporters a reputation for unreliability which is hindering their sales. The President's own Commission on Industrial Competitiveness estimated 3 years ago that export controls cost exporters as much as $12 billion per year.

Congress acknowledged the pressing need to ease troublesome export controls when we approved the 1985 Export Administration Amendments Act. The legislation, which was the product of 3 years of prudent review, carefully recognized the need to balance national security interests with the promotion of exports. This essential balance was achieved by strengthening controls on high-technology exports of strategic significance and decontrolling less sensitive exports. But nearly 1 year later, the executive branch has not implemented the law to eliminate these nonstrategic goods from the control list.

Title III of the Trade and International Economic Policy Reform Act will help ensure that the Export Administration Act Amendments of 1985 are enforced properly as mandated by Congress. It orders the administration to finally narrow the scope and size of the massive control list. Moreover, it eliminates duplicative licensing among U.S. allies for the reexport of goods which are multilaterally controlled while also eliminating licenses for low-technology shipments to free world destinations.

Each year, virtually 99 percent of the more than 120,000 license applications the Commerce Department receives for exports to non-Communist countries are approved. Such figures are a clear indication that the export licensing system is more of a time-consuming paper exercise than an effective control mechanism. It is my firm belief that by removing unnecessary and burdensome export restrictions, limited resources can best be applied to controlling the transfer of militarily sensitive items. Fewer controls, I am certain, can be administered more efficiently and can be more effective in protecting U.S. national security and economic competitiveness.

I urge my colleagues to show their strong support for title III by opposing efforts to weaken this important section of the Trade and International Economic Policy Reform Act.

Mr BONKER. Mr. Chairman, I yield 2 minutes to the gentleman from Michigan [Mr. WOLPE].

Mr. WOLPE. I thank the gentleman for yielding this time to me.

Mr. Chairman, I rise in strong opposition to the Roth amendment. The amendment has been described as one that simply affects national security export controls. That unfortunately is not wholly accurate. I believe that all of the Members should be aware that the Roth amendment would actually go so far as to eliminate current restrictions on the export of domestically produced crude oil.

Congress has debated this issue countless times over the past decade, and in each instance the conclusion was clearcut. Exporting American crude oil simply does not make sense. With Japan as a likely client for American oil, any positive impact that oil exports would have on our trade deficit with the Japanese would only weaken the pressure on Japan to reduce their barriers to American products. It would provide an illusion of progress, masking the serious trade inequities that exist in our relationship with the Japanese. Moreover, our overall balance of trade would suffer since the price of replacing oil from foreign sources is generally higher than domestic crude.

There are also negative consequences for national security. Exporting American crude oil would leave the United States more dependent on insecure foreign oil supplies. In addition, there is evidence that exporting domestic crude oil would hurt American consumers because of the higher cost of replacement oil. Added costs to our Government as a result of lower tax revenues in the shipping sector, defaults in federally guaranteed loans and write-offs of investments in our transportation infrastructure would increase the Federal deficit.

With all of these arguments against exporting American crude oil, it is easy to understand why Congress has consistently reaffirmed its support for the prudent restrictions on the export of this precious natural resource. The facts have not changed, nor should our national policy change.

I would urge all of my colleagues to oppose the Roth amendment, and support the restrictions on exporting American oil.

□ 1530

PARLIAMENTARY INQUIRY

Mr. YOUNG of Alaska. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state his parliamentary inquiry.

Mr. YOUNG of Alaska. Mr. Chairman, can I move to strike the last word and get 5 minutes?

The CHAIRMAN. The time is controlled by the gentleman from Wisconsin [Mr. ROTH]. The gentleman has to seek time from the gentleman from Wisconsin or the gentleman from Washington [Mr. BONKER].

Mr. YOUNG of Alaska. Mr. Chairman, there is no parliamentary method by which I can refute the, very frankly, misrepresentation by the previous gentleman in the well?

The CHAIRMAN. The Chair advises the gentleman he must obtain time from one of the two gentlemen who control the time.

Mr. YOUNG of Alaska. There is no other way? I can move the Committee rise, for instance, and get some time?

The CHAIRMAN. That is not a debatable question.

Mr. YOUNG of Alaska. I cannot refute those statements that were made that were completely——

The CHAIRMAN. In the opinion of the Chair, the gentleman has already made his point and the Chair now recognizes the gentleman from Wisconsin.

Mr. ROTH. Mr. Chairman, I yield 1½ minutes to my friend, the gentleman from California [Mr. HUNTER].

Mr. HUNTER. Mr. Chairman, there are certain times when issues come before us on the House floor that cut across all of the cross currents, the competing interests that face this House. This is one of those issues.

I am directing my comments to the foreign availability section that the gentleman from Wisconsin [Mr. ROTH] would cut out with his amendment. That foreign availability section—I call it the if-you-can't-beat-them-join-them section or the section that applies to Lenin's statement that the capitalists would sell the Soviet Union the rope with which to hang them because it says very plainly that if another country, like France, is selling to the Eastern bloc, to our adversaries, the technological wherewithal to kill American soldiers or to kill Israeli soldiers, then, in fact, that we can do the same thing and that our capitalists and our businessmen can join them in that effort.

I want to ask every Member in this House to answer for themselves this question: When you go out on your travels across the world in West Berlin and to Israel and to other parts of the world and you meet with American service men and women, will you be able to look them in the eye and tell them that pursuant to your trade bill, you passed an amendment or a provision that allowed Western businesses to sell the technological wherewithal to kill Americans to the Eastern bloc? That is precisely what this does and I urge passage of the Roth amendment.

Mr. BONKER. Mr. Chairman, I yield 1 minute to the gentleman from Oregon [Mr. AUCOIN].

Mr. AUCOIN. Mr. Chairman, I rise in opposition to the Roth amendment.

We've heard several good reasons why this amendment should be defeated. As one who represents Oregon's Silicon Forest, I can tell you that our export control laws are strangling U.S. industry. I therefore welcome the effort by my friend from Washington to further streamline our export control laws.

I'd like to use my time to address a provision in H.R. 4800 which I authored that would be eliminated if this amendment were to pass. That's the

section requiring the President to appoint a representative from U.S. industry to the Cocom negotiating team.

The purpose of the U.S. Cocom delegation is to decide what products will be controlled or decontrolled by the Allied nations. It's imperative, therefore, that our delegates be knowledgable on the most recent advances in all forms of technology.

Unfortunately, our delegation has often lagged far behind the other Cocom nations in terms of our level of technical expertise. U.S. personnel from Commerce, State, and the Department of Defense are not and cannot have complete knowledge about the complex technical parameters of each item under review.

Other Cocom nations, such as West Germany, Great Britain, Canada, Japan, Italy, and the Netherlands, are usually not behind the eight ball because they have regularly, habitually, perpetually invited industry representatives to sit with them and advise them at Cocom.

The provision that Mr. ROTH would delete merely says that our negotiators should have the same benefits that our allies do. We should have the benefit of someone who has been in the trenches.

I would remind my colleagues that having an industry representative with our U.S. team is not unprecedented. There have been a few occasions in the past when our delegation has dipped into the private sector to get the counsel and advice of an expert on the items under review.

In fact, we just learned that on Tuesday the Department of Defense publicly acknowledged to a group of U.S. businessmen that DOD has invited industry representatives to the Cocom negotiations and intends to invite more. This news comes on the heels of an interview by Dr. Stephen Bryen, the Deputy Undersecretary of Defense for Trade Security Policy, in which he stated that, and I quote:

> There was a role for industry representatives in Cocom for discussions about technical levels of products.

For those who are concerned about possible conflicts of interest, I would note that an industry representative would only be appointed for the purposes of list review only. They would not be involved in the review of specific cases.

Bringing an industry representative into this process will alleviate some of the confusing and overly restrictive regulations which too often come out of the Cocom negotiations. In turn, that would allow U.S. exporters to get into the world market more quickly. And that means more sales and more jobs.

Let's not take a head-in-the-sand approach to the control of sophisticated items.

There are experts out there—let's use them.

I encourage my colleagues to defeat the Roth amendment.

Mr. ROTH. Mr. Chairman, how much time do I have remaining?

The CHAIRMAN. The gentleman from Wisconsin [Mr. ROTH] has 5½ minutes remaining.

Mr. ROTH. Mr. Chairman, I yield such time as he may consume to the gentleman from Arizona [Mr. MCCAIN].

Mr. ROTH. Mr. Chairman, I yield 2 minutes to the gentleman from California [Mr. LAGOMARSINO].

Mr. LAGOMARSINO. Mr. Chairman, I rise in support of the Roth amendment to H.R. 4800. This amendment would strike certain provisions in the bill concerning national security export controls and restore the administration's budget request for the Export Control Administration. One of the provisions in the bill would require an automatic 40-percent cut in the list of items that are controlled for national security purposes. I, like many of my colleagues, support the orderly decontrol of products that are no longer militarily critical. However, this arbitrary 40-percent cut could seriously undermine our national security by potentially forcing strategic items to be removed from the control list. These provisions are strongly opposed by the Cabinet and the Defense Department as expressed in a letter by Under Secretary of Defense Fred Ikle.

Contrary to the impression you might have been given about the position of Commerce Secretary Malcolm Baldrige, the Commerce Department strongly supports the Roth amendment.

Furthermore, the legislation would increase the budget of the Office of Export Administration by 40 percent from its present authorization. In this period of budget constraints which is having an impact upon virtually every portion of the budget, I believe that we cannot afford such a large budget increase. We can do more by reducing the budget deficit and the value of the dollar so that American products can once again compete in the world marketplace.

An industry's representative should sit in on Cocom? Who, a competitor? What about security?

I urge my colleagues to support the Roth amendment.

PREFERENTIAL MOTION OFFERED BY MR. YOUNG OF ALASKA

Mr. YOUNG of Alaska. Mr. Chairman, I offer a preferential motion.

The Clerk read as follows:

> Mr. YOUNG of Alaska moves that the Committee do now rise and report the bill back to the House with the recommendation that the enacting clause be stricken out.

The CHAIRMAN. The motion offered by the gentleman being a highly privileged one in the Committee of the Whole, the gentleman from Alaska [Mr. YOUNG] is recognized for 5 minutes on behalf of his motion.

Mr. YOUNG of Alaska. Mr. Chairman, I offer this motion in an attempt to obtain time because of the restricted time under the rule to expose the straw man concerning the Roth amendment pertaining to Alaskan export of oil.

A moment ago, there were some statements made that were, in fact, not in truth, probably offered because of lack of information. The Roth amendment does not allow new exports. It only eliminates the unneeded restrictions imposed in the trade bill that came from the gentleman from Washington [Mr. BONKER].

That bill eliminates Presidential flexibility. Currently, there are five statutes which control the export of oil from the United States, but these controls allow the President enough flexibility to approve exports that are in the national interest.

While most of title III is aimed at eliminating export controls, the bill, as reported out of committee, would place the ability of the President, this Congress, and States of this Nation in a straitjacket. They would be unable to trade oil.

It is only a small amount of oil which we speak of. It does not damage the merchant marine fleet. It would allow, by the President's suggestion, 6,000 barrels a day of Cook Inlet oil, which is not North Slope crude oil, to be exported to whoever would buy it.

□ 1540

I remind the membership that the author of that amendment, the gentleman from Washington [Mr. BONKER], is quoted in an Alaskan newspaper as saying: The Cook Inlet ruling is "more symbolic than substantive."

Six thousand barrels per day is one-third of 1 percent of all Alaskan oil. This is about one small tanker, be it American bottom, every 6 months. This oil is not connected with North Slope oil, which is 1,600,000 barrels a day. In fact, it would require the Congress to act before North Slope oil could ever be exported.

My friends, let us bring that to a point. We heard about the cost to the consumer. We are shipping Alaskan oil 11,900 miles to the consumers on the east coast. It is costing the consumers $9 a barrel. We can buy oil that cheap from the Middle East. But we cannot sell it to the closest market. However, we will not get in that large argument of 1,600,000 today.

I think it is very, very unfortunate that the committee saw fit, when we are talking about developing trade, to put one industry in a straitjacket and not allow it to export oil. Some 6,000 barrels of oil a day will not protect the

merchant marine fleet which I support very strongly.

What a terrible time to put forth this straitjacket activity. If we want to talk about the North Slope oil and the cost to the consumer, we have $100 million a year that goes to the Panama Canal community for a pipeline—the moving from a 25,000-deadweight-ton ship to a 90-ton-deadweight ship. Three ships to carry one tanker's supply of oil. This adds the cost to the east coast consumer.

More than that, this is supposed to be a trade bill; this is to be a bill to supposedly help our industries, and what are we doing with this bill? We are trying to give some to someone and take it away from others. This bill takes from our American industry the means to develop oil in the frontier areas.

I suggest respectfully, that the Roth amendment, as proposed, should be adopted for national security on the energy field so we can go forth and look for our frontier oil areas.

We cannot do it if we are put in a straitjacket.

Mr. Chairman, at this time I withdraw my motion.

The CHAIRMAN. Without objection, the motion offered by the gentleman from Alaska [Mr. YOUNG] is withdrawn.

There was no objection.

The CHAIRMAN. The Chair will state that the gentleman from Washington [Mr. BONKER] has 7 minutes remaining.

Mr. BONKER. Mr. Chairman, I yield such time as he may consume to the gentleman from Texas [Mr. BROOKS].

Mr. BROOKS. Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from Wisconsin which would strike key provisions in the omnibus trade bill (H.R. 4800). As I understand it, these provisions were adopted by the Committee on Foreign Affairs in order to reduce duplication and unnecessary paperwork and redtape requirements placed on American industry by the Export Administration Act.

Supporters of the Roth amendment maintain that the language contained in the committee bill would seriously undermine the national security controls placed on the export of critical technologies. What is implied in this rhetoric is that the committee's provision would somehow harm our Nation's national defense effort. This is not true of course. We are all concerned about our Nation's defense. We do not want sensitive technology critical to our military to be put in the hands of our enemies by some greedy promoter who couldn't care less as long as he's making a buck.

The problem is that DOD, in making an effort to ensure this doesn't happen, would prohibit the export of any technology remotely related to military uses. In the process, they are harming one of the most vital and healthy segments of our economy—the computer and telecommunications industry. The committee's bill attempts to strike a balance between the need to protect national security while, at the same time, promoting America's exports. The first step in this process is to eliminate low-technology, nonstrategic goods from the export control list so that our companies can compete better in the world market.

My colleagues should not forget the fundamental principle which DOD chooses to ignore in debates such as this—a strong national defense cannot be achieved without a healthy economy and the ability of our domestic industry to compete in the world market. You can't win the war by undermining our industrial base. I wish DOD would wake up to this fact before it is too late. I urge my colleagues to support the committee's position on the matter.

Mr. BONKER. Mr Chairman, I yield 1 minute to the gentleman from Flordia [Mr. MICA].

Mr. MICA. Mr. Chairman, let me just say that what we are talking about here is an issue that I think is really misunderstood by the House. There are at least 200,000 items on a list that we cannot ship; and we do not know what is on that list—we do not know if these cards or those glasses or this microphone or this pen in my pocket—anything could be on the list.

We do know that of the 200,000 and maybe 500,000 items on the list, that in 1979 less than 1 percent were rejected. In 1980, 1981, 1982, 1983, less than 1 or 2 percent rejected. We are saying 500,000, 200,000 items must go through this scrutiny for a less than 1 percent—I know the gentleman rises to tell me I am correct on this issue.

We are enforcing a system that does not work, and every statistic proves that it does not work.

Mr. BONKER. Mr. Chairman, I yield 1 minute to the gentleman from Nebraska [Mr. BEREUTER], a distinguished member of the committee.

Mr. BEREUTER. My colleagues, my 2 years in the military were spent in counterintelligence and counterespionage. I am not about to do anything that is contrary to the national interest, but I ask Members to vote against the Roth amendment.

We are so sweeping in what we try to cover by our export licensing procedure that we do not cover what is really critical. It is important that we eliminate some of the controls on low technology.

The President's own Commission on Industrial Competitiveness suggests that this costs the American exporter $12 billion a year. I also remind my colleagues, particularly on this side of the aisle, that three of the amendments that would be stricken by the Roth amendment are coming from our colleague from California [Mr. ZSCHAU].

Mr. Chairman, the Bonker amendment to the trade bill, title III, this existing language of the bill, helps U.S. export competitiveness by eliminating unnecessary controls on low-technology items and reducing the size of the overgrown control list.

Nearly 1 year after enactment of the Export Administration Amendments [EAA] the executive branch has not implemented the trust of the law. Excessive controls on high technology exports have turned an industry that was a net export earner of $26 billion in 1981 to a net exporter of $7 billion in 1985. With a trade deficit exceeding $150 billion this year, we have to free up nonstrategic, foreign available goods from controls.

Each year 99 percent of the more than 120,000 license applications the Commerce Department receives are approved for Free World destinations; the licensing process results in excessive paper-shuffling that President Reagan's Young Commission on Industrial Competitiveness estimates cost exporters $12 billion per year.

Where our allies have comparable export control systems to that of the United States, it makes no sense to insist on re-export licensing requirements; the language in the bill strikes this requirement for nonstrategic trade.

It would not be difficult to reduce the list of export control items by more than 30 percent, as Secretary Baldridge has achnowledged, by eliminating nonstrategic items without jeopardizing U.S. security interests.

I urge your support for the committee; your opposition to the Roth amendment.

Mr. ROTH. Mr. Chairman, I yield 1½ minutes to the gentleman from Alabama [Mr. DICKINSON].

Mr. MICA. Will the gentleman yield for 15 seconds?

Mr. ROTH. Mr. Chairman, I will yield 15 seconds to the gentleman from Florida [Mr. MICA].

How many items did the gentleman say were on the control list?

Mr. MICA. I'm sorry?

Mr. ROTH. How many items did the gentleman say were on the control list?

Mr. MICA. We do not know——

Mr. ROTH. Well, then, how can the gentleman say 40 percent should be taken off if we do not know how many are on the list?

Mr. MICA. We have been told——

Mr. ROTH. Mr. Chairman, I yield 1½ minutes to the gentleman from Alabama.

Mr. MICA. May I have my 15 seconds?

We have been told at least 200,000, and possibly 500,000.

The CHAIRMAN. The Chair advises the gentleman from Florida that the gentleman from Wisconsin took his 15 seconds.

Mr. DICKINSON. Mr. Chairman, I rise in support of this amendment because I think it is very much needed.

I do not know how many Members are aware, but this appeared in the press; it got some ripple effect but not a great deal; but last year it was learned that the North Koreans were flying Hughes helicopters; and at first it was a very close held secret and then as it turned out they had over 30 helicopters.

Well, we tried to find out, and the South Koreans were upset about it; and we found out that the helicopters were sold to Germany, who then transferred them to a company that then clandestinely sold them to North Korea.

That was against the law, because we had the right to relicense the further sale or transfer those items of military equipment. Under this Roth amendment we retain that right, but without the Roth amendment, we cannot follow the item as it leaves the original purchase—he gets it in fee simple, he can transfer it on.

A prime example were some sophisticated computers. They were sold overseas; they subsequently were transferred to Poland and then were in the process of being shipped to the Soviet Union.

I think it is a good amendment; the Department of Defense wants it; I would ask for its support.

Mr. BONKER. Mr. Chairman. I yield 1 minute to the gentleman from California [Mr. BERMAN].

Mr. BERMAN. Mr. Chairman, I rise to oppose the amendment. There has been a lot of discussion about what should be on the list, is the list too extensive, what are the standards for foreign availability determinations; but one part of the Roth amendment, one part of this amendment would eliminate a key provision of this bill that says for items which are not on the list, they are not supposed to be controlled, Customs cannot detain them for longer than 10 days without the specific authority of the Department of Commerce.

We have heard story after story from exporters seeking to export commodities which no one has determined risk our national security; which are not on any list; which are detained for months and months at a time before Customs finally releases those items.

The provisions in title III would stop that practice, would require better coordination. Surely our governmental processes are not so paralyzed that where an item affecting national security is being detained, the Departments of Defense, Customs, and Commerce cannot coordinate a response and give due process to the exporter in this situation.

The CHAIRMAN. The Chair would advise the gentleman from Wisconsin [Mr. ROTH] he has 2 minutes remaining; the gentleman from Washington [Mr. BONKER] has 4 minutes remaining.

Mr. ROTH. Mr. Chairman, I yield 2 minutes to the gentleman from Florida [Mr. HUTTO].

Mr. HUTTO. Mr. Chairman, I hope that all Members here on the floor and those watching television will realize that this is a very, very important amendment, and it pertains to national security.

I think we are doing a dangerous thing if we pass this bill without the Roth amendment. About 2 years ago, the chairman of the Committee on Armed Services appointed me to chair a special panel on technology transfer, to try to do something about the tremendous problem that we have with the slippage of our technology to the Soviet Union and the Warsaw Pact nations.

□ 1550

And I tell you that I think a lot of people do not realize what a problem that is. You know, we are spending about $25 billion or $30 billion a year on the research and development here, and the Soviets are getting a free ride. You know, if we could control our technology a little better, I do not think that we would necessarily have to spend as much on defense. So I would call all of our Members' attention to the fact that, if we do not strike these, we are loosening up more than we are now and, I think, allowing more slippage of our technology to the Soviet Union and the Warsaw Pact nations. I know in the Export Administration Act that we had arguments over this problem a year or so ago. Out of the Export Administration Act in conference came some reasonable controls, I think. But if we pass the bill without the Roth amendment today, then we are loosening up even further. Would we want to do that just because we want to sell something that would endanger our security, just because we would loosen up to allow some contractor who want to sell a product to some country overseas that might eventually get into the hands of the Soviet Union? I think not. I think we desperately need to have more control. We can still have the militarily critical technologies list, and we can take those items off which are not critical. But I say to you that if we pass the bill without the Roth amendment, we are loosening up even more on foreign availablility, on a number of other items, so I would ask all Members to vote "yes" on the Roth amendment.

Mr. BONKER. Mr. Chairman, I yield 1 minute to the distinguished gentleman from Minnesota [Mr. FRENZEL].

Mr. FRENZEL. Mr. Chairman, I travel a good deal around the world speaking to American businessmen who are trying to carry our cause, sell American goods in various parts of the world. No part of our law is more irritating than the administration of the licensing laws.

I do not know whether the committee's bill is overwritten; I do knot know whether the gentleman from Wisconsin has made too tough an amendment. I do know that we need to give American business greater latitude. We simply must let our people sell goods that are being sold by other countries. There is no reason to continue this penalty.

I urge a vote against the Roth amendment and in support of the committee bill.

Mr. BONKER. Mr. Chairman, I yield 1½ minutes to the gentleman from California [Mr. MINETA].

Mr. MINETA. Mr. Chairman, I rise today to oppose the Roth amendment to title III of the Omnibus Trade Act.

Mr. Chairman, our current export control policies stifle exports of high tech products—the very area where we are world leaders, where our products are of the highest quality and where our goods are greatly sought after.

Of course we need to protect our high tech products from wanton use by our enemies. But, by reaching far beyond reasonable security precautions and by failing to implement orderly and comprehensible licensing application procedures, we are in fact foolishly and needlessly inhibiting vital international commerce.

Our national security interests are certainly not served by the confusion, by the procedural delays, and, ultimately, by the lost opportunities in the foreign marketplace. And, yet, these are the circumstances engendered by an overreaching Export Administration Act.

Today, we have an opportunity to improve current conditions. The Foreign Affairs Committee has reported a bill which streamlines an unwieldy system. This bill would have the dual effect of treating our high tech industry more fairly and confining our controls to high tech products which are genuinely unavailable to, and coveted by, our enemies.

The approach taken in this bill is balanced and carefully crafted. This amendment's attempt to tamper with it will send us reeling backward. We will be fencing in our own products and illogically preventing them from reaching the international marketplace.

Ironically, passage of this amendment would erode our competence in producing high-tech products and, ultimately, would be far more damaging to our national security than anything contemplated in this bill.

Mr. Chairman, I congratulate the gentleman from Washington, [Mr. BONKER] and his colleagues in the committee who produced this fine bill and I urge my colleagues to oppose ef-

forts to weaken or undermine their efforts.

The CHAIRMAN. The gentleman from Washington [Mr. BONKER] has 1½ minutes remaining. The gentleman from Wisconsin has no time remaining.

Mr. BONKER. Mr. Chairman, I yield myself such time as I may consume.

I would like to make an observation about one effect of Mr. ROTH's amendment that deals with the prohibition on the export of North Slope Alaskan oil. Mr. ROTH's amendment would actually strike all of the existing provisions in the Export Administration Act which currently ban the prohibition of North Alaskan Slope oil. I think the issue should be addressed. While removal of that ban may enable us to export more oil to Japan and improve our trade imbalance with Japan, we would have to import oil to make up for the loss. So there is really no net gain as a result of allowing export of oil to Japan. Meanwhile, all of the refineries on the west coast and in the gulf coast have been retrofitted to take this high-sulfite, heavy crude oil. If we were to allow the export of this oil, I do not know where we would find replacements for those refineries to serve our own consumers.

Mr. ROTH. Mr. Chairman, would my good friend from Washington yield for just 10 seconds?

Mr. BONKER. For just 10 seconds, I yield to the gentleman.

Mr. ROTH. I thank the gentleman for yielding.

The gentleman is very sophisticated and knowledgeable in this area. The gentleman has read my amendment. The gentleman knows that my amendment makes no change whatsoever to the existing law.

Mr. BONKER. Well, my staff informs me that it strikes all the existing prohibitions.

Mr. ROTH. Your staff did not read the amendment.

Mr. BONKER. Mr. Chairman, in conclusion, I would note that, what we are attempting by way of this bill——

The CHAIRMAN. Under the rule, all time for debate on this amendment has expired.

The question is on the amendment offered by the gentleman from Wisconsin [Mr. ROTH].

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. ROTH. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 181, noes 238, not voting 14, as follows:

[Roll No. 136]

□ 1615

Messrs. WILSON, GEJDENSON, WISE, TRAXLER, HERTEL of Michigan, and BATES changed their votes from "aye" to "no."

Messrs. DORGAN of North Dakota, ROBINSON, SPRATT, and NIELSON of Utah, Mrs. ROUKEMA, Messrs. STRANG, SLATTERY, and CARR, Mrs. BOGGS, and Mr. BEVILL changed their votes from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. BONKER

Mr. BONKER. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment offered by Mr. BONKER: Strike section 452 and insert the following:

SEC. 452. AMENDMENTS TO TRADE AND DEVELOPMENT ENHANCEMENT ACT OF 1983

(a) FUNCTIONS OF NATIONAL ADVISORY COUNCIL ON INTERNATIONAL MONETARY AND FINANCIAL POLICIES.—Section 646 of the Trade and Development Enhancement Act of 1983 (12 U.S.C. 635s) is amended—

(1) in subsection (a)(2) by striking "without the unanimous consent of the members of the National Advisory Council on International Monetary and Financial Policies" and inserting "unless a majority of the members of the National Advisory Council on International Monetary and Financial Policies approve the financing"; and

(2) by adding at the end the following:

"(b)(1) It shall be the duty of the National Advisory Council on International Monetary and Financial Policies to—

"(A) establish policy and procedure guidelines for the development, implementation, and coordination of the programs authorized by sections 644 and 645;

"(B) oversee the operation of those programs;

"(C) recommend improvements in the manner in which those programs are carried out;

"(D) encourage private financial institutions to participate in those programs; and

"(E) develop a system, incorporating both public and private sources of information, for monitoring the use of tied-aid credits by foreign governments.

"(2) In connection with the establishment of policy and procedure guidelines pursuant to paragraph (1)(A), the National Advisory Council shall—

"(A) recommend procedures which would assure that if an application is submitted to the Export-Import Bank or the Agency for International Development for assistance under sections 644 or 645, the application can be processed and the assistance made available within 30 calendar days after the application is submitted;

"(B) establish a policy with regard to—

"(i) the degree to which proof is required, in order to receive assistance under sections 644 or 645, that a foreign offer of a tied aid credit has been made or (on the basis of past practice or a course of dealing) can reasonably be expected; and

"(ii) the time at which and the manner in which evidence of such offer shall be submitted;

"(C) devise a method for determining the number of American jobs which will be created or retained through assistance under this Act, and give such factor consideration in making assistance available; and

"(D) describe the method of publicizing the availability of financing under sections 644 and 645, and the terms and conditions under which such assistance is available to both large and small exporters.".

(b) REPORT TO CONGRESS AND TERMINATION OF ACT.—The Trade and Development Enhancement Act of 1983 is amended by adding at the end the following new sections:

"SEC. 648. REPORT TO CONGRESS.

"The President shall transmit to the Congress, on a quarterly basis, a report setting forth the activities carried out under sections 644 and 645. Each such report shall include—

"(1) information on applications used by the Export-Import Bank and the Agency for International Development for making assistance available under sections 644 and 645;

"(2) information on the disposition of such applications;

"(3) an identification of the foreign governments whose behavior the President is trying to influence by the use of such assistance, and an explanation of why the assistance involved is deemed likely to influence that behavior;

"(4) evidence that clearly demonstrates that assistance under sections 644 and 645 has been used for the purposes of this Act;

"(5) information on any progress that has been made in negotiations on agreements within the Organization for Economic Cooperation and Development to limit the use of tied aid credits;

"(6) information on the extent to which tied aid credits are being used at the time of such report by major trading countries within such Organization, the terms of any such credits, and the market sectors with respect to which such credits are being used; and

"(7) information on the extent to which assistance under this Act has been effective—

"(A) in discouraging the use of tied aid credits for commercial purposes by other countries; and

"(B) in helping to protect United States exporters from unfair and predacious official export competition.

"SEC. 649. TERMINATION OF AUTHORITIES.

"The authorities contained in this Act shall cease to be effective upon a certification by the President to the Congress that a majority of the members of the National Advisory Council on International and Monetary Financial Policies have determined that—

"(1) the United States has reached an agreement with the governments of the other member countries of the Organization for Economic Cooperation and Development which ends abuse of tied aid credits in pursuit of national commercial benefits; and

"(2) these governments are honoring the terms of that agreement.".

(c) FUNDING BY THE AGENCY FOR INTERNATIONAL DEVELOPMENT.—Section 645(d) of Trade and Development Enhancement Act of 1983 (12 U.S.C. 635r(d)) is amended by striking "allocated for Commodity Import Programs".

The CHAIRMAN. Pursuant to House Resolution 456, the gentleman from Washington [Mr. BONKER] will be recognized for 15 minutes, and a Member opposed will be recognized for 15 minutes.

The Chair recognizes the gentleman from Washington [Mr. BONKER].

Mr. BONKER. Mr. Chairman, I am pleased that many of my colleagues are here as we commence debate on this amendment because it is another issue that prompts a great deal of confusion.

Mr. Chairman, this issue is referred to in a variety of terms: mixed credits, tied aid, a war chest. Put simply, it means our ability to match what we call mixed credits offerings by other countries in this fiercely competitive world market.

Currently, the French, the Italians, the Japanese, and others engage in this predatory activity known as mixed credits, which simply means that oftentimes when their companies are bidding on a contract, the government weighs in with a concessionary loan or some foreign assistance to provide their companies with a competitive edge. The result is a loss somewhere between $8 and $10 billion a year in these contracts.

There is no disagreement in this House that we need a program to combat the mixed credits threats of other countries. In 1983, we passed legislation to establish a Mixed Credits Program involving the Eximbank and AID. And we also established a National Advisory Council to consider these mixed credits matters. The administration, however, wants to move the program to the Department of Treasury. Therefore we now must deal with whether we should have a Department of Treasury Program, an offensive strategy, or whether we should retain the existing program.

The language in the bill is the Banking Committee's provision on mixed credits, which is essentially the administration's request. The alternative which we are offering is supported broadly by the business community and almost all those who are presently engaged in export activity.

What my amendment does is simply remove the $300 million authorization in this bill. Both budget resolutions have eliminated any money to carry out this War Chest Program. So we feel that we should not be authorizing money that neither will be in the budget resolution nor appropriated.

Second, the amendment clarifies current law that AID's ESF money—Economic Support Fund money—can be used to support U.S. mixed credits offerings. Again this was implied in earlier statutes, but we need to be a little more explicit.

We also attempt to streamline the National Advisory Council. Currently the law provides for a unanimous vote, so one agency can, in effect, veto a NAC application. What we would like to do is provide for a unanimous vote so that all members of NAC have an equal vote so that we can make these determinations in a timely fashion.

Last, we have a sunset provision. The whole idea behind mixed credits is not that we want to use concessionary loans and foreign aid to carry out commercial transactions. We are against that practice. But we want to bring the other countries into the negotiations so that they will put an end to the practice.

My amendment allows that, once that happens, then this law terminates. It is a sunset provision. I believe that if you have had a chance to look at the two provisions that are before us, the Banking Committee's provision and my amendment, and consider that the exporting community supports my alternative, you will see that the Bonker amendment is the way to go.

The CHAIRMAN. Does any Member seek time in opposition to the gentleman's amendment?

The gentleman from North Carolina [Mr. NEAL] is recognized for 15 minutes.

Mr. NEAL. Mr. Chairman, I am amazed at this amendment. It simply abolishes our war chest.

Now, the Banking Committee, which is the committee of primary jurisdiction, has passed it; the Foreign Affairs Committee, of which the gentleman is a member, has passed a version. It is not exactly the same as our version. But this is nothing more than unilateral disarmament.

Here is the situation: A number of countries in the world steal our exports by deeply subsidizing on the basis of their credit, so deeply that our companies, our exporters, cannot compete.

This war chest is an attempt to let the Secretary of the Treasury—it would be under his control—selectively target some of these countries to get them to stop this practice, to fight them, using their own kinds of weapons.

If we do as the gentleman from Washington [Mr. BONKER] suggests, we take away all possibility of our having this tool.

Let me say this: When we first started the hearings, the French were the major offenders. Our witnesses told us the French were the major offenders. We could not get them to the bargaining table. I cannot prove this, but I think, as a result of our having passed the bill out of committee, they have become more receptive to negotiating an end to this mixed credits practice.

Now the Japanese are the worst offenders. If we do not pass something, if we do not arm our Department of the Treasury, I am sure the French will come back at us, steal our exports, the Japanese, the Canadians, and others will do the same thing.

Now, I understand that the Foreign Affairs Committee passed a little different version of the war chest bill, minor differences. I thought the gentleman was going to offer an amendment to insist upon his little different approach. I think ours is better, ours is stronger. It would be less wasteful in that approach. That would have been subject, certainly, to the will of the committee. But what he is doing now is simply throwing in the towel. He is saying, "We are not going to engage in this battle for exports."

I think maybe part of the reason he is suggesting this is that he is worried that we will not get the appropriations for it. Maybe not. I do not know. We cannot decide that here today. But having this authorization in place, even without the appropriation being in hand gives us some leverage at the bargaining table. Destroying the authorization would completely weaken our posture. We would give up without even trying.

Now, I hope that we get the appropriation. But as I say, I do not know. I cannot predict that at this point.

Let me make one final point, Mr. Chairman. The gentleman's amendment does one other thing. It completely destroys the authority of the Secretary of the Treasury to engage in the practice of fighting the mixed credits in any form whatsoever. He now has the authority. He would have the authority under the bill. But this approach would simply completely disarm the Secretary of the Treasury.

There is absolutely nothing to be gained from this. Even without the appropriation, it gives us some leverage at the bargaining table, and I certainly hope the Committee rejects this amendment.

Mr. LEACH of Iowa. Mr. Chairman, will the gentleman yield?

Mr. NEAL. I yield to the gentleman from Iowa.

□ 1630

Mr. LEACH of Iowa. I thank the gentleman for yielding to me.

I would just like to emphasize to the gentleman that this is an approach that is to be respected, but it is an approach that goes very much counter to something that was very carefully crafted by the House Banking Committee.

It has four disadvantages: One, it complicates very much the administration of our basic Foreign Aid Program by making an open-ended, if not entitlement program, out of ESF.

Second, it puts a potential drain on Eximbank reserves, Eximbank being the basic entity under the jurisdiction of the gentleman from North Carolina.

Third, it establishes a very cumbersome procedure administratively without targeting what we are trying to do and that is to change other countries' unfair trade tactics in this area.

Finally, it disperses control of how decisions are made among individual members of the so-called NAC. I would just simply suggest that this is an approach that is worthy of serious consideration, but I think it is worthy of consideration in a committee context, not a floor discussion of this particular legislation.

My own sense is the gentleman from Washington has an approach that ought to be considered at another time and at another place. But at this particular time and this particular place, as much as I am opposed to the bill in its entirety, I think this language within the bill ought to be maintained intact.

Mr. NEAL. I thank the gentleman.

The gentleman from Iowa touched on one very important point, I think. The fact is that this is an attempt to make sure that the Eximbank has enough funds for its primary purpose, which is to support our exports. We hope we get an appropriation for this war chest to replenish the funds of Exim that it is already using, and successfully, I might say, in reducing the practice of the use of mixed credits by other countries. My concern is that without this authorization we would have no hope for the appropriation, and it could weaken Eximbank's ability to do its business.

Mr. Chairman, I reserve the balance of my time.

Mr. BONKER. Mr. Chairman, I yield myself 1 minute.

Mr. Chairman, the war chest is empty, and it will continue to be empty because we do not have in our budget resolution or in our appropriation bill money for the War Chest Program. I do not think we should be authorizing $200 million or $300 million or $500 million if that money is not there. I do not know who we are fooling, but we are not fooling ourselves.

Second, if we do authorize the $300 million, then we give the Treasury Department, with this newly found authority, license to go in and raid the Exim Direct Loan Program. That program is already being scaled down considerably. We need to protect the integrity of that program.

Third, my amendment is entirely consistent with what the House did in 1983 in setting up this program.

Mr. Chairman, I yield 3 minutes to the gentlewoman from Connecticut [Mrs. JOHNSON], who, incidentally, has been the principal sponsor of mixed credits legislation here in the House and has been a true advocate of setting an effective Mixed Credits Program.

Mrs. JOHNSON. I thank the gentleman for yielding to me.

Mr. Chairman, I rise in strong support of the amendment, and far from eliminating the war chest, this amendment is the only way that we can have a war chest. If we follow the course laid out in the bill, we will simply gut the Eximbank Direct Loan Program, whose resources have been cut by more than 80 percent in recent years, but whose program is essential to support exports, because we cannot, with Gramm-Rudman, appropriate the $300,000 the committee bill assumes.

If we follow the course set forth in this amendment, then we will have the opportunity to use foreign aid, unearmarked economic support funds that are already in the pipeline, to support mixed credits projects. The economic support funds are ample for the dual purpose of providing economic development projects for other nations and at the same time increasing demand for American products abroad.

Far from eliminating the influence of the Treasury on this important mixed credit program, this bill rather

assures that all those who participate in carrying out trade-related responsibilities in the executive branch will work together to effectively implement the mixed credits program.

This bill requires a majority of the members of the National Advisory Council that governs the Eximbank to concur in the use of mixed credits. It means that Commerce, that U.S. Trade Representative, that Eximbank and that Treasury will all be involved in these decisions.

Remember, it is the Secretary of the Treasury that chairs the National Advising Council. So far from cutting the Secretary of the Treasury out of the process, it cuts him in. This bill provides a coordinated, integrated mechanism to implement trade policy in America. It is not an initiative that fractures, that further fractures, the decisionmaking process by which we implement trade policy, as does the legislation before us.

Mr. Chairman, the Bonker amendment is a very good amendment. This amendment will allow the war chest proposal to be a reality. It will provide the money and coordinated authority for a strong mix credit program. It will allow America to be out there standing behind her businessmen that are trying to compete for contracts with foreign producers backed by predatory financing, for contracts that have, in some cases, decades of follow-on business in goods and services associated with them. It will allow us to guarantee the working people of this Nation that they can compete out there in the international market on the basis of the cost of production and the quality of their goods.

Mr. Chairman, there is a certain mythology surrounding the export credit issue, and that is the mistaken belief that our Eximbank Programs only help a few large companies and therefore represent a subsidy for big business. Like all mythology, this story can be entertaining. But when jobs are at stake in your districts, I know you want the facts, not the myths.

I have seen a listing of subcontractors and suppliers provided by a large engineering company in my State, and which itself is a subcontractor for an even larger construction services firm, and I count 63 subs and suppliers in 16 States for 1 boiler unit in a powerplant, a sector in which competition is great and the use of mixed credits pervasive.

Another document available, a United States AID employment creation study, describes how 2,135 man-years of employment were tied to a major project in Egypt with the help of AID funds.

I am also aware of a major United States medical supply company that is currently competing against mixed credits in Brazil for a contract that would benefit at least 60 suppliers in the United States.

Indeed, this kind of a program, this mixed credit initiative is not a big business aid program; it is a jobs program that affects every district in this Nation. The Bonker-Johnson-Ridge amendment will give us the wherewithal to ensure fair competition for our exporters plus jobs for our people competitive position in important markets.

I urge the Members' support of this amendment.

Mr. NEAL. Mr. Chairman, I yield 3 minutes to the gentleman from Ohio [Mr. WYLIE].

Mr. WYLIE. I thank the gentleman for yielding me this time.

Mr. Chairman, I rise in opposition to the Bonker amendment and in support of the position taken by the gentleman from North Carolina. I think he is right on this amendment. I would point out to my colleagues that my substitute for the Banking Committee title includes the Neal provision for a tied-aid fund to be established under the authority of the Secretary of the Treasury.

Many U.S. companies have testified before the International Economic Policy Subcommittee chaired by Representative BONKER, and also before the subcommittee which is chaired by Representative NEAL on the need for the U.S. Government to confront the tied-aid problem head-on, as they say it.

That is precisely what the tied-aid credit provision does which is now in the bill. On the substance of the amendment itself, the Banking Committee has not held any hearings or markups on the need to change the provisions of the existing Tied-Aid Credit Program which was created as a part of the earlier omnibus package of IMF and housing legislation back in 1983.

Now is not the time and the House floor is not the place, it seems to me, to make these kinds of substantive changes in the legislation if they are in fact needed at all.

On the issue of changing the control of the Tied-Aid Program from the Eximbank to a majority of the members of the National Advisory Council, an interagency body, including such Agencies as Treasury, Commerce, State, and the Federal Reserve, these changes are not really needed and would make the process much more cumbersome in this Member's opinion.

Presently, a unanimous decision of the National Advisory Council is required before the awarding of a tied-aid financing package. In short, this amendment is giving short shrift to the American exporters. The proper answer is to keep the provisions reported by the Banking Committee and which is contained in both the current bill and in my substitute.

Mr. LEACH of Iowa. Mr. Chairman, will the gentleman yield?

Mr. WYLIE. I yield to the gentleman.

Mr. LEACH of Iowa. I thank the gentleman for yielding.

Mr. Chairman, this is a very esoteric issue with both sides having the same goal, but to put one thing very straight: I think it should be on the record that the Department of Treasury, the Reagan Department of Treasury, the Department headed by Jim Baker is in adamant opposition to this particular amendment.

I just think in this chemistry when we really have a hard time understanding the subtleties of difference, we ought to recognize the profesionals in the administration have real concern.

□ 1640

Mr. WYLIE. The gentleman makes an excellent point. I think it is one that deserves attention and therefore urge that the Bonker amendment be defeated.

Mr. BONKER. Mr. Chairman, I yield 2 minutes to the distinguished chairman of the Committee on Foreign Affairs, the gentleman from Florida [Mr. FASCELL].

Mr. FASCELL. Mr. Chairman, I rise in support of the amendment.

What we find here is that we have an existing program of mixed credits, with the money coming out of ESF funds—economic support funds—and some Exim money. Whether or not there will be enough money to continue with the program is a matter of judgment. All we know right now is that there is not any new money in the Budget Committee recommendation for a new $300 million "war chest" that has gone forward.

If we leave the language as it came out of the Banking Committee, what we would be doing is changing the present law and funding this Mixed-Credit Program out of funds that are supposed to go to the Eximbank Direct Loan Program.

The real question that is before us, aside from the obvious jurisdictional problem, is either leave the present law where it is, with a program that has been financed out of economic support funds and some Exim funds in the hopes that the funds will eventually be there so that the program can continue or transfer the program to the Treasury Department and it would likely be funded from the Direct Loan Program by Eximbank.

It is for these reasons, therefore, because exporters are nervous about how this would be administered and funded, that I think we ought to leave the present law as it is, and that is what the amendment of the gentleman from Washington [Mr. BONKER] does.

Mr. NEAL. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I just want to make one comment, and then yield to the gentleman from New York. In response, if I may have the attention of the distinguished chairman of the Committee on Foreign Affairs, I want to point out that I chair the subcommittee that authorizes Eximbank, and three is nothing that we want to do less than weaken it. The whole reason for this is to try to appropriate some money for this Mixed-Credit Program so that it will not weaken Eximbank. So the gentleman, I know, has come over to our side, and I am grateful for his support.

Mr. FASCELL. Mr. Chairman, will the gentleman yield?

Mr. NEAL. I yield to the gentleman from Florida.

Mr. FASCELL. Mr. Chairman, I am with the gentleman. I hope that we can get the money. I just do not think that we ought to transfer it.

Mr. NEAL. Mr. Chairman, I yield 2 minutes to the gentleman from New York [Mr. LUNDINE].

Mr. LUNDINE. I thank the gentleman for yielding time to me.

Mr. Chairman, I rise in opposition to the Bonker amendment.

First, though, I would like to say that I strongly admire the work that the gentleman from Washington [Mr. BONKER] has done on this entire trade issue, and I admire the work that he has done to support exports. I just feel that we all agree that mixed credits are a problem. Our trading competitors are mixing foreign aid with export credits. It is a question of how you are going to deal with that problem.

To my friends on this side of the aisle I would like to say that the one thing that the administration wants that we on the Banking Committee decided that they ought to have is a $300 million war chest to deal with this problem of mixed credits. This amendment takes that away. If Members want only to make political points, then they should go ahead and vote against that. But if we want legislation, if we want something in there that the administration frankly wants, as well as something that we want to address our trade problems, then I think that we ought to oppose this amendment and support the program.

Mixed credits are a serious and growing problem. they have grown from $2.1 to $6.5 billion since 1980. There is no reason to take away the $300 million war chest that is in this bill in order to deal with that problem.

I think that the amendment guts the provision that would give us some capacity to deal with this offensive practice, and I urge the Members to support the real capacity to deal with our export problems and to compete with those who use this practice of mixed credits.

The CHAIRMAN. The Chair wishes to advise the gentleman from Washington [Mr. BONKER] has 5 minutes remaining. The gentleman from North Carolina [Mr. NEAL] has 2 minutes remaining, and he is entitled to close.

Mr. BONKER. Mr. Chairman, I yield 1 minute to the gentlewoman from Connecticut [Mrs. JOHNSON] for the purpose of a response.

Mrs. JOHNSON. I thank the gentleman for yielding.

Mr. Chairman, the plain, bottomline fact of the matter is that there is no $300 million war chest in the budget. There is no place to get the $300 million except from the direct loan program or some other program, and in other years there has been no willingness to appropriate $300 million from some other program. That is why we have taken the realistic approach of finding not only a source of funds but a legitimate source of funds, because most nations are using their foreign aid to couple it with the demand that the receiving countries use it to buy the providing country's projects.

When you build a powerplant in Egypt, there is no reason if American foreign aid dollars are building that powerplant, why they should not be buying the plant from our producers and our subcontractors and supporting all those jobs in America. Other nations are coupling foreign aid with development projects, and we should do no less.

Mr. BONKER. Mr. Chairman, how much time do I have remaining?

The CHAIRMAN. The gentleman from Washington [Mr. BONKER] has 4 minutes remaining.

Mr. BONKER. Mr. Chairman, I yield 2 minutes to the gentleman from Pennsylvania [Mr. RIDGE].

Mr. RIDGE. Mr. Chairman, I rise in strong support of the amendment offered by my colleague from the State of Washington and commend the gentlewoman from Connecticut for her initiative in this effort.

My colleague from Iowa suggested that there are really some very subtle differences in the committee language and in the amendment as offered, but I would suggest that there are some very real and practical differences as well.

The money that would be used to satisfy the need that this country has to address mixed-credit predatory financing from our competitors is real and alive and available through the amendment of the gentleman from Washington [Mr. BONKER]. The suggested war chest is just not available. At best, it would only be appropriated by reducing the limited funding provided in the Exim Bank, certainly not an acceptable alternative. At worst, the unfunded war chest to be used solely for negotiating is an empty and dormant threat.

If you are consistent in your belief in Gramm-Rudman, if you believe that one of the objectives in Gramm-Rudman was to find new, innovative ways to address real problems without automatically looking for an increase of funding from an additional source somewhere, then Congressman BONKER's amendment meets that objective.

Another very real difference in the two approaches is that the Banking Committee language will be used strictly to negotiate. That is the posture and the premise through which and by which the administration has suggested support.

Let me describe the negotiations. We have probably been negotiating since 1979 when the world community started using mixed credits at about $1 billion. We negotiated this year on April 17, 18, and 19 in Paris. Those negotiations failed. While we have been negotiating, the use of mixed credits internationally has gone to almost $7 billion. So if they want an effective tool that meets Gramm-Rudman objectives, then I urge my colleagues to support the amendment offered by Congressman BONKER.

The CHAIRMAN. The Chair recognizes the gentleman from Washington [Mr. BONKER], who has 2 minutes remaining.

Mr. BONKER. Mr. Chairman, I yield such time as he may consume to the gentleman from California [Mr. BERMAN].

Mr. BERMAN. Mr. Chairman, I rise in strong support of the Bonker amendment.

Mr. BONKER. Mr. Chairman, I yield myself the balance of my time.

Mr. Chairman, I shall simply close by stating what should have been obvious throughout this debate, and that is, we are not far apart on the differing versions—the banking provision and the amendment that I am offering. Those in the trade community, however, strongly support our approach, because they believe that it is more practical and will be more effectively applied if we are going to combat mixed-credit offerings from other countries.

The offensive strategy mixed credits is not sufficient. It is not sufficient to go after the French, as the author of the provision in the bill suggests. The French may concede and accept some of our reforms in the OECD but the Japanese are off doing it, and so are the others; we simply do not have enough money to bring about this offensive strategy to all recalcitrant countries.

□ 1650

Meanwhile, our exporters are losing vital contracts as they attempt to compete. They are losing these contracts because other countries are providing

this assistance that gives their companies a competitive edge.

The language of my amendment is narrowly structured so that we can effectively combat these mixed credits problems. We can do so without authorizing the $300 million that we all know does not exist, at least in this Congress.

Mr. Chairman, I urge support for the amendment.

Mr. BEREUTER. Mr. Chairman, will the gentleman yield?

Mr. BONKER. I yield to the gentleman from Nebraska.

Mr. BEREUTER. Mr. Chairman, I happen to be a member of both committees in which the debate is taking place. I strongly support the Bonker approach.

The gentleman from Pennsylvania has made important and relevant points about timeliness.

The gentlewoman from Connecticut has warned about the need for appropriations and authorizations for the $300 million and the chairman of the subcommittee has just reminded us again how important it is that we keep a defensive capacity as well as an offensive program that the administration would like.

So I urge my colleagues in this instance to support the amendment of the gentleman from Washington and I thank the gentleman for his time.

Mr. BONKER. Mr. Chairman, I thank the gentleman.

Mr. NEAL. Mr. Chairman, I must point out that in the Bonker approach, there is no money. There is absolutely no money. What we are doing is taking away authority of the Secretary of the Treasury to stop, to try to stop through negotiations, with a little power behind the negotiations, to stop this insidious practice.

There is no money in the ESF Fund. That money is called for. There is not enough to go around.

What we are trying to do here is to authorize the appropriation of some money so that we can mount a vigorous campaign.

Now, as the gentleman from Washington pointed out, the French are starting to come around. Why? They have been engaging in this practice for years. They started to come around, I think, because they saw that we had a credible threat. This amendment would destroy completely that credible threat.

Mr. LEACH of Iowa. Mr. Chairman, will the gentleman yield?

Mr. NEAL. I yield to the gentleman from Iowa.

Mr. LEACH of Iowa. Mr. Chairman, I just want to make one partisan observation, and that is that this particular provision that is in the bill was proposed by the President of the United States, and in a bipartisan fashion the distinguished subcommittee chairman, who was just speaking, advanced it through the Banking Committee and has brought it to the floor.

It is a bipartisan approach favored by the administration that is not being tampered with. That tampering is well intended, but my argument would be, stick with the President, stick with the subcommittee chairman of jurisdiction and keep the bill as it is.

Mr. NEAL. Mr. Chairman, I thank the gentleman for his comments.

I am sure it is well intentioned, just like it will be well intentioned if we said the way to solve our military problems would be to unilaterally disarm. It is a great idea. I am sure it would be well intentioned, but it is certainly clear that it will not work.

We have an approach here that we tried to get in the last Congress.

Mr. Chairman, I urge rejection of the amendment.

Mr. VENTO. Mr. Chairman, I oppose the amendment to the Export Trading Company offered by the gentleman from Washington [Mr. BONKER].

The amendment offered by Mr. BONKER amends the Federal Reserve Act and the Bank Holding Company Act. Amendments to these acts are clearly and wholly within the jurisdiction of the Committee on Banking, Finance and Urban Affairs and should certainly have been considered by the committee of jurisdiction. The Federal Reserve Act and Bank Holding Company Act provide the basic structure of the banking system in our country and before consideration on the House floor, the Committee on Banking, Finance and Urban Affairs deserves a chance to examine and act upon this legislation.

If a committee frustrates action on legislation which has broad support in the House, the Rules Committee and the rules of the House itself provide opportunities for the House to act on such legislation. However, this is not the situation the House, this committee, faces today. I do not believe that anyone has contended that the Banking Committee has frustrated attempts to consider amendments to the ETC Act. The Banking Committee is a substantial contributor to H.R. 4800 and would have considered this amendment if given a chance. Since the amendment was not considered by the appropriate committee, there remain many critical unanswered questions about the effects of this amendment.

The basic purpose of an Export Trading Company is to promote the export of U.S.-produced goods or services. To receive Export Trading Company status at least one-half of a company's revenue must be generated from the export of U.S.-produced products. The amendment today seriously would undermine this safeguard. It would allow companies to count as U.S. exports: First, trade it facilitates between two foreign countries; and second, the value of products U.S. companies accept by as payments in lieu of currency, an arrangement commonly known as countertrade.

Countertrade has a very real cost for American industry and workers. Export trading companies should be promoting the export of U.S. made goods and the importation of foreign-held U.S. dollars. By encouraging countertrade—a sophisticated form of barter—this amendment turns logic on its head. It allows companies to receive the benefit of Export Trading Company status by giving them credit for the importation of foreign products costing the loss of American jobs and industry. The countertrade provision of this amendment defeats the basic purpose of this legislation and of the Export Trading Company Act.

The gentleman may know that the Banking Committee has been concerned about the effects of countertrade for several years. Indeed the committee recently received the first of two reports on the effect of countertrade. I would counsel my friend from Washington that this amendment which promotes countertrade is definitely premature, considering that there are very real and very serious concerns about the displacement of U.S. goods, the loss of U.S. jobs, and the loss of U.S. markets as a direct result of countertrade agreements.

I would also point out that the amendment is inconsistent with other provisions of the legislation. One of the principal objectives of the trade negotiations required by H.R. 4800 is to reduce the incidence of countertrade and its harmful effect on U.S. goods and services. It would send mixed signals to our trading partners and to our own domestic industries to be encouraging countertrade by this amendment and yet negotiating to reduce countertrade as required by section 152(b)(11).

The amendment also alters the relationship between bank holding companies and its affiliates. This amendment would exempt loans and transactions with an Export Trading Company from section 23A. Current law only provides seven exemptions for the safest and most heavily secured transaction, typically secured by U.S. securities of a value greater than the value of the transaction. Certainly financing exports via the amendment is not of the same low risk nature as the current limited exemptions. This is a change which could have significant safety and soundness risk to the U.S. banking system through this uncontrolled holding company, Export Trading Company facilities.

Mr. Chairman, the amendment is fatally flawed on jurisdictional grounds and certainly in substance. I urge my colleagues to defeat this amendment.

The CHAIRMAN. Under the rule, all time for debate on this amendment has expired.

The question is on the amendment offered by the gentleman from Washington [Mr. BONKER].

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. BONKER. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 248, noes 166, not voting 19, as follows:

[Roll No. 137]

The Clerk announced the following pair:

On this vote:

Mr. Gephardt for, with Mr. Rudd against.

Mr. SCHUMER and Mr. VOLKMER changed their votes from "aye" to "no."

Messrs. MADIGAN, SILJANDER, BOULTER, COBLE, MANTON, TAUKE, BROOMFIELD, and BARTLETT changed their votes from "no" to "aye."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. BONKER

Mr. BONKER. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment offered by Mr. BONKER: Add the following at the end of title IV (page 324, after line 18):

Subtitle E—Export Trading Companies

SEC. 481. EXPORT TRADING COMPANIES.

(a) REPORT ON EXPORT TRADING COMPANIES.—The Export Trading Company Act of 1982 (15 U.S.C. 4001 et seq.) is amended by inserting after section 104 the following new section:

"SEC. 105. REPORT ON EXPORT TRADING COMPANIES.

"Not later than one year after the date of the enactment of the Trade and International Economic Policy Reform Act of 1986 and annually thereafter, the Secretary of Commerce shall submit a report to the Congress on the activities of the Department of Commerce to promote and encourage the formation of export trade associations and export trading companies. The report shall include a survey of the activities of export management companies and export trade associations, as well as an analysis of the operating experiences of those export trading companies established pursuant to this Act. The report shall not contain any information subject to the protections from disclosure provided in this Act.".

(b) DEFINITION OF EXPORT TRADING COMPANY.—Section 4(c)(14)(F)(i) of the Bank Holding Company Act of 1956 (12 U.S.C. 1843(c)(14)(F)(i)) is amended by striking "for purposes of exporting goods or services produced in the United States" and inserting "for purposes of exporting goods or services produced in the United States by that company, its affiliates, or unaffiliated persons,".

(c) DEFINITION OF PRINCIPALLY ENGAGED IN EXPORTING.—Section 4(c)(14)(F) of the Bank Holding Company Act of 1956 (12 U.S.C. 1843(c)(14)(F)) is amended—

(1) by striking the period at the end of clause (i) and inserting a semicolon;

(2) by striking "and" at the end of clause (iii);

(3) by striking the period at the end of clause (iv) and inserting a semicolon; and

(4) by inserting after clause (iv) the following new clauses:

"(v) an export trading company shall be treated as organized and operated principally for the purposes described in clause (i) if that company derives more than one-half of its revenues in each consecutive five-year period from—

"(I) the export of goods or services produced in the United States by that company, its affiliates, or unaffiliated persons, or

"(II) from facilitating the export of goods or services produced in the United States by unaffiliated persons by providing one or more export trade services; and

"(vi) for the purpose of clause (v), revenues from third party trade, and the value of goods or services taken back by the export trading company as part of a countertrade transaction, shall be treated as export revenues if such third party trade or countertrade transaction (as the case may be) involves the export of goods or services produced in the United States.".

(d) RELATIONS WITH AFFILIATES.—Section 23A(d) of the Federal Reserve Act (12 U.S.C. 371c(d)) is amended—

(1) by striking "and" at the end of paragraph (6);

(2) by striking the period at the end of paragraph (7) and inserting "; and"; and

(3) by adding at the end the following:

"(8) transactions with an affiliate which is an export trading company, as defined in section 4(c)(14)(F)(i) of the Bank Holding Company Act of 1956.".

(e) INVENTORY.—Section 4(c)(14)(A) of the Bank Holding Company Act of 1956 (12 U.S.C. 1843 (c)(14)(A)) is amended—

(1) by redesignating clauses (v) and (vi) as clauses (vi) and (vii), respectively; and

(2) by inserting after clause (iv) the following:

"(v) The Board may not impose, by regulation, a dollar limit on the amount of goods

which export trading companies may maintain in inventory; except that the Board may impose, by order, a dollar limit on the amount of goods which a particular export trading company may maintain in inventory after such company has been operating for a reasonable period of time if, under the particular facts and circumstances, it finds that such limit is necessary to prevent risks that would affect the financial or managerial resources of an investor bank holding company to an extent which is likely to have a materially adverse effect on the safety and soundness of any subsidiary bank of such bank holding company.".

The CHAIRMAN. Pursuant to House Resolution 456, the gentleman from Washington [Mr. BONKER] will be recognized for 15 minutes on behalf of his amendment, and the Chair will recognize for 15 minutes a Member in opposition to the amendment.

The Chair recognizes the gentleman from Washington [Mr. BONKER].

Mr. BONKER. Mr. Chairman, this second amendment concerns export trading companies and amends existing statutes to encourage bank holding companies to become more involved in the establishment of export trading companies.

□ 1715

Yesterday, the distinguished chairman of the Committee on Banking, Finance and Urban Affairs, the gentleman from Rhode Island [Mr. ST GERMAIN] stated on the floor during general debate that he believed it would be beneficial to all concerned if some discussions involving myself and the gentleman from Georgia [Mr. BARNARD], Mr. Volcker of the Federal Reserve Board, and the Department of Commerce, would get together to discuss further ways that we could help facilitate the involvement of banks and export activity.

I welcome the distinguished chairman's suggestion and would like to proceed in a dialog for a few moments to see if it is possible for me to withdraw my amendment.

Mr. ST GERMAIN. Mr. Chairman, will the gentleman yield to me?

Mr. BONKER. I am happy to yield to the distinguished chairman, the gentleman from Rhode Island [Mr. ST GERMAIN].

Mr. ST GERMAIN. Mr. Chairman, I am pleased to say that, again, as I said yesterday, that it would be my intent to arrange for a meeting and for discussions that would involve the gentleman from Washington [Mr. BONKER], the Federal Reserve, and I am sure the Chairman, Paul Volcker, would like to be part of this as well.

Mr. Baldrige is the gentleman who came to me originally on this legislation and I am sure he would be happy to join us, as well as the distinguished eminent gentleman from Georgia [Mr. BARNARD].

We could have discussions to determine if, by regulation, we could accomplish many of the aims of the gentleman from Washington that have been expressed in these amendments.

Mr. LEACH of Iowa. Mr. Chairman, will the gentleman yield?

Mr. BONKER. I am happy to yield to the gentleman from Iowa.

Mr. LEACH of Iowa. Mr. Chairman, I certainly appreciate the discussion that is taking place and I would hope that the two distinguished chairmen would include the minority in these discussions of legislation of such weighty significance, and I would only express my concerns that we are talking about safety and soundness in the banking system, as well as the separation of commerce and banking.

These are weighty philosophical issues and they should be carefully considered. I would hope we would have some bipartisan input on these issues as well.

Mr. ST GERMAIN. Mr. Chairman, will the gentleman yield to me?

Mr. BONKER. I yield to the gentleman from Rhode Island.

Mr. ST GERMAIN. Mr. Chairman, the gentleman from Iowa [Mr. LEACH], I am sure, realizes that the chairman of the Committee on Banking, Finance and Urban Affairs has conducted the committee with bipartisan support. This legislation originally was enacted with bipartisan support and certainly I intend to continue that and have input from the minority as well because it is always very helpful.

To go one step further, we will have these discussions and if they are not satisfactory, then the next step naturally would be hearings by the subcommittee of jurisdiction, which happily I also chair.

If necessary, we will have hearings. I have already told my staff to be geared up for this if we find that this is the step that has to be taken next. But at all times, the concern of the gentleman from Iowa [Mr. LEACH] also is my concern and that is the separation of banking and commerce.

I think that the gentleman from Washington [Mr. BONKER] has some very legitimate points that he is making and certainly we want to encourage export trading companies. We want to make sure that the lack of export trading companies to date is not due to any attitude by the regulators that has prevented them from proceeding under the legislative mandate that we adopted before.

If we need a little bit of change by regulation or if we have to amend the legislation slightly, we will do so, but we will certainly preserve the safety and soundness of the banking system as well.

Mr. BONKER. Mr. Chairman, I welcome the chairman's statement. I appreciate the spirit of cooperation and will be happy to join him in further discussions.

Mr. Chairman, I ask unanimous consent to withdraw the amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from Washington?

There was no objection.

AMENDMENT OFFERED BY MR. WYLIE

Mr. WYLIE. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment offered by Mr. WYLIE: On page 255, strike out line 16 and all that follows through the remainder of title IV and insert in lieu thereof the following (and conform the table of contents accordingly):

TITLE IV—BANKING COMMITTEE PROVISIONS

SEC. 401. EXCHANGE RATE STABILITY.

(a) FINDINGS.—The Congress finds that—

(1) the Economic Declaration of May 6, 1986, reaffirmed the support of the seven major industrialized countries for the improvement in the functioning of the world monetary and trading system;

(2) the policies adopted at earlier economic summits have helped to bring about world economic expansion, a reduction in the rate of inflation, and a shift in exchange rates which better reflect fundamental economic conditions;

(3) the implementation of new procedures, through the Group of Five and the Group of Seven Finance Ministers, for effective coordination of international economic policy should lead to smaller swings in exchange rates, the further opening of the international trading system, and the promotion of noninflationary growth;

(4) the Reagan administration has taken significant policy actions to stabilize exchange rate fluctuations and, in conjunction with the Board of Governors of the Federal Reserve System and other central banks, has succeeded in bringing down the value of the dollar in successive stages, thereby improving the competitiveness of United States exporters;

(5) the drop in oil prices has dampened a possible inflationary impulse from the falling dollar and less expensive oil with a lower dollar will mean a large improvement of the United States current account balance in the coming months;

(6) leading experts are unable to agree on what constitutes an appropriate and sustainable level for the dollar in relation to the other key countries of the world; and

(7) global leaders are divided on the need to implement a formal and highly structured exchange rate system, such as a target zone approach, but are united in their determination to better manage the system of floating rates through a policy of enhanced economic cooperation and surveillance.

(b) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) the Reagan administration has substantially reduced the value of the dollar and is successfully coordinating its economic policies to the maximum degree possible with our major trading partners;

(2) the Reagan administration should continue the progress achieved in the recent Tokyo Economic Summit and in the Group of Five initiative last year to promote long-term exchange rate stability and sustain noninflationary economic growth; and

(3) any congressional action on the exchange rate issue at this time is unneeded and potentially harmful in that it might

further weaken the dollar and stimulate inflation.

SEC. 402. DEBT RESOLUTION.

(a) FINDINGS.—The Congress finds that—

(1) the Reagan administration, under the leadership of Secretary of the Treasury James A. Baker, has put in place a comprehensive debt strategy in coordination with other industrialized countries, the International Monetary Fund, and the World Bank;

(2) The Tokyo Economic Declaration of May 6, 1986 reaffirms the importance of the so-called "Baker Plan" which, under a framework of structural and policy reforms aimed at economic growth, would provide additional public and private resources for the largest debtor nations;

(3) this initiative reinforces, and in no way replaces, the continued need for a case-by-case approach to the international debt problem;

(4) the administration's debt strategy will over time increase United States exports to those developing countries which have been most affected by the debt crisis;

(5) the leading industrialized countries should maintain and, where appropriate, expand bilateral and multilateral financial flows to developing countries and in return, recipient countries must continue to carry out structural adjustment policies coupled with international capital repatriation and domestic capital mobilization measures;

(6) there is an immediate need to improve the climate for foreign direct investment in developing countries and to promote more open trading policies;

(7) all multilateral development bank lending should continue to be measured against stringent economic performance criteria; and

(8) there is a need for closer cooperation between the World Bank and the International Monetary Fund, for increased commercial bank lending, and for flexibility in rescheduling debts.

(b) SENSE OF CONGRESS.—It is the sense of the Congress that—

(1) the Reagan administration should continue to have the maximum amount of discretion and flexibility in implementing its cooperative debt strategy and

(2) the objectives of such a strategy should continue to emphasize the need for adjustment policies and sound economic planning in developing countries to promote sustained, noninflationary economic growth.

SEC. 403. COMPETITIVE TIED AID FUND.

The Export-Import Bank Act of 1945 (12 U.S.C. 635 et seq.) is amended by adding at the end thereof the following new section:

"SEC. 15. COMPETITIVE TIED AID FUND.

"(a) FINDINGS.—The Congress hereby finds that—

"(1) tied and partially untied aid credits offered by other countries are being used in a predacious manner to distort competitive markets and undercut American exporters;

"(2) the predacious use of tied and partially untied aid credits undermines export credit discipline under the Arrangement of Guidelines for Officially Supported Export Credits established through the Organization for Economic Cooperation and Development; and

"(3) the establishment of a temporary Competitive Tied Aid Fund in the Treasury of the United States to target the export markets of countries which exploit or abuse tied or partially untied aid credits for commercial purposes and which impede progress in negotiating greater discipline over the use of such credits will facilitate negotiations to eliminate the use of such credits for commercial purposes and will thereby help protect American exporters from unfair and predacious official export competition.

"(b) COMPETITIVE TIED AID FUND.—

"(1) ESTABLISHMENT BY SECRETARY OF THE TREASURY.—In order to provide a means for inducing other countries to pursue negotiations on a comprehensive arrangement to restrict the use of tied aid and partially untied aid credits for commercial purposes, the Secretary of the Treasury shall establish a fund in the Treasury of the United States to be known as the 'Competitive Tied Aid Fund', consisting of such amounts as may be appropriated to the Fund.

"(2) EXPENDITURES FROM FUND.—Amounts in the Fund may be used to supplement the financing of United States exports to foreign markets which are actual or potential export markets for any country which—

"(A) engages in predacious official export financing through the use of tied or partially untied aid credits; and

"(B) impedes negotiations to eliminate the use of such credits for commercial purposes.

"(3) ADDITIONAL REQUIREMENTS.—In carrying out this section, the Secretary—

"(A) should avoid using the total amount in the Fund to provide financing for only 1 or 2 export projects;

"(B) should seek to use amounts in the Fund to make financing available only for United States exports that would be reasonably competitive in the absence of the predatory export financing practices of the other country; and

"(C) shall ensure that amounts in the Fund are used only to assist exportation by persons described in paragraph (1), (2), or (3) of section 238(c) of the Foreign Assistance Act of 1961 (22 U.S.C. 2198(c)).

"(4) CONSULTATION WITH ADVISORY COUNCIL.—The Secretary shall consult with the National Advisory Council on International Monetary and Financial Policies in—

"(A) determining the foreign countries which offer predacious tied or partially untied aid credits and which impede negotiations to restrict their use to legitimate foreign aid; and

"(B) reviewing proposed transactions under this section.

"(5) POLICY AND PROCEDURE GUIDELINES.—The Secretary shall establish policy and procedure guidelines for the development and implentation of the Fund. In establishing such guidelines, the Secretary shall—

"(A) devise a method for determining the number of American jobs which will be created or retained through assistance from the Fund, and give such factor consideration in making assistance available; and

"(B) describe the method of publicizing the availability of assistance from the Fund, and the terms and conditions under which such assistance is available to both large and small exporters.

"(c) DEFINITIONS.—For purposes of this section—

"(1) TIED AID AND PARTIALLY UNTIED AID CREDIT.—The term 'tied aid credit' and 'partially untied aid credit' means any official credit which has a grant element greater than zero percent, as determined by the Development Assistance Committee of the Organization for Economic Cooperation and Development, and which is, in fact or in effect, tied to—

"(A) the procurement of goods or services from the donor country, in the case of tied aid credit; or

"(B) the procurement of goods or services from a restricted number of countries, in the case of partially untied aid credit.

"(2) SECRETARY.—The term 'Secretary' means the Secretary of the Treasury.

"(3) FUND.—The term 'Fund' means the Competitive Tied Aid Fund established pursuant to subsection (b)(1).

"(d) REPORT TO CONGRESS.—The Secretary shall transmit to the Congress, on a quarterly basis, a report setting forth the activities carried out under this section. Each such report shall include—

"(1) information on applications used by the Secretary for making assistance available under subsection (b)(2);

"(2) information on the disposition of such applications;

"(3) an identification of the foreign governments whose behavior the Secretary is trying to influence by the use of such assistance, and an explanation of why the assistance involved is deemed likely to influence that behavior;

"(4) evidence that clearly demonstrates that assistance under subsection (b)(2) has been used for the purposes of this section;

"(5) information on any progress that has been made in negotiations on agreements within the Organization for Economic Cooperation and Development to limit the use of tied aid credits and partially united aid credits;

"(6) information on the extent to which tied aid credits and partially untied aid credits are being used at the time of such report by major trading countries within such Organization, the terms of such any credits, and the market sectors with respect to which such credits are being used; and

"(7) information on the extent to which assistance under this section has been effective—

"(A) in discouraging the use of tied aid credits and partially untied aid credits for commercial purposes by other countries; and

"(B) in helping to protect United States exporters from unfair and predacious official export competition.

"(e) AUTHORIZATION OF APPROPRIATIONS.—

"(1) IN GENERAL.—There is hereby authorized to be appropriated to the Fund for the fiscal year beginning on October 1, 1986, $300,000,000. Except as provided in paragraph (2), such sums shall remain available until expended.

"(2) RESCISSION AUTHORITY.—

"(A) DETERMINATION BY PRESIDENT.—If the President determines that any amount appropriated to the Fund is not required to achieve the purpose of the Fund, the President shall transmit a special message of such determination to the Congress in the manner provided in section 1012(a) of the Impoundment Control Act of 1974.

"(B) SPECIAL MESSAGE.—Any message under this paragraph shall be treated as a special message under such section for purposes of such Act.

"(f) EXPORT-IMPORT BANK.—

"(1) IMMEDIATE IMPLEMENTATION.—Until such time as the funds authorized to be appropriated under subsection (e) become available for expenditure, the Bank shall make aggressive use of the Bank's authority to offer tied aid credits, in accordance with any recommendation of the Secretary of the Treasury as to how such credits could most effectively and efficiently promote the purposes of this section.

"(2) SUBSEQUENT REIMBURSEMENT.—The Bank shall be reimbursed for the cost of any tied aid credits the Bank authorizes

pursuant to this subsection from the appropriated funds authorized by this section, when such funds become available.".

SEC. 404. LOAN GUARANTEES TO PROMOTE EXPORTS FROM SMALL, MEDIUM-SIZED, AND MINORITY BUSINESSES OR AGRICULTURAL CONCERNS.

(a) SHARE OF LOAN GUARANTEES.—Section 206 of the Export Trading Company Act of 1982 (12 U.S.C. 635a-4) is amended by striking out "major share" in the next to the last sentence and inserting in lieu thereof "significant share".

(b) REPORT.—Not later than one year after the effective date of this section, the Board of Directors of the Export-Import Bank shall report to the Congress on the implementation of the amendment made by subsection (a).

(c) EFFECTIVE DATE.—The amendment made by subsection (a) shall take effect on the first day of the first fiscal year beginning after the date of the enactment of this Act.

SEC. 405. ENHANCED PROCUREMENT OPPORTUNITIES AT THE MULTILATERAL DEVELOPMENT BANKS.

(a) PROJECTS IN RECIPIENT COUNTRIES.—The United States Executive Director of each of the multilateral development banks shall promote procurement opportunities relating to the assistance provided by such banks in recipient countries for United States firms. In promoting procurement opportunities, each such Executive Director shall—

(1) keep United States firms fully informed of bidding opportunities in recipient countries and publicize such opportunities to the greatest extent possible;

(2) assist United States firms in focusing on those projects in which they have a particular interest or competitive advantage;

(3) when appropriate and required, assist United States firms in completing and submitting accurate and timely bidding documents;

(4) thoroughly investigate complaints regarding the awarding of contracts; and

(5) ensure that contract procedures and rules are strictly observed.

(b) ASSIGNMENT OF FOREIGN COMMERCIAL SERVICE OFFICERS.—

(1) WORLD BANK.—The Secretary of Commerce should continue to assign one foreign commercial service officer to the office of the United States Executive Director of the International Bank for Reconstruction and Development.

(2) OTHER MULTILATERAL DEVELOPMENT BANKS.—The Secretary of Commerce shall assign on a part-time basis—

(A) one foreign commercial service officer to the office of the United States Executive Director of the Inter-American Development Bank;

(B) one foreign commercial service officer to the office of the United States Executive Director of the Asian Development Bank; and

(C) one foreign commercial service officer to the office of the United States Executive Director of the African Development Bank.

(3) DUTIES.—Each foreign commercial service officer assigned under this subsection shall assist the Executive Director in the performance of the duties described in subsection (a).

SEC. 406. MULTILATERAL DEVELOPMENT BANK POLICIES TO PROMOTE FAIR TRADE AND INVESTMENT.

(a) FINANCIAL ASSISTANCE POLICIES TO PROMOTE FAIR TRADE AND INVESTMENT PRACTICES.—

(1) INSTRUCTIONS TO EXECUTIVE DIRECTORS.—The Secretary of the Treasury shall instruct the United States Executive Directors of the International Bank for Reconstruction and Development and the regional development banks to initiate a wide consultation with the presidents of their respective institutions with regard to the development of financial assistance policies which, to the maximum feasible extent—

(A) reduce obstacles to and restrictions on international trade and investment in goods and services;

(B) eliminate unfair trade and investment practices; and

(C) promote mutually advantageous economic relations.

(2) COORDINATION WITH TRADE POLICY COMMITTEE.—The Secretary of the Treasury shall work closely in this effort with the Trade Policy Committee.

(3) COORDINATION WITH GATT.—As part of this effort, the Secretary of the Treasury shall also instruct the United States Executive Director of the International Bank for Reconstruction and Development to encourage close cooperation between the staff of the Bank and the Secretariat of the Contracting Parties to the General Agreement on Tariffs and Trade (GATT).

(b) FAIR TRADE AND INVESTMENT PRACTICE PROVISIONS IN COUNTRY LOAN AGREEMENTS.—

(1) INSTRUCTIONS TO WORLD BANK EXECUTIVE DIRECTOR.—The Secretary of the Treasury shall instruct the United States Executive Director of the International Bank for Reconstruction and Development to work to have the Bank obtain, prior to the extension to any country of loans by the Bank, the agreement of such country to eliminate (in a manner consistent with such country's balance of payments adjustment program) unfair trade and investment practices with respect to goods and services which the United States Trade Representative, after consultation with the Trade Policy Committee, has determined have a significant deleterious effect on the international trading system.

(2) UNFAIR TRADE AND INVESTMENT PRACTICES DEFINED.—Unfair trade and investment practices include—

(A) the provision of predatory export subsidies, employed in connection with the exporting of agricultural commodities and products thereof to foreign countries;

(B) the provision of other export subsidies, such as government subsidized below-market interest rate financing for commodities or manufactured goods;

(C) unreasonable import restrictions;

(D) the imposition of trade-related performance requirements on foreign investment; and

(E) practices which are inconsistent with international agreements.

(c) DIRECTIONS TO UNITED STATES EXECUTIVE DIRECTORS OF MULTILATERAL DEVELOPMENT BANKS.—The Secretary of the Treasury shall instruct the United States Executive Directors of the multilateral development banks to ensure that project loans by the respective multilateral development banks for commodities, materials, or products do not contribute to a surplus in world markets in which—

(1) the prices of such commodities, materials, or products are low or are falling; and

(2) the commodities, materials, or products could cause material injury to United States producers of the same, similar, or competing commodities, materials, or products.

The CHAIRMAN. Pursuant to the provisions of House Resolution 456, the gentleman from Ohio [Mr. WYLIE] will be recognized for 30 minutes and a Member opposed will be recognized for 30 minutes.

The Chair advises Members of the House that this will be the final amendment to be acted upon this evening.

The Chair recognizes the gentleman from Ohio [Mr. WYLIE].

Mr. WYLIE. Mr. Chairman, I yield myself 4 minutes.

Mr. Chairman, it seems to me that the authors of title IV have given up on the free enterprise system just at a time when it seems to be working so well. The title does three things which lead me to this conclusion.

First, it would establish a new bureaucracy called the Council on Industrial Competitiveness which, by definition and responsibilities, would be in effect a central economic planning council. The Council would cost $25 million to create in the first year; and $139 million over a 5-year period, according to the Congressional Budget Office. This new bureaucracy would have the power to review all private sector requests for government assistance of any kind, including farm loans, Eximbank loans, and other loans which come from the Federal Government, which might have some impact on international trade. I doubt if the farm community will be happy when they learn that a farmer might have to get another bureaucratic approval for price support money or other farm loans on the condition that farmers will be "internationally competitive in the future." I would think this would be particularly troublesome at a time when there is enough stress in the farm community.

Second, the title calls for the creation of a new World Bank, within the World Bank. This new entity would lend up to $5 billion to lesser developed countries to stimulate their economy, with the remote hope that they would buy American-made products. There is nothing to prevent the LDC's from using the money to buy from Japan, Taiwan, South Korea, or any other country.

Another major thrust of title IV is to encourage more and faster World Bank lending. At a time, when the World Bank has the ability to increase its lending by roughly $2 billion per year for the next 3 years, we do not need these new lending provisions.

In addition, Treasury objects to this proposal because it could raise the cost of borrowing money for use by the World Bank.

□ 1725

Third, the title would create a new, unnecessary fund; the strategic currency reserve fund, with the existing

exchange stabilization fund, whose purpose would be to intervene in the currency markets to buy and sell dollars, yen, deutsche marks, or whatever in the hope of manipulating the value of the dollar.

At best it is redundant. The existing exchange stabilization fund has over $12 billion in assets, and for the first time ever, there would be tinkering by committees of Congress as to how and at what price the value of the dollar should be fixed.

My substitute would eliminate these unnecessary bureaucracies and unproductive government intervention. It would retain the good part of title IV, to wit: The bipartisan competitive tied-aid fund to combat unfair trade financing practices, which has been signed off on by the administration.

I know that if our constituents were polled on title IV, and really, I have not received a single letter in favor of title IV, they would tell us that they do not favor a new bureaucracy, more deficit spending, or a new World Bank Bank.

The CHAIRMAN. The time of the gentleman has expired.

Mr. WYLIE. Mr. Chairman, I yield myself 1 additional minute.

Mr. Chairman, I urge an aye vote on my amendment because it is a responsible vote, and it is also good politics, I would say to the Members.

Mr. WYLIE. I yield such time as he may consume, to the gentleman from Oklahoma [Mr. JONES].

Mr. JONES of Oklahoma. Mr. Chairman, I rise in support of your amendment, but I do so with deep reservations.

I oppose the language in the bill creating a new super World Bank and a new World Bank bureaucracy.

I oppose bailing out big banks that have pursued questionable lending practices in the Third World and now want us to bail them out when the borrowers can't pay.

This administration has opposed many of my efforts to get eased loan terms for Oklahoma farmers who have fallen on hard times. Why should our tax dollars go to help powerful bankers collect on their loans to Latin America?

Unfortunately, the Wylie amendment does not simply strike this World Bank language. This amendment praises the President's efforts, and those of Treasury Secretary Baker, to help restructure Third World debt.

Their efforts should not be praised—they should be denounced. The Baker plan has resulted in anti-American lending policies which encourage, for example, Argentina to export more beef and wheat.

The World Bank is lending Argentina $350 million to compete with Oklahoma's two greatest argicultural sectors, and our tax dollars are supporting that loan.

Again, Mr. Chairman, I support this amendment because the language in the bill must be struck. But I oppose any support whatsoever for the Reagan-Baker bailout of spendthrift money center banks. The Baker plan is as unacceptable as the World Bank provisions in this bill.

Mr. WYLIE. Mr. Chairman, I thank the gentleman very much for his support, and I know that will go a long way to helping me win it.

Mr. Chairman, I reserve the balance of my time.

The CHAIRMAN. Does any Members seek time in opposition to the amendment?

Mr. LUNDINE. I do, Mr. Chairman.

The CHAIRMAN. The gentleman from New York [Mr. LUNDINE] is recognized for 30 minutes.

Mr. LUNDINE. Mr. Chairman, I yield 4 minutes to the gentleman from New York [Mr. LAFALCE] the chairman of the Subcommittee on Economic Stabilization.

Mr. LAFALCE. Mr. Chairman, I think the primary issue before all of us in consideration of this entire bill is how we can best address the problem of the burgeoning U.S. trade deficit.

When I first began examining the subject myself, at the beginning of 1983, as chairman of the Committee of Economic Stabilization, that previous year we had a trade deficit of approximately $40 billion. We heard many expert witnesses give dire predictions that unless some agressive action was taken, some appropriate aggressive action, that trade deficit might well increase in a matter of years to about $150 billion.

We were faced with almost total inactivity from that time to the present and, as a matter of fact, our trade deficit, as we are painfully aware of now, is $150 billion.

Well, confronted with the question, "What should we do about it?" We can take the laissez-faire approach and say "Do virtually nothing. Leave it to the magic of the marketplace and all will be well."

Well, American industry and American jobs have been decimated and are being decimated. We can take another approach. That is an approach advocated by many and practiced by some who oppose it theoretically; and that is the approach of protectionism.

Even the Reagan administration, an ardent theoretical foe of protectionism, has in fact resorted to it in a number of instances. I believe that pure and simple protectionism can be self-defeating, if not in the short term, certainly in the long term.

I think there is a third approach, and that approach is to enhance our competitiveness. Now, that is easy to say and virtually all can agree; and the question is: How do you enhance your competitiveness? I think there are a great many things we need to do.

We need to take better macroeconomic approaches; we need to take better microeconomic approaches. Now, insofar as macroeconomics are concerned, we have to concern ourselves about fiscal policy. That was not particularly within the purview of the Committee on Banking.

We also have to concern ourselves with monetary policy, both domestic and international. I think the Competitive Exchange Rate Act is an excellent macroeconomic approach. I think the Competitive Exchange Rate Act rejects the approach of the Reagan administration for the first 4½ years of its existence when it said, "The overvalued dollar is a good thing." It rejects the approach of Secretary of the Treasury Donald Regan and it really embraces the approach of Secretary of the Treasury Jim Baker, and mandates that the Baker approach be carried out in the future and that he report to us periodically.

In microeconomics, though, there are a good many individuals, including President Reagan's own Commission on Industrial Competitiveness, who believe that we have terrible coordination amongst existing agencies, amongst the private and the public sector.

Mr. WYLIE. Mr. Chairman, I yield 6 minutes to the distinguished gentleman from New York [Mr. KEMP] who has been a real leader on the subject of exchange rate stability and is in favor of the amendment.

Mr. KEMP. Mr. Chairman, I rise in strong support of my colleague's amendment. I find myself at odds with two friends on the other side of the aisle with districts that are contiguous to mine, and who have similar problems in the trade area.

I rise in strong support of the Wylie amendment for several reasons, notwithstanding the problems which need to be addressed. Personally, I take a back seat to no one with regard to my desire or my efforts to get this administration to move toward coordinating those fiscal and monetary policies important to bringing more stability to not only exchange rates, but also to trade policies of ourselves and other countries.

That is why I worked last year with other members of the Subcommittee on Foreign Operations to block supplemental appropriations for the multilateral development banks. We got the administration's attention, and an agreement—that the United States would place greater emphasis on lending policies that would mean greater economic growth—and better markets for U.S. exports.

That really, I would say to my friend, Mr. LAFALCE, is not as much the issue as is the fact that setting up a national industrial policy planning board is not the direction in which we

should move. I say that, again with great respect for my friends on the other side of the aisle, that it is my sincere belief that it is not laissez-faire to turn against a policy that has driven the European economies toward stagnation, toward the failure to create the entrepreneurial climate that is so important to creation of jobs.

It is hard to remember that only a year ago the world was trapped by the Feldstein-Stockman theory that interest rates and exchange rates were solely determined by budget deficits. This year the world—and the gentleman from Niagara Falls alluded to this—the world is observing that central banks, including our own, can lower interest rates and stabilize the value of a currency by actively intervening in those foreign and domestic currency markets.

That is a major change by this administration. It should be encouraged, and I applaud the efforts of those who are bringing attention on both sides of the aisle to this problem, as does Mr. WYLIE. He calls for a sense-of-Congress resolution that the administration move as quickly as possible to continue its progress toward exchange rate stability. That is something that I have worked for. I think other Members, the Senator from New Jersey, Mr. BRADLEY, the gentleman from New York and others, all agree.

The problem is, that the amendment of the majority party sets up a $25 million permanent bureaucracy in Washington—the Council on Industrial Competitiveness—to decide who ought to get more favorable treatment in terms of the private sector. We do not need another bureaucracy. That is not what the American people are asking of Congress, to set up what I consider to be a step in the direction of national industrial planning, something that will not boost trade.

Second, the amendment creates, as the gentleman from Ohio pointed out, a new entity at the World Bank. The World Bank does not need any few facilities. It already is large enough. To add another $5 billion World Bank facility on top of the World Bank is to use, in my view, U.S. tax dollars ultimately which will finance the bank's promotion of competition with U.S. industry and jobs.

□ 1735

I cannot imagine why we need to set up another World Bank facility. They have already been loaning money to Third World countries to build airports, airlines, steel mills, factories to compete with those that are in the districts of the three of us, I might say to my friends who are still on the floor.

And let's keep in mind that the majority of these loans do not go to the private sector, but rather to foreign governments to set up state controlled businesses. These industries are free of any market forces, and like any bureaucracy they will do anything to survive, including establishing trade barriers to U.S. products.

Not too long ago, the House of Representatives passed a budget resolution supported by the majority party that slashed defense, and raised taxes on the American people. And now they wish to give $5 billion to the World Bank. That money can better be used in the United States to cut taxes and create jobs.

H.R. 4800 also establishes a Strategic Currency Reserve. Now it is the honest view of many Members that if we have a facility in our own Treasury or in the U.S. Government the Economic Stabilization Fund—we can use it to intervene to create more currency stability.

I favor stability, but I question the idea of setting up in the United States a fund which will be financed by taxpayers—or at least the credit sources of western banks—to defend foreign currencies against the unsound monetary policies of other nations.

Correct me if I am wrong, but if a government is allowing its currency to devalue, we then would intervene.

Mr. LAFALCE. I was not going to but——

Mr. KEMP. Just let me finish my question.

Mr. LAFALCE. The gentleman said, "Correct me if I am wrong."

Mr. KEMP. But let me at least finish, the question was rhetorical, but I should have time to at least get the question out, I may say to my friend.

We would be intervening to buy the currency of a foreign government which we think is at a level that enables them to gain unfair trade advantage against products the United States produces. I personally find it inconceivable that we are going to put together an exchange rate stabilization fund to intervene in foreign exchange markets to defend countries who are using their currencies, according to the IMF, to gain more exports in the market. What we could have is a situation where the IMF, financed by the U.S. taxpayer, will as it has done in the past tell Third World governments to devalue their currencies to boost their exports, and then the United States is going to intervene and defend their currency against the very advice they are getting from the IMF and World Bank, which will in turn have a new facility. It is outrageously Rube Goldbergish and has little to do with promoting U.S. trade.

I suggest we should support the gentleman from Ohio's amendment which will have the effect of striking the $5 billion World Bank facility, the Strategic Currency Reserve Fund, and the Council on Industrial Competitiveness. The American people needs less government and more jobs, not the opposite.

The CHAIRMAN. The time of the gentleman from New York [Mr. KEMP] has expired.

Mr. LUNDINE. Mr. Chairman, I yield myself 1 minute. I do so in order to say to my friend from western New York that he is incorrect. We already have an exchange stabilization fund for the purpose of conducting international monetary operations, and all the currency exchange reserve is designed to do is to allow for greater stability and greater capacity to carry out what the Secretary of the Treasury—I thought with his support, and certainly with mine—was already undertaking, which was to stabilize and make more reasonable the value of the dollar.

Mr. KEMP. Mr. Chairman, would the gentleman yield for a question?

Mr. LUNDINE. I will give the gentleman the same courtesy that he gave to the gentleman from New York [Mr. LAFALCE].

Mr. KEMP. I want to say to my friend that I did try to yield to him.

Mr. LUNDINE. Well, whatever I have left of my 1 minute, the gentleman is welcome to.

Mr. KEMP. Are we going to use the money to defend the dollar or the French franc?

Mr. LUNDINE. The U.S. dollar has been overvalued.

Mr. KEMP. That is true.

Mr. LUNDINE. By more than 50 percent.

Mr. KEMP. That is true, but whose currency are we going to defend?

Mr. LUNDINE. Mr. Chairman, I yield 3 minutes to the gentlewoman from Ohio [Ms. OAKAR].

Ms. OAKAR. Mr. Chairman, I rise in opposition to the Wylie amendment. I have a lot of respect for my colleague from Ohio, as he knows, for him, but he is, however, absolutely dead wrong with this amendment. This is perhaps one of the most important sections of the bill. So I hope that you take a look at what the Wylie amendment is trying to do.

Now, if you are concerned about the international debt and the burdens which have closed markets to U.S. firms and caused more than 1 million jobs from lost exports, you will vote against the Wylie amendment. If you are concerned about the fact that our companies are not necessarily informed of the bidding opportunities for contracts in countries receiving these loans, and if you are concerned about helping U.S. firms with contracts for their products so that they have a competitive advantage, you will vote against the Wylie amendment. If you are concerned with the sound fundamental economic policy that will reduce the economic debt accumulated

by these developing nations, you will vote against the Wylie amendment.

No trade measure would be complete without addressing the severe economic consequences of international debt among these developing nations.

Continuing the policies of providing loans on demand will no longer work.

Almost 40 percent of our exports now go to developing nations that are heavily in debt. The Wylie substitute will allow the mistaken policies of international lending to continue to the detriment of not only the developing countries but to the detriment of our own people, our own American businesses, which cost us jobs.

In addition, I want to make reference to the part of the bill that relates to the committee chaired by Mr. LAFALCE. We created, and due to the chairman's work, the council that would be comprised of every different group, business, labor, government, to cooperate and coordinate our activities so that we can be more competitive in the world market. We are one of the few countries where, frankly, at times our business and labor community and government do not go in sync so we can all really progress toward ending this terrible trade deficit.

So if you are concerned about the debt accumulation of these Third World countries, if you are concerned about our enormous deficit because of this problem, if you are concerned about becoming truly more competitive in the world, then you will absolutely positively vote against the Wylie amendment, which attempts to gut all the efforts of this committee and Mr. LUNDINE's efforts.

Mr. WYLIE. Mr. Chairman, I yield myself 30 seconds.

Mr. Chairman, I do not know how we are going to save American jobs by adding $5 billion to a new World Bank or by creating a new central economic planning council, I would submit.

Mr. Chairman, I yield 4 minutes to the gentleman from California [Mr. SHUMWAY].

Mr. SHUMWAY. Mr. Chairman, I appreciate the gentleman from Ohio yielding me this time, and I rise in strong support of his amendment and in strong opposition to the banking provisions which are now contained in title IV of this legislation.

I have now served as ranking member, ranking minority member on the Economic Stabilization Committee for the past almost 4 years. During that time, Chairman LAFALCE and I have enjoyed having several hearings into the subject, first, of industrial policy, more recently into what might make American industry more competitive in the world of nations.

Time and again we have had witnesses come before us who have defended, on the one hand, the free enterprise system or have said it does not work and we need to set up some kind of a central planning bureau to better set the tone for competitiveness in American industry.

I agree with the chairman that indeed one of the prime issues before us today is, how do we best address this matter of a trade deficit? How do we enhance, using his words, competitiveness? I would suggest to Members that we do not enhance the effort of our industry by enhancing the bureaucracy in creating this new Commission, which has already been described by prior speakers.

We recognize that there are changing dynamics in the international marketplace; we recognize there are some governments that have made deliberate efforts to restrain free and fair trade. We recognize that some of our own industries have not been competitive for reasons of our own. But I think we will succumb to a delusion if we somehow believe that these and other evils that may confront our ability to compete are going to be resolved by the creation of another bureaucracy. That is exactly what this legislation would do. A $25 million permanent bureaucracy known as the Council on Industrial Competitiveness.

Had the Rules Committee been more lenient in giving us a rule for today's debate, I would have offered an amendment to change the title of this to "Central Planning Bureau" because that would be a more fitting description as to what this council is intended to do. This is supposed to provide a forum for the principal players in the economic game, government, business, labor, and academia, so they could somehow mull through the muddle of our macroeconomic policies and rationally and coherently design the winning game plan for the economy. I suggest to Members that that is simply blue smoke and mirrors, and I hope Members of the House do not buy that line.

Indeed, it is reminiscent of the managed economy that we see in Japan. Some people, I believe, would like us to have the same kind of control over our economy as MITI does in that country. I would suggest to Members that it is wrong for us to give the Government the ability to pick winners and losers, to ascribe to a council the kind of political motivation and distortion that would come from political clout within the industrial community.

The council's role extends far beyond the realm of simply being an adviser or a micromanager because it is empowered to review all private sector requests for Government assistance of any kind and to make recommendations as a condition of that assistance.

I suggest to Members that an unprecedented sweep of authority, in effect, would give the council control over such parts of our economy as the Fed's discount window loans, Eximbank loans, HUD loans to the poor and the elderly, Trade Act relief measures for manufacturers, student loans, farm loans, and many, many others. It is costly, it is unnecessary, it duplicates services already performed by the Commerce Department and other agencies of the Government. We simply have a responsibility to not direct the activities of the private sector but to streamline our own processes of Government and create an environment in which the individual and collective talents of the private sector can be focussed to meet the competitive challenges facing our economy. The council does not do this.

For these reasons, I urge my colleagues to join me in opposing H.R. 4800.

Mr. LUNDINE. Mr. Chairman, I yield 3 minutes to the gentleman from Michigan [Mr. BONIOR].

Mr. BONIOR of Michigan. I thank the gentleman for yielding time to me.

Mr. Chairman, I rise in opposition to the substitute and in strong support of the Banking Committee title.

Mr. Chairman, the signs of America's industrial problems are not hard to find.

Last month's record trade deficit was merely the latest in a long string of records that have seen our manufacturing trade deficit increase fivefold in just 3 years.

Real wages for American workers grew steadily from World War II through 1973. Since then, they have declined.

Today, wages have dropped to the 1962 level. The American standard of living has been set back a quarter of a century.

Yes, we have come a long way since the bitter days of the last recession, the deepest since the Great Depression. Areas like my home State of Michigan, which was among the hardest hit, can proudly claim to have come back the farthest, to have worked a miracle of economy recovery.

Yet that good news cannot cloud the hard fact that today, far into the recovery, our annual national unemployment rate is still higher than at any time during the entire decade—of the 1960's.

We have reason to be proud, but much work yet to do.

This old system that pits labor and management against each other, and Government against both, can no longer work. In the New World marketplace we have to learn to work together, or we will be passed by those countries that already do.

I am particularly proud that the Banking Committee has included in the trade bill the council on industrial competitiveness, a measure based on legislation first introduced 4 years ago by the gentleman from New York [Mr.

LUNDINE], the gentleman from Indiana [Mr. HAMILTON], and myself.

Cooperation has worked for our industrial competitors like Japan where business, labor, Government, consumer, and academic leaders come together through their industrial structure council to forge a concensus for the future.

And it can work in America.

We saw the fruits of cooperation in the Chrysler Corp. where management, labor, and Government worked together, making shared sacrifices, saving a great American corporation and saving hundreds of thousands of jobs in communities across our country.

Mr. Chairman, over the last several decades, small yearly declines in economic performance have slowly eroded America's industrial strength. In increments almost too small to notice, we have lost our competitive edge in the world marketplace.

At each point, our Nation had the chance to chose growth, yet at each point we delayed. And today again, there are those who chose to deny the facts and embroil the debate in long outdated idealogy.

The council is attacked as State planning, when in fact the council will be controlled by private sector leaders and its decisions will bind no one.

The council is attacked as "targeting winners and losers," when in fact the council will control no resources, make no loans.

What the council does do is to provide our Nation with a forum where we can come together, find the facts and then face them, a place where we can forge a consensus for competitiveness and growth.

I urge the House to reject the Wylie substitute and adopt the Omnibus Trade Act.

□ 1750

Mr. WYLIE. Mr. Chairman, I yield 1½ minutes to the gentlewoman from New Jersey [Mrs. ROUKEMA].

Mrs. ROUKEMA. Mr. Chairman, I rise in support of the Wylie substitute to the banking section of the trade bill. This country doesn't need the extra layers of bureaucracy and red tape in the bill's banking section. The creation of the Council on Industrial Competitiveness alone would be reason to oppose this section. And there are other reasons.

The Wylie substitute responsibly sets forth congressional intent for our international lending policies without handcuffing the administration to legislative mandates which may not be right for each and every economy and situation with which it must deal.

As you have already heard, the banking section incorporates four bills passed by the Banking Committee. While all of these provisions in H.R. 4800 are laudable in their goals, they defeat our mutual purpose of streamlining our trade policy to compete successfully with the world's most efficient systems.

First, on competitive exchange rates, the bill would create a brand new and unnecessary pool of money which the administration can use to intervene in foreign currency markets to help achieve and maintain a "competitive exchange rate" for the dollar.

The Wylie substitute acknowledges the significant progress made by this administration in negotiations leading to a drop in the value of the dollar. The recent agreements made at the Tokyo Economic Summit in particular are most encouraging. This will help the competitiveness of U.S. manufacturers. The substitute encourages the adminstration to continue negotiations to maintain its progress. Why create a new reserve with new regulations to achieve something on which we are already making great strides?

Mr. Chairman, the second section incorporates the International Debt, Trade, and Financial Stabilization Act into the bill. I support the goals of this section, particularly efforts to assist recipient countries through the use of structural lending. This would help them restructure their economies away from top heavy and inefficient government-owned monopolies and toward more productive private enterprises. It would free up more Government funds for both social services and debt repayment. However, the bill gives specific directions to the U.S. executive directors of the multilateral development banks to vote against certain loans which do not meet vaguely defined trade-related goals. These restrictions may defeat the very purpose of the section which are so important.

The Wylie substitute expresses the sense of Congress that the administration should continue to have the maximum amount of discretion and flexibility in implementing its cooperative debt strategy. I strongly agree with the Wylie substitute that the objectives of this strategy should continue to emphasize the need for economic adjustment policies within recipient countries to help them streamline their economies. The Wylie substitute requires the U.S. executive directors at the MDB's to work toward eliminating unfair trading practices and other obstacles to international trade and investment, and to promote mutually advantageous economic relations. These countries must know that we cannot continue to help nations who close their doors to our products.

Third, Mr. Chairman, the bill includes a section on competitive tied aid. It creates a $300 million competitive tied-aid fund or "war chest" to counter the predatory practices of some countries who use a combination of concessionary loans and outright grants to promote purchase of their exports. This is a good section of the bill and I am happy to note that the Wylie substitute includes a similar section as well.

Fourth, and last, Mr. Chairman, the bill would create a Council on Industrial Competitiveness and would authorize $25 million, that we don't have, to fund the Council. I have no problem with a lot of interested intellectuals getting together to hash out what's wrong with U.S. industry today. Certainly people have been doing that for years. And on the more formal level, there are already productive groups actively organized for that purpose representing government, business, and academia. A good example is the business-higher education forum at which members of the Northeast-Midwest congressional coalition have participated. These get togethers produce valuable insights into the competitive problems and successes in U.S. industry.

The problems arise, Mr. Chairman, when another group gets appointed and becomes another official layer of bureaucracy with entrenched interests and constituencies. As the bill stands, the Council on Industrial Competitiveness would be able to review all private sector requests for Federal assistance, including import relief. It would then pronounce its judgment on whether the assistance is warranted and on what conditions, such as wage and benefit cuts or plant closings, should be imposed on that assistance. What happens when the ITC finds injury in a trade case but the Council on Industrial Competitiveness cannot come to any agreement on what industry should do to compete more efficiently against the imports? That industry does not need any more delay in having remedies implemented. It does not need labor, industry, and Government officials, some of whom may not even be familiar with the particular industry in question, deciding what mix of restructuring is necessary to meet the challenge posed by a flood of imports.

Perhaps some wage and benefit cuts would be necessary, but they would have to be negotiated with the relevant unions, not dictated by some Government bureaucracy. Perhaps some plants need to be closed or consolidated, but again those are difficult decisions and decisions which are not applicable to all sectors of a particular industry or even one company. We do not need another layer of Government bureaucracy in the way. What we need is a more efficient, more streamlined, competitive industry, standing up to the challenges it faces.

Mr. Chairman, overall, I believe that the Wylie substitute more effectively responds to the needs of our international lending system and U.S. industry. Clearly, we cannot stand idly by

and watch our industries suffer while our foreign competitors prosper as a result of their own restrictive trade barriers. Moreover, we cannot watch while foreign debt burdens drain away once lucrative markets for our products overseas. Our own trade policy has not been an effective one. The trade policies of the world community cannot continue to be set with one set of rules for the United States and one set of rules for our trade partners. We need strong action now, but what we don't need is a muscle-bound giant unable to tread delicately through the nuances of international trade and lending.

Mr. LUNDINE. Mr. Chairman, I yield 3 minutes to the gentleman from Alabama [Mr. ERDREICH].

Mr. ERDREICH. Mr. Chairman, I thank the gentleman for yielding this time to me.

Mr. Chairman, it seems to me that we have a very clear and easy choice. I rise in opposition to the Wylie amendment. Do we want to have an aggressive, strong national policy that seeks to do for this Nation what other nations do, and that is aggressively put our American interests, economic interests, first in the world marketplace as other countries put their economic interest first?

The Wylie amendment to me would do devastation to a major and important segment of this bill, a portion of the bill that assures that we are going to add leverage against our competitors across the world spectrum, competitors that use every sort of leverage in their interests. Why should we not do everything that we can do to develop what I think very simply is a business nationalism, which I do not think there is anything wrong with, putting the interests of this country forward with a renewed and a vigorous activism of this Government in international trade?

Our future in Alabama and across this country depends on it. Our jobs are at stake. And if we were to go with what the gentleman from Ohio [Mr. WYLIE] seeks, and I have respect for what the gentleman is intending to do, but I do not think how the gentleman comes down on this issue is correct. We would, in essence, have a prescription for doing nothing, and nothing over the past 5 years has given us a $150 billion trade deficit, has made this Nation a debtor nation for the first time in about 60 or 70 years. We need the sort of provisions that are in the bill as written.

Mr. Chairman, I urge that we reject the Wylie amendment.

Mr. WYLIE. Mr. Chairman, I yield 2 minutes to the gentleman from Iowa [Mr. LEACH].

Mr. LEACH of Iowa. Mr. Chairman, I thank the gentleman from Ohio for yielding to me.

Mr. Chairman, the bill as drafted is an alleged solution to last year's problems. In contrast, the Wylie substitute, by building on this year's successes, is realistic and it is workable.

In the exchange rate arena what is needed is will and judgment in current institutions including the Treasury and the Federal Reserve Board, not greater expenditures of taxpayer funds for new industrial and economic advisory panels.

The authors of this bill have correctly spotlighted the key problem in world trade. But spotlighting and correcting are not synonymous.

While well meaning, I have little doubt that what this bill creates is monetary confusion, more instability and greater exchange rate swings. There is simply no substitutes for strong leadership in our present institutions. This approach that is being advocated and brought before this body today bifurcates and splinters exchange rate policy.

The Wylie substitute, on the other hand, constructively addresses the problem without meddling in finely tuned apparatuses. It deserves our support.

Mr. LUNDINE. Mr. Chairman, I yield 3 minutes to the gentleman from Michigan [Mr. LEVIN].

Mr. LEVIN of Michigan. Mr. Chairman, I thank the gentleman for yielding this time to me.

Mr. Chairman, I have heard the description of the Competitiveness Council, and I do not recognize it at all. It is kind of the old device of trying to kill something with caricature.

It is not an effort of central planning. Do not throw that red herring on the floor of the House. It is not that at all.

As the bill says, the Council would gather and analyze information. An institutional forum would be created to identify economic problems inhibiting the competitiveness of the U.S. industries, and develop some long-term strategies to address such problems and create a broad consensus. That is not central planning.

So having information and exchanging ideas and talking about alternatives is a long, long way from central planning. There has to be something between chaos and central planning.

Let me just indicate what I said yesterday in a one-minute speech. I was talking with a reporter who said to me, "You know, out in California, the first cars that rolled off the GM-Toyota assembly line had 60- to 70-percent Japanese content. Do you know that the second-line cars will have? Ninety percent Japanese-made content."

We need to talk about issues like the long-run place of U.S. automobile companies within automobile capacity and production and sales in America.

I think the burden is on your shoulders to come up with something besides the status quo. Industry after industry has lost ground in this country. And what you are essentially creating is a stone wall, that is all, plus some epithets.

This country as a country has to stand up to the questions of where we are going. That does not mean all the answers are in Washington. A few of them will be, but you have to ask the questions, and you have to have the information to address those questions and alternatives. Getting management and labor and education institutions and all the private sector together to talk about these issues is not planning, it is good commonsense.

Mr. Chairman, I want to yield to the gentleman from Ohio [Mr. WYLIE] because I would like to have some confrontation on this so that everybody understands it.

Mr. WYLIE. Not confrontation, maybe dialog.

The CHAIRMAN. The time of the gentleman from Michigan [Mr. LEVIN] has expired.

Mr. WYLIE. Mr. Chairman, I yield myself 1 minute to respond to the gentleman from Michigan.

Mr. Chairman, it says here that the Council on Industrial Competitiveness shall:

* * * assess private sector requests for governmental assistance or relief and to recommend, as a condition of such assistance or relief—

(A) those actions of the private sector which will ensure that the applicant involved, by receiving the assistance or relief, will become internationally competitive in the future; and

(B) any adjustment commitments which should be entered into by relevant parties, such as management and employees of the applicant, shareholders, creditors, suppliers and dealers, and financial institutions, to ensure that the applicant will become internationally competitive in the future.

That sounds like central planning to me.

□ 1800

Mr. LEVIN of Michigan. Mr. Chairman, will the gentleman yield so that I might respond?

Mr. WYLIE. I yield to the gentleman from Michigan.

Mr. LEVIN of Michigan. All that says is that if Chrysler Corp. or any other company comes before this Congress again and asks for help, that there will be an institutional mechanism within this Congress to make sure that they do not steal the bank—and Chrysler did not—and that we get a pound of flesh and equity for all the people of this country. That is all it says. It is not central planning whatsoever.

Mr. LUNDINE. Mr. Chairman, I yield 3 minutes to the gentleman from Texas [Mr. WRIGHT].

Mr. WRIGHT. Mr. Chairman, I have a very high regard for the distinguished gentleman from Ohio. He is a

friend of mine personally, and I respect his views and his opinions.

I do think that the apprehension that I have heard expressed here today about the Industrial Competitiveness Council, however, is misplaced. Surely it makes sense that if a business is going to come and apply to the Government for help, to avoid its bankruptcy or its failure, to avoid an industry's having to go completely out of business and just cave into foreign competition, that we have a right as a nation to expect in return that that business or that industry, labor, and management working together, will come to an agreement on some kind of a minimal social compact where they will install the labor-saving devices and the time-saving mechanisms that are necessary to make that business competitive.

What good does it do if we give them aid and bail them out and they do not do those things necessary to make themselves competitive on world markets?

That is what it says.

Let me give you just one illustration that has been used. Chrysler Corp. probably is the very best of all illustrations of a company that pulled itself together by labor and management working harmoniously as a team, and they rose like a phoenix from the ashes. There were many, including David Stockman, who said, "Let Chrysler go down the drain. They are not worth saving. They cannot be saved." The staid Wall Street Journal said, "Let them go down the drain. It is a waste of money to try to save them."

Instead, we turned it over to a group of people that we thought had the vision and the determination to make it work. What happened? Labor and management worked together. The Chrysler management for the first time in the history of a major industrial company placed the head of a labor organization on its board of directors. And for the first time, labor had a sense of belonging. Chrysler went a step further than that and made $1.5 million of its common stock available to those who worked for Chrysler. For the first time they sensed that they had a stake in making things more competitive and taking the little sacrifices that were necessary in order that the company as a whole might survive.

The first thing you know, representatives of labor were coming in with labor-saving ideas, time-saving notions, and soon it became a team. Because it was a team, now, this month, this year, Chrysler is announcing the lowest cost subcompact car on the market. It has become competitive with international competition.

That is all that we are suggesting. I think it is a benign thing. I think it is the very kind of thing we need to be encouraging so that we will have more productivity, more competition. That is what we are for. We say we believe in competition. That is the free market. That is the magic of the marketplace. Let us make ourselves more competitive, to the end that "Made in the U.S.A." once again will be a badge of value and quality throughout the world.

Mr. WYLIE. Mr. Chairman, I yield myself 1 minute to respond to the gentleman from Texas.

Mr. Chairman, I do respect the gentleman from Texas, but he has not read the amendment, and we did not need this language or this new council to effect the loan guarantee arrangement for Chrysler. I was here. I supported the Chrysler loan guarantee, and it worked out very, very well.

I mentioned request for farmers, agricultural loans. In this amendment, there is no limitation as to Chrysler. It applies to everybody in the private sector who seeks or receives assistance from the Federal Government. We want all of our exporters to be competitive internationally.

What about Export-Import Bank loans? Are we going to have them second-guessed by this council? What about the auto industry? What about the steel industry, to make them competitive? I would assume that they would apply to this council to see if there is some quantitative desirability to making a loan to them. What about student loans? Students get assistance or relief from the Federal Government. Do they have to go before this proposed council for review?

It sounds ridiculous, I know. The gentleman is laughing, and he has only mentioned Chrysler, but all of these people and agencies that I mentioned receive assistance from the Federal Government, and I think they would have to go before this council.

Mr. LUNDINE. Mr. Chairman, I yield 2 minutes to the gentleman from New York [Mr. LAFALCE].

Mr. LAFALCE. Mr. Chairman, we have heard so many misleading arguments on the floor of this House that it is almost impossible to find the time in days and years to answer them, but let me try, briefly.

First of all, so far as a central planning governing body, nothing could be further from the truth. This council does not have one power of its own. It is an advisory body. It can recommend. It creates a place where individuals from labor, management, Government, and public interest groups can sit down together, discuss their issues.

Second, with respect to the position of the gentleman from Ohio, I remind him of the time when he was opposed primarily to a bank and offered an amendment to the Banking Committee and expressed the thought that if the bank were defeated, then the council might be a good idea. That was the first year 1984. We, then, in this Congress rejected the concept of a bank, at least did not bring it up, and said, "Let's confine ourselves exclusively to a council."

With respect to the Chrysler situation, Chrysler is different from other situations only in this respect: Federal legislation was necessary. Usually Federal legislation is not necessary for those thousands of supplicants who come to the Federal Government seeking financial assistance or trade relief in one way or another.

I wrote a dissenting opinion in the Banking Committee, saying I opposed the Chrysler legislation because, as it came out of the Banking Committee, there was no conditionality attached to it—there was no requirement for shared sacrifices on the part of labor and management so that Chrysler could be competitive.

The Senate, especially Senator RICHARD LUGAR and then Senator PAUL TSONGAS, amended the Senate bill to demand that all those parties with an interest in Chrysler do get together in order to make the shared sacrifices necessary to enhance their competitiveness.

The steel industry wants a trigger pricing mechanism. The auto industry wants voluntary restraints. The public should get something for it. No more giveaways. That is what this bill says. No more giveaways. The public should get competitiveness.

Mr. WYLIE. Mr. Chairman, I yield 2 minutes to the gentleman from Idaho [Mr. CRAIG].

Mr. CRAIG. I thank the gentleman for yielding, and I stand in favor of his amendment.

Mr. Chairman, I would ask my colleagues of this body if you now believe that this bill does embody the concept of central planning and that the amendment of my colleague from Ohio strikes that, which I think is very valid, let me tell you a couple of other things that he would strike from the bill that I think are essentially very important for us to talk about this afternoon.

A month ago, I introduced House Concurrent Resolution 287 which opposed MIGA—that is, Multilateral Investment Guarantee Agency—a concept that the World Bank came up with that said to the taxpayers of this country, "We want your money so if we make bad loans, you will bail them out." That is what it said.

The bill embodies that legislation, that language, that concept, and the Wylie amendment opposes it. I do not think the taxpayers of this country have enough money to bail out the bad loans of our multilateral financing organizations. But your legislation includes it.

Another piece of legislation that I was involved in introducing was saying that when multilateral development

banks make loans for the promotion of, and the production of, agriculture in Third World nations for export trade to compete against our farmers, that ought to be disallowed, that our contributions to those banks ought to be diminished in the next term by the amount of the loan that went in to compete against our farmers that we are subsidizing to keep out of bankruptcy today.

The Wylie amendment provides for that kind of provision. That is what it offers. That is what it represents. It says charity begins at home and we will not use our taxpayers' money to bail out bad loans from our international banking system, and we will also not use our taxpayers' dollars to compete against our farmers.

Mr. LUNDINE. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, this has been called a solution to last year's problem. This has been called essentially unnecessary. Well, if you believe that a $150 billion trade deficit is last year's problem, then vote for the Wylie amendment.

Very frankly, to my colleagues on this side of the aisle, if you believe everything the Reagan administration has done throughout these 5-plus years is perfect, then vote for the Wylie amendment.

I want to see bipartisanship. I doubt if even the sponsor of this amendment would deny that in my subcommittee, and in general, that I have been denied a bipartisan opportunity to forge legislation. And until recently, most of these provisions were bipartisan. But now the issue is drawn very clearly. If you think it ain't broke, then don't try to fix it.

But, ladies and gentlemen of the House, I say it is broke. How is it broke? The dollar is still overvalued. We talk a lot about the depreciation of the dollar as against the yen. We, from upstate New York, know what it is like to compete against the Canadians who have a 70-cent dollar. It is hard to be 30 percent better than your competitors just in southern Ontario.

If you vote for the Wylie amendment, you are voting to leave it to Baker. There used to be a television program, I think, "Leave it to Beaver." Well, this is "Leave it to Baker."

This is the fundamental issue: Is Congress going to set the public policy with regard to exchange rates, with regard to our approach to the Mexican and Third World debt? Is Congress going to set the essential policy with regard to an industrial strategy for the private sector to know how it is going to compete with other nations, or are we going to leave it to the administration?

I say that this administration was late in coming around to a realization that a strong dollar is not something that is good for American competitiveness but something that is actually harmful.

We have been told that to reject the amendment is tinkering by Congress. Well, I would remind the people in this body that our forefathers in this Constitution thought that it was the job of the legislative branch, not the job of the executive branch, to conduct international monetary and international financial and economic policy, and I say right now is when we are facing up to the issue of whether we believe we can set public policy. Are we creating some new bank with $5 billion? No. What we are doing is taking $1 billion already in the World Bank and leveraging that so that a growth strategy for these countries that conforms to the idea of the Secretary of the Treasury but gives it more impetus can actually be implemented.

With respect to Third World debt, let me just say, in conclusion, that about one-third of our total trade problem—$53 billion—is due to the fall-off in our balance of trade with these Third World countries.

What we are proposing that would be gutted by the Wylie amendment, in addition, incidentally, to the Multilateral Investment Guarantee Corporation that was requested by the administration, we would gut every other positive progressive proposal to give some teeth to the idea that we have got to develop a growth strategy for these Third World countries so that they can buy U.S. goods.

I ask you to vote against the Wylie amendment, stand up for Congress' ability to set public policy in international economic policy, stand up for a positive approach to dealing with our trade deficit.

Mr. WYLIE. Mr. Chairman, I yield 1 minute to the gentleman from Iowa [Mr. LEACH].

□ 1815

Mr. LEACH of Iowa. I thank the gentleman for yielding to me.

Mr. Chairman, this debate has clearly indicated the real problem is that we have misleading and unrealistic expectations. The distinguished majority leader gives us the impression that this bill will bring us more Chrysler miracles. We are not creating a Reconstruction Finance Administration, we are not creating a substitute Congress; we are proposing $25 million for an economic advisory panel. It is money for economists, not blue collar workers.

There is an additional provision for a World Bank Bank of up to $5 billion in leveraged funds for the World Bank. Maybe that is a good idea, but I do not think anyone in this body should be so confused as to think that that will provide loans for their companies in their districts.

Simply put, this bill is a nonfix for a real problem, and the public should not be fooled by the tomfoolery.

Mr. WYLIE. Mr. Chairman, I yield 1 minute to the gentleman from Missouri [Mr. EMERSON].

Mr. EMERSON. I thank the gentleman for yielding time to me.

Mr. Chairman, I rise in support of the Wylie amendment. It accomplishes what I tried to do in an agriculture amendment, but which the Foreign Affairs Committee buried.

Mr. Chairman, when the Agriculture Committee met to discuss its proposals for the agricultural provisions of this bill, I offered an amendment to our report proposing that sense of the Congress language be included in this bill instructing the Agency for International Development not to fund foreign agricultural projects which have the effect of promoting competition against U.S. exports. Unlike some of our past attempts to deal with this subject, this was not a controversial amendment. Two of the organizations which often object to this type of legislation, AID and the Land Grant Universities, both signed off on my amendment. It was adopted unanimously in the Agriculture Committee with bipartisan expressions of support.

Sadly, though, this amendment, as well as a number of other good agriculture amendments, got scuttled in a turf battle with the Foreign Affairs Committee. It is certainly most unfortunate that an amendment that everyone agrees to in substance nevertheless cannot see the light of day. There are no good reasons for that, and I don't think any of our constituents approve of our doing business in this way.

At a time when our budget deficit is burgeoning and our farm economy is sagging, it makes no sense for the Federal Government to be spending tax dollars to drum up new competition for our own farmers. The attention that some of my colleagues and I have called to this subject so far has had a positive effect. AID no longer funds soybean projects in Argentina and Brazil. Language in this bill requiring the Secretary of Agriculture to study the programs of AID to determine how they serve our market development objectives will help keep the pressure on. None of us is opposed to legitimate and important work AID does to help alleviate hunger in Third World countries. But some of our foreign agricultural projects have gone beyond mere humanitarian assistance to helping other countries develop export capabilities for products U.S. producers export. I, for one, will continue to insist that the Congress speak out on this subject to make it clear that our No. 1 priority is our own farmers here at home.

The Wylie amendment helps us stress that fundamental point. I urge its adoption.

Mr. WYLIE. Mr. Chairman, I yield 2 minutes to the gentleman from Ohio [Mr. KASICH].

Mr. KASICH. I thank the gentleman for yielding me this time.

Mr. Chairman, I want to compliment the gentleman on his amendment. What I have difficulty understanding is in November, this President carried 49 States for a second term based on the philosophy that we ought to limit Government involvement in the private sector and in fact limit the growth of Government.

Since this President has been in office, we have had nothing but growth, once we have been able to get our monetary policy put into shape. We have been able to have growth and create jobs in this country.

Now we are calling for the creation of a Government bureaucracy that is designed to pick winners and pick losers. Frankly, I do not understand it.

Let me say a couple of other things. I do not want to live in Canada; I do not want to live in Taiwan; I want to live in the United States. If I am asked to live in those other countries for any period of time, it would have to be with U.S. dollars in my pocket because it is the U.S. dollar that has strength around the world. That is why we are now working, Secretary Baker is now working, to try to get the dollar in line with other currencies, and he has been successful.

So successful, that in Tokyo, Mr. Nakasone now, it is questionable whether he is going to be returned to office because our President has been so successful in moderating the value of the dollar. Because of the moderation in the value of our dollar vis-a-vis the value of other currencies, we are without question, going to see improvement in our foreign trade balance just simply because of Baker's efforts.

Now, Jim Baker does not want $300 million of taxpayers' money; Jim Baker believes he has the tools at the Fed, the open market policies, the discount rate, working and coordinating with other countries to achieve a moderation of the dollar. He does not want this language; he does not want this money. He believes that it is sensitive; he believes that this whole area is something where the Congress itself should not be involved; 435 Members, the Secretary of the Treasury. It simply goes too far.

Mr. LAFALCE. Mr. Chairman, will the gentleman yield?

Mr. KASICH. I yield to the gentleman.

Mr. LAFALCE. I thank the gentleman.

Mr. Chairman, just to point out one thing. Secretary Baker not only wants the $300 million; he asked for it.

The CHAIRMAN. The Chair will advise the Members that the gentleman from Ohio [Mr. WYLIE] has 3 minutes remaining and the gentleman from New York [Mr. LUNDINE] has 3 minutes remaining.

My WYLIE. Mr. Chairman, I yield 2 minutes to the gentleman from Georgia [Mr. GINGRICH].

Mr. GINGRICH. I thank the gentleman for yielding me this time.

Mr. Chairman, I rise in support of the Wylie amendment. I have limited time, so I just want to focus on a couple of pages to point out how amazing this Council is.

The American left cannot advocate bureaucratic socialism so it advocates an academic, bureaucratic planning system that is bizarre. If you read page 312, it is the "Universal Meddling Act." This agency will look at anything it wants to for virtually any reason that it wants to.

Then you look at the board we are going to appoint that is going to make all these wise decisions; that is going to make us more competitive.

"Four members shall be national leaders with experience and background in the labor community." Does that mean they will be appointees from big labor, or does that mean three of the four will be nonunion which will be an act or reflection of the work force?

Four members will be appointed, "* * * from the academic community." Now, I am a former college professor. Let me tell you: If you seriously think that hiring 4 college professors is going to make a major contribution while working with four big labor leaders, while working with four big business leaders, while sitting down with four already-appointed executive branch members, this is the Democratic Party's contribution to competition? No wonder the McGovern-Carter-Mondale cycle keeps reoccurring. This is one more bureaucratic, centralized, big-government, meddle in the private sector, meddle in the small businessman, take power from back home, slow everything down.

Mr. McKINNEY. Mr. Chairman, will the gentleman yield?

Mr. GINGRICH. I yield to the gentleman.

Mr. McKINNEY. I thank the gentleman for yielding.

Would the gentleman agree that I agree with him on trade policy in general? No. Would the gentleman agree that I have not been a very good Republican on this bill? You would probably say, "no."

The fact of the matter is, and I have told the chairman and with deep respect, this bill adds an enormous bureaucracy, an enormous cost, it takes decisions from where they should be made, and sends you and I home to our districts, you and I, home to our districts, to daycare, and food stamps, and everything else and says, "no."

Mr. GINGRICH. Mr. Chairman, I urge the Members to vote "yes" on the Wylie amendment.

Mr. WYLIE. Mr. Chairman, I yield 1 minute to the gentleman from Mississippi [Mr. LOTT].

Mr. LOTT. I thank the gentleman for yielding me this time.

Mr. Chairman, I urge my colleagues to vote for the Wylie amendment. I think I have proven by my votes already today, to the consternation of some of my friends and colleagues, that I would like for us to have a strong trade bill. But I think that the section in the bill that Wylie would eliminate is a travesty. It does cost additional money. In fact, we do not know exactly how much it will windup costing in the final analysis.

This $5 billion that this new bank entity will spend is supposed to be taken out of their hide; I do not think we know what the cost will be for what is in the bill in the particular title IV.

There will, no question, be more bureaucracy involved in this whole area of trade based on what is in title IV. A new bank in the World Bank? How many of you like what the World Bank is doing now?

A lot of you do not like what they are doing. Just double that. A new entity in the World Bank. A World Bank bank; that says a lot in itself.

This also would allow for tinkering with currency values, and that concerns me considerably. I do not see how that is going to help us in the trade policy if we allow this additional strategic currency reserve to be involved when we already have people in place to do that job.

Worst of all, this particular title, unless it is amended with the Wylie amendment, will be the worst form of social and industrial engineering. I urge the adoption of the Wylie amendment.

□ 1825

Mr. LUDINE. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I thank the gentleman from Mississippi and the gentleman from Ohio for proving the point that the issue here is, if Members think that everything is all well and there are no problems with trade, then they should vote for the Wylie amendment. If, however, they think that the Congress ought to set the policy with respect to the exchange rate target for the dollar, with respect to our positive approach to the debt-ridden problems of the Third World, with respect to the other issues involved here, then I would say they should vote with the committee and against the Wylie amendment.

Mr. Chairman, I yield 2 minutes to the gentlewoman from Ohio [Ms. OAKAR].

Ms. OAKAR. I thank the gentleman for yielding time to me.

Mr. Chairman, I just was struck by my friend and colleague from Columbus who talked about this President's national ability to get votes. This is the same President who has given us the largest trade deficit in the history of this country, the result of which is thousands and thousands of jobs lost, some permanently—hopefully not—but permanently to our American citizens. This is the same President who said, "Why don't we export the farmers, not their products?" This is the same President who waited until yesterday to even mention the crisis in the machine tool industry. They have been pleading with the President not only for jobs but for national security interests to do something about the fallout in heavy manufacturing. This is the same President who has a Commerce Department that puts out a report that says we can import our metal fasteners, our nuts, bolts, and screws. There are 100,000 of them in every plane that we attempt to use for the defense of our country, but the Commerce Department under the leadership of this President says, "Why don't we import them from Japan and Germany and Taiwan and other areas, and we can still have a great national security?"

If Members believe in that status quo, then they should gut this bill and vote for the Wylie amendment. If they want to see some progress, if they want to see us address this international debt that is causing our own people to loss their jobs, then they will support the committee, they will absolutely support this bill. I really plead with them to reject the status quo, to do something about this enormous trade deficit, to show how truly we can be American and care about Americans for a change. I urge a vote against the Wylie amendment.

Mr. LUNDINE. Mr. Chairman, I yield such time as he may consume to the gentleman from California [Mr. DANNEMEYER].

Mr. DANNEMEYER. Mr. Chairman, I rise in support of the Wylie amendment.

What we have here is a failure to communicate, or more properly, to understand what it is we are really doing. The omnibus trade bill (H.R. 4800) is intended to correct our current trade imbalance; however, it does so in the manner of an ill-conceived fire extinguisher: something is burning, so grab anything you can to throw on it in the hope of putting it out. Of course, water or a chemical retardant would be preferable. Unfortunately, this bill is the financial equivalent of kerosene; it will merely fan the flames.

One of the more odious provisions in H.R. 4800 is title IV, which attempts to address the issues of U.S. trade and foreign debt by creating a bureaucracy—just what we need one more of—to oversee the flinging of more money down the black hole of fiscal irresponsibility.

Our negative trade balance, which results in a loss of jobs and a general decline in economic productivity, is but one symptom of monetary instability. Budget deficits and mounting Federal debt are also symptomatic of this financial quicksand. The U.S. dollar is in the currently unenviable position of being the reserve currency of the world, and it is fluctuations in the exchange rates between the dollar and foreign currencies which is a major influence on trade. It is essential that we understand the nature and effects of exchange rates as a monetary device.

In H.R. 4800, however, all we have is another attempted bailout: U.S. taxpayers are being asked to underwrite poor judgment, defective banking practices, and discredited monetary policies. It is totally unrealistic to expect yet another level of bureaucracy and yet another infusion of credit to signal improvement in the overall trade picture. At a time when the U.S. prime rate is twice that of our major competitors—8.5 percent compared to 4.5 percent to the interbank rates for Japan and West Germany—what prompts supporters of this bill to think that the banking provisions contained in title IV will do anything to benefit the economic base necessary for trade in the first place?

My able colleague, the gentleman from Ohio [Mr. WYLIE], said it correctly and succinctly: "not one of my constituents has asked me to create a new bureaucracy or to encourage irresponsible World Bank lending." This legislation is not the answer; honest money is. In order to address our trade imbalance, we must first nurture the health of our economy. And the key to stimulating productivity, investment, and savings is lower interest rates. We can drastically reduce interest rates by fixing the dollar once more to gold. Monetary reform—sound money—is the necessary first step: before you fight the fire, you have to ensure that the fire truck is operating and that there is water in the reservoir. And, like the kerosene, leave this bill in the can.

Mr. LAFALCE. Mr. Chairman, the decline in U.S. industrial competitiveness has now reached crisis proportions. America's inability to compete in world markets, as President Reagan's own Commission on Industrial Competitiveness reported just over a year ago, is one of the most serious challenges facing the United States. If we look beyond the short run, the inescapable conclusion is that competitiveness may well be the pivotal economic issue for our country for the rest of this century. The provisions in the banking title of this bill confront that issue by providing mechanisms for explicitly shaping our economic policies to enhance our competitive position.

Measures of our underlying competitiveness are getting worse, not better, and the trend is not new. The fundamental measure of our economic condition in a world economy is our trade picture. The skyrocketing U.S. trade deficit—a staggering $150 billion last year—is perhaps the best evidence of our competitive decline. But it is not the only evidence.

Inflation-adjusted wages is another straightforward measure of U.S. industrial competitiveness. Real wages grew steadily from World War II until 1973. Since then they have fallen and the trend is still downward. Unemployment remains a serious problem. We now have 8 million people actively looking for work. Some 168,000 jobs were lost in manufacturing last year.

Our productivity growth has come to an ominous halt and has been outstripped by virtually all our competitors. The United States no longer is the world's most productive nation in several industries, including autos and machine tools, and the productivity gap is widening rapidly.

Falling interest rates have led to rising corporate indebtedness, but not to the sustained capital investment they were supposed to foster. Business investment in new, commercially productive plant and equipment is extremely low, as 20 percent of our industrial capacity remains idle.

Our problems are not confined to one region or only to our basic industries. We have lost market share in all the high technology or "sunrise" industries. Nor can the deterioration in American manufacturing be comfortably dismissed by the claim that we are becoming a service economy. Services and manufacturing are often inextricably linked. If other companies, notably Japanese, dominate complex manufacturing, it is naive to believe that they will rely on our financial services, lawyers, or advertising agencies.

Instead of investing at home, U.S. companies are stampeding offshore. To a shocking degree, many of our corporations have begun to operate, not by competing with Japan or Korea, but by distributing sophisticated products made in those countries. Taken collectively, such an approach spells disaster for our country's economic future.

The changes in our trade laws that this bill effects are critical, but they will not solve the problems I have enumerated. If we are to successfully compete in the new world economy, we must also work together to get our own house in order. Business and labor cannot solve these problems alone. Too many variables are beyond their control. Nor can traditional macroeconomic fiscal and monetary policy turn our trade deficit around. A coordinated set of microeconomic policies is critical to any effort to reverse our declining competitiveness.

Attitudes must change. In this era of fierce foreign competition, strategies for enhancing competitiveness must be developed in cooperation with business, Government and labor, and Government must work actively to fulfill its responsibility to create an environment which advances U.S. competitive interests.

Our failure to develop a coordinated competitiveness strategy does not reflect a reluctance to embrace specific policies toward industry. We now have an expensive, inarticulate and badly coordinated set of industrial policies, encompassing special tax incentives, antitrust policies, Federal credit programs, and various forms of trade relief, to name just a few, and these policies cost the taxpayer billions each year. But we have no mechanism to focus these policies on performance which strengthens the competitive base of our economy. At the same time the Federal Govern-

ment is pursuing its vast and incoherent array of industrial policies, the industries which it is supposedly helping are continuing to decline.

No high level forum exists for developing a consensus on economic policies that will positively enhance our competitive position. At a time when it is imperative that we work together, counterproductive adversarial relationships remain the order of the day. The basic issue confronting the U.S. economy is the inability of all those participants with important stakes in its success to act together, to build a consensus about common economic problems and to mobilize resources in pursuit of our common goals.

In the past few years, dozens of reports on the long-term competitiveness of the American economy have been issued by numerous blue-ribbon, bipartisan commissions. Groups as diverse as the Business-Higher Education Forum, the Center for National Policy, the Committee on the Next Agenda, the AFL-CIO, and the White House Conference on Productivity concur that we need an institutional mechanism to focus attention on competitiveness issues in the policymaking process and develop consensus regarding Government policies affecting industry.

My minority colleagues have argued there is no need for a mechanism to generate policy recommendations on competitiveness issues. Yet, in June of 1983, President Reagan appointed his own temporary Commission on Industrial Competitiveness. The Young Commission unanimously called on America to make U.S. competitiveness the primary item on the economic agenda for the next decade and offered a series of thoughtful proposals for Government and private action. The Commission argued, and I quote, "mechanisms should be developed for building consensus among key sectors of society to better respond to our competitive challenges." The Commission's report could have been a focal point for a national debate and the foundation on which to build a new consensus for needed policies. But, the report and its recommendations have been basically ignored by this administration.

The message that is being sent to the Congress and the President by distinguished leaders from business, Government, unions, and academe is that Government must give much more attention to the management of its affairs and how those affairs affect the competitiveness of our Nation's economy. In response to that concern, this bill would create a 16-member Council on Industrial Competitiveness, an independent entity with membership drawn equally from business, labor, Government, and academia or public interest groups. This Council will serve as a much-needed instrument for focusing Government policy more explicitly on improved competitiveness and productivity. It will provide a mechanism through which key economic actors can work cooperatively to develop a long-term competitiveness strategy for our economy and for specific industries and sectors, and create a consensus in support of that strategy.

The Council would examine the countless number of Government programs that already provide assistance to industry, and coalesce these programs into an overall strategy for growth and competitiveness. In addition, the Council would introduce the important concept of conditionality into programs of Government assistance. Too often, Government provides substantial assistance to industry, but has no mechanism to tie that assistance to improved competitive performance. The council would, where appropriate, assess private sector requests for Government assistance or relief, and recommend conditions designed to actually improve the international competitiveness of the industry concerned.

The Council is a deliberative body with no direct line authority or program responsibility. No action can be brought about by administrative fiat. The Council and its industry subcouncils are essentially forums for bringing together the affected parties in our economy. Their main task is the mobilization of consensus for an economic strategy based on generally accepted data and analysis, and supported wherever possible by reciprocal commitments from affected parties.

Without such an institution, we will be forced to rely on reactive, and potentially protectionist and prosperity we as a nation need. Politically powerful firms or industries will continue to demand—and receive—aid from the executive branch and the Congress, and their petitions will always be presented in a crisis context. If our Government fails to develop institutions to apply, examine, and coordinate these decisions on an above-board basis, the alternative is what we already have: not the absence of industrial strategies, but rather unwise one, both costly and ineffective.

The chaos of our policymaking process with regard to industry is intrinsically at odds with the fair market philosophy underlying the legislation now under consideration. We argue that we simply want a fair market for American goods and services. To argue convincingly, we must have mechanisms for assessing the degree to which our own competitive problems are our own fault. But, unlike most of our trading partners, we have yet to develop a unified policy to handle competitiveness problems at home. If we hope to integrate ourselves into an orderly trading system, we must take the difficult but necessary steps to bring coordination to our own system. We cannot pretend to wisely redirect the shifting tides of hegemonic power when we fail to understand and direct the ebbs and flows of our own economy.

The substitute offered by Mr. WYLIE would strike the Council from this bill. Frankly, I am somewhat astounded by the opposition of some of the Republican colleagues to the Council proposal. We are talking about an advisory mechanism that can bring Government, business, labor, and key industry analysts together solutions to our competitiveness problems. No action can be taken by administrative fiat, no obligations can be imposed, no Government money can be allocated. If we cannot take this small step, I do not know where we can hope to start resolving our own competitive problems.

There is more bipartisan consensus on this issue than my minority colleagues seem inclined to admit. The House Republican Trade Partnership Act includes the creation of a Commission on Trade. That Commission focuses to narrowly on trade laws and policies and thus, in my view, unnecessarily duplicates the functions of the Office of the U.S. Trade Representative. But it shares some important concepts with the Council proposal. It is an advisory commission; it consists of representatives of business, labor, academia, and consumer groups; and it is to develop, and I quote, "policy recommendations aimed a facilitating the transfer of U.S. resources and manpower to applications where they enjoy the greatest comparative advantage." Purely and simply, it seeks the development of an industrial competitiveness strategy.

My Republican colleagues argue that we do not need to spend money on the creation of a new bureaucracy. The Council would not be a large bureaucracy but an innovative mechanism for bringing a new perspective to existing policymaking. It is some of the proposals offered by the minority that are in fact far more drastic. The Republican trade package suggests the need for a new Department on Trade, a far more costly and far-reaching undertaking than the creation of a council. We do not need to recognize what we do but to focus it. Government now spends a great deal of money on programs of assistance to industry, often great deal of money on programs of assistance to industry, often ill-advisedly. If the Council succeeds in bringing some intelligent focus to what we do, we will save far more than we spend.

Critics of industrial strategy often mischaracterize it as central planning or overly interventionist. Such characterizations reflect a complete misunderstanding of current reality and of the principles underlying the Council proposal. Government makes policy having a direct impact on industrial performance and prospects all the time. In fact, experts estimate that half of all actions taken by business are in direct response to the decisions of Government. The Council would not impose industrial plans, but initiate a cooperative process through which all parties with an economic interest can coordinate efforts to ensure that Government policy enhances the competitive position of U.S. industry. The intent is to create a structure that would help to guarantee that whatever Government assistance is channeled to industry reflects conscious policy choices and effectively serves a public purpose.

The Wylie substitute would also eliminate the Competitive Exchange Rate Act, another key element of this trade package. The high dollar has devastated U.S. industry for the past several years, and erratic currency fluctuations have made it impossible for U.S. businesses to plan. Yet, the administration touted the high dollar as a symbol of our economic leadership and belittled the problems it caused for U.S. industries in world markets, while totally disregarding the impact of wide currency fluctuations on U.S. businesses.

The administration has finally acknowledged the exchange rate problem and, certainly, Secretary Baker's recent efforts should be encouraged. But, the new program of enhanced surveillance announced after the summit is only a small step, not a solution. In the face of serious exchange rate problems, the administration offers only a loose mechanism with ill-defined goals, sustained only by peer pressure. A far broader and more authoritative initiative is required.

The intent of the exchange rate provisions in this bill is to significantly increase the accountability of the President for the impact of exchange rates on trade competitiveness and ensure that the thrust of recent administration efforts continues. Under the exchange rate proposal, the Secretary of the Treasury is directed to develop and implement a strategy involving a combination of international negotiations, strategic intervention, and domestic economic policy reforms to move the dollar to a competitive level and minimize the destabilizing fluctuations in exchange rates that have characterized the last several years.

This administration continues to pretend that its own domestic economic policy choices have no impact on exchange rates and the competitive position of our traded goods sector. The legislation would bring these issues together and highlight their clear interrelationship. We must focus far greater attention on the policy choices that affect the dollar's value and the effect of those choices on American industry.

If we are serious about solving our trade problems, we must undertake a broad-based effort to minimize the erratic fluctuations in exchange rates that have been characteristic in the last several years, and move the dollar toward a realistic, sustainable level that will ensure that U.S. industry regains and retains competitiveness in world markets. This legislation would ensure such an effort takes place. We cannot afford to leave its occurrence to chance.

The efforts embodied in the banking title to focus our own economic policies more effectively on enhancing U.S. competitiveness are a critical part of this trade initiative. The Wylie amendment suggests that we can afford to do nothing. We have done that for too long. I urge my colleagues to defeat the Wylie amendment.

Mr. ALEXANDER. Mr. Chairman, I rise today in opposition to the Wylie substitute to title IV of H.R. 4800. The Banking Committee provisions in title IV represent the most significant contribution of this bill to solving the trade problem.

The Competitive Exchange Rate Act of 1986 which is incorporated into title IV makes the establishment of a strong and stable international monetary system a primary economic goal. If the United States is to regain its stronghold in world trade, the problem of the overvalued dollar must be addressed.

Since 1981, the dollar has risen to record heights. Fred Bergsten of the Institute for International Economics estimated the dollar to be overvalued by 75 percent at its highest level. Treasury Secretary Baker blamed the dollar's distortion for half of the U.S. trade deficit or $74 billion. That means $74 billion in lost income and lost jobs. Without addressing the problem of exchange rates, clearly we cannot expect to solve the trade deficit.

The economy of the First District of Arkansas has suffered severely from the effects of the overvalued dollar and the trade deficit. Farmers in my district can no longer export their products because they are too expensive on the world market. Since the dollar began its climb in 1981, the agricultural balance of trade has dropped from $26.6 to $9 billion in 1985, a 66-percent drop. Meanwhile over 2,000 footwear workers have lost their jobs due to the import of cheap foreign products.

Because of the dollar's devastating results, the urgent need has arisen to examine the Government's role in the dollar marketplace and to take action to offset its crippling effects. Now that the economic problem has been recognized, a process must be created through which a political solution can be reached. I have introduced legislation, H.R. 3771, which would create such a process.

This bill, a bill to establish the U.S. Dollar Valuation Board and for other purposes, would create a process for negotiating a new exchange rate system with our major trading partners.

H.R. 3771 would establish a Dollar Valuation Board that would be responsible for determining daily the value of the dollar vis-a-vis the currencies of our major trading partners, making recommendations to the President, based on its findings, on how to correct any misalignments, and finally, negotiating international monetary reform with our trading partners.

I have asked Mr. LUNDINE, sponsor of the exchange rates subtitle, whether it is his understanding that a vehicle like the Dollar Valuation Board would be one of the approaches given serious consideration within the framework of the banking title as a process for achieving international monetary reform?

Mr. LUNDINE has assured me that the purpose of subtitle A of title IV is to ensure that the Secretary of Treasury determines a competitive exchange rate of the dollar and takes steps to achieve that competitive exchange rate in the marketplace. He has told me that such mechanisms as the Dollar Valuation Board could be employed to achieve that purpose and should be seriously considered in conjunction with the monetary reform conference called for in the bill.

Mr. Chairman, I would like to insert at this point a letter to Secretary Baker and an article from the Wall Street Journal.

CONGRESS OF THE UNITED STATES,
February 10, 1986.

JAMES BAKER, III,
Secretary of Treasury, Washington, D.C. 20220

DEAR MR. SECRETARY: During his address on the State of the Union, the President said,

"The constant expansion of our economy and exports requires a sound and stable dollar at home and reliable exchange rates around the world."

I applaud the President for his recognition of this pressing need to study the dollar and its relationship to the currencies of our trading partners. The value of the dollar and the volatility of exchange rates have been a serious problem which has greatly concerned me since the dollar began its rapid rise in 1980.

The dollar's strength has resulted in crises in several key American industries and is the largest contributing factor to the towering trade deficit of $148 billion. In 1985, you estimated that the high value of the dollar caused half of the U.S. trade losses. Fred Bergsten of the Institute of International Economics (IIE) blames the overvalued dollar for a figure as high as 75% of the current negative trade balance. Several publications by the IIE support this finding.

This extreme dollar value is crippling entire sectors of our economy. Farm income has dropped drastically because U.S. farm products have become too expensive to compete on the world market. Foreign imports have flooded the American marketplace. Textile and footwear workers are losing their jobs because U.S. firms are no longer able to compete with cheap foreign goods.

The dollar's destructiveness also threatens the long-term strength of our economy. Due to lower cost of production and capital, American firms are relocating overseas. Further, foreign industries are developing and strengthening the demand for their goods in our markets.

The dramatic fluctuations in the dollar value have drastically impacted the domestic economy since the abandonment of the Bretton Woods system in 1973. The dollar has floated along this erratic path, in fact rarely stabilizing at an equilibrium level in the 13 years of floating exchange. From July 1976 to October 1978, the dollar depreciated by 21% against ten major currencies, contributing to the chronic inflation of that period.

For the past four years the dollar has reached unprecedented heights. Economists estimate the dollar to be overvalued by at least 40%, some place the figure as high as 70%. The dollar's strength has directly and adversely affected American export industries and domestic industries facing import competition. In essence, the strong dollar erects barriers to exporters and offers a subsidy to importers. Exports of agriculture and capital goods have dropped drastically. At the same time, the dramatic increase in imports of relatively cheap foreign goods has gravely wounded import sensitive industries such as steel, textiles, and footwear. Since the ascent of the dollar in 1980, agriculture exports have dropped 20% and 30,000 footwear workers have lost their jobs.

In the long-term, the United States will suffer greater losses because of capital flight. American companies attracted by production costs overseas are moving their operations to foreign countries in order to remain competitive. Ford Motor Company, for example, will soon import its compact cars from Korea. Caterpillar Tractor closed its Illinois operations in order to expand overseas.

At the same time, foreign manufacturers are establishing markets for their goods and building distribution networks. In 1984, imports captured 40% of U.S. real growth in consumer goods. The dollar has clearly overshot its equilibrium value and its distorting effects on the economy are exacting too great a toll.

Because of the dollar's devastating effects, the urgent need has arisen to examine government's role in the dollar marketplace and take action to offset the overvaluation. Now that the economic problem has been recognized, a process must be created through which international economic choices can be debated and through which a policy (political solution) can emerge. The President himself suggested such an approach when he requested a study "to determine if the nations of the world should convene to discuss the role and relationship of our currencies."

Given the three options: protectionism, interventionism, and international cooperation, the President's choice is preferred. Protectionism does not address the fundamental problem of a strong dollar. Intervention represents a short-term option with little real impact on the huge sum of money

traded daily in the capital markets. Hence the remaining and most valid option is international cooperation.

If indeed, international monetary cooperation is placed on the agenda of annual economic summits to be discussed on a continuing basis it will offer the potential for achieving a political solution leading to stability in currency. However, I would suggest the consideration of a more formalized process to ensure that this most serious economic problem receives the close attention that it warrants.

I believe that a formal process is needed to bring together our trading partners for deliberate actions on the relationship of currencies. In 1944, the Bretton Woods conference provided the vehicle for constructing an international monetary system. I offer the idea for one mechanism through which international agreement may be achieved. I propose the establishment of temporary Currency Valuation Boards in each participating nation to serve as a vehicle similar to Bretton Woods. These Boards would serve until a new international monetary system had been constructed.

Each Currency Valuation Board would determine target goals for the value of its country's currency. The Boards from all nations would then meet to discuss these goals, working towards an international agreement.

The Dollar Valuation Board would ascertain the "real" value of the dollar taking into consideration the underlying competitiveness of the U.S. economy. A currency's "real" value is often aligned with its Purchasing Power Parity which reflects a comparison of the costs of purchasing the same basket of goods in different economies.

This Board would seem to be most effective as an independent agency equal in stature to the Federal Reserve Board. The Board itself would consist of three members appointed by the President to serve seven-year rotating terms.

The Board would determine daily the "real" value of the dollar with respect to other trading nations. These findings would be released to the President, Congress, other government agencies and the general public. In addition, the Board would also make recommendations to the President, Congress, and the Federal Reserve Board for short-term and long-term monetary policy that would achieve this "real" value.

Further, the board will present the President with a monetary reform agenda to be discussed at the international economic conferences so that the U.S. can work with our trading partners to establish realistic currency values. Included in this agenda should be the recommendation to each trading partner to establish their own Currency Valuation Board. These Boards would meet in an attempt to achieve and maintain currencies of trading nations with valuation ranges that represent their true competitive levels.

The establishment of a Dollar Valuation Board would be the first step in achieving an international agreement to mutually determine the relative real value of each participating nation's currency and thus avoid the radical and unreasonable shifts in any currency's value.

History illustrates the benefit of international cooperation and a stable exchange system. Stable exchange rates contributed to the greatest period of economic growth during this century. The Marshall Plan, in the years after World War II, relied heavily on the stability of exchange rates. This program benefited workers and farmers world over. Even the lesser developed countries experienced economic growth at an unusually high rate. That period also fostered lasting peace among members of the Bretton Wood Accord.

Without international monetary stability, we are already witnessing violence wrought by economic frustration. In Brazil, a nation floundering under its enormous dollar-denominated debt, citizens riot in protest of stringent monetary controls enforced by the International Monetary Fund.

And in our own country, farmers who resent their land being taken often resort to a stand-off with local law enforcement officials. Unfortunately, as their anger and frustration mounts, so too will their need to lash out at the system.

Mr. Secretary, we must act to ease the economic pain brought about by an unstable monetary system. I suggest that the Administration and Congress start the process by showing our willingness to participate in and lead the effort of international cooperation.

With kindest regards, I am

Sincerely,

BILL ALEXANDER,
Member of Congress.

SUMMIT COUNTRIES AGREE ON PLAN SEEKING LESS CURRENCY VOLATILITY

Review Boards and Option of Joint Intervention Are Included in Proposal

(By Art Pine, Staff Reporter of the Wall Street Journal)

TOKYO—The seven largest industrial democracies agreed on a plan to heighten coordination of their economic policies and help stabilize the volatile exchange rate system.

The plan, adopted by the heads of government at the annual seven-nation economic summit here, establishes a system of high-level review boards to facilitate the coordination. A country that strayed too far from the indicated course would come under heavy pressure from the other six to adopt "remedial" measures to alter its economic policies.

If necessary, the seven governments would intervene jointly in the foreign currency markets to try to influence a country's exchange rate.

The proposal, drafted by the Reagan administration, is designed to tighten international management of the current floating exchange rate system. Since 1973, exchange rates have been free-floating, set almost entirely by the markets.

The plan is designed to build on actions taken by the Group of Five, the informal organization of finance ministers and central bankers that launched the Sept. 22 attack on the dollar. Besides the U.S., the G-5, as it has become known, comprises West Germany, Japan, Britain and France. The plan also would create a new Group of Seven, adding Canada and Italy, the two other countries that participate in the annual economic summit.

U.S. Treasury Secretary James Baker and Deputy Secretary Richard Darman conceived the plan a month ago. The effort is aimed partly at damping protectionist pressures in the U.S. The dollar's sharp rise from 1980 through 1985 drew the ire of some businessmen because it made foreign goods cheaper and their own exports more expensive. In addition, they complained that the current floating-rate system is too volatile, Making planning difficult and adding to costs.

Although the dollar's value has come down sharply over the past 15 months, Mr. Baker is convinced that protectionist pressures in the U.S. still are strong.

However, adoption of the plan to heighten policy coordination came at the expense of a companion U.S. proposal. It was aimed at prodding West Germany and Japan to spur their domestic demand so thay can absorb a larger share of worldwide imports. The U.S. agreed to drop its push to add the call for growth to the summit communique as the price for winning West Germany's support for the currency plan. That push was to have been the centerpiece of Washington's economic agenda for the summit. The U.S. will raise the issue again later this year.

Mr. Baker conceived his currency-coordination plan after it became clear that there wasn't the political will among the major industrial countries to overhaul the present monetary system—either by returning to a fixed-rate system or by establishing "target zones" within which currencies could fluctuate.

Under a target-zone system, central banks would be required to take action if exchange rates exceeded pre-set limits.

The coordination plan announced yesterday marked a narrowing of Mr. Baker's original proposal. He earlier had suggested that the summit countries set up "objective indicators" for measuring their economic performance that would automatically trigger group-review sessions when a country's economy got out of line. But West Germany and Japan balked, complaining it would cut into their control over their own economic policies.

Nevertheless, senior U.S. officials indicated that if the plan appeared to work, it would end the U.S. current push for monetary overhaul and "obviate the need for" Washington to call a new international monetary conference to discuss revamping the current exchange rate system. President Reagan has asked Mr. Baker to study the question and make recommendations by December.

Leaders of the seven countries approved the plan yesterday and are expected to endorse it formally in a communique today.

Adoption of the new plan marked the most dramatic move to deal with the exchange-rate problem since the five-country attack on the dollar that Mr. Baker launched at New York's Plaza Hotel last Sept. 22. "This is building on the Plaza Agreement," Mr. Baker told reporters.

Like the Plaza Agreement, the latest U.S. proposal has its share of risks:

—Despite the pledges of support by the seven heads of government, there's still plenty of room for the major countries to ignore the new stepped-up pressure to change their policies.

Because it deals with sovereign nations the plan has no formal requirement that a country follow the advice that the other six have given it. Indeed, a less-formal system of international peer-pressure has been in effect for six years, and the U.S. has consistently brushed aside demands that it cut back its budget deficit. And countries' abilities to forecast economic performance are scanty at best. "There's no structural leap forward here," scoffed British Chancellor of the Exchequer Nigel Lawson.

—Even if the seven countries keep their economic policies in line, the proposal may

not stabilize the exchange rate system as much as proponents hope. Analysts point out that other factors also work to move exchange rates up or down. Dollars poured into the U.S. in 1982 and 1983, for example, partly because investors viewed it as a "safe haven" from political turmoil and the global debt problem. That in turn helped send the dollar's value even higher.

—The summit countries' commitment to the plan is still to be tested. Although all seven heads of government agreed to the proposal at the Tokyo summit, West Germany, for example, remains unenthusiastic about it.

At the same time, U.S. officials hope the plan will provide Japan's government with an adequate face-saving gesture to offset their rebuff of Tokyo's request last weekend that the U.S. intervene to help slow the yen's rise. The speed with which the Japanese currency has risen has hurt exporters in Japan and put new political pressure on Prime Minister Yasuhiro Nakasone. Mr. Nakasone vowed publicly last week to press the U.S. for some help.

It wasn't immediately clear how the currency markets would react to the new plan once its details were announced, but an adverse market reaction could deal the plan a serious blow. Much of yesterday's large drop in the dollar, especially against the Japanese yen, took place in New York trading before news of the Tokyo accord was circulated.

Observers also noted that yesterday's trading was a typically light, with markets closed in both London and Tokyo because of holidays. Nonetheless, some U.S. currency traders yesterday were expressing skepticism about chances for the accord to succeed.

The Group of Five will meet several times a year to review countries' economic performance. The G-7 will convene once a year and will also meet on decisions—such as last September's Plaza accord—that involve changes in the whole international monetary system. Both groups will have a hand in monitoring individual countries economic performance.

Mr. LUNDINE. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. Under the rule, all time for debate on this amendment has expired.

The question is on the amendment offered by the gentleman from Ohio [Mr. WYLIE].

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. WYLIE. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 188, noes 221, not voting 24, as follows:

□ 1835

The Clerk announced the following pairs:

On this vote:

Mr. Badham for, with Mr. Gephardt against.

Mr. Zschau for, with Mr. Morrison of Connecticut against.

So the amendment was rejected.

The result of the vote was announced as above recorded.

Mr. DASCHLE. Mr. Chairman, I rise in support of H.R. 4800, the omnibus trade bill of 1986, which was introduced by our distinguished majority leader, Rep. JIM WRIGHT. This legislation will send a long neglected message to our country's international trading partners: No longer will the United States be content to act as a doormat in world trade. No longer will countries be able to use the United States as a dumping ground for their surplus products. No longer will unfair trade practices against U.S. products be excused by our pursuit of the illusive goal of free international trade.

Quite frankly, it is a sad testimonial to our Nation's trade policies that this legislation is even necessary. It is regrettable that we need such a vehicle for sending a message to our trading partners. Perhaps even more regrettable is the fact that the administration, which steadfastly maintains that stronger trade measures are unnecessary, needs this legislative direction.

We are told to believe that the administration is adequately protecting our trading rights throughout the world. "Adequate protection" is not what pork producers in the Midwest feel when on a daily basis they see semitrailers

carrying live, imported hogs traveling the interstate highways. Nor is "adequate protection" the reaction of cattle producers when these same semis are seen carrying live cattle to slaughter in the United States.

Agricultural producers in South Dakota understand what this country's current trade policy has done to their industry and support tougher sanctions against unfair trade practices. When the grievances of the shoe industry, the textile industry, and the automobile industry are aired, Midwesterners can understand the pain. They can understand the damage caused by a "free trade policy" that provides a blank check to our trading competitors and shackles the domestic industry against which it competes. These individuals are not opposed to a "free" trade policy, as long as it is also a "fair" trade policy. The United States and its trading partners should be held to the same trading standards. That proposition does not exist in international trade today. H.R. 4800 acknowledges and addresses this unfortunate reality.

I commend the chairman of the House Ways and Means Committee. Mr. ROSTENKOWSKI, for the initiative he has taken in bringing this comprehensive trade bill to the House floor. As a member of the House Agriculture Committee. I also appreciate the fact that this committee was asked to make recommendations on the agricultural provisions of H.R. 4800. I would like to take a moment to comment on this important section of H.R. 4800.

When the omnibus trade bill was considered by the House Agriculture Committee, I offered an amendment which would require the President to take a tough, retaliatory trade response against those countries guilty of unfair trade practices against the United States. My amendment, which was unanimously adopted in committee, would have permitted the President to suspend these sanctions if the offending country agreed to stop their unfair practices, or provide producers in this country with reciprocal treatment. The provision finally adopted by the House Ways and Means Committee would also force the President to demand equal treatment in the international trading market.

The Agriculture Committee also agreed to a series of amendments addressing more directly the serious problem of imported cattle, pork, and lamb. The current meat import law, the Meat Import Act of 1979, basically defines only beef products as "meat articles" for definition under the import quota law. An amendment I offered would include all forms of live animals and processed pork under the "meat article" definition.

Also, the committee accepted an amendment I cosponsored which would place a 6-month moratorium on all beef imported from Canada, during which time the International Trade Commission must determine whether Canada is importing subsidized beef from the European Community in order to export their own beef supplies to this country.

As Members of this body might imagine, these two provisions were vehemently opposed by administration policymakers. Even though these amendments were not included in the final version of this omnibus trade bill, sufficient support has been generated within the livestock industries to ensure that this issue will be brought up for further consideration later this year.

The Ways and Means Committee did, however, accept a number of the Agriculture Committee's recommendations, including a provision which I sponsored with Congressman PENNY on the quality of grain being exported from this country and a provision requiring better import monitoring.

When farmers market dirty grain, they get penalized and receive less money for their product. When our grain exporters market their dirty grain, current grain standards allow them additional profit. There is great concern among farmers that the practice of adding dirt or dust reduces U.S. competitiveness in foreign markets. Some of our competitors—notably Canada—have stricter standards for grain exports than does the United States.

The grain quality amendment would protect the quality of grain exported from the United States. No foreign material, once removed, could be recombined, nor could foreign material of any origin be added to any grain to be exported which would result in reducing the grade or quality of the grain. The provision would also allow for adjustment of the moisture content of grain—blending not to exceed 4 percent.

H.R. 4800 also contains a provision on import monitoring. While import statistics are maintained on a continual basis, domestic production and consumption data that corresponds with import data is not maintained. This makes it virtually impossible to analyze the impact agricultural imports are having on the U.S. agricultural sector as a whole.

In an effort to answer the question: "To what extent are the levels of imports causing injury to U.S. farmers or to U.S. agriculturally related industries?", there is a need for designation of a lead agency to analyze and compile all existing data. My amendment gives the Secretary of Agriculture the responsibility for collecting and maintaining this necessary data.

In addition, to the above provisions. I was pleased that my colleagues on the Ways and Means Committee adopted a provision which will benefit our domestic ethanol industry. It puts our Nation in a position to finally close the door on heavily subsided Brazilian and Spanish wet ethanol imports coming through the Caribbean Basin. It closes loopholes that have allowed importers to evade duties on foreign-produced ethanol.

This bill is tough medicine for both our trading partners and administration policymakers. It mandates a response from administration trade policymakers that should come naturally and should not have to be legislated. It addresses a serious trade policy void that has been prevalent for all too long, a void that errs on the side of dropping our guard against our trading partners. All of this is done, of course, in the name of "free trade."

Let there be no mistake about the future of H.R. 4800. Administration officials have made daily policy statements against this bill. Nine Cabinet Secretaries and other high administration officials have told us that they will urge the President to veto this bill. And, for a President who went to the heart of the Midwest to claim that imports were not the farmers and ranchers problem, these officials will probably not have to work very hard to convince the President of the need to veto this bill.

Administration opposition will not alter the bottomline fact. We must open our eyes to this trading situation. We must tell our trading partners the "free ride is over." We must assure our domestic industries, whether it is agriculture, textiles, shoes, or any other, that we are not callous to the problems that unfairly subsidized imports have caused their industries.

This bill does that, Mr. Chairman. That is why I made the contribution to the agricultural section of this bill. That is why I strongly support this legislation.

Mr. FORD of Michigan. Mr. Chairman, I rise in strong support of H.R. 4800, the Trade and International Economic Policy Reform Act.

The time is now to take action to address our current trade problems. It is clear that the Reagan administration has failed to address our trade problems in a satisfactory manner. Our trade deficit has skyrocketed from $25 billion in 1981 to $148.5 billion last year. But instead of responding to our trade problems using the full force of our existing trade laws, the administration has done little more than negotiate with our trading partners. While the administration negotiates, however, American jobs and our manufacturing base are moving overseas.

Auto workers, steel workers, and small businessmen in my district know all too well the price of this trade deficit. Each $1 billion in our trade deficit costs the United States approximately 25,000 jobs. Since 1981, our Nation has lost 3 million jobs because of our trade deficit. The days are long gone when a young man or woman could get a job in an auto plant right out of high school, buy a new car within a year, and then think about buying a house and starting a family.

Of the 1.7 million in lost manufacturing jobs, the bulk are production jobs. In the auto industry, production worker employment is over 100,000 less than the 1978 level. At the same time, we tend to forget that managerial and other white-collar workers are also adversely affected by our trade problems. For example, in the auto industry between 1978 and 1985, one white-collar job was lost for every four blue-collar jobs. In addition to the 27,100 white-collar job loss in the auto industry during this period, Ford Motor Co. recently announced that it will eliminate up to 25 percent of its white-collar work force—13,000 jobs.

The administration continues to drag its feet on the trade crisis confronting the United States. Over $50 billion of our 1985 trade deficit is composed of trade with Japan. And nearly half of this amount consists of automobiles and auto parts. Yet, what has the administration done to address this problem?

During both the 97th and 98th Congresses, the House passed domestic content legislation. But, faced with adamant opposition from the administration, these bills were never reported by committee in the other body. Enactment of domestic content legislation would have provided import relief for our auto industry and, most importantly, its workers.

Instead, the only restraint on the import of Japanese cars is the voluntary restraint agree-

ment. Yet, the level imposed by the VRA has grown from 1.68 million cars in 1981 to 2.3 million this year. In fact, the Japanese exceeded the VRA in the year that ended in March by 4,000 cars.

The time for timid negotiations and unenforceable trade agreements is over. Now we need action. In my mind, H.R. 4800 does not go far enough in many respects. I recognize, however, that faced with the veto threats of the White House, there is only so far that we in the House can go.

Mr. Chairman, the product of six committees, H.R. 4800 addresses our trade problems in a comprehensive manner. I want to congratulate the Committee on Ways and Means for incorporating into its bill two provisions in particular that I view as crucial to addressing our trade problems.

First, H.R. 4800 will require the President to take mandatory action against our major trading partners that undertake unfair trade practices and have excessive trade surpluses with the United States. This provision would require the President to negotiate with certain nations to reduce their trade surpluses in 1987 by 10 percent from their 1985 trade surpluses with the United States and 10 percent in each succeeding year. If this provision were to take effect today, three nations—Japan, Taiwan, and West Germany—would be required to reduce their surplus with the United States. Clearly, action against these nations is warranted. Japan ran up a $51 billion trade surplus with the United States while both Taiwan and West Germany had a $13 billion 1985 surplus. If these nations fail to make this reduction, the President would be required to take a number of steps to reach this goal, including the suspension of trade agreements and the imposition of quotas and tariffs.

The second major provision of the Ways and Means bill would specify that the denial of internationally recognized workers' rights is an unreasonable trade practice. This would permit the President to take retaliatory action against countries which violate international labor standards such as collective bargaining, child labor laws, and health and safety standards. Korean and Taiwanese auto companies compensate their workers with pay and benefits at the rate of $1.75 per hour. These manufacturers are then able to undercut prices on American-built cars. While we cannot increase the wage levels of these nations, we can push them to recognize basic rights of workers.

In the area of steel imports, H.R. 4800 would put real teeth into their voluntary restraint agreements negotiated with 17 other nations and the EEC. Under the current system, these nations are able to circumvent the limits imposed by these agreements.

Other important provisions in this bill include a private right of action by a company to sue in the Court of International Trade for economic damages against foreign manufacturers or importers who dump products on the U.S. market. This will allow American manufacturers, such as steel companies, to be compensated directly for losses that they sustain from such practices.

H.R. 4800 also requires the President to take action against certain unfair trade practices. Under current law, the President has broad discretion whether to respond to unfair trade practices. The administration has refused to impose quotas and tariffs when these actions are clearly warranted, as in the footwear case.

I am an original cosponsor of legislation developed by the Education and Labor Committee that has become title V of H.R. 4800. Title V authorizes several education programs which would advance the knowledge and skills of current and future workers in areas that will enhance their productivity and competitiveness.

Up to $400 million is authorized to be distributed to State educational agencies that can select from among three categories of programs, depending upon individual State needs. Literacy programs authorized under this section address the needs of unemployed or underemployed individuals, displaced workers, and out-of-school youth to enhance their employability. Vocational education programs would focus on workers adversely affected by foreign competition to help them obtain and retain employment. The math, science, and foreign language addresses needs that are not being met under the Education for Economic Security Act.

$100 million is reserved for postsecondary education programs that would improve and expand foreign language skills of individuals as well as encourage a greater number of students both to enter the fields of and to become highly trained in mathematics and science. The education programs authorized under this bill are a modest attempt to help us compete more effectively both at home and in the global market.

Title V also creates two new training programs to assist trade-impacted companies and their employees. The first gives the Secretary of Labor authority to award grants for programs to retrain, counsel, relocate, and provide job search assistance to dislocated workers in industries which have been hurt by international competition. Assistance would be delivered to the dislocated workers much faster and more effectively than under the trade adjustment assistance program since once an industry is certified as trade impacted, there would be no need to certify particular firms or dislocated workers. This special trade-impacted worker program will provide $300 million above and beyond the funding authorized for training and job search assistance under title III of the JTPA.

The second program authorizes the Secretary to make grants to joint labor-management councils for 50 percent of the cost of upgrading the skills of workers whose jobs are at risk because of international competition. Rather than waiting until jobs are lost, the program will encourage employers and employees to take preventive measures to ensure the kind of high-quality, well-trained work force that international competition demands.

Mr. Chairman, I urge my colleagues to support this bill.

Mr. STAGGERS. Mr. Chairman, during the debate on H.R. 4800, the trade bill, I have heard many of my colleagues voice concern that this legislation is unnecessary and protectionist. I differ with both points.

If we were working with an administration that aggressively pursued a defined trade policy then I would agree. But the fact of the matter is that the administration has refused consistently to exercise any leadership or vision in this area. The fact is that we have no trade policy at all.

The Congress and American industry have been patient. We have given the administration nearly 6 years to formulate a trade policy. During this time American industry has taken every step at its disposal to make itself more competitive. But what have we received in return for our patience? Under this administration's "policy" we have traded jobs at home for a higher trade deficit. We have traded college educations, which might have been, for a higher trade deficit. And, for many, we have traded the American dream for a foreign car and a higher trade deficit.

This administration has effectively told the American worker to take a walk, and it has forced him to wear foreign shoes. As I speak today we see that 77 percent of the footwear market is composed of imports. The nonrubber footwear industry alone accounts for $5.3 billion of the total trade deficit.

If the administration won't uphold its obligation to the American worker and his family, then this body will. We believe that a fair opportunity in the international marketplace is a basic right.

To those who say that this bill is protectionist, I respond to the contrary. Indeed, the basis of this bill is that we enter into reciprocal agreements with our trading partners. Our goal is to foster free trade, growth, and opportunity in the international marketplace. Those who fear that this legislation will invite retaliation from our trading partners remind me of those who make sure to close the barn door after the horse has escaped. We are suffering retaliation today because we are without a trade policy. This legislation will move us closer together, not pull us farther apart.

Aside from those points, Mr. Chairman, I would like to emphasize two extremely positive aspects of this bill for West Virginia. First, I am especially supportive of the education and training measures within this bill. In fiscal year 1987 we provide $500 million to retrain American workers who are displaced from their jobs because we haven't had a trade policy. We provide another $500 million for literacy training, vocational education, and math and science training. These programs will be targeted to areas that have high unemployment and that have high rates of illiteracy.

The second provision that I wholeheartedly support will help West Virginia coal. This provision directs the President and the U.S. Trade Representative to negotiate an agreement with Japan under which Japan will import United States metallurgical coal in quantities equal to the amount used in the production of Japanese steel products that are exported to the United States. The President is directed to report the result of these negotiations to the Congress by November 1, 1987. The coal industry has suffered greatly because of unfair trade practices, and I am optimistic that this provision will provide badly needed relief.

Mr. Chairman, we are not here to ask for special breaks for special interests, we are here to ask for a fair break for the American worker. For 204 of our 210 years of our Na-

tion's existence the American worker has outproduced every nation on Earth and, given a fair chance, we will regain that prominence. Let's not allow 6 years of this administration's indifference to ruin 200 years of world leadership.

Mr. Chairman, this bill is good for West Virginia workers, its good for the American worker, and I urge a "yes" vote on final passage.

Mr. RAHALL. Mr. Chairman, I rise today in strong support of H.R. 4800, the Trade and International Economic Policy Reform Act of 1986. We must modernize U.S. trade laws. One only has to take into account our 1985 record breaking trade deficit of $148.5 billion—which far surpassed our 1984 deficit—to realize that U.S. trade policy has got to be revised. Our trade deficit has grown despite the depreciation of the dollar against other currencies, which theoretically should have helped ease the imbalance. Estimates of the number of Americans out of work because of the unfavorable trade balance vary from 1.5 million to as high as 4 million workers. Today, unemployment is the single most important concern facing my State of West Virginia. There, the unemployment rate, which although for the first time since 1982 is not the country's highest, is still in double digits. The enactment of this comprehensive trade bill will provide the crucial impetus to efforts to put our American industries and workers on a fair and even playing field with our competitors around the world.

There are several provisions in H.R. 4800 which I feel are especially important. One of these is the worker rights provision which is not a new proposal but an extension of existing trade law. These workers rights—the right to organize and bargain collectively, freedom of association, a prohibition on the use of forced or compulsory labor, a minimum age for children workers, and reasonable work conditions in regard to wages, hours of work, and occupational safety and health—are already in U.S. law in relation to the Generalized System of Preferences and the Overseas Private Investment Corporation. The denial of these internationally recognized workers rights must be defined as an unfair trade practice by the United States. I do not feel that it is at all unreasonable for us to require that our competitors grant their workers the same rights that we in the United States recognize without question as basic to our workers. This legislation would allow the President to take retaliatory action, including imposed higher tariffs and raising import quotas, against countries that violate international labor standards.

Of great importance to many industries, including the American specialty steel industry, is the provision which permits the imposition of duties against diversionary dumping. Diversionary dumping occurs when a foreign material or component is dumped in a third country market and then incorporated into a product being imported into the United States. Heretofore, U.S. industries have not been compensated for economic injury caused by dumping—this bill would allow U.S. firms and workers to file private lawsuits to recover damages related to imports for the first time.

H.R. 4800 provides much needed assistance to those who have been put out of work by foreign imports. The current administration's policy has been to ignore the retaining needs of these jobless Americans—only 7,000 people entered retraining programs last year and the administration wants to terminate these programs. This legislation streamlines and targets retraining more quickly to those industries hardest hit by imports and promotes computerized job banks to facilitate new careers and relocation where necessary. The bill also authorizes subsistence stipends to those being retrained.

H.R. 4800 contains a provision of great importance to the U.S. coal industry, section 176. This provision provides a sense of the Congress that the objectives of the November 1983 Joint Policy Statement on Energy Cooperation as it relates to U.S. exports of metallurgical coal to Japan have not been achieved and urges the President to direct the U.S. Trade Representative to negotiate an agreement with Japan under which that country will import quantities of U.S. metallurgical coal in amounts equivalent to Japan's market share of steel products imported into the United States.

With this provision, we are seeking reciprocity in the steel and metallurgical coal trade between the United States and Japan as metallurgical coal is an essential ingredient in steelmaking.

The Japanese have flagrantly ignored the commitment made to the United States in the Joint Policy Statement on Energy Cooperation as it pertains to metallurgical coals. In that statement, the Japanese were to maintain current levels of United States metallurgical coal imports and seek to increase their purchases from this country if conditions in their steel industry so permitted. While Japanese steel production has, in fact, increased since 1983, that country has nonetheless slashed the amount of metallurgical coal it purchases from the United States.

The inclusion of this provision in H.R. 4800 is intended to send a strong signal to the Japanese that we are calling their bluff and that we expect our agreements to be honored. The efforts on behalf of this provision by my friend RONNIE FLIPPO of Alabama and by the chairman of the Trade Subcommittee, SAM GIBBONS, are deeply appreciated.

Mr. MURPHY. Mr. Chairman, I rise today in strong support of H.R. 4800, the Trade and International Economic Policy Reform Act.

Contrary to reports we hear about the problems with American workers, by and large they are a patient and hard-working lot and only want a fair days pay for a good days work. During today's debate on trade, Congress would be wise to keep an ear tuned to our shops, mills and factories. Our wage earning constituents are telling us loud and clear that talk is cheap.

For too long, we have sat idle while the policies of this administration have devastated America's standing in world trade. As a result, since 1981 the United States' trade deficit has grown sixfold, from $25 billion to $150 billion. In just the last 2 years the trade deficit has doubled. In fact, with a net external debt of $101 billion, the United States is now the world's greatest debtor nation. Is this the kind of future we want to be planning for our children?

These sad statistics do not tell the whole story. The American worker, however, realizes the very real and serious consequences for our economy of these numbers. Export related jobs are down 25 percent. Over 2.3 million manufacturing employees have been displaced. And between 1979 and 1984, 11.5 million Americans joined the unemployment rolls because of plant closure, slack work or layoffs.

In my own district, statistical unemployment remains in double figures largely because imported steel has crippled America's steel and coal industries. Between 1980 and 1985, over 153,000 American steel workers lost their jobs. Yet, the Reagan administration ignored voluntary quotas and allowed foreign steel to double its market share. In 1980, imported steel accounted for 16.3 percent of the U.S. market. By 1985 the imported share had risen to 30.7 percent and climbing.

The result of our current national trade policy is that 8.4 million Americans remain unemployed. Another 7 million people are too discouraged to continue seeking employment and are no longer counted in monthly unemployment figures. Economic necessity has forced millions more to take jobs far below their ability or ambition.

Moreover, for many of those lucky enough to hold on to their jobs, a bitter price is paid. If you do work, you work for less. Since 1977, the average weekly earnings for U.S. production employees has fallen 9 percent. This severe erosion of our standard of living is shattering the hope of many hard-working Americans. For the first time in our history we have a generation coming into the work force who do not expect to live as well as their parents. What has happened to the American dream?

A careful, nonpartisan and responsible examination of economic reality in the last 5 years demands that we take a new direction in trade policy. With the Trade and International Economic Policy Reform Act, Congress has taken the first step in restoring America's place in the world economy. H.R. 4800 gives the United States the tools that it needs to reduce the enormous trade deficit and ensure America's competitiveness in world markets for years to come.

H.R. 4800 sends a clear message to our trading partners—we will no longer tolerate unfair trading practices and we will vigorously enforce U.S. trade laws. New guidelines for American trade negotiations establish that unfair labor practices abroad which give foreign producers a competitive advantage will be met with a swift and appropriate response. America will enjoy an enhanced ability to deal with many exploitive foreign labor practices that undermine U.S. products.

The bill strengthens America's export position and promotes world growth by giving the President new tools to open markets overseas and provides an opportunity for U.S. firms to adapt to new international competition.

Most importantly, Mr. Chairman, H.R. 4800 addresses the problems of American workers displaced because of trade. The act establishes programs of education and training designed to improve the competitiveness of American workers in international markets.

Only a committed investment in our human capital will ensure that the United States regains its place in the world economy.

Mr. Chairman, H.R. 4800 is a bill for the American worker. It rectifies the unfair and ill-conceived trade policies of the last 5 years by preserving fair and open trade among nations. The act would prod our trading partners to drop unfair restrictions on our exports and force others to end unjust labor practices that undermine worker rights everywhere. The message from our mills and factories is clear, trade legislation is long overdue and this bill deserves our unqualified support.

Mr. MANTON. Mr. Chairman, I rise in strong support of H.R. 4800, the Trade and International Economic Policy Reform Act of 1986. I want to commend the leadership for bringing this comprehensive trade reform measure to the floor of the House.

Mr. Chairman, the Reagan administration claims this bill will spark a trade war. I disagree. That war is already on and America is losing. Last year the U.S. trade deficit was a record breaking $148.5 billion and there is little relief in sight. American firms and workers continue to fall victim to the unfair trading practices and closed market policies of our foreign competitors. The Reagan administration has the tools to fight these unfair trade practices. Yet the President has refused to act. Under the Reagan administration, the U.S. trade imbalance has increased by a staggering 600 percent. More than 4 million American jobs have been lost. For the first time since World War I, the United States has become a new debtor nation.

Mr. Chairman, America must fight back. The administration's free trade rhetoric must be backed by tough action to eliminate unfair trade and to open foreign markets to U.S. goods. H.R. 4800 would require the President to retaliate against nations that have been found guilty of violating existing trade agreements or engaging in unjustifiable trade practices. The legislation would also require mandatory negotiations with any major U.S. trading partner that has built an excessive trade surplus over the U.S. based on a pattern of unfair trading practices or closed market policies. In addition, the legislation streamlines and modernizes existing trade law to strengthen our ability to fight unfair trade and promote U.S. exports.

H.R. 4800 also contains an important provision to combat the use of mixed credits by other nations. Mixed credits are a combination of official export loans sanctioned by the Organization of Economic Cooperation and Development [OECD] and low interest foreign aid loans or grants. The use of mixed credits by other nations places U.S. exporters at a severe disadvantage. Despite agreements to limit their use, some countries continue to offer mixed credits to help their exporters capture foreign markets.

H.R. 4800 would create a $300 million war chest to fight the use of mixed credits. However, I am concerned that funding for the war chest would come out of the limited funds available for Eximbank direct credits. Eximbank direct loans enable U.S. firms to successfully compete for export sales. It is vital to maintain the viability of the Eximbank Direct Credit Program.

Mr. Chairman, I strongly support the amendment offered by the gentleman from Washington [Mr. BONKER] that would make certain that our efforts to fight mixed credits do not detract from the Eximbank Direct Credit Program. Under the Bonker amendment, existing resources within the Agency for International Development would be utilized to support U.S. mixed credits.

Furthermore, the Bonker amendment would make the program more workable by requiring only a majority vote of the National Advisory Council [NAC] to authorize the use of mixed credits. The existing provision of H.R. 4800 would require a unanimous vote by the NAC to permit the use of mixed credits.

Mr. Chairman, we need to fight the use of mixed credits and I believe the amendment offered by the gentleman from Washington, [Mr. BONKER], takes the right approach.

Mr. Chairman, in closing I want to again commend the leadership for giving the House an opportunity to act on legislation designed to remedy our serious trade problems. H.R. 4800 will make certain that American firms and workers are given an opportunity to compete in the international marketplace on a level playing field. I urge my colleagues to support this important legislation.

Mr. OWENS. Mr. Chairman, workers' rights have developed over the last century in this country. It took years of struggle to establish basics such as a minimum wage, a limited workweek and the end to child labor. Other rights such as workers' compensation, unemployment insurance and health and safety standards came later. These rights were not gained without recognizing that the society as a whole would have to provide the means to make them a reality and that the society as a whole would benefit from decent working conditions for all.

The omnibus trade bill includes a workers' rights provision which extends section 301 of the Trade Act of 1974. In that act, three trade practices are declared to be unfair. They include denial of market access, denial of the opportunity to establish a business in a foreign country and the failure to protect copyrights, patents, and other intellectual property rights. The bill before us, H.R. 4800 would merely add to the list of unfair trade practices. The elements which would be added are freedom of association, the right to organize and bargain collectively, a prohibition on the use of forced or compulsory labor, a minimum age for the employment of children and acceptable conditions of work with respect to wages, hours of work and occupational safety and health. These provisions have already been included in the generalized system of preferences and the Overseas Private Investment Corporation requirements. They are nothing new.

How can anyone be opposed to an ending of child labor? Does it really matter whether we are talking about 10 year olds in Thailand or 10 year olds here? If one cannot find oneself opposed to the use of the labor of children, how can we realistically expect adult workers here to compete with the economically coerced labor of children abroad? The practical reality is that children who are viewed as an expendable resource to be used up in factories in other countries can invariably provide cheaper labor than adult Americans.

In the area of free association and organizing rights, it is clear that these rights also stand as a surrogate for voluntary labor. Workers who have no options but to work at subsistence wages where they cannot organize to improve the working conditions or the wages are, in a very real sense, forced labor. When their employers can rely on the power of the State to defeat any attempt to improve their lot, then we are really back to the issue of compulsory labor. Such labor will inevitably be cheaper than American workers.

How, one may ask, can we really know if wages are unreasonably low and working conditions are dreadful? One can simply compare the buying power of the wage in relation to the cost of living. For example, in Haiti, the daily wage generally falls between $2.50 and $3.50 per day. However, in Port Au Prince, the price of rice is 60 cents per pound when the cost in New York City is from 20 to 40 cents depending on the quantity and place of purchase. In the case of Thailand, it is not clear that the child workers are even paid, but rather that they are given rice and vegetables and a place to sleep in a storeroom.

The workers' rights provisions in H.R. 4800 do not impose American standards on workers or employers in other countries. They simply open the door to fair labor practices from which improvements in the conditions of work, wages and the end to child labor will result. These do not go as far as basic entitlements which American workers are generally given as a part of employment. They do not guarantee benefits such as health insurance or Social Security coverage. They simply allow workers to associate with one another, organize if they choose and play a role in the establishment of what the working conditions and standards will be. As such, they deserve our support. They will protect American workers as well as workers abroad who are currently unable to exercise any control over their own work situation.

I urge my colleagues to support H.R. 4800 and to defeat any attempt to delete the workers' rights provision of the bill.

Mr. FAZIO. Mr. Chairman, I rise in support of H.R. 4800, the Trade and International Economic Policy Reform Act of 1986.

I would like to commend the six committees, their chairmen and members for putting together this landmark piece of legislation. This bill represents the most comprehensive effort to reform and modernize our trade laws in years. I think the Congress, and indeed the Nation, owes a sincere debt of gratitude to Mr. ROSTENKOWSKI, Mr. GEPHARDT, Mr. GIBBONS, Mr. FASCELL, Mr. BONKER, Mr. ST GERMAIN, Mr. HAWKINS, Mr. DE LA GARZA, Mr. DINGELL, Mr. FLORIO, and all of the others who played a role in this effort, for bringing this bill to the floor.

As the author of H.R. 4226, the Competitive America Trade Reform Act of 1986, one of the first omnibus trade proposals introduced in the House, I am particularly pleased that the bill before us today takes a comprehensive approach to solving the very serious trade and competitiveness problems facing the Nation today.

H.R. 4800 offers a comprehensive, growth-oriented solution to the trade crisis. It offers a concerted and coordinated trade policy that calls for action on a broad array of fronts. It recognizes that no single action alone can reverse the trend of expanding trade deficits. And, it reflects the reasoned view that it's not enough to rely on free markets as the Reagan administration has advocated.

Since 1981, the U.S. trade deficit has nearly quadrupled, and the current account balance has plummeted from plus $6 billion to minus $110 billion. Over 1.7 million manufacturing jobs have been lost, and roughly half a million farms have been forced to foreclosure. The administration's blind faith in free trade has meant a sustained pattern of foreign capture of both our domestic markets and our foreign markets. And, as millions of American jobs have gone overseas, it is unconscionable that the administration has slashed export promotion programs, rejected existing authority to fight unfair trade practices, and tried to eliminate assistance to trade-dislocated workers.

Faced with an overwhelming call for action on the trade front, primarily from this Chamber and the authors of this bill, the administration has been prodded into taking a few responsible steps toward addressing the trade problem. The administration has stepped up efforts to enforce some of our existing trade laws, and Treasury Secretary James Baker III's initiative to devalue the dollar through the group of five meeting at the Plaza Hotel in September of last year continues to show considerable promise. To those who claim we act with purely partisan motives here today, the record shows we have all applauded Secretary Baker's more realistic, pragmatic approach. The administration should continue these efforts. But clearly more must be done if we are to put the brakes on the trade deficit which raced past $148 billion last year and is still gaining speed.

H.R. 4800 offers a concrete solution. It doesn't address our trade deficit by closing the world out. Critics to the contrary, this is not a protectionist bill. It seeks to make American businesses and workers winners rather than losers by enhancing U.S. competitiveness and opening up new markets for U.S. goods and services.

As in my proposal, H.R. 4800 builds on recent efforts at bringing down the dollar. It mandates intervention in the currency markets to stabilize the value of the dollar at a competitive level and directs the President to initiate new international negotiations to achieve long-term reform of the international monetary system.

We should never go back to fixed exchange rates; but we can reach multilateral agreements to prevent the extreme distortions that have recently plagued the world's currency market. Already there are political rumblings in Japan about a stronger yen. We must act now to head off turmoil in monetary values. New agreements on monetary stability can also prevent a war of competitive currency devaluations—a dangerous prospect that becomes more of a concern as the dollar falls against a broader range of currencies. It was just this kind of beggar-thy-neighbor monetary competition that sent the world economy into a downward spiral in the 1930's.

The bill also calls for a more active defense of America's trading rights. It calls for a new round of trade negotiations so that we can expand international trading rules to cover farm products, high-technology and services—key American industries that now are at the mercy of foreign governments who subsidize their exports and foreign industries who dump their products on our shores.

An activist trade policy, such as that which is called for in this bill, is founded on a recognition that our economic security is as urgent a priority as our national security. Far too often, the President has waited to take action on trade disputes until the political heat became unbearable. That strategy may have protected the administration's political security, but it has done nothing to protect the economic security of our farmers, microchip producers, and steelworkers. We need trade sanctions that take effect—not when the President's polls begin to drop—but as soon as our trading rights are violated. That's the kind of approach offered in this bill.

H.R. 4800 also recognizes that we must start investing in our factories and our people if we are going to win the global competition. Protectionism cannot improve the quality of American cars or computers. But major investments in basic research, technical training, and education can. The Government must also work to foster better cooperation between industry, labor, and public institutions at all levels. The bill addresses both of these needs. It includes funding for a variety of education and training programs to enhanced the competitiveness and productivity of our work force. And, it creates a Council on Industrial Competitiveness, a 16-member panel to help identify needed changes in Federal policy to promote the efficiency and resourcefulness of U.S. industries.

The bill also gives workers and firms an opportunity to adapt to foreign competition. Jobs will still be lost due to foreign competition, but H.R. 4800 recognizes that a humane enlightened Government must facilitate the transition to new employment opportunities for workers in industries which are unavoidably dislocated by foreign competition. Starting over will not be easy for those who have to go through retraining, wrenching change rarely is, and Government must do its share to make that transition attainable. In the final analysis an open economy will not long remain so if those who are thrown out of jobs are given a lecture on the virtues of free trade rather than the skills to regain their economic independence. We offer more. This bill offers a revitalized and expanded program of training and employment assistance to trade impacted workers, including farmers.

Finally, the bill recognizes the need to stimulate demand for American products in developing countries. Those nations once absorbed 40 percent of our exports. But a heavy burden of international debt has crushed the ability of many of these nations to "buy American." The bill takes steps to ease the recessions and debt crises which plague these nations, which in turn will allow us to boost our exports, particularly agricultural commodities, while improving the climate for democracy and human rights in Latin America and elsewhere.

H.R. 4800 fills the void, the vacuum that had existed until very recently in the administration's policy, and represents an effort to put in place the effective instruments we need for the creation of a cohesive trade policy and an agenda for competitiveness. Some provisions may be in need of some adjustment. But clearly we need to establish the ground rules for America's growth and competition in the world marketplace for the next half century, and this is a constructive step toward that goal.

Mr. OBERSTAR. Mr. Chairman, the principal purpose of trade legislation should be to reverse the trend during the last several years of annual deficits that have mushroomed from $26 billion in 1980 to $148.5 billion in 1985. We have accumulated $400 billion in total trade deficits over the course of the Reagan administration, and the administration's refusal to acknowledge the drastic consequences for our domestic economy of this massive trade imbalance suggests there is little hope for relief unless Congress acts on H.R. 4800, the Trade Reform Act.

The administration has been largely unsuccessful in attempting to persuade our trading partners to open their markets to U.S. goods in the same manner that we open our markets to their products. It is clear to thousands of U.S. workers who have lost their jobs to imports that the simplistic and one-sided free trade policy of recent years has failed and that the victims of that failure are U.S. workers, industry and agriculture.

These facts alone indicate why we are here today. The administration has defaulted on its obligation to provide for the domestic trade economy, and the Congress must now reclaim its constitutional authority in foreign trade matters and clearly establish a fair trade policy for the administration to follow.

A careful study of U.S. trade practices reveals commonsense measures that should have been made integral parts of U.S. trade policies at the outset—policies that are only now being taken seriously. These measures include provisions to deal with nations which abuse or exploit workers' rights, and nations choosing to operate with export surpluses.

These important factors, the same ones the gentleman from Illinois proposes to eliminate, are not only important to rectify gross trade injustices, but they also force other nations to upgrade themselves to 20th-century standards. Child labor, sweatshop conditions and exploitative wages belong to this Nation's past. America's refusal to insist that our trading partners respect minimal workers' rights undermine all that progressive labor laws have achieved for workers in the American marketplace and which domestic industries adhere to and that refusal gives foreign competition an unfair advantage based upon exploitation of their work force.

While the United States has no authority to force other nations to adopt our work codes, we do have the option of imposing consequences upon those nations which permit exploitative measures as a means of reducing the labor costs of their goods, which then can be sold in the United States at prices much below domestic prices.

Our imports of labor-intensive products have not helped to promote human rights or raise living standards for workers overseas. In fact, income distribution in the Third World has become less equitable, with the poorest people now 10 to 20 percent worse off than they were 25 years ago.

In developing nations that rely on labor-intensive exports, dictatorships of the right and left keep wages down and keep the work force in line. They do this with the knowledge that other nations are eager for their products and will allow these inhumane practices to continue.

And yet we continue to allow these products into our country, products that we would not allow to be produced here under such conditions. American workers and industries who play by the one-sided rules of free trade come out the losers to their competition in nations which choose to operate in total disregard of labor standards we adopted decades ago.

But aside from these humanitarian reasons, economic sense tells us that cheap labor elsewhere means cheap imports on the U.S. market, which means inability of U.S. goods to compete. Current law and trade policy require our industries to compete under these conditions, to the detriment of our principles, our jobs and our industrial base.

We are not trying to dictate standards of workers' rights throughout the world. We are trying to end the unfair advantage foreign goods enjoy through the exploitation of their workers. These provisions of H.R. 4800 make guilty nations accountable for their practices by defining violations of internationally recognized labor rights as an unreasonable trade practice subject to retaliatory measures by the United States.

The Crane amendment would eliminate the requirement in this bill for negotiations with major trading partners determined to have an excessive trade surplus as the result of unjustifiable trade policies. These negotiations would seek to reduce the 1987 surplus 10 percent below the 1985 surplus, and to cut the surplus an additional 10 percent below the previous year's surplus for subsequent years.

Opponents to this provision claim that the administration is already aggressively fighting unfair trade practices by negotiating market-opening agreements and through GATT negotiations. But look at the track record. The plain and simple truth is the administration's attempts to reverse the trade imbalance just aren't working; their actions appear mere tokenism.

A case in point is steel. The domestic steel industry has been devastated by a surge in imports since 1980. In that year the value of domestic steel shipments was $30.7 billion. Last year domestic steel shipments were valued at $24.9 billion. Foreign imports in 1984 accounted for a historic annual high of 26.4 percent of the U.S. market. Last year, imports took 23.2 percent of the domestic market which is far short of the President's own target.

Clearly, imports are largely responsible for the devastation of American industry. In my own district, the Mesabi Iron Range will employ some 6,000 iron ore miners this year. In 1980 these same mining operations employed 15,000 workers.

Two years ago this body came very close to enacting the Fair Trade in Steel Act, which would have imposed mandatory quotas on steel and iron ore imports. The President interceded at the last hour, asking for authority to negotiate voluntary restraint agreements, with a goal of reducing imports to 18.5 percent of the domestic market. Congress dropped the quota bill, passed the VRA authority, and a year and a half later we are a long way from that target.

In fact, as the period for negotiated settlements draws to a close, it does not appear likely that we will even come close to the President's own modest goal. The most recent indicators reveal that imported steel accounted for 23.2 percent of the domestic market. The voluntary approach just plain doesn't work.

The failure of the VRA program is only one indication of the administration's dismal trade track record. We have been patient but we cannot afford to be patient any longer. Our trading partners have indicated no willingness to adjust their markets to our grievances—and why should they? Until the United States indicates its dissatisfaction with current practices and takes a tough stand against them, there is no incentive or practical reason for nations to reevaluate, much less change, their trade practices.

The provisions opposed by the Crane amendment are the heart and soul of the trade bill. Without workers' rights language and export surplus provisions, violating nations will continue to operate virtually unscathed. And we will have failed our obligations to American industry and to American workers by failing to enact legislation that effectively addresses one of the worst inequities in current trade practice.

Mr. DOWNEY of New York. Mr. Chairman, I want to express my strong opposition to the removal right provision in H.R. 4800, which would restrict imports of Canadian lumber and other wood products.

If you ask the proponents to defend this provision, they tell you that Canadian timber is subsidized by its Government. They also argue that Canadian timber is less expensive that United States timber. And, they claim that without restrictions on imports of Canadian lumber, American jobs will be lost.

These are all appealing arguments. If I did not know the facts, I, too, might support the removal right provision. Fortunately, I do know the facts.

I know that the question of whether or not a subsidy exists on Canadian timber has been exhaustively debated since 1982. The International Trade Commission and the U.S. Department of Commerce agree that under current law, no substantial subsidy exists.

I know that the Department of Commerce examined the cost differences between Canadian and United States lumber in a wide-ranging study. The Department concluded that it would be "arbitrary and capricious" to compare stumpage fees in the two countries.

There are also jobs studies that show that this Nation will lose more jobs with the removal right provision than without it. One estimate is that 27,380 jobs will be lost if this provision becomes law, more than 2,600 jobs in my State. These are workers in industries that use or transport Canadian lumber. And New York is not alone. Forty-six States will lose jobs if this provision becomes law.

The removal right provision in H.R. 4800 should be opposed by anyone who cares about the American worker, business owner or consumer. If the proposed change in the law were to take effect, the higher cost of Canadian lumber in question would be passed through the entire wood-using economy. From the forest to the homebuilder company, from the lumber company to the hardware store, from the sawmill to the morning newspaper, higher prices will have to be paid all along the way.

The consumers of wood products will lose, too. The cost of the average home will rise by several thousands of dollars. The National Association of Home Builders estimates that for every $1,000 increase in the cost of an average home, more than 300,000 families are priced out of the housing market.

Mr. Chairman, the removal right provision does not belong in this important piece of trade legislation and I am sorry that there was no opportunity provided under the rule to consider it alone. If there had been, I would have voted to remove the removal right provision. Our bill is supposed to help American workers and consumers—not hurt them.

Mr. BEDELL. Mr. Chairman, today I rise in support of the omnibus trade bill of 1986, which represents the most comprehensive effort to reform and modernize our trade laws in years. If approved, this measure will enact needed and extensive changes in U.S. trade practices, and policies. While I am in support of such changes, I do so with certain concern because of a provision that will amend the tariff schedules of the United States to allow the importation of fur skins from the Soviet Union. In my view, it is unfortunate that the authors of this legislation apparently did not take into account the possible adverse effects that this particular provision could have upon our domestic fur industry.

In its present form, this provision will lift a 34-year-old ban on the importation of seven wild furs from the Soviet Union. The furs included are: Kolinsky (Asian mink), muskrat, ermine, fox, weasel, marten, and mink. Four out of seven of these furs are produced in this country, both in the wild and by ranching operations. In this regard, it is important to note that each of these domestic operations are part of a thriving billion-dollar U.S. fur industry. With the introduction of Soviet furs into the United States market, it is possible that there will be a deleterious impact on the United States fur industry. For example, we know that the Soviets produce approximately 13 million mink pelts per year. Of this amount, the Soviets export 4.25 million or 25 percent of those pelts to other countries. Although the amount of mink pelts exported from the Soviet Union may not seem damaging to United States fur markets here and abroad, we must consider that, with added access to the United States market, the Soviets easily could obtain an advantage over United States producers by increasing their exports and flooding the United States market.

Clearly, it is in the best economic and national security interests of the United States to establish strong bilateral trading relationships with all nations, including the Soviet Union. Administration officials have noted that "peaceful trade" with the Soviet Union represents the first step toward global stability and a better working relationship with the Soviet Union which will benefit both of our nations. While I firmly support a strengthening of such trade, I do not believe there has been sufficient research made to make an accurate analysis of the possible negative impact on the U.S. industry if the ban on furs is lifted. With only limited knowledge of Soviet industry and trade policy, we endanger a part of our domestic industry, only to perform an act of good will.

In conclusion, although it is important to keep a strong bilateral trade relationship with the Soviet Union, we should not needlessly sacrifice our domestic industries to make symbolic gestures to it or any other country. We must be fully aware of the possible effects of our actions on our national industries and, as such, the long-term health of the U.S. economy. Finally, I shall lend my support to passage of this legislation as a result of its many merits which will reconstruct and strengthen our trade policies and abilities to compete more effectively. Hopefully, this legislation will maintain America's role as a leading industrial power. Nevertheless, it remains my hope that problems affecting United States-Soviet fur trade will be better addressed either by Congress or by Executive action before, not after, any damage to the United States fur industry is evidenced.

Mr. MOLLOHAN. Mr. Chairman, I rise today in support of H.R. 4800, the Trade and International Economic Policy Reform Act.

This is a good bill. No one here will argue that it is a perfect bill, but, considering the complexity of the issues involved and the divergent views of this House, it is an excellent package.

Opponents of H.R. 4800 argue that it is intended not so much to solve our trade problems as to embarrass the President. This is incorrect: The trade policy of the President—when he finally got around to claiming one—is sufficiently embarrassing without any assistance from the House of Representatives. The credit there is all his.

Opponents also argue that the bill is, in the words of Clayton Yeutter, "Festooned with special-interest provisions," and "measures that are pure protectionism." Well, yes, there are special-interest provisions: H.R. 4800 takes a special interest in the damage unfair foreign subsidies have caused our steel industry; it takes a special interest in the damage unfair—not to mention inhumane—foreign labor practices have caused our textile and shoe industries; it takes a special interest in foreign companies' predatory targeting of our telecommunications industry. I'm glad the bill's sponsors took this special interest in these industries when they drafted the package. Frankly, it's about time someone took a special interest in these problems.

Are these measures "pure protectionism?" No. Indeed the prevalent theme throughout this wide-ranging bill is that it is designed to enhance our ability to react to other countries' unfair trade policies. The United States does not have a first-strike trade policy and this bill will not establish one: It merely improves our defensive posture. This theme is overlooked by the bill's opponents.

The Rostenkowski-Gephardt provisions, for instance, are described by Clayton Yeutter as requiring "an annual 10-percent reduction in our bilateral trade deficits with Japan, Taiwan, and West Germany, through unilateral tariffs or quotas if necessary." Sure, that sounds overtly protectionist, but Ambassador Yeutter ignores the qualifying language of the provision, which would mandate the reductions only for countries that "maintained a pattern of unjustifiable, unreasonable, or discriminatory trade policies or practices." In short, we would demand these trade concessions only after a demonstration of unfair foreign trading practices.

Section 301 of the 1974 Trade Act authorizes retaliatory action against unfair trade practices. H.R. 4800 facilitates the process and expands the concept of unfair trade practices to include industrial targeting and deprivation of internationally recognized labor rights. While the latter criterion is admittedly controversial, I believe it does constitute an unfair trade policy, giving the United States an economic justification to retaliate as well as imposing upon us a moral obligation to further the quest for workers' basic rights.

H.R. 4800 amends the section 201 escape procedure, transferring authority to make final decisions on whether an industry has been hurt by imports from the President to the U.S. trade representative. As the trade representative serves at the behest of the President, I'm not sure how effective this change will be, but, considering that for every two times a President has upheld an ITC finding of import damage since 1975, he has rejected three more; it is at least a step in the right direction.

So-called diversionary dumping, where an exporter dumps its products in the United States via a third country to evade our present antidumping laws, is patently unfair. Again, the bill's prohibition of this practice simply places the United States in a better position to defend itself from predatory foreign trade policies.

The same is true of provisions protecting the United States from natural resource subsidies. Is it fair for the Mexican Government to sell Pemex crude oil to its carbon black industry at $2 a barrel when a carbon black plant in my district has to buy oil at the world market price? Notwithstanding the recent drop in the price of oil, the Mexican carbon black industry has a distinct—and unfair—advantage over the West Virginia company.

Other sections of the bill increase the ITC's ability to react to foreign corporations' confiscation of U.S. trademarks, patents, and copyrights, and direct the trade representative to negotiate open markets for the American telecommunications industry.

I cannot overstate the case, Mr. Chairman. These provisions, all of them are defensive in nature. They would give the United States a defense not against simple foreign competition—the American worker needs no defense from that—but against unfair foreign policies. The American worker and manager can successfully compete against their counterparts from any part of the globe, but they cannot be expected to compete alone against foreign competitors who are actively and aggressively supported by their government.

Mr. FRENZEL. Mr. Chairman, one example of a protectionist giveaway to a U.S. industry in H.R. 4800, the omnibus trade bill, relates to hogs and pork products. This section of the bill passed in our committee without adequate hearing or attention.

Section 132 of H.R. 4800 would amend the definition of "industry" in certain antidumping and countervailing duty investigations involving processed agricultural products, and permit the International Trade Commission to combine farmers and processors into a single industry for purposes of the injury test. As written, the amendment applies to all of agriculture, but it is clearly targeted at imports of fresh, chilled, and frozen pork from Canada. An association of United States hog farmers has already secured countervailing duties on imports of live hogs from Canada, and now seeks duties on Canadian pork imports, even though such imports constitute only about 3 percent of United States pork consumption.

Proponents of section 132 argue that the legislation will close a loophole in existing law. They claim that, in the absence of duties of Canadian pork meat, the Canadians are circumventing the duties on live hogs by slaughtering the hogs in Canada and shipping them to the United States as pork. But the statistics do not support this claim.

Since the final countervailing duty order on live hogs from Canada was issued last August, these imports have fallen precipitously. According to the Department of Commerce, Canadian hog imports averaged about 139,000 head per month during January–July 1985, but fell to just over 51,000 head per month during August–December 1985. And, in the first quarter of 1986, imports averaged less than 49,000 head per month, in contrast to an average of over 180,000 head per month during the first quarter of 1985. This decline in average monthly imports during the first quarter of 1986 compared to the first quarter of 1985 is the equivalent of over 22 million pounds of fresh, chilled, and frozen pork per month.

This decline in hog imports has not been offset to any significant degree by an increase in imports of pork meat. Imports of fresh, chilled, and frozen pork from Canada during August–December 1985 averaged just over 1 million pounds per month higher than in January–July 1985. Similarly, in the first quarter of 1986, pork imports averaged just over 1 million pounds per month greater than in the first quarter of 1985. Hence, only about one-twentieth of the decline in hog imports has been offset by an increase in pork imports. The perceived threat of product-shifting from live hog imports to pork imports simply has not materialized.

Not only is section 132 unnecessary to protect American hog farmers from increased Canadian pork imports, but it also appears to violate the GATT. The Trade and Tariff Act of 1984 contained a similar provision which combined grape growers and wine producers into a single industry under the antidumping and countervailing duty laws. A GATT panel deter-

mined earlier this year that this 1984 legislation is inconsistent with the GATT antidumping and subsidies codes. In light of this decision, it is doubtful that legislation to combine hog farmers and pork packers into a single industry could survive a GATT challenge. The passage of such legislation only invites retaliation by our trading partners.

Another, perhaps greater, danger of the legislation is the possibility that other nations may adopt similar policies with respect to U.S. exports. The premise of the allegation that Canadian pork imports are subsidized is the claim that Canadian Government programs for hog farmers bestow indirect subsidies on pork packers. If the United States imposes countervailing duties on that basis, what is to prevent other nations from determining that U.S. farm programs, which cover a wide range of agricultural commodities, bestow indirect subsidies on U.S. agricultural processors and their exports? Duties on a variety of processed agricultural exports could result.

In sum, the passage of section 132 would pose a significant risk to U.S. agricultural exports, and the arguments in favor of section 132 are simply unconvincing. The proposed change in the antidumping and countervailing duty laws does not appear to be in the best interests of the United States, and would only complicate our trade relations with Canada at a time of important and sensitive trade negotiations between the two countries.

Mr. CRANE. Mr. Chairman, I rise today to express my opposition to the removal-right provision of H.R. 4800 which is designed to restrict imports of Canadian lumber and other wood products.

My opposition to this legislation springs from a philosophical aversion to protectionism as well as a very practical concern about the impact that such restrictions will have on our economy.

In a 1983 countervailing duty case, the U.S. Department of Commerce completed a wide-ranging study of the lumber industry in both countries and concluded that it would be "arbitrary and capricious" to compare stumpage fees in the two countries. The Department held that the timber-pricing policies in Canada did not constitute a subsidy under international trade rules.

Now, the U.S. timber industry wants to amend countervailing duty laws to redefine "subsidy" in a blatant attempt to overturn the outcome of the 1983 CVD case. The removal-right provision would virtually guarantee the United States industry a subsidy finding of at least 30 percent against Canadian lumber imports.

My colleagues who support this provision suggest that all they are trying to do is give the Department of Commerce some guidance in defining subsidy cases in future years. They think that the Commerce Department made the wrong decision in 1983 and want to help it make the right one in the future.

But, Mr. Chairman, what I want to know is why we're amending our CVD laws to fit the needs of the U.S. timber industry when the industry feels comfortable filing a CVD under current law.

The U.S. timber industry filed a new CVD case on this past Monday, May 19. Apparently, it is confident that it can win a new case without this amendment to CVD laws. So, why are we bothering with it?

The removal-right provision targets our best trading partner, Canada. Passing legislation that would result in high tariffs on one of Canada's most important exports to the United States would create long-term tensions between our two countries and could derail free trade agreement negotiations now under way.

I urge my colleagues to oppose the removal-right provision of H.R. 4800. I will continue to oppose it, should we go to conference with the Senate on a trade bill.

Mr. BROWN of California. Mr. Chairman, I rise in support of H.R. 4800, the Omnibus Trade Bill of 1986. In the past, I have been reluctant to support protectionist trade measures because I believe they are only short-term solutions at best. Lately, though, this avoidance has slowly begun to erode.

Since 1981, the U.S. trade deficit has grown enormously—from $25 billion when the Reagan administration took office, to nearly $150 billion in 1985. In just the last 2 years, the trade deficit has more than doubled. So far, our trade deficit has cost America some 2.2 million jobs. Recent news reports and special documentaries have vividly depicted the plight of workers who have lost jobs due to the mounting trade imbalance. It is apparent that whatever trade policy the administration has ostensibly formulated, it has not been effective.

The huge trade deficit has had dramatic consequences for American firms and workers. Manufacturing has been hit particularly hard, with the loss of an estimated 2 million jobs due to imports. Even the traditionally strong export industries—agriculture, high technology, and services—have suffered substantial losses. Agricultural exports have fallen from $25 billion in 1981 to just $7 billion in 1985.

Our businesses and our workers simply cannot compete against those countries that erect trade barriers. They cannot protect themselves against those countries who practice foreign industrial targeting, who close their markets to American products, and whose governments subsidize and dump their products on the American consumer. But our workers and businesses don't want protectionism; what they want is fair access to foreign markets. H.R. 4800 is the tool needed to ensure fair access to these foreign markets. It will compel our trading partners to play by the rules.

If adopted, the omnibus trade bill will set new guidelines for American trade negotiations so that unfair trade actions will be promptly met with an appropriate and tough American response. It will improve our country's ability to respond to a wide variety of unfair trade practices by mandating that the President take action in clear cases of foreign violations of existing trade agreements and unjustifiable trade practices.

Unlike many of the other 300 trade bills introduced during this session of Congress, the omnibus trade bill has been carefully drafted to avoid overly protectionist measures. Rather, it targets only those countries who are guilty of practicing unfair trade actions.

I can sympathize with my colleagues who feel compelled by their constituencies to support protectionist legislation. Recently, the Kaiser Steel plant in my district was forced to close its doors. Kaiser Steel, in its prime, employed over 8,000 people. It experienced many of the same difficulties the rest of the domestic steel and manufacturing industries faced: primarily, damaging governmental subsidies of foreign steel production by exporting countries and dumping.

But, during the summer of 1984, the Kaiser plant was bought by California Steel and has been renovated and reopened. Currently, it is able to employ 800 people. Now, however, the plant faces a different problem; it needs slab steel for production but it is not available at reasonable prices on the domestic west coast market. It is economically feasible for it to import from foreign countries.

I also hesitate to take an overly protectionist stance on trade because of the high volume of California exports, particularly agricultural products. I can, however, support H.R. 4800, because I don't believe it is protectionist legislation. What it is, is a comprehensive piece of legislation which sends a clear signal to our foreign trading partners—play fair. It attempts to resolve such complex issues as the overvalued dollar, international competitiveness, and export promotion and control.

This trade legislation is not aimed at eliminating competition, but at eliminating unfair trading practices. It is by no means perfect, but it is far superior to the present laissez-faire trade policy of the Reagan administration. I urge my colleagues to support this legislation, and send a message to the administration that something must be done—and done now.

Mrs. COLLINS. Mr. Chairman, I am honored to join my colleagues today in speaking in support of H.R. 4800, the Trade and International Economic Policy Reform Act of 1986. Today, America faces a crisis—a crisis so profound that it threatens the future of countless generations. The economy of our Nation is under attack from the unfair trading practices of other countries. Over the past 5 years, our trade deficit has jumped from a record $40 billion in 1981 to $150 billion in 1986. This trade deficit is being felt throughout our society, with crippling results for many economic sectors.

Everybody knows that our steel industry produces a world-class, quality product, yet it is losing its market to the unfair competitive practices of overseas firms. For example, specialty steel mills have updated their factories, restructured their internal organization, and renegotiated labor contracts in order to maintain competitiveness, but, in spite of these efforts, European producers dumped 247,000 tons of stainless sheet and strip steel products on the United States in the first quarter of 1986, usurping 23.8 percent of the domestic market. This was done in a concerted effort to undercut American manufacturers and in direct violation of negotiated trade agreements.

The story is similar regarding our telecommunications industry. U.S. systems have traditionally been regarded as the finest in the world and our computer manufacturers have grown into a substantial industry of enormous importance to our balance of trade. Now, they too are threatened. Foreign competitors have copied American technology and used it to diminish our market share. We could accept this

if we had that level playing field, but they have used their underpaid labor force to gain an unfair advantage against the U.S. industries which provided them with their technological head start.

Not only is this unfair competition destroying our industry, but it is stealing American jobs and moving them overseas. American workers are the most productive in the world. They built this Nation into an economic dynamo with their sweat and hard work and have been rewarded with one of the highest standards of living in the world. And yet time and time again, foreign competitors have undercut the American worker through unfair labor practices often. Their laborers are underpaid, many impose substandard living conditions on their workers, and some even resort to forced labor. There is no way that our industries can compete against such practices and I doubt if there is anyone in this Nation who wants to reduce the standard of living of our work force to the economic dictates of others. Instead, we have to force our foreign competitors to vie with us on the high level that we have established.

The Trade and International Economic Policy Reform Act of 1986 accomplishes this goal. This bill gives us the tools it needs to lessen our enormous trade deficit, to insist that foreign producers compete in a fair manner, and to protect important American jobs.

President Reagan has denounced this bill as protectionist legislation. In my opinion, such a view is patently untrue. H.R. 4800 has been carefully designed to instill fair trading practices among our competitors. The trade policies of the current administration have been misguided and naive, leaving America ill-equipped for the challenges of the competitive market of the modern world. Industry and labor are doing their part. They are taking the difficult steps necessary to revitalize U.S. industry, now Government must do its part. We can no longer bury our heads in the sand while the rest of the world surpasses us. The President should wake up to the realities of the world and respond accordingly. H.R. 4800 provides the vehicle for this response.

This legislation also gives our trade negotiators the tools they need to effectuate a realistic, positive, sturdy, growing economic system enhanced with the ability to respond to unfair trading practices with tough sanctions. It mandates Presidential action in clear cases of foreign violations. It also speeds American responses to violations, sending the clear message internationally that we will no longer tolerate unfair trading practices. Therefore, H.R. 4800 will promote free and open trade among all nations and strengthen worldwide economic growth.

I want to emphasize two sections of the bill that I feel are of particular importance: the establishment of education and training programs (title V) and the regulation of the telecommunications trade (title II). I have worked closely with my colleagues in committee to help produce these two critical sections. The education and training programs to be instituted under title V would give American labor the resources to remain competitive. Subtitle A of this legislation authorizes $500 million in fiscal 1987, providing programs for workers' continuing education. Programs would be funded through State education agencies [SEA] and would support literacy training, vocational education, and education in mathematics, science, or foreign languages. Under subtitle B, $500 million would be provided for training and employment assistance on an industry-wide basis to workers in industries, including farmers, adversely affected by trade. The combination of these programs will allow our workers to maintain their competitiveness and insure that they remain the most productive in the world.

Title II, International Trade in Telecommunications Products and Services, is designed to allow the American telecommunications industry to regain its competitive role. In spite of our technological lead, American industry's share of the world market has been slipping in recent years. This is the result or practices of other nations, which prohibit or limit American sales while taking advantage of lenient U.S. trade laws to compete in our domestic market. Title II would remedy this problem by requiring an investigation of foreign trade practices to identify barriers to U.S. firms, calling for negotiations to remove these barriers, and establishing countermeasures in the event that they are not removed. Title II will give new life to our telecommunications industry and restore its competitive lead.

These two programs represent just parts of the most comprehensive trade bill that this body has produced. Six committees labored in concert to develop a truly integrated fair-trade program. The Omnibus Trade bill will return America to industrial competitiveness, allow our workers to increase their productivity, and insure that our Nation will once again compete in a fair international market. I urge all my colleagues, on both sides of the aisle, to join with me in voting for H.R. 4800. Let's establish fairness and openness in international trade.

Mr. ROSTENKOWSKI. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker pro tempore [Mr. HUGHES] having assumed the chair, Mr. BEILENSON, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 4800) to enhance the competitiveness of American industry; and for other purposes, had come to no resolution thereon.

PERMISSION FOR COMMITTEE ON SCIENCE AND TECHNOLOGY TO SIT WHILE HOUSE IS IN SESSION TOMORROW, MAY 22, 1986

Mr. LUNDINE. Mr. Speaker, I ask unanimous consent that the Committee on Science and Technology be permitted to sit while the House is in session tomorrow.

This request has been cleared with the minority members of the committee, I understand. It is for a markup of the National Bureau of Standards and the National Science Foundation bills.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

INTRODUCTION OF JOINT RESOLUTION TO COMMEMORATE LAST VOYAGE OF THE "PRIDE OF BALTIMORE"

(Mrs. BENTLEY asked and was given permission to address the House for 1 minute and to revise and extend her remarks)

Mrs. BENTLEY. Mr. Speaker, today I introduced a joint resolution to commemorate the last voyage of the *Pride of Baltimore*. Just last week the vessel, the *Pride of Baltimore*, sailed the Caribbean Sea. On May 13, 1986, the *Pride of Baltimore* was bound for the Port of Norfolk, having departed St. John's in the Virgin Islands.

Later that same day, the clipper was overcome with the tempestuous storm and high winds and waves. Eight of the crew members survived the sinking clipper and were on a raft in the Carribean for 4½ days until rescued by a freighter on May 19. It is believed that two other crew members were drowned in the sinking of the *Pride of Baltimore*. And two more are listed as missing.

Mr. Speaker, the heroic lives and death of the crew members of the clipper provides an opportunity to commemorate the last voyage of the *Pride of Baltimore*.

I, therefore, urge my colleagues both in the Senate and the House of Representatives to join me in designating the day of June 1, 1986, as the *"Pride of Baltimore* Day." We must not let the heroic lives and death of crew members of the clipper vessel, the *Pride of Baltimore*, go without proper congressional commemoration and recognition.

□ 1850

TERRORISM AND THE MEDIA

(Mr. LUKEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LUKEN. Mr. Speaker, the threat of terrorism is a worldwide concern. In our effort to control terrorism, the role of television has become an issue.

In the aftermath of last year's TWA hijacking and the TV interviews with the hostages in captivity, many commentators accused the networks of serving as an instrument of terrorism.

Some of us suggested to the networks that they hold a summit and adopt guidelines intended to neutralize television as a terrorist weapon. The networks refused.

Subsequently, on May 5, NBC News aired an interview with Abu Abbas,

the man who admits directing last October's seajacking of the *Achille Lauro*. Abbas is a fugitive from American Justice, a man whom most Americans would call public enemy No. 1. Most Americans would turn him in immediately upon locating him. NBC, however, admitted in its coverage that it had made a deal with Abbas to refrain from disclosing his whereabouts, in exchange for the interview.

This cynical arrangement reflects the white-hot competition among the networks. Again, I am calling on the networks to draw up guidelines that will prevent a reoccurrence of this recent casualty of the ratings wars.

ANNUAL REPORT OF UNITED STATES-JAPAN COOPERATIVE MEDICAL SCIENCE PROGRAM—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Energy and Commerce:

(For message, see proceedings of the Senate of today, May 21, 1986.)

TRIBUTE TO STATE REPRESENTATIVE PHILIP STONE OF KENTUCKY

(Mr. HUBBARD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HUBBARD. Mr. Speaker, I want to take this time to express congratulations to and appreciation for my longtime friend, State representative Philip Stone of Central City, KY.

Philip Stone, a Democrat, at age 75 the oldest person serving in the Kentucky Legislature, was elected a Muhlenberg County magistrate in 1938 and held that office for 4 years. Since that time Philip Stone has worked with and for the Kentucky highway patrol and State police, served as chief deputy sheriff of Muhlenberg County, and for 12 years in the elective office of Muhlenberg County judge, the county's highest office.

Philip Stone was elected chairman of the Muhlenberg County Democratic Party Executive Committee for 1973–74.

Philip Stone was elected State representative for Muhlenberg and McLean Counties in western Kentucky in 1974 and has served with distinction in that position ever since that 1974 election.

Philip Stone has announced this year that he will not seek reelection for another term.

Could he win if he had run for reelection? Yes, indeed, is the answer.

My wife, Carol, and I are very fond of State representative Philip Stone and his lovely wife, Thelma. Philip and Thelma Stone have been married 46 years. They have one son—Philip Stone Jr., a talented Louisville, KY, pharmacist.

Philip and Thelma Stone deserve the very best of everything as they soon enjoy retirement years. My prayer is that God will richly bless both of them.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro temporE (Mr. DOWDY of Mississippi). It is the intention of the Chair to proceed with special orders pending the receipt of the Senate's adjournment resolution.

The Chair intends to interrupt to entertain that message when received.

NATIONAL COMMITTEE TO PRESERVE SOCIAL SECURITY AND MEDICINE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania [Mr. CLINGER] is recognized for 5 minutes.

Mr. CLINGER. Mr. Speaker, I understand that shortly our colleague from Maryland will take a special order to express concern over the methods of a grassroots lobbying organization called the National Committee to Preserve Social Security and Medicare. This group was instituted some 3 years ago by a former Member of Congress, James Roosevelt. It is alleged that this group has raised money to support its work by frightening elderly people into contributing to its cause. More specifically, the National Committee has been accused of mailing people horror stories concerning premature discharges of Medicare patients.

There are a number of horror stories that can be truthfully told about such discharges. These discharges have been caused by the Prospective Payment System that Congress instituted 3 years ago. There is quite a big difference between frightening people by inaccurately telling a story and telling a story which is, by its nature, frightening. The National Committee has been accused of frightening people for no reason. This is simply not true. What is true is that the Prospective Payment System has caused problems which are scaring Medicare beneficiaries. These fears are legitimate fears and not the fabrication of the National Committee.

Not only do I know that these charges are unfounded, I am amazed that they have even been made. Every member of this body has seen the mail sent to their offices by direct mail outfits representing causes ranging from support for the Contras to saving the whales. This mail is often exaggerated and less than accurate. The mailings of the National Committee, however, are neither exaggerated nor inaccurate. If I thought they were, I would not have worked as closely with them as I have in recent months.

The fact of the matter is I recently worked very closely with the National Committee's staff drawing up legislation which would prevent the Treasury Department from raiding the Social Security Trust Funds as it did last fall. I found the staff to be comprised of dedicated and committed individuals who contributed a very high level of expertise and professionalism. This contribution played a major role in the drafting of the Social Security Trust Fund Protection Act (H.R. 4067).

Not only did the National Committee play such an advance key role, they have also committed to the huge expense of gathering grassroots support by contacting millions of Americans. And that, Mr. Speaker, is the essence of good lobbying. They first educate, and then they generate constituent response.

On the basis of this work, I commend the National Committee for its commitment and service to America's elderly and request that its detractors refrain from their unwarranted criticisms.

Mr. COUGHLIN. Mr. Speaker, will the gentleman yield?

Mr. CLINGER. I yield to my colleague, the gentleman from Pennsylvania.

Mr. COUGHLIN. I thank the gentleman for yielding.

Mr. Speaker, I want to associate myself with the remarks of my colleague, the gentleman from Pennsylvania. They are excellent remarks and I join him.

Mr. Speaker, James Roosevelt's National Committee to Preserve Social Security and Medicare raises a lot of dust around here. Maybe we need to be stirred up to do things to benefit America's senior citizens. All that Mr. Roosevelt has urged us to do is to honor the promises we have already made to America's senior citizens to provide them adequate retirement income and health care security.

America's senior citizens want us to preserve their Social Security and Medicare benefits. They want an independent Social Security agency and safeguards for their Social Security Trust Funds. They want protection from catastrophic health care costs. And they want us to guarantee quality care in hospitals and nursing homes.

This is what National Committee members are telling me when they write me letters at Mr. Roosevelt's request. They are thoughtful and well-informed. This is a great service to us in our continuing efforts to represent Americans of all ages.

My colleagues who criticize the National Committee for so-called scare tactics are missing the point. The reason over 3 million Americans have become members of the National Committee and support Mr. Roosevelt's

efforts with contributions is because they agree with him that the problems are indeed "scary." They want someone like Mr. Roosevelt who will fight to protect their benefits and will not rest until he succeeds.

Mr. Roosevelt and his members have been instrumental in slowing down Medicare premium increases, freezing doctor's fees and guaranteeing the Social Security COLA. The National Committee is not an enemy but an ally to those of us who want to protect senior citizens from cuts.

I for one am joining Mr. Roosevelt and his members in the latest campaign to improve the quality of care Medicare beneficiaries receive in hospitals. I want to praise him for his recent initiative to educate his members about their rights to quality hospital care and how to appeal if they receive poor quality care. And I agree with him that we need legislation to improve the protection of Medicare patients.

Mr. Roosevelt represents millions of senior citizens. I respect him and the members of the National Committee. I want to work with them to preserve Social Security and Medicare for all Americans. I urge my colleagues to do the same.

□ 1900

GENERAL LEAVE

Mr. PEASE. Mr. Speaker, I ask unanimous consent that all Members may be permitted to revise and extend their remarks during consideration today of the bill H.R. 4800 and the amendments considered thereto and to include therein extraneous material.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

THE TRADE BILL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio [Mr. PEASE] is recognized for 5 minutes.

Mr. PEASE. Mr. Speaker, I believe that the debate on H.R. 4800 has gone very well today. We have had good discussion of the trade bill and we made good progress.

I will tell you what is interesting to me about the debate on the amendments today. That is, the bipartisan nature of the discussion and the support of amendments.

This trade legislation started out as bipartisan legislation. Most of the core of the amendments, the sections 201 and 301 of the Trade Act, were contained in bills introduced in both the other body and in the House on a bipartisan basis with a lot of support on both sides of the aisle.

The Reagan administration over the last week, in its excessive opposition to the bill, has tried to paint it as a partisan measure, as an effort by the Democratic majority to make a campaign issue, to embarrass the minority party. That simply has not been true.

As a matter of fact, some of that accusation of partisanship has been picked up by the press quoting the administration; some of it has crept into the debate over the last 2 days.

Yet, I think if anyone looked at the votes that were cast today, they will see that this is simply not a correct accusation on the part of the administration.

On the first amendment that we considered today offered by the gentleman from Illinois [Mr. CRANE], that amendment was defeated by a vote of almost—in fact, a little over, 2 to 1. Forty-four minority Members of the House joined with Members of the majority in defeating that amendment.

Next came an amendment by the gentleman from Minnesota [Mr. FRENZEL]. That was defeated by a vote of almost 3 to 1. Some 65 Republicans voted with the majority against that amendment.

Then the gentleman from Minnesota [Mr. FRENZEL] offered another amendment which was defeated by over 4 to 1, with 98 Republicans, over half the Members of the minority part in the House voting no.

What this says to me is there is a bipartisan majority in the House not willing to accept the administration line that we must lie prostrate before our competitors on the field of international trade.

Yet there is a bipartisan majority which takes a tough attitude for trade which wants to make sure we have a level playing field, which wants to put the Federal Government on the side of fair trade. Yes, a bipartisan majority which wants to be able to go home this weekend and say yes to our constituents that we do believe in free trade, we do expect trade to continue, but we also understand that some firms, some workers, some communities will be the losers in this game of trade.

Accordingly, we are going to adopt trade legislation which recognizes this fact of life. We are going to try to guarantee that the competition these firms and workers face will be fair trade. We are going to try to provide help with the adjustment process, try to encourage U.S. exports so we can create some new jobs.

You know what is going to happen next? The Committee on Finance of the other body, led by Republicans, will report out a very similar bill to ours. A bipartisan majority on the floor of the other body will pass that bill by a wide margin; a bipartisan conference committee will iron out the differences between the two versions and a bipartisan majority in each House will adopt the conference committee report.

So again, I invite Republican Members of this body to join hands tomorrow with us to pass this bill and show the American people that we are listening to them on trade.

Join us, in other words, for a vote on final passage. Doing something about huge trade deficits is a bipartisan matter. Let us show that to our constituents who desperately want us to act affirmatively on trade.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Hallen, one of its clerks, announced that the Senate had passed a concurrent resolution of the following title, in which the concurrence of the House is requested:

S. Con. Res. 144. Concurrent resolution providing for an adjournment of the House from May 22, 1986 to June 3, 1986, and for an adjournment of the Senate from May 21, 1986, to June 2, 1986.

MESSAGE FROM THE SENATE

The SPEAKER pro tempore. The Chair lays before the House the following message from the Senate.

The Clerk read as follows:

S. CON. RES. 144

Resolved by the Senate (the House of Representatives concurring), That when the House adjourns on Thursday, May 22, 1986, pursuant to a motion made by the majority leader of the House, or his designee, in accordance with this resolution, it stand adjourned until 12 o'clock meridian on Tuesday, June 3, 1986, and that when the Senate adjourns on Wednesday, May 21, 1986, pursuant to a motion made by the majority leader of the Senate, or his designee, in accordance with this resolution, it stand adjourned until 2 o'clock p.m. on Monday, June 2, 1986, or until 12 o'clock meridian on the second day after Members are notified to reassemble pursuant to section 2 of this concurrent resolution.

SEC. 2. The Speaker of the House, after consultation with the minority leader of the House, and the majority leader of the Senate, after consultation with the minority leader of the Senate, shall notify the Members of the House and the Senate, respectively, to reassemble whenever, in their opinion, the public interest shall warrant it.

The SPEAKER pro tempore. The question is on the Senate concurrent resolution.

The Senate concurrent resolution was concurred in.

A motion to reconsider was laid on the table.

LITERACY ASPECTS OF THE TRADE BILL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Tennessee [Mr. COOPER] is recognized for 5 minutes.

Mr. COOPER. Mr. Speaker, today I would like to touch briefly on an aspect of H.R. 4800 that has gone largely unnoticed. It is a small aspect of the bill, but it is one that I feel will be a very important part of the bill in

terms of the long-term future of this Nation.

The omnibus trade bill has many, many different elements in it, many, many important features. This is a small one, but it is a very, very important one.

It is easy to overlook, in fact, the entire education and training element of the bill. It amounts in total to about $1 billion. That is a lot of money, but it is still ending up being a small portion of this bill. It is even easier, though, to overlook the $100 million or so that will be spent on literacy programs within that education and training budget.

Literacy is my primary focus today and the reason for that focus is this: While $100 million in the U.S. Congress seems to be a small amount of money nowadays, it ends up being a terrific amount of money because in real terms, $100 million would double the current U.S. national effort to deal with the literacy problem that we have in this country. So that doubling that I feel is significant, that doubling that I hope will result from this bill, it is that doubling that I think is a clear departure from virtually any other Federal program that I can think of.

As we all know, this is an era of cuts, not of increases. Few, if any, programs in this day and time have been doubled, but I think this is a very worthy effort that should be doubled, even at a time like this, even at a time of Gramm-Rudman.

The House budget resolution included $500 million for education and training programs under this bill. The literacy aspect of this bill should be included in the House budget resolution, as it has been, and that means that the money under this bill would not add to our deficit. It would be part of the House budget plan which would, if enacted, give us a total budget deficit of $137 billion next year, which is under the Gramm-Rudman deficit target.

The specific figures in the education section of the bill are these: $500 million has been allocated overall. Eighty percent of that amount, or $400 million, is reserved for elementary and secondary education.

□ 1910

That $400 million can be split in any one of three ways, according to the wishes of the State involved. First, literacy; second, vocational education; third, some of the high-technology skills like math and science education and also language skills.

So literacy is just one-third of the possible uses that the $400 million could be put to. Even if literacy ended up with only one-quarter of the total, literacy would still be receiving about $100 million which, as I said earlier, would double the current U.S. effort on the literacy problem.

That, I feel, is a historic policy shift that this body is taking. In dollar terms it still seems small to us, but it is a step in the right direction; it is a step that I feel years down the road will be recognized as a major policy shift by this body to finally, at long last, deal with education as a major national problem—not just education of our young people as is so often the case, but the education of our adults who missed the education they were entitled to when they were younger.

The policy shifts involved are many. It is easy to dismiss the trade problem as an economic problem, a problem having to do with our industries; this bill today recognizes that a key part of our trade problem is our human resources problem. Not just the literacy aspect of it; also the vocational aspect; the high-technology skills such as math, science, and languages, as I mentioned earlier.

Mr. Speaker, surely literacy has got to be the most fundamental of all these educational difficulties; even the U.S. Department of Education today will admit that between 17 million and 21 million are illiterate. Other experts put the figure at more like 60 million Americans. Surely this is the fundamental educational problem of our time, and at long last this trade bill, in what is admittedly a minor aspect of the overall bill, will finally address it and address it in what has got to be a major way, since we are doubling the budget for it.

I am pleased with this initiative; I hope it is just the beginning of a long march in the direction of a war on literacy. It needs to be a battle hard fought, and it needs to be a battle that this country wins.

At least we are beginning that battle today, and I feel that 1986 will be viewed, because of this bill, as a serious effort in that direction.

RESTRUCTURING THE POSTAL SERVICE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan [Mr. FORD] is recognized for 5 minutes.

Mr. FORD of Michigan. Mr. Speaker, today, I am introducing a bill which would effect the first major change in the structure of the U.S. Postal Service since the enactment of the Postal Reorganization Act of 1970.

As chairman of the Committee on Post Office and Civil Service, I do this with mixed emotions. After some serious early reservations, I came to be one of the act's strongest supporters. Under Postmaster General Bolger, who served from 1978 through 1984, the Postal Service and its 700,000 employees achieved financial stability and service excellence.

But late in Mr. Bolger's tenure, storm clouds began to gather over the office of the Postmaster General. More and more, the nine Presidentially appointed Governors of the Postal Service injected themselves into the day-to-day management of the institution. More and more, the chief executive—the Postmaster General—found himself hamstrung by a micromanaging, meddling group of Governors.

The Board of Governors which the Congress created in the Postal Reorganization Act of 1970 was supposed to be akin to a corporate board of directors in the private sector. Our idea worked for a while, but during the past few years we have seen our creation turn into something which isn't remotely similar to a corporate board.

The Board has interfered unduly with collective bargaining, with financial planning, with service modernization, with procurement, and with personnel matters.

During the past 18 months, we have had three Postmasters General—and it will be four with the imminent departure of Albert V. Casey. All have found it impossible to do the job because of the meddlesome way the Board has interfered.

I am not saying that each of the Governors individually is an undesirable or incapable person. Some are and some aren't. But I am saying that the system has failed. When a group with the power of this Postal Service Board can be captured and manipulated by one or two or three willful members, each with a personal agenda, there is something gravely wrong.

The Postal Service is the most visible symbol of our Government. Every American uses it and needs it. The flag flies in front of a post office in nearly every city, town, and village across the Nation.

The Postal Service is not a money-making or power-grabbing vehicle. It is one of our oldest and most revered national institutions. It is also our largest domestic civilian employer, presently employing some 783,000 people, delivering 150 billion pieces of mail, and operating a $30 billion budget.

The Postal Service and the American people deserve something better than what they have been getting from this Board. It is time to restore the Postmaster General to Cabinet rank and put him or her fully in charge by also making the Postmaster General the Chairman of the Board.

The bill which I am introducing today, and which my distinguished colleague in the other body, TED STEVENS, is also introducing in almost identical form today, would do just that.

Before I proceed to summarize the bill's provisions, let me anticipate and answer one question. Why would I want to give this President the power to appoint the Postmaster General? Doesn't the quality of some of his past nominations to the Board of Governors bode ill for his choice for Postmaster General?

Well, first of all, let me say that I do not do this lightly. I have given this issue much thought over many months and perhaps my decision speaks loudly about just how bad I believe things are in the Postal Service right now. But more importantly, I believe that by restoring the Postmaster General to Cabinet rank—as my bill would do—and placing the President, whoever he or she may be, directly at the top of the line of responsibility for run-

ning the Postal Service, we necessarily force the President to nominate a Postmaster General of the highest ability and integrity. In other words, I am confident that the quality of this President's nominee for Postmaster General will be much, much higher than the quality of some of his past nominees for seats on the Board. It is one thing to give part-time Board seats to political cronies, or to personal friends, or to friends of personal friends, but it is quite another to place a person in full charge of the Nation's largest and most visible Federal institution.

A summary of my bill follows:

First, the Postmaster General shall be appointed by the President, with Senate confirmation.

Second, the Postmaster General shall be Chairman of the Board of Governors.

Third, the Postmaster General shall appoint the Deputy Postmaster General.

Fourth, the Postmaster General and the Deputy shall be Governors and shall be eligible to vote on all matters, including rate decisions.

Fifth, the number of compensable yearly meeting days for the Governors shall be reduced from 42 to 30. The rate of $300 per meeting day and $10,000 annual salary remain unchanged.

Sixth, expenditures by the Board and by the individual Governors would be permitted only for "essential activities of the Board." The Chairman, that is the Postmaster General, would judge the appropriateness of all expenditures. Only the Chairman could authorize payment of vouchered expenses.

Seventh, annually, the Chairman—the Postmaster General—would submit to Congress and to the President a report of all expenses incurred by the Board and by each Governor individually.

FREEDOM OF INFORMATION ACT AMENDMENTS OF 1986

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oklahoma [Mr. ENGLISH] is recognized for 5 minutes.

Mr. ENGLISH. Mr. Speaker. I am today introducing the Freedom of Information Act Amendments of 1986. This bill amends the Freedom of Information Act to provide fairer and more efficient procedures for the treatment of freedom of information requests for business records submitted to Government agencies. I am pleased that TOM KINDNESS, ranking minority member of the Subcommittee on Government Information, Justice, and Agriculture, has joined me in sponsoring this legislation.

The bill requires each Federal agency to establish procedures by which those who submit business information must designate as confidential any information that the submitter claims is exempt from disclosure on the grounds that the information falls within the FOIA's existing fourth exemption.

Prior to disclosing any information so designated, each agency is required to notify the submitter that a request had been made and to offer an opportunity to submit written objections to disclosure.

The purpose of these procedures is simple. If an agency is considering the disclosure of sensitive corporate information, it is only fair that the agency consult with the submitter of the information in order to make sure that valuable information is not improperly released.

In order to reduce delays that may result from the new notice and comment requirement, the bill also provides an expedited access procedure that will shorten the time limits and otherwise require expedition in cases where a requester can demonstrate a compelling need for the records.

In order to limit the burden on agencies, the bill does not require notice in instances where the information requested was not designated by the submitter; where an agency determines prior to giving notice that the request should be denied; where disclosure is otherwise required by law; or where the information is already public.

Finally, the bill establishes rules for the judicial review of so-called reverse-FOIA lawsuits. These lawsuits arise when a submitter goes to court to prevent the disclosure of information believed to be exempt from disclosure. This is not a new remedy, since reverse-FOIA lawsuits have been brought in the past under the Administrative Procedure Act. However, the bill establishes a specific cause of action under the FOIA for the first time.

Those who follow legislative developments regarding the FOIA are aware that efforts have been underway for some time aimed at developing a more comprehensive package of FOIA amendments. I had hoped that we might be able to address some of the problems that have arisen with regard to fees, fee waivers, delays, and exemptions. It now appears that the attempt to write a broader bill must be shelved for now.

Work on these issues dates back to the last Congress and beyond. In the last year, the subcommittee has focused its activities on developing a consensus among the FOIA requester community, the business coalition on FOIA, the Justice Department, and others. Because of the politics surrounding the FOIA and because of the difficult and delicate nature of the law itself, I have always believed that a prerequisite to passage of amendments to the FOIA amendments is a consensus among those interested in the FOIA.

During the last 6 months, some progress has been made toward reaching the necessary agreement. The Justice Department abandoned some of its earlier proposals that would have made radical changes in the FOIA. The requester community has been cooperative in identifying problems with the FOIA process and in suggesting solutions. But as discussions proceeded, it became apparent that there was considerable disagreement within the administration on compromise FOIA amendments.

During all of these discussions, the business community has been waiting patiently for consideration of changes in the procedures for the processing of requests for business information. Of all of the FOIA amendments that have been considered, the business procedures appear to be the least controversial.

The pressures of the legislative calendar in this election year are forcing us to start formal action. We cannot delay any longer while searching for that still elusive compromise. There are very few legislative days left, and we must begin the hearing process now.

The Subcommittee on Government Information, Justice, and Agriculture will conduct a hearing on the Freedom of Information Act Amendments of 1986 on June 5, 1986. Anyone with an interest in this hearing is invited to contact the subcommittee.

Mr. KINDNESS. Mr. Speaker, today, I am joining my Government Information Subcommittee chairman, GLENN ENGLISH, in introducing legislation which would amend the Freedom of Information Act (5 U.S.C. 552) to provide separate statutory procedures for the handling of requests for public disclosure of information submitted to Government agencies by business concerns. I am particularly pleased that this legislation incorporates most of the important elements of a bill I introduced last October, H.R. 3496.

Before refreshing our colleagues' memories as to the need and rationale for this legislation, I would like to concur in the comments made today by Chairman ENGLISH with respect to the effort he and I have made over the past 2 years to develop a consensus for a broader package of amendments to the Freedom of Information Act. Those amendments would address particular problems with the administration of the act which have arisen as a result of agency practices, the nature and volume of requests at particular agencies, and court decisions interpreting the act.

Over the past 2 years, I have held a number of meetings with persons concerned with the operation of the act and have encouraged them to contribute to the development of a bill that would attempt to balance their sometimes conflicting desires. Naturally, I am disappointed that our efforts have not developed a consensus. But, with the time remaining in this Congress, I agree that the time has come to get moving on those proposals which have proven the least controversial and they are embodied in this bill which we introduce today.

Despite the fact that the bill we introduce today is the least controversial proposal to amend the Freedom of Information Act, some remain unconvinced of the need for this legislation. Accordingly, I would like to restate the explanation I gave for this legislation when I introduced H.R. 3496.

One aim of the bill is to discourage the use of the Freedom of Information Act by business concerns who burden the limited resources of Federal agencies by filing FOIA requests for information submitted to those agencies by their competitors. Another aim of the bill is to provide additional safeguards against ill-considered or inadvertant disclosure of information which would cause substantial competitive harm to the business concern which submitted the information. And last, but certainly not least, the bill attempts to achieve these aims without adding unduly to the time needed to process legitimate requests for such information filed by private citizens, the press, and public interest groups.

Truckloads of information are submitted annually to Federal Government agencies by business concerns for regulatory, licensing, procurement, and statistical purposes. Once

submitted to the Government, that information becomes agency records and thereby subject to requests for disclosure made pursuant to the Freedom of Information Act.

The Freedom of Information Act is properly weighted toward disclosure of information. The general rule is that agency records must be disclosed unless the information contained therein falls within one of nine exemptions. Records exempted from disclosure include national security information, law enforcement investigatory records, agencies' deliberative documents, and information specifically exempted from disclosure by other statutes. One of those exemptions covers confidential business records whose disclosure would cause substantial competitive harm to the business concern which submitted them. Those exemptions authorize—they do not require—agencies to withhold agency records from the public.

If the agency decides to withhold the records, the requester may go to court and get de novo review of the agency's decision (rather than simply a determination of whether the agency's decision was arbitrary, capricious, or an abuse of discretion). In that litigation, the agency bears the burden of proving that the records withheld do fall within the asserted exemption. And, if the requester substantially prevails, the court may award reasonable attorney fees and other litigation costs incurred by the requester.

Placing the burden on the agency to justify withholding pursuant to the act's exemptions is proper as in most cases the justification for asserting a particular exemption is clearly within the knowledge of the agency to assert. However, that is not necessarily so in the case of information submitted by business concerns to the agency. Whether disclosure of that information will cause substantial competitive harm to the business concern which submitted it will require the agency to draw upon the knowledge of the submitter and possibly outside sources as well in order to make a proper identification.

To their credit, a number of Federal agencies have recognized these limitations and have, by agency rule, provided notice to submitters of business information when a request is made for disclosure of that information. The submitter is then afforded an opportunity to provide reasons why these records should be withheld, if the submitter believes there is cause for withholding.

Unfortunately, the time limits for agency response under FOIA limit the opportunity for the submitter to prepare and provide a suitable justification to the agency for withholding, and they limit the opportunity for the agency to give careful consideration to the competing claims of submitter and requester. Ofttimes, submitters will race to the courthouse to seek an injunction against disclosure. In such a case, called a "Reverse-FOIA" action, the court is faced with the complicated question of what standard of review to apply to the case since the case does not arise under the FOIA but rather chapter 7 of the Administrative Procedure Act (5 U.S.C. 701 et seq.).

A recent U.S. circuit court of appeals decision illustrates the unfortunate state of the law on that question. On May 25, 1984, the District of Columbia Circuit issued an opinion in *National Organization of Women* v. *Social Security Administration*, 736 F. 2d 727 (CADC, 1984), on the issue of whether the district court erred in granting a preliminary injunction against disclosure of equal employment opportunity reports based upon de novo review of the agency's action. In order to reach the decision, the court had to decide whether the factfinding procedures of the agency were adequate. In the end, the three circuit judges agreed that the preliminary injunction was proper, but they disagreed over whether the agency's factfinding procedures were adequate and thus over whether it was proper for the district court to have reviewed the agency's action de novo, citing several other cases in support of their different conclusions on this issue.

The legislation we introduce today, then, would require agencies to provide timely notice to submitters who designate information claimed to be exempt from disclosure; would give the submitter 10 working days to provide its objections to disclosure to the agency; and would provide for de novo judicial review of the submitter's objections to disclosure.

The bill makes no change in the coverage of the business records exemption nor does it unduly lengthen the agency process for handling requests for business records. And if the submitter seeks judicial review, the submitter bears the burden of justifying the claim of exemption.

The majority of cases do not go to court. the ones that do confront the court with a garden-variety of agency procedures which lengthens the litigation process while the litigators argue over what process the court should follow in determining whether the agency's process was adequate. Some standard operating procedures at the agency can only improve the processes there where most FOIA disputes are resolved.

This legislation represents a good-faith effort to balance the legitimate claims of the business community with the policy of disclosure embodied in the Freedom of Information Act. Unlike most Government information, most business records submitted to Government agencies are generated outside of Government. The submitter thus retains an interest in the information supplied to Government agencies. Likewise, the public has a legitimate interest in whether those agencies are properly fulfilling their responsibilities which require the collection of such information. I believe that this bill strikes the proper balance between these legitimate interests.

Some have argued that this legislation is not necessary because of the dearth of "horror stories" of improper and damaging disclosures and because some agencies are already, by rule, providing notice and an opportunity for submitters to object to disclosure. Like the busy street with a school crossing which cries out for a traffic signal, I am not one to stand around and wait for a horror story to occur if reasonable means can be taken to make it less likely. I have also never been too comfortable with relying on the good graces of agencies, utilizing ofttimes ambiguous authority to do as much or as little as they think they can get away with.

Furthermore, the state of the law on agency and judicial review of requests for, and objections to, disclosure of business records is chaotic. Congress should step in and resolve the issues by creating separate statutory procedures for the handling of requests for records submitted by business concerns. This bill offers the ways in which to accomplish those ends and I look forward to the hearing that Chairman ENGLISH announced today and, ultimately, to passage of this legislation by the 99th Congress.

INTRODUCTION OF THE HUNGER RELIEF ACT OF 1986

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. PANETTA] is recognized for 5 minutes.

Mr. PANETTA. Mr. Speaker, today I am proud to introduce the Hunger Relief Act of 1986. This is a 12-point proposal to address the serious problem of hunger that remains in our society. This proposal does not establish new Federal programs. Instead, this proposal strengthens the network of services already in place. This morning the senior Senator from the Commonwealth of Massachusetts and I had a press conference to announce that each of us today is introducing in our respective bodies the Hunger Relief Act of 1986. We were privileged to have my distinguished colleague from Vermont, JIM JEFFORDS, appear with us also on the podium to declare his support for this bill. We were also privileged to hear moving statements about the reality of hunger from Virginia M. Beverly of the National Anti-Hunger Coalition, and Arthur Simon, executive director of Bread for the World.

The Hunger Relief Act of 1986 is a 12-point proposal to address the serious problem of hunger that remains in our society. This proposal does not establish new Federal programs. Instead, this proposal strengthens the network of services already in place.

The Hunger Relief Act of 1986 will make a meaningful contribution toward the elimination of hunger within the severe budgetary constraints which we now face. For that reason, the cost for next year is kept below $1 billion. This bill does not create new programs.

The bill strengthens the network of services already available through the major nutrition assistance programs—Food Stamps, School Breakfast and Lunches, Child Care Food Programs, and Elderly Nutrition. In addition, the bill strengthens the nutrition education programs and also creates a national nutrition monitoring system. Nutrition education and monitoring are areas which may have received too little attention in the past. To the extent that Americans are not nutritionally literate, programs which provide direct nutrition assistance are less effective.

I request unanimous consent to include a summary of the bill in the RECORD following my remarks as well a listing of the 32 national religious and philanthropic organizations which have endorsed the bill.

These proposals reflect valuable input from the House committees concerned with the hunger issue, including MICKEY LELAND'S Select Committee on Hunger. MICKEY and his

committee are the conscience of the House on this issue. We also received valuable input from GUS HAWKINS, the chairman of the committee on Education and Labor, and DOUG WALGREN, the chairman of the Science and Technology Subcommittee which handles nutrition research and monitoring issues.

We are not proposing new programs but we do try to make existing programs more meaningful and effective. We must do this because, despite our efforts over the past two decades, there is still hunger in America. The question is no longer whether there is hunger in America but why is there hunger, and what can be done about it.

Why is there still hunger in America? Why does hunger exist in a land of overwhelming agricultural bounty, with the storage of surpluses costing over $1 million a day? Why does hunger exist when our Department of Agriculture must store 600 million pounds of surplus cheese? Why does hunger exist in a nation which has forged a network of food assistance programs designed to assure every man, woman, and child a nutritious diet? Why does hunger exist in a country renowned for its charity and compassion and good will in helping the needy both here and abroad. Why hunger in America?

It is here. Its existence, has been substantiated by countless studies—from the hearings of the Subcommittee on Domestic Marketing, Consumer Relations, and Nutrition, which I have the honor to chair, Senate hearings, the Select Committee on Hunger, the GAO, the Governor's Conference, the Mayors Conference, even the President's own Task Force on Hunger. The evidence is there. The consequences are frightening:

Increases in nutrition-related health problems in children; the existence of severe undernutrition usually found in Third World countries.

Doubling and tripling of those resorting to soup kitchens and food pantries—one food pantry in Detroit, Project Hope, has some 16,000 senior citizens waiting to get benefits.

Increasing anemia among young children; and the list goes on and on and on.

Why is there hunger in America? The causes are complex. Part of the cause of hunger is the legacy of the recession—families left behind with no jobs. Part of the cause is lack of access—nearly 14 million or 41 percent of those eligible for food stamps on the basis of income alone do not receive this needed nutrition assistance. Part of it is lack of funds—more than 7 million women and infants eligible for WIC do not receive this crucial nutrition assistance. More than 3 million poor children do not get school lunches. Almost 12 million poor children do not get breakfast. Part of the cause is related to the trap of poverty itself—in 1984, the most recent year for which poverty statistics are available, the poverty rate was higher than any year since 1966, excluding the poverty surge during the 1982-83 recession. Currently in America, one of every four children lives below the poverty line.

Why should we be concerned about hunger in America? After all, that's another side of America that most do not see, do not touch, do not know. But we are a compassionate people—and we should care for our fellow human beings—that is inherent in our moral fiber. Thank God for the charities, the churches, the Salvation Army, the private sector that cares about this problem and tries to provide help. But surely hunger is not just a private sector problem. Hunger eats away at the very fabric of our society. And we pay a huge human and financial cost for hunger. Hunger is not cheap. The low-weight infant or the child born with a birth defect becomes both tomorrow's human and financial cost to society. The elderly couple forced into a nursing home becomes a cost. The child too hungry to learn in school becomes a cost. We pay a high price for hunger in America. And the price is our future.

It's for all of these reasons that it must be attacked—on a broad scale by the private and public sector. The Hunger Relief Acts of the past few years tried to address this problem. The reforms in the farm bill tried to help meet this need. But more is needed.

The Hunger Relief Act of 1986 will make a meaningful addition to our arsenal aimed at eliminating hunger in America.

Hands Across America demonstrates that we are indeed a compassionate society that is unwilling to tolerate hunger. One event can focus on the promise of America to end hunger. But it takes a solid program and commitment enacted at the national level to deliver on that promise. This week let us combine the spirit of Hands Across America and action on this bill into ending this national shame once and for all.

To date the following organizations have endorsed the Hunger Relief Act of 1986:

Bread for the World.
Interfaith Action for Economic Justice.
Church Women United.
United Church of Christ Office for Church in Society.
Mennonite Central Committee U.S./Peace Section Washington Office.
Church of the Brethren Washington Office.
American Baptist Churches U.S.A.
Washington Office Presbyterian Church (U.S.A.).
Friends Committee on National Legislation.
Lutheran Office for Governmental Affairs.
Union of American Hebrew Congregations.
Episcopal Church National Hunger Committee.
Presiding Bishop's Fund for World Relief/The Episcopal Church.
Food Research and Action Center.
National Anti-Hunger Coalition.
Results.
National Council of Senior Citizens.
Community Nutrition Institute.
Coalition on Human Needs.
Public Voice for Food and Health Policy.
National PTA.

National Farmers Union.

Following is a summary description of the Hunger Relief Act of 1986. This is a comprehensive antihunger initiative which includes needed improvements to food stamps, child nutrition programs, WIC, nutrition education, elderly feeding, commodity distribution, and nutrition research and monitoring.

The Hunger Relief Act of 1986 is a 12-point program which has a fiscal year 1987 outlay of less than $1 billion.

FISCAL YEAR 1987 OUTLAYS

[In millions of dollars]

FOOD STAMPS

1. Move toward a policy to base Food Stamp benefits on the average cost of the Department of Agriculture's Low Cost Food Plan Rather than the Thrifty Food Plan..... 404

This represents a commitment to move toward a guarantee of actual rather than theoretical nutritional adequacy under the Food Stamp program. Although a skilled shopper can purchase a nutritionally adequate diet under the Thrifty Food Plan which is currently used to determine benefits, the reality is that most low-income persons do not have the nutritional knowledge to purchase a nutritionally adequate diet within the budgetary constraints of the Thrifty Food Plan. Because of budgetary constraints, the initial step would be a Fiscal Year 1987 benefit increase of 2.5 percent above the CBO baseline. Over the following three years, there would be additional increments above the baseline of 2.5 percent. At the end of four years, the Congress would reassess the appropriate level of nutritional adequacy under the Food Stamp program.

2. Raise the cap on the shelter deduction from $147 to $175. The cap is already scheduled to increase to $152 in October 1986..... 75

This proposal is designed to address the "heat or eat" dilemma faced by many poor families.

3. Liberalize the medical deduction for the elderly (as passed by the House last year) to set the threshold at 5% of gross income or $35, whichever is less)..... 11

This proposal responds to increasing copayments and deductions in both private medical insurance and medicare. The 5 percent threshold is the same as the level in the Federal income tax for medical deductions.

4. Asset Limits..... 50

Raise asset limits to $2,250 for non-elderly households and $3,500 for elderly households. Raise the limit for automobile to $5,500 as recommended by President's Task Force on Food Assistance. The cost estimate is based on half year implementation in fiscal year 1987. The Department of Agriculture would also be directed to submit a report to the Congress on the administrative feasibility and budgetary implications of making the asset test for both automobiles and other assets based on net asset value.

5. Outreach..... 1

The matching funding would be restored to give States the option to inform elderly, unemployed, or disabled persons about the availability of Food Stamp benefits. This restoration would complement an excellent outreach campaign which is being conducted by the Advertising Council.

6. Child Support Payments..... 75

Exempt the first $50 a month paid in child support from counting against food stamps. This would make food stamps consistent with AFDC and would increase the incentive for a parent with children to get child support from the absent parent. The proposal can be defended as a measure to help children. Under current law, states have to pay the cost of the $50 disregard if they elect to allow the $50 a month exemption for food stamps.

CHILD NUTRITION

7. School Meals Programs..... 93

Defray the increased costs of maintaining and improving the nutritional quality of school breakfasts by increasing the reimbursement rate by 5 cents for all breakfasts and by an additional 5 cents for "severe need" schools (defined by current law as schools that serve 40% or more of their meals to students whose family income is below 185% of poverty).

Increase Federal reimbursement for reduced-price lunches and breakfasts and thereby lower the maximum price that children pay for a reduced-price lunch from 40 cents to 25 cents and 30 cents to 15 cents for a reduced-price breakfast. This provision will assist the children of low income working poor families (families whose income is between $13,645 and $19,703). This category of participation suffered a 16.6% drop in school lunch and a 34.4% drop in school breakfast as a result of the cut in reimbursement required by the Omnibus Reconciliation Act of 1981.

8. Child Care Food Programs..... 32

Increase the reimbursement rate by 5 cents for breakfasts served in both day care centers and family and group day care homes. Allow reimbursement for either one additional snack a day or meal a day in the Child Care Feeding Program.

9. WIC..... 138

Increase funding for WIC over the fiscal year 1987 baseline by $0.15 billion in budget authority in fiscal year 1987, $0.20 billion in fiscal year 1988, and $0.30 billion in fiscal year 1989. This would allow participation to increase by an estimated 280,000 in fiscal year 1987, increasing to 380,000 by fiscal year 1989. The current caseload is just under 3.3 million, and the fiscal year 1987 baseline level is $1.6 billion.

10. Elderly Nutrition and Commodity Assistance..... 51

Increase the authorization levels for congegate meals, home-delivered meals, and nutrition education for the elderly. The specific authorizations levels would be as follows:

Congregate Meals—From $395 million to $410 million;

Home-Delivered Meals—From $75.6 million to $95.6 million. Currently, 225 million meals a year are served in the Congregate and Home-Delivered Meal Programs. This increase would provide an additional 10.2 million meals.

Commodities for Elderly Feeding Programs—From $144 to $149 million.

Temporary Emergency Food Assistance Program (TEFAP)—From $50 to $70 million in Fiscal Year 1987 and an increase of $5 million in Fiscal Year 1986.

Allow the untilized caseload for which funds have been appropriated in the Commodity Supplemental Food Program (CFSP) to be used either to serve additional elderly persons at existing projects or to fund additional projects which would serve elderly persons.

11. Nutrition Education..... 32

Increase the authorization levels for the major nutrition education programs as follows:

Expanded Food and Nutrition Program (EFNEP)—From $60 to $75 million;

Community Food and Nutrition Program—An authorization level of $5 million would be specified.

Authorize $10 million in Fiscal Year 1987 for Nutrition Education Training in schools.

12. The National Nutrition Monitoring and Related Research Act of 1986 (H.R. 2436) as reported by the Committee on Science and Technology. This authorization is not scored by the Congressional Budget Office as having a direct cost.

ACTIVITIES OF THE SO-CALLED NATIONAL COMMITTEE TO PRESERVE SOCIAL SECURITY AND MEDICARE

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Maryland [Mrs. BYRON] is recognized for 60 minutes.

GENERAL LEAVE

Mrs. BYRON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of my special order this evening.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Maryland?

There was no objection.

Mrs. BYRON. Mr. Speaker, I rise today to call my colleagues' attention to the latest fund-raising scheme being perpetrated upon a very vulnerable group of Americans, our senior citizens. As many of you are aware, this travesty is the work of an organization calling itself the National Committee To Preserve Social Security and Medicare. It is chaired by former Congressman James Roosevelt, the son of one of our greatest Presidents.

It was Franklin Delano Roosevelt who championed the cause of the elderly. It was his legacy, the Social Security system, which now enables our elderly population to maintain dignity in their twilight years.

It is unfortunate that many of our older Americans have been exploited by that instant name recognition and by that organization's consistent practice of printing the names of Members of Congress and Senators at the top of their solicitations.

Two years ago, almost to the day, Members of this distinguished body spoke at length on this same issue. Then, as now, the topic of conversation involves the frightening language and misleading information being used in mass mailings sent to the Nation's elderly by Mr. Roosevelt's group. As recently as 3 weeks ago, Senator WALLOP from Wyoming took them to task on their questionable and self-promoting tactics.

Many of you have seen copies of their most recent mail solicitation or have received $10 checks from your constituents because of the confusing directions in the text of the group's letter. While the letter raises legitimate concerns about Medicare patients being released sicker and quicker from hospitals, it contains misinformation designed to instill fear in the hearts of our senior citizens. A paragraph from that document states "if you have a heart attack, your medicare coverage will pay for only 3 days, 19 hours of hospital care." Another sentence asserts that "too many elderly patients are being thrown out of hospitals." No doubt, the average senior citizen will become very alarmed by those statements.

What really upsets me about their letter is the wording on the last page which states and I quote:

So it's vitally important you send at least $10 today with your signed petition to your Congresswoman Beverly B. Byron * * *

The implications are that not only am I soliciting funds but that my vote can be purchased for $10. I resent those implications in the strongest possible terms. Where is our truth in advertising? Why are the elderly being preyed upon by a group which purports to be their advocate?

Mr. Speaker, my main purpose today is to personally question the scare tactics, misinformation and the ethics of circulating such misleading materials to our senior citizens.

I cannot understand why a group such as this would purposely frighten our elderly into thinking that they will receive second-class medical care, that they will be evicted from their hospital beds before they are healthy enough to go home, that their $10 contributions will purchase legislative influence.

The National Committee to Preserve Social Security and Medicare could play a responsible role in shaping the direction of senior social programs. Their 10-point legislative program contains many of the goals that I have advocated during my years in this Congress. They have the potential to make meaningful contributions to this body. However, they have not yet demonstrated that ability.

Our patience with them is wearing thin. It is time for an accounting. It is time for this body to act—to fully examine the intent and questionable ethics of this group. I urge you to join with me in asking the House Select Committee on Aging and the Subcommittee on Social Security to investigate and resolve the deceptive practices employed by the National Committee to Preserve Social Security and Medicare, and the use of the name of James Roosevelt to come to that end.

Mr. Speaker, at this time I yield to the gentleman from New York [Mr. GREEN].

Mr. GREEN. Mr. Speaker, there is a lot of talk in Washington about the ethics involved in former Government officials' leaving the Government to lobby the very people with whom they had worked so closely. It seems to me that the subject of this special order today is only a stone's throw away.

We are not dealing here with the lobbying of other officials, who, it might be argued, can easily check the accuracy of the information they receive. What we are dealing with here is much worse: Former Members of Congress preying on one of the most vulnerable groups in society—senior citizens.

Those former Members mail solicitations which give the impression of being official Government mailings, and which contain misleading and factually incorrect information. Particularly appalling are the alarmist tactics used in these mailings, leading the elderly to believe that if they don't send a check for $10 to $30 to these groups immediately, their Social Security benefit checks will be in danger. Seniors in New York City have called my office terribly frightened that this would happen to them.

One senior called me recently about the latest Roosevelt committee solicitation which asks people if they would consider authorizing their future membership dues to be charged to their Visa or Mastercard account, in order to save the costs of mailing renewal notices. "To cut red tape and costs," as he puts it. An intriguing idea for quietly taking money from the very people this group purports to protect.

Well, if it is any comfort to my colleagues on the other side of the aisle, I should like to note that this is a bipartisan problem, as Mr. Roosevelt is not alone in his campaign. Former Congressman William C. Wampler has formed the "Social Security Benefit Protection Service" with an alleged mission "to help our nation's elderly receive all the benefits they worked for, were promised, and deserve * * * and to help keep Social Security strong so that those entering it today will benefit from it tomorrow." All this for a mere $15 "basic membership" contribution, although, this group states, "we desperately need contributions of $25 or more."

I checked Wampler's group and found it had not been registered as a lobbying organization. From an exchange of letters with Mr. Wampler it is clear that his groups only function is to check citizen's records of Social Security contributions—something anyone can do on his own, not for $15 or $25, but for 14 cents, the price of a postcard.

It is a sad state of affairs when former Government officials take advantage of the people's trust. I am not opposed to lobbying on these issues—but I am deeply disturbed by the use of false information and scare tactics. If our former colleagues have any respect for Congress or for the people, then I hope this special order will inspire them to clean up their acts.

I am not sure what else we can do about such groups—and, given the growth of the senior citizen population, I suspect others will be tempted to enter the arena. But I have sent warnings to thousands of seniors in my district, saying "Check before you write a check."

□ 1920

I thank the gentlewoman for yielding.

Mrs. BYRON. I thank the gentleman very much. I appreciate his support on this issue because it is one that I find very, very difficult to understand.

Mr. Speaker, my colleague from Maryland, Congresswoman BENTLEY, had wished to make a few comments on this, but due to the time and the hour getting late, she had an appointment in Baltimore.

I want to say that her testimony and statement will be submitted for the RECORD.

Mr. Speaker, I yield to the gentleman from Florida [Mr. HUTTO].

Mr. HUTTO. I want to commend the gentlewoman from Maryland for taking this special order to address a subject that has needed addressing for a long time. I think it is very good that the gentlewoman has taken this special order so that we can tell the American people and our colleagues, as I think all of them know by now, that it is a cruel hoax that is being perpetrated on our senior citizens by this group. I think that our great late President Roosevelt would trun over in his grave if he knew that this son was participating in something of this nature.

I have written to my senior citizens who have asked me about this for the last few years, telling them not to contribute. I hope that we can get that message around because really this organization can do nothing but hurt their cause.

The Congress of the United States has addressed Social Security. It is sound, supposedly, well into the next century. If they are going to contact anyone, it should be their Member of Congress.

Mrs. BYRON. It is interesting, one of our colleagues from Tennessee stopped me just yesterday and said that the question that they are asked more often than any on a call-in show is, "Should I contribute to this program?" They have said unequivocally that they should not, do not contribute to this program.

Mr. HUTTO. That is right. But still they are getting these constant flood of letters, and many of them are contributing because some of the senior citizens have to exist on a meager fixed income check from Social Security. They are dependent on it; they are very nervous that something might happen to it. When they get these letters they promote fear, then of course they want to do what they can to try to save Social Security. So, many of them are still contributing, believing that that will help. But I applaud the gentlewoman for taking this special order, and I hope that we can get the message around the Nation that our senior citizens should not be taken in by this sort of thing. And I hope that they will quit contributing.

Mrs. BYRON. There is an enormous number of very caring Members in this body, very concerned about the practices and about what is happening to our senior citizens. We as a group are addressing this in the way that it should be addressed.

Mr. HUTTO. And I appreciate very much the gentlewoman doing this. I thank the gentlewoman.

Mrs. BYRON. Let me talk a little bit about the letter that I received from one of my constituents. It is a fairly lengthy letter, but I find it really very interesting, the comments that he has written along the side.

On one of them, on the very front page near the bottom, is, "Is the money really being spent by uncaring bureaucrats? I have given to James Roosevelt many, many times."

Another comment on another page: "Does he lobby? I have read that he doesn't." That is in the paragraph in the letter, it says, "I must step up our lobbying activities, present testimony before Congress and send representatives to plead our case to your Congressmen on a person-to-person basis."

Well, I have yet to see anybody in my office pleading their case on any basis. The only thing I have seen in my office is some checks, some $10 bills sent in by constituents of mine having read the one paragraph where it says, "It is important you send at least $10 today with your petition signed to your Congresswoman."

That is what I find very, very difficult.

Mr. Speaker, I yield to the gentleman from Kentucky [Mr. HUBBARD].

Mr. HUBBARD. I thank the gentlewoman very much for yielding.

Mr. Speaker, I am joining my colleagues today in commenting on the National Committee to Preserve Social Security and Medicare and its continuing mass solicitations and campaign of fear directed at our country's senior citizens.

As I previously stated on the House floor regarding the activities of James Roosevelt and his Committee to Preserve Social Security and Medicare, elderly citizens, individually, have approached me at town hall meetings

and questioned the purpose of this organization and what it purported to claim in its fundraising mass mailings. Last December on the floor I called the craftily drafted mailings "a campaign of fear." It is now springtime and the retirees of Kentucky's First Congressional District still raise questions at town hall meetings in western Kentucky about James Roosevelt and the organization with which he is associated.

Not a month has gone by since the beginning of 1985 that new mass mailings have not been sent to my constituents, who in turn, question me about the validity of the statements and the validity of the National Committee to Save Social Security and Medicare. At times, it appears to only be a very unique organization. Who runs it? Who are the real individuals behind it?

I have often wondered whether James Roosevelt runs the organization, or whether an advertising agency runs it.

I have just seen a copy of the January-February issue of the so-called official newsletter of NCPSSM with the masthead "Saving Social Security." It was in a newspaper format filled with articles that read more like op-ed pieces and advertising of products directed at retirees. Not one news article had a byline to identify who wrote the piece. Nor was an editor or associate editor or writer listed.

Who are the individuals producing these newsletters and fundraising letters of the NCPSSM?

At the same time, NCPSSM is flooding the rural mailboxes in western Kentucky asking for donations, we have other organizations also using similar tactics to sell insurance and other products in brochures imitating official Social Security letters. Misleading direct mail advertising is under the jurisdiction of the U.S. Postal Service.

Mr. Roosevelt, in his newsletters, continues to emphasize his threat to sue the Secretary of the Treasury over questions of improperly handling the assets and interest earnings of the Social Security trust funds. No suit has been filed. Is this claim just a ruse to continue laying the groundwork for future appeals to the elderly for more contributions?

Based upon my past experiences in dealing with senior citizens who sincerely question the motives of the NCPSSM, I am joining with my colleagues and the gentlewoman from Maryland in asking the House Select Committee on Aging and the House Ways and Means Subcommittee on Social Security to hold hearings and investigate the questionable practices employed by this group.

Just last week, two elderly ladies in Henderson, KY, told me they have mailed over $100 each to the National Committee to Preserve Social Security. They were asking me if they should send in more money to this committee.

The national chairman of this committee is former U.S. Congressman James Roosevelt. This is my 12th year in Congress. I've never met Mr. Roosevelt.

I urge senior citizens to believe that we in Congress will always work to save Social Security.

Mrs. BYRON. I thank the gentleman for joining me in this special order this evening because I think there is an interesting thread here that many of the rural districts are the ones being targeted.

Mr. Speaker, I yield to the gentleman from Illinois.

Mr. CRANE. I do this because we have a problem on our side of the aisle with a conflicting engagement and Members on this side of the aisle would want the opportunity to participate.

Mr. Speaker, I would like to call the attention of my colleagues and the American people to the group which calls itself "The National Committee to preserve Social Security and Medicare." This organization is headed by the son of Franklin Delano Roosevelt, James Roosevelt, and claims to be a guardian of the Social Security system. However, I am greatly concerned about the tactics which this organization uses to raise funds for its so-called lobbying effort and openly wonder whether this group actually accomplishes what it says it sets out to do. In addition, I am concerned that this group may be misleading the elderly into believing that Social Security and Medicare face immediate financing problems which may threaten the availability of benefits.

As a member of the Social Security Subcommittee, I have received numerous inquiries about this organization. Many elderly individuals in my district have received official-looking letters which claim that the Social Security and Medicare systems are facing imminent danger and that a $10 contribution to this group would help prevent the destruction of the Social Security and Medicare systems.

Here is an example of what my constituents have received from the NCPSSM:

During the debt-limit debate last November, the NCPSSM sent out an "Urgent-Action-Gram" on the issues of disinvestment of the Social Security trust funds and payment of Social Security benefits checks to beneficiaries on December 3. The letter implied that only one-half of December's Social Security benefits could be paid and a $10 contribution to the NCPSSM was vital to the effort to restore the Social Security trust funds to the level necessary to pay all benefits due. The truth of the matter was that the December benefits were not in danger and the trust funds were not about to be depleted. Let me quote a December 2, 1985, letter to me from the chairman of the Social Security Subcommittee, Representative JIM JONES:

> First and foremost, it is not true, as the Roosevelt group alleges, that the December Social Security checks are in doubt, or that the entire system is on the verge of collapse as a result of the policy of disinvestment . . . [T]he temporary debt extension legislation enacted on November 14 provided for the full restoration of Social Security reserves drawn down in October and November.

I don't know how much money Mr. Roosevelt was able to raise by scaring the elderly into contributing to his so-called cause. But I am certain that, if Mr. Roosevelt had been straightforward about the actual situation of the trust funds, very little would have been raised.

Any one familiar with NCPSSM's correspondence recongizes the organization's expert attention to details relevant to fundraising. But attention to accuracy and honesty about Social Security and Medicare issues is missing. Its letters all contain errors that are either designed or just happen to increase the chances of a response, specifically a contribution. In the past, fundraising letters were sent in envelopes which suggested they came from an agency of the Federal Government. According to the U.S. Postal Service, the envelopes "suggested to the recipient that the envelope contains official information pertaining to his or her benefits." The words "National Committee * * * Social Security and Medicare," "legal document," along with a seal that bears a remarkable resemblance to the seal of a Social Security card, all support the contention of the U.S. Postal Service. When someone receives such a piece of mail, hurriedly opens it up, then finds a letter which discusses how Social Security and Medicare face imminent destruction unless immediate action is taken, how can he or she not be scared into sending $10 to the organization?

The U.S. Postal Service, the Justice Department, and the Social Security Administration have all told the NCPSSM to clean up its act and not send misleading material to potential contributors; The Postal Service objected to the envelope which contained on the cover the words "Time dated legal document Justice Department objected to the NCPSSM stationery which contained a seal which bore a remarkable resemblance to the Official U.S. seal, while the Social Security Administration objected to the NCPSSM charging its members for information about their social security benefits, information which could be received free of charge by simply writ-

ing the Social Security Administration.

Mr. Roosevelt's group only gave token heed to the requests of these agencies of the Federal Government. In order to satisfy the Postal Service, it changed the word "legal" to "official," to satisfy the Justice Department, it shifted the direction which the head of the eagle on the seal faced, and to satisfy the Social Security Administration, it offered to refund money only to those individuals who specifically requested a refund.

Americans today are concerned with terrorism. But don't the tactics used by James Roosevelt's group appear to be a type of terrorism in a different form? Can't we call these tactics a terrorism of the pocketbook? Millions of American retirees depend upon Social Security. Any indication that benefits will be reduced, let alone not be received, evokes fears that there won't be food on the table at the end of the month, that important medical care will not be available. This fear may lead the Social Security recipient to send $10, $20, or even $30 from his or her small social security check to this group which claims to be working to save the Social Security system. Mr. Roosevelt calls the contributions an investment to "block the rich and powerful forces who would destroy Social Security and Medicare." But I don't think this to be true.

If the American people have concerns about the future of the Social Security and Medicare systems, I would suggest they save the money they would send to such groups as the NCPSSM and write me and the other members of the Social Security Subcommittee on Ways and Means Committee directly. I assure you we will carefully consider your concerns. Why deal with the middle man?

The organization in question, the National Committee to Preserve Social Security and Medicare, is engaged in a kind of terrorism of seniors. It is filling seniors with fright sending publications out in envelopes like this marked "Urgent. Important Social Security and Medicare Information Enclosed." Then they have "time dated official national committee documents enclosed" printed on the front cover. These sorts of documents give a sense of urgency and apprehension, I think, to seniors who can very easily confuse these kinds of documents with official documents.

The envelopes referred to read as follows:

NATIONAL COMMITTEE TO PRESERVE SOCIAL SECURITY AND MEDICARE, NATIONAL ADMINISTRATIVE OFFICE, 1300 19TH ST. N.W., WASHINGTON, D.C. 20036.

National Committee Social Security and Medicare documents enclosed.

Time Dated Official National Committee Documents Enclosed. Expedite for Immediate Delivery.

Mrs. BYRON. The interesting thing is that some of my constituents have come to me with their envelopes in their hands and they have perceived it to be a letter from me, or they think it is a letter from their Social Security, or letter, an official letter from their Government.

□ 1935

In this country we have a wonderful availability of trusting our Government, and that is what is happening. These people are trusting their Government to take care of them. Their perception is that their $10 is going to take care of them.

Mr. CRANE. The envelopes have an official look about them, there is no question about it. And it has got to create that sense of urgency.

When this organization has asked people, for example, to send $10 to get an update on your own Social Security status, that may cover their cost of doing that process for you, but as the gentlewoman knows and every Member knows in this Chamber, any constituent can contact our congressional office if they need guidance on this question and, the fact of the matter is their Government will provide this service free. As a result, it is a disturbing thing when you realize that not only are the fright alarms sent out, and we went through that drill last year when we were reaching the end of funding of the Government at the end of the fiscal year and we unfortunately—and I underscore the word "unfortunately"—dipped into Social Security funds, which I frankly think was a mistake, to tide us over temporarily, but there was an alarm sent out, a special alarm, by this organization suggesting that that somehow would destroy the funding base on the Social Security Program.

It is that sort of thing, it seems to me, that preys upon people with a limited understanding perhaps of how the system works. As I said, it has got to be a little more difficult for the gentlewoman in the well to take out this special order to discuss this problem, but it does need discussion.

Mrs. BYRON. I have to disagree with the gentleman. It is not at all difficult. It is an issue that I think is wrong, and it is one that I feel very strongly about. When my name is used in a letter to my constitutents to send in $10 to me and that is going to resolve their Social Security problems, that is wrong.

Mr. CRANE. Let me reassure the gentlewoman that all of us around here are very proud of the gentlewoman for having done this.

I might add, too, that it was on the gentlewoman's side of the aisle, notwithstanding the utilization of that historic Roosevelt name, that the first indictment of this organization took place a couple of years ago in this Chamber.

But I would think that so long as this organization is viable, that perhaps we ought to do this on an annual basis, so as to reassure seniors that it is not the kind of an organization that I would hope my father of 85 would be a member of, and I would hope he would not be troubled by receiving these kinds of communications any more than our distinguished colleague's mother would receive these communications and be subjected to the unnecessary frights and alarms that urgent, important, official notification on the front of the envelope suggests.

Mrs. BYRON. I appreciate the gentleman joining me this evening.

Mr. CRANE. We are more than happy that the gentlewoman had done this, and the gentlewoman is doing a great public service.

Mr. Speaker, I as a Republican want to salute the gentlewoman as one on the other side of the aisle who, in this instance especially—not exclusively, but especially—has risen above any differences that we may have on a partisan basis, to look to the concerns and the welfare of those who are the people that perhaps we should be most concerned about in our society. They brought us up. They took care of us. They nurtured us. And this is no time to put them in a state of panic.

Mrs. BYRON. Mr. Speaker, I yield to the gentlewoman from Ohio [Ms. KAPTUR].

Ms. KAPTUR. Mr. Speaker, I thank the gentlewoman for yielding to me.

I want to commend and congratulate BEVERLY BYRON for helping to blow the whistle on the National Committee to Preserve Social Security and Medicare. This special order is long overdue.

In my own district in Toledo, OH, not a week goes by that I do not get a letter from a constituent who is confused, upset or alarmed over a mailing received from this organization, the National Committee to Preserve Social Security and Medicare.

In 1984, this organization collected over $9 million from older Americans.

How do they collect this money? Not through the time-honored method of grassroots activism by its members. Unlike other respected senior citizens' organizations like AARP or NCSC, whose members belong to and are involved in local chapters—a "member" of the National Committee to Preserve Social Security and Medicare is merely expected to send in his or her $10 to a post office box every time a mail solicitation arrives from that group's Washington headquarters.

And what sort of fundraising techniques do they employ? They send official-looking letters, using the names of elected representatives, predicting dire consequences for Social Security and Medicare if people don't send in their contributions. People should know that they can always voice their concerns about these programs directly to their Senators and Representatives. Sometimes, the national committee offers "services" to the elderly, such as providing them with their Social Security earnings statement, which already can be provided free of charge through any Social Security or congressional office. This organization has even sent fund solicitations to individuals implying that they have responded to previous appeals, when they clearly had not. For example, one distraught woman in my district sent me a letter from the national committee addressed to her husband which said he "recently signed a petition" on behalf of the organization. Her husband has been dead for 11 years.

Organizations that present themselves as advocates for the elderly should inform and help them—not distribute misleading materials that frighten them into parting with their precious retirement dollars. I, too, would encourage the House Select Committee on Aging and the House Ways and Means Subcommittee on Social Security to investigate and highlight the extremely questionable practices of the National Committee to Preserve Social Security and Medicare.

Now the gentleman whose name has been mentioned here this evening, Mr. James Roosevelt, the head of this committee, uses his title as a former Member of Congress to lend legitimacy to this money-churning operation.

I called the organization after they first started mailing into my district 3 years ago and I did not get any replies from the organization. I finally asked if I could arrange to have Mr. Roosevelt come to my office, because I frankly did not believe that he existed. Eventually he showed up on my doorstep, and we had a conversation. I could not believe that someone who was Franklin Roosevelt's son to actually do what he was doing across this country and in my district. At the time, he was misusing my name in the mailings that were being sent out, and people in my district thought that they were mailing money to me as a Member of Congress. So I felt that it was my obligation to tell him to change the format of his mailings and to stop calling himself a Member of Congress, to make it a former Member of Congress, and now he is using that in the literature that he has.

Mrs. BYRON. He has a new one, "United States Congress (retired)."

Ms. KAPTUR. Yes; they probably spent a lot of money figuring that one out.

But I told him that I was not interested in him scaring the seniors of my district and, in fact, I did not want him to give the impression that when people mailed him money they were then mailing money to me. I asked him to stop doing that.

I had to go on television several times in my district to tell seniors that they do not have to send him money. Many of them think that if they do not send him money, they are not going to get their Social Security check or their Medicare benefits.

I did extract an agreement from him after several minutes of discussion that if seniors in my district wanted their money back that he would be willing to give them their money back. Believe me, I am trying to get as many seniors their money back as I can.

The seniors in my district were surprised to find out that he never came to lobby me or to present me their petitions which he claims to be doing in all of the letters that he sends out. In fact, I had never heard from him, just like our colleague from Kentucky.

One of the other things that this organization does is they try to give Members of Congress campaign contributions with the money that seniors send them. Basically what I say to the seniors in my district is that if they are interested in Social Security, what they should do is make sure that the people who are running in those districts are committed to the Social Security and Medicare Programs while they are running for office, and they do not have to spend this extra money and send it to some post office box in Washington, that they should really depend on their own Members of Congress.

□ 1945

But I am sick and tried of this group worrying these senior citizens in my district, and I am tired of having to go on television or radio over and over again, telling our seniors, "You do not have to mail to this national committee to preserve Social Security and Medicare."

So I would urge the gentlewoman from Maryland to continue on in her efforts to urge senior citizens around the country not to contribute to this organization and, hopefully, through more public spotlights being focused on them, we can right a very wrong situation.

I thank the gentlewoman for this opportunity to participate in her special order.

Mrs. BYRON. Mr. Speaker, I want to thank my colleague, the gentlewoman from Ohio, because I think it is an issue that has really not hit one area of the country but it has gone across the entire country.

I am delighted to realize and to understand that the gentlewoman has seen Mr. Roosevelt, because in his communique he said he does meet with Congressmen and Senators on a person-to-person basis. I have yet to ever hear from or to be contacted by the organization, until I took this special order out. And you would be amazed the communications I have had since I have had this special order.

Ms. KAPTUR. I might just tell the gentlewoman that it is very difficult to get him into your office. And during the conversation I had with him, which is now about 2 years ago, he indicated he was not living in Washington, he was living in Palm Springs, CA, and, thus, it was difficult for him to come to Washington, but the staff here, whoever they are, was handling the day-to-day operations of this organization.

Mrs. BYRON. I thank the gentlewoman again for joining me on this special order. A special order is only as good as those Members who participate, and I am delighted to have as many Members participate as we have seen this evening.

Mr. Speaker, one of my colleagues, the gentleman from West Virginia [Mr. WISE] wished to join us in this dialog, and I think the gentleman has a district somewhat similar to mine, with the problem that I have already highlighted.

Mr. WISE. Very much similar.

I appreciate the gentlewoman yielding, and I just want to say that my observation is that the quickest way to get to see Mr. Roosevelt is to participate in a special order such as this one, because I had a similar experience as the gentlewoman from Ohio, in that I had been raising some concerns on the floor of the House about this organization. I had never seen a lobbyist before from the National Committee to Save Our Social Security and Medicare. Mr. Roosevelt did come by and spoke with me, much along the same lines as the gentlewoman from Ohio mentioned, made

certain promises, and I have never seen a lobbyist in the 2½ years since. I also sit on the Subcommittee on Aging, directly involved with aging issues, but I have yet to see a lobbyist from the committee on any issue. I think that is significant, because it is important to warn senior citizens in West Virginia and across the country, in Maryland and everywhere else, of the questionable fund-raising procedures of groups such as the National Committee to Save Our Social Security and Medicare. The problem is that these groups are raising money from the elderly by unnecessarily frightening them with horror stories about Social Security being in danger or that the Medicare Program is about to fold. These groups, of course, follow a similar pattern, urging similar citizens to spend $10 or $15 in a contribution for lobbying or litigation. And one of these groups, and I think a prime example, is James Roosevelt's National Committee to Preserve Social Security and Medicare. It raises millions of dollars through direct mail campaigns. But yet it rarely lobbies or follows through.

For instance, I have gone back through and looked at the number of times I have been contacted on an issue by lobbyists from this organization. The answer: Absolutely none. I have not been contacted, nor has any of my staff, except when we call them.

Then I went back and I looked at one of the mailings in November:

Send me $10 or $15—

Mr. Roosevelt asks—

Help us stop the disinvestment of Social Security, and we are going to hire lawyers and lobbyists.

Well, of course, I have never seen a lobbyist, so I looked at what litigation has been filed. There was litigation filed, of course, following that, by several Members of Congress, by several respected senior groups, but to this day, so far as I know, not one piece of paper has been filed in any courtroom by the National Committee to Save Our Social Security and Medicare. Where does that money go?

The group also asks for money more than once a year. It is not just a simple membership drive, but it is repeated fundraising appeals, month after month these mailings go out.

So I think this is of great concern. It is with rising frustration that I am here again tonight because, as the gentlewoman noted, many of us rose 2 years ago on the questionable fundraising tactics of James Roosevelt and the National Committee to Preserve Social Security and Medicare. I was hopeful that the criticism then would lead Mr. Roosevelt to alter his methods, but I am sorry to report this really has not happened.

I want to congratulate the gentlewoman from Maryland [Mrs. BYRON] for being kind enough to alert me to a mailing that her constituents had received, and I assume mine will, if they have not already, be receiving it shortly. This mail was sent across the country just recently to millions of people who have already contributed to Mr. Roosevelt's organization. And, as in the past, I am sure it is only a matter of time before the inquiries start flooding into my office.

Last fall, in November, Mr. Roosevelt scared senior citizens into thinking they were in danger of losing their Social Security benefits. I think it is worthwhile to point out that what he was talking about then was Social Security disinvestment. And most of us in this body disagreed with administration's policies then. But the implicit message in that mailing in November was that the money would not be there in December for December's checks, and that was clearly misleading senior citizens. That money was never in doubt, and Mr. Roosevelt knew it, and anyone who knew anything about the issue. And, once again, that was a mailing where they wanted $10 or $15 immediately:

Rush it to me right away, don't delay, so that we can immediately rush to the courthouse and file litigation,

Which of course they have never filed.

Mrs. BYRON. There is no excuse for a former Member not understanding the ways of this body.

Mr. WISE. Particularly one who is as well versed in Social Security as Mr. Roosevelt was.

And now, apparently, from the mailing the gentlewoman was kind enough to lend me, we are now focusing on Medicare, that is the national committee is, and through the use of questionable and undocumented examples, he leads senior citizens to believe that under the Medicare prospective payments system they will be tossed out of the hospital before they fully recover.

There are problems with the DRG system, but this House is trying to deal with them, and indeed there are some improvements that have already been made. But Mr. Roosevelt makes no mention of this in his letter.

Mr. Roosevelt is right to alert Members to some of the difficulties that the Diagnostic Related Group, or the DRG, system has caused for senior citizens, but I wish he could leave it at that. Instead, in what has become an all too familiar routine, he closes his letter with what? Of course another urgent appeal for funds:

Dig in today, don't delay, send it away.

He states that he must step up his Washington lobbying activities, present testimony before Congress, and send his representatives to plead his case on a person-to-person basis. But what persons is he talking to? I have never seen them.

Mrs. BYRON. I have never seen them.

Mr. WISE. The gentlewoman has never seen them. The other Members here have never seen them.

Mrs. BYRON. My staff has never seen them.

Mr. WISE. In 1984 the National Committee to Preserve Social Security and Medicare, according to the financial reports they filed, spent over $13 million. To what use was this money spent? Over $12 million of the $13 million, according to their report, was allocated. For what important lobbying activities? Direct mailing expenses. That is, raising money to raise money. The senior citizens of this country are sending in their money to an organization that uses these funds simply to raise more money. If Mr. Roosevelt is so concerned about the welfare of seniors, I urge him to stop spending so much money on fundraising and spend more time and effort providing seniors with accurate information.

One final note. I also join with the gentlewoman in urging both the Committee on Aging and the Ways and Means Subcommittee on Social Security to hold hearings into this. But they do not have to make it just on Mr. Roosevelt. There are numerous other groups out there. I think there are some indicators that senior citizens might want to look at. For instance, when they are considering whether or not to send their hard-earned Social Security dollars into an organization, does that organization have elections for policymaking members? How do they keep in touch with their membership? And does their membership actually have a voice in the running of that organization?

Mrs. BYRON. The only time you hear from that organization is when they are asking for more funds.

Mr. WISE. Exactly. What kind of communciations do you get from that organization besides fundraising appeals.

But I think perhaps my hope is that the Committee on Aging or the other committees of the House could develop some criteria that senior citizens could use to judge groups. I am not here to stand in judgment of the many senior citizen organizations, but I do think it is important how they make their policies. Who decides, for instance, what the policies will be? How do they keep in touch with their membership, and does the membership have an opportunity to have a hand in policymaking? Are there elections for board of directors members? There is no election, as far as I know, for the National Committee to Preserve Social Security and Medicare.

So there are other groups out there also that are, in my way of thinking, bilking senior citizens by frightening them.

So it is important that we bring this to the attention of seniors across the country.

To Mr. Roosevelt, I appeal to you to end your organization's tactics. As a former Member of Congress, you have served your country honorably. Your family name is associated with some of our country's proudest accomplishments, of course including the implementation of the Social Security system. Every one of these mailings diminishes your standing. I urge you immediately to put a halt to them. Stop frightening people unnecessarily, Mr. Roosevelt, because the most important thing that is happening here is senior citizens' Social Security checks are not in danger as a result of any action of the Congress or the administration. The most danger to them right now are the actions of the National Committee to Save Social Security and Medicare, which is trying to extract $10 to $15 on a regular basis.

I would just like to close with an example of why I became involved with this and why I congratulate the gentlewoman from Maryland for holding this special order. A gentleman from my district, a senior citizen, came up to me about 6 months ago and said, "Bob, I have been getting these mailings from James Roosevelt of the National Committee." The gentleman was of humble means. He said, "Bob, I have been getting these mailings from James Roosevelt and the national committee. He is asking for $10 to $15, and I sent it to him. I sent him another $10 to $15. Bob, I have sent him $45 now. Do I have to send him any more?"

I said, "Do not send him any more, you do not have to."

I hope that message gets across to a lot of other senior citizens.

I thank the gentlewoman very much for her leadership in putting this special order together, and I appreciate the opportunity to speak tonight.

Mrs. BYRON. Once again I appreciate the gentleman taking the time. The hour is running late, and yet I think it is an extremely important issue that we need to discuss.

Mr. Speaker, my colleague, the gentleman from Georgia [Mr. ROWLAND], has a few words to say on this subject.

Mr. ROWLAND of Georgia. Mr. Speaker, I thank the gentlelady for providing us with the time to express our views and the concerns of our constituents about the activities of the National Committee to Preserve Social Security and Medicare. I appreciate the opportunity to provide information to the American public about this organization and its methods. My purpose in rising today is to discuss three aspects of this committee's functioning which concern me and many other Members of the Congress.

First, I am concerned that in spite of changes in their solicitation methods, the committee still insists on using techniques in their mailings that generate fear and outpourings of anxiety on the part of our senior citizens. I have received some very disturbing correspondence from constituents expressing their apprehension about the stability of the Social Security system. Additionally, the letters reveal that these constituents mistakenly believe that actions are supposedly being taken by the Congress to reduce benefits, dismantle Social Security, or further tax benefits. In short, Mr. Speaker, the solicitation letters from the national committee generate apprehension among our elderly. I have made every effort to assure my constituents that I will work for and support the Social Security system which has served our retired workers well for 50 years. Furthermore, I am sure that the vast majority of my colleagues in the House would take the same position. My comment to the committee on this spreading of misleading information is that immediate changes should be made in their promotional material. Their current methods are not fair to the Congress and certainly not fair to elderly Americans.

Second, I must take very serious issue with the committee's solicitation methods. Not every recipient of these scare letters will understand them for what they are: fundraisers. In some cases, my constituents have written to me explaining that they have sent $10 on three different occasions to the committee and ask how much more they must sent to protect their Social Security benefits. Now, Mr. Speaker, I fully support the rights of any group to raise money in an effort to better express its views to the Members of Congress. On the other hand, I cannot go along with an unbridled campaign to deprive many of our poorest citizens of their merger Social Security benefits. While $10 may be considered a modest amount of money, it can mean the difference between buying food or medicine for some of my constituents. While there is no direct coercion in the message being put out by the National Committee, there is more than a subtle threat that Social Security benefits are endangered and that only through the payment of these membership dues can they be saved. This kind of solicitation of our elderly, and particularly in the case of the poor elderly, is unconscionable. Mr. Speaker, it's simply hard to believe that a former Member of this body would lend his name to an organization which engages in such questionable methods. Third, to what end are these funds being collected, and how effectively are they being utilized for the benefit of the National Committee's membership? As we all know, periodically, we receive correspondence from this group repeating its distorted message and trumpeting its latest membership totals and financial clout. To my knowledge, no one from this organization has ever directly contacted my office by phone or in person on behalf of Social Security recipients.

I think this is what the gentlewoman was just talking about with our colleague, the gentleman from West Virginia. We just do not hear from these people.

Mrs. BYRON. The same thing with our colleague, the gentlewoman from Ohio, and the same thing with our colleague, the gentleman from Kentucky.

Mr. ROWLAND of Georgia. Exactly.

Apparently the major focus is correspondence and, as has already been noted, much of that correspondence is directed toward our elderly to solicit more funds. Recently, I have learned that this group has established a political action committee. I certainly have no objection to the participation of PAC's in our political process. However, I would hope that any contributor to a PAC does so freely and with full knowledge of how his or her money will be used. Mr. Speaker, I hope that the people who have contributed understand that this is how their funds will be used. I am afraid that just as in other areas, the National Committee has not been fully open with our seniors about the use of the dues money and other contributions.

Finally, Mr. Speaker, I must express surprise that we are still today raising these questions about this organization. Almost 2 years ago to the day, our colleagues engaged in this same kind of exchange about this group. Today, we again find ourselves raising the same questions. Somehow we should be able to bring this matter to closure. Surely the Congress has the ability to effectively deal with any organization which engages in activities that deprive America's senior citizens of a portion of their modest income and unnecessarily alarms them about an unwarranted loss of Social Security benefits. Mr. Speaker, I would call upon the appropriate subcommittees of the House to fully investigate the National Committee and report back on its findings.

□ 2000

Mrs. BYRON. I appreciate the gentleman coming over and taking part in this special order because, once again, as I have said earlier, I think it is an extremely important issue that has disturbed me greatly.

Mr. ROWLAND of Georgia. It certainly is.

Mrs. BYRON. I think when the letter, and the letter that I have here from one of my constituents in Mountain Lake Park, MD, it says in it, "I urge you to sign a petition," but it also says that, "* * * your rights will not be abused by uncaring Government bureaucrats."

He commented on the bottom, "Is this money really being spent by uncaring bureaucrats?" That is the perception that my constituents have.

Mr. ROWLAND of Georgia. Let me say this to the gentlewoman, it has been some 4 or 5 weeks ago that in church one morning I had three different people come up to me and talk about what you have just pointed out. They were very concerned. They wanted to know if this was an organization they needed to make a contribution to in order to preserve Social Security.

Mrs. BYRON. That is what is wrong.

Mr. ROWLAND of Georgia. That is it.

Mrs. BYRON. Thank you very much.

Mr. Speaker, I am just going to wind up this special order. I have several colleagues that have asked to submit statements for the RECORD. Congressman HILER from Indiana cannot be on the floor this evening, but I have his statement here and I am going to have that inserted in the RECORD for him.

Let me just close with one thing that I find very interesting that some of our colleagues have taken a special order on and have discussed that scare tactics are necessary to take care of Medicare and to make sure that it is preserved. This organization, in my understanding, in my estimation, could serve a great deal of benefit for our senior citizens and help develop legislation and help work toward what we all are concerned about and that is a good life for our senior citizens.

Scare tactics, I do not think, are necessary. But I have to say to former Congressman Roosevelt that with a name and a heritage, with the legend of the Roosevelt name also comes a responsibility, and in my estimation, I do not feel that he is meeting that responsibility that comes with the memory of his father and the memory of the great service that FDR has given to this Nation.

Mr. HILER. Mr. Speaker, I wish to commend my colleague from Maryland, Congresswoman BYRON, for bringing this problem to our collective attention on the floor. Many of us have been contacted by senior constituents who honestly feared that they were about to lose their Social Security and Medicare benefits unless they made a contribution—in most cases a contribution they could not afford—to the National Committee to Preserve Social Security and Medicare.

Some of my senior constituents have sent me letters and urgent "action-grams" they have received from this organization, along with handwritten appeals begging me to intercede in their behalf even though they cannot afford to send money. A quick glance at this group's mailings makes it easy to understand how this fear is induced. The mailings are the result of state-of-the-art direct mail operations complete with official-looking seals, liberal sprinklings of the addressee's name throughout, case studies of such horrors as a heart patient being turned out of a hospital in his pajamas, and personal postscripts urging immediate contributions for the purpose of lobbying Congress to prevent such atrocities. Incidentally, I would point out that I have never been lobbied by any Washington representative of this national group.

In a recent mailing to my congressional district, I attempted to assure my constituents, first, that their benefits are not in doubt, and, second, that they most certainly do not have to part with their hard-earned, fixed dollars in order to save those benefits. Some constituents wrote back expressing relief. One woman from Nappanee, IN, wrote, "I want to thank you for your assurance that Social Security is not on its way out. That will relieve the minds of many senior citizens. I am 92 years old and I want to feel secure." Another woman from Granger, IN, also wrote concerning the "literature" from the James Roosevelt committee, "Do you have any idea how many senior citizens think it's official? Let me tell you there are lots and lots of them. These people need your assurance at this time."

Indeed they do, and that's why I thank my colleague for bringing this special order to the floor so that we can state once and for all that we know how important Social Security and Medicare benefits are to our senior Americans and they do not have to pay anyone to tell us that.

This is America and, obviously, any group has a right to solicit funds for its cause. But I hold in very low esteem solicitations which play on the No. 1 vulnerabilities of our parents and grandparents, and any group that does that needs to clean up its act.

Mr. ARCHER. Mr. Speaker, first, I want to commend the gentlelady from Maryland, Representative BYRON, for initiating this colloquy, and my colleague PHIL CRANE for ensuring that this exchange demonstrates a serious bipartisan concern about the National Committee to Preserve Social Security and Medicare.

No programs enjoy a broader bipartisan support than do Social Security and Medicare. As the ranking Republican member on the Social Security Subcommittee, I can assure you personally that no member of that subcommittee or of the full Ways and Means Committee advocates or supports drastic cuts in either program. In fact, our committee venerates both programs only slightly less than the American flag, motherhood, or apple pie. They are politically safe and economically stronger than at any point in the last 10 years. As an aside, the trust funds have benefited from the fact that more Americans are working now than ever before.

Against that backdrop, the mailings of the national committee are a disgrace. They generate needless fears among concerned senior citizens by suggesting that "urgent" action is necessary to protect these programs. Further, once a senior citizen has paid his or her $10 membership fee he is manipulated to make additional emergency contributions.

The disinvestment issue last November was a classic example. The disinvestment problem was real enough, and both senior citizens and contributing workers had every reason to be concerned about the method by which Treasury disinvested long-term securities to finance the payment of Social Security checks. So, I'm sure our former colleague James Roosevelt would argue that the committee's urgent action-gram dated November 8, 1985, was timely and appropriate. But, in my view the issue was set up as a "strawman" to scare senior citizens into contributing $10 or $15 to the coffers of the committee, not to hire attorneys, file lawsuits or support legislation as represented.

The political facts are that Congress was on top of the issue in 1985, and took immediate steps to restore the disinvested funds, and make whole the loss of interest suffered by the trust funds. On February 18, 1986, the Social Security Subcommittee held a hearing on disinvestment to determine whether legislation was needed to preclude any future disinvestments as an ingenious way to avoid the debt ceiling. Witnesses that day included representatives from Treasury and GAO, Mary Falvey-Fuller, one of Social Security's public trustees, and two reputable beneficiary organizations, the Save Our Security Coalition [SOS] and the American Association of Retired Persons [AARP].

Ladies and gentlemen, the National Committee to Preserve Social Security and Medicare did not ask to testify at that hearing. They failed to take the opportunity to appear before the one committee in the House of Representatives that can initiate Social Security legislation.

Nor, as I understand it, did the national committee ever file a law suit. I would have to question whether or not their conspicuous absence on February 18 wasn't due to their reluctance to answer questions about their use of the $250,000 they sought to raise via that urgent-action-gram.

Finally, to demonstrate the bipartisan nature of my concerns, I must note for the record that our former colleague, Republican William C. Wampler, possibly inspired by the committee's dubious success, has founded his own Social Security Benefits Protection Service and for another $15 or $25 he too will help you preserve your Social Security and Medicare benefits.

If I had only one brief message I could deliver to all Social Security and Medicare beneficiaries, it would be: Folks, please, save your money. If you're concerned, use some of it for postage and write your Representative directly telling him or her your specific concerns about Social Security. I guarantee we listen to our constituents' views with more respect than either James Roosevelt or William Wampler can command by shilling for these direct mail organizations who prey on your fears.

In conclusion, let me repeat that no programs enjoy broader bipartisan support than do Social Security and Medicare. The debates will continue as we monitor program costs and objectives, and some changes are inevitable as society and its needs change, but the basic programs are not threatened. To suggest repeatedly—as does the National Committee to Preserve Social Security and Medicare—that a "crisis" exists is, in my view, deplorable. I share with another Roosevelt my firm belief that "the only thing we have to fear is fear itself."

Mr. DAUB. Mr. Speaker, I appreciate this opportunity to voice my serious concern over

the tactics employed by James Roosevelt and the National Committee to Preserve Social Security and Medicare [NCPSSM].

As everyone is aware, Mr. Roosevelt's committee solicits money through the mail and uses it for so-called educational purposes. The committee has created the misconception that it provides the most accurate information about Social Security Benefits, while in fact, a Member of Congress or the local Social Security office can provide the most clear and up-to-date information with respect to the program—information that is free of charge.

Most of us on both sides of the aisle agree that the deceiving tactics employed by the NCPSSM evoke such ill-emotion from those who read the material that confidence in the U.S. Government deteriorates to a large extent—making the legislative process that much more difficult. Moreover, I have received—as has every other Member of Congress—numerous letters from upset older Americans over the last few years as a result of the NCPSSM mailings that not only produce an unhealthy view of Government, but actually evoke real concerns from the elderly with respect to their continued ability to subsist in the absence of contributions to the committee.

One of the many examples of the problems created by the NCPSSM is that of a man over 80 years old who became so frightened over the committee's mailing on the recent Treasury Department action to disinvest the Social Security trust funds that he had to have his daughter call my office to inquire about the situation. The format of the mailing contained so many inaccuracies—as is generally the case—that the man did not know if he would receive his next check and meet his monthly financial obligations.

In fact, it was not true—as the Roosevelt group alleged in its "urgent-action-gram" last November—that the entire Social Security system was on the verge of collapse, or that December checks were in doubt as a result of disinvestment. I commend the Social Security Subcommittee chairman on his prompt reply to NCPSSM to refute these allegations, but I, nonetheless, regret that so many senior citizens are allowed to be deceived on such an important matter.

The committee's most recent effort—the "Medicare patient's bill of rights" card—that asserts that without a $10 or $15 contribution medicare patients will be thrown out of hospitals "sicker and quicker" is ludicrous. In this case, Roosevelt's group exploited unfortunate rare case histories as a fundraising mechanism; the mailing even intimates that the contribution will be sent directly to Members of Congress.

The Republican Study Committee has published a report on the NCPSSM litany of deceptive tactics that I would like to enter into the RECORD. Responsible senior citizen advocacy groups are essential to educating Members of Congress and to stimulate public debate. However, it is clear from my experience and from the RSC's report that the NCPSSM employs questionable tactics that are certainly anything but responsible.

Although the group claims to lobby Congress on behalf of senior citizens—and although I am aware that written testimony has been prepared by the NCPSSM for various committee hearings—I am both amused and concerned that the group has not had the courage to actually appear at a congressional hearing. I think such absences indicate the type of dubious operation being conducted by the NCPSSM. Furthermore, I think it would be useful to conduct a congressional investigation into this operation and ensure that the group functions in a manner that is responsible.

Mr. BATEMAN. Mr. Speaker, I rise today to speak in support of my colleagues who oppose the methods utilized by organizations such as the National Committee to Preserve Social Security which is presided over by James Roosevelt. This group, supposedly a champion of rights for our Nation's elderly, uses a great variety of tactics to create apprehension and fear in our retired citizens in its endless campaign for funds. I can think of nothing worse than to take advantage of the poor, old, and disabled of our great country who are least able to protect themselves and who are most vulnerable to abuse.

I believe, Mr. Speaker, that the citizens of our Nation should be made aware of the true nature of the National Committee to Preserve Social Security and Medicare so that they can protect themselves from misinformation. I get many phone calls and letters from my constituents in America's First District who have reached a state of grave anxiety because they have been told by Roosevelt's Committee that Congress is trying to drastically reduce their Social Security and Medicare benefits. We need to bring an end to such mental anguish among the elderly as a direct result of the misleading information they receive.

Mr. Speaker, the Members of Congress on both sides of the aisle have worked to protect the rights and benefits of our Nation's Social Security recipients. Our constituents should be advised that they need not send money to a national group in order to be heard in Congress. In fact their personal letters sent directly to Members are always more effective. I do not need a national committee to tell me about the needs of the elderly in my district, as I am sure my colleagues do not need to be informed about their respective districts.

I applaud my colleagues who have spoken out against the National Committee to Preserve Social Security and Medicare and I sincerely hope that the citizens of our great country can become better informed to prevent future abuses by such groups.

Mr. WHITTAKER. Mr. Speaker, I would like to commend my colleague form Maryland, BEVERLY BYRON, for bringing this issue to the floor of the House. We who are charged with insuring the well-being of Social Security are gravely concerned with organizations which prey on the fears of older Americans for the sake of raising a buck.

When the so-called National Committee to Preserve Social Security and Medicare falsely sounds the alarm it worries seniors who oftentimes depend on this valued program for their only income. It worries me, too. This is an unethical way of squeezing a few dollars out of folks who can't afford to make such a contribution.

The "Committee" is "crying wolf" when Social Security is on a fairly sound footing. Will Americans hear the call if and when the system does need help? I hope so. And my guess is it will be no thanks to the "National Committee."

Mr. Speaker, like me, many of my colleagues are working to help keep Social Security from ever becoming a political football. I cosponsored legislation which would take the system out of the grab bag of Federal programs and set Social Security up as an independent agency. Hundreds of my colleagues stand with me for a strong Social Security system and against cuts in benefits.

Mr. Speaker, we don't think much of lobby groups that raise tons of money by using scare tactics to convince their members that dollars are desperately needed to make their pitch on Capitol Hill. The distressing thing about the National Committee to Preserve Social Security and Medicare is that it is headed by a former Congressman who ought to know better.

I have never met with anyone from that organization to discuss the future of Social Security and Medicare. I have never asked for this group's help and I certainly don't want anyone from my district to write a $10 check to see that I get this group's advice.

No one—especially those of us who are responsible for making certain that program is on a sound footing today—would deny that Social Security has had its problems in the past. However, it is unconscionable for professional fundraisers to stir up the anxiety of elderly Americans on fixed incomes just to squeeze out a dollar here and there.

Mr. Speaker, let me emphasize that I have no quarrel with the folks who have given money to this or other groups under the false impression that this was the only way their voices will be heard on Capitol Hill. But, the next time, they should simply write their Congressman or Senator. All that will cost you is 22 cents. In my office, a hand-written note from someone back home certainly has a greater impact than any lobbyist.

One wonderful lady from Fort Scott, KS, said it all in a letter to me recently. She had just received the latest in a series of fundraising letters from the National Committee. She said:

> At one time we sent this organization $10 and have been asked for more money almost every week. We stopped because we decided we may as well have a cut in Social Security as to continue sending them money.

Mr. Speaker, my advice to those people who receive fundraising appeals from this or similar groups is, "Save your money." No outsider has to tell me what's good for Social Security and Medicare. No lobbyist has to tell me what's good for my many elderly constituents who depend on those programs.

My one special interest group is the people of the Fifth District. That's my job.

Again, I thank the gentlewoman, BEVERLY BYRON, for giving me the opportunity to address this troubling issue.

THE EXPORTATION OF COMMUNIST REVOLUTION

The SPEAKER pro tempore. Under a previous order of the House, the gen-

tleman from Indiana [Mr. BURTON] is recognized for 60 minutes.

Mr. BURTON of Indiana. Mr. Speaker, for the past 3 to 4 years, I and many of my colleagues have been very concerned about what is going on in Central America. I serve on the Western Hemisphere Subcommittee of the Committee on Foreign Affairs and have had to deal with the problems of the Communist Sandinistas for the past 3 years on an intimate basis. I know every Member of this House is concerned about what is going on down there, but those on the Foreign Affairs Committee have been living with it on a day-to-day basis.

Now, in the past few days and weeks, we have become even more concerned because it appears as though the attempts by this administration to work out a proper settlement to that problem are in great jeopardy.

The Communist Sandinista government which took power in 1979 made promises to the people of Central America, in particular, Nicaragua, that there would be free elections, freedom of assembly, freedom of religion; all the things that we hold dear. None of those commitments have been kept.

Now, 7 years later, they are exporting revolution throughout the region. We find in Chalatenango Province in El Salvador Communist weapons. Weapons that have come from Vietnam, from the Soviet Union, from Bulgaria, and other Communist bloc countries. That have come through Cuba and Nicaragua in that country being utilized by Communist guerrillas to undermine the democratically elected Government of El Salvador.

Not only that, but they are exporting revolution not only in Central America but in Latin America as well. There are 12 countries south of the Mexican-American border that have either Communist guerrillas trained in Nicaragua or weapons that came through Nicaragua or both. Yet, today, we are about to embark upon an agreement process which entrench the Communist Sandinista government and they will never be able to be taken from power except by direct intervention on the part of the United States of America.

In Nicaragua today, we have an organization called the Contras. The Contras are people, many of whom took part in the overthrow of the Somoza government in 1979; they were part of the Sandinista movement. But the promises of the revolution were not kept. There is no democracy there today, there is just tyranny. So these people who wanted the democracy to come to Nicaragua have taken to the hills. Campesinos, small farmers, businessmen, religious people, and other leaders have taken to the hills to fight to regain the promise of that revolution of 1979.

They have grown from a meager 500 to 600 people initially to between 15,000 and 20,000. Some people believe as many as 25,000 in the Contra Army. We have supplied them with humanitarian and economic assistance, but we have not given them the military assistance they need to force the Communist Sandinista government to live up to the commitments they made in 1979.

Yet, today, we see an agreement about to take place which will solidify the Communist position in Nicaragua. The people who have been fighting for their freedom in the hills of Nicaragua, the Contras, the freedom fighters are about to be cut off from any support, military or economic or humanitarian or otherwise in the not too distant future.

That concerns us. That concerns many Members of Congress a great deal. People like Jeane Kirkpatrick, former U.N. Ambassador to the United Nations, has stated her concern, and I am going to read an article that was written in the Washington Post and in the Indianapolis Star just recently written by her which spells our her concerns about a false agreement being signed during the Contadora process which is coming up in June.

On June 6, the nations called the Contradora nations will be meeting in one last-ditch effort to hammer out an agreement that everybody can live with down there which will guarantee freedom and democracy for all the countries in Central America. But many of us are concerned that this is going to be a ruse used by the Communists to keep power, to let that cancer grow throughout Central America and ultimately all of Latin America so that this entire hemisphere will be jeopardized by the Communist menace.

The Cubans, in the late fifties took power; the Communists in Cuba took power. Fidel Castro promised that there would be democracy in Cuba. That has never taken place.

In the early 1960's, we had a crisis known as the Cuban Missile Crisis and Fidel Castro and Nikita Khrushchev of the Soviet Union had brought Soviet missiles, capable of hitting United States cities, to put on that little island.

President Kennedy created an embargo, a blockade of Cuba to get those weapons out of there. He told Nikita Khrushchev and he told Castro that the only way we would lift that blockade and eliminate the risk of war with Cuba and the Soviet Union was for them to get those missiles out of there and to get the Soviet troops out of Cuba and to make sure that Cuba would make a pledge that they would not export revolution throughout our hemisphere. That they would cease and desist as far as exporting Communist revolution in the Western Hemisphere of this world.

□ 2010

Twenty-some years later now, we see that the Cubans did not live up to that agreement. The Cubans have been exporting revolution throughout all of this hemisphere wherever possible. They have exported revolution into Nicaragua, into Guatemala, into Honduras, into El Salvador, and into many other Latin American countries, and they have been very effective. They did not live up to that agreement.

As a matter of fact, most Communist agreements have not been lived up to. If you look back to the 1953 Korean armistice, that was violated before the ink was even dry. The 1954 Geneva accords on Indochina were violated before the ink was dry, the 1962 declaration on the neutrality of Laos was violated before the ink was dry, and the 1973 Paris peace accords on ending the war and restoring peace in Vietnam were violated before the ink was dry.

Now we are faced with the very likely possibility that the Communists will be able to reach an agreement with the Contadora nations on June 6 which will entrench them, keep them in power as far as we can see into the future. While they may agree to terms which may seem plausible at the outset, the risk is very, very great that they will violate those treaties, just as the other treaties that I enumerated a few moments ago were violated.

We cannot allow this to happen. We must make absolutely sure that the Communist government of Nicaragua lives up to the commitments that they made to the Organization of American States in 1979, that democracy returns to Nicaragua, that the humanitarian violations that have been taking place down there are stopped, that the persecution of the people in the church, the Catholic Church and other churches down there, will stop, and that the freedom of the press that was promised in 1979 will be realized and the freedom of assembly and free elections will be realized as well. But the Communist Sandinista government has said time and again that they do not intend to let that happen.

As a matter of fact, between 1 and 2 weeks ago, Daniel Ortega said this: I cannot quote him verbatim, but the gist of his comments was that "we are not going to allow one rifle to leave Nicaragua until we have achieved our goals." And their goals are very clear. They have said time and again that they want a revolution without borders, a revolution that spreads throughout Central America into El Salvador, Guatemala, Honduras, and ultimately Mexico. Their ultimate goal is to have a Communist government in Mexico, just south of the Mexican-American border.

That is going to drive tens of millions of people from Central and Latin

America into the United States, creating economic hardship and a military situation that we cannot tolerate.

We certainly do not want to have to defend the 2,000-mile border between the United States and Mexico with American troops, and the only way to avoid that is to help the freedom fighters who are trying to bring democracy back to Nicaragua. If a phony agreement is signed on June 6 during this Contadora process, the hope of the Contras being able to exert pressure on the Nicaraguan Government, the Communists down there, to bring about democracy will end.

If on June 6 a Contadora agreement is signed, it is my view as a Member of Congress that we will not have the votes necessary to get the $100 million in humanitarian and military aid that is necessary to keep the Contras a viable force. Conversely, if we do get the aid to the Contras, it is my view that within 6 months to a year they could double their force from 20,000 troops to 40,000 troops and be able to exert severe military pressure on the Communist Sandinista government and force them to live up the commitments which they made in 1979.

That is the very reason that the Communist Sandinista government is about to sign this agreement. My intelligence sources have told me that the Soviet Union and the Cubans have been exerting great pressure on the Communist Sandinista government to sign almost any agreement put before them. The other Contadora nations and Central American nations have agreed to certain principles, and if those principles are agreed to in a written document of Contadora, they will sign it.

The Communists in Nicaragua in my view are being pressured by the Soviet Union and the Cubans to sign a document knowing full well that they intend to violate it. If they sign that agreement on June 6, there will be a feeling of euphoria throughout this body, especially as far as my liberal congressional colleagues are concerned. That euphoria will last maybe for 6 months, maybe for a year, maybe even for 2 years, because in my view the Communist Sandinistas will probably live up at least part of the agreement during that period of time.

But before long, the Communists will violate that treaty, that agreement, just like they violated the 1953 Korean armistice, the 1954 Geneva accords, the 1962 declaration of neutrality on Laos, and the 1973 Paris agreements on ending the war and restoring peace in Vietnam.

When they start violating that agreement, then my colleagues and I will be debating on this floor whether or not there are more military arms from the Soviet Union and Soviet-bloc countries coming into Nicaragua, whether or not Nicaragua has violated its treaty by exporting revolution to El Salvador, Guatemala, Honduras, and so forth, and whether or not weapons are getting through to those countries through Nicaragua and Cuba. We will be arguing whether or not Communist terrorist guerrillas are being trained in Nicaragua and being exported to other Central and Latin American countries. But we will not accomplish anything, because an agreement will have been signed, and because that agreement will have been signed, we will sit by and harangue and harangue and harangue while country after country is subverted and falls to the Communist menace.

One day 5 or 6 or 7 years from now, because we have been duped into believing the Communists will live up to an agreement again, we will see the Communists moving northward right behind the masses of humanity they are driving up there who are fleeing oppression.

At that point, we will have to make a decision: Do we let all of Central America and Mexico go Communist, or do we do our best to try to preserve freedom in this hemisphere? At that point my colleagues and I will engage ourselves in another debate, only this time it will be: Do we send American boys down there to fight for freedom? That is something that is not necessary if we deal with the problem today.

If we deal with the problem today by giving aid to the freedom fighters in Nicaragua, they can put pressure on the Communist Sandinista government, they can stop the Communists from exporting revolution and keep that revolution from spreading throughout our hemisphere. But if we wait, the debate on this floor will be: Do we send American troops?

The debate will be something like this, my friends: Are we getting ourselves into another Vietnam? Why should we be involved in this? Those people want communism, or it would not be a Communist country. They will ignore the fact that the Communist tryannies came out of the barrel of a gun and not through democratic institutions and free elections. And we will debate and we will debate and we will debate. Ultimately, somebody will say, "We have no choice. We have to defend our southern flank." At that point, my friends—my friends in this Congress and people across this country—should realize we will have to vote to declare war on the Communists who are taking over all of Central America.

That is a prospect that I do not want to have to deal with, and I do not think any American who loves freedom and loves our boys and the future generations of this country wants to have to contend with that prospect. That is why today I urge my colleagues who may be watching this on television to use what influence they have on the State Department, on the National Security Council, and on the Presidents of Central America, to make sure that a phony agreement is not signed on June 6, to make sure that any agreement that we agree to that is agreed to by the Contadora nations has teeth in it, real teeth, to make sure that the Sandinistas live up to the promises that they made to the OAS in 1979, and to make sure that we are not going to cut off aid to the Contras, the freedom fighters, until we know for sure that they have lived up to that agreement.

Mr. Habib, our envoy to Central America of recent days, said recently in a letter to some of my Democrat colleagues that whenever an agreement is signed that reaches the 21 objectives of Contradora, we will immediately cease and desist in giving aid to people like the freedom fighters in Nicaragua. That is not exactly the language he used, but that is the gist of his letter. If an agreement is signed, there will be no aid going to the Contras.

It should not be that way. If an agreement is signed and the agreement has teeth in it, and the agreement conforms to the promises made to the OAS by the Communists in 1979, we still must supply the Contras until we are sure that every part of the agreement has been met. We must not allow an agreement to be signed that will cut off aid to those freedom fighters, because they are the only viable force down there fighting the Communists.

Daniel Ortega has said recently, with some of his leaders in his military junta down there in Nicaragua, that if aid is cut off to the Contras, he will sign an agreement. Mr. Habib has said if an agreement is signed, aid will be cut off to the Contras. The other Contadora nations have likewise headed in the same direction. So here we are today just a couple of weeks before June 6, with all of the interested parties, saying: "We are about ready to sign this agreement. All we have to do is make sure that there is no aid to the Contras, and that the Communists will live up to some kind of a Contadora agreement."

How can you enforce an agreement if you do not have some force to use to make sure that they live up to the agreement? If there is no military force down there, if every stick of military opposition is pulled away from the freedom fighters, how do you enforce any resolution that is signed by the Communists and the Contadora nations?

There has to be some mechanism, some force behind any agreement. Otherwise, you just have a piece of paper that people agree to live up to, and pieces of paper the Communists

have violated throughout history since 1917 when they came to power in the Soviet Union.

I think that I have made my point perfectly clear, and that is, one more time, that if an agreement is signed on June 6 by the Contadora nations, including the Communist Nicaraguans, we must make sure that it does not include cutting off aid to the freedom fighters until we know that the Communist Nicaraguan Government has lived up to every commitment that they made to OAS in 1979.

□ 2020

If we could not have aid to the freedom fighters before all of these promises have been kept, then we are sowing the seeds of war for the people of this country, the young men and women of this country in the future.

On May 19, Jeane Kirkpatrick, former Ambassador to the United Nations from the United States, wrote this article in the Washington Post and the Indianapolis Star and many other publications across the country. I would like to read it to you right now.

There is a widespread belief in Washington that Nicaragua will sign the Contadora Treaty on June 6 at a meeting of foreign ministers of five Central American countries and eight associated South American nations. This belief persists even though some Nicaraguan Junta Leaders indicate the contrary. There is also widespread fear that Nicaragua will sign the agreement, never fulfill its terms and nonetheless reap the benefits of compliance by its neighbors and the United States.

It is a reasonable fear based on the past behavior of the Sandinistas.

After all, the Sandinistas in 1979 promised democratic elections, free press and assembly, and rule of civil law. These commitments were made when Sandinista leaders needed help in ousting Somoza and winning power. Once in power, the Junta leaders rejected talk of elections, claiming that Nicaragua had already voted "with their blood and with the guns in their hands."

None of the promises made to the Organization of American States was kept. Instead, the Sandinista Government gagged the press, denied the right of assembly, subjected businesses and trade unions to comprehensive controls, and suspended the rule of law. When elections were finally held in 1984, the government controlled the choice of candidates, the campaign and the outcome.

What reason is there, then, to believe that the same leaders who made solemn written promises of democracy six years ago will honor them now if they sign the proposed treaty?

The treaty would commit its signatories to democratic freedoms and elections, the removal of foreign military and security personnel, an end to importation of foreign arms and noninterference in the internal affairs of each other. The 21 Contadora objectives are wholly consistent with the goals of U.S. policy in the region.

But Nicaragua President Daniel Ortega and the Junta do not speak as though they are planning a democratic transition.

"We are not going to disarm the revolution," Ortega said last week. "Not one rifle will leave Nicaragua in any negotations."

Junta member Sergio Ramirez Mercado said Nicaragua would be disposed to sign the Contadora treaty only if the United States pledged to respect its terms. Special envoy Ambassador Philip Habib has already informally indicated the United States would do so. In a letter to three Democratic Congressmen, Habib asserted that the United States would support a treaty that provided for "comprehensive, verifiable and simultaneous implementation", adding "we would not feel politically bound to respect an agreement that Nicaragua was violating."

But would the United States move to demobilize and disband the Contras while Nicaragua stalls and dissembles? One of the treaty's provisions, the one Nicaragua is most concerned with, would outlaw "irregular military forces"—that is the Contras—and dismantle their bases.

The Sandinistas might even cut off their flow of weapons and guerrillas to neighboring countries. However, it would be easy enough to resume full-scale support a year or two later.

Such a swindle would not be the first one experienced by the United States. We have already made real concessions in exchange for promised goods that never materialized. At Yalta, Stalin promised free elections for Poland. North Vietnam promised a ceasefire and withdrawal of foreign troops from Laos and Cambodia.

At Helsinki, the Soviets promised to respect human rights and permit emigration. Following the Cuban missile crisis, Nikita Khrushchev promised President Kennedy the Soviet Union would not install offensive weapons in Cuba and would not use that country to export revolution in the hemisphere. The Communist record of treaty compliance reminds one of Thomas Hobbs' dictum that "covenants without swords" are not to be relied on.

Obviously, the United States should not acquiesce in an agreement which will not be fulfilled. To acquiesce in tyranny for Nicaragua, turmoil for Central America and enhanced risks for American national security is simply unthinkable.

If the freedom fighters are disarmed, there will be no swords and the agreement can be violated.

Obviously, the United States should not acquiesce in an agreement which will not be fulfilled. To acquiesce in tyranny for Nicaragua, turmoil for Central America and enhanced risks for American national security is simply unthinkable.

I urge my colleagues and the people of the United States of America to contact the people in the State Department, the National Security Council, and the President of the United States to exert pressure on those Central American countries to make sure that there is compliance with any agreement and that if a phony agreement is signed, that those Central American countries run the risk of having to go it alone if a war breaks out down there because of this phony agreement.

The United States should not be relied upon to come to their rescue if they knowingly sign an agreement they know the Sandinistas are going to violate. We should not be "Big Brother." We are trying to help them right now and if they are not willing to be helped, we should not be the scapegoat sometime down the road in the future.

American boys should not be the cannonfodder for mistakes made in Central America today. I am very concerned about that as a father. I have an 11-year-old son and in 5 or 6 or 7 years if a war breaks out he might very well be called upon to go down there and protect the southern border of the southern flank of the United States. That need not happen if we continue to support the freedom fighters until a fair and real agreement is signed and implemented and carried out. To disarm the Contras immediately upon the signing of an agreement would be a tragic mistake and it would be sowing the seeds of war for the United States in the future.

OUR NATION'S TRADE PROBLEMS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania [Mr. GAYDOS] is recognized for 60 minutes.

Mr. GAYDOS. Mr. Speaker, for more than 15 of the 18 years I have spent in the Congress, I have focused much of my energy on the Nation's trade problems.

As a cofounder of the Congressional Steel Caucus in 1972 and, today, as the current chairman of the Caucus Executive Committee, I have made every possible effort to inform you, my colleagues, of the dangers this Nation faces from the unrestricted and rising tide of imported goods.

In the late 1970's and the early 1980's, I used the example of the impact imports had on the steel industry to awaken your interest, but, today, steel is only one of too many embattled industries—machine tools, consumer electronics, textiles, shoes, heavy equipment—all on the verge of extinction because the trade laws aren't working or aren't being enforced to the fullest.

Well, Mr. Speaker, this week the house is considering H.R. 4800, the Trade and International Economic Policy Reform Act of 1986. It is our answer to dealing with the soaring trade deficits that have resulted in the demise of too many American industries and businesses.

H.R. 4800 offers some positive avenues to dealing with both sides of the trade problem in this country—it aims at reducing imports by focusing on those countries with whom the United States has the largest deficits and at the same time seeks to encourage American businesses to export more and to provide training to help improve the skills of American workers

and, thereby, make them more productive.

While this last is important, my concerns for the steel industry lead me to focus more on the import side of the bill rather than the export side.

I particularly want to speak to that section that would require mandatory negotiations with any major U.S. trading partner which has an "excessive trade surplus" with us.

I especially like the idea that those nations deemed to have that "excessive trade surplus" would have to negotiate because to fail to do so would result in serious consequences.

I also strongly support the provision in the bill that requires Presidential action against the offending country. While the bill does give the President the choice of quotas, tariffs, or marketing agreements, he couldn't just stand idly by while a situation worsened.

I almost wish we had included those same requirements for Presidential action in our revision of sections 201 and 301 of the 1974 Trade Act in 1979 and 1984. Right now, the President may follow the recommendations of the U.S. International Trade Commission, may amend the recommendations, or may ignore them entirely.

I remember the debates on that 1974 Trade Act and on the amendments offered to it in 1979 and 1984. During those debates I said that while the provisions of the laws on unfair trading practices, dumping, and subsidization were adequate, unless they were enforced, they wouldn't mean anything. As we all know, they have not been enforced adequately over the years.

That is one reason I support these provisions in H.R. 4800. At least in cases where this Nation has suffered unwarranted trade deficits at the hands of a particular country or two, there is some recourse for resolving the issue, for insuring that nations gaining benefits at our expenses will have to reduce that impact.

We have a long way to go, however, toward restoring and revitalizing our industry.

Just a brief look at a couple of recent headlines will give us some idea of the scope and range of the problem.

On May 1, the U.S. Department of Commerce reported that the U.S. merchandise trade deficit surged to $14.5 billion for the month of March, a $2 billion rise from February and $4 billion above the figure for last March—1985—the year the United States reported a record merchandise trade deficit of $148.5 billion.

If the pace continues for the rest of this year as it has for the first quarter of 1986, last year's trade deficit of $148.5 billion will pass into oblivion as we set a new and infinitely worse deficit.

Even more than just the numbers is the issue of whom we have the deficit with. Two weeks ago, in USA Today, an article described the shifts in the balances of trade for the seven nations that attended the Tokyo summit talks. Of the seven nations at that summit meeting—the United States, Great Britain, France, West Germany, Japan, Canada, and Italy—only the United States had a worse deficit in 1985 than it had in 1981.

In 1981, Great Britain, West Germany, Japan, and Canada had trade surpluses, while the United States, France, and Italy had deficits. What's more, the U.S. deficit was the largest even then, $30 billion.

In 1985, the United States, Great Britain, France, and Italy have deficits in trade, but only the United States trade deficit, over the $120 billion mark, stands out. Further, the trade surpluses of both West Germany and Japan have tripled between 1981 and 1985.

Another startling bit of information: A General Accounting Office study of 2,400 businesses noted that more than 1 million workers with companies having at least 100 employees lost their jobs in 1983–84 because those companies permanently reduced their work force or went out of business.

The study wasn't designed to determine the impact of imports on those companies, but since some two-thirds of the job losses were concentrated among larger firms in the manufacturing sector, my guess is that high levels of imported goods had a large impact.

The steel industry is an easy example to use. In 1975, all segments of the American steel industry employed just under 500,000 workers. If we include companies that either used steelmill products or companies that produced raw and finished materials for the steel industry, the number would be closer to 1 million.

In December 1985, employment in the steel industry, including both salaried and wage employees was 201,000, a drop of about 12,000 from December 1984.

Even more tragic, since December 1985, another 10,000 steel jobs have disappeared, leaving 191,000 wage and salaried employees. Further, the shrinkage of steel industry employment is not over.

At this point, it should be noted that the steelmakers and the United Steelworkers of America are engaged in negotiating new contracts.

Thus far, two of the integrated steel companies, LTV and National, and the Steelworkers have come to terms which offer substantial concessions by the workers in terms of hourly wage and benefit rates and work rules which will enable the companies to increase their productivity and lower costs.

That brings everyone up to date on where things are in the steel industry except for a review of the President's program of voluntary restraint agreements as a means of reducing steel imports.

That program, put into place in September 1984, was supposed to bring the import levels of steel products to just over 20 percent of the U.S. market.

Well, that program that was instituted some 18 months ago, leaves a lot to be desired.

As of March 31, 1986, the import penetration level of steel products was 24.4 percent for the month of March and 24.1 percent for the first quarter of 1986—January to March.

It is true that things are better than 1985. In March 1985, imports represented 24.5 percent of the steel mark, one-tenth of a percent higher for March 1985, as compared to March 1986. Not exactly a lot of improvement.

Given those kinds of statistics, Mr. Speaker, there is no doubt in my mind that H.R. 4800, the Trade and International Economic Policy Reform Act of 1986, is a vital part of the program.

I commend you for your farsightedness in bringing this issue to this point and I want to commend our majority leader for his efforts and skills in bringing together the products of six separate House committees into this omnibus package without having a major jurisdictional battle on the floor.

H.R. 4800 is a necessary piece of legislation if we are ever going to get some kind of handle on America's trade problems. We need this bill because it contains the kinds of all-inclusive elements that tie the whole series of related issues together into one meaningful and workable package.

I am proud to be a part of the supporting team on this bill.

□ 2035

GENERAL LEAVE

Mr. GAYDOS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of my special order today.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

CEREMONY OF WELCOME FOR NATAN (ANATOLY) SHCHARANSKY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas [Mr. WRIGHT] is recognized for 10 minutes.

Mr. WRIGHT. Mr. Speaker, on Tuesday May 13, 1986, Congress welcomed Natan (Anato-

ly) Shcharansky. The ceremony of welcome on that day was a moving and important expression of continued support in Congress for the cause of human rights and freedom of emigration. I submit for the RECORD the text of all of the remarks made at that ceremony and commend them to the attention of all of my colleagues:

SPEECH BY CONGRESSMAN SIDNEY R. YATES, MAY 13, 1986, IN HONOR OF ANATOLY SHCHARANSKY

Mr. Speaker, Senate majority leader, Mr. Shcharansky, Mrs. Shcharansky—Avital—in absentia, distinguished guests and friends.

This is a unique and memorable occasion. The Congress has heard and honored Presidents, Kings, world statesmen—today we hear and honor a common—and yet, an uncommon man. We honor a man who has demonstrated against overwhelming odds his adherence in his own way of our declaration of independence, who has joined with Thomas Jefferson in swearing upon the altar of God "eternal hostility against every form of tyranny over the minds of man."

With courage, with independence, with a bristling wit, he endured the worst of the Soviet gulag—and he won!

A few nights ago, I had dinner with Gerda Klein, a distinguished author and a survivor of the Nazi death camps. She spends a great deal of her time speaking to schoolchildren, telling the story of her brutal ordeal at the hands of the Nazis from 1942 to 1945. During a question period in one school, she told me with a smile, the reaction of one little boy was: "how awful—why didn't you write your Congressman?"

Anatoly Shcharansky did write his Congressman—not directly but much more effectively through his beautiful, indomitable wife Avital. Over the last seven or eight years, Avital Shcharansky has pounded the corridors of the Capitol and visited every congressional office in pleading for our help for her unfairly imprisoned husband. That her husband is here today in freedom is as much her victory as his.

I first met Anatoly—now Natan—in 1976 as a member of Speaker Carl Albert's mission to the Soviet Union. That evening while dining in our hotel with Georgy Arbatov the head of Russia's U.S. Canadian bureau, I told him I was going to visit a number of refuseniks. He threw up his hands: "Don't tell me about them!" He cried. "I don't want to hear about them!" But he did hear about them from every member of the delegation. I remember what the refuseniks told me: "Please, please do not repeal Jackson-Vanik. We need pressure like that if we are ever to be free.

A few days later, our group met with Secretary Leonid Breznev. When I raised the question of human rights provision in the third basket of the Helsinki agreement, he protested: Again, he cried: "I hear of nothing else. 155 times I have had to answer questions on immigration." He said: "I can't force people to leave. In our country anyone can leave who wants to go unless he's a criminal or has state secrets. If you have names, give them to Secretary Ponomarev. He'll take good care of it." Secretary Ponomarev did take good care of it. I never heard from him again. Ten years ago it was Breznev. Today it is Gorbachev.

One of those responsible for keeping the cause alive and well is the Speaker of the House. Both personally and officially he has given aid and sustenance to every initiative to help the cause of freedom, including freedom of immigration. In his trip last year to the Soviet Union, he raised and pressed hard with Soviet officials to allow Soviet applicants to leave. He has been unwavering in his support for Avital and Anatoly Shcharansky. I'm proud and honored to present my leader, the Speaker of the House, Thomas Phillip O'Neill.

WELCOMING REMARKS BY THE SPEAKER, THOMAS P. O'NEILL, JR., MAY 13, 1986

Mr. Leader, Members of the House and Senate, honored guests.

Today Congress has the honor and privilege of welcoming Anatoly Shcharansky. Only a few months ago, a prisoner of conscience in the Soviet Union, today he is a free man—reunited with his wife and his people.

As Speaker of the House, on behalf of all of my colleagues, I am personally honored to welcome Anatoly Shcharansky.

It is fitting that the House and Senate should join together for this ceremony of welcome. This Congress is dedicated above all else to protecting the blessings of liberty guaranteed by our Constitution.

Anatoly Shcharansky's personal struggle for freedom reminds us that liberty is only safe if each individual fights to protect it. He has become a symbol around the world that individual liberties are as fragile and important today as they were nearly two hundred years ago when our Constitution was drafted.

As an exile and prisoner—Anatoly Shcharansky came to represent hundreds of thousands of Soviet Jews who desire to leave the Soviet Union but are denied exit visas.

As a leader of the Helsinki Watch movement in the Soviet Union, Anatoly Shcharansky helped open the eyes of the west to the human rights problems of the Soviet Union.

As a husband forcibly separated from his wife for over twelve years—anatoly Shcharansky and his wife Avital have endured the injustice that Soviet emigration policies cause for many separated families.

Today as we gather to celebrate the freedom of one man and the success of the many who devoted years of efforts, protests and pleas to win his release, we must also remember that for hundreds of thousands who wish to emigrate the future still looks bleak.

Soviet emigration policies have not been altered in any radical way. The release of this prominent refusenik has not, so far, been followed by the release of enough others.

Immediately prior to this ceremony, the leaders of Congress—House and Senate—Democrat and Republican—had the opportunity to meet privately with Anatoly Shcharansky. At that meeting, we pledged to continue our efforts to win the freedom of the 400,000 Soviet Jews who desire to leave the Soviet Union.

We pledged that success in winning the release of Anatoly Shcharansky is proof that we need to do much more, not proof that we have done enough.

On a recent visit to the Soviet Union, I raised the issue of emigration with the leaders of that nation. I am pleased to report that several of the individual cases that were raised during my visit have been successfully closed—individuals allowed to emigrate, families reunited.

At future meetings with Members of Congress, and at future meetings where our two nations raise issues of trade and international peace, the question of human rights and the freedom to emigrate will continue to be raised. The freedom of each individual is sacred to us.

The people of the United States and the Congress of the United States rejoice in the freedom of Anatoly Shcharansky.

The strength of character and conviction that sustained Anatoly Shcharansky through his ordeal of exile and imprisonment make him a hero and a leader. Just as his leadership served as the pulse of the Soviet Jewry movement in the Soviet Union, he will remain a leader of the struggle for human rights as a free man.

It is a privilege to welcome Anatoly Shcharansky to the Congress of the United States.

STATEMENT BY ROBERT W. KASTEN, JR., HONORING NATAN SHCHARANSKY, MAY, 13, 1986

One week ago today, many of us were gathered here in this rotunda in remembrance of the Holocaust.

We remembered that April day, 41 years ago, when American soldiers first entered a Nazi concentration camp.

Liberating the camps changed those men forever, for they had looked into the face of evil . . . the immense evil that man is capable of inflicting on his fellow man . . . determined acts of evil against specific men, women, children.

The Nazis always tried to obscure the details and specifics. They didn't talk, for example, of murder. They use obscure terms like "resettlement" or "special treatment." They knew that tyranny could not survive in the sharp light of truth.

(Pause.)

Natan Shcharansky is standing here today because he had the courage to remain a free man in a totalitarian state, and because we have succeeded in shining that sharp light of truth on the Government of the Soviet Union.

All the years of protest, all the letters, all the marches were not in vain. The attention of the world is now focused on the plight of Soviet Jewry. The bright light of truth has been to prevail.

And that is why it is so crucial that we continue to make our voices heard. Now is not the time to back away, to trust in the new Soviet leadership to be somehow more humane, more moderate, more forgiving.

No. The actions of the Soviet Government over the past two weeks, the continued occupation of Afghanistan, the fact that so few are following Natan Shcharansky to freedom—these actions must speak to us more loudly than empty words.

We must tell Mr. Gorbachev that we will not stand silently by while our brothers and sisters are persecuted . . . that the plight of Soviet Jewry will not be downplayed in the interests of diplomacy . . . that the issues of peace and human rights cannot be separated.

Four decades ago, we were slow to face the truth, and we failed to save Europe's Jewry. Today, the fate of Soviet Jewry is in our hands. We must not give up . . . we must not let down . . . we must carry on, for the brilliant light of truth to finally prevail.

(Pause.)

Ladies and gentlemen, it is now my honor to introduce to you our distinguished majority leader, a man who has helped lead the fight here in the Senate to free Natan Shcharansky, and to focus worldwide attention on the plight of Soviet Jews. He is a statesman, he is respected for his strength and commitment, and I know he is dedicated to continuing to fight for our cause. It is

a distinct pleasure for me to introduce the very distinguished majority leader of the United States Senate, Robert Dole of the State of Kansas.

STATEMENT OF SENATOR BOB DOLE, WELCOME FOR NATAN (ANATOLY) SHCHARANSKY, ROTUNDA, U.S. CAPITOL, MAY 13, 1986

Why do the righteous suffer? It is a question which has plagued man throughout his history. Even before God spoke to Job out of the whirlwind, there were true believers whose faith was forged in the crucible of individual suffering. In trial came triumph, in victimization, victory. And yet no civilization which values life and all that makes life worth living can take for granted the persecution and degradation of men and women whose only "crime" is their allegiance to a power higher than any state.

Americans overlook such outrages at grave peril to our own moral standing. For as a freedom loving people, we must be advocates for human liberty wherever it is endangered. As children of the twentieth century—the bloodiest, most oppressive of the modern era—either we stand up for prisoners of conscience wherever they are endangered, or else we risk the crime of silence, that murderous prelude to Auschwitz and Buchenwald.

Today, we welcome such a man, an authentic hero in the struggle for human possibility. We recall the horrors to which he has been subjected—and we rejoice in his reunion with loved ones. But in celebrating his release, we also shine the light on thousands of others who remain imprisoned by a godless state. We point an accusing finger at a system of truancy, pledged to stamp out Jewish culture. We arraign an official star chamber which is itself prepared to incarcerate the faithful for their refusal to accept atheist dogma. In the words of Elie Wiesel:

"Russian Jews must know that we care about their plight. That their suffering, their resistance to injustice matters to us deeply. Now that they have challenged us not only with their eyes, but with their actions, with their lives, we must respond in kind, and raise our voice in protest. Yes, we must be heard not only by the oppressors, but by our oppressed brothers and sisters as well. They need to know that they are not alone. That we have learned not to be indifferent."

Ladies and gentleman, when he was once charged with being too idealistic, Woodrow Wilson had a timeless response. "That is how I know I am an American," He said. "Because I am an idealist."

Our guest of honor is an idealist whose ideals landed him in prison. For lighting Hanukkah candles and reciting Hebrew Psalms, he was put away in solitary confinement. For refusing to abandon his God, he was given bread and water—bread every other day. For holding the men in Moscow accountable for compliance with the Helsinki accords on human rights, he had his own human rights taken away. But no regime, no party and no politburo could break his will or shake his beliefs.

And now he comes to us, to remind us of others who share his plight. We would do him strange honor indeed, if we were to forget the thousands who still languish behind bars, and who seek nothing more than the chance to emigrate to a land where they can worship their God as he would have them. So today is one of Thanksgiving, but also of renewed concern—of gratitude for Natan Shcharansky's rescue, and determination that we will not rest until the key is turned that will unlock countless cells in that unhappy land where dissent is held to be a criminal offense, and true faith is feared as the enemy of political orthodoxy. It is in that spirit that I present to you a man who lends heroic stature to this old, proud citadel of human freedom . . . a free man, and a citizen of the world . . . Anatoly (Natan) Shcharansky.

REMARKS BY ANATOLY (NATAN) SHCHARANSKY, CAPITOL ROTUNDA, MAY 13, 1986

I was told that it would be very disrespectful if I came without a tie and without a formal speech so I am in a very uncomfortable situation.

Distinguished ladies and gentlemen, Members of the Congress of the United States of America.

In 1975 I had my first meetings with American Senators and Congressmen. Since those days and up to now, in the eyes of the Soviet Leadership, the Congress of the United States of America and I became accomplices in crime.

Reading the fifteen thousand pages of my criminal accusation, I found hundreds of pages of Congressional Records with testimonial speeches which you made on behalf of human rights and on behalf of Soviet Jews. I read a lot of character references given by the KGB about the late Senator Javits, about the late Senator Jackson, and about many other Senators and Congressmen. All these documents were used during my trial as the proof of my treason. That's why I was very glad and happy to know after my release that my accomplices didn't abandon me and that our "criminal collaboration" continued and continues up to this day.

I want to express my deep gratitude to the Congress of the United States of America for your firm stand in the cause of human rights, for your special support of Soviet Jewry and of course for the helping hand you lent my wife Avital during all the years of her struggle for my release.

Ladies and gentlemen, the time hasn't yet come for us to rest on our laurels. I am released. But four hundred thousand Soviet Jews who have already asked to leave are still kept as prisoners in the Soviet Union. Dozens of members of the Helsinki groups are still kept in the camps. A powerful campaign is waged against our Jewish culture. Many Hebrew teachers are in prison. The Soviet authorities do their best to isolate millions of Soviet Jews from the body of their nation.

The important role which the American Congress played in the past in saving Soviet Jews, its extensive experience and the role which the American Congress plays in formulating American policy all give you a unique opportunity to make the Soviet Union open the gates for Soviet Jews.

Congressional actions such as the Jackson Amendment or the Public Law of July 1985 drive home to the Leadership of the Soviet Union a basic truth that they continue to hope to circumvent: real understanding between East and West can only be built in an atmosphere of mutual trust. Trust means that obligations already undertaken in the Helsinki process will be fulfilled. Trust means that understanding between the east and the west must be based on the human values common to all civilized men. No amount of bargaining, of give and take, of mutual concessions can take the place of such trust.

Experience has taught the Jews of the Soviet Union, taught me while I was in the camp struggling against the KGB, that lesser demands and fewer expectations lead to a situation where our oppressors feel that they should be rewarded for cosmetic concessions. I will give you an example from concrete, every day life in the Soviet camp. In the prison camps the Soviet authorities have approximately twenty different regimes of feeding people, of giving different quantities of food. If you don't behave in the way they want you to behave, this portion becomes less, less and less. The lowest two are 9a and 9b. Under 9b you receive food of only 900 calories a day. So if you don't give up you receive less and less food. And if one day you give up, what do you get for this? You get 9a. Practically all the time, almost to the last moment—except during the two months when they were preparing me for export, I received menu 9b. Many of my friends who still remain in the camps and who don't give up, who say no to all the approaches of the KGB, receive this diet. And those who are broken, what do they receive? They receive 9a and it has made a big deal for them. The same can happen if for example we would now start discussing with them canceling the Jackson amendment. We saw fifty thousand Jews a year allowed to leave, now it's down to practically zero. They can multiply the zero twice or thrice, they can let one, two, three hundred people a month go and say look what big progress it is. But ladies and gentleman can 9a be the recipe for East-West detente?

The Jackson amendment must be maintained and reinforced so that the Soviets will realize that only real and irreversible progress and not public relations gimickry, only the release of the four hundred thousand Soviet Jews who have decided to emigrate can serve as a foundation for real dialogue.

If we are firm, that dialogue can begin and can result in a better world for us and for our children. Compromising these principles that can give meaning to a new dialogue would damage America's moral credibility, guarantee failure to achieve for Russian Jewry anything but menu 9a and in the long run undermine the stability of any economic or political understanding between the major powers.

I address you today after having discussions with the leaders of the House and Senate. They assured me that they would continue their strong support for the cause of Soviet Jewry and the cause of human rights in the Soviet Union. I am very grateful to them for this and I hope in the future we will continue the struggle together.

In the Liberty Garden in the center of Jerusalem there is a bell which is an exact replica of the Liberty Bell in the United States of America. The words inscribed on the bell were given to the world through the Jewish people thousands of years ago and formed the basis of the American ideal. "Proclaim liberty throughout the Land". History has conferred on you the task of maintaining that ideal. I am absolutely sure that you will be equal to it.

Thank you.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore, entered, was granted to:

(The following Members (at the request of Mr. CLINGER) to revise and extend their remarks and include extraneous material:)

Mr. BURTON of Indiana, for 60 minutes, today.

(The following Members (at the request of Ms. KAPTUR) to revise and extend their remarks and include extraneous material:)

Mr. PEASE, for 5 minutes, today.

Mr. COOPER, for 5 minutes, today.

Mr. FORD of Michigan, for 5 minutes, today.

Mr. ENGLISH, for 5 minutes, today.

Mr. PANETTA, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. HUBBARD, for 5 minutes, today.

Mr. WRIGHT, for 10 minutes, today.

Mr. ALEXANDER, for 60 minutes, today.

Mr. CLAY, for 60 minutes, on May 22.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. MURPHY, during general debate on H.R. 4800, in the Committee of the Whole, today.

Mr. STAGGERS, during general debate on H.R. 4800, in the Committee of the Whole, today.

Mr. MCCAIN, on the Coleman of Texas amendment to H.R. 4800, in the Committee of the Whole, today.

Mrs. COLLINS, following rollcall No. 130 on S. 2416, today.

Mr. KOSTMAYER, following rollcall No. 130 on S. 2416, today.

(The following Members (at the request of Mr. CLINGER) and to include extraneous matter:)

Mr. MCDADE.

Mr. PORTER.

Mr. GALLO in two instances.

Mr. RUDD.

Mr. SOLOMON.

Ms. SNOWE.

Mr. LENT.

Mr. GRADISON.

Mr. DAUB.

Mr. COURTER.

Mr. MCCAIN.

Mr. CRANE.

Mr. LEWIS of California.

Mr. BROOMFIELD.

Mr. SAXTON in two instances.

Mr. DREIER of California.

Mr. GEKAS.

Mr. YOUNG of Florida.

Mr. KEMP in two instances.

Mr. ROTH.

Mr. YOUNG of Alaska.

(The following Members (at the request of Ms. KAPTUR) and to include extraneous matter:)

Mr. DORGAN of North Dakota.

Mr. MORRISON of Connecticut in two instances.

Mr. LUKEN.

Mr. OBEY.

Mr. TORRES.

Mr. MILLER of California.

Mr. COLEMAN of Texas.

Mr. DERRICK.

Mr. YATRON.

Mrs. LLOYD.

Mr. HAMILTON.

Mr. DOWNEY of New York in three instances.

Mr. O'NEILL.

Mr. SMITH of Iowa.

Mr. FORD of Michigan.

Mr. RODINO.

Mr. FASCELL.

Mr. STARK.

Mr. MAVROULES.

Mrs. COLLINS.

Mr. SCHUMER.

Mr. FEIGHAN.

Mr. LANTOS.

Mr. ROE in two instances.

Mr. BOLAND.

Mr. KOLTER in two instances.

Mr. WAXMAN.

Mr. ORTIZ.

Mr. BEDELL.

Mr. CLAY.

Mr. FORD of Tennessee.

Mr. LIPINSKI.

Mr. BRUCE.

SENATE ENROLLED BILL SIGNED

The SPEAKER announced his signature to an enrolled bill of the Senate of the following title:

S. 173. An act to settle and adjust the claim of the Tehran American School for $13,333.94.

ADJOURNMENT

Mr. GAYDOS. Mr. Speaker. I move that the House do now adjourn.

The motion was agreed to; accordingly (at 8 o'clock and 39 minutes p.m.), the House adjourned until tomorrow, Thursday, May 22, 1986, at 10 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

3548. A communication from the President of the United States, transmitting a request for a reappropriation in the amount of $10,000,000 and supplemental appropriation language for fiscal year 1986 for the Department of Justice and supplemental appropriation language for fiscal year 1986 for the Department of Labor, pursuant to 31 U.S.C. 1107 (H. Doc. No. 99-224); to the Committee on Appropriations and ordered to be printed.

3549. A letter from the Administrator, General Services Administration, transmitting notification of a technical violation of the Anti-Deficiency Act, pursuant to 31 U.S.C. 1517(b); to the Committee on Appropriations.

3550. A letter from the Deputy Secretary of Defense, transmitting a report on suspension and debarment of defense contractors, pursuant to Public Law 99-145, section 954(a) (99 Stat. 702); to the Committee on Armed Services.

3551. A letter from the Acting Assistant Secretary of the Army (Manpower and Reserve Affairs), transmitting a draft of proposed legislation to amend title 10, United States Code, to permit the involuntary order to active duty of a member of the Reserve components of the Armed Forces of the United States missing, detained or interned in a foreign country against his will, or held captive by a hostile force; to the Committee on Armed Services.

3552. A letter from the Secretary of Education, transmitting a copy of proposed final regulations for the Library Services and Construction Act—State-administered program and direct grant programs for Indian tribes and Hawaiian natives, foreign language materials acquisition, and literacy, pursuant to 20 U.S.C. 1232(d)(i); to the Committee on Education and Labor.

3553. A letter from the Administrator, General Services Administration, transmitting a draft of proposed legislation to amend 31 U.S.C. 3726, payment for transportation, to permit prepayment audits for selected transportation bills, to permanently authorize payment of transportation audit contractors from carrier overpayments collected, and to authorize net overpayments collected to be transferred to the Treasury; to the Committee on Government Operations.

3554. A letter from the Director, Office of Information Resources Management, Department of the Interior, transmitting notification that the Bureau of Mines is proposing to alter an existing Privacy Act system of records notice pertaining to personnel security files, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

3555. A letter from the Special Counsel, U.S. Merit Systems Protection Board, transmitting notification of a report received by the Secretary of the Treasury on the results of his investigation into allegations of misuse of Government vehicles and misconduct by employees of the U.S. Mint, San Francisco, CA, pursuant to 5 U.S.C. 1206(b)(5); to the Committee on Post Office and Civil Service.

3556. A letter from the Secretary of Energy, transmitting the fifth annual revised comprehensive program management plan for the Federal wind energy technology program, pursuant to Public Law 96-345, section 4(c); to the Committee on Science and Technology.

3557. A letter from the Assistant Attorney General, Department of Justice, and the Assistant Secretary of the Interior, transmitting a draft of proposed legislation entitled, "Indian Gambling Authorization and Regulation Act of 1986"; jointly, to the Committees on Interior and Insular Affairs and the Judiciary.

3558. A letter from the Comptroller General of the United States, transmitting a report entitled, "Hazardous Waste—DOD's Efforts to Improve Management of Generation, Storage, and Disposal" (GAO/NSIAD-86-60); jointly, to the Committees on Government Operations, Armed Services, and Energy and Commerce.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. BROOKS: Committee on Government Operations. H.R. 1400. A bill to extend the authorization of appropriations for general revenue sharing for five years; with amendments (Rept. 99-610). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ENGLISH (for himself and Mr. KINDNESS):

H.R. 4862. A bill to amend the Freedom of Information Act to provide procedures for the processing of requests for confidential business information; to the Committee on Government Operations.

By Mr. BRYANT:

H.R. 4863. A bill to amend chapter 11 of title 18, United States Code, to prohibit any former Member of Congress or former high-level Federal official, or any person who has had a top secret or higher security clearance from representing or advising a foreign government or foreign-government entity in a transaction with, or a matter before, the U.S. Government; to the Committee on the Judiciary.

By Mr. DOWNEY of New York (for himself and Mr. CARNEY):

H.R. 4864. A bill entitled, the "Fire Island National Seashore Amendments Act of 1986"; to the Committee on Interior and Insular Affairs.

By Mr. FASCELL (for himself, Mr. GILMAN, Mr. MCHUGH, Mr. CONTE, Mr. DIXON, and Mr. LELAND):

H.R. 4865. A bill to establish the Africa Famine, Recovery, and Development Fund for the relief, recovery, and long-term development of sub-Saharan Africa, and for other purposes; jointly, to the Committees on Foreign Affairs, and Banking, Finance and Urban Affairs.

By Mr. FORD of Michigan (for himself, Mr. CLAY, Mrs. SCHROEDER, Mr. GARCIA, Mr. LELAND, Ms. OAKAR, Mr. SIKORSKI, Mr. MCCLOSKEY, Mr. ACKERMAN, Mr. DYMALLY, Mr. DE LUGO, Mr. HORTON and Mr. YOUNG of Alaska):

H.R. 4866. A bill to amend chapter 2 of title 39, United States Code, with respect to appointment, pay, and status of the Postmaster General and the Deputy Postmaster General, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. KEMP (for himself, Mr. LANTOS, Mr. GILMAN, Mr. FASCELL, Mr. BROOMFIELD, and Mr. HYDE):

H.R. 4867. A bill to authorize the President to award congressional gold medals to Doctors Andrei Sakharov and Yelena Bonner for the great personal sacrifice they have made to further the causes of human rights and world peace; to the Committee on Banking, Finance and Urban Affairs.

Mr. GRAY of Pennsylvania (for himself, Mr. FAUNTROY, Mr. WOLPE, Mr. SOLARZ, Mr. ROEMER, Mr. CONTE, Mr. GRADISON, Mr. LEACH of Iowa, Mr. WEBER, Mrs. SCHNEIDER, Mr. FOLEY, Mr. FISH, Mrs. SCHROEDER, Mr. RODINO, Mr. WHEAT, Mr. ALEXANDER, Mr. GEPHARDT, Mr. COELHO, Mr. RANGEL, Mr. MCKINNEY, Mr. TOWNS, Mr. DYMALLY, Ms. OAKAR, Mr. GOODLING, Mr. BERMAN, Mr. WEISS, Ms. SNOWE, Mr. GARCIA, Mr. ST GERMAIN, Mr. MILLER of Washington, and Mr. BARNES):

H.R. 4868. A bill to prohibit loans to, other investments in, and certain other activities with respect to, South Africa, and for other purposes; jointly, to the Committees on Foreign Affairs, Banking, Finance and Urban Affairs, Ways and Means, and Public Works and Transportation.

Mr. KRAMER:

H.R. 4869. A bill to provide that cost-of-living adjustments of certain Federal benefit programs shall be treated the same as similar adjustments in social security benefits; to the Committee on Government Operations.

By Mr. DREIER of California:

H.R. 4870. A bill to allow depository institution holding companies to establish subsidiaries to engage in certain securities activities, to establish a system for regulating depository institutions to be known as consumer banks, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

By Mr. MRAZEK:

H.R. 4871. A bill to prevent Federal funds received under any grant from the National Institutes of Health from being used to obtain animals from animal shelters for research purposes; to the Committee on Energy and Commerce.

By Mr. RICHARDSON:

H.R. 4872. A bill to place a moratorium on the forceable eviction and relocation of Navajo and Hopi Indians, and for other purposes; jointly, to the Committees on Interior and Insular Affairs, and Appropriations.

By Mr. RICHARDSON (for himself, Mr. LUJAN, and Mr. SKEEN):

H.R. 4873. A bill to authorize certain transfers affecting the Pueblo of Santa Ana in New Mexico, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. RITTER:

H.R. 4874. A bill to enhance the availability and affordability of professional liability insurance by requiring certain standards in State tort liability systems; jointly, to the Committees on the Judiciary, and Energy and Commerce.

By Mr. ROE:

H.R. 4875. A bill to provide a 5-year suspension of the duty on silk yarn; to the Committee on Ways and Means.

By Mr. ROWLAND of Georgia (for himself, Mr. BLILEY, Mr. BILIRAKIS, Mr. HEFNER, Mr. WAXMAN, Mr. BARNARD, Mr. DARDEN, Mr. HATCHER, Mr. FOWLER, Mr. JENKINS, Mr. RAY, Mr. THOMAS of Georgia, Mr. GINGRICH, Mr. SWINDALL, Mr. LEHMAN of Florida, Mr. MICA, Mr. PEPPER, Mr. SMITH of Florida, Mr. SHAW, Mr. OLIN, Mr. YOUNG of Florida, Mr. BOUCHER, Mr. SLAUGHTER, Mr. WHITEHURST, Mr. FASCELL, Mr. DERRICK, and Mr. DASCHLE):

H.R. 4876. A bill to amend section 9528 of the Consolidated Omnibus Budget Reconciliation Act of 1985 to hold States harmless, during fiscal year 1987, against a decrease in payment rates under the Medicaid Program resulting from enactment of that section; to the Committee on Energy and Commerce.

By Mr. SCHUMER:

H.R. 4877. A bill to provide for the collection of independently verified data regarding certain insurance matters, to make such data available to certain State and Federal officials for use in making policy decisions and determinations with respect to the insurance industry, and for other purposes; to the Committee on Energy and Commerce.

By Mr. SEIBERLING (for himself, Mr. UDALL, Mr. YOUNG of Alaska, Mr. LAGOMARSINO, Mr. BLAZ, and Mr. AKAKA):

H.R. 4878. A bill to require the Secretary of the Interior to submit to the House Interior and Insular Affairs Committee and the Senate Energy and Natural Resources Committee certain information regarding Micronesian governments; to the Committee on Interior and Insular Affairs.

By Ms. SNOWE:

H.R. 4879. A bill to amend the Urban Mass Transportation Act of 1964 to increase the percentage of funds allocated to rural areas; to the Committee on Public Works and Transportation.

By Mr. PANETTA:

H.R. 4880. A bill to amend the Food Stamp Act of 1977, the Child Nutrition Act of 1966, and the National School Lunch Act to improve the availability of benefits under such acts; to provide for a program for nutrition monitoring and research; and for other purposes; jointly, to the Committees on Agriculture, Education and Labor, and Science and Technology.

By Mr. STARK (for himself, Mr. DUNCAN, Ms. MIKULSKI, Mr. FORD of Tennessee, Mr. RANGEL, and Mr. WHITTAKER):

H.R. 4881. A bill to amend title XVIII of the Social Security Act with respect to coverage of optometrists' services and coverage of occupational therapy services under the Medicare Program; jointly, to the Committees on Ways and Means, and Energy and Commerce.

By Mr. WAXMAN (for himself, Mr. SCHUMER, Mr. ROYBAL, Mr. RINALDO, Mr. PEPPER, Mr. SCHEUER, Mr. WALGREN, Mr. SHELBY, Mr. WYDEN, Mr. SIKORSKI, Mr. WIRTH, Mr. FLORIO, Mr. LUKEN, Ms. MIKULSKI, Mr. LELAND, Mrs. COLLINS, Mr. RICHARDSON, Mr. BATES, Mr. WHITTAKER, Mr. BLILEY, Mr. ATKINS, Mr. BARNES, Mr. BEDELL, Mr. BIAGGI, Mrs. BOXER, Mr. CHAPMAN, Mr. DIXON, Mr. EDWARDS of California, Mr. FAUNTROY, Mr. FAZIO, Mr. FORD of Tennessee, Mr. FRANK, Mr. JEFFORDS, Mrs. JOHNSON, Mr. LEVIN of Michigan, Mr. MARTINEZ, Mr. MACKAY, Ms. OAKAR, Mr. OWENS, Mr. REID, Mr. STARK, Mr. SUNIA, Mr. TORRES, Mr. TRAFICANT, Mr. WEISS, and Mr. YATES):

H.R. 4882. A bill to amend title XIX of the Social Security Act to permit States, at their option, to provide Medicaid coverage for poor elderly or disabled individuals and to provide medical assistance for poor, Medicare beneficiaries in meeting Medicare cost-sharing requirements; to the Committee on Energy and Commerce.

By Mr. YOUNG of Alaska (for himself, Mr. UDALL, and Mr. SEIBERLING):

H.R. 4883. A bill to provide options for land exchanges involving lands on Admiralty Island, AK, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mrs. BENTLEY:

H.J. Res. 641. Joint resolution commemorating the last voyage of the Pride of Baltimore; to the Committee on Post Office and Civil Service.

By Mr. SOLOMON:

H. Res. 459. Resolution expressing the support and encouragement of Congress for those working for freedom and against com-

munism in southwest Africa/Namibia; to the Committee on Foreign Affairs.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 615: Mr. DIOGUARDI and Mr. KEMP.
H.R. 979: Mr. ROBINSON.
H.R. 1294: Mr. MOLINARI.
H.R. 1309: Mr. BROOKS, Ms. OAKAR, Mr. MARKEY, Mr. STUDDS, Mr. WILSON, Mrs. COLLINS, Mr. MINETA, and Mr. HALL of Ohio.
H.R. 1471: Mr. SHUMWAY, Mr. TOWNS, Mr. STUMP, Mr. DANNEMEYER, and Mr. EDWARDS of Oklahoma.
H.R. 1577: Mr. YOUNG of Alaska.
H.R. 1887: Mr. FISH.
H.R. 1946: Mr. BILIRAKIS, Mr. Cheney, Mr. DEWINE, and Mr. ROGERS.
H.R. 2741: Mr. ROWLAND of Connecticut.
H.R. 2791: Mr. GEKAS and Mr. FISH.
H.R. 2798: Mr. PENNY.
H.R. 3006: Mr. APPLEGATE and Mr. RAY.
H.R. 3024: Mr. DUNCAN, Mr. SPRATT, Mr. RICHARDSON, and Mr. GARCIA.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 1

By Mr. TAUKE:

(Amendment to the amendment in the nature of a substitute (text of H.R. 4746).)

—Page 27, line 9, strike the quotation mark and final period.

Page 27, after line 9, insert the following new subparagraph:

"(C) The Secretary shall publish in the Federal Register a description of each application receiving the preliminary approval of the Secretary under this section. Such publication shall be made not later than 90 days after the granting of the preliminary approval.".

Page 32, after line 24, insert the following new paragraph:

"(4) PROJECTS INCREASING MARKET SHARE OF NONDOMESTIC CORPORATION.—No assistance may be provided or utilized under this section for any project that the Secretary determines will be used to expand the market share of a nondomestic business entity in a manner that decreases the market share or operations of a domestic business entity.

Page 33, line 1, strike "(4) DEFINITION.—" and insert "(5) DEFINITIONS.—(A)".

Page 33, after line 4, insert the following new subparagraphs:

"(B) For purposes of this subsection, the term 'domestic business entity' means any business entity not described in subparagraph (C).

"(C) For purposes of this subsection, the term 'nondomestic business entity' means any business entity—

"(i) more than 50 percent of the ownership of which is held by persons who are not citizens or permanent residents of the United States;

"(ii) that is controlled by persons who are not citizens or permanent residents of the United States; or

"(iii) that is a subsidiary of, or is controlled by, another business entity described in clause (i) or (ii).

Page 33, line 5, strike "(5)" and insert "(6)".

(Amendment to the amendment in the nature of a substitute offered by Mr. WYLIE of Ohio (text of H.R. 4757).)

—Page 19, line 15, strike "paragraph" and insert "paragraphs".

Page 20, line 3, strike the quotation mark and final period.

Page 20, after line 3, insert the following new paragraph:

"(4) The Secretary shall publish in the Federal Register a description of each application receiving the preliminary approval of the Secretary under this section. Such publication shall be made not later than 90 days after the granting of the preliminary approval.".

Page 20, before line 4, insert the following new section (and redesignate the subsequent sections, and conform the table of contents, accordingly):

SEC. 148. PROHIBITION ON USE OF URBAN DEVELOPMENT ACTION GRANTS TO INCREASE MARKET SHARE OF NONDOMESTIC CORPORATIONS.

(a) IN GENERAL.—Section 119(h) of the Housing and Community Development Act of 1974 is amended—

(1) by inserting "(1)" after the subsection designation; and

(2) by adding at the end the following new paragraph:

"(2)(A) No assistance may be provided or utilized under this section for any project that the Secretary determines will be used to expand the market share of a nondomestic business entity in a manner that decreases the market share or operations of a domestic business entity.

"(B) For purposes of this paragraph:

"(i) The term 'domestic business entity' means any business entity not described in clause (ii).

"(ii) The term 'nondomestic business entity' means any business entity—

"(I) more than 50 percent of the ownership of which is held by persons who are not citizens or permanent residents of the United States;

"(II) that is controlled by persons who are not citizens or permanent residents of the United States; or

"(III) that is a subsidiary of, or is controlled by, another business entity described in subclause (I) or (II).".

(b) APPLICABILITY.—The amendments made by this section shall be applicable to urban development action grants that have not received the preliminary approval of the Secretary of Housing and Urban Development before the date of the enactment of this Act.

SENATE—*Wednesday, May 21, 1986*

(Legislative day of Monday, May 19, 1986)

The Senate met at 11 a.m., on the expiration of the recess, and was called to order by the President pro tempore [Mr. THURMOND].

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

Gracious God, we join in sympathy with Senator DECONCINI and his family in the loss of his father. May they enjoy the peace of God that passes understanding in this time of sorrow. We ask Thy blessing upon Andrei Sakharov on the occasion of his birthday and we commend his wife to Your gracious care as she returns back to the U.S.S.R.

Father God, almost everything that happens here is important to someone negatively or positively. Whether simple or cosmic, issues discussed here impinge upon some, often many—often all the people of the Nation and sometimes of the world. Help us to remember Father that no social unit is more important than the family—that no culture can long endure the disintegration of the home. Lead the Senators to give strong leadership to the primacy of the home and family. Much work awaits the Senators' time and energies these next 2 weeks. Help the Senators to make time for family as they respond to all these demands. May those who travel go and return in safety and may this recess be one of total satisfaction to all who labor here. In Jesus' name. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The able majority leader, Senator DOLE, is recognized.

Mr. DOLE. Mr. President, I thank the distinguished Presiding Officer, Senator THURMOND.

SCHEDULE

Mr. DOLE. Mr. President, under the standing order, the leaders have 10 minutes each followed by special orders in favor of Senators HAWKINS, CRANSTON, PROXMIRE, KERRY, BUMPERS, LEAHY, and LEVIN.

Then there will be routine morning business not to extend beyond the hour of 12 noon with Senators permitted to speak therein for not more than 5 minutes each.

At the conclusion of routine morning business, the Senate could be asked to turn to any legislative or executive items cleared for action—possibly the veto message to accompany the Saudi arms sale, and votes can be expected throughout the day.

I am advised that there will be a rollcall vote requested on the conference report to accompany S. 124, the Safe Drinking Water Act. And that vote will come about, as I understand it, 12:20 or 12:30.

In addition, we are still making an effort to bring up the supplemental appropriations bill. At least we hope to start that before we leave here this evening.

It would be my hope that we could complete our action, and our work today, say between 5 and 6 o'clock.

Mr. CRANSTON. Mr. President, will the leader yield for one question?

Mr. DOLE. Yes.

Mr. CRANSTON. Will the leader indicate whether we will or will not vote on the Saudi arms package?

Mr. DOLE. I hope to have some indication by, say, 1 o'clock.

Mr. CRANSTON. I thank the leader very much.

Mr. DOLE. It would only be a guess, of course, about how long debate might take. I assume it would not take any lengthy debate.

Mr. CRANSTON. I can assume it would be very swift.

CENTRAL AMERICAN AGREEMENT MUST BE VERIFIABLE

U.S. SUPPORTS NEGOTIATED SETTLEMENT

Mr. DOLE. Mr. President, the United States supports a peaceful, negotiated resolution of the conflict in Central America. That is the policy of our Government and our President, and it is a policy I strongly endorse.

But the President has also made clear—and, again, I support him strongly—that the resolution we seek, and will insist on, is a real one—one that adequately addresses our concerns, one that will protect our security interests in the region, and one that meets the needs, and aspirations, of the democratic governments of the region and, the people of all the countries there, including the people of Nicaragua.

The Contadora nations are again circulating a draft agreement, and are hoping to have all the nations of the region sign it by early June. Our allies and friends in the region are looking at it very carefully. We have to be equally careful in our own examination.

TESTS OF A GOOD AGREEMENT

What kind of agreement will meet our needs and serve our interests? In my view, any agreement we support must meet three tests. And let me say that again, so it is clear—it must meet all three of the following tests, each of them equally essential.

CONSISTENT WITH OUR GOALS

First, at a minimum, any agreement must comport with the goals we have set "vis-a-vis" Nicaragua. It must require that the Sandinistas:

Stop supporting war against their democratic neighbors;

Reduce the foreign military and terrorist presence in their country, which threatens the peace and security of the entire region;

Halt their alarming, offensive military buildup, aimed at threatening and intimidating the democratic states of the region; and

Reverse the trend of dictatorship and oppression within Nicaragua, giving all political forces in the country—including the democratic resistance—a real role in the political process. Putting it another way, the Sandinistas have to dismantle their dictatorship and begin the process of democratization.

MUST BE VERIFIABLE

Second, any agreement which we support must be verifiable. We have to be able to know, with certainty and in a timely manner, whether or not all of the parties to the agreement—including the Sandinistas—are keeping their word.

The record is not encouraging. The Sandinistas have broken every major agreement and promise they have made; to the Organization of American States; to their neighbors, and to their own people. They told the OAS they wanted to replace Somoza's dictatorship with democracy; instead, they instituted a new form of oppression, aided and abetted by foreign powers. They have promised their neighbors, again and again, that they have no designs on their territory, and no intention to destabilize them; meanwhile they give all out, decisive support to guerrilla movements throughout the region. They have promised their people democracy and prosperity; they have delivered oppression and misery.

We are just not going to take their word for anything any more.

And we are not going to support any agreement which leaves the process of

verification up in the air, or the mechanisms for verification so muddled, or politicized as to be practically worthless.

We will insist on independent, well-funded, ably staffed, and properly equipped observer teams, who can do their job without fear, and without the need for an OK from any of the concerned parties.

SPECIFIC IN ACTIONS AND TIMETABLE

Finally, any agreement which we support must be specific enough so that the observer teams—and the nations of the world—can see clearly whether the agreement is being upheld and, if not, who is to blame. We will not accept an agreement which offers only grand rhetoric, vague formulas, general plans and empty promises. An agreement which we will support must have clear cut, specific goals and clear cut, specific timetables for achieving those goals.

We do not want an unverifiable pledge that the Sandinistas will stop supporting regional insurgencies. We insist on the creation of a program of verification, including teams of observers, who can give us independent assurances that no more Sandinista advisers, and no more Soviet- and Cuban-supplied weapons, are flowing out of Nicaragua to the guerrillas.

We do not want some empty assurances that the Soviet, Cuban, and terrorist presence will be scaled down and the military buildup reversed. We want to know that the Soviet and Cuban forces and the Libyan and PLO terrorists are getting out, now, and that all offensive weapons are being crated up, and shipped out.

We do not want some vague promise of democratic reform in Nicaragua. We want to know that the Contras, and all the other legitimate political forces in the country, will be able to play a significant role in the political process, starting now. We need binding guarantees on free speech; free elections; a free press; and religious freedom for all—guarantees these freedoms will be implemented now.

MINIMUM FORMULA FOR REAL PEACE

These are minimum goals. The minimum to meet our legitimate needs and concerns; the minimum to give peace a real chance in Central America. Any other kind of agreement would not serve our interests; would not be good for our allies and friends in the region; would not help the people of Nicaragua achieve the democracy they so badly deserve; and, above all, would not contribute to the stability, security, and the peace of Central America.

□ 1110

Mr. President, this may be the last opportunity for the Contadora process to work—to achieve the end we all so strongly want. It may also be the last chance for the Marxist regime in Nicaragua to turn away, voluntarily, from its path of unsavory alliances and military buildup, regional aggression, and domestic suppression.

I sincerely hope the Sandinistas take this opportunity. If they do not, though, and their past record gives me little optimism, let them know, and let the world know, that we remain committed to our ideals, our goals, and our friends; determined to meet our responsibilities; and prepared to do what is necessary to protect our national interest.

NATIONAL ANDREI SAKHAROV DAY

Mr. DOLE. Mr. President, earlier this spring Congress proclaimed this day, May 21, as "National Andrei Sakharov Day."

No man symbolizes the struggle for human rights, for world peace, better than Andrei Sakharov.

A renowned scientist, one of the founders of the Moscow Helsinki Watch Group, and Nobel Peace laureate, Dr. Sakharov has committed his life to the fight for individual freedom, in his country, in every country.

Sakharov has written:

I am not a professional politician. That is why I am always bothered by questions concerning the usefulness and eventual results of my actions. I am inclined to believe that moral criteria in combination with unrestricted inquiry provided the only possible compass for these complex and contradictory problems. I shall refrain from specific predictions, but today, as always, I believe in the power of reason and the human spirit.

Because Dr. Sakharov continues to believe in the power of reason and the human spirit, it is only fitting that this country, founded on the principles of individual freedom, honor him on his 65th birthday. By remembering Dr. Sakharov, and the despicable conditions and gross injustices he must live with, perhaps we will hold more dear the many fruits of democracy that we often take for granted.

We extend our best wishes and heartfelt support to Dr. Sakharov. And ask that his brave wife, Yelena Bonner, who is here in Washington today, will convey our commitment to fight for his freedom and for the basic human rights of all his countrymen.

A DANGEROUS HABIT: COKE IS IT

Mr. DOLE. Mr. President, the Senator from Florida, Mrs. HAWKINS, has a special order this morning. In her absence, at this time I wish to present her statement for the Senate. It is as follows:

A DANGEROUS HABIT: COKE IS IT

Mrs. HAWKINS. Mr. President, there is a dangerous myth that pervades certain elements within our society. That fantasy is the myth of the "recreational drug," or the fanciful distinction between "soft" and "hard" drugs. There is a growing body of evidence that the so-called recreational drugs, marijuana and cocaine, are not harmless and innocent as some would lead us to believe. Rather they can have devastating effects on our own bodies, our families, our friends and the people we come into contact with every day.

For years we have lived under the illusion that cocaine in not physically addicting like the lower class drugs of heroin and opium. Instead we said that with time, cocaine could become psychologically addicting. Now, however, scientific evidence is pointing to growing evidence that cocaine is in fact physically addicting and that certain forms of cocaine have acquired a reputation for being the "most addictive substance known to man."

Current research into the effects of cocaine have focused on a chemical in the brain known as dopamine. Dopamine molecules are one of several chemicals that permit electrical charges to jump the gap between nerve cells known as the synapse. To send a message, a nerve cell releases thousands of dopamine molecules, which activate receptors on the adjacent nerve cell. Once the message is complete the dopamine molecules return to the sending nerve cell and are reabsorbed awaiting future use.

Cocaine blocks this reabsorption.

The result is that dopamine remains in the gap between the cells stimulating the receptors on the adjacent cell over and over again.

After a while, however, the process begins to change. Eventually the dopamine buildup is washed out of the synapse, and the brain's supply of this essential substance is squeezed out. By this time the receptor cells have become supersensitive and accustomed to receiving this continuous signal. As a consequence of this combination of effects—that is, where the cells have become accustomed to continuous stimulation while at the same time the supply of the stimulant, dopamine, has been washed out of the system—the body is left craving a new supply of dopamine—a supply that cocaine can fill. So the addiction begins.

In the past people did not believe cocaine to be addictive because unlike drugs such as heroin there were no obvious physical signs of withdrawal. But according to Dr. Frank Gawin, a Yale University addiction expert, "cocaine is a physically addictive drug where alterations occur in the part of the brain that affects psychology. So the expression of the addiction is psychological." In other words, cocaine messes with your mind, and one of the psychological symptoms of addiction is chemically induced depression.

In addition to this recent research on cocaine addiction, there have been numerous animal studies on the effects of cocaine use. In one study on laboratory monkeys it was found that when given free access to a steady supply of cocaine, the monkeys would ingest the cocaine to the exclusion of food and water. Eventually the monkeys died. No other drug tested had this effect.

Though there are still questions about the exact nature of cocaine addiction, the results of these findings are alarming. They are especially alarming in the light of the growing acceptance of the inexpensive and hyperaddictive form of cocaine known as "crack" or "rock." These new forms of cocaine are especially attractive to our young people because they afford a cheap high. What they may not realize is they may

spend the rest of their lives paying for their cocaine habit.

Mr. President, while in the past there may have been a tendency to look on cocaine as "harmless" or "recreational," I believe that the results of this recent research should debunk these myths. I hope that it will also encourage us to redouble our efforts to block the flow of these destructive substances into our schools, communities and workplaces.

LETTER TO SECRETARY SHULTZ ON URGING DENIAL OF VISA TO TERRORIST YASSER ARAFAT

REPORTS ARAFAT INTENDS TO COME TO U.N.

Mr. DOLE. Mr. President, last week, I spoke briefly on the floor about my concern over reports that the PLO's Yasser Arafat plans to attend a U.N. Security Council session in New York next month.

Although the State Department has not been able to confirm Arafat's intention, reports that he wants to come to New York persist.

WE HAVE THE RIGHT TO DENY VISA

My staff has researched the legal issues involved, and I am convinced that we have the right—under the Immigration and Naturalization Act, among other laws, and under our headquarters agreement with the United Nations—to deny Arafat a visa.

I am also convinced that we should. Arafat and the PLO espouse terrorism as a tactic; they practice terrorism and have made hundreds of Americans, and many other innocent civilians around the globe, their victims.

I do not want Arafat in New York, spreading his poison. I do not want him at the United Nations, which is supposed to be a forum to encourage civilized conduct among nations. He does not deserve to be there. His presence would be an insult.

LETTER TO SHULTZ

Today I wrote to Secretary of State Shultz on this matter, urging that he instruct American consular personnel around the globe to deny any visa request that comes in from or on behalf of Arafat.

Mr. President, I ask unanimous consent that the text of my letter to Secretary Shultz be included in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
OFFICE OF THE MAJORITY LEADER,
Washington, DC, May 21, 1986.

Hon. GEORGE P. SHULTZ,
Secretary of State,
Department of State,
Washington, DC.

DEAR MR. SECRETARY: I am deeply disturbed by reports that the leader of the Palestine Liberation Organization (PLO), Yasser Arafat, intends to attend a United Nations Security Council session in New York in June.

Arafat and the PLO have long espoused terrorism as a method of achieving their political goals and have practiced terrorism against innocent Americans and others around the globe. Arafat's presence in New York would be an insult to the hundreds of Americans who have suffered and died as a result of PLO-sponsored terror. His appearance at the UN would be a mockery of that organization's stated purpose, to encourage peaceful, civilized relations among nations.

I do not want Arafat in the United States spreading his poison. The American people do not want him here. I am sure you don't either.

We have the right to deny him a visa, under the Immigration and Naturalization Act and other laws and in accord with our headquarters agreement with the UN. I urge you to instruct all US consular personnel around the globe to reject any visa application made by or on behalf of Yasser Arafat.

Sincerely yours,

BOB DOLE,
U.S. Senate.

RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER. Under the standing order, the Democratic leader is recognized.

EXPECTED PRESIDENTIAL VETO OF RESOLUTION OF DISAPPROVAL

Mr. BYRD. Mr. President, I want to say just a few words about the expected Presidential veto of the resolution of disapproval of the Saudi arms sale. I regret that the President is taking this step. The overwhelming vote on both sides of the Hill and in both parties indicates strongly the unease with which this sale is viewed up here.

I would hope that the President would sit down with leaders of both parties and attempt to work out a feasible and prudent process which would address the real needs and concerns of Saudi Arabia and which would advance the peace process in the region.

There ought to be strings attached to any arms sale that would ensure the progress and advancement of the peace process.

Mr. President, I will have more to say on that matter later.

Mr. CRANSTON. Mr. President, will the Senator yield briefly?

Mr. BYRD. Yes.

Mr. CRANSTON. I applaud the statement of the minority leader, the distinguished Senator from West Virginia.

With regard to the Saudi arms sale, I think this proposal is a far more sensible way to proceed than to have a collision over a veto and a deep division in our country.

An overwhelming majority in the Senate and in the House voted against the sale. It was not just a vote against the sale of the Stingers. The Stingers were the most objectionable part of the package. The package was greatly reduced from an earlier package. It was reduced because of the opposition expressed by Senators of both parties.

But the basic principle remains—a deep, deep question as to the advisability of providing any sophisticated American arms to a nation that has undermined American policy in many, many ways and that has sided with terrorists and aided terrorists, specifically siding with Qadhafi in our recent showdown with Libya.

The Saudis called us the aggressors, called us the imperialists. I do not see why we should reward a nation that behaves in that way, until we reach a better understanding of what we can expect of them, with access to sophisticated arms. I therefore applaud the statement of my leader.

Mr. BYRD. I thank the distinguished Senator from California who has been the leader on this side of the aisle in working for, and supporting the adoption of, the arms sales resolution of disapproval.

Mr. President, I join with the distinguished Senator from California in respect to what he has said in regard to the Stingers. The sale still includes 1,666 Sidewinder missiles, I believe.

Mr. CRANSTON. Yes.

Mr. BYRD. I will have more to say about that later, but I do wish to tell the distinguished minority whip that I thank him for his kind words.

Mr. CRANSTON. I would like to add that the package still maintains the Harpoons, another deadly missile.

Mr. BYRD. Yes, indeed.

66TH BIRTHDAY OF ANDREI SAKHAROV

Mr. BYRD. Mr. President, today is the 65th birthday of Soviet human rights champion and Nobel Peace Prize laureate, Dr. Andrei Sakharov.

I can think of no more fitting way to mark this occasion than to call on the Soviet Union to free Dr. Sakharov from his internal exile in the closed city of Gorky and to restore fully his human rights.

A world-renowned physicist, Dr. Sakharov turned from the task of designing weapons of mass destruction to devote himself to defending individual freedoms for those many Soviet citizens denied such human rights.

His courage in the face of many acts of repression by the Soviet Government, as that regime tried to silence him, has inspired millions throughout the world to join the human rights crusade.

Dr. Sakharov has fought for many years against the abuses of the Soviet Government. He has fought that regime's oppression through the eloquence of his own words, and through his determination to suffer hunger strikes in the defense of human rights.

He has had the courage to continue to condemn Soviet human rights practices even as the Government sentenced him to internal exile. Along with his wife, Dr. Yelena Bonner, herself a courageous human rights activist, Dr. Sakharov has demonstrated that the moral courage of a few individuals can humble the collective strength of the highly organized, highly regimented Soviet system.

Dr. Bonner soon will return to the Soviet Union after receiving medical treatment in the United States. Her release to obtain such treatment only was granted after her husband protested repeated refusals by the Soviet Government to allow her to travel for such a humanitarian purpose.

Dr. Sakharov's own individual protest stimulated governments and their citizens worldwide to intercede on his wife's behalf, and finally, the Soviet Government relented.

There is no better way for the Congress and people of the United States to honor Andrei Sakharov and mark his 65th birthday than to underscore our commitment today to continue to speak out against and to protest the denial of his human rights, and those of so many other Soviet Jews and other people in the Soviet Union.

NEAR COLLISION AT CHICAGO O'HARE AIRPORT

Mr. BYRD. Mr. President, this past Saturday, May 17, a USAIR DC-9 and an American Airlines Boeing 727 came very close to a disastrous collision at Chicago's O'Hare International Airport. The two airliners were carrying a total of 224 passengers and crew.

According to a report which appeared in Monday's New York Times, the USAIR DC-9, bound for Pittsburgh, was taking off at the same time as the American Airlines 727, which was bound for Oklahoma City. The two airliners were on separate, but intersecting, runways. As the two aircraft were taking off, heading toward the intersection of the two runways, the USAIR pilot saw the American Airlines jet heading toward him on the other runway. He managed to pull his plane off the ground at slower than normal speed and avoided a collision—a collision which would have surely been disastrous.

According to the FAA, there were a total of 420 operational errors reported at airport air traffic control towers in 1985.

The incident has been declared an "operational error" by the FAA, although some sources quoted in the Times story characterized it as a "very close call." This most recent "operational error" is attributed to an air traffic controller who failed to ensure that the two aircraft were in compliance with FAA rules governing the safe separation of aircraft.

In a report on the incident at Chicago's O'Hare in Monday's Washington Post, the air traffic controller to whom the error has been attributed "had his hands full" rerouting other traffic because of rain and fog when the incident occurred.

Mr. President, this is but the latest in a number of similar incidents in which commercial passenger aircraft narrowly have averted a disastrous encounter. In the past 2 years, according to a recent NTSB report of the results of its investigation of 26 such incidents, "the number of near-collision ground incidents has increased significantly." Unfortunately, the NTSB points out, the magnitude of this problem is difficult to determine because of incomplete reporting and lack of FAA followup investigations.

The NTSB report notes that the FAA has taken steps to halt such incidents, and that those measures may prove effective. However, the NTSB warns that many of the FAA's efforts may be "questionable unless some of the basic ATC [air traffic control] problems involving adequacy of controller training, coordination in the tower, and supervision are resolved. "Until these problems are adequately addressed," the NTSB warns, "controllers will continue to forget aircraft, there will be continued breakdowns in coordination in the tower, and supervisors will not be free to monitor performance of controllers or assist controllers."

Mr. President, this latest incident at O'Hare Airport is a grim reminder that despite the assurances of some, aviation safety is confronted by serious problems which must be addressed if the Nation is to avoid a repeat of 1985—the worst year since 1977 for U.S. air carrier operations in terms of the number of fatalities.

I have introduced legislation, S. 2417, the Aviation Safety Commission Act, as a first step in addressing some of these problems. I was gratified that the distinguished chairman of the Aviation Subcommittee of the Senate Committee on Commerce, Science, and Transportation, Senator KASSEBAUM, asked to be added as a cosponsor of this legislation, and that she announced she would schedule aviation safety hearings in her subcommittee in July.

□ 1120

I urge my colleagues in the Senate to join as cosponsors of this legislation, which was offered by me on behalf of Senators HOLLINGS, FORD, ROCKEFELLER, and others in a bipartisan effort to begin the enormous task of addressing the many difficult issues associated with aviation safety. Senators on both sides of the aisle, including Senator MARK ANDREWS and others, are joining as cosponsors, have already joined, or are contemplating joining. I shall work with my colleagues to ensure that the Senate will act expeditiously to enact this important legislation before we adjourn for the August recess.

Mr. President, I ask unanimous consent that articles from the New York Times, and the Washington Post be printed in the RECORD. I also ask unanimous consent that a summary of the NTSB report to which I referred in my remarks, be printed in the RECORD.

There being no objection, the materials were ordered to be printed in the RECORD, as follows:

[From the New York Times, May 1, 1986]

U.S. BOARD STUDIES CHICAGO AIRLINER INCIDENT

(By Richard Witkin)

The National Transportation Safety Board said yesterday that it was investigating the report of a near-collision of two airliners taking off on intersecting runways in Chicago Saturday.

The pilot of one plane, a USAir DC-9, pulled his craft off the ground prematurely, at slower than normal speed, to avoid hitting the other plane, an American Airlines Boeing 727, Government and airlines spokesmen said.

It was not immediately clear how high the DC-9 was when it crossed the path of the 727, which was apparently still on the ground. But several sources termed the incident a "very close call."

The two planes were carrying a total of 212 passengers and 12 crew members.

"OPERATIONAL ERROR," F.A.A. SAYS

Morton Edelstein, spokesman for the Federal Aviation Administration in Chicago, said the incident had been declared an "operational error" by officials in the tower at O'Hare International Airport. This was implicit acknowledgement that a mistake had been made by one or more air-traffic controllers in allowing two airliners to be given takeoff clearances that failed to insure compliance with rules on safe separation.

The incident occurred as critics in Congress, other agencies and the private sector were questioning the adequacy of F.A.A. supervision of air safety, not only in the area of air-traffic control but also in aircraft maintenance and security against terrorism.

Last week, the safety board voiced new concerns about the kind of near-collision that happened Saturday in Chicago, and expanded on earlier recommendations for remedial measures by the aviation agency.

The report was based on a 10-month study of the 26 most serious such incidents last year. Among other things, the report called for creation of a special team to develop memory aids for controllers, and improvement in airport "signs, markings and procedures."

The safety board inquiry will seek to determine why conflicting instructions might have been given to the two crews, and whether tower supervisors should have caught any errors.

A board spokesman, William Bush, said an investigator in Chicago had taken steps to impound tapes of tower-to-cockpit conversations.

The F.A.A. said the controller who had handled both planes had been relieved of his duties, which is routine in significant operating errors.

Mr. Edelstein said that the normal complement of controllers was on duty at the time, just after 10 A.M. in Chicago. He said, too, that the clearances had been given about 15 seconds apart and that the controller had been assigned the extra responsibility of radioing revised routings to some planes because of bad weather.

THE RUNWAYS INTERSECTED

This is what is known about the incident from official sources:

The twin-jet DC-9, headed for Pittsburgh with 110 passengers and a crew of five, was taking off on Runway 4L, the most westerly of three Chicago runways that are headed 40 degrees to the northeast.

The three-engine American 727, with 102 passengers and a crew of seven, bound for Oklahoma City, took off on Runway 32R, the most easterly of three runways headed 320 degrees to the northwest.

The intersection is halfway down the two runways. Use of intersecting instead of parallel runways is routine, officials said, and depends on such factors as traffic density, weather, noise, rules, and landing patterns.

The USAir co-pilot saw the other plane heading toward his from the right, and his DC-9 was hauled into the air at a speed below normal. The USAir crew waited until they arrived in Pittsburgh to tell the F.A.A. what had happened. The American crew learned of the near-collision only after reaching Oklahoma City.

[From the Washington Post, May 19, 1986]

AIR CONTROLLER "HAD HANDS FULL"

CHICAGO.—An air traffic controller overseeing takeoffs of two jets that nearly collided at O'Hare International Airport Saturday "had his hands full" rerouting other traffic because of rain and fog when the incident occurred, authorities said.

A USAir jet carrying 110 passengers had to make a sudden, early takeoff to avoid an airliner that crossed its path on a runway.

"We don't know if the controller cleared them at the wrong time, or if one of the pilots waited on the runway too long after he was cleared," Federal Aviation Administration spokesman Mort Edelstein said.

SAFETY BOARD REPORT URGES STEPS TO CURB RUNWAY COLLISION DANGER

The National Transportation Safety Board (NTSB) has concluded that more than a dozen measures should be undertaken to reduce the potential danger of aircraft collisions or other unsafe activities on or near runways at U.S. airports.

The recommendations were made to the Federal Aviation Administration (FAA) following a special investigation of 26 such incidents by the Safety Board. The investigation followed a near collision of two DC-10's at the Minneapolis-St. Paul International Airport in March 1985. One plane was taking off while the other was authorized to taxi across the same runway.

The Safety Board called for:

—Improved training for tower controllers, ranging from use of simulation practices to development of memory aids.

—Better control tower supervision and coordination.

—More precise and standardized operating practices by both controllers and pilots.

—Improved reporting and investigation of runway incursion incidents.

—Adequate runway and taxiway signs.

The Safety Board, noting a rise in runway incidents in the last year or so, said the magnitude of the problem could not be measured because of both incomplete reporting and lack of follow-up investigations by the FAA. The NTSB said it believes that recent FAA efforts to halt runway incursions will lead to a reduction in such incidents. NTSB added:

"However, many of the projects are incomplete and the effectiveness of them is questionable unless some of the basic ATC (air traffic control) problems involving adequacy of controller training, coordination in the tower and supervision are resolved. Until these problems are adequately addressed, controllers will continue to forget aircraft, there will be continued breakdowns in coordination in the tower, and supervisors will not be free to monitor performance of controllers or assist controllers."

Seventeen of the 26 incidents investigated by the NTSB were described by FAA as controller-induced incursions, or "operational errors"; nine were categorized as pilot incursions, or "pilot deviations." However, the investigation revealed that despite these categorizations, many involved combinations of pilot and controller factors.

The Safety Board identified a lack of controller supervisions or back-up personnel in towers when some runway incursions occurred. In the majority of these controller-induced incidents, the NTSB found that although staffing was sufficient for all operating positions, supervisors often were not in the tower cabs or because of other responsibilities were not available to monitor controller performance. When assigned, controllers-in-charge usually had other responsibilities which prevented them from performing a supervisory function.

The NTSB also discovered what it called deficiencies in FAA's tower controller training program. It said the training was not the "best available" and cited some aspects of the U.S. Air Force controller training as superior.

The practical application of air traffic procedures through simulation practices would give new controller better work habits, better understanding of both proper coordination and scanning techniques, and would better prepare student controllers for their responsibilities, the Safety Board said.

In runway incursions caused by pilot errors, there were seven cases of unauthorized runway crossing or entry for takeoff. In some of these, runway and taxiway signs are missing. At least twice, pilots did not comply with controller clearances that they had acknowledged. Pilots contributed to some incursions by failing to communicate properly with controllers and failing to be vigilant.

The NSTB noted that some pilot deviations occur because of misunderstood, but acknowledged clearances, and concluded that pilots should use proper phraseology and read back taxi, takeoff and landing clearances.

The Safety Board's special investigation report added that pilots could reduce the risk of runway incursions by scanning more effectively before taxiing onto active runways; by reducing taxi speed while approaching and preparing to cross runways; and, importantly, by delaying a request for clearance to cross a runway until actually ready to do so.

The special investigation was the NTSB's first broad examination of the incursion problem, although it has investigated individual runway incidents and accidents in the past. Of 19 previous recommendations issued following these earlier investigations, less than half have been fully adopted by FAA.

RECOGNITION OF SENATOR CRANSTON

The PRESIDING OFFICER. Under the previous order, the Senator from California is recognized for not to exceed 5 minutes.

A WEST COAST EXPORT LICENSING OFFICE

Mr. CRANSTON. Mr. President, the fastest growing markets for high-technology products are the newly industrializing economies on the Pacific Rim and California is on the leading edge of capturing those markets. The demand by Pacific Rim nations for electronic technology will grow steadily for the foreseeable future. The potential is enormous.

California and other Western business executives should be getting advice, information, guidance, and, above all, encouragement from the Government to increase our export business. They are not getting that now. That is one of the reasons for our current trade deficit.

Washington thinking is often light-years away in terms of the everyday business needs of California and the West. A bill we passed last year now requires the Export Administration Office in Washington to stay open until 5 p.m. West coast time. It used to close at 2 p.m. That is 5 p.m. Washington time. The fact that we had to pass a law to get them to understand that the Western business day goes on for another 3 hours shows what we are up against.

Even a routine license request now takes about 2 weeks to process and if there are complications, it could—and does—take months.

That is why I am introducing legislation directing the Reagan administration to open an export licensing office on the west coast.

A Western regional export licensing office is badly needed and long overdue. California businesses alone filed more than 31,000 requests for export licenses last year. That means one out of four of all the export license requests that all American businesses filed with the Export Administration came just from California.

Electronic components and communications equipment, which accounts for much of California's license requests, amounts to more than $4 billion annually. A west coast office would give California and other west coast exporters direct access to speed up present time-consuming licensing procedures.

I believe that in many cases we could cut in half the time it now takes a west coast business to get an export license out of Washington.

The result will be millions of dollars in savings to west coast exporters over the years. And if they get the kind of

service they should get, it could mean millions of dollars more in increased sales.

Finally, Mr. President, it is important to note we can do this without spending a lot of taxpayers' money. The new office could be set up in an existing Department of Commerce facility and staffed with the present Department personnel.

RECOGNITION OF SENATOR PROXMIRE

The PRESIDING OFFICER. Under the previous order, the Senator from Wisconson is recognized for not to exceed 5 minutes.

HOW AN OFFSHOOT OF STAR WARS COULD SPARK A NUCLEAR EXCHANGE IN EUROPE

Mr. PROXMIRE. Mr. President, 16 years ago, this body ratified the Anti-Ballistic Missile Treaty by an overwhelming vote. Only two Senators opposed it. The ratification of that treaty committed the United States to a combination of arms control and deterrence as the most practical way to prevent the initiation of a nuclear war. Support for the ABM Treaty was not based on the pie-in-the-sky unreality of eliminating nuclear weapons from the face of the Earth. The treaty recognized that unfortunately and sadly nuclear weapons are here to stay. Through all of world history, no technology that brings a massive increase in military power has even been wiped out or disinvented or has disappeared or ever will. Nuclear weapons are a sure and certain fact of life as long as mankind dwells on this planet.

Attempts to eliminate them are as fruitless as attempts to grant mankind immortality or to prevent winter from ever coming again to northern Wisconsin. The ABM Treaty also recognized that for the foreseeable future the United States and the Soviet Union would continue to be rivals for world leadership and would both be heavily armed with nuclear weapons.

This realism brought the U.S. Senate to the conclusion that the most practical basis for peace was mutual deterrence. As long as both sides recognized that a nuclear war would mean total obliteration, it was obvious neither side would provoke such a war.

The problem was how to maintain, how to preserve this understanding between two countries, each capable of utterly destroying the other. Both superpowers must fully understand the futility of nuclear war under any and all circumstances. How could this standoff, this balance of nuclear terror, be stabilized so that neither superpower would be tempted to attack the other?

What was the most likely threat to deterrence? Was it possible that one of the two armed-to-the-teeth nuclear powers would build a defense against the other's nuclear arsenal so that it could launch a preemptive strike and then hunker down behind its antimissile defense?

Such a prospect seemed unlikely in 1972 when the Senate ratified the ABM Treaty. Nevertheless, it loomed as a tempting possibility. The Soviet Union had made a halting start at developing such a technology. No one could predict where the magic of such technology might lead. Only one thing was sure: The cost would be immense. The economic burden of such technology would be enormous. But there was a far more significant price that an antimissile defense system would exact. Such a defense would sharply increase the uncertainty, the threat, the danger that one side or the other, having developed an antimissile or SDI or star wars system would be far more likely to initiate a preemptive nuclear strike.

So if the star wars system worked, would not deterrence fade? It would indeed. Here's how: A President or a Soviet leader believing that his country could survive a nuclear strike would no longer fear that a nuclear attack would be suicide. As SDI or star wars proceeded, both superpowers would know this. With that knowledge, with the expectation that time was eroding the deterrence that had prevented nuclear attacks in the past, the prospect of nuclear war would greatly increase. It would not be likely to await the perfection of a star wars defense.

This was the concern of the Nixon administration and the overwhelming majority of the Senate in 1972. Then came the Anti-Ballistic Missile Treaty. Why did that treaty shoot through the Senate with only two dissenting votes? First and above all, Senators recognized that the treaty would preserve the nuclear deterrence that had preserved nuclear peace throughout the age of nuclear weapons. Second, Senators believed that the treaty would save both superpowers from an economically ruinous arms race. Third, the treaty made arms control agreements that reduced and stabilized nuclear weapons possible.

In an article in the October issue of Arms Control Today, Jonathan Stein brilliantly highlights a more immediate threat to the ABM Treaty. Stein is the author of "From H-Bomb to Star Wars." He is also a legislative assistant to Senator PAUL SIMON. Stein points out that antitactical ballistic missiles constitute the star wars supporters' response to European's fear that star wars will isolate Western Europe from the protection of the United States great military power. This antitheater ballistic missile or ATBM has come on as a kind of kid brother of star wars. It would use star wars technology to provide defense against short range nuclear missiles in Europe. Stein contends that this ATBM Program constitutes a sure violation of the ABM Treaty. As Stein puts it:

> Article VI of the ABM treaty enjoins the parties from giving missiles, launchers or radars other than ABM interceptor missiles, ABM launchers or ABM radars, any strategic ABM capability, and further disallows testing of these components in an ABM mode. This would prohibit the testing of ATBM's against theater or intermediate-range systems, since the trajectories, velocities, and radar images of intermediate-range missiles are similar to those of strategic submarine-launched ballistic missiles. Intercept capabilities acquired during the testing and development of an ATBM could be readily transferred to a strategic program.

Stein also spells out the grim practical effect of proceeding with this antitactical nuclear weapon, this mini offshoot of star wars. He asks: How would the Soviets respond? Obviously they will respond by developing ways of maintaining an effective offensive force. That means the Soviets will come on strongly with reentry vehicles and penetration aids. They will struggle to saturate, jam, spoof, and overwhelm NATO's defensive weapons.

Suppose we push NATO ATBM's. Then what follows in the event of a European war? Answer: An early and sure rush to use nuclear weapons to suppress ATBM defenses and eliminate counter offenses. The side that strikes first has a big advantage. The ATBM's constitute a formula for a quick and sure nuclear war in Europe.

□ 1130

Mr. President, I ask unanimous consent that an article by Jonathan Stein, in Arms Control Today, that parallels much of what I have said, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

ANTI-TACTICAL BALLISTIC MISSILES—NEW THREAT TO THE ABM TREATY

(By Jonathan B. Stein)

To date, the debate over President Reagan's Strategic Defense Initiative has focused on the efforts of the administration to redefine the SDI program and reinterpret the ABM Treaty so as to allow testing and development of space-based defenses to proceed unimpeded. This frontal attack on the ABM Treaty has so dominated the arms control discussion of the past two years that another effort to circumvent the treaty, the anti-tactical, or anti-theater, ballistic missile (ATBM) program, has gone virtually unnoticed.

In his various attempts to support the Star Wars concept and to respond to European fears of creating a "Fortress America," President Reagan has acknowledged the need to develop defensive measures against ballistic missile threats of less than intercontinental range. However, the administration's effort to develop ATBMs, driven by its desire to win allied support for SDI and to register progress in defense research and development, ignores a number of serious

ADDENDUM

Three epidemiological studies in the U.S. did not find a positive relationship between excess levels of arsenic in drinking water and adverse health effects. A survey of over 200 residents in Fairbanks, Alaska, exposed to mean arsenic drinking water levels of 224 ppb displayed no increases in skin disorders, although the longest exposure in the study population was only ten years (Harrington, et al, 1978). Likewise, Morton et al (1976) did not report any increase in the incidence of skin cancer between 1958 and 1971 in Lane County, Oregon, where the arsenic content of the drinking water supplies was relatively high, although only 5% of the arsenic levels of the county drinking water supplies exceeded 100 ppb. A study in Utah by Southwick et al (1981) compared the health status of 145 persons consuming drinking water with arsenic levels averaging approximately 200 ppb as compared to a matched control group of 105 participants from a neighboring community where drinking water arsenic levels averaged 20 ppb. The investigators did not find any cutaneous manifestations of arsenic toxicity. In addition, cancer incidence and death rates did not indicate an excess of cancer in the exposed community.

There are a number of possible explanations for the seemingly conflicting data of the three U.S. epidemiological studies and the Taiwan report. There was a large difference in the drinking water arsenic levels. The average arsenic levels of the drinking water supplies in Taiwan considerably exceeded those of the U.S. communities studied. In addition, the duration of exposure and amount of arsenic ingested in the U.S. studies were much less than in the Taiwan studies. Lack of adequate nutrition and exposure to other environmental pollutants may have exacerbated the effects of arsenic exposure in Taiwan. In addition, as emphasized in the text of this report, it is believed that the Taiwan subjects were exposed to trivalent arsenic in their drinking water in contrast to the pentavalent form in the U.S. studies.

Zaldivar, R. (1974). Arsenic contamination of drinking water and foodstuffs causing endemic chronic poisoning. Beitr. Pathol. Bd. 151:384-400.

Mr. PRESSLER. Mr. President, water quality in the United States has become a major health and public welfare issue. The Clean Water Act, Superfund, and other legislation have been debated in an effort to assure Americans a good quality water supply. Most of these bills address the issue of water pollution and the potential contamination of ground water supplies by chemicals and other sources. This is an important issue but we must not forget those areas with naturally poor quality ground water. We should examine how we can provide people in these areas with better quality water.

My home State of South Dakota has naturally very poor water quality in certain areas. Studies of South Dakota's public community water systems have found that 67 percent of the water systems do not meet EPA drinking water standards for dissolved solids. Thirteen percent of the public water systems contained over four times the amount of dissolved solids allowed by EPA standards. Dissolved solids in water supplies at this level have been found to adversely affect livestock and domestic animals. Three percent of South Dakota's public water systems contain radium 226/228. This poor water quality is especially prevalent in western South Dakota. The water in this area contains exceedingly high levels of sodium, sulfate, and iron which cause digestive problems in humans and livestock.

These poor quality water supplies create public health problems. I recently met with a resident of western South Dakota who had been required to take medication for high blood pressure for years. His doctor suggested he start buying his water for drinking and cooking. He did this, and as a result has been able to stop taking medication for high blood pressure. Owners of restaurants and service stations in western South Dakota must caution visitors about the possible hazards of drinking the water. Wells and water systems have a short useful life because of the effects of the water on the pipes. People in this area of western South Dakota desperately need good quality water. Residents in the area have been working for over 25 years to develop a rural water system to bring good water to their farms, ranches, and rural communities.

Since South Dakota is a relatively arid State, surface water is limited. However, the Missouri River runs through the center of South Dakota and is a potential source of good quality water. The WEB pipeline project in north central South Dakota is the largest rural water project in the United States. This project will provide Missouri River water to 25,000 people in a 10-county area. Residents in western South Dakota have also proposed a similar project, and I have introduced legislation to authorize this project. The Lyman-Jones West River rural water system would provide high quality domestic water to more than 6,000 people in the area. The project would also provide water for hundreds of thousands of head of livestock. Im-

prevalence of skin cancer with the long term consumption of drinking water from wells with high arsenic levels (Tseng et al, 1968; Tseng, 1977). The prevalence was dose dependent. While this study has been critically reviewed on a variety of occasions and found to have possible limitations (e.g. observer bias, presence of other toxic agents in the drinking water), its findings, nevertheless, are remarkably similar to reports by other investigators from different countries which also had shown that prolonged consumption of water with high levels of inorganic arsenic is associated with the occurrence of a variety of skin disorders including skin cancers (Geyer, 1898; Arguello et al., 1939, Zaldivar, 1974; and Borgono et al, 1977). In addition, it appears beyond dispute that medicinal use of Fowler's solution which contains A_2O_3 is a human skin carcinogen (Fierz, 1965; Sommers and McManus, 1953).

These studies collectively provide strong evidence for the position that inorganic arsenic is a human skin carcinogen. These data are in striking contrast to massive volumes of animal model data which overwhelmingly indicate that inorganic arsenic is not a carcinogen (see NAS, 1977 for review). Nevertheless, since the human data are so strong and consistent, they should override the generally negative animal model data with respect to human hazard assessment.

2. The Historical Basis for the Arsenic Drinking Water Standard:

The original EPA approach for setting a drinking water standard for arsenic was to limit human drinking water consumption to approximately 10 percent of that obtained via the diet. Since a survey by Schroeder and Balassa (1966) suggested that 900 μg/day was the average daily human dietary intake, 50 μg/L was allowed for intake from drinking water. In the intervening years this position has appeared to become more insecure on scientific grounds. Some of the reasons for the eroding of confidence in this value stems from the following observations:

(i) the original human daily dietary arsenic value of Schroeder and Balassa (1966) appears to have been found in error. Market-basket surveys of U.S. diets over the past decade have consistantly revealed that intake values are from 10-50 μg per day or >90% lower than originally believed (Jelinek and Corneliussen, 1977).

(ii) the chemical forms of arsenic in food are no longer believed to be very relevent for assessing the risks of consuming inorganic arsenic since food-borne arsenic is almost exclusively in the organic form and behaves very differently both chemically and toxicologically from inorganic species.

(iii) the EPA has adopted the general use of quantitative risk assessment (QRA) for estimating low dose cancer risks associated with carcinogen exposure. If that methodology where applied to the arsenic situation based on the Taiwan studies, the predicted upper levels of risk would be strikingly high (i.e. one skin cancer per 100 persons over a 70 year lifetime) (NAS, 1983). In fact, the risk could be so high that it is likely that the risks could be considered unacceptable at commonly encountered levels.

Given the large number of drinking water sources that would fail to be acceptable, the Agency has not wanted to implement in a regulatory sense the estimate of cancer risk predicted from the Taiwan data. This selected use of QRA is questionable since EPA uses it with animal studies whose extrapolative relevance and study design relevance are in many respects even more unrealistic than the Taiwan data. This is not to suggest, however, that EPA is wrong to ignore the risk calculations based on the Taiwan data because of large uncertainties in the quality of certain aspects of the data.

As a way to deal with this issue the Agency acted responsibly by asking the National Academy of Sciences to provide an independent review of the epidemiological data associated with arsenic. The NAS reviewed these data including the existence of several limited epidemiological studies in the U.S. which did not show any association between arsenic levels in drinking water and skin cancer (Addendum 1). The NAS (1983) concluded that the standard could stay where it was at present given the apparent absence of any evidence in the U.S. that arsenic in drinking water was associated with skin cancer.

The bottom line then is that the U.S. has an arsenic drinking water standard for which the original basis no longer exists but is believed to be providing "apparent" sufficient safety from skin cancer. Yet, what should the health criteria be for an arsenic primary drinking water standard?

3. The Need for a More Toxicologically Defensible Standard:

Should the criteria be based on the Taiwan data? Some of the major concerns with this study include, in part, what was the chemical form of arsenic and the distinct possibility of other toxicants in drinking water which could have confounded the initial interpretation of the data (EPA, 1980). It appears that pentavalent arsenic (As-V) was not present and it appears that arsenic trioxide (As-III) was the predominant form (NAS, 1977; EPA, 1980). If one calculates the likely amount of As consumed over the years of exposure in Taiwan, then the dose of arsenic associated with induced skin cancer was very comparable to the estimated total amount given to people who developed skin cancer following exposure to Fowler's solution (NAS, 1977).

Since it is now generally accepted that As-III and not As-V was the predominate chemical form of arsenic in the Taiwan wells, it has been suggested that the arsenic standard in the U.S. take this chemical speciation issue into account. In fact, the arsenic form in the drinking water of places in the U.S. where the epidemiological studies have been negative (Morton et al, 1976) with respect to adverse health effects have been of the As-V form (EPA, 1980). Many toxicological studies have indicated that the As-III form is considerably more toxic than the pentavalent form (NAS, 1977). It is this issue of chemical speciation that is crucial in the assessment of arsenic risk from consumption of drinking water.

For the sake of argument here, let's accept the assumption that As-III is a definite human skin carcinogen when orally consumed. Now consider experimental evidence on the fate of As-V in animal models and humans. Research in mice indicates that As-V is rapidly and predominately excreted unchanged. However, approximately 5% of As-V excreted in the urine is excreted in the As-III form (Vahter and Envall, 1983.) An even higher percentage of As-III is excreted by the rabbit following As-V exposure. These data indicate that at least in these two animal species that As-V is converted to As-III for urinary excretion. In fact, the conversion is likely to be higher than 5% because it is believed that other metabolites such as the mono- and dimethyl organic metabolite forms originate through the following metabolic scheme of As-V to As-III to the monomethyl form to the dimethyl form (Vahter and Envall, 1983). These data suggest that even when one consumes As-V that some low level of As-III will be formed and thereby lead to some cancer risk although considerably lower than from just As-III exposure alone.

This position is supported by tracer studies which compared the tissue disposition of As-III and As-V in mice. This study showed that the As-III form was preferentially retained in the skin by a factor of from about 2 to 8-fold greater than As-V depending on the time interval after exposure (Lindgren et al, 1980). Given the assumption that As-III is a skin carcinogen, it would appear that it reaches the site of susceptibility (i.e. skin) in substantially greater amounts than does the pentavalent form. This information suggests that using total arsenic levels and calculating risks of skin cancer based on studies (i.e. Taiwan) where As-III was the form clearly would overstate the risk where the predominant form of arsenic in the water is pentavalent. Furthermore, Creculius (1977), in a limited human volunteer study, did not find any evidence that As-V is converted to As-III in contrast to the animal data noted above. If this were the case then the risk of skin cancer would be expected to be considerably lower since disposition in the skin of mice/rabbits after the As-V treatment is believed to result in large part from its reduction to the As-III form.

4. Summary:

There are convincing data that arsenic is a human skin carcinogen. However, arsenic appears to be carcinogenic in the As-III form. The most likely reason for negative epidemiological studies in the U.S. with respect to drinking water levels of arsenic and skin cancer is that the overwhelmingly predominant form of arsenic has been As-V. Of considerable further relevance to these negative epidemiological studies is that they were also not associated with the well recognized precursors of skin cancer (e.g. increases in skin pigmentation). Furthermore, animal data with mice and rabbits suggest that the As-V form can be converted to the trivalent form in vivo. However, a comparable type of study in humans did not show a similar conversion of As-V to As-III.

The proposed standard of 50 ppb is therefore likely to be adequate for protecting human health from skin cancer when the exposure is in the form of pentavalent arsenic. However, it is unlikely that this value is sufficient to protect the public from As-III induced skin cancer even if the risk estimations based on the Taiwan study are markedly overstating the actual risk.

From a regulatory perspective the EPA should ideally attempt to establish separate standards for As-V and As-III because of their widely differing toxicities and also because of the established relationship between As-III exposure and the occurrence of skin cancer. The problem with the present approach of using total arsenic values is that the 50 ug/L value may be very inadequate for preventing As-III-induced adverse effects but probably adequate if the predominant chemical speciation were As-V. Recognition of this distinction also allows the Agency to take into consideration the issue of balancing concerns of essentiality with toxicity (Nielsen et al, 1975; Nielsen and Shuler, 1978).

that has no corollary in the United States, and in so doing, caused unwarranted expenditure of public and private funds to correct a nonexistent health problem.

In 1969, the State of Nevada Health Board conducted a hearing to determine if the level of arsenic in drinking water in Fallon, NE, was a public health problem. Based on expert testimony, the board determined there was no need to restrict the use of the water supply even though at 0.10 mg/1 it contained twice the U.S. Public Health Service Standard of 0.05 mg/l. They also requested a study to substantiate or refute this conclusion. The Desert Research Institute conducted a study and confirmed that there was no risk to health from drinking water containing arsenic at the 0.10 mg/l level.

It appears that part of the difference of opinion as to the toxicity of arsenic is related to the type of arsenic involved. I ask unanimous consent that a report prepared by the U.S. Navy, which has a similar problem at its Air Station at Fallon, NE, be entered into the RECORD immediately following my statement.

This report, which was prepared by Dr. Ed Calabrese, professor of toxicology at the University of Massachusetts, argues that the toxicity of arsenic depends on the chemical form of the arsenic, that trivalent arsenic is far more toxic than pentavalent.

The EPA is currently reviewing comments on their proposed rulemaking for recommended maximum contaminant levels. I hope that they consider the considerable body of evidence that argues the difference in toxicity between pentavalent and trivalent arsenic, and adjust their rulemaking accordingly.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF THE NAVY,
OFFICE OF THE CHIEF OF NAVAL OPERATIONS,
Washington, DC, March 13, 1986.

COMMENT CLERK,
Criteria and Standards Division, Office of Drinking Water (WH-550), Environmental Protection Agency, Washington, DC.

DEAR SIR: The Federal Register of November 13, 1985 invited comments on the EPA proposed Recommended Maximum Contaminant Levels (RMCLs) for inorganic chemicals in drinking water (40 CFR 141). We are particularly concerned with the EPA proposed RMCL for arsenic and therefore requested a leading toxicologist, Dr. Ed Calabrese, Professor of Toxicology at the University of Massachusetts, to review the RMCL for us. Dr. Calabrese's comments are attached.

Our strong interest in the proposed RMCL stems from the drinking water supply at the Naval Air Station, Fallon, Nevada which originates from wells containing approximately 100 ppb of naturally-occurring pentavalent arsenic.

Our review of Dr. Calabrese's work confirms our concerns that the proposed arsenic RMCL is based largely upon epidemiological data of trivalent contamination. In the United States however, pentavalent arsenic is the most prevalent form in drinking water. This is pazticularly important in view of the fact that many toxicological studies have indicated that pentavalent arsenic is considerably less toxic than trivalent arsenic. Thus, an RMCL for arsenic based largely upon trivalent data, will cause needless concern and expenditure of public funds to build and operate water treatment facilities.

We therefore strongly recommend that the proposed RMCL for arsenic recognize the difference between the trivalent and pentavalent forms through the establishment of a higher RMCL for pentavalent arsenic.

Sincerely,

J. B. GREEN, Jr.,
Captain, CEC, U.S. Navy; Director, Environmental Protection, Safety and Occupational Health Division.

A CRITIQUE OF THE PROPOSED RMCL FOR ARSENIC

(Edward J. Calalbrese, PhD.)

SCIENTIFIC CONCLUSIONS

There is sufficient evidence to conclude that arsenic trioxide is a human carcinogen based on evaluations of the long-term application of Fowler's solution. It appears probable that the skin cancer associated with arsenic exposure in the Taiwan studies is due to the presence of arsenic trioxide and not the pentavalent form in the drinking water.

Attempts to validate the Taiwan study in the U.S. have not confirmed the original Taiwan findings with three human population studies showing no association between the presence of elevated levels of arsenic in the drinking water and the occurrence of arsenic induced skin cancer and even the precursors of such skin cancer.

The reasons for this lack of validation are conjectural but may be related to inadequacies in the sample size, duration of exposure and range of arsenic levels in the drinking water. However, it may also be related in part to the general lack of trivalent arsenic in the water sources.

While genetic assays (e.g. sister chromatid exchange) of humans exposed to Fowler's solution for prolonged periods and who had developed skin cancer were positive (Burgdorf, et al, 1977), similar assays in non-skin cancerous humans exposed to drinking water with elevated levels (110 ppb) of pentavalent arsenic for >5 years were not different from controls (Vig, 1984).

The toxicity of arsenic depends in large part on the chemical form of arsenic. Most investigators have concluded that the trivalent form is significantly more toxic than the pentavalent form due to its high capacity to attack sulfhydryl groups and thereby disrupt many enzyme systems.

Pharmacokinetic differences are also apparent between the tri and pentavalent forms of arsenic. Of particular relevance is the significantly larger retention of the trivalent form and its preferentially greater deposition in skin tissue. This is particularly important given the association of arsenic with skin cancer.

Evidence with animal models indicates that a small percentage of pentavalent arsenic is converted to the trivalent form in vivo. This was not shown to be the case in a limited human volunteer study.

POLICY RECOMMENDATIONS

From a human health perspective, there is strong justification for a drinking water standard for inorganic arsenic.

Based on a knowledge of the pharmacokinetics, toxicological actions and likely mechanisms of toxicity of arsenic, separate arsenic RMCLs for the trivalent and pentavalent forms are justified.

Given the size of the available data base, any RMCL for arsenic should be based on human data. The EPA should not use the provisional AADI as the basis of the RMCL in light of the fact that copious human epidemiologic data exist on both the trivalent and pentavalent forms. The extrapolative relevence of the monkey data while probably more valuable than data from some rodent model studies is especially limited given the miniscule sample size used.

Given the present observations that prolonged exposure in the U.S. to pentavalent arsenic in drinking water at levels in excess of the standard by at least 2-fold is not associated with skin cancer as well as not with any of the precursors of arsenic related skin cancer suggests that the value of 50 ppb is consistant with protecting the public health from this outcome. It also suggests the possibility that higher levels of exposure (i.e. at least 100 ug/L) do not pose any demonstrable risk of skin cancer.

The proposed RMCL has an important public health inadequacy. It deals with total arsenic and yet the tri- and pentavalent forms are believed to present very divergent risks to the public. The proposed RMCL may be adequate when the exposure is predominantly from the pentavalent form with only a small percentage in the trivalent state. However, if the situation were reversed, there may well be undue public health risk. If two separate RMCLs were developed it is possible that the trivalent would require a value considerably below the 50 ppb while the pentavalent RMCL may be justifiably above the 50 ppb value but this determination will require further evaluation and toxicological assessment. Thus, it is recommended that the EPA reevaluate the proposed RMCL and give serious consideration to developing two separate standards. Clearly, such a course of action would be both more consistant with the science and in the best interests of protecting the public health.

RESEARCH RECOMMENDATIONS

It is essential to attempt to confirm the findings in humans that pentavalent arsenic consumed from drinking water is not excreted, in part, in the trivalent form.

The uptake of arsenic by foods during the cooking process needs to be assessed.

A continuous dermatological surveillance program for precursors of arsenic related skin cancer in a model community where "high" levels of pentavalent arsenic is present should be undertaken. This would provide human data for validating possible standards. A similar program for cytogenetic and reproductive surveillance in appropriately selected communities would be significant value.

BACKGROUND

1. Arsenic as a Skin Carcinogen in Humans:

The U.S. EPA's drinking water standard for arsenic is based in part on the premise that inorganic arsenic is a skin carcinogen in humans. This position is supported in large part from a large-scale human population study in Taiwan which associated the

ground water resources within designated sole source aquifer areas. EPA will provide half the necessary funds, and a total of $77.5 million is authorized for the Sole Source Aquifer Demonstration Program for fiscal years 1987 through 1991. A number of measures may be included in the protection plans to maintain the water quality of the aquifer, and a community can use its approved "208 plan" for the comprehensive management plan required under this program.

The new demonstration program will be particularly helpful to the State of Washington, where a significant portion of the population relies on aquifers for their sole or principal water source. The Environmental Protection Agency has designated three aquifers in Washington as sole source aquifers: Spokane-Rathdrum Prairie, Camano Island, and Whidbey Island. In addition, the Cross Valley, Newberg, and Seven Lakes aquifers are begin considered for sole source designation. The Spokane-Rathdrum Aquifer, which is the only source of drinking water for a metropolitan population of approximately 320,000, is in need of immediate assistance. The quality of this aquifer's water is declining at a significant rate due to seepage from septic systems. The city of Spokane has developed a plan to prevent further degradation of their aquifer, a key element of which is the use of pollution abatement measures. I would like to extend my special thanks to Senator DURENBERGER and professional staff member, Heather Wicke, for their assistance in ensuring that Spokane will be able to use funds under the Sole Source Aquifer Protection Program to defray the cost of pollution abatement measures which provide the only feasible option for preserving Spokane's aquifer.

I am confident that the Sole Source Aquifer Demonstration Program will accomplish its purpose of enabling communities to take the necessary actions to preserve the quality and quantity of their water sources. Furthermore, S. 124 makes critical improvements in the Safe Drinking Water Act which will ensure that all public water systems provide high quality water. I urge my colleagues to give this measure their full support.

Mr. HELMS. Mr. President, I shall vote in favor of the conference report on S. 124, the Safe Drinking Water Act Amendments of 1986, but I am nonetheless concerned about one section of the bill, section 205, which will allow substantial Federal involvement in ground water monitoring. I feel I should make this concern a matter of record.

Section 205, entitled "State Programs to Establish Wellhead Protection Areas," requires each State to submit a program within 3 years to protect wellhead areas within its jurisdiction from contaminants that may—and I stress the word "may"—have any adverse effect on the health of persons. Failure to create an approved plan will prevent the State from obtaining Federal funds to implement the program.

My concern with this is twofold: First, through a sort of "carrot and a stick" approach, the States will be forced to develop a comprehensive federally approved plan to control ground water quality. Controlling ground water quality requires monitoring the land use of surface area surrounding a water well or wellfield which supplies a public water system.

The point is this: Control over land use has always fallen within State and local domain; thus, this section will further erode State authority to control land use.

Second, Mr. President, I'm concerned about the enormous amount of litigation which will almost certainly arise as a result of section 205. The section's exposure to the citizen suit provisions of the act expands even further the opportunity for environmental activities to sue in Federal court, and thus is certain to add to an already overloaded Federal docket.

Furthermore, Mr. President, the vagueness of the statutory language invites judicial policymaking, a role which this Senator believes should be reserved for Congress.

Lest I be misunderstood, let me be clear and emphatic: Everyone favors "safe drinking water." That is without question. But, Congress, in its zeal to implement noble ideas, often ends up creating more problems than it solves. I hope the program created by section 205 will not travel down that path.

Mr. BRADLEY. Mr. President, I am delighted that the conference report on S. 124, the Safe Drinking Water Act Amendments of 1986, takes an important step forward toward ensuring the health of our constituents. Its focus is an area critical yet often overlooked: Our drinking water supply.

One element of this important bill is a provision that I proposed which bans the use of lead and lead solders in drinking water systems. This simple change will begin to correct a widespread and long ignored health hazard.

Mr. President, the problem with lead contamination was brought very close to home for me when New Jersey health officials found lead leaching into drinking water on Ocean County in amounts exceeding the EPA standard. However, this is truly a national problem. A survey of State health agencies revealed that 22 out of 29 States contacted have experienced difficulties with lead leaching into drinking water. The States not reporting any problems also admitted to not having performed extensive sampling. My office questioned States from Maine to Texas to California. The States of Oregon, Wisconsin, Minnesota, New York, Massachusetts and Delaware who have already banned the use of lead solder and pipes in potable water systems. Other countries have also recognized the dangers of lead contamination and Denmark, West Germany, Great Britain and the Netherlands all prohibiting the use of lead in drinking water systems.

We place great emphasis, as a Nation, on safe drinking water. Often, safe drinking water requires the use of expensive measures such as the addition of anticorrosive chemicals or expensive purification methods. The prohibition of lead in drinking water systems represents a simple, inexpensive, preventative step we can take to avoid further contamination of our drinking water supplies. My amendment does not ask anyone to rip up old plumbing systems. Rather, the amendment tries to arrest the problem before it progresses further by concentrating on new construction and repair of existing plumbing.

I applaud my colleagues for the progress that passage of this act represents. The threat of drinking water contamination is real, and this act gives the EPA the tools and the directive to meet this threat head-on.

ARSENIC IN DRINKING WATER

Mr. HECHT. Mr. President, an adequate supply of safe, potable water is important to our communities. In Nevada it can mean the difference between survival and demise of a community or settlement. In many of Nevada's small communities, residents have been drinking the local water untreated for years—certainly long before EPA standards were established. So it bothers me that EPA can essentially close down these communities by declaring their water unsafe—not because of manmade chemicals, but because the waters contain some natural chemical or element.

For example, Mr. President, arsenic occurs naturally in drinking water supplies in many parts of the country. In the Western part of the United States, sometimes the only source of drinking water for a community may contain arsenic at levels higher than the current EPA interim standard, which is based on the old public health standards. In many cases, residents of Western towns have been drinking this water, which contains naturally occurring pentavalent arsenic, for generations, with no apparent adverse effects. The EPA, however, in developing pemanent standards, has relied on the existing interim standards and a study conducted in Taiwan involving trivalent arsenic.

Mr. President, I am concerned that the EPA, in the name of expediency, is going to regulate the level of arsenic in drinking water based on a study

tection Demonstration Program" which has important implications for the Nation as a whole, and for New York State in particular.

EPA'S REGULATION AND ENFORCEMENT

There are more than 200,000 public water systems in the United States, including nearly 60,000 community water systems for year round residents. In 1983, a study by the Office of Technology Assessment reported contamination in 29 percent of the ground water drinking water supplies of more than 950 U.S. cities with populations of 10,000 people or more. Although EPA and other agencies have identified over 700 substances including synthetic organic chemicals, heavy metals, and pesticides in drinking water, EPA has regulated fewer than 25 contaminants since passage of the act in 1974.

While it is true that the act has helped to reduce bacteria and other traditional contaminants in public water supplies, I and other members of the Environment and Public Works Committee are concerned about the health effects of other chemical contaminants. In the amendments we have directed EPA to establish limits for an additional 83 contaminants, many of which are industrial solvents and pesticides known to adversely affect human health.

Because reports by GAO have indicated that EPA and some States have been lax in enforcing the Safe Drinking Water Act, several measures in the amendments will strengthen enforcement. In 1984 alone, there were 64,000 reported violations of drinking water standards. Of the approximately 60,000 community water systems, 842 were frequent violators of the microbiological standards in the act. In order to increase enforcement options the amendments raise maximum civil penalties for violators of standards or schedules from $5,000 to $25,000 per day. Moreover, EPA is authorized to issue administrative penalties of up to $5,000. Courts may impose criminal penalties of up to 5 years in prison plus a fine of up to $50,000 for certain violations.

Another provision designed to improve the act is the new application of enforcement authorities formerly available only under the Solid Waste Disposal Act to enforce the Drinking Water Act's ban on class IV injection wells which dispose of hazardous or radioactive wastes into or above an underground drinking water source. In States with numerous injection wells associated with oil and gas production the amendments require the State to certify that a plan is being implemented to protect against leaks or malfunctions in the wells.

In addition to the measures regulating injection wells which might pollute drinking water supplies, the 1974 Drinking Water Act Amendments require the States to design and to carry out wellhead protection programs around public water wells. These plans will identify sources of contamination, specify duties of the local water systems and State and local governments, and describe contingency plans for alternate drinking supplies in cases of contamination. The act authorizes EPA to make grants to the States for 50 to 90 percent of costs of developing and implementing these State programs.

SOLE SOURCE AQUIFER DEMONSTRATION PROGRAM

Besides these important generic provisions in the 1986 amendments to the Safe Drinking Water Act, I am pleased to call the Senate's attention to the Sole Source Aquifer Demonstration Program, modeled after the Sole Source Aquifer Protection Act, which I first introduced in 1982. This will be of special interest to residents of Long Island, where over 3 million people drink from one aquifer. In Nassau County alone, studies have detected synthetic organic chemicals in 119 of 389 public wells. These chemicals come from diverse sources: Solvents from industries and resident's homes, pesticides from farms, nitrates from lawn fertilizers, and chemicals which leach from landfills.

New Yorkers are well aware of the need to safeguard their water resources. The work for the State legislature, the Commission on Water Resource Needs of Long Island, the State Department of Environmental Conservation, and a number of citizen groups has made New York a leader in ground water management.

The Sole Source Aquifer Demonstration Program will provide Federal grants through EPA to finance 50 percent of the costs of developing and implementing an aquifer protection plan. States, cities, and other qualified political subdivisions are eligible to apply for these grants, which can amount to as much as $4 million per year in Federal aid for each sole source aquifer. This program will enable State and local governments to cooperate with EPA in designing these plans. The legislation enumerates a number of mandatory elements for the plans, as well as some elements which the States may choose to include depending on individual conditions.

I believe that the sole source provisions will contribute significantly to conservation and management of ground water resources which are irreplaceable. The purpose of these provisions is not to prevent development, but to allow States to encourage development in areas best suited to it. Safeguards of public notice, advisory boards, and public hearings are built into the sole source provisions. States and localities are subject to all existing constitutional and statutory limits on their actions. Plans must be submitted jointly with the Governor of the State, and must be approved by the EPA Administrator.

The safe drinking water amendments authorize $10 million for fiscal year 1987, $15 million for fiscal year 1988, and $17.5 million for each of the 3 fiscal years 1989 through 1991 to fund the Sole Source Aquifer Demonstration Program. I personally supported this level of funding because I believe adequate funding is a requisite to the success of the program. Once our sole source aquifers are polluted, it is well nigh impossible to clean them up, for both economic and technological reasons. The prudent course is to keep these drinking water supplies clean at the outset.

I believe that the Safe Drinking Water Act Amendments of 1986 move us further toward that laudable goal.

Mr. GORTON. Mr. President, I would like to express my support for the conference report on S. 124, the Safe Drinking Water Act Amendments of 1986. I commend my colleague, Senator DURENBERGER, chairman of the Subcommittee on Toxic Substances and Environmental Oversight, for his diligent work in developing this important legislation and guiding it through the Senate and the conference committee to final passage. S. 124 makes major improvements to the existing law and will greatly enhance protection of our Nation's drinking water. The bill provides needed impetus to the Environmental Protection Agency to issue regulations for contaminants of drinking water, greatly expands the monitoring requirements for public water systems, and will substantially strengthen the regulation of underground injection operations that could affect drinking water supplies.

I especially would like to commend the committee members for their foresight in establishing a new program to protect sole source aquifers. In the 97th, 98th, and 99th Congresses I joined Senator MOYNIHAN as a cosponsor of the Sole Source Aquifer Protection Act designed to prevent the degradation of our most critical underground water supplies. I am pleased that S. 124 incorporates the preventative approach in this bill to protect sole source aquifers.

The Sole Source Aquifer Demonstration Program contained in S. 124 is a comprehensive step toward protecting one of our Nation's most valuable natural resources. Communities which depend on one aquifer as their sole or principal source of drinking water are in need of special assistance to preserve their vulnerable water sources. Under the Sole Source Aquifer Demonstration Program, State and local governments and other planning agencies may work with EPA in developing, implementing, and assessing demonstration programs designed to protect

Mr. SIMPSON. Today the Senate takes up consideration of the conference report on S. 124, the Safe Drinking Water Act Amendments of 1986. As one of the Senate conferees on this important environmental legislation, I am most pleased that the House and Senate have been able to formulate a piece of legislation that will significantly increase the level of public health protection achieved by EPA in regulation of our drinking water supplies.

The bill agreed to by the conferees should be very effective in helping EPA in developing and issuing new health based standards for drinking water supplies. Over 750 synthetic organic chemicals, pesticides, and inorganic chemicals have been found in drinking water supplies throughout the Nation. However, EPA has only had an opportunity to regulate fewer than 25 of these contaminants in the past 12 years. The new safe drinking water bill requires EPA to set standards for 83 contaminants within the next 3 years and this will be the main element of this public health statute.

One of the most important issues dealt with in the Drinking Water Conference is the protection of our ground water resources. The conferees crafted a new "well-head protection area" concept that would allow States to develop plans to prevent contamination—as defined by the Safe Drinking Water Act—from entering underground drinking water supplies near the area of "draw down" for public consumption. This rather narrow ground-water provision does not cover potential sources of drinking water or other ground-water supplies, nor is it intended to regulate contaminants other than those defined by the Drinking Water Act. Because EPA is directed to identify 83 new contaminants within the next 3 years, these will be the focus of voluntary ground-water protection action by the States.

The ground-water provision was developed with western Senators who have serious concerns about State flexibility and States' rights. In essence, the ground-water protection program is a voluntary program taken on by States wishing to add additional protection to underground drinking water supplies. Each and every State has its individual ground-water contamination problems and the ground-water protection program developed by the conferees was designed to foster individual and unique approaches to these problems. A State may even choose not to adopt a ground-water protection program if it decides that it is unnecessary, and it may do so without fearing any Federal penalty. The legislative language makes it very clear that the States have total flexibility to develop their own protection plans and that in no way is this Federal law altering existing water rights or priorities, nor are there limitations on the ability of States to manage, regulate, protect or identify ground water resources within their jurisdiction.

The conferees also dealt with the highly technical issue of granular activated carbon [GAC] technologies for removal of halogenated organic chemicals. The conferees made it clear that in setting an MCL where GAC is a consideration, that the cost of GAC and other alternative treatment technologies should be taken into account. This was a positive step to assure that communities would not be unnecessarily burdened by requirements for a level of technology which may be ever greater than needed to protect the public health.

The conferees have worked diligently to craft a piece of legislation which will put the Safe Drinking Water Act "back on track," with a resulting protection of our public drinking water supplies for the next generation. I urge the Members of the Senate to vote affirmatively on the conference report in order that we can send it to the President for signature.

It has been most gratifying to me to see the completion of action on the Safe Drinking Water Act. The 99th Congress has worked hard to reauthorize environmental legislation and the Safe Drinking Water Act will be the first of several environmental statutes that will be reauthorized by the Senate this year. The American people can take heart in the progress we have made in passing these laws that continue to protect the public health environment.

Mr. CRANSTON. Mr. President, I am pleased to voice my strong support for the conference report on the Safe Drinking Water Amendments of 1985 (S. 124).

It's extremely important that Congress give final approval to this new law to protect the American people from the growing threat of drinking water contamination.

Since passage of the Safe Drinking Water Act in 1974 we have made much progress in making our water safer from bacteria and other traditional contaminants. But there is increasing concern about chemical contamination of drinking water supplies and ground water from pesticides and industrial chemicals.

Today, 22 percent of the Nation's small water systems and 37 percent of the large water systems supplied by ground water already have at least one volatile organic contaminant. In Santa Clara County, California's 24 public and private wells have been polluted with trichloroethane [TCA], 1,1 dichloroethylene [DCE] and freon 113. In Hanford, CA, aresenic has been found in drinking water supplies. In McFarland, six wells have been shutdown because of nitrate contamination. In the San Fernando Valley of Los Angeles, trichloroethylene [TCE], perchloroethylene [PCE], carbon tetrachloride, and chloroform have been detected in a number of public wells. Nationwide over 700 contaiminants have been identified in our drinking water. Yet to date, EPA has regulated fewer than 25 of them.

This bill puts EPA on a schedule and requires the agency to set more national standards for contaminants in our drinking water—regulating 85 additional toxic chemicals in the next 3 years and more thereafter—and requires these standards to be based on best available technology, taking costs into account. The legislation also increases monitoring for unregulated chemical contaminants, provides technical assistance to small rural and Indian water systems which are the ones most often violating the law, and improves enforcement by requiring EPA to take action in every case in which drinking water requirements are violated and the State does not act.

Especially important is a provision designed to prevent underground sources which are now clean from becoming contaminated. The legislation would establish a nationwide program requiring States to establish wellhead protection areas around drinking water system wells where pollutants could flow into undergound areas containing drinking water supplies. This narrow provision does not cover potential sources of drinking water or other ground water supplies which do not serve as drinking water. Further, the provision was carefully written to make sure that States have flexibility to develop plans and that existing water rights and existing authorities for States to manage, regulate and protect ground water within their jurisdictions are not limited.

In sum, I believe the Safe Drinking Water Act amendments represent a giant step forward in improving the quality of America's drinking water and ensuring the health of the public. And I urge prompt approval of the conference report.

Mr. MOYNIHAN. Mr. President, it is with great pleasure that I rise to support passage of the conference version of the Safe Drinking Water Amendments of 1986 in the U.S. Senate. The House and Senate have labored long and well over this legislation, which when signed by the President, will reauthorize and strengthen the 1974 Safe Drinking Water Act. That we were able to reach a consensus on this bill is extremely gratifying to me, as one who first introduced related ground water legislation in the Senate in 1982. I shall first describe the problems which the Safe Drinking Water Act is designed to address, and then describe the "Sole Source Aquifer Pro-

the Agency in establishing standards, not to preclude other comparably effective technologies from consideration as a basis for setting an MCL. The particular concern about exclusive consideration of GAC for trihalomethane removal is that, because of the particular physical and chemical characteristics of disinfection byproducts and the frequency and levels of occurrence, a standard based on GAC system designed specifically for a high level of THM removal may be very expensive to meet.

The bill language allows EPA to consider treatment technologies or means other than GAC for purposes of setting a standard if another technology or method would achieve a comparable or higher level of removal than a feasible GAC technology could achieve. In the case of establishing a new standard for THM's, EPA is not authorized to select a GAC system without regard to cost or select a GAC system for THM removal that would achieve an insignificant reduction in contamination for an unreasonable increase in cost. Therefore, the bill provides the Administrator the discretion necessary to produce a protective and cost-effective standard. It is the committee's expectation that the Administrator will revise the existing THM standard on this basis to provide greater public health protection from this drinking water contaminant as soon as possible.

Mr. SIMPSON. As a member of the conference committee on this bill, I would like to confirm that this is also my reading of the statutory language. I would also like the chairman to provide responses for the record to two other related questions answered at the first meeting of the conferees. First, it is my understanding that treatment technologies and means other than granular activated carbon technology may be used to meet a maximum contaminant level set by EPA. For example, if a public water system chose to use chloramines rather than GAC technology to meet a standard for disinfection byproducts because they found it to be more cost-effective, that would be permissible under the statute.

Mr. DURENBERGER. That is correct. All systems are required to meet the established standard but are not required to employ a specific technology in order to do so.

Mr. SIMPSON. In addition, it is my understanding that if a public water system does not exceed a maximum contaminant level for a specific contaminant it is not required to install a treatment technology to remove such contaminant.

Mr. DURENBERGER. That is correct.

Mr. SIMPSON. I thank the Senator for his precise explanation and confirmation of my understanding of this important legislation.

INDIAN TRIBES AMENDMENT

Mr. HART. I would like to engage several of my distinguished colleagues, including the chairman of the Safe Drinking Water Conference Committee, in a discussion of the amendments in this bill intended to help Indian tribes address their existing drinking water supply problems. There is an urgent need for attention and assistance directed toward correcting problems which exist at a significant number of systems owned and operated by Indian tribes. As many as one-half of the tribal water systems nationwide do not meet minimal standards. This is due, in part, to poor raw water quality and to the financial and technical constraints on these systems. The Ute Mountain Ute Tribe in my own State of Colorado has had to live without a reliable, safe water supply for over 100 years. Mr. Chairman, I think the United States has a trust responsibility to help the Indian people remedy such problems, and that was my primary interest in originally cosponsoring these amendments to the Safe Drinking Water Act.

Mr. DURENBERGER. I agree with my able colleague that we do have such a responsibility and expect that the relevant amendments will focus the efforts of EPA and other appropriate agencies in aiding Indian tribes to improve their essential water supplies.

Mr. ABDNOR. Mr. President, I believe that significant progress will be made toward this objective by providing the EPA Administrator the authority to treat Indian tribes as States under the act and to provide such tribes grant and contract assistance to carry out functions provided by this title. The EPA is also given discretion to find an alternative means of meeting the purposes of the act if treating a tribe as a State would be inappropriate.

The Indian drinking water survey required of EPA within 12 months will serve as an important foundation of information for determining assistance priorities and charting progress. This survey is to be a thorough accounting of drinking water problems for each Indian reservation or community.

Mr. BURDICK. As another of the original cosponsors of these amendments, I believe one of the principal ways in which problems will be effectively addressed is through the provision of grants to tribes to implement the requirements of the act. I want to underscore the fact that the administration is not restricted to the 75/25 matching grant for State programs in the case of Indian tribes. The tribes I represent in North Dakota could not afford to develop these programs if they were required to provide matching funds.

Mr. DURENBERGER. I thank the Senator from North Dakota for making this point. The conferees recognized that tribal governments, unlike State governments, do not have a regulatory program base, an underlying financial and budgetary foundation or a supporting tax infrastructure which could be used in cost-sharing on these programs. Furthermore, funding assistance priorities should be established according to the severity of the problems identified in the EPA survey.

Mr. BURDICK. Another key aspect of these amendments is the earmarking of technical assistance funds for use by Indian tribes to improve the operation of their supply systems and increase compliance with drinking water standards. Three percent of the technical assistance funds—authorized at a level of $10 million per year—or a minimum of $280,000 is to be set aside for this purpose. These funds will be put to extremely good use in this manner since Indian systems represent about 1.5 percent of small systems nationwide but have a standards exceedance rate nearly four times greater than all other public supply systems.

Mr. DURENBERGER. I thank the Senator from North Dakota for his comments and join with him and Senators HART and ABDNOR in expressing strong interest in seeing that these amendments result in safer drinking water for Indian tribes.

TECHNICAL ASSISTANCE

Mr. BURDICK. I would like the distinguished chairman of the conference committee to indicate for the record what the committee's expectation was with respect to the funding and implementation of the technical assistance amendment in the bill.

Mr. DURENBERGER. I am pleased to respond to the Senator from North Dakota regarding this provision which will be crucial to the implementation of the act's requirements at small public water systems. Other amendments in the bill require the issuance of more drinking water standards which will, in turn, require systems to do more monitoring and to take action when contaminants are discovered in drinking water supplies. The conferees anticipated that small systems would have difficulty complying with these additional requirements without approriate technical assistance. This provision may mean the difference between an effective program or widespread noncompliance. Therefore, it should be regarded as a funding priority by EPA.

The assistance provided may be in the form of training programs, circuit-rider programs or other activities that will directly increase compliance. Funds are to be used by organizations such as the National Rural Water Association which have particular knowledge of the problems and needs of rural communities and experience in providing on-site assistance.

Many States, including Texas, already have such a program in place to prevent this kind of contamination, and would not be required to make additional changes to their program under this provision. Further, States not choosing to comply with these provisions would only be ineligible for funds to put such a wellhead protection program in place.

More specifically, this provision requires a State within 3 years to submit a wellhead protection plan to the EPA Administrator, who only has authority to disapprove such a plan.

The plan is to:

First, identify who in the State has authority to develop and implement the plan,

Second, include information on the wellhead protection area, such as hydrogeological data on the flow of the aquifer and the recharge zone, and whatever information the State believes is necessary to determine what area around a wellhead should be protected. In Texas, for example, the State has determined that on the whole, a protective radius of 150 feet is adequate to protect drinking water wells from contaminants which may have any adverse effect on the health of persons.

Third, the State should also identify likely manmade sources of contamination around the wellhead protection area. For example, if there is a municipal landfill in the region, this should be identified.

Fourth, the means by which the State plans on putting such a program in place, such as technical assistance, training programs, and so forth, should be outlined in the State plan as well.

Fifth, recognizing that even the best plans may be unable to prevent contamination of drinking water wells, the State should also give consideration to how replacement water supplies would be provided to an area dependent upon drinking water wells.

Sixth, last of all, before drilling new drinking water wells, a State plan should require that possible contamination sources be considered when selecting a site for the new well. In this way, we hope to encourage States to plan ahead to avoid possible contamination rather than have the public face the expensive, health-threatening problems of drinking water well contamination.

These requirements are a commonsense outline of the kinds of issues the States should address when submitting their wellhead protection plans. As I have stated earlier, many States, such as Texas, already have such a program in place that would meet these requirements. States where wells are a primary source of drinking water for many communities already have this kind of information, and we would not require more. We are encouraging States, to the extent they have not already done so, to think ahead about the problem of drinking water well contamination so they can prevent problems from occurring.

The EPA is only given authority to disapprove such plans if it does not include one or more of the required enumerated elements and is, therefore, not adequate to protect public water systems as required by this section. If EPA does not respond to a State plan within 9 months, it is deemed approved under this section. If there is a problem with the plan, EPA is required to so inform the Governor in writing. In these cases, the State would have 6 months to resubmit their plan.

If a State plan has been disapproved by the Administrator (even if resubmitted), then the State is ineligible for assistance under this wellhead protection provision. This is the only penalty that can be applied to the States pursuant to this provision. We are aware that some States have not chosen to protect their ground water in this fashion and thus did not want to penalize them for forging ahead of the Federal Government in a slightly different direction.

Last of all, we agreed to a provision in the House bill addressing a problem to brine contamination in the State of Ohio which must also include a certification that there is a State program that is being adequately enforced that protects persons from contamination associated with the annular injection or surface disposal of brines from oil and gas production. This House provision was designed to encourage the State of Ohio to more vigorously address its brine-related problems.

During this conference, some comments were made about the sweeping nature of this wellhead protection provision. The conferees do not intend this to be a massive ground water protection program. The Senate, in particular, has not had an opportunity to review the issue of ground water and to develop a comprehensive ground water protection program.

This addition to the Safe Drinking Water Act is aimed, first, only at underground sources of drinking water and not all ground water. Second, it is intended to be a modest first step for States to make. Our penalties provision makes it clear that States choosing to maintain a different approach to ground water protection will only lose funding under this particular section. The Senate conferees anticipate that a more ambitious ground water protection program may be developed in the near future, but this is merely a means of encouraging States to focus on the problem at this time.

Mr. President, I am very pleased that this conference has successfully concluded its business, and I am pleased with the constructive and focused conference report that we have before us today.

GRANULAR ACTIVATED CARBON TECHNOLOGY

Mr. WILSON. I would ask my distinguished friend from Minnesota, the chairman of the Safe Drinking Water Conference Committee, to respond to several questions concerning the agreement reached in conference on the standard-setting amendments to the act. First, it is my understanding that the agreement reached in conference did not change the intent of the standard-setting amendments originally passed by the Senate in S. 124. Can the chairman confirm this for the record?

Mr. DURENBERGER. That is correct.

Mr. WILSON. I thank the Senator for his confirmation and ask the able chairman to further clarify my understanding of the conference agreement by restating how cost is to be considered in the process of determining a maximum contaminant level for a drinking water contaminant.

Mr. DURENBERGER. I would be pleased to provide such a clarification for my distinguished colleague. The bill directs the Administrator of EPA to set the maximum contaminant level (MCL) as close to the maximum contaminant level goal, which is based solely on health effects data, as is feasible using the best available technology and taking cost into consideration.

The bill establishes granular activated carbon [GAC] technology as a feasible technology for the removal of synthetic organic chemicals. The conference committee recognized that the cost-effectiveness of contaminant removal with this technology can vary from contaminant to contaminant. Therefore, in setting the MCL, the Administrator is to take cost and effectiveness into consideration at different levels of contaminant removal by granular activated carbon technology to arrive at the final standard. The Administrator's primary consideration in setting a standard should, of course, be public health protection with technological and cost considerations defining the limits of feasibility.

Mr. WILSON. Your response confirms my view that this regulatory process will not lead to unreasonable costs to public water systems and the public. My particular concern is with trihalomethane [THM] removal where a level of removal comparable to or higher than that which could be achieved with GAC technology may be achieved more cost-effectively by using an alternative technology. Could such an alternative technology be used in this case as a basis for setting the drinking water standard?

Mr. DURENBERGER. The intent of the bill language regarding the feasibility of GAC was to establish this technology as a benchmark to guide

which can be borne by large water systems.

Enforcement of drinking water standards and regulations has seriously lagged over the years. The bill gives the Agency new administrative order authority which EPA has said would greatly enhance its enforcement capabilities. The bill also requires the Agency or the States to move expeditiously against violators. Where necessary, the law provides for variances and exemptions for systems that cannot meet certain requirements. These provisions are to be used sparingly and not as means of avoiding enforcement actions.

In recognition of the difficulties that small water supply systems may have in complying with the new requirements, the bill provides for technical assistance to these systems.

Finally, in addition to correcting deficiencies in existing Safe Drinking Water Act programs, the bill establishes a new program to protect public water supply wells from potential contamination. My own State of Vermont—and several other States—already have programs to accomplish that goal. The program in the bill requires all the States to take steps to protect their underground sources of drinking water.

Mr. President, S. 124 makes major improvements in the law that protects the water people drink. Where necessary, a balance has been struck between achievability and the goal of absolute safety of drinking water, but the emphasis is consistently on protecting human health.

I urge my colleagues in the Senate—and the President—to recognize this as important legislation that should be enacted without further delay.

Mr. BENTSEN. Mr. President, I am pleased that we have completed work on amendments to the Safe Drinking Water Act. These amendments, agreed upon by the conferees, produce a workable and more effective drinking water program to protect the public from contaminants found in drinking water.

To date, the Environmental Protection Agency has issued drinking water standards for only 22 contaminants in the decade since the Safe Drinking Water Act was enacted. The amendments require EPA to accelerate this pace to and within 3 years of enactment to set standards for 83 contaminants previously listed by the Agency as contaminants of concern. In order to accommodate the Administrator's need for discretion and the Agency's comments that their concerns about some of these contaminants has decreased over time, we permit EPA to substitute and set standards for up to seven new contaminants.

This bill also addresses the feasibility of granulated activated carbon (GAC) technology. Legislation passed by both Houses concluded that GAC is available for the control of synthetic organic chemicals, taking cost into account. The bill does not require the use of GAC. Rather, it requires that the type of removal that can be achieved feasibly using GAC will be a benchmark against which to compare alternative technologies.

Moreover, we recognize that GAC is not a one-dimensional technology. Instead, it is a water treatment technology comprised of a variety of factors such as retention time, the quality of the carbon used, and the frequency of regeneration of the carbon. The effectiveness of GAC is also dependent upon the character of the contaminant that is being treated.

For example, in the conference report to this bill, the conferees indicate that "as a guide as to feasibility and effectiveness, the Administrator should consider a range of granular-activated carbon systems comparable to those able to achieve 90- to 99-percent removal of trichloroethylene." This reference is intended to suggest that there are systems which have been designed using GAC as a mechanism to specifically remove organic contaminants from drinking water. This guide is referenced to distinguish these systems from GAC systems which have been designed for general odor and taste improvement purposes. The guide is not intended to suggest that a system designed for trichloroethylene will achieve the same level of effectiveness for another organic contaminant. It is not intended to suggest that 90- to 99-percent removal is the feasible level of removal for other organic contaminants. With regard to such other contaminants, GAC may only achieve such removal rates, if it can achieve such removal rates, at unreasonably great expense and time thereby considerably changing the factors which make up the feasibility and effectiveness determinations. GAC is not the only technology available for removing contaminants, but it is, as the conferees have determined, a technology that is available for setting maximum contaminant levels. We expect that removal rates and the technologies used to set MCL's will vary among contaminants, so long as all standards are established to prevent known or anticipated adverse effects on health.

In a new section, 1426 of the Safe Drinking Water Act, the Administrator is required, not later than 18 months after enactment, to modify regulations previously promulgated under the Safe Drinking Water Act to identify monitoring methods for class I injection wells. Such monitoring regulations may include ground water monitoring. The purpose of such regulations is to assure that there is the earliest possible detection of fluid migration from the injection well. In considering monitoring methods, the Administrator should take into account the risks associated with ground water monitoring, which can disturb natural barriers protecting the underground injection zone. these disturbances from ground water monitoring could, under certain circumstances, increase the risk of leakage from the injection zone. In addition, ground water monitoring is not always reliable, since the monitoring well may easily miss a plume migrating from the injection zone.

Other monitoring methods, such as monitoring of the annulis, may be more effective in predicting migration from the zone. Particularly useful in many cases is monitoring of the pressure of the annulis. Such a monitoring methodology will provide early and reliable indication of fluid migration without disturbing the injection zone. If material is migrating, the pressure in the annulis will drop, and those monitoring the injection well will be alerted to a problem. This method may be more reliable than ground water monitoring, which can easily miss a plume leaching from the injection zone.

Due to the variety of hydrogeological climates in which underground injection wells are located, permitting States flexibility in determining which monitoring method is most appropriate is an essential feature of any regulations. One national monitoring methodology could well do more to promote fluid migration from an injection zone than to provide early warning of such migration. States have long experience in underground injection, and this experience should be applied to this important area of environmental protection. For these reasons, the conference agreement continues the current reliance on the knowledge of the States in determining the appropriate use of ground water monitoring methods to be identified by the Administrator. States which regulate underground injection currently will continue to determine the applicability of these monitoring methods.

The conferees agreed to add a new section 1427 to the Safe Drinking Water Act to provide for protection of wellhead areas. This is a compromise between the House, which had an expansive ground water protection program in their bill, and the Senate, which had no such provision.

The wellhead protection provision is a focused provision designed to encourage States to protect areas around drinking water wellheads from possible sources of contamination. Experience has shown that drinking water wells are most likely to be contaminated at the wellhead when substances on the surface near the wellhead leach down the well and into the aquifer.

will benefit from the increased knowledge of the quality of their drinking water without being burdened with unaffordable costs.

The Safe Drinking Water Act is an important statute to provide safe drinking water supplies in both rural and urban areas. Rural areas and small water supply systems present particularly difficult problems in administering a national safe drinking water program. The amendments continue the strong congressional support for the National Rural Water Association and its circuit rider program. The amendments authorize $10 million annually in fiscal years 1987 through 1991 for technical assistance to small public water supply systems. This authorization will continue to enable them to achieve and maintain compliance with national drinking water regulations.

The National Rural Water Association provides a useful and important service to ensure that rural small water supply systems are operated in a safe fashion. These amendments will strengthen EPA's ability to work cooperatively with the small water supply systems.

A major source of controversy in the amendments is in regard to ground water protection. It makes absolutely no sense to create regulations for the water coming out of the well without recognizing that certain areas immediately adjacent to a well may be contributing to the contaminants found in that well. The area surrounding a public water supply well is of critical importance. Areas immediately adjacent to public water supply wells are susceptible to pollution and warrant special protection.

The wellhead protection area is defined as the surface and subsurface area surrounding a water well or well field, supplying a public water system, through which contaminants are reasonably likely to move toward and reach the well or wellhead.

It is important to recognize that the wellhead protection program is like a mouse as compared to an elephant in regard to the scope of the problem that needs to be addressed.

The wellhead area protection program is a flexible, important step forward, but it cannot replace the need for a comprehensive ground water protection legislation. It must be recognized that the wellhead protection provision highlights the problem and is responsive to the needs of States that will be responsible for implementing this program.

Under this new program, States are given wide-ranging flexibility in order to determine what type and level of wellhead protection program makes sense within the specific context of the geology found within the individual State.

It is important to recognize that the problems facing the Nation's ground water go far beyond the mere area adjacent to a public water supply system. The committee has held a number of hearings on ground water, and I am a cosponsor of major ground water protection legislation to address the problem comprehensively. It is my hope that the committee will continue to work toward the enactment of comprehensive ground water legislation.

The Safe Drinking Water Act is a public health statute. The wellhead protection program makes sense within that context. But the larger problems facing this Nation's ground water resources are related to both health and the environment. Protection that meets these goals is the long-term direction for Congress to take.

The immediate goal that needs to be addressed is getting the Safe Drinking Water Act back on track. The American public deserves assurance that the water coming out of their taps is safe and healthful. These amendments will take a significant step toward meeting that goal.

Mr. President, it is our profound hope that this legislation will spur EPA and relevant agencies to do what they should be doing, making sure that our drinking water is safe. It is my strong belief that the amendments will help us along that track and help us achieve that goal.

I again thank the Senator from Minnesota.

Mr. STAFFORD. Mr. President, I am extremely pleased to be able to urge the Senate to approve the conference report on S. 124, the Safe Drinking Water Act Amendments of 1986. This is the first major environmental bill in the 99th Congress to have reached this point in the legislative process, and its enactment will mark a major improvement in protection provided for drinking water in this country.

I first want to congratulate Senator DURENBERGER, the distinguished chairman of the Toxic Substances and Environmental Oversight Subcommittee for his leadership in shepherding this bill through a long and difficult process. Work on this legislation began in the 98th Congress and came very close to final passage by both Houses only to die in the final days of that Congress. And it has taken another year and a half in this Congress to bring us to this point.

Senator DURENBERGER has had the able assistance of Senator BAUCUS, the ranking minority member of the subcommittee. These Senators' patience and persistence have paid off finally in the conference report before us.

Mr. President, this bill does many important things, most of which the distinguished Senator from Minnesota has ably described. I want to add my comments on only a few.

The bill requires the Administrator of the Environmental Protection Agency to set standards for 83 specified contaminants within 3 years of enactment. Progress in regulating drinking water contaminants has been very slow over the past decade, and the provision in the bill is intended to assure that the more rapid progress achieved by the Agency in the last year is maintained.

The list of contaminants specified is a list published by EPA as contaminants for which they were developing the bases for regulating. Recognizing that new information could change the priorities for determining which contaminants should be regulated first, the conferees provided authority for the Administrator to substitute up to seven contaminants for those specified in the list of 83. Substitutions can be made if regulation of the new contaminants are judged to be more protective of human health than regulation of the listed contaminants.

The list is the minimum number of contaminants the Administrator is expected to regulate. If additional contaminants prove to be of concern during the period the Agency is working on the list of 83, additional standards should be developed.

One goup of contaminants that is already of concern and is not on the list is the family of trihalomethanes (THM). Because these substances are byproducts of the disinfection of water, there is widespread exposure to them. Preliminary evidence indicates that levels of THM's currently permitted in drinking water may constitute a significant threat to human health. The Agency should undertake the review of THM's it has indicated it may begin at the earliest possible time, and should establish the level of protection that is needed, consistent with the best technology available.

Another concern that is not represented by the specific contaminants on the list of 83 is the lack of a standard for total organic contamination. Because of the significant scientific uncertainty regarding the additive or synergistic effects of exposure to multiple organics, the protection offered by single contaminant standards may be inadequate. Thus, the promulgation of maximum contaminant goals and levels for total organic contamination is needed.

In addition to assuring that the Agency continues to regulate an increasing number of contaminants, the bill also modifies the standard-setting requirements of existing law and commands the Agency to require the highest feasible level of removal of contaminants that are harmful to health from drinking water. "Feasible" means the highest level of removal that can be achieved by technology, the cost of

and the efforts to develop ground water protection and correction programs both by the Federal Government and among the several States. In particular, we are concerned about the use of standards promulgated under the drinking water law as central elements of ground water protection programs developed by the States and as cleanup standards under the Federal Superfund Program. Mr. President, I am one Senator who does not believe that the maximum contaminant levels established under the Safe Drinking Water Act are appropriate for use in either of these ways. Drinking water MCL's, as I have tried to make clear here today, are not simply health standards but include other factors, as well. Rather than use these standards developed in one context for a public health program, in an entirely different setting for resource-based decisions in regard to ground water protection, it would be far better to simply develop ground water protection and correction standards directly. I hope soon to suggest a comprehensive ground water protection program to the Senate.

Mr. President, I want to once again thank my colleagues who served on the conferences committee and worked so hard to make this legislation possible. With that I would recommend to the Senate the adoption of this conference report. Thank you, Mr. President.

Mr. President, I yield at this point to my colleague from Montana [Mr. BAUCUS].

The PRESIDING OFFICER. The Senator from Montana is recognized.

Mr. BAUCUS. Mr. President, I rise in strong support of the Safe Drinking Water Act Amendments of 1986. These amendments will strengthen the law to protect this Nation's public water supplies. The Safe Drinking Water Act was enacted in 1974 to ensure that public drinking water supplies are safe.

This law was enacted out of a concern raised by a National Academy of Science's report that found the presence of over 700 contaminants in the city of New Orleans' water supply.

Since the act became law, EPA has set standards for only 22 contaminants—22 out of a minimum of 700 contaminants that now exist. If we accept this list as all-inclusive—and it is not—the public is protected from less than three-fourths of 1 percent of the contaminants in drinking water.

Even worse, most of these contaminants were regulated by the public health service in the early 1960's and then incorporated into the Safe Drinking Water Act. Only two standards have been finalized in the last 10 years.

We take drinking water for granted. When you turn on the tap, you expect the water to be safe.

A 1983 report by the Office of Technology and Assessment found that 29 percent of the ground water drinking supplies of the 954 U.S. cities with populations over 10,000 are contaminated. An EPA study found that water from 45 percent of public water systems relying on ground water has detectable levels of volatile, organic chemicals.

It is time that EPA begins aggressively implementing the Safe Drinking Water Act. It is clear that a discretionary approach of having EPA choose what and when to regulate contaminants is not working.

The Safe Drinking Water Act Amendment of 1986 will get this important public health statute back on the track to meeting its goal—protecting the public health.

The amendments reiterate that recommended maximum contaminant levels are the health-based goal that we should be striving for. The maximum contaminant level goal shall be issued simultaneously with primary drinking water regulations, linking these to integral concepts together.

The amendments require the regulation of 83 contaminants over the next 3 years. EPA must regulate 9 contaminants within 12 months of enactment, 40 additional contaminants within 24 months, and the remaining contaminants within 36 months. In order to provide flexibility to EPA in implementing this requirement, the agency is permitted to substitute up to seven contaminants for the contaminants listed in the amendments, if regulating the substitute contaminants would be more protective of public health.

EPA must then set in place a process to develop a priority list of contaminants which may require regulation at 3-year intervals thereafter. The agency must then propose regulations for at least 25 of these listed contaminants within 24 months and set regulations for the remaining contaminants within 36 months. This provision is meant to set up an ongoing process to regulate contaminants of concern.

In the past, there has been a great deal of disparity between the public health protection level of the recommended maximum contaminant level and the actual regulated standards or maximum contaminant level. The MCL goals must under these amendments be set at levels at which no adverse health effects are anticipated to occur and which allow an adequate margin of safety. This change in the law is being made to reiterate that RMCL's are health-based standards while MCL's are not. But it is the clear intent of Congress that MCL's be as close to the health-based standards as possible. The primary drinking water regulations must be set as close to the MCL goal as feasible. Feasible is defined as the use of the best available technology, taking cost into account.

In the past, there has been continuing debate as to whether or not granular activated carbon is considered a feasible technology. Granular activated carbon is the most effective technology available for the control of synthetic organic chemicals. These amendments make granular activated carbon the benchmark technology. The granular activated carbon technology will be designated as feasible. Any alternative found to be the best available technology must be at least as effective in controlling contaminants as granular activated carbon.

The current standard-setting practice at EPA has led to the promulgation of at least one standard which provided a level of protection that condones a risk of 1 excess cancer death per 10,000 population. This level of health protection is unacceptable.

It is unacceptable from a public health standpoint. It is intolerable when technology such as granulated activated carbon exists and EPA's own research shows that levels of organic contaminants could be reduced to the level of detection.

Within 18 months of enactment, EPA must promulgate regulations specifying criteria under which filtration is required as a treatment technique for public water systems supplied by surface water sources. The threat of Giardia contaminating our public water supplies is a growing national problem as well as other filterable contaminants. Requiring EPA to promulgate regulations will determine when a public water supply should use filtration as a treatment technique for public water supply systems supplied by surface water sources.

Within 36 months of enactment, EPA will be required to promulgate regulations requiring disinfection and specifying criteria for variances. This requirement will ensure the expanded use of disinfection recognizing that from a public health perspective, when considering adverse side effects, the technology is not always either prudent or efficient.

A new requirement for the monitoring of unregulated contaminants will allow us to begin to understand the nature and extent of contaminants in our drinking water. The inventory of these contaminants will provide a tremendous boost to development of a national drinking water data base.

The amendment recognizes that small systems supplying less than 150 service connections may be ill-equipped and unprepared to arrange for the analysis of samples of unregulated contaminants. The amendments provide that water samples are to be made available for analysis by the Environmental Protection Agency for these small systems. Thus, rural areas

gress actually defined them in 1974 never came to a conclusion. There is not now in regulation any provision to carry out the requirements of the 1974 act with respect to sole source aquifers.

Nevertheless, and despite these all too familiar problems with the drinking water program at the Federal level, many State and local governments have put the concept of sole source aquifer to good use and are busy protecting those unique and vulnerable drinking water resources from contamination. One place that has made especially significant use of the concept is Long Island, NY. The aquifers of Long Island which make up a complex and interconnected hydrological system are truly a sole source of drinking water for some 3 million persons. And Long Island has begun significant efforts to protect these aquifers in ways that might prove useful in other parts of the Nation. Long Island is not the only such example. Communities in Texas, Massachusetts, and Washington State are making comparable efforts.

It is the purpose of this amendment to provide a demonstration program to assist those local governments which have made a start in protecting their sole source aquifers. It is a demonstration program. This is not the first cycle of some open ended Federal commitment to ground water protection. The definition of sole source aquifer in the Federal law could not serve usefully as the foundation for any such commitment. So we are limited to demonstrations. But supporting demonstrations is one useful and important role that a national government can and should play in a federal system like ours.

From the tenor of these remarks it should be clear that it was only through the leadership and persistence of Senator MOYNIHAN that the conference was persuaded to adopt this demonstration program. His tireless efforts overcame the doubts that many of us had on this subject. And as a result of his efforts an approach to ground water protection that was pioneered in his State may well become the model for other programs all across the Nation.

Mr. President, this conference report also includes new provisions to protect the surface and subsurface land areas around the drinking water wells of public water systems that rely on ground water resources. This provision was worked out in the conference as a compromise with the House. The structure of the amendment is similar to the structure of the original, comprehensive House ground water program. But the scope of the program the conference reports is very much narrower than the House bill and the Federal-State relationship provides infinitely more flexibility for the States to design and establish their own programs than would have been provided had we adopted the House bill.

Under the conference agreement, the Administrator has the authority to disapprove State-proposed wellhead protection programs. If a State develops a program and the Administrator disapproves it, the State can choose not to resubmit the program, and the only consequence is that they will not receive Federal grants to implement the program. States do not suffer any sanction from the Federal Government, other than the loss of the grant to develop and implement the program, if they do not submit a program which can be approved by the Administrator.

The reason that the Administrator is given the authority to disapprove a State program is to make sure that scarce Federal dollars are not sent to support State wellhead protection programs that are ineffectual or inappropriate. If States do not submit serious and effective proposals, there is no reason that they should expect Federal dollars under this program. By disapproving a State proposal, the Administrator is able to prevent that result. But there is no attempt here to compel States to submit programs that can meet the standard of some national criteria for wellhead protection.

Mr. President, although the wellhead protection program is structured in the ways similar to the original House ground water protection program, it is also important to point out the ways in which it is different from the House bill. For one thing there is no provision in this section for a citizen suit to enforce the requirements to define wellhead areas, identify sources of contaminants or develop plans to protect ground water resources. It would not be appropriate to make the first step in a national ground water protection effort a step into Federal district court to establish the outlines of 50 State programs in consent decrees approved by Federal judges.

A second element which was in the House bill, but which is dropped from the conference report was the requirement that Federal development projects or projects assisted by Federal funds be consistent with State or local wellhead protection programs. Several Federal departments and agencies expressed concern to the conferees about these proposed consistency requirements. And in response to these requests which were summarized and focused by the Attorney General in a letter to the conferees, we have dropped the consistency requirement.

In its stead these amendments include language which has become virtually boilerplate in other Federal statutes. It requires Federal agencies that have jurisdiction over potential sources of contamination within wellhead areas to operate those facilities under the same rules and regulations and in the same manner as is required of any other person. The President is given authority to exempt any Federal facility from this requirement, if he determines that it is in the paramount interest of the United States to do so. As I say, Mr. President, this language which occurs in the Clean Air Act, the Clean Water Act, the Solid Waste Disposal Act, the Superfund amendments which are now pending in the conference, and which is included in the current law verision of the Safe Drinking Water Act itself has become a standard feature of Federal law to rationalize the regulatory status of Federal facilities without establishing an onerous and complicated review process as might be required by some interpretations of the consistency language which was included in the House amendment.

Mr. President, the sole source aquifer demonstration program and the wellhead area protection program are new elements of the drinking water law that differ in important respects from the programs that have been included in that law in the past. At the State level of government, drinking water programs are most frequently administered by public health agencies. That is most appropriate, since the drinking water law is a public health law that involves analysis of water supplies and other analytical procedures that health departments are best equipped to carry out. But these two new ground water provisions have inmportant elements which are focused on resource protection rather than public health. In that regard, it is essential that EPA give States great flexibility in determining which State agencies shall administer these new programs and not require that they be managed by the same State agencies that carry out other parts of the drinking water program.

We, of course, face a similar issue here at the Federal level. The agency has established an Office of Ground Water Protection to implement the national ground water strategy. We see these programs as fitting into that strategy quite well and believe that they should be managed in that Office and in coordination with other ground water protection efforts. To make my point specific, EPA is required to provide technical guidance to the States and public water supply systems on the methods that might be used to most appropriately define wellhead protection areas. The expertise of the Office of Ground Water Protection is much better matched to this task than is the Drinking Water Office at EPA.

Mr. President, as I conclude these comments I want to say that we are expecially sensitive to the relationship between the drinking water program

nancial assistance to the States and especially to small public water supply systems. I have just described the program of assistance to make sure that monitoring for unregulated contaminants is conducted for small systems. This legislation meets the same objective in other ways including a substantial authorization for general technical assistance and measures to increase cooperation between EPA and Indian tribes which have experienced great difficulty in securing safe and adequate drinking water supplies.

On the subject of technical assistance, I would make mention of the very important role that the National Rural Water Association has played in bringing the promise of safe drinking water to the small towns and rural communities of America. The conference report includes specific mention of circuit rider programs—meaning technicians who are available to a large number of communities and travel among them providing assistance and advice in the operation of water supply systems. This provision was crafted with the National Rural Water Association in mind. I would note that the President's budget for 1987 proposed elimination of the grant for the National Rural Water Association and that in response the Committee on Environment and Public Works in its annual report to the Budget Committee recommended that the grant be continued.

LEAD BAN

Mr. President, before turning to the subject of ground water protection in the conference report, I wish to review one other item directly related to the activities of the drinking water program. When the Senate considered and adopted amendments to Superfund, Senator BRADLEY sponsored an amendment that would ban the use of lead pipes and solder for use in drinking water distribution systems. This is a very important amendment and I am pleased that we could include the Bradley amendment here in the Safe Drinking Water Act Amendments of 1986 rather than wait for action on lead in drinking water supply systems as a part of Superfund.

Lead which leaches from solder and pipes has become a public health concern in several States and steps are being taken in many communities to deal with this public health threat. A part of the Bradley amendment which we include here directly bans the use of lead solder or lead pipe in any construction which is to be a part of a drinking water supply system. This ban applies not only to materials used in constructing the drinking water system owned by the public water supplier, but also to the pipes and solder used in the construction of new homes and commercial buildings.

Since EPA is not experienced and probably not capable of effectively enforcing a ban in buildings under construction or repair this legislation includes a special enforcement provision which has created some confusion and needs clarification. It is not the intention of the conferees that EPA enforce the ban directly on builders and contractors. The ban is to be enforced only through State and local building and plumbing codes. It is our intention that State and local governments make the modifications in codes and regulations necessary to effectuate the ban as soon as possible. And we make the ban in Federal law effective immediately for that purpose. But realizing that it will take some time for State and local governments to modify their laws, we do not place any sanction against a State for failure to enforce the ban until 2 years after the date of enactment of this legislation. If at that point a State has not made the changes in its regulations, the Administrator is authorized to withhold a portion of the State's drinking water grant as a sanction.

I want to say again how much we appreciate the role that Senator BRADLEY played in shaping this amendment. At one point he held back the amendment so we could proceed with Senate consideration of the drinking water bill and at every point in the process he has been cooperative with the needs of the committee and the views of other members on this amendment. His leadership on this matter has made an important contribution to public health protection and is rewarded in full today as the Senate sends his proposal with this conference report on to the President for signature.

GROUND WATER PROTECTION

The issue that has caused the greatest controversy with respect to this legislation and which delayed completion of the conference for so many months is ground water protection, the sixth and final major element of the bill that I would review for my colleagues today. The House bill included a comprehensive ground water protection program. The Senate bill did not. Nor was the Senate prepared to consider a comprehensive ground water protection program as a part of this conference.

Thanks largely to the leadership of Senator MOYNIHAN, the Senate bill did include a demonstration program for sole source aquifers to support a few truly outstanding ground water protection programs across the Nation. And I will want to comment further on the sole source aquifer program in a moment, but the program that we did include was intended to be only a demonstration program and was clearly not the beginning of a comprehensive, national program to protect our ground water resoruces.

I have long advocated such a national program. I believe that the debate in the Senate on a comprehensive ground water protection bill will begin in the next few months. But I have steadfastly resisted making that debate a part of the consideration of the drinking water amendments. The drinking water program does not work well. It needs attention in its own right. And it needs a legislative fix as soon as possible.

Holding out for a ground water program as a part of the drinking water conference has only proved to slow the process. And we still do not have the bill signed by the President. The very small amount that has been done in these amendments to make a start on ground water protection may yet turn out to be the excuse for a Presidential veto.

So we have resisted the House insistence on a ground water package. We were true to the Senate's desire in that respect. We come back with a sole source aquifer program which is very much the cousin of the proposal that we took to the conference. And we have a modest program for those States which are ready to take steps to protect the waters that are near to drinking water wells used by public water supply systems. Both of these programs fit well within the context of the drinking water law and neither of them infringes on the traditional relationship between the Federal Government and State and local governments in matters of land use and water resources.

Let me describe the program to protect sole source aquifers first. It is a grant program. It authorizes assistance to State and local governments to plan and implement programs that will protect sole source aquifers. "Sole source aquifers" is a concept placed in the original Safe Drinking Water Act to identify drinking water sources that were especially important—important presumably because they would be hard to replace should they become contaminated. That was the concept.

Unfortunately the language in the original statute was less than artfully drafted. The language actually refers to "sole or principal sources" of drinking water in the text of the law. When EPA tried to put this concept into a regulatory definition in the mid-1970's they were unsuccessful. The way the statute is drafted their is nothing "sole" about a sole source aquifer. Wherever more than 50 percent of the population relies on ground water for drinking water, the aquifer from which the water is taken is by definition the principal source of drinking water and thus subject to designation under the drinking water law whether or not it is a unique source of supply. EPA's attempt to make a useful distinction between sole source aquifers as the valuable resources we might imagine them to be and as the Con-

the use of this factor in the standard-setting process. It is rather the result of the rules under which the legislative process is conducted.

However, it does seem to this Senator that the use of practical quantitation limits cannot be considered as conforming to the amendments that we are adopting here today. Nowhere does this conference report or the underlying law allow EPA to set a standard which is less stringent than can be achieved by the best available treatment technology that is feasible. PQL's bear no relationship to the feasibility of treatment technologies. In fact, the preamble to the MCL's contained data and information showing that levels much lower than the proposed MCL's could and are being achieved in the United States by treatment systems using GAC, the benchmark for SOC's established by this act.

These amendments require the consideration of the best available treatment technology which is affordable to large systems as a benchmark in setting MCL's. EPA's practical quantitation limits are not derived from treatment techniques and are not even based on the best available analytical technology. The PQL's are based on the capacity of the average lab doing a routine analysis to detect a particular contaminant at a reliable level.

In the preamble to these proposed regulations, EPA makes the argument that they cannot enforce a standard at a level which is below the limit of detection. The argument is interesting, but largely irrelevant to the issues at stake here. For EPA has not proposed a standard which is below the limit of detection. Good labs using good techniques are by the data that EPA itself presents capable of detecting levels at only one-tenth of the level proposed by EPA as the MCL's for four of these five contaminants. All EPA need do is require upgrading of the analytical techniques used in testing water supplies for compliance purposes.

Of all the factors that the administrator might consider in establishing drinking water standards, the one that is least useful—that is most likely to be out-of-date tomorrow—is the capacity of the average laboratory to detect a particular contaminant. We are going through a literal revolution in the analytic techniques that are used to detect and measure pollutants and contaminants in the environment. The development of new techniques and the spread of those techniques to average labs is nothing short of phenomenal.

When EPA takes the least stable of all numbers—a concept not mentioned in the law or the amendments—and uses it to set MCL's for items like trichloroethylene, benzene and vinyl chloride, they are taking a very large risk that the decision will be overturned by a court and that the whole effort to set drinking water standards will once again be hopelessly and unnecessarily delayed. The mandate of the law is to set the standard as close to the RMCL as is feasible applying treatment techniques to relatively clean water. To the extent that has not been clear under current law, it is made emphatically certain by these amendments. That mandate has not been satisfied, in this Senator's judgment, by the MCL's that were established using practical quantitation limits for the five volatile organics in the November 1985 proposal.

DISINFECTION AND FILTRATION

Mr. President, the third major element of these amendments is found in the provisions for disinfection and filtration of drinking water supplies. The administrator is to promulgate requirements for filtration by all systems using surface water sources and for disinfection by all systems. These requirements will add to public health protection by establishing minimum levels of treatment and protection even where no specific MCL has been violated. There are a vast array of viral and biological contaminants that can be transported in drinking water supplies. These and other elements which threaten human health can frequently be removed by these widely used treatment techniques.

The provisions of the conference report with respect to filtration and disinfection track the Senate bill in two very important respects. First, the administrator is to consider whether there are protection measures that systems relying on surface waters can take which are as protective of public health as is filtration. Where such active measures to protect watersheds are in place, the system may not be required to install filtration. Second, EPA is to provide technical assistance to small systems so that they might effectively implement disinfection techniques.

One further comment also needs to be made on this subject, Mr. President. On reading the House debate on the conference report of last Tuesday, one might get the impression that no system which is in compliance with all the MCL's will be required to employ disinfection or filtration. Such an interpretation would not be in conformance with the legislative language reported by the conference. Compliance with existing drinking water standards is not an indication that there is no need for filtration or disinfection. Filtration will be required at surface water systems unless a system meets equivalent health protection criteria established by EPA. Therefore, systems in compliance with the MCL's are not automatically exempt from the filtration requirements.

MONITORING UNREGULATED CONTAMINANTS

The fourth major provision included in these amendments is the program for monitoring unregulated contaminants. Under the Safe Drinking Water Act local public water supply systems are only required to monitor for those contaminants for which a national standard has been established. Because EPA has set very few standards, an insufficient amount of monitoring has been conducted. We know that the monitoring has been insufficient because a very few States, including my own State of Minnesota and including California, have conducted independent monitoring programs testing for a wide range of potential contaminants. And a wide range of contaminants has been discovered. Several communities in Minnesota which believed that their water was safe because it met all Federal standards have been shocked and dismayed to learn that the water is actually spiked with a toxic chemical, and in some cases a mixture of chemicals, that cannot be seen or tasted or smelled. The contaminants were not previously detected or suspected by monitoring under the drinking water law because there were no standards for the chemicals in question.

These amendments will bring the added measure of protection which is afforded by broad gauge monitoring to all of the communities in the Nation. EPA will establish a list of contaminants—in addition to those contaminants for which standards are set—and the water supply of every community will be tested at least once every 5 years for that broad range of contaminants.

To make sure that this program is effective for the thousands of small water systems across the country, the Senate bill and the conference report contain an authorization of $30 million to pay for the required sampling and analysis at small systems. I want to say to my colleagues that this is not just another grant program which the President and the Congress are free to kill by failing to provide the necessary appropriation. The Administrator is required to establish a program for monitoring unregulated contaminants which is a nondiscretionary duty that can be enforced by any citizen in district court. Small systems satisfy their responsibilities under the amendments by making their systems available for sampling. The authorization is an authorization for EPA to provide the Agency with the resources necessary to carry out the testing that is mandated. EPA cannot avoid the responsibility by failing to seek—or actively opposing—an appropriation for that purpose.

TECHNICAL ASSISTANCE

The fifth major element in the conference report is found in a series of provisions to provide technical and fi-

cially susceptible persons, exposure to the contaminants through other media, synergistic effects and chronic effects which fall short of adverse health but which may increase the risk of illness were to be considered by NAS in making recommendations on standards to EPA. We do not expect this advisory relationship to be terminated by the result of these amendments and find that the consideration once assigned explicitly to NAS should continue to be matters that are weighed by EPA in establishing drinking water standards and health goals.

TREATMENT TECHNOLOGY

Mr. President, the second major amendment to the Safe Drinking Water Act made by this bill establishes a new technology benchmark in the standard-setting process. There are several regulatory steps in setting a national drinking water standard. First, the Agency establishes a health-based goal which under current law is called the recommended maximum contaminant level or RMCL. This number is set a level so that a person consuming water containing that amount of the contaminant would experience no adverse health effects even if the contaminant is consumed over a whole lifetime. By law the RMCL also encompasses an adequate margin of safety to protect those among us who are especially sensitive to a particular contaminant.

Once the RMCL or health goal is established, the administrator begins work on the enforceable standard, the maximum contaminant level. This is the standard which applies to the water delivered to consumers by public water systems. It is a standard at the tap. The MCL is set as close to the goal as possible, but recognizes that some water supplies have been contaminated and that our capacity to remove those contaminants and reach the goal is limited by the constraints of available treatment technology.

The amendments we will adopt today instruct the administrator to set the MCL at a level which is as close to the goal as possible using the best available treatment technology which is affordable for a large public water supply system. Under current law the administrator is to set the MCL considering the use of treatment technology which is "generally available." The administrator has not been able in the 12 years that the drinking water program has been in place to suitably define the concept "generally available."

So these amendments delete the reference to "generally available" technology and shift to considerations more familiar in environmental law. We begin here with an assumption that a public water system has a relatively uncontaminated water supply which nevertheless exceeds the RMCL—the health-based goal—for the contaminant in question. The task is to set an enforceable standard as close to the health-based goal as possible. It must be achievable and, thus, must consider the technologies which are effective in removing that contaminant from water. EPA selects and applies that technology which is most effective and which can be afforded by the largest public water systems considering the ability of the systems to spread the cost of the treatment technology over a large number of consumers. The standard, the maximum contaminant level or MCL, is established by factoring together these three items: The health goal; the effectiveness of treatment technologies in removing contaminants; and the level of treatment that is affordable for the largest public water supply systems.

Mr. President, as I explain these amendments, it is also helpful to indicate what they are not. This is not an instruction for the administrator to conduct a cost-benefit analysis to determine the MCL. The law emphatically does not provide that the administrator will set the MCL at a level where benefits outweigh costs, nor does it require EPA to balance costs and benefits in any other way. Cost only enters into the judgment of the administrator in defining which treatment technologies are to be considered best available technologies. And availability in this instance is considered only in the context of the largest water supply systems, not all systems or average systems. Any effort to weigh costs and benefits under the Safe Drinking Water Act and to set standards only where EPA can quantify benefits which outweigh costs would not be lawful. The act requires EPA to set a standard for every contaminant that may have any adverse effect on health and to set the enforceable MCL as close to the health goal as can be achieved by feasible technology.

There are two other items related to the technology factor in setting standards which need to be mentioned at this point. The first relates to granular activated carbon or GAC, one of the treatment technologies that is available to remove synthetic organic chemicals from drinking water supplies. In a few moments, I will be joined by other Members of the Senate for a brief colloquy on this subject, but let me say here that the conference report is consistent with the provision passed by the Senate in regard to GAC.

The Senate bill and the conference report establish that GAC is to be considered feasible—that is effective and affordable for large systems—to use in removing synthetic organic chemicals. In setting standards for any synthetic organic chemical, the administrator is to select a level which is not less than the level that could be achieved using a feasible GAC system.

At the time the Senate passed this legislation, some were proposing an amendment that would have deleted GAC as the benchmark for trihalomethanes or THM's. The Senate did not adopt such as an amendment and GAC is the benchmark for THM's. But in using this technology factor the administrator is to recognize that there is an almost infinite variation in the design of GAC systems. It is possible to design such a system, where cost is not a factor, with almost unlimited capacity. The particular GAC configuration that is used in establishing the MCL for THM—if, in fact, GAC is determined to be the best available technology for this purpose—is to be a configuration that would be affordable to large public water systems in the United States.

The second issue that needs to be mentioned in regard to the use of technology and cost factors in setting MCL's was raised by EPA when it published proposed maximum contaminant levels for eight volatile organic chemicals in November of last year. In making that proposal, EPA did not follow the steps which I have just described. They did establish RMCL's for each of the contaminants. But rather than select an effective and affordable treatment technology to establish the MCL as close to the RMCL as possible, the Agency inserted an entirely new concept into the standard-setting process.

Before considering the effectiveness and affordability of treatment technologies, EPA examined and included as a consideration the availability and effectiveness of technologies for detecting these eight volatile organics in water supplies. EPA found that there is a limitation on the capacity of present technology to detect these contaminants. Such a limitation is not unexpected. There is always a limit on detection. What was unexpected is that EPA chose one version of the limit of detection as the drinking water standard, the MCL, for five of the contaminants. Such a step is contemplated nowhere in the Safe Drinking Water Act or in these amendments.

This new factor—a level EPA calls the practical quantitation limit or PQL—was not debated or considered by the conferees on these amendments. It is quite outside the scope of the conference, since the Senate passed its bill in May 1985 and the House a month later. EPA did not propose use of the PQL until November 1985. So we were unable to consider this new issue in the conference. The fact that we have chosen not to comment on practical quantitation limits should not be in any way or in any forum considered an endorsement of

SETTING STANDARDS

The amendments reported by the conference require EPA to set standards for 83 specific contaminants within a 3-year period. By early June 1989, maximum contaminant levels for 83 chemical, biological, and radiological agents specifically named in the conference report must be promulgated by EPA.

This list is EPA's own list. EPA is moving in this direction. It is sometimes said—mistakenly—that the list contains 85 contaminants. The original lists which when combined had 85 elements also contained disinfection and filtration among those 85 requirements. Those two items are included at another point in this bill. So the number is 83.

It is unusual for the Senate to include a specific list of pollutants with specific deadlines for standards in the language of a bill. Choosing contaminants and scheduling the regulatory process is not normally a legislative function. But the history of the drinking water program more than justifies the use of lists and deadlines by the Congress to assure that standards are actually established and at the earliest possible date.

I would make specific comment on the subject of deadlines to illustrate the concerns that give rise to this section of the bill. Even after EPA announced its commitment to set standards for all of these contaminants, other parts of the executive branch raised barriers to the swift and certain completion of the task. For instance, last September the Senate found it necessary to adopt an amendment to the Superfund reauthorization which required the Office of Management and Budget to release recommended maximum contaminant levels for 40 contaminants that had been submitted to OMB for review according to the provisions of Executive Order 12291. The EPA proposals has been sitting on a desk at OMB for 6 months without any response or concurrence from the regulatory review office.

To be certain that such tactics will not ultimately defeat our intent in adopting these amendments, the bill contains deadlines. These deadlines make the duty of the Administrator to establish standards a nondiscretionary duty and allow any citizen to bring suit to compel action, should the Administrator fail to meet the timetable established in the bill. It should be clear that it was not only the failure of EPA that prompted us to adopt these provisions.

The list and the deadlines were both included in the legislation sent to the conference by the Senate. These are our proposals. However, the current Administrator of the Environmental Protection Agency has many times expressed concern about this section because of the lack of any discretion in carrying out the duties as provided in the Senate bill. It was also argued in the conference that the House bill which took a very different approach to standard-setting provided the Administrator with considerable discretion as to which contaminants would be regulated.

The conference report, in response to the Administrator's request, adds an element of discretion to the standard-setting process. The Administrator is authorized to substitute up to seven contaminants which are not on the list for seven contaminants which are. He still must set standards for 83 contaminants in 3 years. Seventy-six of those contaminants must be from the list published in the conference report. But seven may be items which are not currently on the list.

The Administrator has expressed to me personally his view that more than seven substitutions may be justified. And as we move closer to the end of this 3-year regulatory process, Congress may be persuaded that more than seven substitutions are justified. If so, Congress may amend the law to allow other substitutions and speaking for myself, I will entertain any such proposal from the Administrator at the appropriate time and with a sympathetic ear.

On the subject of substitutions, there is a parameter that I personally believe is of a high priority and which is not on the list of 83 contaminants, but ought to be considered by the administrator at the earliest possible date. I believe that we need a maximum contaminant level for the total concentration of organic chemicals in drinking water supplies. A total organics standard would be an unusual standard under the Drinking Water Program—most of the numbers are for specific constituents. But it would not be unique. The standard for trihalomethanes is a number set for the combined concentration of four compounds including chloroform and bromoform. A total organics standard would simply expand on the concept of the THM standard and set an upper bound on the combined concentration of all organic chemicals.

There are at least two good reasons for establishing a total organics standard. First, it is obvious to anyone who has studied the Safe Drinking Water Act that the chemical revolution in the marketplace moves faster than the standard-setting process at EPA. It takes many months—years—under the best of circumstances to set a standard for a contaminant after it has been detected in drinking water supplies. By the time an enforceable standard has been established drinking water supplies may have become significantly contaminated in many parts of the country. A total organics number could stand in for a specific standard during this period of regulatory development and provide at least an upper bound on the amount of contamination allowed.

Second, it is suspected, although very costly to prove, that some organics which occur in combination may have additive or synergistic effects on human health. A total organics standard would assure that Americans were not exposed to huge doses of harmful chemicals in mixtures where the amount of each element was defined as safe by itself but where the combination presents a severe risk. In this regard, I think of the recent MCL's for volatile organics. The evidence presented by EPA suggests that many of these contaminants are found together in water supplies. Although we might be willing to consume water with five parts per billion TCE or five parts per billion benzene, water that contained 10 or 15 different chemicals of that type with total concentrations ranging up to 100 parts per billion might reasonably be subject to a different qualitative judgment on health, even if it meets the quantitative standard for each of the contaminants taken individually. So I would be more than sympathetic to a proposal from EPA to substitute a total organics standard for one of the items on the legislated list.

Mr. President, before turning to the second major element of these amendments let me mention one final subject with respect to the standard-setting process. In amending the existing Safe Drinking Water Act to provide this expedited standard-setting schedule, we have removed several provisions in the law which were the foundation of the process designed in 1974. Those changes as I have tried to make clear are most appropriate, because the process as originally designed did not work. Nevertheless, there were some concepts included in that original framework which may still prove useful, if operated on a somewhat less formal basis. In this regard, I am particularly mindful of the role that was established for the National Academy of Sciences in the original act.

The National Academy of Sciences never took well to its assignment to quickly develop explicit recommendations for standards on specific contaminants. But the continuing studies and reports by NAS on drinking water and public health have provided, and we hope will continue to provide, guidance to the Agency as it conducts the risk assessments that lead to RMCL's and health goals.

Every risk assessment includes dozens of decisions to extrapolate from the data which is available and which is relevant to a determination of a specific numerical standard that will adequately protect public health. Under current law several considerations including the impact on espe-

Mr. President, the Safe Drinking Water Act was first enacted by the Congress in 1974. The need for a national statute to protect public health from drinking water contaminants was recognized by the Congress only after surveys by the Environmental Protection Agency in the early 1970's had shown that public water supplies were widely contaminated with synthetic organic chemicals—the new man-made compounds that have revolutionized every facet of American life in the last half of the 20th century. Whatever miracles these new chemical substances have produced in the home or at the workplace, their presence in drinking water supplies has been recognized as a substantial threat to the Nation's health. The public concern for the quality of drinking water particularly in large cities drawing water from rivers and other unprotected surface water supplies, provided the impetus that was needed to first enact the Safe Drinking Water Act of 1974.

The theory of the Safe Drinking Water Act is quite simple. The program has two parts. First, EPA is to establish national standards for drinking water quality. These standards are numerical criteria for each contaminant which may be found in a drinking water supply and which has or may have an adverse effect on health. The EPA standard is the maximum concentration of the contaminant allowable. At the time the Safe Drinking Water Act was adopted, more than a dozen such standards, principally for metals and other inorganic elements, had been established by the Public Health Service. EPA was to rapidly fill out this list with standards for a wide range of other contaminants.

The second part of the theory of the drinking water program is that water suppliers, the operators of the 60,000 public water systems which exist in this country, will monitor the quality of the water delivered to consumers and treat that water if necessary to assure that the concentration of each contaminant remains below the acceptable levels established by EPA.

The theory of the Safe Drinking Water Act is appropriate to our Federal system of goverment. The central, National Government conducts the research on health effects and treatment technologies that is necessary to set standards that will provide adequate protection of public health. And local governments, which most often own and operate the water supply systems, put the standards into practice by applying them to the water they deliver to the American people.

The Safe Drinking Water Act is, indeed, simple in theory. In fact, Congress expected the program to fall quickly into place. The original statute is replete with quick deadlines stated as mere days from enactment—60 days, 90 days, 180 days.

It is now 12 years later and the Safe Drinking Water Act once again comes to the floor of the Senate with most of the original promise unfulfilled. The act has failed miserably. In all of the time that has elapsed since enactment, the Environmental Protection Agency has set standards for only a handful of contaminants—six pesticides, all of which have been banned for use—a half a standard for thihalomethanes, one of the principal contaminants of concern in the early 1970's—and radionuclides.

Seven hundred different organic, inorganic, biological, and radiological contaminants have been detected in the drinking water supplies of the United States. And yet today after 12 years under the Safe Drinking Water Act we have standards for only 23 contaminants and two-thirds of those were established by the Public Health Service in the 1960's long before anybody had even contemplated a national environmental protection agency. A miserable, discouraging, disturbing record—that is the legacy of the drinking water program at the Federal level of government.

Because EPA set few standards, water systems at the local level have not monitored for the broad range of contaminants likely to be found in water supplies. Even for those standards that are in place, it was soon discovered that most public water systems were woefully unprepared to implement the measures required of them by the drinking water law. In 1981, the General Accounting Office conducted a study of compliance by local systems with the requirements of the Safe Drinking Water Act. The requirements are principally of three types: To monitor supplies for the contaminants for which EPA has set standards; to report to the consumer if the standard is exceeded; and to take steps to come into compliance with the law—to treat contaminated water—if existing quality does not meet the national standard. GAO had a great deal to report.

The record of the drinking water program at the local level is a match for our experience at the national level of government. It is not a happy record. Violations are not in the hundreds. Violations are not in the thousands. Each year violations of the Safe Drinking Water Act by local public water suppliers number in the tens of thousands.

The failure of the program at the local level is in large part understandable. The operation of the water supply systems in most small towns is not a high-technology endeavor. There has been no revolution in the capacity of small communities to protect their water supplies from these new chemical contaminants. Water supply is public works. Many towns still don't charge consumers for water. Few small towns can afford to pay a water engineer fulltime to run the system. Management is quite often done by a volunteer who is not by training or inclination part of the theory of the Safe Drinking Water Act.

So the job did not get done in 90 days in 1974. And even with the amendments we report today, it will be a long time before we can say that the promise of the law—a safe drinking water supply for all Americans—has been fulfilled. Although the amendments we bring back from the conference are modest in scope when viewed in light of the public health challenge that we face, they do contain elements which we believe will bring the theory of the Safe Drinking Water Act closer to the reality of the human institutions which day to day administer its provisions—at all levels of government. There are six major elements to these amendments which I would like to review for my colleagues today.

SUMMARY

First, EPA is required to establish standards for a specific list of 83 contaminants within a 3-year period.

Second, the amendments establish a new benchmark based on best available treatment technology to be used by EPA in writing the standards that will facilitate selection of the appropriate numerical criteria.

Third, EPA is instructed to mandate filtration and disinfection, or steps equally protective of water supplies, as appropriate treatment techniques for all systems to remove contaminants including contaminants for which national standards have not been set.

Fourth, local public water supply systems will be required to monitor, not only for the contaminants for which standards have been set as required by current law, but also for a broad range of other contaminants, as well.

Fifth, significant programs of technical and financial assistance to small systems for conducting monitoring and implementing treatment techniques are authorized.

And sixth, the bill includes new programs to protect the ground water resources that are used by more than 40,000 public water systems to provide drinking water supplies to their communities.

Mr. President, that is a summary of the six major elements in the conference agreement. Working together they are designed to correct the problems that have prevented the drinking water law from fulfilling the promise that was made 12 years ago. I would now review each of these six elements of the bill in some detail so that members will understand the conference report and to elaborate on the legislative history of the more technical items.

the people at WDAY Radio know better.

Radio has moved from being a entertaining technological marvel to an integral part of our daily lives. WDAY has been a pioneer from the very beginning. Since 1922, it has been a station committed to quality. The days of crackling static and noisy studio audiences have given way to crystal clear signals, satellite technology and instant communication. WDAY continues to serve Fargo and the surrounding communities with outstanding reliability.

In another year, WDAY will be 65 years old. But I think I can say with some assurance that this venerable station will not be retiring. I look forward to another 64 years of fine programming and outstanding public service.

THE FUTURE OF ELLIS ISLAND

Mr. MOYNIHAN. Mr. President, the ongoing national debate about proposed restorations at Ellis Island has brought forth suggestions from every quarter, but, unhappily, not many solutions. There are a number of buildings on the island, all in a state of serious disrepair. The main building, through which some 12 million hopeful immigrants entered the United States, is now being restored. Few complain about the nature or intent of that effort.

But a great deal of argument does yet surround plans for what to do with the rest of the place. After considering the various possibilities, including the addition of a luxury hotel or a kind of ethnic museum and shopping mall, it becomes very clear that we need and ought not rush to construction. The fact is that we do not have any really good or comprehensive plan to restore the whole of Ellis Island. A recent New York Times editorial had it exactly right: "Until there's a very good plan, why not choose the final option, leaving the south section as is—what Interior officials call "the Fence"?

Mr. President, this is the answer. Let us wait a bit, until we can make a wise and sensible decision about how to make all of Ellis Island a place America can look to with pride. I urge the Senate to consider this editorial, and I ask unanimous consent that it be printed in the RECORD.

There being no objection, the editorial was ordered to printed in the RECORD, as follows:

[From the New York Times, May 18, 1986]

THE OTHER ELLIS ISLAND

Even as you climb ashore, 10 minutes from lower New York, it's clear that the great Ellis Island controversy arises from a great misunderstanding. Contrary to wide public impression, no one wants to desecrate or commercialize the vast brick temple through which 12 million people entered America. Far from it. The ornate red building is veiled in scaffolding, evidence of a loving restoration that will cost more than $100 million. By 1992, it will constitute a vast, evocative monument to the Golden Door.

Nevertheless, there's another Ellis Island, to the south, separated by a ferry slip and only narrowly connected. The north part is being restored without debate. All the argument concerns the south part. Few of the 12 million immigrants went there; it's the site of an abandoned hospital and two dozen crumbling contagious-disease wards. What should be done with these buildings and with this other island?

It was conflict over rival solutions in February that prompted Interior Secretary Donald Hodel to dismiss Chrysler's Lee Iacocca as head of an advisory commission. One plan sounded like tourist plastic: a smorgasbord of ethnic food counters, displays, dances. Another plan sounded perversely plush: a hotel and conference center, with overtones of hot tubs for the rich and famous.

Now the partisans seem to be moving toward a common ground. Mr. Iacocca sees merit in the newest conference-center proposal, which de-deluxes the original plan. This may also be the choice of the advisory commission and others who want the Other Ellis Island restored. It is probably the only option that can pay for itself.

There are appealing arguments for other options, like restoring the hospital but razing the small buildings—which are even now a ruin of rust and vines and broken glass. The quaint spitting sinks in the tuberculosis wards are cracking off alligatored walls. Rubble obscures the crematorium, morgue and mattress sterilizer. The idea is to tear all or most of this down and create a park here, facing the Statue of Liberty.

The flaw in such plans is that they cost money, money that is nowhere in sight. Mr. Iacocca's remarkable campaign is raising $265 million to refurbish the Statute and rescue Ellis Island North. With the drive almost finished and with Congress gripped by Gramm-Rudman fever, there's no other source of funds. To do no more than raze the buildings on the south section would cost $10 million. Saving some and creating a park ("Constitution Gardens," with international participation) would cost $40 million. Where would the money come from?

The conference-center plan, which would pay for itself, is by no means offensive. A facility run by universities that could host meetings of, for instance, the World Bank would not traduce tradition. In all, it is a pretty good remedy—and that is precisely its defect. Until there's a very good plan, why not choose the final option, leaving the south section as is—what Interior officials call "the Fence"? Restoring the north buildings will have already accomplished the principal duty, to recall and honor those who have made this a nation of immigrants.

To close the Other Ellis Island is to open possibilities for a later generation, one with a better plan and a stronger interest in paying for it. To settle for pretty good today clangs with dull defeatism. People willing to settle for pretty good would not have left Cork, Cologne and Catania to make the hard trip to Ellis Island and beyond.

SAFE DRINKING WATER AMENDMENTS CONFERENCE REPORT

Mr. DURENBERGER. Mr. President, I submit a report of the committee of conference on S. 124 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 124) entitled the "Safe Drinking Water Amendments of 1985", having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of May 5, 1986.)

Mr. DURENBERGER. Mr. President, I am very pleased to bring before the Senate today the conference report on the Safe Drinking Water Act Amendments of 1986. This marks the successful conclusion of what has been a long and difficult legislative process. The first version of these amendments was introduced in 1983. The Committee on Environment and Public Works first reported a bill at the end of the 98th Congress. The Senate passed its bill last May and it is only now that we are able to bring the conference report to the Senate floor.

I want to begin this morning by thanking each of the Senate conferees for their efforts to get this bill adopted. Senator BAUCUS who is the ranking member of the subcommittee where these amendments originated has been a constant coauthor and partner in the process. Senator STAFFORD, the distinguished chairman of the Committee on Environment and Public Works, has kept the drinking water bill near the top of the list of his own priorities which has made it possible to clear each of the hurdles from hearings to the conference report.

One of the most controversial elements of this legislation has been the ground water issue. Ground water is an extremely difficult subject. The great variation in ground water uses, resources, and problems across the Nation makes it almost impossible to find any national program, however modest, that can satisfy all interests. We think we have accomplished that in this bill. At least we make a start. And that would not have been possible were it not for the patience and active involvment of the other two Senate conferees, AL SIMPSON and LLOYD BENTSEN. It was easy for me to take a ground water amendment. But for these two Senators representing Western States, it was a tough road to follow. That we have all arrived at the same destination and that we are all in agreement on the ground water provisions of this conference report is a tribute to their legislative skills.

bases, will equal in numbers the Philippine military.

As presently constituted, the Philippine army is "not capable of defeating the insurgents," let alone of protecting the U.S. bases from unconventional attack. The base perimeters are supposed to be patrolled by the Philippine military, but crucial deficiencies in that coverage were exposed in September 1985 by a U.S. Senate subcommittee.

A second "Pearl Harbor," that is, a Soviet pre-emptive bombing from the Soviet-controlled Cam Ranh Bay and Da Nang of Subic and Clark (a mere two hours' flying time away) could wipe out logistical support for the 7th Fleet and the 13th Air Force.

Things are getting sticky in the Pacific. The USSR grows stronger in the area with each passing day, not only militarily but also politically, especially among the archipelagic island ministates in the South Pacific.

It's time for America to wake up.

ROMANIA'S "SPRING OFFENSIVE"

Mr. TRIBLE. Mr. President, in many warring countries around the world, the term "spring offensive" has a singular, significant meaning. It is that time of year when rainly seasons stop, skies clear, and the ground dries and hardens, paving the way for new ground and air attacks against one's opponent.

Each year in Romania, President Ceascescu wages a spring offensive of a different sort—one aimed at persuading the President and Congress into extending for another year Romania's most-favored-nation [MFN] trade privileges. President Reagan will make that decision soon, and true to form, Romania has embarked on a series of duplicitous gestures designed to prove it has finally seen the light on the question of human rights.

Last week, for example, Romanian authorities released a priest from prison. Constantin Sfatcu had been locked away behind Romanian prisons for years. But Sfatcu's only offense was that he resisted the regime's merciless attempts to persecute the Christian church in Romania out of existence.

In a land groaning under the weight of official oppression, a gesture such as Sfatcu's release is a welcome development. We can no doubt expect a few more like it in the weeks ahead. For Ceascescu has embarked on his annual campaign to preserve the MFN status that means hundreds of millions of dollars to his Government.

Every year, the script is the same. The U.S. decision on Romania's MFN status is made by the President in June. Several weeks prior to that, Romania takes a half step toward civilization. It refrains from destroying a church here. It releases a priest from prison there. It promises U.S. diplomats that such steps are the beginning of a new, enlightened era in Romania. Ceascescu swears that the human rights situation will improve, that churches will be free and Bibles plentiful. As a result of these glowing pledges, the United States again extends Romania's trade privileges.

And then, inexorably, the heavy hand of the Romanian state once more descends on the Christian church.

Once more, believers are harassed and intimidated by the state. Churches are threatened with destruction. Prison terms of incarcerated Christians mysteriously lengthen, and the oft-promised flow of Bibles and other religious materials never materializes.

When will we realize the true purpose of Ceascescu's annual courtship of the United States? Despite his annual promises, Ceascescu is a Communist, antireligious to the core. He will release just enough priests to retain his MFN benefits, but no more.

Those who believe otherwise may take comfort from the results of Romania's spring offensive, for one more priest has been freed. But if Romania's MFN is routinely renewed, the reprieve afforded religious believers will be short lived. The respite that arrives in May and June will dissipate by July. What then shall America do for Christians and other oppressed people in Romania?

The United States need not be a party to Ceascescu's deception. I urge President Reagan to recommend against renewal of Romania's MFN privileges. And I urge this Congress to quickly pass legislation I have sponsored that would suspend Romania's MFN status for 6 months.

For Christians and others suffering at the hands of Romania, the next several weeks are crucial. For us, the choice is a simple one. Will we once more rely on Ceascescu's empty promises, knowing that the result for Romania's Christians will be painfully brief respite from persecution? Or will we make clear to Ceascescu that his token concessions will not satisfy America's commitment to human rights and religious freedom?

A TRIBUTE TO HARRY PAUL LUDWIG

Mr. GLENN. Mr. President, I rise today to salute the memory of a distinguished Ohioan, Harry Paul Ludwig, whose untimely death May 6 brought sadness to all who knew and loved him. Harry Ludwig was born in McKeesport, PA and grew up near Akron, OH. He graduated from the University of Akron in 1968 and joined the U.S. Army. From May 1969 to May 1970 he served, with great distinction, in Vietnam as a platoon leader in the Army's elite Ranger corps. His exceptional bravery and courageous leadership under fire earned him numerous awards and decorations. As I read through his award citations, I was profoundly impressed by the description of a man who consistently placed the welfare of his men above his own personal safety, a man of exceptional professional competence and courage.

Harry Ludwig received the Silver Star, the Soldier's Medal, the Bronze Star Medal with "V" Device and two Oak Leaf Clusters, the Purple Heart Medal with two Oak Leaf Clusters, the Air Medal, the Army Commendation Medal with two Oak Leaf Clusters and "V" Device, the National Defense Service Medal, the Vietnam Service Medal with three Service Stars, the Vietnam Campaign Medal with 1960 Device, the Combat Infantryman's Badge, the Parachute Badge, the Vietnam Gallantry Cross with Gold Star and Palm Device, and the Vietnam Civil Actions Medal. This impressive list may well have earned Harry Ludwig the proud distinction of being the most highly decorated Ohio veteran of the Vietnam War.

After leaving the Army in 1971 Harry Ludwig joined the U.S. Secret Service, where he continued to serve with distinction until his death.

I offer my deepest sympathy to his family in their time of grief. I know that they feel his loss most keenly. But while he is gone now, he is not forgotten. He leaves behind a legacy of unbounded courage and devotion to duty. He leaves with us a sterling example of bravery, of natural leadership, and of selflessness. It is a proud legacy, and one in which I sincerely hope his grieving family and friends can find some small measure of comfort.

TRIBUTE TO WDAY

Mr. BURDICK. Sixty-four years ago, a new sound was heard for the first time over the prairies in my home State, a sound that has continued unbroken since May 22, 1922. On that day, radio came to North Dakota.

WDAY, based in Fargo, was the 53d radio station in the Nation—the first in the Northwest, and one of the first to broadcast west of the Mississippi. While the airwaves over Minneapolis were still silent, the people of Fargo were getting news, weather, music, and entertainment over the air. They also heard the occasional sound of bells from the old Fargo courthouse tower where the station first began its broadcasts.

Radio was a new technology in 1922. The sets themselves, homemade or purchased downtown, were cranky and unreliable. I remember straining to hear through the static, and feeling lucky if I caught half the words in any program.

Listening to radio was a novelty in the 1920's. It was a new form of entertainment and everyone loved it. Of course, there were those who said it couldn't last—just a passing fad. Well,

I hope, Mr. President, there will be a campaign in this country somewhere to buy a house for Dr. Bonner near her children in Massachusetts, and that such a house will become the symbol to the world that Dr. Sakharov is not free and does not live in that house.

I pray that someday soon Dr. Bonner and Dr. Sakharov can live in that house and that they will be able to plant the flowers of freedom there in freedom.

Mr. President, I fear very much for them now. I ask unanimous consent that an article from the New York Tribune on their likely future be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Tribune, Apr. 29, 1986]

BONNER FEARS SOVIETS WILL ISOLATE HER AND SAKHAROV FOR LIFE

WASHINGTON, April 29.—Yelena Bonner today accused Soviet secret police of falsifying videotape of her husband, Andrei Sakharov, and said Westerners should believe nothing Soviet authorities say about him.

She also said she believed Soviet authorities would put Sakharov and herself into total isolation when she returns home next month and may try to make them prisoners for life.

She said recent Soviet videotape of an apparently healthy Sakharov was faked, in one case using a 1984 scene of Sakharov eating huge mouthfuls of food to try to disprove he was on a hunger strike in 1985.

She spoke through an interpreter at a conference sponsored by the American Association for the Advancement of Science.

"I'm afraid that we will find ourselves in total isolation," she said. "The West will receive about us only falsified information.

She said Sakharov was concerned that Soviet authorities would attribute false statements to him and said he "asks that you never believe information" not confirmed by his family.

"Information on Dr. Sakharov is filtered through the KGB," she said. "Editing of the film has rendered it into an instrument of disinformation."

She called a statement in the film that Sakharov read *Time* and *Newsweek* magazines "another lie," saying he had not seen those magazines in 6 years.

She also said Sakharov's doctors fed him forcibly, tied him down and humiliated him.

"These were the words of his chief physician: 'We won't allow you to die but we will make a cripple of you'," she said through the interpreter.

She said limited sentences are sometimes turned into life terms by Soviet authorities and the interpreter said, "She said she believes this probably will happen to them."

She said she would return to the Soviet Union in less than a month, ending a 5-month trip to Italy and the United States for medical treatment and a visit with her daughter in Boston.

She had promised Soviet authorities she would not speak to the press during the trip but she began criticizing Soviet authorities at public appearances last month.

She said then that western reaction would determine how Soviet authorities would treat herself and Sakharov.

Although she said she expected total isolation, the interpreter said at the end of the session, "She believes ultimately we all will achieve the release of Dr. Sakharov."

Mr. WALLOP. Mr. President, the great Sakharov is under sentence of death—slow, inexorable, cruel and certain death. I wish our President had defied the advice of those timid souls around him and met with Dr. Bonner to honor Dr. Sakharov. I wish they had said that prisoners of conscience who exist are every bit as important to the world as prisoners of conscience who have been freed. He would have told General Secretary Gorbachev that we care about his cruelty and his country's broken promises to the world.

Mr. President, a country which cannot trust its own people cannot itself be trusted.

GRAVE SOVIET THREAT IN THE PACIFIC GOES UNNOTICED

Mr. WALLOP. Mr. President, Senator GOLDWATER and I recently brought to the attention of the Senate, in our statements in the RECORD in April in support of United States military sales to Taiwan, the dangerous growth of Soviet naval power in the Pacific, particularly in the straights of Taiwan. The Soviet naval expansion there is coupled with an increasing Soviet buildup of Soviet SS-20's in the Far East.

The overall Soviet buildup of its military power in the Pacific is alarming and now poses a grave threat to our national security and to that of our Pacific area allies. I urge my colleagues to pay close attention to this. It must not escape our notice until it may be too late to counter effectively.

For that reason, Mr. President, I ask that an excellent analytical article on Soviet military expansion in the Pacific by Arnold Beichman of the Hoover Institute, which appeared in the April 15 edition of the New York City Tribune, be reprinted in the RECORD to bring this dangerous trend to the attention of the Senate and the American people.

The article follows:

[From the New York City Tribune, May 15, 1986]

LITTLE NOTICE GIVEN TO GRAVE SOVIET THREAT IN PACIFIC

(By Arnold Beichman)

It is extraordinary how little public attention has focused on one of the major geopolitical phenomena of the century: the extraordinary growth of the Soviet navy in the Pacific.

The Pacific Ocean, which President Reagan has just overflown, is no longer mare nostrum ("our sea"), as it was after the defeat of the Japanese navy in 1945.

Public and media inattention to so historic an event is difficult to explain. After all, from World War II to the present, our politico-military problems in the misnamed Pacific area have been far greater and more costly in human life—Mao's China, the Korean war and Chinese entry, Vietnam, North Korea, Kampuchea, the Philippines—than in the Atlantic, where a relative peace has reigned on land and sea for more than four decades.

And it is also in the Pacific area that American business has found important market economy trading partners whose trade turnover with the United States is said to exceed that between the United States and the European Community.

The world's second-largest economy, Japan, living under a Soviet nuclear-missile threat, remains a staunch U.S. ally despite intensive Soviet "active measures" aimed at destabilizing that country and establishing a neutralist, non-aligned Japan.

While at the highest levels of the U.S. Navy there is confidence that in a U.S.-Soviet showdown the United States would prevail, there is no certainty that a USSR which in 20 years has doubled the size of its Pacific surface and air fleet, and which has thereby become a realistic threat to the ASEAN countries, would allow itself to remain permanently in a position of qualitative inferiority to the U.S. Navy. Experts on Soviet naval developments have pointed out that not only is the number of Soviet attack submarines increasing but that their quality is improving.

In addition, the Soviets possess the world's largest and most sophisticated inventory of naval mines, while U.S. Pacific fleet's mine, countermeasures today would be insufficient to deal adequately with even a limited Soviet mining effort.

According to Professor Alvin H. Bernstein, chairman of the Department of Strategy at the U.S. Naval War College, the buildup of Soviet forces in the Asia-Pacific region "shows no sign of abating."

Linked with the Soviet buildup is an increase in the number of SS-20 intermediate-range ballistic missiles in the Far East (one-third of the total Soviet force), and the likely introduction of the longer-range land mobile SS-X-25, which could threaten Australia. Last November, three new Soviet warships entered the Pacific Fleet—a nuclear-powered guided-missile cruiser, the Frunze, and two guided-missile destroyers—as an additional Soviet surface action group.

Writing in the spring issue of *The National Interest*, Mr. Bernstein says: "The quality of Soviet air and naval forces in the East can be expected to improve as well with the introduction of new tactical and strategic aircraft possessing more capable systems . . . and quieter, more operationally sophisticated submarines."

Bernstein does not envision any outbreak of hostilities in the Pacific. Rather he says Soviet developments in the Pacific "add up to an exercise in coercive diplomacy typical of a power that relies on long-term effects of fear to achieve its ends, the most immediate of which is probably to intimidate the regional powers into distancing themselves from the United States."

A more immediate target of Soviet military and naval exercises is Communist China, which recently observed a Soviet amphibious exercise only 100 miles from the Chinese border. The USSR is concerned about Chinese naval operations, particularly in submarine warfare training.

The most immediately serious problem for the U.S. Navy is Subic Naval Base and Clark Air Base, described as the largest U.S. military centers outside U.S. territory. Bernstein cites a recent CIA estimate that within three years the Communist New People's Army, which seeks U.S. ouster from these

have a matched sibling available as a bone marrow donor. Another 9,000 patients annually are diagnosed with diseases that could benefit from this treatment. Their only hope for receiving a potentially life-saving transplant must come from a matched, unrelated donor—if one is available.

In the event of a nuclear disaster, bone marrow transplants would become even more vital. Since many victims of a radiation accident would likely have been with their families at the time of exposure, matched siblings would probably have been radiated themselves, and would need bone marrow transplants as well.

The only way to prepare for this demand is to assure that a population of previously typed donors will be available. Throughout the country, there are several disparate registries of typed volunteers willing to donate if necessary. These are often formed by the families of patients who have become frustrated in their efforts to find unrelated donors.

So the pool of donors is out there, but we need a way to link them together. Experts say that in order to meet the transplant needs of our population, we will need a volunteer group of between 500,000 and 1 million people. Even if small registries could identify that many volunteers, sorting through them to find accurate matches would be next to impossible—especially under the sort of circumstances that prevailed at Chernobyl. The only effective long-term solution must be a single national registry, capable of providing numerous donors in a short time.

Mr. President, the U.S. Navy has launched a pilot project in this direction. I wish them well, and I look forward to the results of their efforts. I also want to commend the Senator from Nevada [Mr. LAXALT] for his work in establishing this effort.

But it is too early to tell whether the Navy project will work. Moreover, in the long run, I believe it is vital that we make a national bone marrow registry a top civilian priority. The Navy assures us that it would make donations available to the general public, and I am sure it would. But this is far too important to place solely under military authority.

A bone marrow registry is not just preparation for civil defense. We need it for other purposes, and we need to now.

Transplantation is perhaps the fastest moving and most exciting medical development in this country. We must do everything we can, in the spirit of the National Organ Transplantation Act, to promote this vital and life-saving technology.

DR. SAKHAROV AND DR. BONNER

Mr. WALLOP. Mr. President, I just came from the celebration in the House of Representatives honoring the 65th birthday of Dr. Sakharov. I heard a speech by his wife, Dr. Bonner, which I think may well risk her life. She made the statement that in the Soviet Union everyone lies—the press, the scientists, even the party lie to their own people, lie to the world, and she said she would never return were it not for her loved Dr. Sakharov and her obligation as a wife.

She said that Dr. Sakharov is in danger, and the West continues to ignore him. It is today that we honor the 65th birthday of one of the greatest human rights fighters of this century, one of the most courageous humans of this century, and one of the most morally grounded and gifted humans this world has ever known.

We must be saddened and angered that he remains in exile in Gorky in the Soviet Union where he is soon to be rejoined by his wife, Dr. Bonner, herself one of the great human rights fighters of this century.

Mr. President, we in the Congress had hoped that this might be a joyous occasion, one to celebrate Dr. Sakharov's freedom. As we know, I introduced legislation this spring to proclaim today as "Andrei Sakharov Honor and Freedom Day", and 29 Senators cosponsored this legislation. But because of the Judiciary Committee rules, and because of what can only be called a desire to be soft the Foreign Relations Committee practically blocked the Senate from any consideration of such a resolution. We worked long and hard to do it, and we wanted to send a clear message to the Soviet leadership, and to General Secretary Gorbachev that there is a price to be paid for their failure to live up to their own solemn promises made in international agreements on human rights. That agreement, like so many others, they simply comply with to their own convenience and ignore with impugnity.

I also sent a letter to the President requesting that he meet Dr. Yelena Bonner who is in this country on medical leave until May 24, and time runs short. Thirty-five U.S. Senators on both sides of the aisle signed that letter. We asked the President to meet Dr. Bonner to make a clear and unequivocal statement on behalf of prisoners of conscience who still remain in the Soviet Union. Despite the release of Anatoly Shcharansky, the continued internal exile of Dr. Sakharov and many others such as Orlov, Marchenko, and Nekipelov remains a statement on the Soviet leaders' unabated and evil denial of the basic human and civil rights of their own people, and of their utter disdain for the agreements they sign.

Mr. President, the most knowledgeable Soviet human rights activists point out that there can be no progress on human rights in the Soviet Union unless the leaders of the West send clear messages to the Soviet leader that he will be held accountable for his and his country's failure to live up to the promises made to the world in written agreements such as the Helsinki Final Act.

I find it inexcusable, as I noted in my April 29 special order on the floor on U.S.-U.S.S.R. nuclear fusion cooperation, that the United States should continue such cooperation with the Soviet Union while one of its leading nuclear physicists, and the father of their fusion research, Dr. Sakharov, remains in exile.

I raised this question in recent hearings in the Senate Energy Committee, and I will continue to do so until Sakharov is freed. Let the Soviet leaders be put on notice that we will keep the pressure on after his birthday ceremony is over. Dr. Sakharov and Dr. Bonner and all others will never be out of our thoughts and actions until justice is done.

Mr. President, I am particularly deeply saddened by the imminent departure of Dr. Bonner. She leaves her children, her aging mother, to rejoin her husband in intolerable unjust internal exile in the Soviet Union. Her courage and devotion are examples to lovers of freedom everywhere on this planet, and her courage moves me deeply. As I saw her surrounded by friends and people who wish she and her husband well, health and freedom, one knows that she is in effect going back to a death sentence unless we in the West can continue to monitor their existence and their well-being.

We must carry on Dr. Bonner's work for her when she returns to that exile and that isolation. We must stand up for the rights of the 13 million people—13 million—Mr. President, identified by Dr. Anatoly Shcharansky, who are in prison, who are in exile, who are in labor camps, who are in gulags because they believed in the principles and promises that the Soviet Government made when they singed the Helsinki accords. No birthday parties, no rallies, or gala concerts can substitute for the hard work we must do to help them and to achieve Dr. Sakharov's release as well as those of other Soviet prisoners of conscience.

□ 1210

I think, Mr. President, that rather than celebrating this day, Dr. Sakharov's 65th birthday, we should perhaps fast, because he is not free, because Dr. Bonner willingly is leaving our freedom to return to share that radical exile with her husband as a wife would.

EARTH'S GREENHOUSE EFFECT

Mr. GORE. Mr. President, I want to take this opportunity to discuss what I believe to be one of the most serious long-term environmental problems facing the United States and the World—the greenhouse effect. This phenomenon, which is the result of the buildup of atmospheric carbon dioxide and other trace gases, is causing a global warming that could have disastrous results, including the melting of glacial ice and an increase in the worldwide sea level.

Some scientists predict that the sea level may rise by as much as 1 foot within the next 30 to 40 years. The rise could cause an increase in both the frequency and extent of coastal flooding and erosion due to storms. As a consequence, buildings and roads in coastal regions would be damaged and beaches and marshes would be destroyed.

An article in the April 11, 1986 issue of the New York Times dramatized the drastic impact of the greenhouse effect, and the massive and costly dislocations it might produce. Two geologists proposed storing the excess water that would lead to sea level rise in inland basins before it reached the oceans.

Such a project would divert the flow of rivers around the world into large reservoirs, including the Caspian Sea and the Rocky Mountain Trench. The scientists contend that planning for these projects must be started now, so that they can be well under way in time to avert worldwide disaster.

The environmental and ecological consequences of this approach—not to mention the cost—would be considerable. But the prospect of having to disrupt the world's rivers just to keep our heads above water should illustrate the enormous potential for serious global consequences that the greenhouse effect possesses.

Mr. President, it is imperative that we explore measures to prevent and mitigate the impact of the greenhouse effect. If there is to be an effective global effort to address this major environmental problem, then all nations must coordinate their activities.

To address this problem, I have introduced Senate Concurrent Resolution 96. The bill calls for an international year of study on the greenhouse effect and would be the beginning of a long-term cooperative analysis by scientists from all over the world.

The legislation would first, coordinate and promote domestic and international research efforts on both the scientific and policy aspects of this problem; second, identify strategies to reduce the increase of carbon dioxide and trace gases; third, study ways to minimize the impact of the greenhouse effect; and fourth, establish long-term research plans.

The concept of an international year of scientific study has been used successfully in the past. One example is the 1957 International Geophysical Year, during which monitoring of atmospheric carbon dioxide was begun.

This legislation would provide us the information we need to predict and perhaps prevent the increase in sea levels. Nations and coastal communities will need more data in deciding what action to take.

The sooner we start planning for the future, the better it will be for all of us. In this case, unless we look ahead, the impact of the greenhouse effect may overwhelm us—leaving us as a nation with its finger in the dike while the water flows over the top.

Mr. President, I believe Senate Concurrent Resolution 96 will significantly improve national and international research coordination and cooperation. I urge my colleagues to support this legislation.

NATIONAL REGISTRY OF BONE MARROW DONORS

Mr. GORE. Mr. President, I would like to speak briefly about the growing need for a national registry of voluntary bone marrow donors.

The National Organ Transplant Act of 1984, which I sponsored, called on the National Institutes of Health to conduct a study into bone marrow donations and transplants. A year ago, NIH convened a technology assessment meeting to address the feasibility of a bone marrow transplantation registry.

The study has issued its report, and Mr. President, I am disappointed in its findings. The meeting suggested that we rely on local registries to type and identify potential donors. It advised against a national registry for unrelated donors.

Mr. President, I think the recent disaster at Chernobyl showed the world just how important bone marrow transplantation has become. Dr. Robert Gale heroically offered the Soviets his expertise, and may well have saved many lives.

But Dr. Gale's heroics were limited by the amount of bone marrow available for transplant. There is a tremendous and growing demand for bone marrow. Bone marrow transplantation is the therapy of choice for some 5,500 victims of aplastic anemia, leukemia, or congenital immune deficiency syndromes in this country each year. Four thousand of these patients will not

500 Midgetman missiles are deployed, the capability lost by dismantling the Minuteman III silos would be more than replaced.

10. Deployment of air-launched cruise missiles (ALCMs): For the United States to deploy the planned force of ALCM-quipped heavy bombers yet remain within SALT ceilings, this nation would have(to dismantle many Minuteman III silos under the Poseidon retention alternative or many Poseidon launchers under the Poseidon dismantlement alternative.

Several SALT ceilings compel dismantlement of existing systems as new ones are introduced. SALT I permits the United States to have 710 launchers of Titans and SLBMs; if this nation dismantles all its Titan silos, as is currently being done, it may deploy up to 710 SLBM launchers. As new Tridents enter the force and push the number of Titan plus SLBM launchers over 710, the United States can compensate only by dismantling Titan silos, the two Polaris submarines (which still carry SALT-accountable SLBM launchers but no SLBMs) that are in service as attack submarines, or Poseidon submarines.

SALT II limits launchers of MIRVed ballistic missiles to 1,200, and limits "MIRVed systems" (heavy bombers equipped for long-range cruise missiles and launchers of MIRVed ballistic missiles) to 1,320. Accordingly, either side can deploy 120 heavy bombers equipped for long-range cruise missiles without having to dismantle launchers of MIRVed ballistic missiles. If either side chooses to have more than 120 heavy bombers equipped for long-range cruise missiles yet remain within the 1,320 ceiling, it would have to compensate by having fewer than 1,200 launchers of MIRVed ballistic missiles.

The current U.S. plan is to deploy more than 120 heavy bombers equipped for long-range cruise missiles, as the following Defense Department statement indicates:

As part of the President's strategic modernization program, we modified 90 B-52Gs to carry cruise missiles; all of these are now operational. Additionally, beginning in 1985, we began converting our 90 B-52Hs to carry cruise missiles.[2]

Both of Poseidon retention alternative and the Poseidon dismantlement alternative, as projected in my April 24 memorandum, assume that the United States proceeds with the current plan to convert B-52HS to ALCM carriage, and that B-1Bs are converted to ALCM carriage as B-52G ALCM carriers are retired. In both projections, the United States exceeds 120 ALCM carriers, but remains within the 1,320 ceiling for MIRVed systems by dismantling some launchers of MIRVed ballistic missiles.

Specifically, under the Poseidon retention alternative, 130 Minuteman III silos would be dismantled through 1989, 74-76 to permit deployment of ALCM-equipped heavy bombers and the remaining 54-56 to permit deployment of additional Trident submarines. Even though ten Tridents begin sea trials after 1989, when the last Minuteman III silo is dismantled under the Poseidon retention alternative, no additional silos need to be dismantled. The number of ALCM-equipped heavy bombers reaches 196 (the level projected through 2000) in 1989, and Poseidon submarines must be dismantled thereafter first to remain within the 710 SALT I ceiling and then because of aging.

Under the Poseidon dismantlement alternative, for the period 1986-1989, as many Poseidon submarines are dismantled to permit additional ALCM-equipped heavy bombers as are dismantled to permit additional Tridents. After 1989, as with the Poseidon retention alternative, Poseidons are dismantled first to permit additional Tridents within the 710 ceiling, and later because of aging.

[2] U.S. Department of Defense. Annual Report, Fiscal Year 1987 (1986): 218. My projections for the no-SALT case, the Poseidon retention alternative, and the Poseidon dismantlement alternative show 194 B-52s equipped for ALCMs. The discrepancy between 194 and the 180 shown in the Defense Department statement results because the latter figure is for primary authorized aircraft, a measure that excludes about ten percent of the bomber force that is expected to be undergoing major repairs or maintenance at any time. The additional ten percent are SALT-accountable, however.

tlement alternative. My estimate of the additional cost, in millions of FY86 dollars, is as follows:

1. Additional Poseidon submarine refueling overhauls: 4 at $160 million each	$640
2. Operation and support for additional ship-years: 71 at $13 million per ship-year	923
3. Scrapping Minuteman III silos: 130 at $1 million each	130
4. Preparation needed to scrap Minuteman III silos	2
5. Minus savings from operating fewer Minuteman III silos: 1,751 silo-years (1986-2000) at $460,000 each	−806
Total	889

Notes (keyed to line numbers above).

1. Refueling overhauls. Estimating additional cost for overhauls under the Poseidon retention alternative as compared to the Poseidon dismantlement alternative requires calculating the number of additional overhauls required by the former alternative and the cost per overhaul.

The Navy's Legislative Liaison Office indicated that 13 Poseidons will require overhauls between FY86 and FY90 (and none thereafter) if these ships are retained to the end of their service lives, or seven overhauls if the Poseidon dismantlement alternative is followed. I have estimated additional overhauls the Poseidon retention alternative requires as follows: The Poseidon dismantlement alternative entails 188 ship-years from 1986 to 1998. (One ship-year is one ship in service for one year, whether the ship is at sea, in port, or being overhauled.) Keeping all Poseidons until the end of their service lives, with no dismantlement for SALT, entails 286 ship-years. The Poseidon retention alternative entails 259 ship-years. The difference between 188 and 259 is 72% of the difference between 188 and 286; applying this ratio to overhauls, 4.32 is 72% of the difference between 7 and 13. Thus the Poseidon retention alternative should require four more overhauls than the Poseidon dismantlement alternative.

Regarding cost per overhaul, Navy Secretary John Lehman indicated on April 16, 1986, in answers submitted to the Senate Armed Services Committee for the record, that a refueling overhaul for a Poseidon submarine would cost $150 to $170 million per ship. I use the average, $160 million.

Note that cost of dismantling the submarines is excluded from this table because all Poseidons would be dismantled by the end of 1998 under either alternative. The United States would delay incurring the costs of dismantling Poseidons, about $20 million per ship, under the Poseidon retention alternative; these costs would be spread more evenly over time in the Poseidon dismantlement alternative.

2. Cost of operation and support. A Defense Department information paper of March 31, 1986, indicated that annual operating expenses are about $13 million a year per Poseidon. The Navy's Legislative Liaison Office indicated that the Navy must pay almost as much during the two years a ship is in overhaul because most of the crew remains associated with the ship. For lack of a precise figure, I used $13 million for each ship-year. The Poseidon dismantlement alternative results in 188 ship-years from 1986 on; the Poseidon retention alternative results in 259 ship-years for that period, for a difference of 71.

3. Cost of scrapping Minuteman silos. The Air Force estimated, on a preliminary basis, that it would cost $1 million to render a Minuteman III silo non-SALT-accountable. No silos would be scrapped under the Poseidon dismantlement alternative, vs. 130 for the Poseidon retention alternative. Another 50 Minuteman III silos will be converted to hold MX regardless of the course this nation chooses on SALT; the cost of that conversion does not affect the present calculation.

4. Cost of preparing to dismantle Minuteman III silos. The Air Force estimates that it would cost $2 million to do the planning and contract preparation needed to dismantle these silos.

5. Annual operating cost of a Minuteman silo. The Air Force indicated that the FY86 operating and support funding for all 1,000 Minuteman silos was $460,393,000, including personnel, and that these costs probably could not be allocated by type of Minuteman. This analysis therefore uses $460,400 as the cost to operate a silo for a Minuteman III with a Mk12 reentry vehicle (RV) for a year. The Poseidon retention alternative would result in 1,751 fewer silo-years between 1986 and 2000 than the Poseidon dismantlement alternative. (One silo-year is one silo operational for one year.)

FORCE COMPARISONS

This section indicates the net advantages and disadvantages for the force structure of the Poseidon retention alternative as compared to the Poseidon dismantlement alternative. For items 1-6, I use RV-years (where one unit is one RV deployed for one year) to measure the differences. For example, deploying 50 MX missiles (10 RVs apiece) for 20 years yields 10,000 RV-years. For item 7, I use ship-years, as explained on page 2. Only measures concerning Minuteman IIIs, Titans, and Poseidons are compared here because they are the only systems assumed to differ in numbers deployed by year between the two cases.

1. Additional SLBM RV-years: 11,360. This measure counts each submarine-launched ballistic missile (SLBM) RV on a submarine that is in service for one year as one unit, whether the submarine is at sea, in port, or in overhaul. It subtracts SLBM RV-years for the Poseidon dismantlement alternative from SLBM RV-years for the Poseidon retention alternative.

2. Additional survivable SLBM RV-years: 6,248. This measure multiplies item 1 by 0.55, as each Poseidon is at sea for roughly 55 percent of its life, during which time the submarine is thought to be survivable.

3. Minuteman III RV-years lost, 1986-2000: 5,253. This measure aggregates the number of Minuteman III RVs lost each year, for 1986-2000, under the Poseidon retention alternative, which requires dismantling 130 Minuteman III silos as one means of complying with SALT. It excludes the 50 Minuteman IIIs removed to permit deployment of 50 MX missiles.

Minuteman III missiles armed with Mk12 RVs, the missiles whose silos would be dismantled, have some ability to destroy Soviet targets (such as ICBM silos, leadership bunkers, and communication facilities) hardened to withstand nuclear weapon effects. Two such RVs would have roughly 75% chance of destroying a target hardened to withstand 2,000 pounds per square inch (psi) of blast pressure, or a 50% chance of destroying a 5,000-psi target. For comparison, Poseidon RVs have a much lower explosive yield and much poorer accuracy, so have a negligible chance of destorying hard targets, while a single MX RV has about a 95% chance of destroying a 5,000-psi target.

4. Additional RV-years: 5,106. This measure subtracts item 3, plus the six Titan RV-years lost in 1986 under the Poseidon retention alternative, from item 1. It shows the gain in total deployed RVs from the Poseidon retention alternative as compared to the Poseidon dismantlement alternative.

5. Additional survivable RV-years: 5,723. This measure subtracts Minuteman III survivable RV-years lost by the Poseidon retention alternative from Poseidon survivable RV-years gained by that alternative. The measure multiplies item 3 by 0.1, the fraction of the Minuteman force that was expected to survive attack in the early 1980s (see FY82 Department of Defense Annual Report, p. 111), and subtracts the result from item 2. Presumably, Minuteman survivability would be even lower in the 1990s, assuming that Soviet ability to destroy silos continues to improve and that no effort is made to harden Minuteman silos further. This measure indicates the extent to which Poseidon retention increases U.S. ability to retaliate after absorbing a Soviet attack.

6. Additional alert RV-years; 333. Minuteman IIIs, operational Titans, and most at-sea Poseidon submarines are assumed to be on alert, ready for prompt launch. This measure subtracts item 3 (and the six Titan RVs operational in 1986) from item 2. It also subracts 656 Poseidon SLBM RV-years from the result to correct for the fact that Poseidon submarines based at Charleston, S.C., that carry the Poseidon missile must travel and long way to be within range of Soviet targets, while the other missile submarines (those carrying the Trident I SLBM, or the Poseidon SLBM but based at Holy Loch, Scotland) are within range of some Soviet targets while in port. It indicates that the Poseidon retention alternative and the Poseidon dismantlement alternative are just about equal in terms of U.S. ability to retaliate against non-hardened targets during an attack, assuming that Minuteman IIIs are launched on warning that an attack is in progress so none are destroyed by enemy fire.

7. Additional Poseidon ship-years; 71. One unit is one Poseidon submarine in service (whether at sea, in port, or in overhaul) for one year. The higher the number, the more submarines will be at sea, and the more difficult it would be for the Soviets to destroy them all.

8. Hard-target capability vs. survivability: The Poseidon retention alternative trades hard-target capability for survivability. It reduces the number of Minuteman IIIs deployed, as noted on page 7. On the other hand, it keeps substantially more Poseidons in the force than does the Poseidon dismantlement alternative until 1995, by which time newer systems with enhance survivability are expected to be deployed in quantity: the "Midgetman" small ICBM, the Advance Technology Bomber, and additional Trident submarines. In 1992, for example, the first year in which Midgetman and the Advanced Technology Bomber are expected to be deployed, the United States would have 23 Poseidons (vs. 30 now), as compared to 14 if this nation followed the Poseidon dismantlement alternative.

9. Permanent loss of Minuteman III silos: Under the Poseidon retention alternative, the United States would permanently forgo 130 Minuteman III silos and the right to convert them to hold MXs or to superharden them for MX, Minuteman, or Midgetman because SALT I and II forbid construction of new ICBM silos. The Air Force Office of Legislative Liaison indicated that current plans are to retain Minuteman II and III at least through 2000, and that there are no current plans to dismantle them after that time because of aging.[1] Dismantling 130 silos would sacrifice 390 RVs, 3.4% of that total RVs projected for 2000 under the Poseidon retention alternative, and perhaps 39 survivable RVs. This nation would thereby lose some prompt hard-target capability.

The loss of the silos would probably not affect future deployment of MX. In the Fiscal year 1986 Department of Defense Authorization Act, Congress prohibited the deployment of more than the currently-planned 50 MX missiles in Minuteman silos. Accordingly, this nation seems unlikely to deploy any MXs in Minuteman III silos that would remain after the first 50 MXs are deployed. If, as many anticipate, 50 MX and

[1] Telephone conversation, May 1986.

clear war. It is more than a gamble: It is an exercise in technological hubris which recent experience—whether with the shuttle or at Chernobyl—warns against.

Midgetman's total costs for research, procurement, deployment, and operation over a 15-year cycle might be about $45 billion for a force of 500 missiles; $45 billion is pin-money for SDI, whose research costs alone might rival this sum. As for the costs of a limited system—not the President's full-scale defense—we have yet to see any official estimates. And for good reason, since one must begin estimating those costs in the hundreds of billions of dollars.

Midgetman's dependence upon arms control is modest, amounting only to the preservation of SALT II limits. Its compatibility with arms control on the other hand, ought to be singularly high since it is a standard piece of modernization, following, rather than establishing any precedent. SDI, on the other hand, demands arms control of the most drastic kind, while creating conditions that work powerfully against any arms control at all.

In short, we have discovered the simplest, earliest, least cost, least risk cure for the problem of ICBM vulnerability; and it is the Midgetman, rather than some early form of SDI. What remains for SDI is its original role as an intriguing possibility in our long-term future; the role that most Americans still think SDI is serving; the role that its developers and enthusiasts have already abandoned.

And yet, Mr. President, why bother to argue all these issues, if SDI is already a fact of life? The reason for so doing is because we still have the ability to make choices about SDI which can mean the difference between its continuing as a force outside of, rather than in support of, rational efforts to prevent nuclear war. In a subsequent speech, I plan to discuss the requirements of such a transition.

SALT DISMANTLING

Mr. GORE. Mr. President, there has been a disquieting silence from the White House, concerning the President's decision in the matter of the SALT no-undercut policy. Weeks ago, the press carried accounts outlining in some detail what he intends to do—dismantle Poseidon submarines and possibly accelerate the Midgetman ICBM—and yet there is still no public statement. Clearly, what is going on is a struggle within the administration as to how this action should be characterized; and the outcome of that struggle is important.

If the President announces finally that he intends to dismantle submarine launchers because they are old and not useful, and that this should not be viewed as a SALT-related action, something will have changed in existing policy. Namely, the next time the question of dismantling arises—and it will happen this fall—the presumption will then be that the President will not order any further dismantling for the sake of SALT compliance. He may of course act contrary to that presumption, but not without seeming to reverse himself.

It is extremely unfortunate that the dismantling issue has been dealt with as an annual crisis, rather than as a long-term policy issue. I believe that the result has been to prevent us from approaching the problem as intelligently as possible; that is to say, we have not asked how best to take the necessary cuts because we have been consumed time and again by debate as to whether the cuts will occur.

In a speech in this Chamber on April 30, I presented materials prepared by the Congressional Research Service, in which the focus was precisely on the question of how best to dismantle. There was a very strong case, in that study, that from a long-term point of view, we should retain Poseidon submarines for as long as possible, rather than put them on the block first. If we want to maintain the largest inventory of survivable warheads for the longest possible time, it would appear that we should consider taking early cuts in Minuteman launchers.

Today, I wish to submit for the RECORD a followup analysis by the CRS which adds considerable detail to the earlier study, mainly in tems of estimating dollar costs of retaining Poseidons for as long as possible, while taking SALT-related cuts in other systems. Based on the calculations in this report, one would conclude that such an approach works out to our net advantage by almost $900 million.

This report is also notable because it makes an effort to focus attention on how dismantling might take place in order to accommodate the conversion of bombers to ALCM carriers, if that process takes us—as seems likely—well beyond the 120 bombers once thought to be the program limit. The right question to be asking is the one posed by the report: How should we best plan dismantlings as modernization proceeds?

Unfortunately, the issue this fall is still going to be whether dismantling will proceed at all. And, if the President frames his current decision in language which announces the end, rather than the continuance of his no-undercut policy, those of us who support arms control must redouble our efforts to conserve what there is, as the basis for better to come.

Mr. President, I ask unanimous consent to have printed in the RECORD a summary and some tabular material which details the weapons systems involved on both sides.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SUMMARY

This memorandum compares costs and force consequences of two alternative courses of action the United States could follow to remain within SALT I and II ceilings as new strategic systems are added. In the "Poseidon dismantlement alternative," this nation dismantles Poseidon submarines as the primary means of remaining in compliance with SALT; in the "Poseidon retention alternative," other systems are dismantled to delay Poseidon dismantlement.

The Poseidon retention alternative trades ability to destroy hard targets for survivability. It primarily sacrifices some ICBMs that have some hard-target capability but little ability to survive attack in order to retain more SLBMs having negligible hard-target ability but much greater survivability than ICBMs. Specifically, under the Poseidon retention alternative, the United States would dismantle 130 Minuteman III silos. These silos would be permanently forgone because SALT I and II forbid construction of new ICBM silos (but not the deployment of mobile ICBMs). The 130 Minuteman III missiles would carry 13% of the RVs on the ICBM force projected under the Poseidon dismantlement alternative for 2000. In exchange, the Poseidon retention alternative would temporarily retain more Poseidon SLBMs and submarines than would be the case under the Poseidon dismantlement alternative. This increase would last until the middle 1990s, when deployment of a new generation of strategic forces with enhanced survivability is projected to be well underway. The Poseidon retention alternative gives up 5,253 Minuteman III RV-years during the period 1986-2000, where one unit is one RV deployed on a Minuteman III for one year, to obtain 5,723 more survivable RV-years during the same period, where one unit is one survivable RV deployed for one year. (See pages 7-8, item 5, for calculation of this latter figure.)

The net cost to the United States of following the Poseidon retention alternative instead of the Poseidon dismantlement alternative is $889 million (FY86 dollars). Under the former alternative, the net annual cost of deploying each additional survivable RV beyond those provided under the latter alternative is about $155,000 ($889 million divided by 5,723).

Each alternative maintains about the same average number of RVs able to attack targets promptly during the period 1986-2000.

Attention has focused on an interservice aspect of dismantlement for SALT compliance: Should a Navy or an Air Force system be dismantled to permit deployment of a new Navy system? The Poseidon retention alternative would require dismantling some Air force systems (Minuteman III launchers) as Navy systems (Trident submarines) enter the inventory. But the converse situation could also arise. As ALCM-equipped heavy bombers that enter the inventory beginning in late 1986 compel retirement of ICBM or SLBM launchers, the Poseidon dismantlement alternative would require dismantling some Navy systems (Poseidons) as Air Force systems (ALCM-equipped heavy bombers) enter the inventory.

COST

The Poseidon retention alternative costs somewhat more than the Poseidon disman-

example to show how a $30,000 family is better off under the Finance Committee's proposal. However, if that same family in his example bought a modestly priced car, it would not see its taxes cut, but would actually experience a tax increase under the Finance Committee plan because the sales tax on that car would no longer be deductible.

Another example looked at a family making twice the amount—$60,000—but assumed the same amount of an IRA contribution as was assumed in the $30,000 example. If, however, the IRA contribution was doubled commensurate with the doubling of the income, then this $60,000 family in the example would not receive a $580 tax cut under the Finance Committee bill, but rather an $80 tax increase.

In the current environment of trains leaving stations, it is doubly important for the Senate to make sure that it deliberates carefully. I fully agree that the public wants tax fairness and tax reform. They are outraged, and properly so, about the fact that some profitable corporations and wealthy individuals have been paying little or nothing in taxes. We should have a tax reform bill which does away with this inequity.

But the need to do something does not absolve us of the need and the duty to ask questions which the public would like to have answered. Before we proceed, we should have answers available to be reviewed and analyzed.

Simply put, before we do anything else, we should know which Americans would pay more in taxes under the June tax reform bill, and which ones would pay more in taxes under the July tax bill which the budget resolution requires to reduce the deficit. Maybe my fears are misplaced. Maybe the tax reform bill won't lead to tax increases on millions of Americans. But the Senate has a right to know. And, of course, the people have a right to know before we are rushed to judgment.

□ 1150

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business for not to extend beyond the hour of 12 noon, with statements therein limited to 5 minutes each.

The Senator from Tennessee is recognized.

Mr. GORE. Thank you, Mr. President.

POTENTIAL HAZARDS AND COSTS OF SDI

Mr. GORE. Mr. President, in my preceding speech on the subject of the strategic defense initiative—the fifth in this series—I analyzed the implications of SDI for national security from the perspective of nuclear deterrence.

I had two objectives in that speech. First, to demonstrate that the relationship between defenses and offenses can be fraught with risk for the United States. Second, to get closer to the real nub of this issue, which is, whether SDI can do anything for national security commensurate with its potential hazards and costs. This second question will be the theme of my remarks today.

The first step in such a discussion must be to define terms; specifically, to make a statement about the purposes of SDI that is consistent with fact rather than rhetoric. The rhetoric, of course, is that SDI will lead to a highly reliable defense against virtually any conceivable nuclear attack directed at the cities of the United States and her allies.

It ought to be clear, however, that reality falls far short of this standard. Indeed, what we may expect of SDI is, essentially, a glorified ballistic missile defense system; differing from the old ABM programs mainly in that its major elements would be based in space. Put in these terms, the issue simplifies into an assessment of risk versus benefit for ballistic missile defense generally, and for placing such defenses in space as a particular approach.

The risks associated with ballistic missile defense have been well understood ever since the exhaustive ABM debate of the late 1960's. What we learned then applies now. While the motive for defending silos may be to improve stability by reducing fear of a successful first strike, there is another way to construe it, and that is as the basis for a first strike capability. Therefore, defending ICBM silos is—inescapably—a powerful stimulant for a dual arms race, in which defenses and offenses continuously scramble over each other in an endless search for equilibrium.

The fact that SDI proposes to place the major components of a defensive system into orbit, does not fundamentally alter its nature or implications. If anything, the shadows of an arms race are only deeper around a space-based defense, as compared to what we now call a "conventional" ballistic missile defense.

If it is true that the fundamental problems relating to missile defenses have not changed, it is equally true that the basic argument in favor of defenses is still with us: a cure for the vulnerability of land-based missiles. And who is to say that this is a negligible problem? Even those who believe that ICBM vulnerability has been wildly overstated are forced to concede its political importance, if only because it has bedeviled all our decisions about strategic nuclear matters for so long.

Anything that might resolve this problem is worth serious consideration. And were there no approach except missile defense, then it would be in order to consider the full range of possibilities, ranging from terminal defense, through conventional ABM defenses to SDI. But stubborn as the vulnerability issue may be, it has also begun to yield to conceptions that restore survivability without defenses and their side effects.

The first and foremost of these concepts is to mesh arms control and modernization in such a way as to make a successful first strike theoretically impossible for either side. This is the route proposed by the Scowcroft Commission, and its major elements are to encourage the de-MIRV'ing of ICBM forces in the long term, with the development and deployment of the Midgetman as a bridge to that outcome.

I have spoken here at other times about the concept of price-to-attack: a measurement of the commitment of weapons required to produce a given level of damage against strategic forces. The price-to-attack Midgetman must be reckoned in terms of a very large fraction of the Soviet Union's ballistic missile force; too large a fraction to support any rational plan of attack. Indeed, given the minimal warning time, it would require the entire Soviet arsenal to attack Midgetman.

Rather, the choice would almost seem to be to leave Midgetman alone, and concentrate on other targets instead. But such a decision would itself be deeply repugnant to anyone planning nuclear war; and it is precisely in the Midgetman's ability to enforce this kind of conflict—this irreconcilability among the essential elements of a first-strike—that its greatest merit lies.

The kind of SDI that we are being urged to build would also seek to deter a first-strike by raising the price to attack our ICBM force. And it is therefore fair to ask for a comparison of these two quite different approaches to the same problem.

By 1992, we can have begun the deployment of Midgetman, which raises the price to attack dramatically. By 1992, we can only have decided that we will attempt to deploy an SDI system at some point in the future.

Midgetman's ability to perform as required is a very sure thing, given the progress of the program thus far, and its reliance on technologies we understand very well. SDI's ability to perform as required is a complete gamble, given the exotic nature of the technologies, and the impossibility of ever testing the complete system except under the circumstances of actual nu-

The 234-page report was prepared by the nonpartisan OTA for the Senate Committee on Commerce, Science and Transportation and the House Committee on Science and Technology. The House Budget and Senate Appropriations committees also posed topics for the study.

"There is no compelling, objective, external case" for building a space station "to be used to support over 100 conceptual uses, fOw of which have been sharply defined or gained wide acceptance as important objectives of the Space program," the study says.

It does not oppose a space station, per se, saying "a persuasive case can be made for acquiring some long-term infrastructure in near-Earth space, some of which would allow a human work force to be retained there for extended periods."

President Reagan has made building a space station a national goal, and the space agency is deciding what such a facility, expected to cost about $8 billion in 1984 dollars, should include.

The report spelled out "kinds" of goals the nation should set: increase the efficiency of space activities and reduce their costs; involve the public; reap scientific, economic, social and political benefits; increase international cooperation; and "spread life, in a responsible fashion, throughout the solar system."

It suggested a number of objectives, such as a global warning system of potentially hazardous natural events; a transportation service from Earth to the moon and "a modest human presence" on the moon; medical studies of direct interest and short space visits by the public.

RECOGNITION OF SENATOR LEVIN

The PRESIDING OFFICER. The Senator from Michigan is recognized under special order not to exceed 5 minutes.

COMMENDATION OF SENATOR BUMPERS

Mr. LEVIN. First, Mr. President, let me commend my friend from Arkansas. He always hits the nail right on the head on this issue and it is the nail critical to keeping that horseshoe on, that is critical to keeping the horse going, which is critical to winning the battle, and which is critical to winning the war. I commend him for it. It is not glamorous stuff; it is critical stuff.

QUESTIONS ABOUT TAX REFORM

Mr. LEVIN. Mr. President, Within a couple of weeks, the Senate will be asked to turn to the tax reform bill reported out of the Senate Finance Committee. Much has been written about this bill. However, despite all of the discussion thus far, it seems to me that a number of fundamental questions have yet to be answered. The Senate is entitled to the answers to these questions before the debate begins—not during or after.

First, both the House and the Senate budget plans assume that revenues will be raised as part of the effort to reduce the Federal deficit. The Senate budget plan calls for raising between $35 and $46 billion over the next 3 years. By definition, a revenue neutral tax bill doesn't address the revenue requirements of the budget resolution. So my first inquiry is, "Where can this additional deficit reduction revenue come from and who is going to bear the brunt of it?"

There is a good deal of confusion related to this point. Senator DOLE and Secretary of the Treasury Baker recently indicated that the tax reform bill may generate a net tax increase for the first year or so—and they seemed to suggest that, somehow, those increased revenues would eliminate the need for revenue increases mandated by the budget resolution for that period. At the moment, according to a report in the Washington Post, House and Senate Budget Committee leaders are resisting that effort. They recognize that the tax reform bill is advertised as being revenue neutral. In other words, any extra revenue that the bill would produce in the beginning of the period analyzed would be offset by reductions in revenue in the end. Using a tax reform surplus to meet deficit reduction goals would be counting revenue twice. A merchant who sells the same item twice can get in trouble and so can the Congress if it double-counts its revenues.

Since there is no net revenue increase in the tax reform bill, we are still left with the basic question: Where will we get the revenue to fulfill the Senate's commitment to reduce the deficit? We can get it in only two ways: from individuals or businesses.

If this new revenue comes from individuals, what form will it take? Well, it probably will not be a rate increase—not when the attraction of tax reform was a 27 percent top bracket. Many people speculate that the budget gap can be filled through excise tax increases of one form or another. But that, for example, might mean that the working poor who are taken off the income tax rolls under the tax reform bill may find themselves paying almost as much, if not more, in increased excise taxes. After all, a 62 percent cut in income taxes for taxpayers making under $10,000 a year (as provided by the Finance Committee bill) sounds large, but averages out to only about $45. And it doesn't take too large an increase in selected excise taxes to extract more than $45 from an individual. The Congress will look mighty foolish if, in June, it proclaims as part of the tax reform bill that millions of people are getting their income taxes cut; and then in July as part of the reconciliation bill required by the budget resolution, it increases other taxes on some items they purchase. It isn't really fair to forget to tell those who are being offered the elixir of tax reform that it may have one heck of an aftertaste.

And if the tax increase needed to meet the budget targets falls on corporations, then that certainly decreases the appeal of the Finance Committee bill. After all, one of its compelling features from a business perspective was that it raised corporate taxes by a net of $100 billion instead of the $120 billion proposed by the President or the $140 required by the House bill. But if you add about $40 billion in deficit reduction taxes to $100 billion in tax reform taxes, businesses may not be as impressed.

Furthermore, a major business complaint about the Tax Code recently has been that it changes every year or so, making planning impossible. If the Finance Committee does not spell out how it intends to raise the revenues needed to meet the budget/deficit targets until after a tax reform bill is voted on, then business may have second thoughts about the whole package when the second shoe drops. Seeking continuity, the business community instead will have found the predictability of a roulette wheel.

The interplay between tax reform and deficit reduction is important. And that is why the Senate wisely decided on April 10, by a vote of 72 to 24, to consider deficit reduction before tax reform. It makes sense for the full Senate to know how the Finance Committee specifically proposes to do its part in meeting the Senate's top priority of deficit reduction, before we lock ourselves into divvying up new revenues in a tax reform bill.

The second basic question which it is essential to answer before we can have an informed debate on this bill is, "How many individuals will be paying more in taxes under this tax reform bill and who are they?" That is why I have asked the Finance Committee to provide the Senate with information before this debate begins on what percentage and what number of taxpayers per income group will be paying more in taxes under this bill and what percentage and what number will be paying less. As the bill has been described, it sounds like the only taxpayers who would be paying more under this bill are some wealthy taxpayers who have been sheltering all or almost all of their income from taxes. But if a significant number of middle-income taxpaying Americans will be paying more in taxes under the Finance Committee bill than under current law, then surely the Senate and the people should be aware of it. The Senate should not be stampeded into acting on a tax bill based on a leap of faith that it will not increase the taxes on a significant number of middle-income taxpayers.

For example, one of the chief supporters of the tax reform bill gave an

COMMANDERS LIST SHORTAGES

But the combat commanders have continued to deliver these warnings:

The armed forces lack enough aircraft and ships for a quick reinforcement of American forces in Europe, or for a rapid deloyment to the Persian Gulf or for contingencies elsewhere.

The forces lack stockpiles of ammunition to sustain them for the many months it would take American industry to produce munitions faster than they were consumed in battle.

High-powered weapons, such as supersonic fighter planes, would use up vast quantities of spare parts in combat. But industry would be unable to produce enough to replace parts as they are used up.

The services lack stockpiles of shoes, cold-weather clothing and other mundane items to carry on a long war.

Combat medical facilities could render immediate care to only three of every 10 men who might be wounded in battle. The Pentagon has drawn up plans for improving medical readiness but it will take five years for that to be carried out.

The combat commanders asserted that those weaknesses could be what they called "war-stoppers." If American forces ran out of ammunition, for example, the United States might have to stop fighting.

Although spending for the items in question has gone up under the Reagan Administration, it has not risen so much as spending for arms. From 1981 to 1985, the Administration obtained from Congress a 65 percent increase in spending for weapons—the budget for which was already greater—but a 49 percent increase for materiel to prepare and sustain the forces.

The commander of United States forces in the Pacific region, Adm. William J. Crowe Jr., told Congress in February: "Shortages of essential war-fighting items still remain to be addressed. These programs must be protected." He cited shortages of air-to-air missiles and 155-milimeter and 8-inch artillery ammunition, as well as spare parts.

Adm. Wesley L. McDonald, who commands American forces in the Atlantic, said that "correcting ordnance deficiencies is my No. 1 priority" in preparing units for sustained combat. He said downward trends had been reversed but "we still have a long way to go." Ordnance comprises arms, ammunition, and military equipment.

Gen. Paul F. Gorman, the Army officer who recently retired as commander of United States forces in Latin America, said the United States lacked enough forces trained for guerrilla warfare and counterinsurgency operations, intelligence gathering units and equipment, small boats and helicopters, medical support and logistics equipment, such as trucks.

EXHIBIT 3

AIR FORCE: NO NEED FOR STATION/MAN-IN-SPACE

There has been no change in the Air Force position that it has no need to use the Space Station being developed by NASA or to have a military man in space.

Asked in a Congressional closed-door session if the Air Force or any other armed service had defined any potential space station requirements since last year, Under Secretary of the Air Force Edward C. Aldridge replied:

"No, sir; we have not, but we have not stopped searching . . . [In late March] I wrote a memorandum to the Vice Chief of Staff of the Air Force asking him to set up a study between the Space Division of the Air Force and the Space Command of the Air Force to continue to look to see if there is something we could do to better define the Air Force role of man in space—Air Force man in space. We have not found that, we call it, 'the pearl,' for the use of man in space at this point, but we have not stopped looking."

Asked to give the DOD position on use of the station, he said:

"The DOD position was, and still is, that we see no militarily useful purpose for the NASA Space Station. In that position statement, we also explained that we would continue to study the potential utility of military man in space and possible use of the NASA Space Station for such things as research and development.

"Since taking that position, we have been studying our options as a user in more detail, and are nearly complete with an extensive study concerning the subject. We will be identifying the types of research and development activities which may be done on a space station within the next year."

STATION DECISION OVERRODE STRONG OPPOSITION

WASHINGTON.—President Reagan rejected strong opposition from the Defense Dept., intelligence community and Office of Management and Budget in his decision to commit the U.S. to deployment of a permanently manned space station within a decade.

Opposition in the Defense Dept. was primarily from Defense Secretary Caspar W. Weinberger and his staff. The Air Force and Navy said they have no current station requirement, but they do not specifically oppose the development.

Even after the President made the station decision, Defense opposition continued, and Weinberger wrote National Aeronautics and Space Administration head James M. Beggs to restate his opposition to the project. The basic Defense concern is that the project will drain development funding in general and dilute some space shuttle resources important to Defense space operations.

There is a view in the White House that the strong opposition from the Defense Dept. actually helped President Reagan make a favorable decision on the station goal. This is because the Administration's Defense Dept. budget already is receiving strong criticism. Had the Defense Dept. and intelligence community strongly supported the initiative, it could have exacerbated the situation with a high-visibility project.

By rejecting the opposition and developing the station for civil space objectives, the White House believes it was able to make a statement on the peaceful uses of space, although NASA will maintain a liaison with the Defense Dept. during the station program.

The White House has received input from numerous military officers supporting the station and saying they believe military station requirements will develop now that the Administration has committed to the project. Reagan also rejected strong opposition from the Office of Management and Budget, believing that the development expense was small compared with the national benefit that will be derived from the initiative.

During Beggs' initial space station briefing for the President and Cabinet, OMB Director David Stockman argued against the development as one additional program that would drive up the national deficit.

The President told Stockman that it was a good thing he was not there when King Ferdinand and Queen Isabella were considering whether or not to fund Christopher Columbus.

OMB continued to fight the program but was effectively silenced when at the end of a later budget session the President ended the meeting by saying he thought it would be a mistake not to approve the station development.

The strength of the President's commitment to the station as reflected in the wording of the State of the Union address continued to be an issue until just hours before it was delivered to a joint session of Congress.

Initially the wording was for just a "permanent" space station, forcing NASA to change some of its own documentation that read "permanently manned."

On the morning of the speech, however, officials supporting the station realized this and other ambiguous wording could be interpreted as less than full presidential support. They were successful in convincing the President to change the wording that had been prepared for him and to instead state specifically, "Tonight I am directing NASA to develop a permanently manned space station—and to do it within a decade."

PLANNED SPACE STATION UNJUSTIFIED, REPORT SAYS

The kind of space station NASA is planning cannot be justified on scientific, economic or military grounds, according to a study prepared for the congressional committees that control the country's space program.

Not just Congress, but the entire nation, ought to consider what the country wants to do in the second quarter-century of the space era, the congressional Office of Technology Assessment said in a report, "Civilian Space Stations and the U.S. Future in Space," published yesterday.

The space station envisioned by the National Aeronautics and Space Administration, the report said, "is only one alternative in a wide range of options."

Thomas F. Rogers, director of the two-year study, said the time has come for the general public to play a greater role in space program goals.

"We've been spending $7.5 billion a year, every year; we can do anything we want to do," he said. "It's great, it's exciting, but we're missing large numbers of important activities by allowing all this to go on under technological drive—not policy drive, economic drive, social drive, the way everything else is done in this country at that level of public expenditure."

NASA spokesman William O'Donnell said the agency would have no comment until it has studied the report.

The report characterizes the nation's goals in space as shortsighted and norrow, reflecting the views only of the science and technology communities and not of the general public, which foots the bills.

It asks, "How can the U.S. people and government justify, today, continuing to make such truly great and continuing public expenditures on space-related matters perceived by most of our general public . . . lying well outside of the mainstream of their personal interests and concerns . . . during an extended period of unusual national financial stringency?"

could be taken from American forces elsewhere.

In a third case, that of a counterinsurgency similar to the early days of the war in Vietnam, Mr. Korb asserted, "We would have no trouble with something like that." American forces have trained for counterinsurgency operations in Central America.

Mr. Korb said further that four million people, twice the number in the armed forces today, could be under arms in a matter of days by calling up reserves and recalling retired personnel.

But he acknowledged that, despite improvements, the armed forces were far short of the air and sea transport needed to carry reinforcements, new weapons, ammunition and spare parts to sustain American forces on distant battlefields.

SWITCH FROM CARTER STRATEGY

After the Reagan Administration came to office in January 1981, it adopted a military strategy fundamentally different from that of the Carter Administration. The change required a basically different policy on military readiness and the capacity to sustain forces in war.

The ability to sustain forces means having a stockpile of weapons, ammunition, food, fuel and other supplies that would enable a unit to continue fighting until American industry could produce enough to replace losses in battle. That capacity is usually measured in the number of days' supplies on hand.

THE CARTER ERA ASSUMPTION

In military policy, the Carter Administration assumed that a war with the Soviet Union would be fought with conventional arms for 30 days, then with nuclear weapons, and so ammunition and spare parts would be needed for only a month.

In contrast, the Reagan Administration has asserted that a nuclear stand-off is possible with a stronger United States deterrent. But the Soviet Union, officials reasoned, might then be tempted to war on the United States and its allies with its much larger conventional forces.

To deter Moscow, the Administration has set a goal of having all forces ready for combat on the first day of a war and the capacity to sustain battle until American industry could shift into large-scale wartime production.

Mr. Korb, who is Mr. Weinberger's senior adviser on readiness, said in the interview that the armed forces were ready for about 15 days of intense battle when the new Administration took over in 1981.

If a war in Europe on the scale of World War II broke out tomorrow, he said, "We would have enough to get involved, to deal with the situation and to buy us time to do all the other things we need to do." He referred to conscription and industrial mobilization.

"We could fight in Europe in a war as intense as the so-called Six-Day War with the supplies we have on hand, against a maximum threat, easily for a month," Mr. Korb said, referring to the war between Israel and Arab nations in 1967, which was notable for heavy firepower on both sides.

He said that by using older munitions in reserve stocks, such a war in Europe could be extended to closer to 45 days. "By the end of the decade," he said, that time "will be twice as much as we have now," assuming that funds were approved by Congress, many members of which would prefer spending for lucrative weapons programs in their home districts.

CONFIDENT ON SUPPLIES

If American forces are sent to the region around the Persian Gulf to protect the industrial world's oil sources, "they're not going to run out of ammunition within a month," Mr. Korb said, adding, "Longer than that, they'll take the materiel from someplace else."

"Assuming that you didn't have trouble in other parts of the world," he said, "you would be able to drain those stocks." Implicit in that assumption, however, is the danger of hostilities in two places, such as the Persian Gulf and Korea, at the same time.

While senior civilian officials and military officers in the Pentagon have focused on procuring new weapons for the future, field commanders have complained that they have been shorted on ammunition and spare parts to fight a war now.

Mr. Korb, who has been a spokesman for the field commanders in debates within the Defense Department, said that decisions to cut back on ammunition and spare parts as the military budget has come under pressure have been reasonably balanced.

NOT THE "EASY WAY OUT"

"We haven't taken the traditionally easy way out of budget cutbacks," he said. That way would have been to slice into mundane accounts for bullets and repairs rather than airplanes and tanks.

Mr. Korb, however, cautioned Mr. Weinberger in a memorandum in February that military readiness could become a public issue and added, "Any time one tries to simplify and summarize a subject as complex as defense readiness, he is vulnerable to challenge."

In the interview, Mr. Korb said that to expand the forces rapidly "we could get the people we have our hands on now within days." There are 2.1 million men and women on active duty and 1.5 million more in the individual reserves.

In addition, retired officers and non-commissioned officers under the age of 60 could be recalled to relieve active duty personnel at desk jobs. "We have retirees walking around with orders right now," Mr. Korb said.

CARGOES AND CAPACITIES

As for air and sea transport, Mr. Korb acknowledged, there is a long way to go. His staff said that in 1981 the armed forces had a capacity of 28 million ton-miles a day, the equivalent of moving 28,000 tons of cargo a thousand miles. That has been increased to 33 million ton-miles a day this year.

The staff said that airlift capacity was scheduled to reach 50 million ton-miles a day in 1990 but that the goal of 66 million ton-miles a day would not be reached until 1996. That capacity includes military aircraft and civilian planes used in emergencies.

At sea, the armed forces had shipping with a capacity of 3.1 million tons in 1961. By this year, that had increased to 3.8 million tons and was scheduled to reach 4.1 million tons by 1990. But the goal of 4.6 million tons would not be achieved until about 1996, the staff said.

FUNDS FOR MILITARY READINESS AT ISSUE

(By Richard Halloran)

WASHINGTON, May 21.—The military programs bill being debated in the Senate today would cut funds for military readiness despite pleas from operational commanders that such programs be protected.

Commanders who would be responsible for military operations have asserted that their forces already have deficiencies that would make it impossible for them to sustain a prolonged campaign fought with conventional arms.

The Senate Armed Services Committee has recommended that funds the Reagan Administration requested for operations and maintenance, a leading element in budget accounts that provide for readiness, be cut by $1.5 billion while the House Armed Services Committee has recommended a $1.8 billion cut.

Congressional officials said more cuts would most likely be made by each house since operations and maintenance, for which the Administration had requested $20.9 billion, have little support among Congressmen, who prefer weapon programs that bring money and jobs to their districts. The 1985 budget was $20.9 billion as well.

The operations account includes training, flying, steaming ships, practice ammunition and other elements that go into making forces ready for combat, plus pay for civilian employees of the Defense Department.

RELIANCE ON NUCLEAR WEAPONS

Other funds for readiness and sustaining a campaign are scattered elsewhere in the budget. An account of those categories is difficult until the legislation has been adopted and funds have been recalculated to show what has been allotted to readiness and sustainment.

The commander of American forces in Europe, Gen. Bernard W. Rogers, told Congress last week that the lack of capacity for sustained warfare in his command "compels the alliance to rely excessively on the early first use of nuclear weapons."

General Rogers said that even though the capacity of his forces had improved in recent years, his troops would be unable to sustain a conventional battle for long because they lacked "trained manpower, ammunition and war reserve materiel."

General Rogers was reflecting a theme that ran through the testimony of operational commanders when they testified earlier. They said that despite the $1 trillion spent on the armed forces since 1981, their forces have crippling defects.

DEFICIENCIES IN TRANSPORT

For instance, Gen. Wallace H. Nutting, commander of Army and Air Force combat units in the United States, singled out shortages of air and sea transport as a deficiency. "No matter how combat-ready our forces are," he said, "they represent a paper that is without the ability to rapidly deploy various crisis zones."

In contrast, Secretary of Defense Caspar W. Weinberger said in his annual report to Congress, "We are confident that we have achieved the level necessary to deter aggression today and, if necessary, to react effectively."

Similarly, the Secretary of the Navy, John F. Lehman Jr., testified, "The fleet is more ready to go in harm's way than at any time in recent peacetime history." He dismissed critics as "amateurs purporting to speak with authority."

The readiness issue arose last year when a report from the House Appropriations Subcommittee on Defense asserted that the armed forces could not sustain conventional combat. Mr. Weinberger denounced that as "not only wrong but dangerously wrong."

will somehow materialize in the future or that it is simply not important.

MYTHOLOGICAL JUDGMENTS

The problem with this practice is, if you gamble wrong, you lose a war.

There is an old saying among fighter pilots: "A fighter plane without munitions is just another unscheduled airline." Unfortunately, our own war-reserve planning is based on a series of mythological judgments that may be better suited to operating the world's largest airline instead of winning a war.

In a war, particularly a major war in Europe, our forces are certain to meet a massive number of enemy tanks. At last count, Warsaw Pact tanks outnumbered NATO tanks 2½ to 1. The Warsaw Pact has amassed 50,000 tanks and produces 3,600 more each year. The destruction of a certain percentage of these tanks by U.S. forces in a major war is allocated to the Air Force. The remainder of the task is left to the Army.

For the sake of illustration, let us assume that the Air Force must destroy a mere 10% of these tanks. A "probability of kill" (Pk) is assigned to various Air Force weapons to destroy enemy tanks—probabilities ranging as high as 0.85 Pk (i.e. once the weapon is fired, the assumption is that there exists an 85% chance the weapon will destroy its target). Thus the total number of Warsaw Pact tanks times 0.10 divided by 0.85 would provide a rough estimate of war requirements for a particular munition. From there, a procurement objective is established for the first 30 days and 60 days of a war.

With two exceptions the current Air Force munitions level, even calculated using such a loose set of assumptions as described above, does not approach even the 30-day war requirement. Some other rules of thumb that aren't considered include:

The probability of kill assigned to each weapon is almost always optimistic. The original claim for the Air Force's "Sparrow" missile was a Pk of 0.85. In operation it actually achieved a kill ratio an order of magnitude lower.

In the case of Air Force air-to-ground weapons assigned to kill tanks, the assumption that weapons will be fired only at tanks is a delusion. For every weapon fired at a tank it is probable that 20 will be fired at trucks, armored personnel carriers and other enemy vehicles.

During long storage periods of WRM, weapons "disappear." Faulty weapons and munitions that degrade over time and can be identified are often removed from the WRM stockpile and never replaced. After 10 years less than half of the original allotment may still exist.

Even the strongest advocates of high-tech weaponry and "smart" missiles will acknowledge that 20% to 30% of the weapons will not work due to an inherent complexity that increases their likelihood of failure. When war begins these weapons are worthless, and unfortunately cannot be identified beforehand.

Once a war commences, munitions will be lost at a tremendous rate—a factor also not considered in the calculations of WRM. These include munitions that go down with a lost aircraft or resupply ship, those lost when a base or depot is overrun by enemy advances, munitions stored in the Pacific theater while the war is in Europe and munitions lost in the chaos of war.

U.S. war planners are content to gamble on a high-stakes, winner-take-all, short-war scenario that risks lives and joepardizes the freedom of the U.S. and its NATO allies. Content with less than a 30-day supply of munitions, it seems our war planners must be operating from one of four assumptions:

There won't be a war. This is a wonderful hope, but a dangerous assumption. If our conventional-munitions stockpile is known to be inadequate, our policy represents the opposite of deterrence. In fact, it only makes war more likely since it is an invitation to attack.

There may be a war, but it's one we can win in just a few days. Some people believe a short, vicious blitzkrieg type of war is possible. Possible, yes. But if the Soviets win, we lose. If NATO forces could stop an initial massive Soviet armored thrust there would have to be a second, much longer and brutal campaign to regain our initial losses. With the Soviet's massive advantage in heavy armor, no serious observer believes that NATO would win a short war.

Losing a war is not all that bad an option. No one believes that losing Europe to the Soviets is an acceptable option. Today, the world industrial centers are the U.S., Japan, Europe and the Soviet Union. A new alignment in which Europe is enveloped in the Soviet Bloc would completely disrupt the balance of power.

We'll resort to tactical nuclear weapons when the going gets tough. This option, unfortunately, is all too real. However, it raises serious questions: Will the use of tactical nuclear weapons be allowed in Europe? If so, will their use escalate the conflict to the strategic nuclear level?

Assume for the moment that they will not be used. We then face the specter of embracing option three (losing Europe to the Soviets is an acceptable option) because, as is evident, our pitifully small WRM stockpiles surely do not support the pipe dream expressed in option two (we can win a major war in just a few days). "Use 'em or lose 'em" inevitably will be the driving philosophy as NATO starts to lose a conventional war.

Once tactical nuclear weapons are employed it is certainly a madman's guess as to whether their use can be contained or if one side will escalate into an all-out nuclear exchange.

These scenarios can be avoided. The U.S. and NATO have the resources to ensure an adequate WRM stockpile to deter and quite possibly win a conventional war in Europe if the Soviets attack.

In 1980 the Pentagon budget was $130 billion. Today, after five years of low inflation, that budget is now $300 billion. Yet our WRM stockpiles are still in sad shape. Only 4% of the Air Force's budget, 4% of the Army's and 5% of the Navy's are earmarked for munitions procurement.

The services currently are drafting and revising plans for their FY 1987 budgets. To date, the Air Force has comtemplated its needs and decided that 22% of its "cuts" to meet budget constraints should be applied to the paltry 4% of the budget dedicated to . . . munitions.

Even at that, cuts were not applied evenly across the munitions budget. The low-cost 30-mm bullet, the one truly proven and tested antitank killer, was zeroed out. Air-dropped cluster munitions, land mines and other simple munitions took cuts of about 50%. The remaining munitions budget was dominated by two weapons: the IIR Maverick missile and the Amraam radar missile.

Both of these weapons are enormously complex and expensive, and neither has ever passed a genuinely combat-relevant test. But spending for each system approaches a billion dollars a year. Funding of the Maverick was cut about 10%. Funding for the Amraam was actually increased more than 10%.

STRAIGHTFORWARD REFORMS

This week, Sen. Gordon Humphrey (R., N.H), chairman of the Preparedness Subcommittee of the Senate Armed Services Committee, will begin the first of four hearings to address the problem. Reforms in this area are fairly straightforward.

War-reserve munitions budgets for all of the services should be at least doubled. Also, allowances for munitions loss rates and inefficiencies must be included in future calculations of WRM requirements.

Furthermore, we should not purchase any munitions until they pass sufficient, strenuous testing in combat simulations.

And finally, the 30-day requirement for supply levels should be immediately replaced by a requirement to store enough munitions to last from the start of the war until industrial mobilization can sustain a prolonged conflict. This period is typically as short as six months, but could be as long as 18 months.

If the U.S. and its allies are not willing to initiate these steps through their armed services they will continue to walk hand in hand down a path that unnecessarily endangers the lives and liberty of free people throughout the world.

[From the New York Times, Aug. 25, 1984]

U.S. TROOPS TERMED ABLE TO FIGHT FOR 30 DAYS IN CONVENTIONAL WAR

(By Richard Halloran)

WASHINGTON, Aug. 23.—The Defense Department's senior official responsible for military readiness says American forces could fight in a conventional conflict of the intensity of World War II for at least 30 days with the supplies on hand, twice as long as four years ago.

The official, Lawrence J. Korb, also said in an interview, that the readiness of the armed forces and their ability to continue fighting would double again by the end of the decade, to 60 days, if Congress approved President Reagan's military budgets.

Mr. Korb, the Assistant Secretary of Defense for manpower, installations and logistics, provided the most specific defense of the Reagan Administration's posture on military readiness since the release of a critical staff report by the House Appropriations Committee a month ago.

That report, made public by a committee controlled by Democrats, contended that military readiness had declined, despite rising military spending, and that United States forces could not sustain combat against the Soviet Union or any lesser power.

Since then, Secretary of Defense Caspar W. Weinberger and other Administration officials have traded charges with leading Democrats over military readiness. Walter F. Mondale, the Democratic Presidential candidate, has contended that too much money has been spent on nuclear arms and not enough has been spent to make conventional forces ready.

CONFIDENT ON COUNTERINSURGENCY

In the interview Wednesday, Mr. Korb said American forces could sustain a war of the same intensity as the Korean War for 30 days in the region around the Persian Gulf. After that, he said, arms and supplies

more munitions than ever before, and the 1973 Arab-Israeli War, are factored in.

Ammunition types are divided into two categories: threat-oriented and level-of-effort ammunition. Threat-oriented ammunition, such as Pershing II missiles, are target-limited, so demand for ammunition is calculated by the number of rounds needed to defeat a specified number of targets. The level-of-effort category—rifle and cannon fire, for example—is assumed to be shooter-limited with demand contingent on the average number of rounds expended per shooter per combat day.

In event of a major war in Europe, the Air Force would be assigned a certain percentage of enemy weapons to destroy and the Army would target the rest.

But there are many gaps. Maj. Gen. Alexander K. Davidson, director of plans at Air Force headquarters, told a Senate Armed Services subcommittee hearing in December that munitions requirements for his service "are computed only for certain scenarios. Munitions required to support any other contingency operation must be taken from stockpiles developed for those particular scenarios."

The Air Force computer model figures the probability of kill for each of 3.5 million combinations of aircraft, weapon, target, weather and scenario. Other calculations follow and a munitions objective is established.

"The models don't take reality into account," insists Heubusch. "They ignore the fact that war is chaotic, that supply ships get downed, that sometimes you have to jettison supplies from an aircraft, that there are a lot of accidents."

Korb insists that the computer models used by the Pentagon "are the best the state of the art has." But Smith has called for reforms that would make allowances for such munition loss rates and inefficiencies.

The passage of Gramm-Rudman during the last frenetic days of the 1985 congressional session has introduced a new—and worrisome, to many—element into the calculations of future defense budgets. The historic law requires Congress and the president to eliminate the $200 billion federal deficit by 1991 and triggers massive spending cuts to achieve that goal. Democratic Rep. Les Aspin of Wisconsin, chairman of the House Armed Services Committee, predicts that Gramm-Rudman will cause future defense budgets to decline by 10 percent annually.

Despite a bleak outlook for ammunition funding, readiness and sustainability advocates are heartened by the increased attention being paid to the ammunition issue by some members of Congress. Smith recently aired his complaints on *The Wall Street Journal's* editorial page and Republican Sen. Gordon J. Humphrey of New Hampshire, chairman of the Senate Armed Services Subcommittee on Preparedness, has held hearings on the issue.

Meanwhile, Mandelbaum, the assistant director of logistics, says that because the United States is so far short of its long-term munitions goals, the Pentagon is currently "making an assessment of our capability, given where we are and where we can potentially go under realistic fiscal constraints."

[From the Baltimore News American, Nov. 3, 1985]

U.S. MUNITIONS STOCKPILE LOW

(By Knut Royce)

WASHINGTON.—The United States military's shiny new guns have no bullets.

After five years of record peace-time spending for state-of-the-art airplanes, ships and tanks, the Pentagon's munitions stockpile today might not be able to match what was dropped or fired in a month in Vietnam.

More worrisome, a fully mobilized industry would need nearly two years to catch up to wartime requirements. No one expects the United States to have the sustained buildup time it enjoyed in World War II or in Vietnam if Warsaw Pact nations suddenly invaded Western Europe.

Some U.S. Army units in South Korea have a three days' supply of ammunition to halt a North Korean invasion—but only if they carefully control their fire, according to a congressional study. Fighter pilots train for years without even launching a missile and NATO officials fear they would have to resort to theater nuclear weapons after the first several days of a Soviet bloc invasion.

The Army's Concept Analysis Agency, which reviews theoretical war models and projects requirements, annually—and vainly—recommends that the purchase of rockets, bombs, artillery shells and bullets be increased five-fold and that this level be usustained for five to 10 years, according to military sources.

That's the good news.

The bad news is that the problem might be getting worse. While Pentagon spending has been soaring overall, funding for conventional munitions hit a peak in fiscal 1982 but has been anemic ever since. The military, according to internal Pentagon records, expects low ammunition purchases through 1991.

Spending for tactical missiles has increased significantly, but because they are so costly, they are bought in far fewer numbers than conventional munitions.

Today, according to congressional, military and industry experts, America's munitions stockpile is only marginally improved from the late 1970s, when military readiness was at a low. This nominal growth is in sharp contrast to the enormous funding increases over the past five years for the weapon systems designed to shoot those munitions.

Underlying the problem, they say, is that, with the exception of the costly missiles, there is no constituency inside the Pentagon or in Congress to support the buying of bombs, bullets and rockets.

"There's nobody home in the Pentagon," said Ray Thorkildsen, who retired last year after 21 years in the Pentagon as a munitions specialist. "So a good part of the (munitions) community now calls me just to chat, to get advice, guidance and help. There isn't anybody over there (at the Pentagon) who advocates ammunition."

A Pentagon spokesman said that senior officials there would not comment on the military's munitions stockpile because they do not want to "upstage" testimony they will give Thursday before a Senate Armed Services subcommittee scheduled to hold hearings on the matter.

But Lawrence Korb, until recently the assistant secretary of defense for manpower, installation and logistics, agreed that the services often "lowball" munitions requirements. But he also points an accusing finger at Congress.

"Munitions didn't seem to have much of a lobby and they seemed to cut (funding) quite a bit at the Hill," he said in an interview. "It was comparatively easier to cut munitions as opposed to big weapon systems. If you canceled a big weapon system that was authorized, everybody would know it, whereas if you cut munitions, it was really hard to get a lot of people excited about it."

Sen. Gordon J. Humphrey, R-N.H., chairman of the Senate armed services preparedness subcommittee, which has jurisdiction over the funding for munitions and will hold Thursday's hearings, is alarmed by the consequences of this neglect.

"I don't want to scare everybody out of their wits," he said in an interview, "but we're simply unprepared in this area of conventional munitions. This area has been underfunded year after year, to the point that the Defense Department no longer asks for anything close to what it needs, so used are they to the (munitions) budget being slashed."

Korb, who was a respected bureaucrat, arrived at the Pentagon in 1981 with a Reagan administration breathing fire and brimstone at the military's lack of readiness to go to war and ability to wage it over a period of time.

The new administration promptly doubled from the previous year the fiscal 1982 budget request for Army ammunition (such as rockets, bombs, artillery shells and bullets) to $3.9 billion, and this was approved by Congress. Then the backslide began.

By 1983 Congress' ammunition funding for the Army dropped to $2.6 billion. It remained steady the next two years, but this year's funding is expected to be $2.1 billion.

The Army had planned for sizable increases in ammunition funding in the latter years of five-year plans.

Korb said that the administration's plan was to secure the hefty munitions buy in 1982, then "going very heavy in weapons procurement in 1983 and 1984, and then in 1985 going very heavy on munitions to support the procurement."

"But by the time 1985 came around, we were beginning to feel the (overall defense) cutbacks," he said.

[From the Wall Street Journal, Oct. 29, 1985]

RESTOCK INADEQUATE MUNITIONS RESERVES

(By Denny Smith)

The U.S. and its allies must build up their munitions stockpiles immediately. The need for such action is best demonstrated by recounting an incident during the 1973 Yom Kippur War. By day six of that war Israeli forces were close to running out of munitions. Without the help of an 11th-hour massive munitions airlift by the U.S., the Israelis would have been driven into the sea.

The lesson learned? Israeli war planning fell far short in establishing the proper level of war reserves. They, like the war planners of most Western nations, established a war-reserve requirement that is based on a huge gamble, a gamble that war would not come or that a war could be won in a few days.

Alarmingly, the U.S. is in precisely the same condition as was Israel prior to the Yom Kippur War, with one important exception. We have no one to bail us out.

Always present during times of fiscal austerity is the requirement of stretching a military budget. In this budget-stretching game, War Reserve Munitions (WRM) take a back seat to the procurement of glamorous, sophisticated and expensive weapons carriers. Our own Defense Department places the lion's share of money into the procurement of a relatively small number of expensive weapons platforms, and gambles on the notion that either sufficient WRM

private ammunition manufacturer. Adds a former Pentagon official, "Ammunition always takes second place . . . until you get into combat."

The shortage is exacerbated by the fact that the other NATO members have even less ammunition than the United States. In addition, some U.S. officials question whether in a general mobilization U.S. industry will be able to make up for years of neglect. "The capacity of the production base is well short of the mobilization requirement," Mandelbaum says.

Some officials—Republican Rep. Denny Smith of Oregon, for one—say the situation is actually much worse than it appears because the assumptions used to predict ammunition requirements are seriously flawed. "The [computer] models wildly understate the need," says Smith aide John Heubusch.

The deficiencies in munitions are longstanding and well documented. R. Joe Hammond, who served with the Army's ordnance division from 1950 to 1977, was so concerned about weaknesses in this area that he wrote a book about the importance of ammunition stocks and manufacturing capability. "With almost three-quarters of the 20th century as history, major historical 'lessons learned' have been promptly ignored," he wrote.

In 1983, a stinging investigation by the House Appropriations Committee concluded: "The Army has neither sufficient materiel and ammunition stockpiles now nor sufficient industrial surge capacity to equip the current force and sustain combat operations."

U.S. Army Gen. Bernard Rogers, the NATO commander, sent shudders throughout the alliance with repeated warnings that NATO forces would be able to repel the Warsaw Pact with conventional weapons for only a short time before they would have to escalate to nuclear weapons.

"They don't have enough conventional munitions to fight the war as long as may be necessary to keep it from escalating," agrees Lawrence J. Korb, former assistant secretary of defense for manpower, installations and logistics. Exact totals of U.S. and NATO war reserve stocks are classified. Korb, who is now vice president of corporate operations for the Raytheon Corp. in Washington, D.C., says the United States could fight an all-out war in Europe for 30 days.

But Heubusch, Smith's aide, says: "We have barely enough to last through a couple of weeks."

Critics of the administration's defense spending priorities cite many examples of ammunition shortages. The House Appropriations Committee study, for instance, found that the average fighter pilot at Langley Air Force Base in Virginia fires only one live missile every one to two years because training with live munitions has been scaled back. A Pentagon source said in an interview that stockpiles are insufficient to deploy the Army's AH-64 Apache advanced attack helicopter in combat with a full load of 30mm ammunition. "We'd run out after a few sorties." he predicts.

John Buchanan, a retired Marine Corps lieutenant colonel, says that during his career, the ammunition for "air weaponry was measured in days, in many cases, less than a week." Buchanan, now a senior analyst for the nonprofit, Washington, D.C.-based Committee for National Security, says the Marine Corps has no pre-positioned ammunition and plans to rely on Army supplies in the event of war. "That always does make you nervous," he says "The most important thing is to have ammunition on hand to be able to fight."

According to Congressional Budget Office Director Rudolph Penner, the United States spent $46 billion on munitions stocks between 1981 and 1985, and this has increased reserves significantly. Still, he says, "major gaps exist . . . between what the services have and what they say they need to meet a full range of possibilities."

Pentagon figures show that during the past five years Army stocks rose by 14 percent, the Navy's by 58 percent, Marine Corps' by 24 percent and the Air Force's by 62 percent. However, the Defense Department's own figures show that in 1982 this still left the Army with only 80 percent of its ammunition requirements, while the Navy had less than 30 percent, the Marine Corps about 45 percent and the Air Force just over 30 percent.

In the past, the Pentagon has projected that it could fulfill its munitions goals by the early 1990s, but some analysts fear that the timetable could be derailed by a Gramm-Rudman budget cutting mandate. "Under Gramm-Rudman, the first thing that would be cut is ammunition," says Buchanan.

During the last five years of extraordinary overall defense growth, funding for Army munitions accounts has been erratic. In fiscal 1982, Congress appropriated $2.38 billion for ammunition. But in fiscal 1983 and 1984, Congress only appropriated $2.1 billion and $1.98 billion, respectively. In 1985, that amount jumped to $2.6 billion, but declined again—to $2.49 billion—in 1986. In fact, while Army leaders are asking for increases in their total budgets, Brig. Gen. Guy P. Bowen, executive director for conventional ammunition for the Army, told Senate subcommittee questioners last October that his service plans to request $200 million less for fiscal 1987. Subsequent proposed requests for conventional munitions—not padded against inflation—call for $2.2 billion in fiscal 1988, $2.3 billion in 1989, $2.5 billion in 1990 and $2.6 billion in 1991. According to Korb, the Army itself has cut back on its sustainability goals, dropping the requirements for a 60-day supply of munitions by 1988 to a 50-day supply.

Funding for tactical missiles rose significantly over the past five years as the Air Force in particular, sought to equip the aircraft in which it invested heavily and which are now coming on line. But because the missiles are more costly, fewer numbers can be bought than other types of conventional munitions.

Smith, who is co-chairman of the congressional Military Reform Caucus, faults the Pentagon for lavishing its proportionally meager munitions budgets on many of the wrong items. He has criticized continued and, in some cases, increased funding for munitions that are costly, complex and untested in combat, while other, simpler, less expensive, proven items are neglected.

In particular, Smith criticizes significant additional investments in the IIR Maverick missile and the advanced medium-range air-to-air missiles (AMRAAM), which cost about $1 billion a year, and, yet, "have never passed a genuinely combat-relevant test."

Moreover, he charges that the Pentagon in its 1987 budget deleted funding for the low-cost 30mm bullet—which he calls "the one truly proven and tested anti-tank killer," while money for air-dropped cluster munitions and land mines was cut by about 50 percent.

The General Accounting Office (GAO) also has criticized munitions spending practices. Last year, GAO issued a report suggesting that $1.1 billion in Amry ammunition funds be rescinded because of technical problems, excess inventory, production delays or overstated costs. Defense experts say the GAO conclusions should not be interpreted as evidence that munitions budgets are too high, rather that the Pentagon has incorrectly allocated the money to certain items.

At the heart of the debate over ammunition stockpiles is the United States' wartime production capability. Some defense experts believe the administration is correct in investing more heavily in tanks, aircraft and ships because it takes longer to produce weapons than it does munitions. But others say that under current conditions it would take the U.S. production base—a combination of Army-operated plants, plants run by private companies under U.S. contract, and companies that make munitions and their components—two years or more to fully mobilize, a weakness that cripples the country's ability to respond quickly and decisively in the face of an attack.

Smith, for one, condemns U.S. war planners for being "content to gamble on a high-stakes, winner-take-all, short war scenario that risks lives and jeopardizes the freedom of the United States and its NATO allies."

A 1983 GAO study found that the U.S. munitions production base, with a replacement value of $23 billion, has a tremendous capacity and generally can supply the nation's peacetime munitions needs. But GAO also determined that the base lacks the capacity to produce much of the newer, more sophisticated ammunition required in wartime; it said that if war erupted, some facilities could not be fully used because of serious capacity imbalances.

GAO pointed to insufficient production capacity in 105 of the 311 munitions items considered critical to a war effort and predicted, "There does not appear to be any near-term solution to this problem."

Maj. Gen. Robert Molinelli, director of combat support systems for the Army, says that since 1970, the Army has spent $3.4 billion to modernize and expand the ammunition base. This has included construction of a new plant at Mississippi Army Ammunition Plant for production of 155mm ICM ammunition and 14 new TNT manufacturing lines at plants in Radford, Virginia; Joliet, Illinois; and near Chattanooga, Tennessee.

But this investment is far less than required. One Congress-initiated Army study estimated that necessary improvements to the production base would cost upward of $30 billion, but a congressional source says the total could run as high as $65 billion. The Army identified $175 million as the cost of priority work in 1986, but Congress cut that to $103 million.

How the Pentagon calculates munitions needs is extremely complicated and features significantly in the controversy.

Expected wartime ammunition consumption rates are obtained from computer wargame simulations. Variables used in the calculations include the particular scenario under which a war would develop, anticipated sizes of U.S. and enemy forces, theater of conflict, duration of hostilities, capabilities and vulnerabilities of weapon systems, and doctrine and tactics of opposing forces. Historical data, including statistics from Vietnam, when the United States expended

velopment, test, and evaluation for the Air Force the following amounts:

(1) Not to exceed $350,000,000 for the MX missile program.

(2) Not to exceed $50,000,000 for use by the National Aeronautics Space Administration in establishing a shuttle and expendable launch vehicle quality control and safety research program

TITLE III—PROGRAM LIMITATIONS AND RESTRICTIONS; REPORTS

MX MISSILE PROGRAM

SEC. 301. Funds appropriated to or for the use of the Department of Defense may not be used for procurement of MX missiles or for construction in connection with the MX missile program unless such funds were appropriated and made availabe for such purposes before the date of the enactment of this Act.

STRATEGIC DEFENSE INITIATIVE

SEC. 302. (a) Not more than $2,952,000,000 may be obligated or expended during fiscal year 1987 by or on behalf of the Department of Defense in connection with the Strategic Defense Initiative program.

(b) Not more than $317,000,000 may be obligated or expended during fiscal year 1987 by or on behalf of the Department of Energy in connection with the Strategic Defense Initiative program.

AQUILA REMOTELY PILOTED VEHICLE PROGRAM

SEC. 303. (a) Funds appropriated to or for the use of the Army for fiscal year 1987 may not be obligated or expended for procurement of the Aquila remotely piloted vehicle.

(b) Not more than $170,000,000 of funds appropriated to or for the use of the Army for fiscal year 1987 for research, development, test, and evaluation may be used in connection with the Aquila remotely piloted vehicle program.

ADVANCED MEDIUM RANGE AIR-TO-AIR MISSILE PROGRAM (AMRAAM)

SEC. 304. Funds appropriated to or for the use of the Air Force for fiscal year 1987 may not be obligated or expended for procurement of the Air Force's Advanced Medium Air-to-Air Missile (AMRAAM).

SPACE STATION RESEARCH PROGRAM

SEC. 305. Not more than $260,000,000 of funds appropriated to or for the use of the National Aeronautics and Space Administration for fiscal year 1987 may be used for research, development, test, and evaluation in connection with the Space station program.

TRANSATMOSPHERIC VEHICLE

SEC. 306. Not more than $50,000,000 of funds appropriated to the Department of Defense for fiscal year 1987 research, development, test, and evaluation may be obligated or expended in connection with the Transatmospheric Vehicle program.

ACCELERATION OF DEPLOYMENT OF D-5 MISSILES

SEC. 307. (a) The Secretary of Defense shall study the feasibility of completing by 1993 the backfitting of D-5 missiles into all Trident submarines that are currently fitted (as of the date of the enactment of this Act) with C-4 missiles.

(b) The Secretary shall submit a report to Congress, not later than January 10, 1987, on the results of the study referred to in subsection (a) together with such comments and recommendations as the Secretary considers appropriate.

SMALL ICBM PRODUCTION RATE

SEC. 308. (a) The Secretary of Defense shall conduct a study to determine the most practicable and cost-efficient production schedules available to the Department of Defense in connection with the small intercontinental ballistic missile program. In carrying out such study, the Secretary shall take into account all relevant factors, including economic, strategic, and mobilization factors.

(b) The Secretary shall submit to Congress, not later than July 1, 1987, a report on the results of the study referred to in subsection (a) together with such comments and recommendations as the Secretary considers appropriate.

TITLE IV—GENERAL PROVISIONS

ADVANCED TECHNOLOGY BOMBER PROGRAM

SEC. 401. (a) The Secretary of Defense shall submit to Congress, not alter than 90 days after the date of the enactment of this Act, a detailed report on the costs incurred by the Department of Defense previous to the date of the report in connection with the Advanced Technology Bomber (Stealth) program and the projected cost of the program over the next five years.

(b) The Secretary shall include in such report the feasibility and desirability of replacing all B-52 bomber aircraft with the Advanced Technology Bomber (Stealth) aircraft.

TITLE V—SPECIAL AUTHORIZATION FOR AUDITORS

SPECIAL AUTHORIZATION FOR AUDITORS

SEC. 501. (a) The Secretary of Defense shall employ such number of auditors, in addition to the number employed by the Department of Defense on May 1, 1986, as he determines necessary to conduct a careful and continuing review of spare parts purchases by the Department of Defense.

(b) There is authorized to be appropriated $10,000,000 for fiscal year 1987 to carry out the provisions of subsection (a).

EXHIBIT 1

[From the Wall Street Journal, Apr. 8, 1986]

LOGISTICS OFFICERS FRET THAT GRAMM-RUDMAN MAY HINDER U.S. MILITARY COMBAT READINESS

(By Tim Carrington)

TINKER AIR FORCE BASE, OKLA.—This sprawling archipelago of parts warehouses and aircraft workshops is the military's biggest logistics center, keeping thousands of warplanes and related systems ready for combat. But officers here are fretting that Washington will scrimp on the funds needed for military readiness.

The source of apprehension is the Gramm-Rudman deficit-reduction law. The fear is that the Pentagon, as it did during past budget crunches, will squeeze funding for maintenance, repair, training and transportation in order to insulate big dollar weapons programs from cuts. Already there are some early signs that today's budget pressures will hurt military readiness. Moreover, the threat that the U.S. arsenal will be less ready comes at at time when the president is using the military more often as a diplomatic and political tool around the world.

The fears appear to be well-grounded: Although the overall Air Force budget would grow by 7% under the Reagan administration's request for fiscal 1987, proposed funding for Air Force spare parts would drop 40% from the levels planned a year ago. Lloyd Mosemann, Air Force deputy assistant secretary for logistics, says, "I anticipate that we won't fund spares as completely as we did."

SPARE PARTS: THE AIR FORCE CUTS BACK

[In billions of dollars for fiscal 1987]

	Funding planned a year ago	1987 request
Initial spares	$1.1	$0.9
Replenishment spares	4.9	2.6
Total	6.0	3.5

ENGINE EXHAUSTION

"When you have a reduction in logistics money, you can't buy the spare parts to replace fuel controls, etc.," says Maj. Gen. William Bowden, commander of the Tinker logistics operation. "At some point, you end up with engine exhaustion."

Others offer more dire prognoses. "The U.S. faces the real prospect of entering the 1990s with shiny, new, high-technology forces that look impressive but cannot roll or sail or fly to where they might be needed," says the Committee for National Security, an independent research group, in a recent budget study.

Because it takes about two years for parts to be delivered, funding shortfalls today won't create noticeable readiness problems until about 1989. Nonetheless, here are early signs that such problems may be brewing:

The B-1, the Air Force's newest bomber, already faces parts shortages here at Tinker, where the planes will be maintained and overhauled. According to Gen. Bowden, this year's Gramm-Rudman cuts dipped into dollars earmarked for stocking up parts for the aircraft. "Gramm-Rudman will have impact on the B-1," he says. "We still have a lot of parts to buy for it."

EXHIBIT 2

THE MUNITIONS GAP

(By Carol Giacomo)

A U.S. artillery commander in South Korea recently told congressional investigators that he has a three-day supply of ammunition with which to ward off an attack by North Korean troops—a smaller amount than he would have fired in one day in Vietnam. To compensate for the shortage, U.S. and South Korean forces have been instructed to conserve their ammunition by limiting their rate of fire to a specified number of rounds per hour, the congressional investigators learned.

The artillery commander in South Korea is not alone. Combat officers in each of the services are increasingly being faced with a frustrating dilemma that is laden with irony: They have some of the newest and best weapon systems in the world, but not enough ammunition to adequately train their troops on the weapons or to send them into battle for more than a short time.

Ammunition budgets have actually increased since President Reagan took office in 1981, but not by enough to even come close to keeping pace with what the services need. "Our stockpile for most level-of-effort munitions are well short of our long term goal," Jay Mandelbaum, the Pentagon's assistant director for logistics, readiness and sustainability told Congress in December.

And now with the budget cutting ax and the specter of the Gramm-Rudman budget balancing law hanging over readiness accounts for fiscal 1987 and beyond, the situation is about to get much worse. "My company considers Gramm-Rudman to be a catastrophe for our defense buildup," say one

The GAO has recently reported that the cost estimate for the Aquila is $2.1 billion, almost four times higher than its $563 million estimate in 1979. Last August the Army confirmed Aquila's inability to acquire, track, and designate moving targets, or to navigate and fly for extended periods without updated information from its ground control station. And so last September the Army suspended all operational testing of Aquila.

At a bare minimum we should not be going into production right now on this system until we work out the technical problems. That's just commonsense. I also believe we should cut the goldpate-driven R&D funding and direct the Army to simplify its requirements and return to something more like the original concept. Accordingly, my bill zeroes production funding for the Aquila and halves the R&D request.

I would note in passing that by bill last year made a start on strengthening the role of the Chairman of the Joint Chiefs of Staff, a need recognized and acted upon in the BARRY GOLDWATER Department of Defense Reorganization Act. I was pleased to vote for that bill, which passed so overwhelmingly, and so I do not include last year's provision that sought to strengthen the Chairman of the Joint Chiefs of Staff and the Joint Staff more generally.

This bill also contains several provisions pertaining to three essential strategic weapons programs that I strongly support: the Trident missile and submarine, the advanced technology Stealth bomber, and the small ICBM. My bill asks the Navy to study the feasibility of accelerating the deployment of all our Trident submarines with the advanced D-5 missile by 1994. The D-5 will be as capable as the MX missile in terms of hard-target destruction capability, but unlike the MX it will be based on submarines and thus will be almost completely invulnerable to Soviet attack.

My bill also asks the Air Force to study the feasibility of replacing all 263 of our B-52 bombers with the advanced technology bomber, the Stealth bomber. According to press reports the Air Force plans to produce 132 Stealth bombers, primarily to replace just the 167 G models of the B-52. My bill directs the Secretary of Defense to examine the feasibility and desirability of replacing the additional H model B-52's with Stealth bombers. It also directs the Secretary to report to Congress a report on the costs of the Stealth program.

This bill directs the Secretary of Defense to study the desirability of different production rates for the small ICBM. The small ICBM, unlike the MX, will be highly survivable because it will be mobile. In the past the United States has usually bought its ICBM's very quickly and then closed down the production lines. There is no doubt that this is probably the cheapest way to do it, but there are other considerations that may suggest that production be stretched out. It may well be important to maintain a warm production line on ICBM's to give us response options if the Soviets greatly expand their forced deployments beyond what we project as likely. This could also give the Soviets added incentive not to break out of the numerical limits of arms control agreements.

Mr. President, it is more urgent than ever that we meet the real defense needs of our country. This bill is just a small, but I believe signficant step, in the direction of a stronger, and smarter, national defense. I urge my colleagues to give it their serious consideration.

I ask unanimous consent that the full text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2480

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "National Defense Enhancement Act of 1986".

AUTHORIZATION FOR SPECIFIED PROGRAMS

SEC. 2. Funds authorized to be appropriated in this Act for fiscal year 1987 are for specified programs and, unless otherwise specifically indicated, are in addition to any funds which may be authorized to be appropriated for other programs, projects, and activities of the Department of Defense for fiscal year 1987 in any other Act.

TITLE I—PROCUREMENT

ARMY

SEC. 101. Funds are authorized to be appropriated for fiscal year 1987 for procurement for the Army as follows:

(1) For spares and repair parts for aircraft, $1,198,300,000.

(2) For the Multiple Launch Rocket System (MLRS), $574,400,000.

(3) For the Stinger surface-to-air missile program, $469,600,000.

(4) For the TOW missile program, $190,700,000.

(5) For missile spares and repair parts, $319,600,000.

(6) For the M198 Howitzer (155mm, towed) program, $43,700,000.

(7) For 5-ton trucks, $130,000,000.

(8) For the diesel forklift truck program (6,800 pounds), $36,700,000.

(9) For spares and repair parts for tracked combat vehicles, $696,200,000.

(10) For ammunition, $2,727,100,000, of which not less than $74,800,000 shall be available for the 2.75 Hydra-70 rocket program.

NAVY

SEC. 102. Funds are authorized to be appropriated for fiscal year 1987 for procurement for the Navy as follows:

(1) For spares and repair parts for aircraft, $2,272,300,000.

(2) For aviation support equipment, $1,138,300,000.

(3) For the AIM/RIM Sparrow missile program, $311,000,000.

(4) For the AIM-9L/M Sidewinder missile program, $105,100,000.

(5) For the AGM-84A Harpoon missile program, $220,500,000.

(6) For the AGM-88A HARM missile program, $272,200,000.

(7) For the SM-2 MR missile program, $534,200,000.

(8) For MK-48 ADCAP torpedo program, $627,400,000.

(9) For spares and repair parts for weapons, $286,400,000.

(10) For ordnance support equipment, $1,358,300,000.

MARINE CORPS

SEC. 103. Funds are authorized to be appropriated for fiscal year 1987 for procurement for the Marine Corps as(follows:

(1) For the Hawk missile program, $147,600,000.

(2) For the TOW missile program, $46,700,000.

(3) For the Stinger surface-to-air missile program, $100,000,000.

(4) For the M198 Howitzer (155mm, towed) program, $57,000,000.

(5) For the M-16 rifles, $8,700,000.

(6) For spares and repair parts, $85,100,000.

(7) For ammunition, $627,300,000, of which not less than $5,000,000 shall be available for the 2.75 Hydra-70 rocket program.

AIR FORCE

SEC. 104. Funds are authorized to be appropriated for fiscal year 1987 for procurement for the Air Force as follows:

(1) For spares and repair parts for aircraft, $3,835,100,000.

(2) For the AGM-88A HARM missile program, $585,400,000.

(3) For spares and repair parts for missiles, $434,200,000.

(4) For munitions and associated equipment, $2,192,500,000, of which—

(A) $321,600,000 shall be available only for CBU-89 Gator anti-tank munitions;

(B) $114,200,000 shall be available only for Durandal runway bombs; and

(C) $52,100,000 shall be available only for 2,000-pound high explosive bombs.

(5) For long lead items for new photoreconnaissance satellites, $100,000,000.

RESERVE COMPONENTS

SEC. 1105. Funds are authorized to be appropriated for fiscal year 1987 for procurement for the reserve components of the Armed Forces as follows:

For the Army National Guard, $158,500,000, of which—

(1) $50,000,000 shall be available only for Stinger missiles and necessary launchers;

(2) $60,000,000 shall be available only for the Multiple Launch Rocket System (MLRS) and necessary launchers;

(3) $28,000,000 shall be available only for M-113A3 Armored Personnel Carriers;

(4) $10,200,000 shall be available only for AN/PRC-104 radio sets;

(5) $9,900,000 shall be available only for AN/GRC-193A radio sets; and

(6) $3,400,000 shall be available only for AN/GRC-213 radio sets.

For the Air National Guard, $171,000,000 for C-130H Program.

TITLE II—RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

AUTHORIZATION OF APPROPRIATIONS

SEC. 201. There is authorized to be appropriated for fiscal year 1987 for research, de-

yet here we are spending well over $20 billion so that by the 1990's just 1 missile of the 50 we are going to deploy can survive. We are going to pay over $20 billion for one surviving MX missile, even though we are spending billions on the highly survivable Trident II D-5 missile that will be available in just 3 years. We also are funding research on the small ICBM, which is truly mobile and will be able to survive a Soviet attack, unlike MX. These are the missiles we should be putting more emphasis on, and which I strongly support.

So my bill proposes to delete all MX production and military construction funding and cut the R&D in half. At the same time, it directs the Navy to plan on backfitting the Trident II missile into existing Trident submarines at a faster rate.

We certainly need to improve our air-to-air capability, and I support the basic rationale of the AMRAAM missile. But we need to buy it if it works at a price we can afford, and know that it will work. But it makes no sense at all to go into a heavy production schedule for AMRAAM when it has only completed a very few of its test flights. Defense Secretary Weinberger certified the AMRAAM ready for production in March when only four tests of AMRAAM had been conducted, none of them operational. The director of operational test and evaluation at the Pentagon, former test pilot Jack Krings, certified last December that "there is a low probability of adequate test results being available for an operational capability forecast before March certification." I ask unanimous consent that a memo from the Mr. Krings to Secretary Weinberger be printed in the RECORD.

There being no objection, the memo was ordered to be printed in the RECORD, as follows:

OFFICE OF THE SECRETARY OF DEFENSE,
Washington, DC, December 17, 1985.

AMRAAM SPR

I. SUMMARY

There is a low probability of adequate test results being available for an operational capability forecast before March certification.

II. BASIS

1. Test information gathering rate suggests very limited useful data will be available for March certification.

2. Progress in testing is hampered by missile hardware availability, software development and limited test assets.

3. The key test asset, the ACE 2 POD fits the F16, has AMRAAM size/type hardware and necessary software for three (Stage 3) missile shots. It is 5-6 months late and has not been successfully flown. We are still three missile test flights away from the level of data planned at certification time.

4. Three test firings have been accomplished to date: unplanned test problems requiring repeated tests precluded accomplishment of all scheduled events. This and continued normal test problems will typically accumulate re-test events. This compounds schedule slipping.

5. Testers are successfully controlling tests insuring tests requirements are achievable before expending valuable limited tests assets.

6. There is little realistic potential for acceleration and schedule recovery.

III. SUGGESTIONS

1. A realistic schedule showing "expected" not "possible" test progress is needed to properly prepare for the March certification.

2. HAC/USAF program and test management has been suspect in the past. Little progress through additional manpower/funding increase is possible. Remember AMRAAM is only 5% of HUGHES BUSINESS.

JACK.

Mr. BUMPERS. The Packard Commission on Defense Management said it exactly right in their interim report to the President:

The proper use of operational testing is critical to improving the operational performance of new weapons. We recommend that operational testing begin early in advanced development and continue through full-scale development, using prototype hardware. The first units that come off the limited-rate production line should be subjected to intensive operational testing and the systems should not enter high-rate production until the results from these tests are evaluated.

The fact that operational tests on AMRAAM have not been conducted means that it is premature to begin production on it. Accordingly, my bill permits full funding of research and development of AMRAAM but denies money for any production. Let's be sure this missile works at a cost we can afford before we sink billions into it. I would note in passing that my bill last year proposed cutting all production funds for the notorious DIVAD gun, which had failed its tests miserably. I am pleased that even though Congress couldn't muster the courage to kill the DIVAD, Secretary Weinberger killed it, and I applaud his action.

My bill also holds the growth in funding for the space station to 25 percent and the space plane to 100 percent. I believe that the space station is a logical step for us to take in our space program. But is is unwise to force this step before we are ready to take advantage of it. No less than the National Academy of Sciences, and many other prestigious scientists, are saying that it is too soon for the space station, that we still have not fully taken advantage of the space shuttle and its special spacelab package. The Air Force has testified that it has no need of the space station; I ask unanimous consent that an article from Defense Daily entitled "Air Force: No Need for Station/Man-in-Space," another entitled "Station Decision Overrode Strong Opposition" from Aviation Week and Space Technology and a third article on the OTA study appear in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BUMPERS. Our own Office of Technology Assessment has concluded that the type of space station that NASA is planning cannot be justified on scientific, economic, or military grounds; I ask unanimous consent that an article from the Washington Post entitled "Planned Space Station Unjustified, Report Says" appear in the RECORD at the conclusion of my remarks. Furthermore, White House Science Adviser George Keyworth was an early critic of the space station and said in February 1983 that such a manned facility would be a most unfortunate step backward.

In addition, the space station is critically dependent on the space shuttle, whose availability for nonmilitary missions has been seriously set back. At a time when our military readiness is suffering, and we are having difficulties in putting anything into space, I think that a more deliberate pace for the space station, with a 25-percent increase in funding, is appropriate.

The administration has proposed a huge 400-percent increase in funding for research on the space plane, from less than $50 million in fiscal year 1986 to $200 million in fiscal year 1987. Again, I do not question the need for some basic research on this advanced concept, but it is clear that the pace and scope of this program is being driven by the need of star wars to find a cheaper way to deliver the huge amount of equipment it will entail into orbit around the Earth.

The space plane has been dubbed the "Orient Express" by the President, trying to emphasize the potential of an incredibly costly civilian version of this plane to transport millionaire passengers to Tokyo in 2 hours. However, its star wars orientation is clear: The SDI Office is putting up more funding for it than NASA is, $685 million for SDIO versus $600 million for NASA, out of a total program cost of $3 billion. Again, at a time when we are shortchanging our military readiness, I think holding the space plane to a 100-percent funding increase for fiscal year 1987, as my bill does, is not too much to ask.

The Army's Aquila is a classic tale of Pentagon goldplating. Originally the Army sought to develop a cheap, remotely piloted vehicle [RPV] that could provide useful battlefield information to field commanders. The Israelis have done this very successfully with their Mastif and other similar RPV's. Their success in Lebanon with RPV's is legendary in military circles. But unfortunately the Army took this good, simple, basic concept, and started laying more and more requirements on it, until now we have a program that is behind schedule, above cost, and having technical difficulties.

nized. The Army plans to buy a wide variety of trucks, including the 5-ton truck. But while tanks and planes get what they need, even the commanding general of the Army's Tank Automotive Command, Maj. Gen. Arthur Holmes, says trucks are considered one of the Army's most critical shortfalls. Today the Army is 27 percent short of its requirement, and current projections of new purchases and retirements show that the shortage will improve only very slightly by 1989, when we will still be 23 percent short. Accordingly, my bill provides $130 million to buy an extra 1,250 of these trucks.

The other 12 percent of the equipment provided for in my bill are mostly of the same sort: unglamorous but essential ingredients for a strong defense posture, things like: 2.75-inch rockets, armored personnel carriers, improved radio sets, C-130 transport planes, and multiple launch rocket systems for the Guard.

My bill also provides $10 million to hire additional auditors to review spare parts purchases to reduce the likelihood that we will pay exorbitant prices for simple parts. Our spare parts pricing situation is a national scandal that is eroding popular support for our defense program. These auditors will more than pay their way in terms of reduced costs for spare parts.

In the last few months we have been both saddened and upset at the string of rocket launcher failures that our space program, both military and civilian, has suffered. Not only has this resulted in the tragic loss of seven fine astronauts, but it has greatly damaged our long-term ability to continue gathering intelligence information from space.

My bill takes two concrete steps to begin addressing these problems. First, it provides $50 million to the Air Force for space shuttle and expendable launch vehicle quality control and safety research programs, to get a better handle on why we have had such a serious string of launch failures. The Air Force should cooperate with NASA as much as possible in conducting this research. Second, it provides $100 million in long-lead procurement funds for new photo reconnaissance satellites. We are now reportedly operating with just one such satellite, with no back ups available. These satellites are absolutely critical to our security, and it is unthinkable that we allow ourselves to remain in so tenuous a position on such a vital intelligence asset. We need to act now so that when our launch ability is returned to full operational stat}s, we will be able to remedy this hemorrhage of our intelligence capabilities.

The following table summarizes the additions my bill makes for defense:

ADDITIONS FOR FISCAL YEAR 1987 DEFENSE BUDGET

[Dollar amounts in millions]

	Quantity	Cost
ARMY		
Multiple lauch rocket system missiles	13,286	$100.0
Stinger anti-aircraft missiles	[1] 2,950	177.6
TOW anit-tank missiles	[1] 5,000	56.1
5-ton trucks	[1] 1,250	130.0
Howitzers, towed, 155mm	[1] 79	43.7
Fork lifts, 6,000 pound diesel	[1] 154	15.7
Hydra-70 rockets	124,000	30.0
Ammunition	([1])	797.1
Aircraft Spares and repair parts	([1])	487.8
Missile Spares and repair parts	([1])	168.7
Tracked combat vehicles spares and repair parts	([1])	226.4
Subtotal		2,233.1
ARMY NATIONAL GUARD		
M-113A3 armored personnel carriers	106	28.0
Stinger missiles and necessary launchers	780	47.0
MLRS launchers and associated missiles	30	60.0
AN/PRC-104 radio sets	754	10.2
AN/GRC-193A radio sets	310	9.9
AN/GRC-213 radio sets	184	3.4
Subtotal		158.5
NAVY		
AIM/RIM-7 Sparrow air-to-air missiles	[1] 194	31.6
AIM-9L/M Sidewinder air-to-air missiles	[1] 541	40.5
AGM-84A Harpoon anti-ship missiles	[1] 59	80.6
AGM-88A HARM anti-radar missiles	[1] 67	15.5
SM-2 MR ship defense missiles	[1] 56	20.7
MK-48 ADCAP torpedoes	[1] 53	118.7
Aircraft spares and repair parts	([1])	416.2
Weapons spares and repair parts	([1])	135.7
Aviation support equipment	([1])	174.8
Ordnance support equipment	([1])	98.5
Subtotal		1,132.8
MARINE CORPS		
Hawk air defense missiles	[1] 120	32.2
TOW anti-tank missiles	[1] 1,740	13.2
Stinger anti-aircraft missiles	[1] 638	30.7
Howitzer, towed, 155mm, M198	[1] 25	12.0
M-16 rifles	[1] 2,778	1.2
Hydra-70 rockets	20,667	5.0
Ammunition	([1])	14.0
Other spares and repair parts	([1])	60.4
Subtotal		168.7
AIR FORCE		
AGM-88A HARM anti-radar missiles	[1] 399	92.4
Aircraft spares and repair parts	([1])	357.2
Missile spares and repair parts	([1])	100.0
Munitions and associated equipment	([1])	646.3
Includes:		
3,540 [1] GATOR anti-tank munitions: $127.4 million	([1])	
1,008 [1] Durandal runway attack bombs: $26.1 million	([1])	
3,899 [1] 2,000-pound high explosive bombs: $8.5 million	([1])	
Long lead procurement for new photoreconnaissance satellite		100.0
Space Shuttle and expendable launch vehicle quality control/safety research		50.0
Subtotal		1,346.7
AIR NATIONAL GUARD		
C-130H Transport planes	9	171.0
Subtotal		171.0
Spare parts auditors		10.0
Total		5,220.8

[1] Indicates where the administration's fiscal year 1987 budget provides less funding for this item than they estimated a year ago. In most cases this bill makes up the entire shortfall.

The cuts proposed in this bill are simple, will have virtually no adverse effect on our security, and are far less important than the add-ons listed above:

PROGRAM REDUCTIONS

[In billions of dollars]

Program	Cut	Comment
MX	1.91	Zeroes procurement, related military construction, and halves R&D.
SDI (DOD)	1.85	Allows a $190M increase over 1986.
SDI (DOE)	.29	Allows a 10-percent increase over 1986.
AMRAAM	.75	Cuts all production, retains R&D.
Aquila (RPV)	.17	Zeroes production and halves R&D.
Space station	.15	Allows a 25-percent increase over 1986.
Orient Express	.10	Allows a 100-percent increase over 1986.
Total	5.22	

My proposed cut in star wars would still allow a healthy $190 million growth in that program over last year's $2.75 billion level, double the year before. At a time when we don't have enough ammunition, it makes no sense to spend nearly $2 billion more in 1987 than we will in 1986 on a program where we haven't even identified the basic technologies for achieving its goals.

The program is riddled with other contradictions, too, like the fact that any space based components will be extremely vulnerable to the star wars system of the other side. Star wars is also completely ineffective against the fastest growing part of the Soviet offensive nuclear threat, their bombers and cruise missiles. We do far more for our security by buying ammunition and torpedoes than we do by nearly doubling our spending in 1 year on a dubious SDI research program for the 21st century that even the French say they could counter.

The tragic shuttle disaster and other recent rocket launcher failures should not dishearten us, but they serve as somber reminders that high technology does occasionally fail, and so it is the worst kind of wishful thinking to believe that star wars will render nuclear weapons impotent and obsolete. Even most of the President's national security advisers are backing away from this rhetoric, and are now speaking in terms of star wars helping to strengthen deterrence. The only problem with this is that it is not true, as even the President's chief adviser on strategic weapons, Lt. Gen. Brent Scowcroft, agrees.

Furthermore, the shuttle accident has delayed further shuttle launches by 18 months, until July 1987. The current budget proposals for star wars assumed a smoothly operating shuttle program. Thus the star wars program, which depends very heavily upon the shuttle for its experiments over the next few years, will have its schedule set back by the shuttle delays anyway. A reduced rate of spending growth is thus entirely reasonable. My bill allows a healthy $100 million increase.

The MX has been debated endlessly, but the simple fact remains that it will be incapable of surviving a Soviet first strike. We would never fund a conventional weapon that was so vulnerable,

cuts in munitions, and this is one of the reasons for my bill.

The Senate took a very important step the other day in approving the BARRY GOLDWATER Department of Defense Reorganization Act of 1986 by the amazing vote of 95–0. That margin says something about this body's appreciation for the concerns that our beloved senior Senator from Arizona has about the way the Pentagon does business, and the way Congress fulfills, or rather does not fulfill, its oversight role. I certainly hope that piece of legislation, and whatever legislation follows from the Packard Commission's recommendations, will begin to rectify the way we underfund readiness and unglamorous weapons in favor of the big ticket items.

Senator GOLDWATER put his finger right on the problem during the debate on his bill when he said:

> We are buying a lot of equipment, I hate to tell you, that we do not need. We just need a lot more of fundamental, down-to-earth weapons to go out and fight a war. We do not need all this fancy stuff.

I could not agree with him more. Here we are throwing multiple billions of dollars at too many big-ticket weapons, as well as several smaller-ticket weapons projects that at a minimum need more research before we rush into production. Yet at the same time we are not adequately funding a large number of important conventional weapons and readiness items that will do a lot more to strengthen this country's defenses.

Everyone here supports a strong defense posture. We may differ on what constitutes the best way to achieve such a posture, but no one doubts the need for it. We live in a very volatile and dangerous world, as recent events in the Middle East and Europe sadly attest. The continuing carnage in the Persian Gulf, where Iran and Iraq are slaughtering thousands of each others soldiers reminds us that we must remain strong and at the same time strive for a more peaceful and humane world.

This bill is straightforward, and similar in many ways to a bill which I introduced last year. My new bill adds over $5 billion for a variety of conventional weapons and equipment programs which have been underfunded over the years. Some of this is for munitions that have recently been used against Libya, yet where the administration is, incredibly enough, proposing cutbacks for this year. A lot of the money would be used for ammunition and spare parts, where major cutbacks have been made. All of it is for weapons that we will almost surely need to call upon over the next few years. We certainly are a lot more likely to need them than the MX missile or star wars.

I would pay for this purchase of $5 billion in conventional weapons by taking a few programs in the Defense Department, the Energy Department, and NASA and cutting them back from the inflated levels requested by the administration. In most cases my bill still allows some increase in funding for these programs.

Specifically, my bill would cut $4.78 billion from the President's fiscal year 1987 defense budget proposals, along with $290 million from the star wars part of the Department of Energy's budget and $150 million from NASA, for a total of $5.22 billion. It would put this amount into unglamorous but vitally important programs such as ammunition, cannons, antitank weapons, ammunition trucks, spare parts, and many more. These items contribute a lot more to the kind of strong, smart defense we need than does a $25 billion missile that has only a 2-percent chance of surviving a Soviet first strike, like MX.

The fact is, weapons like MX and star wars are weakening our defense posture. If you take a look at the administration's spending proposals, you will find huge increases for star wars, the Orient Express, the space station, and healthy funding levels for MX, even though we have stopped the MX program at 50 missiles. But if you look a little closer, you'll be shocked to see what got axed in order to make room for the likes of star wars and the Orient Express: 797 million dollars' worth of ammunition for the Army, when we are already woefully short of enough ammo to last in a conventional war; munitions for the other services, such as the 2,000-pound bombs, Harpoon antiship missiles, and Sidewinder air-to-air missiles that we have used effectively against Libya. Torpedoes for the Navy, surface-to-air missiles for the Army; cannons and ammunition trucks for the Army; literally billions cut from spare parts for all the services; and more.

These cutbacks are upsetting, but they show where we should start in supporting a stronger, smarter defense posture. About 88 percent of the add-ons I am proposing in this bill are restorations of what the administration said last year that we needed to buy in 1987. My good friend, Senator DIXON, not long ago pointed out here on the floor of the Senate the major cutbacks in spare parts and ammunition funding for the three services that the administration made between last year and this year. Senator DIXON's figures are exactly right, and the problem he points out is a real one. My bill restores a major portion of the cuts he pointed out to us, and it also restores additional cuts in specific weapons.

Our military people recognize the problem, as a recent news article shows. I ask unanimous consent that an excerpt from an article from the Wall Street Journal entitled "Logistics Officers Fret That Gramm-Rudman May Hinder U.S. Military Combat Readiness" be entered into the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. BUMPERS. For example, last year at this time the administration said that they were going to ask for $585.4 million in Air Force funding and $272.2 million in Navy funding for high speed antiradiation missiles for fiscal year 1987. Our military used these HARM's, as they are called, against Libyan radars recently. But this year the administration is actually asking for $92.4 million less than they said they would for HARM's for the Air Force and $15.5 million less for the Navy. Yet at the same time they were asking for a 75-percent increase for the Pentagon and a 109-percent increase for the Department of Energy in star wars funding. My bill restores full funding for HARM missiles for both services.

Likewise the administration said last year that in the fiscal year 1987 budget they would request funds for about 16,000 2,000-pound, high-explosive bombs, guided versions of which we used in the Libyan air raids. But this year they have requested funds for only about 12,000. The same thing has happened to Sidewinder heat-seeking missiles. My bill makes up both of these shortfalls.

Our ammunition problems are serious, as Military Logistics magazine recently highlighted. Listen to what the Pentagon's assistant director for logistics, readiness and sustainability told Congress in December:

> Our stockpile for most level-of-effort munitions are well short of our long-term goal.

An Army artillery commander in South Korea has told congressional investigators that he only has a 3-day supply of ammunition to fend off a North Korean attack. I ask unanimous consent that the article from Military Logistics entitled "The Munitions Gap" be entered into the RECORD at the end of my remarks, as well as several other related articles.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 2.)

Mr. BUMPERS. What good does it do us to have the most advanced fighters and tanks and ships if they run out of ammunition in a few days? As one fighter pilot put it, if a fighter doesn't have ammunition, it's just another unscheduled airliner. Accordingly, over $1.5 billion in my bill goes to buy more munitions, which we so badly need.

A good example of this is the lowly 5-ton ammunition truck. This is not a glamour item. But if there's a battle going on, these vehicles are absolutely essential for getting ammunition and other equipment up to the front. The need for these trucks is well-recog-

The key to a policy that can be sustained over the long term is balance in how we employ the range of instruments available to combat terrorism. The American people do not support a major escalation of violence in the most dangerous region in the world, nor does the situation warrant it.

The administration must not obsessively focus on Qadhafi and extremists like him.

As difficult as it will be after years of neglect, we must renew our role as mediator between moderate Arab leaders and Israel. We have an abiding national interest in a meaningful process in the Middle East which addresses the Palestinian problem, undermines the radical elements, and, above all, ends the conflict between Israel and its neighbors.

If we fail to demonstrate our commitment to this role, our campaign against terrorism will depend largely on force and other kinds of pressure. There will be no positive component aimed at depriving Qadhafi and those like him of a justification for terrorism and a recruiting ground among desperate or despairing Palestinians.

The conditions under which military force can legitimately and appropriately be used against terrorists are limited. Force alone will not end terrorism, nor can it be a substitute for a diplomatic policy that addresses the causes of terrorism.

Terrorism in the Middle East—the overriding terrorist problem today—is rooted in the Arab-Israeli conflict.

The rallying cause of most Middle East terrorists is the 2 million Palestinians who have lived in poverty in camps in Lebanon, Syria, the West Bank, and Gaza for two generations. The primary target of all Palestinian violence is Israel. We are the secondary target because of our firm support of Israel. Feeding this resentment is Arab envy of Israel's military prowess and its development into a modern industrial country, while the Arab States have remained far behind.

Qadhafi, like other extremists, holds the Palestinian cause aloft as a banner, thereby obtaining legitimacy for his acts of violence. But his hatred of the United States and the West goes far beyond the rights of the Palestinians and is not shared by more moderate Arab leaders.

The solutions which we would advocate to the conflicts in the Middle East will not satisfy Qadhafi or the radical Palestinians. Nor would resolving the Palestinian problem end terrorism. But progress on an Arab-Israeli peace is the single most important step we can make to isolate those like Qadhafi who are wedded to violence, and to reduce the incidence of terrorism against Americans.

The administration knows this—or should know it.

The President's abortive September 1, 1982, Middle East peace initiative was acclaimed as signaling a determination to restart the Camp David peace process. However, when it did not produce immediate results, it was not followed up.

One has to question whether that initiative reflected a genuine understanding by the administration of the fundamental importance for U.S. interests of peace in that region, or whether it was simply a short-term public relations gesture.

Since then the administration has failed to address these root causes of terrorism in its debate over the proper U.S. response to Qadhafi. Nor is there any sign that the administration now has a plan for following up its use of military force with a determined effort to reopen diplomatic channels to the key actors in the Middle East conflict.

The President has made a commitment to combat terrorism. This commitment has the full support of the American people and the Congress. He has my firm support. But our support must not be taken as a license to continue to replace a sophisticated, flexible, and comprehensive policy with brute force. The President demonstrated the strength of his commitment to stop terrorists by bombing Libya, and he should now pursue the commitment he made to the Middle East peace process in 1982.

Mr. President, I do not argue that we should seek peace in the Middle East solely as a counterterrorism strategy. Our interests in a peaceful settlement transcend the terrorist problem. Nor do I contend a Middle East peace process can, by itself, solve terrorism. But without it our counterterrorism effort will be crippled.

Terrorism is as old as recorded history. We are not going to wipe it out with a single air strike. We must be prepared for years of patient diplomacy, political and economic pressure, moral example and, in those limited circumstances where it is appropriate and necessary, the use of force.

RECOGNITION OF SENATOR BUMPERS

The PRESIDING OFFICER. The Senator from Arkansas [Mr. BUMPERS] is recognized under a special order for not to exceed 5 minutes.

Mr. BUMPERS. I thank the Chair.

S. 2480—NATIONAL DEFENSE ENHANCEMENT ACT

Mr. BUMPERS. Mr. President, as devoted as this great body and the President are to the defense and security of America, we invariably seem to overfund the glamorous and exotic weapons, with their glamorous and exotic price tags, at the expense of the less glamorous but more essential weapons and equipment that we need to keep our forces strong and ready. The bill which I introduce today tries to rectify this problem that has plagued our defense posture for far too long.

Everybody knows that when times get tight for the Pentagon, and often even when they're not, they cut back on readiness and other programs to make room for strategic missiles, top-of-the-line fighters, big ships, and the like. And lest I be accused of pointing my finger just at the Pentagon, I have to admit that we do it up here, too, every one of us. We often do these things because it's politically easier to vote for the glamorous, well known big weapons. We're told that the glamor weapons are vital for national security. The President pleads with us. The manufacturers plead with us. The thousands of good people whose jobs are tied to those programs plead with us. And Lord knows the lobbyists plead with us. It gets so you're made to feel like Benedict Arnold and Tokyo Rose all rolled into one if you vote for less than every penny that is requested for these fancy weapons, even if they can't survive a Soviet first strike, like MX, or can be easily countered by the Soviets, like star wars. But the administration does not hesitate to cut back on the kinds of weapons that really contribute to our security, and which we are a lot more likely to need to use in the uncertain months and years ahead.

Everybody here has been hit up by the MX lobby, or the star wars lobby, or the battleship lobby. But when was the last time you got concerned by the ammunition lobby? Or the howitzer lobby? Or the spare parts lobby? When was the last time you got thousands of those preprinted, preaddressed, prethought-out postcards pleading with you to buy more torpedoes, or antitank missiles? I have been here going on 12 years, and it has never happened to me. But for the sake of America's security, I wish there were a combat readiness lobby, and that we would all hear from them once in a while. Our defense posture would be a lot better off if we did.

Lawrence Korb, who until recently was the Assistant Secretary of Defense for Manpower, installations, and logistics, has made this same point. As he put it:

> Munitions didn't seem to have much of a lobby and they seemed to cut (funding) quite a bit at the Hill. It was comparatively easier to cut munitions as opposed to big weapon systems. If you canceled a big weapon system that was authorized, everybody would know it, whereas if you cut munitions, it was really hard to get a lot of people excited about it.

Unfortunately, Larry Korb is right on the mark. But this is one Senator who is excited, and upset, about the

bent upon the arms control community to watch closely the disparate programs put forward by DOD and the SDIO. To this end, Congress should establish reporting requirements for the ATBM program, preferably with technology development updates matched to proposed mission areas (e.g., describing how the Terminal Imaging Radar Experiment would fit into hard-site point defense or ATBM missions).

In addition, the administration should be required to submit separate listings of test schedules and justify test activities under the terms of the ABM Treaty. While not in itself an inhibition, such a list would go a long way toward keeping Congress and the public informed about respect for—or suspicious interpretations of—the treaty's terms. Congress should call for a thorough debate of the entire ATBM issue. Failing this, we are likely to find ourselves sailing through a tiny loophole in the ABM Treaty onto vast, uncharted seas of strategic peril.

MYTH OF THE DAY: THE DEPARTMENT OF DEFENSE DOES NOT REALLY HAVE AN INFLATION DIVIDEND

Mr. PROXMIRE. Mr. President, the myth of the day is that the Department of Defense does not really have an inflation dividend. Well, the fact is they do. They reprogram with congressional approval excess appropriations that flow from inflation, but the myth is that no funds over and above what Congress approves become available through an inflation dividend. Well, it does. In March, the GAO reported that between fiscal year 1982 and fiscal year 1986 the Department of Defense cashed in on an inflation dividend of $39.5 billion and piled up another $5 billion from overprojecting the price of fuel. That is a fact. When I say $1 billion, I am not talking about a few thousand dollars. I have maybe $100 here, $10 and $20 bills. I am not talking about that kind of money. I am not talking about millions of dollars. I am not talking about hundreds of millions. I am talking about a thousand million dollars multiplied by 44. In other words, roughly $44 billion. That was the inflation dividend and that was the excess over what Congress actually appropriated that the Defense Department has had over the last 5 years.

Mr. President, I yield the floor.

RECOGNITION OF SENATOR LEAHY

The PRESIDING OFFICER. The Senator from Vermont [Mr. LEAHY] is recognized under a special order for not to exceed 5 minutes.

Mr. LEAHY. I thank the Chair.

AFTER LIBYA: THE UNITED STATES RESPONSE TO INTERNATIONAL TERRORISM

Mr. LEAHY. Mr. President, I wish to speak to the Senate about a subject that is in the minds of practically every American today.

The killings of Americans by terrorists have deeply affected all of us. Since the air strike against Colonel Qadhafi, the stakes have changed dramatically. Americans—with good reason—are concerned and uncertain about where these events will lead and whether the United States has a policy that really can stop these terrorists.

Stopping terrorism has become a top priority of the American people. They want to see effective action by the United States and our allies that will halt these murderous attacks. But, they are also concerned about our retaliation leading to an endless spiral of violence.

Ever since the Iranian hostage crisis, as terrorists became more sophisticated, their attacks against Americans more frequent and their targets more indiscriminate and lethal, I have urged the administration to develop a comprehensive counterterrorism policy. Such a policy must combine diplomatic and political action, international measures such as economic sanctions, effective military capabilities, and the will to use all these instruments in a proper balance.

As the cornerstone of that policy, I stressed the need to improve our intelligence. We must have an accurate picture of who and where terrorists are, who is supporting and directing them, and who is responsible for specific terrorist outrages.

I also spelled out the conditions which I believe must exist before military force can legitimately be used:

The safety of any hostages.

The capability to carry out a discriminate strike against known terrorists.

An adequate basis in international law for the use of force.

And a consensus among the President, Congress, and the American people, about the limits on and purposes of any use of force.

The decision to bomb Libya was made after Colonel Qadhafi ordered the bombing in West Berlin that killed and wounded Americans, and when we had evidence that he planned upward of 30 attacks against American installations, diplomats, and tourists.

After our repeated warnings were met with more violence, and our attempts to enlist our allies in less drastic measures failed, the administration stopped publicly debating whether to use force against a state that supports terrorism. The question became how best to use it.

In the month since the bombing, debate over the proper U.S. response to terrorism from the Middle East has resumed.

According to the polls, at least two-thirds of Americans support the President's use of force against Libya. An even greater number think terrorism will continue and that a major terrorist incident will occur in the United States this year.

Many thoughtful and concerned Vermonters who have contacted me believe the bombing was a dangerous mistake. They warn that by resorting to military force we lose our moral advantage over terrorists, and that force only incites more violence without addressing the causes of terrorism. They are afraid that this escalating violence so close to the world's oil fields may lead to a full-scale war between superpowers.

Clearly, if the use of force against terrorists is to achieve the goal of deterring further attacks, it must not be ruled out under any or all circumstances. President Reagan said the air strike was "but a single engagement in a long battle against terrorism," and that our policy will now involve an "escalating response."

Each time we have incontrovertible evidence that Qadhafi is responsible for a terrorist attack against Americans, we can expect the President to respond in some fashion. He has threatened to bomb Syria or Iran if they are linked to terrorism in which Americans are the victims.

I believe the bombing of Libya was a legitimate response to deter terrorism. I also believe that because of it we have crossed an important line in our fight against terrorism.

It moved us beyond the period of loud rhetoric and no action.

There are signs that it stunned Qadhafi and incited some dissension within his ranks. Far from uniting the Arab countries behind Qadhafi, there is evidence that he is now more isolated and estranged from moderate Arab leaders than before.

It was followed by welcome diplomatic actions against Libya by Western Europe. At the Tokyo summit, several key allies joined with us in a clear statement against terrorism which strengthens the possibility of united international action.

These are positive results of the President's decision to retaliate.

But I also believe the President will make a very serious mistake if he misreads the American people's support for the bombing of Libya as endorsement of a policy that continues to emphasize military force over diplomacy and negotiation in the Middle East.

By itself, the bombing will not stop Qadhafi. His opposition to the Middle East status quo is a matter of faith, not a response to pressure at home or abroad. He is only one of several leaders in the Middle East who use terrorism by radical groups as a weapon to attack Israel, to drive out the United States and other Western nations, and to prevent the reemergence of a peace process in that region.

arms control and foreign policy implications, including possible violations of the ABM Treaty and damaging strategic and political repercussions within the Western alliance.

Defense against tactical ballistic missiles in Europe, such as the Soviet SS-21 (120 kms) and the SS-23 (500 kms), received start-up funds in 1982 as a joint-service weapons program. The program, known simply as "ATM", will be funded independently of SDI at $62.7 million in FY86 as an Army R&D effort. ATM is being funded to supplement older air defense programs, such as the Patriot and Improved Hawk air-defense (anti-aircraft) systems, whose program managers are now investigating the possibility of acquiring a limited anti-cruise and anti-tactical ballistic missile capability. The Patriot, which has received the most attention, consists of a long-range surface-to-air missile (SAM), effective up to altitudes of 80 kilometers or more, linked to a radar set, command and control post, and early-warning network. The Patriot and Improved Hawk may soon be tested against short-range tactical or longer-range theater missiles, a technological advancement known as "SAM upgrade."

More exotic plans for ATBMs, moving well beyond air-defense systems of limited anti-tactical missile capability, draw heavily on the SDI research now underway. The Strategic Defense Initiative Organization (SDIO) believes that a variety of systems demonstrations with ATBM applications can be ready by 1990 or shortly thereafter. These include space- and ground-based laser and sensor devices, an airborne optical system experiment utilizing an advanced infrared sensor for warhead tracking and decoy discrimination, and high-speed endoatmospheric kinetic-energy interceptors known as SR-Hit and ER-Hit (Small-Radar and Extended-Range Homing Intercept Technology).

One rationale for proceeding with SAM upgrade stems from a growing U.S. concern that two new Soviet mobile SAMS—the SA-10 and the SA-X-12, each with a 100 kilometer range—will soon provide the Soviet Union with an anti-tactical missile capability and possibly a wider territorial defense capability against U.S. or NATO intermediate-range missiles. The Pentagon also believes the Soviet ballistic missile defense program, presumably much of which is relevant to ATBM technologies, is proceeding at a rapid pace.

Full ATBM program costs are difficult to establish owing to the uncertain direction of the program. It is not clear whether it will become a significant part of SDI, or simply borrow disparate hardware as components and systems become available. Nonetheless, as the debate over SDI has made clear, it seems improbable that defensive systems development will become marginally less expensive than offensive countermeasures in *any* realm of defense, be it tactical, theater, or strategic.

ATBMs have generated an enthusiastic following within the professional defense community, which apparently believes them to be in conformity with the ABM Treaty. Although the legality of tactical BMD, if unambiguously limited on scope and range, is not now in question, a theater BMD would seriously violate the ABM Treaty on a number of counts.

Article VI of the ABM Treaty enjoins the parties from giving "missiles, launchers, or radars other than ABM interceptor missiles, ABM launchers, or ABM radars," any strategic ABM capacity, and further disallows testing of these components "in an ABM mode." This would prohibit the testing of ATBMs against theater or intermediate-range systems, since the trajectories, velocities, and radar images of intermediate-range missiles are similar to those of strategic submarine-launched ballistic missiles. Intercept capabilities acquired during the testing and development of an ATBM could be readily transferred to a strategic ABM program.

The SAM upgrade issue also falls under this article of the treaty and would relate both to the U.S. and Soviet programs if it can be demonstrated that these systems have acquired strategic ABM capability. No Soviet or U.S. SAMs have been unambiguously tested against theater or strategic ballistic missiles, and there remains much scepticism in the technical community whether future SAM modifications will ever grant more than a modicum of strategic ABM capability. Nevertheless, even a very limited capability acquired through development and testing would violate the treaty.

Article IX of the ABM Treaty prohibits the parties from transferring technology or deploying outside its national territory strategic" ABM systems or components" limited by the treaty. Agreed Statement G refines this third-party clause by constraining the transfer of "technical descriptions or blueprints . . . for ABM systems and their components." Accordingly, the U.S. could not legally provide strategically capable ATBM components or systems to NATO for an allied ATBM program.

Article V of the ABM Treaty bans the development, testing, or deployment of mobile land-based or sea-, air-, or spacebased systems and components. The article also bans launching more than one interceptor missile at a time or giving a system rapid reload or MIRVed capability. These restrictions would severely inhibit an ATBM system. The idea that an ATBM network could function effectively without mobility (especially of sensors), without a rapid, automated firing response, without a reload capability, without MIRVed interceptors, or without basing of ancillary systems and components in air and space, would not be in keeping with the thrust of the parent SDI program. Abandoning these capabilities would be analogous to attempting to perform the terminal phase defense of hardened targets with 1960s technology.

The administration is unlikely to admit that ATBMs are being developed or tested with stategic ABM capability. In this sense, an 'ATBM loophole' may soon develop akin to the ASAT loophole: both testing and development will proceed under the guise of other, seemingly unrestricted programs directed at fulfilling ostensible theater-range missions. The end result will be an abrogated or progressively eroded ABM Treaty. Either way, an offense-defense arms race will ensue to the detriment of both superpowers.

Within the Western alliance, ATBM could wreak serious strategic and political damage. ATBM proponents claim that even a partial defense, wherever deployed, can play a useful role in enhancing deterrence against both limited and large nuclear attacks. Smaller missile salvos, it is argued, would be relatively easy to intercept, and larger attacks would be deterred by the uncertainty in predicting which reentry vehicles would penetrate to their targets. NATO would be defended against accidental or unauthorized use as well, and new opportunities for arms reduction, by phasing in ATBMs and phasing out intermediate- and medium-range missiles, would ineluctably follow.

The real impact of deploying ATBMs is likely to be just the opposite. The Soviet Union will first respond by devising means to maintain an effective offensive force. It would undoubtedly add reentry vehicles and penetration aids to saturate, jam, spoof, and overwhelm NATO's defensive weapons. Moreover, the introduction of even partially effective NATO ATBMs would, in the event of hostilities, invite an early, massive attack to suppress defenses and eliminate offenses.

Just as a NATO ATBM force would require the Soviet Union to commit to a massive strike early in a crisis, so a Warsaw Pact ATBM would remove the viability of gradual or flexible escalation. ATBM thus uniquely works against NATO policy and Western interests, for it is the threat of 'graduated' nuclear escalation that is believed to deter the much stronger conventional forces of the Soviet bloc. Britain and France will surely view a highly mobile Soviet ATBM program, deployed in Eastern Europe and the western military districts of the Soviet Union, as a "legal" means of degrading their nuclear deterents.

More NATO research toward ATBMs would also give the Soviet Union every incentive to accelerate their own ATBM research and development programs. Furthermore, an increased ATBM effort in conjunction with the SDI program will virtually guarantee an early redirection of Soviet research well beyond their SAM upgrade projects. Because of increased U.S. and Soviet warhead requirements to assure penetration of the new defense systems, arms reduction will be even more complicated. The NATO allies may in fact be placed in the unpalatable position of requiring additional intermediate nuclear forces to penetrate the Soviet ATBM and upgraded SAM network.

Finally, the ATBM mission will be hampered by the scant prospect that any survivable defensive system architecture can or will be built that is not subject to readily available or easily designed countermeasures. All manner of countermeasures now under development or investigation with applicability to the SDI program will be equally relevant for penetrating ATBM defenses: destruction of radars and infrared sensors through direct attack or nuclear-induced electromagnetic pulse; use of penetration aids and decoys, including aerosols, chaff, and highly reflective balloons; and proliferation of the incoming 'threat cloud' by multiplying the number of reentry vehicles in present arsenals.

The ATBM program rationale and mission is as unclear as that of the larger SDI program. Some see ATBMs as a useful defensive component of the NATO INF modernization program. Others see it as a program to defend hardened fixed targets, such as critical air fields, naval bases, and command, control and communications facilities. Still others believe it may eventually be possible to defend European cities, and some would like to see a multifunctional mobile ATBM to defend fronts and armies on the move. Whatever the rationale, there are so many conceptual problems with the idea of ATBM defense that it would be foolhardy to rush into any commitment to the program.

Given this confusion of goals for the ATBM program, its close relationship to the strategic defense effort, and the connection between all aspects of ballistic missile defense and ABM Treaty survival, it is incum-

proved health standards would bring as many benefits as these economic benefits.

Water pollution is a major concern, but providing good quality water for all Americans should also be a priority. There is no difference between water polluted by man-made causes or by nature. The effects are the same. We must give the naturally occurring water problems more attention. There are many other areas like western South Dakota where water quality is very poor. The development of rural water systems has helped eliminate this problem in many areas, but there are many more areas that still need some type of rural water system to improve water quality. I have introduced legislation to address this problem in South Dakota and urge my colleagues to examine the water quality in their home States. Action may be needed on a national basis to meet the unique water needs of rural areas.

Mr. DURENBERGER. Mr. President, I now ask for the yeas and nays on the conference report.

The PRESIDING OFFICER. Is there a sufficient second? There appears to be a sufficient second. There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Washington [Mr. EVANS], the Senator from Arizona [Mr. GOLDWATER], the Senator from Florida [Mrs. HAWKINS], the Senator from Alaska [Mr. MURKOWSKI], the Senator from Oregon [Mr. PACKWOOD], and the Senator from Delaware [Mr. ROTH] are necessarily absent.

The PRESIDING OFFICER (Mrs. KASSEBAUM). Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 94, nays 0, as follows:

[Rollcall Vote No. 106 Leg.]

YEAS—94

Abdnor	DeConcini	Hatfield
Andrews	Denton	Hecht
Armstrong	Dixon	Heflin
Baucus	Dodd	Heinz
Bentsen	Dole	Helms
Biden	Domenici	Hollings
Bingaman	Durenberger	Humphrey
Boren	Eagleton	Inouye
Boschwitz	East	Johnston
Bradley	Exon	Kassebaum
Bumpers	Ford	Kasten
Burdick	Garn	Kennedy
Byrd	Glenn	Kerry
Chafee	Gore	Lautenberg
Chiles	Gorton	Laxalt
Cochran	Gramm	Leahy
Cohen	Grassley	Levin

Pell	Specter	
Pressler	Stafford	

NOT VOTING—6

Evans	Hawkins	Packwood
Goldwater	Murkowski	Roth

So the conference report was agreed to.

□ 1300

Mr. DURENBERGER. Madam President, I move to reconsider the vote by which the conference report was agreed to.

Mr. HELMS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DURENBERGER. Madam President, let me conclude by expressing my appreciation to all of my colleagues for the unanimous support of the conference report. I think it is an indication, as I indicated in my earlier remarks, that a lot of somewhat divergent interests ended up at the same destination at an appropriate time. I trust that those at the White House who will make the final decision on whether or not this bill will be law will take that vote that has just concluded as an important message.

As I conclude, let me expresss my appreciation, in addition to those for whom I have already expressed it, especially to Jimmie Powell, who, as of several weeks ago, celebrated his 10th year of association, in one way or another, with me, and yesterday celebrated his 37th birthday. I wish we could have come to this conclusion yesterday, because it is Jimmie Powell whose work on the Safe Drinking Water Act made the reauthorization that is before us today possible.

The other thing that he has contributed to this process is that he has made the act itself an effective tool of protecting municipal water supplies in America, which it had not been until he undertook to assist me in the process of developing the reauthorization.

I would also give the appropriate and deserved credit to another member of the staff of the Environment and Public Works Committee, Heather Wicke, who has carried the burden of weaving our way through a variety of interests and, again, helping us find the appropriate destination.

At the same time, I express appreciation to Ron Cooper, who is Senator BAUCUS's principal staff member on this issue; to Kate Kimball, from the minority staff; to Brent Erickson, staff member for Senator SIMPSON; to Jim Strock, on the majority side; to Kathy Cudlipp, the staff counsel; and Lee Fuller, the minority staff director; all of whom made more than appropriate and significant contributions to the development of the conference report which we have just approved.

Madam President, I yield the floor.

Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HELMS. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

TRIBUTE TO THE LATE WILLIAM C. LEE AND TO DESIGNATE "WILLIAM C. LEE DAY"

Mr. HELMS. Madam President, I ask that the Senate now turn to Senate Concurrent Resolution 140, to pay tribute to the late William C. Lee, and to designate June 6, 1986, as "William C. Lee Day." This has been cleared by both sides, I might add.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A Senate concurrent resolution (S. Con. Res. 140) to pay tribute to the late William C. Lee and to designate June 6, 1986, as "William C. Lee Day."

The PRESIDING OFFICER. Is there objection to the request of the Senator from North Carolina?

There being no objection, the Senate proceeded to consider the current resolution.

Mr. HELMS. Madam President, there are 36 cosponsors of this concurrent resolution. I ask unanimous consent that their names be printed in the RECORD.

There being no objection, the names of the cosponsors were ordered to be printed in the RECORD, as follows:

Senators Domenici, Dole, Wilson, East, Thurmond, Grassley, Cohen, Gorton, Mattingly, Cochran, Denton, Hatch, Heinz, D'Amato, Wallop, Warner, Trible, Quayle, Hatfield, Rudman, Boschwitz, McClure, Evans, Specter, Humphrey, Hawkins, Simon, Kerry, Melcher, Pryor, Harkin, Boren, Moynihan, Byrd, Chiles, and Leahy.

Mr. HELMS. Mr. President, this resolution honors Maj. Gen. William C. Lee of Dunn, NC, for his outstanding military service to his country during World Wars I and II, and especially for his role in developing airborne troops as a major part of our Army. On June 6, 1986, the homeplace of General Lee in Dunn will be opened to the public as the William C. Lee Airborne Museum.

Mr. President, this resolution recites several of the achievements of General Lee, including his becoming recognized, deservedly, as the "Father of the United States Airborne;" it further resolves that Congress recognize

the contribution of General Lee to his country, expressing the gratitude of the Nation to his family, and declaring June 6, 1986, as William C. Lee Day.

Mr. President, let me also mention that the driving force in giving General Lee the honor he deserves is Hoover Adams of Dunn, editor and publisher of the Dunn Daily Record. Mr. Adams is a longtime friend of mine, a true American patriot, and a dedicated member of his community. Without his efforts and the efforts of others in Dunn, I am confident that there would be no General Lee Airborne Museum. Mr. Adams is owed a debt of gratitude.

Mr. President, I ask unanimous consent that two articles about General Lee be printed in the RECORD. They are "Father of United States Airborne," which appeared in the summer 1958 edition of Airborne Quarterly, and "General From N.C. Immortalized by D-Day Troops," by Dennis Rogers, which appeared in the June 5, 1984, edition of the Raleigh News and Observer.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

FATHER OF UNITED STATES AIRBORNE

(The Airborne Association is resolved to honor the memory of the late General William C. Lee with an Airborne Memorial Library in his home town of Dunn, North Carolina.)

At the Third Annual Meeting of The Airborne Association in 1957, the membership adopted a resolution to endorse and promote the erection of an Airborne Memorial dedicated to the memory of the late Major General William C. Lee.

General "Bill" Lee is known affectionately as the "Father of United States Airborne." Long before there was even a "first test platoon" his sole interest as a young War Department officer was that of laying the groundwork for Army parachute troops.

While serving in the office of the Chief of Infantry, he became interested in applying the use of parachuting to military tactics as a medium for increased mobility in modern war.

At that time, several European countries, including Russia, had piled up a significant lead in airborne experimentation. General (then Major) Lee was the leading member of a small group of officers who, by a combination of vision, persuasiveness and daring, convinced the Army that airborne must be an element of the U.S. armed forces.

In July of 1940, he directed the organizing, equipping and testing of a group of parachutists who are now identified as the "original test platoon." The leaders of this platoon were First Lieutenant (now Colonel) William T. Ryder and Second Lieutenant (later Colonel) James F. Bassett. The latter lost his life in a helicopter crash at Fort Bragg. The XVIII Airborne Corps Chapter of The Airborne Association is named the Colonel James E. Bassett Chapter in his memory.

Part of the story of the original test platoon is told in the March 1956 issue of Airborne Quarterly in an article titled "Jumping for Centuries."

Through General "Bill" Lee's enforts, the test platoon was expanded on October 1, 1940 into the 501st Infantry Parachute Battalion. In March of 1941 the Battalion was further expanded to form the Provisional Parachute Group at Fort Benning, Georgia, with Lee, by then a Colonel, in command.

Under his inspired direction, additional airborne units, including glider elements, were formed and trained in the new concept of vertical envelopment. In March of 1942, "Bill" Lee was promoted to Brigadier General and ordered to head the new Airborne Command, at Fort Bragg, North Carolina. Airborne Command was the over-all headquarters of all parachute and glider troops.

He personally participated in the numerous tests and experiments involving parachutes and gliders, including body-shocking glider snatch, and was twice injured in these tests.

When Pearl Harbor startled the world in December of 1941, General Lee was in the hospital at Fort Benning in a plaster cast because he had broken his back in a parachute jump. The following day, he borrowed some civilian clothes and went AWOL from the hospital to Washington to plead and argue for expansion of U.S. parachute forces.

It was General Lee's recommendation that one of the infantry divisions being readied for combat in 1942 be converted into two airborne divisions. The 82d Infantry Division, commanded by General Bradley at first, was considered by Army Ground Forces to be the best of the new divisions, General Lee was instrumental in the selection of the 82d to be split up into the 82d and 101st Airborne Divisions in July of 1942.

On General McNair's recommendation, Brigadier General William C. Lee was given command of the 101st Airborne Division and the added star of a major general. The formation of two airborne divisions under command of General Matt Ridgway and Bill Lee was eloquent recognition of the vision of General Lee.

Both the 82d and the 101st were moved from Louisiana to Fort Bragg, North Carolina. There General Lee devoted himself tirelessly to the task of whipping the 101st into shape, setting a constant example of selfless dedication to perfecting his division in the new art of vertical warfare. Typically, on one occasion, he jumped in a training maneuver while recuperating from pneumonia.

General Lee took the 101st Airborne Division overseas and continued its training in Southern England. Shortly before the Normandy invasion, he was stricken with a heart attack which forced his retirement from active duly in October of 1944.

Only those who worked personally with Bill Lee can appreciate the tremendous outpouring of mental and physical effort that he put into airborne from 1939 to the eve of D-Day in 1944. His was the pick-and-shovel work before promotion and glory. His was the vision that conceived of glider troops before gliders had even been developed. His was the foresight that coined the word "airborne" to allay jealousy between parachute and glider troops.

And his were the dreams and convictions back in 1940 that U.S. Airborne would go into action as divisions, as a corps, and even as part of an allied airborne army. Others were then calling his dreams just figments of imagination that would never become reality.

When hostilities ended and the troops were back home in 1946, historians took time to evaluate the birth and growth of airborne. Every avenue of research into the past of American airborne led back inevitably to Bill Lee. Even before he died in June of 1948, General Lee was called the "Father of U.S. Airborne." And when all else is forgotten about the beginnings of American airborne, Bill Lee will always be remembered as the brilliant visionary who converted a dream of space warriors into the reality of airborne units starting with the first test platoon through to the great Allied Airborne Army of 1944 and 1945.

It is in recognition of the great contributions General Lee made toward the development of a new idea in war that The Airborne Association is resolved to promote an Airborne Memorial in his memory.

Should the memorial be merely a symbolic monument? Should it be located overseas where troopers bled and died? Should it be spotted in the Nation's capital? Or should it be something utilitarian which might serve more fittingly to preserve for posterity the memories of both the living and the dead who helped achieve the glory that surrounds everything associated with American airborne?

These and a host of other considerations were resolved in the decision to promote a utilitarian Airborne Memorial dedicated to the memory of the "Father of United States Airborne"—a memorial to be located in the town of his birth a short half-hour's journey from Fort Bragg, North Carolina, the present day "Home of the Airborne."

Many suggestions have been examined. They range from a $300,000 civic community center to an airborne memorial library in the home of General Lee in Dunn, North Carolina. Mrs Lee has graciously offered to sell the magnificent Lee family home to the Memorial for far less than the cost of constructing a comparable building. This last suggestion seems to be the choice of nearly everyone with whom it has been discussed.

Contributions started coming in immediately after the resolution was adopted in 1957. To handle the financing of the Memorial project separately from normal Association activities, The Association has established "The Airborne Association Memorial Fund." All contributions are segregated in this fund for the specific purpose designated by a donor.

At present, in addition to the Lee Memorial, the fund will eventually provide money for educational scholarships for children of deceased airborne troopers. All donations are entered on a standard form and given a number. The donors are rostered in numerical sequence and the rosters and signed donation forms become a permanent record of the Fund.

A form for your contribution is printed on page 24 of this issue. You are invited to share in the first and only Airborne Memorial for all of airborne and the distinguished "Father of United States Airborne"—General William C. Lee.

GENERAL FROM N.C. IMMORTALIZED BY D-DAY TROOPS

DUNN.—It was 40 years ago tonight when Bill Lee of Dunn became a legend.

He wasn't there when it happened. He was at home in his mansion on Divine Street in Dunn, still trying to recover from a heart attack almost a year earlier.

He didn't know that shortly after midnight, when the first U.S. combat troops landed in the fields and hedgerows of France, it would be his name they would shout as their victory cry.

It was the privates' way of honoring the small-town general from North Carolina

they had followed from the swamps of Louisiana to the sandy hills of Cumberland County to the meadows of England to the burning night skies over Normandy.

"Not being there with his men that day was his greatest heartbreak," said Hoover Adams, a Dunn newspaper publisher who served as Bill Lee's aide and friend during World War II.

Maj. Gen. William C. Lee of Dunn did not win his fame or his stars in combat. His was a more thankless task. He was a planner, an organizer and a trainer. But the men he sent into combat—and would have led had his heart not failed—ignited the world's imagination on the day of America's greatest military victory.

It was D-Day, 40 years ago tomorrow, when the military gospel according to Bill Lee was proved true.

More than 10,000 U.S. paratroopers jumped into the darkened skies of France on the night of June 5, 1944, many hours before the troops landed on the Normandy beaches we remember as Omaha, Utah, Gold, Sword and Juno.

Bill Lee had taken a small test platoon of paratroopers and in four years molded them into a crack unit of elite soldiers. They landed behind enemy lines that dark night and, often fighting alone or in small groups hastily put together, bought time for the men who landed on the beaches. That was what Bill Lee had said they could do, and they did it.

And that night, when they leaped from the planes, they did not shout "Geronimo!" as they had been trained. Loaded down with up to 100 pounds of equipment and all the guns and ammunition they could carry, the paratroopers shouted "Bill Lee!" as they hit the silk.

Lee won accolades and medals and the friendship of the famous, but no soldier was ever paid a higher tribute.

Bill Lee grew up in Dunn. He was a hotshot athlete, a big strapping kid who haunted the playing fields and hunting grounds of Harnett County. He went away to college on a baseball scholarship, and they still say he knocked the longest home run ever hit at N.C. State University.

But his would be the life of a professional soldier. He fought in World War I, but it was his peacetime service that made him famous. He was a fast-tracker in the Army, going to all the right schools and serving in all the right, but almost invisible, jobs.

When Hitler was planning his conquest of the world, Bill Lee was there as a military observer, reporting to a disbelieving military that a madman was building a mighty army. Lee also saw Hitler's use of paratroopers and came home convinced that paratroopers could make the difference.

No one wanted to hear that. Lee became such a proponent of air borne training that he once was forbidden to discuss the subject because his bosses were tired of hearing it. But he was right and he knew it, and so did President Franklin D. Roosevelt.

The President listened to the young officer from Dunn and, despite the objections of most of the military brass in Washington, told him to go ahead and see what he could do with his idea of sky soldiers.

"General Lee had been to the World's Fair in New York and seen those parachute towers they were using as rides," Adams said. "He ordered two of them for Fort Benning, Ga."

Using carnival rides and his own belief in what he was doing, Lee took a handful of soldiers with their out-of-date equipment and untried techniques. And when the dust had settled, he was the commanding general of the crack 101st Airborne Division.

Lee was at Eisenhower's side when D-Day was planned. he trained his paratroopers hard for their mission, and to this day the manual on airborne operations he wrote is still being used.

"There is no doubt that Bill Lee would have been the first American to hit France on D-Day," said Adams. "He would have been the first man out of the first airplane."

But it was not to be. Lee suffered a heart attack before the invasion and was sent home to Dunn to recuperate. He died four years later. His heart never healed.

The people of Dunn will remember their most famous son Friday night with a black-tie dress ball. The proceeds will be used to finish the museum the town is putting in Lee's home. Tickets are $100 a couple. You can get information by calling 892-4113 in Dunn.

A reporter once asked Bill Lee who the most important man in the military was. Lee said, "The buck private, of course."

Forty years ago tonight, 10,000 of those buck privates he loved and led painted their faces black, jumped out of airplanes and shouted his name in gratitude.

They were living up to another comment he once made: "You do not have a history," he told his first band of paratroopers. "But you have a rendezvous with destiny."

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the concurrent resolution.

The concurrent resolution (S. Con. Res. 140) was agreed to.

The preamble was agreed to.

The concurrent resolution, with its preamble, reads as follows:

S. CON. RES. 140

Whereas Major General William C. Lee of Dunn, North Carolina, served the United States with distinction in World Wars I and II;

Whereas General Lee was instrumental in conceiving and establishing the use of parachute and glides troops in the United States Army;

Whereas General Lee played a primary role in planning the assault on Nazi forces in France by over 10,000 United States paratroopers in connection with D-Day operations;

Whereas General Lee has become known as the "Father of the United States Airborne"; and

Whereas on June 6, 1986, the homeplace of General Lee in Dunn, North Carolina, will be opened as the William C. Lee Airborne Museum: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That the Congress of the United States recognizes the notable contribution of Major General William C. Lee to his country; expresses to his family the appreciation and gratitude of the Nation for his long, faithful, and outstanding military service; and designates June 6, 1986, as "William C. Lee Day".

SEC. 2. The Secretary of the Senate shall transmit a copy of this concurrent resolution to the family of Major General William C. Lee.

Mr. HELMS. Madam President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. DENTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HELMS. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

□ 1310

Mr. DENTON. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECOGNITION OF THE DEVOTION OF BOB HOPE TO THE UNITED STATES ON HIS 83D BIRTHDAY

Mr. DENTON. Madam President, I send a resolution to the desk, and ask unanimous consent to proceed to its immediate consideration. It is my understanding that this resolution has been cleared on both sides.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

Mr. DENTON (for himself, and Senators ABDNOR, BOREN, BUMPERS, BURDICK, BYRD, COCHRAN, DECONCINI, DIXON, DOLE, DURENBERGER, EAST, GOLDWATER, GRASSLEY, HATCH, HAWKINS, HECHT, HEFLIN, HELMS, HOLLINGS, KASSEBAUM, KASTEN, LAXALT, LEVIN, LUGAR, MCCLURE, MURKOWSKI, PRESSLER, ROTH, SIMPSON, STAFFORD, STENNIS, SYMMS, THURMOND, TRIBLE, WALLOP, WARNER, WILSON, AND ZORINSKY) submitted the following resolution (S. Res. 413), to recognize the devotion of Bob Hope to the United States on his eighty-third birthday.

Whereas the favorite and most beloved entertainer in America, Bob Hope, will observe his eighty-third birthday on May 29, 1986;

Whereas Bob Hope has staunchly supported American values and the interests of the Nation;

Whereas Bob Hope has entertained the men and women of the Armed Forces, both at home and overseas, since 1941; and

Whereas Bob Hope has received many awards including a Congressional Gold Medal and the Medal of Freedom: Now, therefore, be it

Resolved, That the Senate reaffirms its recognition of the devotion of Bob Hope to the United States and to the members of the Armed Forces and extends its best wishes to Bob Hope on the occasion of his having attained the age of eighty-three years young.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Alabama?

There being no objection, the Senate proceeded to the immediate consideration of the resolution.

Mr. DENTON addressed the Chair.

The PRESIDING OFFICER. The Senator from Alabama.

Mr. DENTON. Mr. President, only occasionally does a Member of this body have the privilege to introduce legislation with such enjoyment as I

feel today, along with 39 of my colleagues.

The purpose of the resolution is to recognize the devotion of Bob Hope to the United States on the occasion of his 83d birthday. It speaks for itself.

But, Madam President, I would add that it is entirely fitting that this body should mark Bob's 83d birthday which falls on next Thursday, a week from tomorrow, when as we know, we will be absent.

I can think of no individual who has been more representative of the best of America, who has performed more service to its citizens, who has cared more for our men and women in uniform, and who has better exemplified the humanity of this great land.

I cannot calculate, and I am not sure that anyone could, the number of hours, days, months—and I am sure that it runs into years—that Bob Hope has given of his own time to entertain our men and women in uniform, both in war and in peace, both in the United States and overseas. And I have had the privilege as one in uniform to enjoy those performances. His generosity in that respect is truly unbounded.

I owe him another personal debt, Madam President. During his 1971-72 Christmas tour in Southeast Asia, he personally went to the North Vietnamese Embassy in Laos to discuss the problem of American prisoners of war in North Vietnam. He did that as a private citizen at the request of the families of the prisoners, including my own family.

Unfortunately, Bob had to abandon his efforts because the North Vietnamese refused to allow him to visit Hanoi, and refused to deal with him seriously.

We in Hanoi did not know about his effort at the time, but I know that we would have welcomed him as a visitor far more than we did those Americans whom the North Vietnamese welcomed and did put in touch with us.

I am one of the Americans whom he has blessed with his personal friendship. I owe him personal gratitude for favors, and I convey gratitude on behalf of groups such as the ex-POW's, all the armed services, as well as all Americans for whom his many contributions have brought so much joy and benefit.

We all know that, in addition to his national and international achievements, Bob has been unselfish and caring for his family as well as for his fellow man. Together he and his lovely wife Delores raised four children, and his grandchildren abound.

Finally, Bob Hope has brought happiness and laughter to millions upon millions of Americans with his unique brand of humor, always gentle. He has the knack of making us laugh not at ourselves but because of the joy of life. His talent is not only unexcelled, but unique.

He is truly one of a kind. We Americans are proud and grateful that he is an American.

Mr. President, I ask all of my colleagues to join with me in cosponsoring the resolution, and I hope that we can pass it today as a truly fitting tribute to a great and beloved American.

Thank you, Madam President.

Mr. PRESSLER. Mr. President, I support the resolution of the Senator from Alabama. Bob Hope is a true national treasure, having been one of show business' brightest stars from vaudeville to radio, Hollywood, and television. His achievements and rewards are many, including a Congressional Gold Medal and the Medal of Freedom.

On the occasion of Bob Hope's 83d birthday, it is appropriate to recognize his lifetime of devotion to the servicemen and women of this country. He has traveled the world to entertain our Armed Forces, from World War II to Korea, Vietnam, and more recent conflicts.

I myself spent two Christmas holidays in Vietnam in the U.S. Army, and both times I was part of a very appreciative audience when Bob Hope and his show came to entertain the American forces there. Many American veterans have memories of similar shows in remote parts of the world, and all are grateful for his concern and thoughtfulness.

The PRESIDING OFFICER. Is there further debate on the resolution?

Hearing none, the question is on agreeing to the resolution.

The resolution (S. Res. 413) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 413

A resolution (S. Res. 413) to recognize the devotion of Bob Hope to the United States on his eighty-third birthday.

Whereas the favorite and most beloved entertainer in America, Bob Hope will observe his eighty-third birthday on May 29, 1986;

Whereas Bob Hope has staunchly supported American values and the interests of the Nation;

Whereas Bob Hope has entertained the men and women of the Armed Forces, both at home and overseas, since 1941; and

Whereas Bob Hope has received many awards including a Congressional Gold Medal and the Medal of Freedom: Now, therefore, be it

Resolved, That the Senate reaffirms its recognition of the devotion of Bob Hope to the United States and to the members of the Armed Forces and extends its best wishes to Bob Hope on the occasion of his having attained the age of eighty-three years young.●

Mr. DENTON. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

□ 1330

Mr. MOYNIHAN. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ANDREI SAKHAROV'S BIRTHDAY

Mr. MOYNIHAN. Madam President, today is Andrei Sakharov's 65th birthday. When Yelena Bonner was first in Washington at a reception last March, she mentioned to Senator KERRY and to me that she hoped the Senate might take note of the occasion of his 65th birthday, which, she told us, would be on May 21. Then she added a comment which seems to us so important, so concise and so necessary to know. She said: "The Soviet Union does not respect silent people." On the other hand, and as we do know, it ceaselessly attempts to silence people who ought to be heard.

Banished to the city of Gorky, Andrei Sakharov and his wife, Yelena Bonner, who is briefly in the West for medical treatment, have faced constant harassment from the KGB, meant to discourage their continuing commentary on the state of human rights in the Soviet Union and to further isolate them from their own people and from those of us in the West—and East and North and South, for that matter—who wish to associate ourselves with their work.

Their work, it should be recalled, intensified in the aftermath of the signing of the Helsinki declarations in 1975. These declarations granted, in the human rights provisions of the so-called third basket, what is in essence a treaty right to the citizens of the subscribing nations to take note of their government's own conduct wih respect to the commitments which were made. Helsinki Watch Committees were formed throughout Western Europe, in the United States and Canada, and briefly, desperately, courageously, one was formed in Moscow. Andrei Sakharov, one of the great physicists of our age, a member of the Soviet Academy, a Nobel laureate, gave his incomparable prestige to that enterprise. And with its contempt for its own people as well as for world opinion and international commitments, which too often characterizes the Soviet regime if not invariably so, Sakharov was sent into internal exile. He was banished to the city of Gorky, a city which is forbidden to Western visitors and even forbidden to Soviet visitors who do not have business there.

It was as cruel and intentionally cruel an act as one could imagine for the Sakharovs. He is not just a spokesman for the legitimate aspirations of the Soviet peoples; he is also a physicist of the most extraordinary achievement. I shall be speaking in a little while of some remarks made by our own most distinguished physicist, Sidney Drell, of the Stanford Linear Accelerator Center, who spoke of Sakharov and noted that his theoretical work is leading us at long last to an understanding of why the universe is composed of matter and not antimatter.

This is a mind the work of which will go down in this century along with that of Albert Einstein and the great masters of quantum mechanics, whose theoretical work has led us outward into the universe and inward into the atom and changed our understanding of all reality as we previously knew it.

Sakharov's work can only be done, as Sidney Drell observes, in the company of other physicists and with access to their new findings, with colloquys, with conferences, with exchange with his own peers, with his students—all that is denied him; the science in him killed, if you will, and the man imprisoned. That the Soviet Union has done this in an act of contempt for its own people and for the good opinion of the world has to be one of the most chilling facts of our age. They do not care what they do to Andrei Sakharov and they do not care what we think about it. That is evident. The rare exchange of this prisoner for that prisoner has not changed their internal policies.

Perhaps we will know, but it must be known to them and to the rest of the world that here, on the floor of the Senate, we know and we remember and we will continue to do so on this day.

A number of us have asked to speak and we shall speak with as much time as the Senate can make available to us. I do not want to do more than introduce the remarks that my good friend and colleague, Senator KERRY, and I shall make at the outset. I see that my friend from Massachusetts is on the floor and I wonder if he would wish to speak at this moment.

□ 1340

Mr. KERRY. Madam President, I thank my friend, the distinguished Senator from New York, not only for joining me in this effort and for allowing me the time to speak, but also for his concern and for his continued commitment to the effort to not be silent, to join Andrei Sakharov and others in the effort to bring to the world's attention on a continued basis, until they can be free, their plight and to remind people that we have a responsibility to do so.

Not long ago both the distinguished Senator from New York and I were meeting with Yelena Bonner here in Washington, and she pulled us aside and whispered to us, "Please don't forget that the 21st of May is the birthday of Andrei Sakharov." And so we are here today to join with our colleagues and with the institution of the Senate to remind people of our responsibility to pick up on the efforts that this great individual is making on behalf of all people in the world, and particularly what he is lending to the moral force behind the notion of individual freedom of liberty.

Today marks the 65th birthday of Andrei Sakharov. Obviously, in many ways this birthday is not a day to celebrate because Andrei Sakharov remains in what is known as "internal exile" in the Soviet Union, in the closed city of Gorky. He is separated from his wife Yelena Bonner, who is able to be here in the United States largely because of the commitment and because of the efforts of Andrei Sakharov. It is testimony alone to the plight in which they lived and he now lives that in order to secure the medical treatment for his wife, in order to gain for her the right to care for herself and to be cared for he had to stop eating; he had to literally refuse life in order to give life. He is separated from his children who live in Newton, MA, whom I have come to know, who have also been brought into the effort to try to bring the attention of the world to the plight of their parents to have to give up food and to be willing to turn away from life itself. He is not allowed to communicate with friends and colleagues even within the Soviet Union or to return to his home in Moscow.

Dr. Sakharov is a prisoner of the Soviet system—isolated and cut off from the world except to the degree that the world is willing to make him not isolated and not cut off.

By standards which the Soviet Union takes pains to avoid, Dr. Sakharov's birthday, however, may be in some sense a cause for celebration, and I say that because it is a celebration of the triumph of human spirit over the forces of oppression.

Yelena Bonner, his wife, has said, "The Soviet Union does not respect silent people."

Well, we do not tend to be silent in this country, and because of the actions and behavior of the Soviet Union, we frankly care little at this moment in time about their feelings regarding us on the issue of respect. We do not intend to be silent, but they should know that the world respects Dr. Sakharov because he has never remained silent.

When he was awarded the Nobel Prize in 1975, a prize that he was not allowed by the Soviets to receive, the citation by the Nobel committee cited him "the spokesman for the conscience of the world." And even from his place of exile in Gorky, Dr. Sakharov has continued to call upon the conscience of the world with great courage and obviously at great risk to his own life.

Andrei Sakharov has spoken out for human rights in the Soviet Union and throughout the world. He has spoken out in an effort to try to hold his country to the very standards which his country has promised to uphold in the Helsinki accords, the United Nations Charter, the Universal Declaration of Human Rights, and the International Covenant on Civil and Political Rights. He has spoken out on behalf of the Solidarity movement in Poland and on behalf of thousands of Jews who are still oppressed in the Soviet Union.

Above all, Dr. Sakharov has been a spokesman for peace. As a nuclear physicist—I listened to my colleague extol his abilities as a physicist—he has been one of the creators, we know, of the hydrogen bomb, but he has also been one of the creators of a new sense of responsibility about the consequences of having created that bomb.

He knows too well and he attempts to teach as well the consequences of that destructive power. He has accepted the moral responsibility, no matter what it has meant to he and his family and his life, of speaking out for nuclear arms control and restraint. His actions, the risks he has taken, have never been on his own behalf. He has always spoken out on behalf of others, taken risks on behalf of humanity, on behalf of the larger issue than himself, and particularly on behalf of his wife and his family and his fellow citizens. Andrei Sakharov has taken on the rulers of the Soviet Union because of that for which he stands. Because of the kind of man that he is, I think we can say today he has won in a sense. They may imprison his body, but they cannot place this man's spirit behind bars. They cannot imprison his determination to be an individual. He has won because due to his hunger strikes and the moral force he has brought to bear on the Soviet Government they were forced to relent and to finally allow Yelena Bonner to come to this country for medical treatment. He has won because he has inspired the world with his moral leadership and his courage.

In the 1975 Nobel Prize lecture, Dr. Sakharov said, though he could not deliver it himself, "We must make good the demands of reason and create a life worthy of ourselves and of the goals we only dimly perceive." In 1982, from exile in Gorky, Andrei Sakharov said, "I shall continue to live in the hope that goodness will finally triumph."

Today, Mr. President, on his 65th birthday, Andrei Sakharov is still, as we all know too well, not free but because of his courage and the inspiration and the moral leadership that he has given us, I believe that some day goodness will finally triumph and Andrei Sakharov will be free.

This is a man who gives meaning to words which many of us have listened to and believed in for a long time in this country about how individuals can make a difference, about how when you strike out against injustice you can change a small portion of events. Andrei Sakharov is literally sending out a ripple of hope to people all across the world and with that ripple this is one individual, one human being who has the ability to help sweep down the mightiest walls of oppression and resistance.

I should like, Mr. President, to call the attention of my colleagues to an article written in the Washington Post recently, "Yelena Bonner: My Life With Sakharov." That article outlines in stark, vivid fashion the nature of the existence of these human beings, how despite the fact that they have money to pay for window cleaning, they cannot get window cleaning because they are not allowed to have contacts with people, how they have to drive elsewhere to listen to the radio because their television and radio and phonograph are jammed, how they cannot use the phone. This man has no phone in his apartment. They must go elsewhere in the effort to be able to have contact even with those with whom he is alleged to be able to work.

So I ask unanimous consent that this article be printed in the RECORD.

Madam President, I thank my colleague, the distinguished Senator from New York, for joining me in this colloquy.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, May 11, 1986]

YELENA BONNER: MY LIFE WITH SAKHAROV

(By Yelena Bonner)

During my five-month visit to America, there have been many receptions, lunches, dinners, and serious conversations about my husband Andrei Sakharov and his ordeal. The questions vary, but sometimes it is abundantly clear that the questioner knows nothing about him. The questioner doesn't even know why he came to ask his question. Everyone was asking, so he asked, too.

It's that way back home in Russia, when you see a line in the street. That means something has been put out for sale, so you get in line, too. You don't know what they're selling. And the people ahead of you don't either. It doesn't matter, you'll figure it out later.

But even friends who know quite a lot about Andrei ask: "Who takes care of Andrei while you are here?"

No one. He is alone. Alone. He cleans up, mops the floor in the kitchen, does the laundry. He goes to the store, buys food, brings it home and cooks it. He eats alone, then washes the dishes.

"Does he really know how to manage?"

Yes, he knows. And it does not bother him. He does not think that household chores divert him from "eternal" and "immortal" matters. He respects such tasks, and is willing to help even when I am home, sometimes snatching work right out of my hands. It is in fact important to understand his attitudes toward such things. It resembles his attitudes toward people. Just as there are no little people or unimportant lives, there is no insignificant work.

He gets annoyed when someone asks: "Andrei Dmitrievich, you are such a great man, you need peace and quiet. Why should you risk you health going on hunger strikes for Liza and Yelena and Bukovsky and Ogurtsov and Moros?" He finds it difficult to reply to people who do not understand the roots of his behavior.

Sometimes people have asked him: "Why bother writing about some Jew who would like to emigrate?" Such questions he finds offensive, and he is puzzled that people who have met him do not know him at all.

He approaches household matters and everyday life with the same simplicity and respect as he does people. But it is difficult for him to be alone. He does not have time for everything he wants to do. Things require much more effort than they do in America. Sometimes he lacks the physical strength to cope.

"And when you were living alone, was your life like that, too?" people ask me.

"Yes, just like that."

"How did you manage if you needed six cardiac bypasses?

I managed, I did what I could. Two years ago I could not wash the windows before I sealed them for the winter. I washed them last summer, but I was feeling worse again in the fall, so over the winter they were dirty. I have money to pay a window cleaner, but I am forbidden to have contacts with people.

One day my television set broke down. I found the telephone number of a repair shop in the phone book and went outside to call. I did not have to look too far for a pay phone; the first two were out of order, but the third was working. I was still dialing the number when my secret service escort (or KGB agent—I don't know what to call him in order to avoid being accused of slander) pulled open the door and held down the button. He chewed me out, saying I knew very well that I was not allowed to use the telephone. Then he agreed to tell his boss that I needed a television repairman. Two days later the policeman who stands guard at our door politely told me: "The repairman is coming tomorrow."

"Why did you have to go to a pay phone? Can't you call from your house?" people ask.

We have no phone in our apartment. Academician Sakharov has been living in Gorky six years without a telephone. There have been times when I needed urgent medical assistance, not a television repairman. Andrei would have to run outside, even in freezing weather, to look for a phone booth. In winter, still fewer work properly. But now he is alone, and I don't know what would happen in case of a medical emergency.

In Soviet-made films shown in the West, Andrei speaks quite a bit on the phone. It is a deliberate attempt to convince the audience that he has a telephone. While I have been in America, they have allowed us the luxury of speaking to each other. Andrei is summoned to a telephone center, but not the usual one for international calls. Post Office 107 is especially equipped with a hidden camera, and the films have demonstrated how easily, with no regard for the law, they listen to and record conversations between a husband and wife. I don't know who makes the movies, but I think the sequences exposing our family affairs to the whole world are anti-Soviet. In any democratic country, where the law protects the individual and not the state, Andrei and I would win a court case against the anonymous peeping Toms who direct the films and the government officials who authorize them. Remember Watergate. A President was forced to resign because of wiretapping.

"Do you listen to the radio?"

Yes, we do. In order to tune in, we travel to the extreme edge of town, to the racetrack or to the cemetery. There we can pick up some Western stations. It isn't bad in spring and summer, but it is cold and windy in winter. The days are short; we don't like to drive at night because the roads are often not clear—you can see that in one of the films the authorities made—and they are slippery. So we seldom listen to the radio in winter.

"Why don't you listen at home?"

Because it is jammed. In our house, or at least in our apartment, since I don't know about the rest of our 10-story building, some device has been installed which prevents us from listening to the radio, which interferes with our television reception and also with our phonograph. The jamming occurs around the clock. We have tested it morning, afternoon, evening and night.

"Is it harmful for your health?"

Andrei has thought about this and does not know. I don't understand things at all.

"Can you read newspapers and magazines?"

All the Soviet ones we want. The Western magazines which we had managed to collect over four years, among them issues of *Newsweek, Time, Paris Match, U.S. News and World Report,* were all taken during the search of May 8, 1984. They have not been returned, nor have our clippings from Western newspapers. Even our Soviet press clippings were confiscated.

"What else do you read?"

Andrei does not read a lot—I am speaking about belles-letres where he usually follows my recommendations. He spends more time on scientific journals and reprints. I read a great deal, mostly Soviet intellectual magazines, both fiction and non-fiction; they contain much that is interesting. I also read books. While I was able to go back and forth between Moscow and Gorky, I would get English and American detective stories. My English is not up to more serious reading, but I am quite able to understand my favorite heroes, Nero Wolfe and his sidekick Archie the ladies' man. I also read Agatha Christie and John le Carre (difficult for me), among others. Occasionally, Andrei also reads English mysteries.

"Where do you get the Russian books and magazines? Do you buy them?"

Some newspapers we simply buy. We have yearly subscriptions for most of the literary journals and the newspapers. Subscribing is rather complicated in the Soviet Union, because many publications are "limited." That means that there is a ceiling on subscriptions and very few copies ever appear on sale. This may seem astonishing to people in the West—there are willing customers who cannot buy what they want, but that's the

way it is. I don't know if there is any other explanation for the limits besides the paper shortage, but often the limits are on the most popular publications. There is also a shortage of books that people would want to buy.

Andrei Dmitrievich and I have no problem getting subscriptions, and we can order practically anthing we want, with the exception of the magazines *America* and *England*. That is because I am a war veteran, and war veterans may subscribe to whatever they desire without worrying about limits. All I have to do is show my papers and pay for the entire year. For 1986 I spent nearly 500 rubles on subscriptions—and by Soviet standards, especially bearing in mind the low prices of our publications, that is a lot of money. As the saying goes, "Read until you can't stand it."

We have no problems with obtaining books, either. As long as Andrei Dmitrievich is an academician, he may order many of the books published in the U.S.S.R. from the Academic Bookstore in Moscow. In the past, we used to go there every month, and what a pleasure it is to dig around in books! The two of us were like Karl Marx, who when asked, "What is your favorite pastime?" replied: "Digging around in books."

Now we order books from the Academic Book catalogue and receive them by mail. That's less exciting. And for some reason, the best books often don't reach us. On the average, we order 25 to 30 rubles' worth of books a month. Books and magazines are the luxury of our life, just as they had been in my life before I met Sakharov.

Besides the things necessary for everyday living, we have made few purchases in our years together. In Moscow we did not buy any furniture except for some things for the kitchen and the bed we slept in. In Gorky, I bought a desk, a book shelf, a table and a few table lamps. We have not purchased a single carpet or crystal objet d'art (material, albeit superficial, indicators of life-style in our society). And we're not overly extravagant in terms of clothing, either. Look how far the question of reading material has taken me. But I think that the reader, interested in much or even in everything about Andrei Dmitrievich, will forgive me.

"What is the food situation in Gorky?"

It's not catastrophic and probably very much the way it is in any Soviet city other than Moscow or Leningrad. I will simply list what there is in the stores—not even in stores in general, but in the one where we market. It is located two or three blocks from us, perhaps a bit more. The return trip is uphill, and carrying groceries is too much for me since my heart attack. So I drive to the store. Andrei usually walks.

The grocery store always has sugar, tea (very poor quality), salt, some sort of cookies, rice, vegetable oil, several types of candy, semolina, and sometimes other grains and macaroni, but there has not been any buckwheat in the last six years. There is no butter, they do have margarine, sometimes cheese, almost always eggs. As for other food products—meat, chicken, sausage, fish—when they appear, so do long lines.

The dairy store almost always has milk and yogurt in the mornings, and often has cottage cheese and sour cream, and sometimes regular cheese. The vegetable store sells potatoes, carrots and beets, and very rarely squash or cauliflower. Apples, grapes and other fruits create very long lines—especialy for bananas or oranges. There are always juices.

The bakery has bread, black and white, during the day, but runs out in the evening, especially on Fridays, when people shop for their weekend trips to the country.

There is also a wine and vodka shop. They don't always have vodka, and long lines form when it's on sale. As a war veteran, I can shop without standing in line, simply by showing my papers. I sometimes use that right, especially to buy cottage cheese or fruit. Once I used it to purchase vodka. In the summer of 1985 I had lost weight drastically and developed abscesses under my arm. Concerned that the infection might spread, I decided to disinfect the skin thoroughly. Neither alcohol-saturated pads nor alcohol is available, so I went to buy some vodka. I picked the wrong day, a Friday, and the line was long. I took out my papers and people let me through to the front of the line. I asked for a bottle and then for two—it would save me a trip if the infection spread. When I came out of the store, a bottle of vodka in each hand, my KGB escort said, "Yelena Gaeorgiyevna, you don't use to drink, did you?"

"You'd drive anyone to drink."

I don't know whether he believed I had taken to drink or not. But this was during the gloomiest days of June 1985.

Gorky has several outdoor farmers' markets. On the average, the prices are three times what they are in the stores, and for some items, even higher. For instance, meat in the store costs 2 rubles a kilogram and between 6 and 8 rubles at the market. Potatoes in the store are 10 kopeks a kilogram and 30 to 50 kopeks in the market. Cottage cheese is 1 ruble at the store and 4-5 rubles in the market. To all intents and purposes, berries and certain fruits and vegetables exist only at the markets.

In the winter, the selection is very poor, and in order to get anything at all, you must arrive before eight in the morning. I always oversleep. In the summer, the market is much more festive—there are flowers, berries, and colorful fruits, primarily from the southern republics.

But the prices are horrifying. On a television program for New Year's Eve 1985, one of our comics joked that the Division for Combatting Embezzlement of Socialist Property would do well by arresting anyone shopping for melons or pears at the market; they would never go wrong, because no one can afford them on his salary alone. That's an exaggeration, of course, but there is a grain of truth in it, even though I see many shoppers at the markets.

Once again, my status as a veteran of the Great Patriotic War (World War II) allows us not to worry too much about groceries. Every city has special stores for this category of people. When I was exiled, I requested that I be put on the eligibility list of one of these stores. Before that, I used to bring almost all of our groceries from Moscow. Once I was assigned, we visited the special store twice a month to pick up our allotments.

Each allotment includes 1.5 kilograms of meat, one chicken, 1 kilogram of fish, buckwheat groats, peas, mayonnaise, 600 grams of butter, canned goods and a half kilogram of cheese. That food order really helps us out—especially in winter.

As I said, we used to go twice a month. But it was a form of social contact—with other customers, with the salespeople—and so we were forbidden to visit the store. Now the order is delivered to our apartment. Unfortunately, the privileges accorded veterans of the Great Patriotic War are not extended to other handicapped persons, who could use this sort of help to alleviate the hardships of their life.

One of the most frequent questions: "In the past, Andrei Dmitrievich did not want to emigrate. What is his attitude now?"

It seems to me that as soon as Andrei began to have contacts with journalists in 1972, they started asking this question. We were living on Chkalov Street, never suspecting that we would wind up in Gorky. Andrei would reply in a few words, most often in one brief sentence: "I don't discuss hypothetical situations."

In 1973 he received his first invitation to spend a year at Princeton University as a visiting professor. He accepted with thanks, but said he was not ready to emigrate and he was not preparing to do so. He added that he did not consider emigration possible for himself and gave several reasons why. This conversation was not reported accurately by the correspondent who discussed the invitation with him; the second half was simply omitted. To the best of my recollection, Andrei did not make any official attempt to go to Princeton.

When he received the Nobel Prize, he applied to the Office of Visas and Registration (OVIR) for a visa and was refused.

In 1977 he accepted an invitation to attend the AFL-CIO convention in America, although he did not reach OVIR in the application process. The Academy of Sciences did not issue one of the needed documents, so it was impossible to proceed.

In early 1983, Andrei received an invitation from the Norwegian government to take up permanent residence in Norway. The invitation was sent at the behest of the Norwegian parliament and all of the parties voted for it. Andrei replied to the invitation with the following letter:

To: The Norwegian Government

I accept with gratitude the invitation of the Norwegian government to move with my family to Norway for permanent residence. Any possibility for my departure from the USSR depends on the decision of the Soviet authorities. I was earlier (1975 and 1977) denied permission to take trips abroad and reference was made to the secret character of my work until July 1968. I hope you will ask the authorities about the possibility of my departure at this time.

In the case of a refusal, I hope the Norwegian government will support the following request which is of vital importance for our family. In September 1982, my wife Yelena Bonner submitted an application to travel to Italy for ophthalmological treatment including possible eye surgery. Her eye disease is the result of a concussion she suffered at the front during World War II. Because of the special conditions under which we live, medical treatment in the USSR is not possible.

Respectfully,

ANDREI SAKHAROV.

"What is your attitude toward the reports that your husband will be exchanged soon?"

My attitude is negative—not toward an exchange but toward the reports. I consider them disinformation. I think the story about an exchange on May 18 appeared in the press to make people forget that May 21 will be Andrei Dmitrievich's 65th birthday and to deter the kind of open and solemn ceremonies which have marked that day in past years.

"Are you planning to return to the USSR and, if so, when?"

I am planning to return and have even drawn up a list of the things I should buy, although I have not yet made the actual purchases. I expect to fly back toward the end of May.

□ 1350

Mr. MOYNIHAN. Madam President, I very much agree with and share the hopes to which the distinguished Senator from Massachusetts has referred. What will be the outcome of all this? What is the prospect for changed conditions and circumstances in the Soviet regime? I do not know.

The totalitarian regime is an altogether new experience for mankind—ideological and, at some levels, technological—and we do not know if such regimes ever collapse. But we can be sure that they decline. They decline when it becomes necessary for them to suppress their best and most creative people, which they have done in the case of Sakharov.

We know him as a scientist of world class who would have taught scientists equally capable, if not possessed of his rare genius. They have lost those students that Sakharov would have had. They have lost those people who would have been inspired by him.

It has been commented that 25 years ago, Soviet science had some things to be said for it. It was not without achievements. Russia was a European nation, with European standards of achievement and productive of scientific work. Even 25 years ago, you could find such work being done in the Soviet system—fine technology. They put the first satellite in space, and they put the first man in space. They have not done anything for a quarter of a century since.

You cannot command science. You can command prison guards, not science. You cannot summon forth the great achievements of the rare individual such as Sakharov.

It is that decline which is seemingly inherent in the system, and especially so with respect to matters of knowledge and understanding. A system which lives on a monopoly of knowledge by a very few simply cannot, in the end, be creative in a world of science, which, of necessity, requires the diffusion of knowledge. It will not happen. A regime will decline and does decline; it does not collapse.

This was clear very quickly after the Helsinki accords were signed. In 1975 the Nobel Committee awarded the prize for peace to Sakharov, citing him as "the spokesman for the conscience of mankind." Well, that is a fine Norweigan thought—the conscience of mankind. I do not know whether there is objectively such as phenonmenon, but I would like to think there might be. The citation went on to say:

In a convincing fashion Sakharov has emphasized that the inviolable rights of man can serve as the only sure foundation for a genuine and long-lasting system of international cooperation. * * * He has * * * fought for the ideal of a state founded on the principle of justice for all.

There is something antique to that language, is there not—"the inviolable rights of man"?

There are not many places in the world any longer where men's rights are thought to be inviolable, and not many places where they are not violated. Still, the Nobel Prize originated in an earlier age, an age that never knew totalitarianism.

A few months later, I was asked to come to Jerusalem for a special convocation of the Hebrew University, to which Sakharov had also been invited. The Helsinki accords had guaranteed individuals the right to associate with persons in other countries, guaranteed the right to leave a country for purposes such as a convocation of a great, world class university such as the Hebrew University.

Sakharov, on the telephone, has accepted the invitation, stating that he would be honored. Einstein was one of the founders of the Hebrew University, which has always had very special connections with physicists. At the last moment, with no explanation, with no announcement, it simply became clear that Sakharov was not going to appear, and his doctorate was awarded in absentia.

I spoke on that occasion, and I should like to cite the final remarks I made. I said:

Sakharov wanted to come * * * and Sakharov is not here. Which all the more enhances the importance of this occasion for those of us who are here. We are here to witness that he is not. We are here to attest to the world and most especially to the rulers of the Soviet Union that we most willingly share our honor and his with those who stand with him. More. That if he should think it fit company we would want it understood that we are among those who stand with him.

For Sakharov is here. And those who stand with him are here.

Madam President, we cannot say that these words have had much consequence. In a very few years Sakharov's confinement to Moscow was ended and he was exiled to Gorky. Yet, the world has not failed to note this. We would be wrong, in a very large manner, if we did not perceive the degree to which the treatment of the Sakharovs in the Soviet Union—and the others with them on the Helsinki Watch Committee—has all but finally destroyed the reputation of the Soviet Union as a place where reasonable hopes of humankind might reside.

This was a condition the Soviet Union once enjoyed in the West. After all, Marxist doctrine is Western. It is a condition the Soviets enjoyed for the first half century of the Soviet State—a widespread disposition either to share some of their ideology or at least to be sympathetic to it, and a wish that the Soviet Union somehow would rid itself of errors that were not inherent in the system, so that it might be humanized and become what it claimed it would be. All that is past.

Here and there on the peripheries of the metropolitan world there will be regimes coming to power ill-wedded to this ancient and discredited and all but vanished belief. There are Marxist-Leninists in Managua, we may be sure—more, perhaps, than there are in Moscow. But as a living doctrine, as a viable and competitive proposition about the future, and politics is an argument about the future, the Soviets fail, and it is their treatment of people such as Andrei Sakharov that has led to the almost visible physical collapse of attachment to that system in the West in the past decade.

□ 1400

(Mr. CHAFEE assumed the chair.)

Mr. MOYNIHAN. Mr. President, I call attention to some remarks made recently by Sidney Drell, who is, of course, one of our most eminent physicists, and is deputy director of the Stanford Linear Accelerator Center.

He spoke at a dinner for Yelena Bonner that was held in February in New York and spoke so lovingly of his friendship with her husband, Andrei Sakharov, and of a letter he had written to General Secretary Gorbachev in this matter.

I made reference earlier, Mr. President, to Sakharov's role in the world of physics. He is referred to most frequently as the father of the Soviet hydrogen bomb, and no doubt he was. But his seminal contributions to physics in general are perhaps not fully understood. This passage is in Sidney Drell's remarks which I referred to earlier and now quote. He said that the crucial contribution that Andrei Sakharov has made has been:

. . . to our quest to understand the evolution of the universe following its physical beginnings in the "Big Bang" of twenty billion or so years ago. Sakharov has provided the only clue we have for understanding why our universe is made predominantly of matter and not anti-matter. It is the suggestion that the proton, the nucleus of the hydrogen atom—long believed to be a stable particle of nature—may in fact decay just like other forms of subnuclear matter, albeit very, very slowly. This bold hypothesis is currently being tested at laboratories around the world. It is comforting to know that our universe lacks anti-matter because if a matter galaxy or star—or whatever—met one of anti-matter, we would all go "poof".

Mr. Drell also sent a letter to General Secretary Gorbachev last January 21, in which he asked the following:

If you refuse to let us welcome Sakharov here in the West with open arms and hearts which many of my colleagues and I and many of our universities are prepared to do, at least, Mr. General Secretary, permit Andrei and Yelena to return to Moscow and restore their privileges as Soviet citizens

able to work and speak out for peace and contribute to the world of physics.

When that will happen we shall see. But for the moment we stand on the Senate floor to attest to Sakharov's continuing exile.

Mr. President, I ask unanimous consent at this point in the RECORD that the remarks of Dr. Drell on February 11 and his earlier letter of January 21 to General Secretary Gorbachev be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

REMARKS AT DINNER FOR YELENA BONNER, NEW YORK, NY

(By Sidney D. Drell)

Yelena, you and Andrei know very well of my respect, my admiration, my support, and my love for you and what you stand for. On that I need say no more. Sakharov is not only a personal friend to me, but also a scientific colleague. I resent deeply the loss to science—not just to Russian science but to the whole world—caused by his six-year-long exile in Gorkiy. There he has been forced to work under a terribly severe handicap, isolated from the newest results and stimulating discussions which form the lifeblood for an active research scientist.

You should know that in addition to Andrei's deserved reputation as the courageous voice of the conscience of mankind and his recognition as the father of the Soviet H-bomb, he has made seminal contributions of crucial importance to our quest to understand the evolution of the universe following its physical beginnings in the "Big Bang" of twenty billion or so years ago. Sakharov has provided the only clue we have for understanding why our universe is made predominantly of matter and not anti-matter. It is the suggestion that the proton, the nucleus of the hydrogen atom—long believed to be a stable pride of nature—may in fact decay just like other forms of subnuclear matter, albeit very, very slowly. This bold hypothesis is currently being tested at laboratories around the world. It is comforting to know that our universe lacks anti-matter because if a matter galaxy or star—or whatever—met one of anti-matter, we would all go "poof". Collisions between little pieces of matter and anti-matter would make nuclear explosions look like a pop-gun.

Why does the Soviet Union so cruelly and mercilessly seek to destroy this scientific giant of whom they should be so proud as a national treasure, one of the greatest leaders of their strong scientific tradition? Do they really feel so weak as to fear his lone voice? For two decades Sakharov has repeatedly spoken eloquently about the need for the Soviet Union and the U.S. to give highest priority to efforts to reduce the danger of nuclear holocaust through good faith negotiations, cessation of nuclear weapon testing, and arms reductions. Sakharov's words are very similar to those of General Secretary Sakharov's in recent months.

I consider General Secretary Sakharov ill informed, indeed, if his grounds for forbidding Sakharov to come to the West are Sakharov's knowledge of Soviet weapons secrets which could be harmful to Soviet security. I've heard that argument many times before from Soviet officials and reject it totally. I know something about this subject from more than two decades of active involvement with the U.S. Government in technical issues of national security. Sakharov has not been in contact with Soviet work on nuclear weapons or military systems for twenty years. Given such a long lapse of time I know of no secrets that he could bring—even were he inclined to (which I very much doubt)—that could in the least compromise Soviet security. But I will respond to Mr. Gorbachev by saying that:

"If you refuse to let us welcome the Sakharovs here in the West with open arms and hearts—as many of my colleagues and I, as well as our universities are prepared to do—at least, Mr. General Secretary, permit Andrei and Yelena to return to Moscow and restore their privileges as Soviet citizens, able to work and speak out for peace and contribute to the world of physics."

Yelena, never doubt the strength and constancy of our support and love for you and Andrei, to whom your friend Lev Kopelev—Rubin in Solzhenitsyn's "First Circle"—has paid so fitting and beautiful a tribute in his autobiography, "Ease My Sorrows":

"The majesty of his spirit, the power of his intellect and the purity of his soul, his chivalrous coverage and selfless kindness feed my faith in the future of Russia and mankind."

STANFORD LINEAR ACCELERATOR CENTER, STANFORD UNIVERSITY,
Stanford, CA, January 22, 1986.

General Secretary MIKHAIL GORBACHEV,
The Kremlin,
Moscow, U.S.S.R.

DEAR MR. GENERAL SECRETARY: I write as a nuclear physicist who has been involved for many years in the analysis of weapons and efforts through arms control negotiations to reduce the dangers they pose.

I am pleased that 1986 has started with concrete new initiatives leading to raised hopes for progress in the mutual efforts of the Soviet Union and the United States to reduce the threat of nuclear holocaust. I welcome your important call for an end to all underground nuclear weapon tests based on verifiable procedures and for a major reduction in our current arsenals.

Recent proposals by you and by President Reagan, as well as your recent Summit meeting, have indeed raised the hopes of many people throughout our troubled world for the new year. To many, it is a source of great encouragement that the leaders of the world's two most powerful nations have declared their intentions to improve cooperation while working to reduce the threat of conflict between our societies. This hope is further fueled by anticipation of the follow-on-summits of 1986 and 1987 with their promise of substantive achievements.

At the same time as I express my support and appreciation for these important initiatives, I wish to address another issue that is of deep personal concern to me and to many people of good will in many nations. My reason for writing a personal letter to you is to urge you to permit an improvement in the circumstances of my friend and scientific colleague, Academician Andrei Sakharov.

Is it too much to hope, Mr. General Secretary, that 1986 may also see the return of Sakharov, one of the Soviet Union's most distinguished citizens, to his home and the normal privileges of a Soviet citizen in Moscow? Recall the important—indeed crucial—contributions that Sakharov has made to the very issues you yourself have raised in presenting Soviet positions for pursuing peace. For many years he has emphasized—as both you and President Reagan have also warned—that "the questions of war and peace are so crucial, they must be given absolute priority even in the most difficult circumstances" and that:

"The unchecked growth of thermonuclear arsenals and the build-up toward confrontation threaten mankind with the death of civilization and physical annihilation. The elimination of that threat takes unquestionable priority over all other problems in international relations. This is why disarmament talks, which offer a ray of hope in the dark world of suicidal nuclear madness, are so important."

At the summit you and President Reagan encouraged expanded U.S.-Soviet cooperation in fusion research for producing energy. Soviet achievements and worldwide stature in this sophisticated scientific field are based on the pioneering work of Andrei Sakharov in developing the tokamak concept. Sakharov's own participation in an expanded cooperative to harness fusion for peaceful purposes would do more than add his own considerable brainpower to this effort—many of his western colleagues would be strongly motivated to join in with him

On August 6, 1985, the fortieth anniversary of the atomic bombing of Hiroshima, you announced a five-month moratorium on underground nuclear bomb tests by the Soviet Union and offered to extend it into 1986 on a mutual basis with the U.S. It will indeed be a great day when the U.S. and the Soviet Union achieve a comprehensive test ban treaty and ban once and for all further development of deadly nuclear weapons. The path toward such a goal is long and arduous; and prominent among the first footprints on that path are those of Andrei Sakharov made almost thirty years ago. We honor his influential efforts within the Soviet Union which culminated in the Limited Test Ban Treaty of 1963, terminating above-ground testing of nuclear weapons and the buildup of radioactive poisons in the atmosphere. He said then that a complete:

". . . cessation of test explosions will preserve the lives of hundreds of thousands of people and will have a still greater indirect effect by helping to lessen international tension and to reduce the possibility of a nuclear war—the greatest danger of our age."

Can we hope to hear his reasoned and eloquent public voice, now silenced in Gorkiy, once again addressing this issue in 1986?

Is it too much to hope that we may also benefit from Sakharov's contribution to the renewed debate on the problems, prospects, and dangers of intensified U.S.-Soviet rivalry in developing weapons in space? He was ahead of his time when, in a 1967 interview with Ernest Henry, he simply and correctly described the dangers of a world armed with both offensive nuclear missiles and defenses against them:

"As everyone knows, the United States and the Soviet Union possess enormous stockpiles of strategic missiles with thermonuclear warheads. The two countries are, speaking figuratively, armed with nuclear 'swords'. The construction of an antimissile defense system would mean adding a 'shield' to the 'sword'. I think that such an expansion of nuclear missile armament would be very dangerous. This is why. Under the present political and technological conditions, a 'shield' could create the illusion of invulnerability. For the 'hawks' and 'madmen', a shield would increase the lure of nuclear blackmail. It would strengthen their attraction to the idea of a 'preventive' thermonuclear strike."

His technical judgment was also accurate, in my opinion, when he wrote to me from Gorkiy in 1983 in his last publicly available statement (Foreign Affairs, Summer 1983):

"Much is written about the possibility of developing ABM systems using super-powerful lasers, accelerated particle beams, and so forth. But the creation of an effective defense against missiles along these lines seems highly doubtful to me."

There is no doubt that his voice could make important contributions to the public debate on this issue which is so fundamental to future U.S.-Soviet policy planning and arms control prospects.

Finally, Mr. General Secretary, consider simply the human element. Sakharov is a great theoretical physicist, and it was as scientist to scientist that I first met him in Moscow at a working seminar organized by the Soviet Academy of Sciences. Soviet achievements in science are a source of great national pride, and Sakharov is one of your greatest theoretical physicists. How sad it is that he is now almost totally isolated from his scientific colleagues, their discussions, criticisms, and their latest results, which are so essential to a scientist's work. Is Soviet fear of his lone voice so great as to justify this destruction of a scientific giant?

The Soviet Union has gained deserved credit and praise for taking the step of compassion in permitting Andrei Sakharov's wife, Elena Bonner, to visit her family and seek much needed medical care here. I urge that you now take the second humane step of permitting Andrei Sakharov to return to Moscow to work for peace and for physics.

Respectfully yours,

SIDNEY D. DRELL,
Professor and Deputy Director, Stanford Linear Accelerator Center, President, American Physical Society.

Mr. MOYNIHAN. Mr. President, I see that my distinguished friend and colleague from Michigan has risen and I am happy to yield the floor to him on this occasion.

Mr. LEVIN. I thank my friend from New York and for his earlier effort.

The PRESIDING OFFICER (Mr. NICKLES). The Senator from Michigan.

Mr. LEVIN. I thank the Chair.

First, let me commend my friend from New York for what he and the Senator from Massachusetts are doing today. It is critically important that we not forget Andrei Sakharov, and again the Senators from New York and Massachusetts are taking the lead in making sure that the world remembers the Andrei Sakharovs that are still without freedom to emigrate, indeed within their country to live where they might choose.

Mr. President, today we are honoring a man of extraordinary courage, a man with a deep commitment to freedom and peace. Andrei Sakharov is a preeminent defender of human rights; and because he spoke out so vigorously and so often, he was finally forcefully denounced by the Soviet press, and banished from his home into internal exile.

For 6½ years, Andrei Sakharov has lived in isolation in the city of Gorky. Under the strict regimen imposed by the Soviet Government, he is forbidden to leave the city limits, forbidden to meet with foreigners and "criminal elements," forbidden to correspond or talk on the telephone with foreigners, even prohibited from scientific and purely personal communications, including those with his children and grandchildren.

But even under the restrictions of internal exile, Sakharov's mind has remained free, and, although with considerable difficulty, some of his writings still manage to reach the West. He writes on a whole range of issues—arms control and nuclear disarmament; the responsibility of scientists; the nature of the Soviet system and prospects for reforming it—but ultimately, everything ties back in to the question of human rights. In Sakharov's own words:

I am convinced of the interrelatedness of international security and defense of human rights * * *. The most important conditions for international trust and security are the openness of society, the observation of the civil and political rights of man—freedom of information, freedom of religion, freedom to choose one's country of residence (that is, to emigrate and return freely), freedom to travel abroad, and freedom to choose one's residence within a country.

Andrei Sakharov speaks and writes eloquently and directly. Reading his words, one knows instinctively that he is expressing fundamental truths about people and nations and how they should act toward each other. He is not saying anything completely new—many others have written about peace and freedom, responsibility and human rights. But the way Andrei Sakharov expresses himself, and most importantly, the place Andrei Sakharov sits while he writes, give his words a special urgency.

On the occasion of his 65th birthday, we must pledge ourselves to continue all efforts, both public demonstrations and quiet diplomacy, that might lead to Andrei Sakharov's release from internal exile.

Again I commend my friend from New York for his all-out efforts to keep this case before the court of public opinion.

Mr. President, at the request of the Senator from Massachusetts I ask unanimous consent, and I am sure my friend from New York will concur in this, that all statements relative to Andrei Sakharov's 65th birthday be accepted into the RECORD as though read and inserted as part of these proceedings which have been initiated by the Senators from New York and Massachusetts.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEVIN. I thank my friend from New York for yielding the floor and thank the Chair.

Mr. MOYNIHAN. Mr. President, I thank the Senator from Michigan, who is characteristically gracious, and we very especially welcome his presence on the floor on this occasion. He is always there when these issues arise, and that is why he has won the respect and affection of so many of us on both sides of this aisle and, I suspect, why he has learned to be feared in other parts of the world. That does him equal honor.

Mr. LEVIN. I thank the Senator.

□ 1410

Mr. MOYNIHAN. Mr. President, the question remains of the behavior of the Soviet Union. What can they hope to achieve, as Sidney Drell has also remarked, by destruction of a scientific giant? I know they do not care about Sakharov as a person. The regime does not indulge in such behavior.

But do they not know that even today as they speak about nuclear war, they do so in exactly the terms that he introduced them to 18 years ago, when he published his essay, "Thoughts on Progress, Peaceful Coexistence and Intellectual Freedom"?

It is Sakharov's position that the questions of war and peace are so crucial that, "They must be given absolute priority even in the most difficult of circumstances."

Now, it is an irony that with time, and now with the nuclear disaster at Chernobyl, the Soviet leaders have at least come to the point where they speak in these terms. When Mr. Gorbachev spoke to the world after the disaster at the Chernobyl reactor, he took note of the absolute priority of the questions of war and peace, nuclear war and peace. And yet, who is to believe the Soviet leaders if they have imprisoned the very man who first put this proposition to them? What can they expect from the West in the way of trust? Are they in fact speaking the truth of their own convictions? If they are, they have defeated them by their behavior to this extraordinary man.

When you think of a man of his stature in science, it does no wrong to think of Apollo, the Greek god of science and such-like inspiration. I find myself thinking of the tale of Cassandra, who Apollo looked upon with favor and granted the gift of prophecy, but then, having decided he thought otherwise of her, punished her not by taking away the gift of prophecy but leading others not to believe her when she spoke.

In some way the Soviet leaders are beginning to get themselves in this same position. If they have learned from this great Apollonian man, if indeed they have learned the absolute priority of the questions of nuclear war and peace, then their treatment of him has been such to make them not believed when they speak. They might consider this, if these words reach them—and, incidentally, Mr. President, these words will reach them. They are more than a little conscious

of what is said on the floor of the U.S. Senate. And they must really ask, as they come to Geneva with proposals on arms control which have to be attended to and are; they must really ask, when they consider whether we will abide by treaties, ratified or otherwise and on the assumption that they are doing the same; they must really ask, as they propose yet new understandings in the world: Who will believe them when they have imprisoned the man who first taught them the need to do so, the man who first gave them this capacity for destruction and first warned them of what it meant?

It was Sakharov in 1958 who first spoke of the dangers of continued testing in the atmosphere, which led in a not very long time to the Limited Test Ban Treaty, perhaps the most important single arms control agreement we have reached with the Soviet Union. He gave them the power. He warned them against its use. They have commenced to speak as if they understood the warning. But who is to believe them when they have imprisoned the man who first made it, who first told them, who first warned them?

This is much more an obstacle to understanding between the two nations than is probably understood in the Soviet system. It is very hard for them to make the leap into our sensibilities and system, even as it is hard for us to do likewise. We probably both have mirror images of the other, thinking the other's system cannot be all that different from the one we have. But they are so profoundly different. Still information does make its way through.

I have spoken in this country to persons who, at one time or another, have translated articles I have written on subjects I would have thought of no very great importance, but nontheless translated them for members of the Politburo. They do know what is going on in the world, to a degree. Sometimes their understanding is alarmingly at odds with reality and we do very much wonder who reports what to whom and what is their measure of reality.

But they must know the treatment of Sakharov has become a central standard of measure for assessing the trustworthiness of their propositions about the world's most profound issue, the issue of nuclear war and peace.

What are they to be trusted to do with respect to nuclear war if they have imprisoned the man who first gave them the capacity and warned them against its use? Do they understand this? I do not know how we would ever learn.

It is surely the case that they know that he does not possess any state secrets that would jeopardize the Soviet state if he were to come to the West. As we ourselves learned in short order after World War II with the explosion of the nuclear weapons in the United States, there are no secrets in science. There can be secrets in technology and there can be secrets in planning and operation, but science has no secrets. The Soviet physicists of the 1940's were fully able to reproduce the work of the American and British and German physicists of the midforties here in the United States. I think of Hans Bethe and Oppenheimer and of course the British who also worked at Alamogordo. Science is an international commodity. And from the beginning of quantum mechanics, it was clear enough what the structure of the atom would be. And once that became clear, the process of fission followed almost as a matter of deduction.

□ 1420

The technology is more demanding by far. But that technology is primarily a matter of resources. When they are gathered together and applied to an enterprise, the results can be predicted with high order of competence. If you know theoretically what to do and you find the resources to put that theory into practice, you can predict success with repeatability.

On the other hand, to return to the remarks I made a little earlier, for the Soviets to destroy a scientific giant, as Sidney Drell wrote in his letter to Gorbachev, is the first step in destroying their own science. To some it is doing no more than disabling their reputation for trustworthiness with regard to the most central aspect of our relationship with them—nuclear arms control. But they are just as surely beginning to erode their capacity to maintain themselves at least to a measure of Western standards of performance on the fringes of science, and to keep pace with the great enterprises now afoot in particle physics.

They will pay a price for this. They are paying a price for this. They have managed by sending their greatest physicists into exile. They proceeded with a program of nuclear reactors which ended up with the first genuine disaster of the age of nuclear power. The world watched as they were not horrified, and at some levels were contemptuous. What manner of men think they can deal with such matters competently when systematically they destroy their own competence?

Do the Soviets understand this? I do not know, Mr. President. But whether or not they understand it, it is true. There is more at stake with them in their treatment of Andrei Sakharov than is perhaps possible for totalitarian regimes to comprehend, and yet whether or not they comprehend those stakes, they are real. That cost is being paid.

As I draw this colloquy to a close on the occasion of the 65th birthday of Andrei Sakharov, I think my colleagues who joined me on this occasion would agree that in a year's time we shall return to the floor on May 21, either to witness the fact that he is still in Gorky, or to celebrate what small or large changes in his circumstances may have intervened.

Mr. President, I thank you for your courteous attention.

ANDREI SAKHAROV'S 65TH BIRTHDAY

Mr. KENNEDY. Mr. President, today the Senate pauses to extend best wishes to Andrei Sakharov on his 65th birthday. We are honored to have with us today his wife, Yelena Bonner, whom the Soviets finally permitted to come to the United States for medical treatment—but only after a long and bitter struggle, including a prolonged hunger strike by Dr. Sakharov. She has spent the last several months in Newton, MA, with her children, and will be returning to internal exile in Gorky later this week.

I met this morning with Yelena Bonner who expressed great appreciation for the efforts of so many concerned Americans to gain freedom for herself and her husband. Ms. Bonner and Dr. Sakharov have been living in exile in Gorky for many years—deprived of the most basic of human rights. Andrei Sakharov is under constant surveillance, prohibited from leaving Gorky, and forbidden any contact with foreigners. His plight has become a symbol of oppressed people throughout the world.

This extraordinary man has become a spokesman for the conscience of the world. A recipient of the Nobel Peace Prize, Dr. Sakharov has spoken out on peace and disarmament, on freedom of association, movement, information and opinion, on protection of the environment and on nuclear powerplants. In his 1975 speech accepting the Nobel Peace Prize, Dr. Sakharov spoke of the need to fight for every individual, against every act of injustice, and against every violation of human rights. "Peace, progress, human rights—these three goals are indissolubly linked: It is impossible to achieve one if the others are ignored."

We have not forgotten those eloquent words spoken 11 years ago. On this celebration "in abstentian" of Dr. Sakharov's birthday, we renew our pledge never to give up or give in. Not only for Dr. Sakharov, but also for the thousands of oppressed in the Soviet Union and throughout the world—whose names we do not know—we pledge to fight for the goals of peace, progress, and human rights.

Mr. President, I ask unanimous consent that two recent articles by Yelena Bonner and Andrei Sakharov may be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Washington Post, May 18, 1986]

AMERICANS DON'T WANT WAR—THEY WANT HOUSES, WITH YARDS, AND SO DO I

(By Yelena Bonner)

I am convinced that Americans want peace. I don't know about America—I'm not a specialist, like the schoolchildren who travel around the world on peace missions and can explain everything about rockets and so on. But while I am not as competent to judge, I maintain that Americans do not want war.

What Americans want is a house. No matter their place on the social ladder, their salary, capital, inheritance, winnings in the lottery or on the stock market (for me with my lack of education in these matters it is almost one and the same, even though I do know that people win more frequently—and lose more frequently!—playing the stock market than the lottery), they want a house of their own.

They want a house and the ground it stands on, and a surrounding bit of land. That's all. Some own a tiny house, like a toy cottage, and only the soil is in their flower boxes; others have lots of bedrooms, baths, and extensive lawns. The desire to own a house is not a class ambition; it encompasses upper, middle, upper-middle, or lower-income groups, and is an expression of a national trail, a desire for privacy.

Even one of New York's homeless, huddling in a blanket over a grating, will be insulted if you invade his privacy. A house is the symbol of independence, not even a material one, but some sort of combined spiritual and physical independence. The American feeling about his house expresses the main traits of Americans—the desire for privacy and independence. But that attitude gives rise to a third trait, "my house is my pride and joy."

And from that comes "My city, my state, my country is my pride and joy." There is no aggression or parochialism in that attitude. It is open and kind and caring both toward the house and toward everything that it stands for, the soil in the flower boxes and the lovingly-tended lawn, even if it's only three yards square. And, I say, this shows that Americans care about land in general and about the whole world. Only the other day my son told me that according to a poll, 43 percent of all Americans prefer growing flowers to any other outdoor pastime.

Americans do not want war. They want a house. The first lady says that when the president retires, they will sell the house in which they lived before the presidency. The children are grown and the place is too big for them, so they will buy a smaller house. A wonderful plan! And it's wonderful that the whole country knows it. The president doesn't want war, he wants a new house.

I also want a house, in addition to my usual wants that everyone be together and healthy and that there be no war. With enough land around it, and no more, for me to plant flowers. For the sake of nostalgia I could grow an ordinary Russian cornflower and an ordinary Russian daisy and a single birch tree. But to tell the truth, I find nostalgia a form of play acting.

I don't need a lot of bedrooms, just one for us and one for mother, a guest room and one more so that I'm always ready for our grandchildren. And I'd like a room where I could at last spread out my book and where Andrei could make a mess. What nonsense I'm writing! I want a house! This is me, who should be counting the days, no, the hours of my freedom to do what I want, even to type this freely, to type all my unattainable nonsense, such as "I want a house."

But you know, I'm sixty-three, and I've never had a house; not only that, I've never had a corner I could call my own. I started out like everyone else: a normal childhood, but then came a strange orphanhood—father and mother arrested and no one knowing whether they were alive or not. I lived in a single room with my grandmother, brother and sister. On the other side of the wall (we could hear everything) lived a man named Fyodorov with his wife and four children. When he got drunk he beat them. If they managed to get away, they would spend the night with us, sitting on the old trunk. Fyodorov never broke into our room. He was afraid of grandmother—everyone was afraid of her except me. I had my own fears, of course, but ever since my parents' arrest, I have never allowed myself to show my dread of anything.

Then there was the army. I guess there was a time when my "house" was a compartment in the hospital train, where I was head nurse. The war ended, and many people shared my room with me, like girl friends in Leningrad after the evacuation was over. Later, we had a room in a communal apartment—my first husband, two children, my mother, and I; often we had friends staying the night. There were 48 people in one apartment, and one toilet.

Later in Moscow, we had two rooms in the apartment where my mother, the children and I lived, and then we were joined by my son-in-law, and then by Sakharov. I think that the first time I was mistress of my own place was—it's hard to believe—in Gorky, in exile.

I do not want that. I want a house. My daughter has a house in Newton, Mass. It make me so happy to think that she has a house. Her family is caught up in our affairs, in our Gorky horrors and suffering, and our cares. They have forgetten the pleasure of their house. I want them to go back to caring about it. It has done so much for them—my daughter and her husband and their two children have been living in the house since their arrival in 1977. My son came there, followed by his wife, and their daughter was born there. Two families shared the house in a most un-American way—it was almost a communal apartment and it had almost a third family: my mother arrived and the impossibility of going back to Russia has kept her there close to six years. Where else could she go—live in exile in Gorky?

My dream, my own house, is unattainable for me and my family—that is, for my husband and myself, as unattainable as heaven on earth. But I want a house. If not for me, then for my son and his family. My son and I plan to buy one. And I am learning many new things. The house should be near good schools, my grandaughter is three and schooling is not far off in the future. It should be in the suburbs—vacations are short and a child should not have to grow up in a polluted city. It should be close to their work—both parents have jobs and there is only one car. It should have a full foundation and basement (I had never known such considerations to exist). It should have three bedrooms so that my mother can be with them, or at least visit. It should have a room and bath in the basement for guests. It should have a studio—Alyosha wants more than a house, he needs a workroom for his mathematics. But the cost is . . . oh! I want, I want, I want. More than the children, I want. But it's time for me to pack my bags. Not tomorrow, but very soon. The children live here, I live over there.

My time here has been a highlight of my entire life. For instance, I went to the Virgin Islands. I had never been in a climate like that, near palm trees—coconuts really do fall! My bare feet had never felt sand like this. The warm and quiet sea splashed just twenty steps away from me. I would call it paradise, but paradise is not simply a question of climate, or sand, or sea, or even apples (or pears—that historical argument from the Garden of Eden has yet to be solved). Paradise is being with people you love and treasure and not worrying about them. I wish Andrei were here. I wish my mother could sit in a rocker in the shade near those sweet, sleep-incuding oleanders, and I wish I could pick up the phone once a week and hear the calm voices of my children. Paradise, it turns out, is so simple and, it turns out, unattainable for me.

Long, hot hours on the white, hot sand; the sea—light blue, dark blue, turquoise. The bay is small—even with my ailing legs I managed to wander all the way to its left point one day, and to its right on another. I will always remember that arc, a smooth edge of sand, and the sea, which doesn't roar, but whispers, babbles. I'm afraid of lapsing into sentimentality (I think I already have, in fact), but I've never seen such a sea . . . it has such tranquility.

Perhaps I have grown more tranquil here. I am grateful that I was invited to that island and that it was so simple to give me five days to catch my breath, to work, and to have peace. Maybe those days let me regain my senses—to stop losing my temper with my family; to understand that I can change nothing or correct nothing; to stop tormenting my heart (the six bypasses may not be able to take it) and the hearts of others—hearts I love.

My husband told me just five months ago (God, I haven't seen him in five months and want to be with him so much!), "The world is further away from war than it has been in a long time." I believe him, and on that score, I live calmly. Especially since I have more than enough worries, cares, and misfortunes of my own.

What difference does it make if Gorbachev and Reagan meet in June or some other month? What difference does it make which of them is being cranky? First Gorbachev plays hard to get, like a girl invited for a date, pouting, considering: "I don't know, I have to think about it, probably not." Then Reagan sounds like a jealous girl, "It's her or me. Now or never." A recent newspaper article set me thinking along these lines. Actually, all three are alien to me—the newspaper and the two governments. I must be one of the world's least interested people in the problems that Reagan and Gorbachev are threatening to discuss or not discuss, when and if they meet or don't meet.

I want a house. I don't want war. Americans want a house, too. Americans don't want war.

So now with my surgically repaired organ of feelings and circulation I am writing in a hotel in New York, which is simultaneously a city and a country and a world. I am on the eighth floor in a corner room. One window opens on 61st Street, the other on Central Park. In two directions, unfolding from an angle, stetches a panorama that needs nothing added to it. Against the blue of the sky are the gray silhouettes of buildings that pierce it (light gray in the sun, darker in shadow), lines, lines, lines. How

can anyone say that New York is not beautiful? For me it is the city of cities, ready for the future.

Today I saw something amazing from the windows of this room.

I got up early, a bit after six. The haze of burgeoning buds barely showed over the trees, and the grass had not yet taken on a greenish hue. It was still yellow, the color of grass shoots. And now it's noon, and there is a delicate green smoke over the trees and the grass has turned green, a tender, tender green. So quickly, spring came in six hours. Lord, I want the whole world to feel this good. They say New York is at its best in springtime. And now I'm going downstairs into the city.

[From the New York Times, July 21, 1986]

A RETURN TO GORKY, AND A NOBEL SPEECH

(By Andrei D. Sakharov)

(Today is Andrei D. Sakharov's 65th birthday. My husband is celebrating it alone in Gorky. In two weeks, I will return to him and again share the ordeal of exile. The six months I have spent in America since I arrived for medical treatment have convinced me that my husband and his fate will be remembered here. I hope that some of the ideas that he expressed in his 1975 Nobel Peace Prize address will be remembered as well.—*Yelena G. Bonner*)

Peace, progress, human rights—these three goals are indissolubly linked: it is impossible to achieve one if the others are ignored.

International trust, mutual understanding, disarmament and international security are inconceivable without an open society, freedom of information, freedom of conscience and the right to travel and choose the country in which one wishes to live. Freedom of conscience, together with other civil rights, provides a basis for scientific progress and a guarantee that it will not be misused, a basis for economic and social progress and a guarantee that social rights can be defended effectively.

Détente can be assured only if it is accompanied by consistent attention to the availability and free exchange of information in all countries and absolute respect in all countries for civil and political rights. In short, in addition to détente in the fields of disarmament and trade, détente is needed in the field of ideas.

The Final Act signed at Helsinki is noteworthy because it extends official recognition to the complex approach which seems to be required for the solution of international security problems. The Act contains farreaching provisions on the connections between international security and the defense of human rights, the free flow of information and freedom of movement. These rights are secured by solemn undertaking of the participating states. Obviously, we cannot speak of guaranteed results, but we can speak of new opportunities that can be realized only by long-term, systematic work, in which the participating states, and especially the democracies, maintain a united and consistent attitude.

We must fight for every individual and against every act of injustice and against every violation of human rights. So much in our future depends on this.

In struggling to defend human rights, we ought first and foremost to protect the innocent victims without demanding the destruction or total condemnation of the regimes we hold responsible. We need reform, not revolution. We need a flexible, pluralist, tolerant society, which will foster a climate of free inquiry and debate and the open-minded use of the successes of all social systems. What is détente? What is rapproachement? We are concerned not with words but with a willingness to create a better and more decent society, a better world order.

Thousands of years ago, tribes were engaged in a fierce struggle for survival. It was important not only to know how to handle a club but also to be capable of intelligent thought, preservation of common knowledge and experience, and altruistic assistance to other members of the tribe.

Today, the whole human race faces a similar test. In endless space, many civilizations are bound to exist, among them societies wiser and more "successful" than ours.

An infinite number of other civilizations may exist on the preceding and following pages of the Book of the Universe. Yet we should not minimize our sacred endeavors in this world, where, like faint glimmers in the dark, we have emerged for a moment from the dark chaos of unconscious matter in order to fulfill the demands of reason and to create a life worthy of ourselves and of the goals we only dimly perceive.

Mr. DECONCINI. Mr. President, I am pleased to join my colleagues today to honor Dr. Andrei Sakharov on his 65th birthday. The importance of this occasion cannot be underestimated. Dr. Sakharov, a distinguished Soviet scientist and renowned advocate of human rights, is a prisoner in his own country. Why? Because he continues to speak out against Soviet violations of basic human rights and fundamental freedoms.

Dr. Sakharov has dedicated his life to the welfare of all mankind. His ideals formed the basis of the human rights section of the 1975 Helsinki accords, and he is the first Russian to win the Nobel Peace Prize. His accomplishments are numerous and worthy of praise. And yet, these very achievements are discredited by his own government.

Since January 1980, Dr. Sakharov has been held "hostage" in the isolated city of Gorky because of his condemnation of the invasion of Afghanistan by the Soviet Union.

The punishment of a man with such a brilliant scientific career and with such a deep compassion for the suffering of others is incomprehensible. More importantly, Sakharov's endurance of constant harassment is to be admired by all of us. His dedication to social justice is the epitomy of the heights to which the human spirit can rise despite the adversities it may face.

Mr. SIMON. Mr. President, I am honored to speak today on the occasion of Andrei Sakharov's birthday.

Mr. Sakharov is known as the world's spokesman for human rights. He founded the Helsinki Watch Group in the Soviet Union to monitor Soviet compliance with the Helsinki accords. He has gone on two hunger strikes to protest his and his friends' treatment by the Soviet Government. His dedication to the most noble cause of preserving human dignity is formidable. His strength through the years has proven indomitable.

The Soviets have exiled Andrei Sakharov and cut his connections to the outside world. The Soviets have forced-fed Mr. Sakharov, have forced him to appear in film as healthy and have abused Mr. Sakharov's human rights.

I look forward to the day when I can stand in this Chamber and welcome Andrei Sakharov to our Nation. I wish Andrei Sakharov birthday greetings and hope that next year, he will celebrate his birthday in freedom.

IN RECOGNITION OF ANDREI SAKHAROV'S 65TH BIRTHDAY

Mr. LAUTENBERG. Mr. President, I rise to honor Dr. Andrei Sakharov on his 65th birthday, designated by Congress as "National Andrei Sakharov Day".

Andrei Sakharov has brought Soviet abuses of human rights to world attention. As a dedicated human rights activist, he played a key role in founding the Moscow Helsinki Group to monitor Soviet compliance with human rights guarantees in the Helsinki accords. He has demonstrated unparalleled courage and tenacity in his efforts to urge Soviet compliance with the Helsinki accords. In 1975 the world recognized his contributions on behalf of human rights and world peace by awarding him the Nobel Peace Prize.

The Soviet Government also has honored Sakharov by awarding him the Hero of the Soviet Union Medal three times. But Sakharov's unrelenting commitment to the cause of human rights has embarrassed the Soviet Union, and they seek to crush him. To destroy his spirit. To quell his tireless efforts for freedom. Despite the honors the Soviets and the world conferred on him, in 1980 the Soviet Government banished Andrei Sakharov to internal exile in the city of Gorky for his human rights activities.

For 6 years, Andrei Sakharov has lived in the closed city of Gorky. The Soviets have systematically persecuted and isolated him and have sought to destroy his credibility in the Soviet Union and in the West. Despite these efforts, Andrei Sakharov has succeeded in keeping the eyes of the world focused on his struggle for human rights, individual freedom, and peace among nations. He has demonstrated that his quest for freedom is stronger than the Soviets desire to silence him.

That Andrei Sakharov is denied basic human rights is reprehensible. The Soviet Union has signed the Final Act of the Conference on Cooperation and Security in Europe. It is bound by the Universal Declaration of Human Rights. And it has ratified the International Covenant on Civil and Political Rights. These agreements guarantee Andrei Sakharov the right to freedom of movement, expression, and as-

sembly. They guarantee his right to family reunification. The Soviet Union must be held accountable for the promises it made when it signed these agreements; Promises it made to Andrei Sakharov and to all citizens of the Soviet Union.

Andrei Sakharov has not been alone in his campaign. His wife, Dr. Yelena Bonner, has raised a loud, strong voice for human rights. She, too, has been continually harassed and persecuted by the Soviets for these activities. She was sentenced to 5 years of internal exile in 1984 on charges of "slandering the Soviet State". After many years of urging and protest, the Soviets recently permitted Dr. Bonner to receive specialized health care in the West. I am pleased that after so many years the Soviets finally accommodated her medical needs and that she is in Washington, D.C. today to participate in ceremonies honoring her courageous husband. I regret, however, that her husband is not able to celebrate his 65th birthday in freedom. That he is forced to celebrate behind the walls of Soviet oppression.

Today Andrei Sakharov sits in banishment in Gorky. For his continuing efforts on behalf of the oppressed, he suffers. For his persistence and dedication in light of the grim fate mapped out by the Soviet Union, we applaud him and urge him to continue with his fight. For his sake and for the sake of all who respect and cherish freedom.

Dr. Sakharov's plight serves as a reminder to the free world of the great strides necessary in the Soviet Union to ensure the human and political rights of all citizens. We must speak out today for Andrei Sakharov's freedom. And we must continue to speak out on his behalf on every occasion so that he may celebrate his next birthday in freedom.

IN HONOR OF ANDREI SAKHAROV

Mr. RIEGLE. Mr. President, today, is Dr. Andrei Sakharov's 65th birthday. In his honor, Congress has designated May 21, 1986 "National Andrei Sakharov Day" so that all the world might pay tribute to this remarkable man, who has been called "the spokesman for the conscience of mankind."

Today, I am proud to join others in focusing public attention on the plight of Dr. Sakharov and his wife, Yelena Bonner, and in so doing, promote a greater appreciation for the suffering being endured by them and countless other Soviet citizens who are being denied their basic human rights.

The story of Dr. Sakharov and his wife is well know to us all. They have paid dearly for their insistence that the Soviet Government respect their right to human dignity and freedom.

Since 1980, Andrei Sakharov has languished in internal exile in the closed city of Gorky. Harassed by the secret police, he is denied the company of friends and colleagues and is not permitted to communicate with his family in the West.

Despite these hardships, he continues to speak out against Soviet violations of basic human rights and fundamental freedoms. His commitment to human rights, which saw him play a key role in the founding of the Moscow Helsinki Monitoring Group to oversee Soviet compliance with the Helsinki Final Act, is still evident today.

That commitment was recognized by the world when, in 1975, he was awarded the Nobel Peace Prize for "his love of truth and strong belief in the inviolability of human beings," and for his "courageous defense of the human spirit."

Until 1984, when she, too, was sentenced to internal exile for "slandering the Soviet State," Dr. Bonner served as the communication link between her husband and the outside world.

The free world was blessed recently with the visit to the West of Yelena Bonner. Despite official warnings not to talk to the media, Dr. Bonner did speak to us, and taught us a great deal. She showed us a world that few of us ever imagined; a world of isolation and physical difficulties that has been the Sakharovs' life for the past 6 years.

Echoing the words of Anatoly Shcharansky, Yelena Bonner reminded us that protests of Soviet human rights violations must be loud, they must be clear, and they must be consistent. Without that kind of support, those fighting for their rights inside the Soviet Union face a future of continued repression, with little hope of change.

The cover of respectability which the Helsinki accords lend the Soviet Government disappears when contrasted with the inhumane treatment of Dr. Sakharov and millions of others like him.

In their treatment of Dr. Sakharov, the Soviets show the world that they have no respect for the rights of their citizens, which are guaranteed in the Helsinki Final Act. This same blatant disregard was clearly demonstrated by their failure to immediately notify all of their citizens, and the citizens of neighboring countries, of the Chernobyl accident, so that precautionary measures could be taken.

Similarly, the Sakharov family is not permitted to be reunited, in violation of the Helsinki accords' guarantee of family reunification and family contact.

The Soviets' vow to "facilitate human contacts between people" was again shown to be hollow when they refused to permit Americans with loved ones living in areas affected by the Chernobyl accident to communicate with each other.

As Dr. Bonner's son, Alexei Semyonov, told us shortly before the November 1985 summit, in an appeal on his parents' behalf:

> If the Soviet Union is indeed interested in constructive talks, in creating an atmosphere of good will at the summit, they should make improvements in the human rights area which are of grave and immediate concern to the west. Human rights policy is the one true indicator of the Soviets' intentions; if they are not willing to make a humanitarian gesture of releasing my parents, living symbols of the struggle for human rights in the Soviet Union, then they are not interested in results at the Geneva talks.

The Soviet authorities must recognize that the treatment of their citizens is not an internal matter that can be ignored. Helsinki changed all that.

And so, on his 65th birthday, we say to Dr. Sakharov, so that all the world may hear: You are not alone. And neither are the countless others who struggle daily around the world for their freedom.

I urge that the Soviet Government honor Dr. Sakharov's request to freely emigrate to the West. The symbolic importance of such a gesture would provide important evidence of Soviet willingness to abide by its international human rights commitments, and would advance the discussion of other critically-important bilateral issues, including arms control, trade and human exchanges.

I urge our own Government to give the Sakharov case the priority attention it deserves. Just as it was appropriate for President Reagan to meet with Anatoly Shcharansky last week, so, too, is it appropriate for him to meet with Dr. Bonner before she returns to the Soviet Union.

Quiet diplomacy is simply not enough. As Shcharansky has argued, such an approach:

> . . . can only help if it is supported by strong public pressure so that for the Soviet Union there will be no illusions that the question of human rights, the questions of Soviet Jewry, the question of emigration are all very closely related to their economic and political interests.

He went on to say:

> I am sure that my release would never have been possible if there were not such a strong open campaign for me, and if President Reagan personally did not take such a strong, open position on my behalf.

Mr. President, Dr. Sakharov and his family and the other countless families seeking to join their loved ones must have their dream answered, just as Anatoly Shcharansky's finally was.

To all of them, we renew our pledge to speak out on their behalf and to fight for their rights until justice is done.

Mr. MOYNIHAN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

□ 1450

Mr. BINGAMAN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from New Mexico.

FUTURE TEACHER TRAINING CORPS FELLOWSHIP ACT

Mr. BINGAMAN. Mr. President, I have already sent to the desk a bill which I ask be referred to the appropriate committee. The bill, Mr. President, is the Future Teacher Training Corps Fellowship Act. It is designed to help deal with the problem of teacher shortages and teacher quality in America. Senators ROCKEFELLER, MATSUNAGA, GLENN, BURDICK, MECLCHER, and BYRD have joined me in this legislation and I welcome their support as original cosponsors.

This past Friday the Carnegie Forum on Education and the Economy released its study, "A Nation Prepared: Teachers for the 21st Century." This report calls for sweeping changes in the teaching profession. It says:

• • • Americans have not yet fully recognized two essential truths: First, that success depends on achieving far more demanding educational standards than we have ever attempted to reach before, and second, that the key to success lies in creating a profession equal to the task—a profession of well-educated teachers prepared to assume new powers and responsibilities to redesign schools for the future. Without a profession possessed of high skills, capabilities, and aspirations, any reforms will be short lived. To build such a profession—to restore the Nation's cutting edge—the Task Force calls for sweeping changes in education policy."

Its recommendations include a national certification of teachers, a national proficiency exam, a new position of "lead teacher", a greater voice for instructors, and teacher incentives tied to schoolwide student performance. The report also calls for other changes that bear more directly on the bill I am introducing today: To require a bachelors degree in the arts and sciences as a prerequisite for the professional study of teaching; to develop a new professional curriculum in graduate schools of education leading to a master in teaching degree, based on systematic knowledge of teaching and including internships and residencies in the schools; and to mobilize the Nation's resources to prepare minority youngsters for teaching careers.

The report recommends scholarships for master graduates to help defray the cost of their graduate studies. The report also recommends, "financial assistance for highly talented graduate students interested in preparing themselves for fields in which substantial long-term teacher shortages exist." The report emphasizes that, "the Federal Government should refocus all financial aid relating to the preparation of teachers to the graduate level."

This bill attempts to do that. Its aim is to attract outstanding individuals to the teaching profession, at a time when the need is greater than ever before.

STATEMENT OF NEED—TEACHER SHORTAGE

Mr. President, we are in the grips today of a serious teacher shortage that promises only to worsen. It is estimated that between 1986 and 1992 this Nation will need 1.3 million new teachers. This is in the face of a declining pool of young college graduates from which prospective teachers can be recruited—smaller than at any time in recent history. The decline occurs at a time the children of the "Baby Boomers" are creating heavy demands for schooling. The number of new teachers entering the profession each year declined for 300,000 in 1972 to fewer than 150,000 in 1982. Within this decade 50 percent of the current teaching force will retire.

Moreover, the shortage will not be uniform. Some sections of the country will be harder hit than others. For example, California will need 85,000 new teachers by 1990. A 1984 annual survey of teacher placement officers also showed that five teaching fields—mathematics, physics, chemistry, computer programming and data processing—were particularly short of teachers.

Increasing career opportunities for women and minorities have also decreased the once readily available pool of potential teachers. Compounding the problem is the dramatic increase in the minority student population, even as the proportion of minority teachers is declining. By the 1990's, minorities will constitute 30 percent of the total school population; yet, they will comprise less than 5 percent of the elementary and secondary teaching force.

THE FUTURE TEACHER TRAINING CORPS FELLOWSHIP ACT

My hope is that the legislation we are introducing today will help reverse these disturbing trends.

The purpose of the Future Teacher Training Corps Act is to award graduate fellowships through State grants to outstanding undergraduate students and to midcareer people who are interested in the teaching profession. In return for the scholarship, the recipient will agree to teach in geographical areas of the State or in subject areas where a teacher shortage exists. The bill defines fields of study in shortage areas as math, the sciences, and any other three subjects as determined by the State. Geographic shortage areas, also determined by the State, may include remote rural areas or inner-city schools.

The State would be the grantee, receiving grants in proportion to its share of the total school-age population. The bill requires that recipients be selected on the basis of outstanding scholarship in undergraduate school, and if appropriate, previous work experience.

The bill sets certain preconditions that a State must meet to qualify as a grantee. One of these requirements is that a recipient may only attend institutions that have a clinical internship program approved by the State. Further, the State must have a precertification teachers examination program in place by the time the first recipients graduate. These two requirements work together to ensure that students will have a practical intership experience, while also requiring that the State have in place an exam for entering teachers to test their academic skills. Currently 30 States have in place or are considering a precertification exam for incoming teachers.

Education experts point to the serious underrepresentation of minority teachers in the United States. This bill requires the State to recruit underrepresented groups in teaching, including black Americans, Hispanics, Asian Americans, and American Indians.

A student will continue to receive a $5,000 annual fellowship if he or she is enrolled full time in a graduate program pursuing teacher certification, participates in a clinical internship program approved by the State, and if appropriate, pursues academic courses in the field in which he or she intends to teach. Those targeted for participation are students now in undergraduate school that may need an incentive to enter teaching, or those desiring to make a midcareer change. Recipients cannot be certified by the State at the time of the award, so the legislation will not take current teachers out of the teaching force and further erode our teacher supply.

EDUCATIONAL EXCELLENCE IN THE NATIONAL INTEREST

In response to the perceived educational decline many State and local governments have made sweeping changes in curricula, high school graduation requirements, testing programs, and policies for the certification and compensation of teachers. Although States and localities bear primary responsibility for elementary and secondary education, educational achievement is clearly a national concern. And that concern must focus on the competence and productivity of the labor force produced by our schools. As the Chairman of a Senate Democratic Working Group on Economic Competitiveness I have seen the critical need to improve our human capital resources, particulary our educational resources. To meet the demands of the world marketplace and our national demands at home, education is the key to a highly skilled work force. And, it begins with quality teachers.

QUALITY TEACHERS FOR EDUCATIONAL EXCELLENCE

Teachers are the most important, yet the most underrated component of educational excellence.

To make this point the Rand Corp. in a report described a want-ad for a typical secondary school teaching assignment:

College graduate with academic major (master's degree preferred). Excellent communication and leadership skills required. Challenging opportunity to serve 150 clients daily, developing up to five different products each day to meet their needs. This diversified job also allows employee to exercise typing, clerical, law enforcement, and social work skills between assignments and after hours. Adaptability, helpful, since suppliers cannot always deliver goods and support services on time. Typical work week 47 hours. Special nature of work precludes fringe benefits such as lunch and coffee breaks, but work has many intrinsic rewards. Starting salary $12,769, with a guarantee of $24,000 after only 14 years.

The description makes the point: Who would be interested in such a job?

Yet, whether one agrees with the conclusions and approach of the Carnegie Report to improve the profession, at least we are talking about the right issues. A group of deans from many of America's foremost education schools who call themselves the Holmes Group, has also urged major reform of teacher education. Their report, Tomorrow's Teachers, states:

The quality of teachers will not be improved unless we improve the quality of their education—and we cannot accomplish this task without changing the universities, the credentialing systems, and the schools themselves.

CONCLUSION

Americans should be told that nothing of substance can be accomplished until expectations for their children have been radically changed. We need a wholly new and higher standard of performance than has ever before been achieved by most American schools.

If our standard of living is not to fall steadily in the years ahead, if our democracy is to function effectively into the next century, our schools must graduate the vast majority of their students with achievement levels long thought possible for only the privileged few. The American mass education system, designed in the early part of this century for a mass-production economy, will not succeed if it merely regains the standard of excellence it once had.

Everything depends on the teachers. Without very well-educated teachers, great gains in the education of our youth simply cannot be achieved.

I therefore urge support for this legislation.

I ask unanimous consent that the full text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2487

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Future Teacher Training Corps Act".

SEC. 2. Title V of the Higher Education Act of 1965 is amended by adding at the end thereof the following new part:

"PART G—FUTURE TEACHER TRAINING CORPS FELLOWSHIPS

"FINDINGS AND STATEMENT OF PURPOSE

"SEC. 581. (a) The Congress finds that—

"(1) excellence in and access to education is a national priority to improve human resources of the Nation, particularly to maintain economic competitiveness of the Nation;

"(2) although the States and localities bear primary responsibility for elementary and secondary education, educational achievement is a national concern;

"(3) demographic trends show a serious teacher shortage with some estimates projecting by 1990 1 million new teachers will be needed in the United States;

"(4) shortages of teachers exist in certain geographic areas of each State and in certain subject matter areas;

"(5) while there is a dramatic increase in minority student population, the proportion of minority teachers is declining, so that by 1990 minorities will constitute 30 percent of the total school population and comprise less than 5 percent of the elementary and secondary teaching force; and

"(6) it is appropriate to provide fellowship funds for outstanding students and experienced individuals to encourage them to pursue careers in teaching and to help address the serious teacher shortage.

"(b) The purpose of this part is to make available, through grants to the States, fellowships to individuals—

"(1) who are outstanding postsecondary students or experienced individuals, and

"(2) who demonstrate an interest in a teaching career and a desire to teach in areas of the State in which there is a shortage of elementary or secondary school teachers or in fields of study in which there is a shortage of elementary or secondary school teachers in the State, or both.

"ALLOTMENT OF FUNDS

"SEC. 582. (a) GENERAL ALLOTMENT.—From the sums available pursuant to section 590(a) to carry out this part in any fiscal year, the Secretary shall allot to each State an amount which bears the same ratio to such remainder as the school-age population of the State bears to the school-age population of all States, except that no State shall receive less than one-half of 1 percent of such remainder.

"(b) MOST RECENT DATA.—For the purpose of this section, the population of a State and of all States shall be determined by the most recently available data from the United States Census Bureau.

"(c) REALLOTMENT.—If any State elects not to receive its allotment under this part, the Secretary shall reallot, among the remaining States, amounts from such State in accordance with subsection (a) of this section.

"(d) DEFINITION.—For the purpose of this section, the term 'school-age population' means the population 5 years of age through 17 years of age.

"SELECTION OF FELLOWSHIP RECIPIENTS

"SEC. 583. (a) SELECTION REVIEW PANEL.—The Governor shall appoint a Selection Review Panel for the purpose of selecting individuals who will be awarded fellowships under this part who are interested in careers in teaching and who agree to teach in areas of the State in which there is a shortage of elementary or secondary school teachers or in fields of study in which there is a shortage of elementary or secondary school teachers in the State, or both.

"(b) SELECTION PROCEDURE.—(1) The Governor shall establish selection procedures to be applied by the Selection Review Panel appointed pursuant to subsection (a), together with such application procedures as may be necessary.

"(2) The application procedures established under paragraph (1) shall include—

"(A) rank in the graduating class at an institution of higher education,

"(B) grade point average in the institution of higher education,

"(C) leadership activities in the institution of higher education,

"(D) scores on recognized admission examinations for institutions of higher education and for graduate education, if applicable,

"(E) recommendations of faculty at an institution of higher education,

"(F) submission of evidence of scholarship, including a writing sample or a completed project, and

"(G) a description of previous work experience.

"GRANT APPLICATIONS

"SEC. 584. (a) IN GENERAL.—The Secretary is authorized to make grants to States in accordance with the provisions of this part. In order to receive a grant under this part, a State shall submit an application at such time, in such manner, and containing or accompanying such information as the Secretary may prescribe. Each application shall set forth a program of activities for carrying out the purpose set forth in section 581 in such detail as will enable the Secretary to determine the degree to which such program will accomplish such purpose.

"(b) TERMS OF APPLICATIONS.—The Secretary shall approve an application only if the application—

"(1) describes the selection criteria and procedures to be used by the State in the selection of fellowships under this part which meet the requirements of section 583 and the other provisions of this part;

"(2) provides that the Governor of the State will administer the program;

"(3)(A) describes the outreach effort the Governor intends to use to publicize the availability of the fellowships authorized by this part to postsecondary students in the State and to potential midcareer applicants in the State;

"(B) provides assurances that the State will recruit among underrepresented groups for the program authorized by this part, particularly Black Americans, Hispanics, Asian Americans, and American Indians;

"(4) provides assurances that each recipient eligible under section 586(c) who receives a fellowship shall enter into an agreement with the Governor under which the recipient shall—

"(A) within the 3-year period after completing the postsecondary education for which the fellowship was awarded—

"(i) teach in areas of the State in which there is a shortage of elementary or secondary school teachers or in fields of study in

which there is a shortage of elementary or secondary school teachers in the State for a period of not less than 3 years for the first year for which assistance was received and 4 years if the recipient receives assistance for 2 years; and

"(ii) teach in areas of the State in which there is a shortage of elementary or secondary school teachers in a field of study in which there is a shortage of elementary or secondary school teachers in the State for a period of not less than 2 years for the first year for which assistance was received, and 3 years if the recipient receives assistance for 2 years,

in an elementary or secondary school of a local educational agency of such State, a public elementary or secondary school of such State, an Indian school funded by the Bureau of Indian Affairs, or a public educational program in such State, any of which may be determined by such State, but in no event shall any recipient be required to teach for less than 2 years or more than 4 years;

"(B) provide the Governor with evidence of compliance with section 586 as required by such agency; and

"(C) repay all or part of a fellowship received under section 585 plus interest and, if applicable, reasonable collection fees, in compliance with section 587 and regulations issued by the Secretary under section 588, in the event that the conditions of clause (A) are not complied with, except as provided for in section 589;

"(5) provides (A) that the agreement entered into with recipients shall fully disclose the terms and conditions under which assistance under this part is provided and under which repayment may be required, and (B) a description of the manner in which the Governor will collect amounts owed under the program authorized by this part;

"(6) provides assurances that fellowship recipients may only attend institutions of higher education that have a clinical internship or experience program approved by the State;

"(7) provides that the State has a continuing education requirement for practicing teachers within the State;

"(8) provides assurances that a precertification teachers examination program will be in effect not later than 2 years after the first fellowships are awarded in the State under this part;

"(9) provides assurances that fellowships authorized by this part will be awarded without regard to sex, race, handicapping condition, or creed;

"(10) provides assurances that, with respect to the awarding of fellowships under this part, equal opportunity will be given to all postsecondary students in the State; and

"(11) provides that not more than 3 per centum of the grant shall be used for the administrative costs of the State in carrying out the provisions of this part.

"(c) CONSULTATION.—In developing the selection criteria and procedures to be used by the State, the State shall solicit the views of local educational agencies and other interested parties as the State deems appropriate, including classroom teachers, representatives of institutions of higher education, and representatives of the general public.

"AMOUNT AND DURATION OF ASSISTANCE

"SEC. 585. (a) IN GENERAL.—Each recipient shall receive a fellowship not to exceed $5,000 for each academic year of graduate education in preparation to become an elementary or secondary school teacher. No individual shall receive fellowship assistance for more than 2 years of graduate education, as determined by the Governor.

"(b) INTERNSHIP ASSISTANCE.—Each institution of higher education, at which fellows receiving assistance under this part are enrolled in a post-baccalaureate program, is encouraged to insure that each such fellow will participate in an internship program at an elementary or secondary school of a local educational agency under which the local educational agency will provide assistance to the participating fellow.

"FELLOWSHIP CONDITIONS

"SEC. 586. (a) Recipients of fellowship assistance under this part shall continue to receive such fellowship payments only during such periods that the Governor finds that the recipient is—

"(1) enrolled in a post-baccalaureate program in an institution of higher education;

"(2) pursuing such a program for teacher certification, and, if necessary, together with courses in an academic field in which the student intends to teach;

"(3) participate in a clinical internship experience program approved by the State; and

"(4) maintaining satisfactory progress as determined by such institution of higher education.

"(b) At the time a recipient of a fellowship is chosen, the recipient may not meet the teacher certification standards of the State.

"FELLOWSHIP REPAYMENT PROVISIONS

"SEC. 587. Recipients found by the Governor to be in noncompliance with the agreement entered into under section 584(b)(4) shall be required to repay a pro rata amount of the fellowship awards received, plus interest, a penalty equal to 100 percent of such pro rata amount of such fellowship awards (without regard to interest thereon), and, where applicable, reasonable collection fees, on a schedule and at a rate of interest to be prescribed by the Secretary by regulations issued pursuant to this part.

"EXCEPTIONS TO REPAYMENT PROVISIONS

"SEC. 588. (a) IN GENERAL.—A recipient shall not be considered in violation of the agreement entered into pursuant to section 584(b)(4)(C) if the recipient—

"(1) is serving, not in excess of 3 years, as a member of the armed services of the United States;

"(2) is temporarily totally disabled for a period of time not to exceed 3 years as established by sworn affidavit of a qualified physician;

"(3) is unable to secure employment for a period not to exceed 12 months by reason of the care required by a spouse who is disabled;

"(4) is seeking and unable to find full-time employment for a single period not to exceed 12 months; or

"(5) satisfies the provisions of additional repayment exceptions that may be prescribed by the Secretary in regulations issued pursuant to this part.

"(b) TOTAL DISABILITY.—A recipient shall be excused from repayment of any fellowship assistance received under this part if the recipient becomes permanently and totally disabled as established by sworn affidavit of a qualified physician.

"AUTHORIZATION

"SEC. 589. (a) AUTHORIZATION AND NUMBER OF FELLOWSHIPS AUTHORIZED.—(1) There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this part for the fiscal year 1987 and for each of the succeeding fiscal years ending prior to October 1, 1990.

"(2) The Secretary is authorized during the fiscal year 1987 and for each of the succeeding fiscal years ending prior to October 1, 1990, to award not to exceed 5,000 fellowships under this part.

"(b) AVAILABILITY OF FUNDS.—Sums appropriated pursuant to this section for any fiscal year shall be available until the end of the second fiscal year succeeding the fiscal year for which they were appropriated.

"DEFINITIONS

"SEC. 590. As used in this part—

"(1) 'clinical internship or experience program' means a program that provides the student with a progressive series of preprofessional field experiences in a regular school classroom setting on a regular basis throughout the student's graduate education, including classroom observation, tutorial roles with students, teacher helper roles, teacher aide roles, and internships or periods of student teaching;

"(2) 'continuing education' means a program of education that takes into account developments in theories of learning and content areas, and may include locally based in-service instruction;

"(3) 'fields of study in which there is a shortage of elementary or secondary school teachers' means mathematics, the sciences, and any 3 other fields of study designated by the Governor;

"(4) 'Governor' means the chief executive of a State; and

"(5) 'State' means the several States of the Union, the District of Columbia, and the Commonwealth of Puerto Rico.".

Mr. BINGAMAN. Mr. President, I know that the Senator from West Virginia would like to speak, also, on behalf of this bill, and I therefore yield the floor.

□ 1500

Mr. ROCKEFELLER. Mr. President, I strongly commend my distinguished colleague, Senator BINGAMAN, for proposing the Future Teacher Training Corps Fellowship Program. It is consistent with the work he has been doing as chairman of the Competitiveness Task Force, which has been very aggressively at work on our side of the aisle.

Our task force's view is that America must compete in the world not just through its trade policy or its fiscal policy or its budget policy, but also by creating an excellent education policy. In fact, there is some feeling that education is at the root of all we have to do in order to make ourselves great again as a country.

Every policy is important, other interests are important; but without an excellent education system in place, all else eventually fails.

Therefore, for this and other reasons, I am very proud to be a cosponsor of this legislation. The Future Teacher Training Corps addresses the need to attract more individuals into the teaching profession, and it also calls for the improvement of the skills of those who are already in the profession.

As the Senator from New Mexico indicated, it would award fellowships to college students and to teachers who are in midcareer who qualify by meeting certain standards. Both of those categories of individuals would be eligible for financial aid to obtain graduate degrees in subjects which are fundamental to the future of our country.

Some of the subjects that will be targeted are those where we are the weakest—math, science, chemistry, physics. I would like to see foreign languages receive special emphasis as well.

The Japanese have been translating and reading our technological journals and literature for a generation, reading everything we publish, and learning from our successes and our mistakes. They have learned our lessons and leapfrogged past us to outdo us in product development and applications. We, on the other hand, decline to learn to speak Japanese, decline to familiarize ourselves with other languages—this is a major reason why we are being beat in trade.

I support the idea of assisting future and existing teachers to obtain graduate degrees. I believe the Federal Government must set a national goal of keeping our good teachers. Attracting more people into teaching should be a supreme national priority.

Mr. President, I also hope that at some point soon we will recognize that there are a lot of young people approaching or already in college who also want to get into teaching or who might choose to get into teaching should the incentive and encouragement from the Federal Government, or otherwise, be offered.

Coming from a rural State, West Virginia, I think it is essential that targeted Federal help—such as undergraduate scholarships—be provided to encourage bright high school and college students to enter teaching and teach in underserved areas of the States they come from. But that is a matter for another day.

Experts are focusing on the prospect of a severe teacher shortage over the next decade. I worry about it. I also think we have an absolute crisis on our hands at this moment.

The National Association of Independent Schools reported recently that about half of the new science and about half of the new math teachers in 1982 were hired with emergency certificates—emergency certificates, Mr. President, because qualified teachers were simply not available.

□ 1510

Now, one can talk about trying to do a better job in competing with the Japanese, the Germans and Koreans, but one cannot achieve much without having an adequate teaching force that is well enough trained and which is ample enough in size so that we do in fact compete successfully with them.

The fact of the matter is that the average American high school student knows only about half as much math as does his or her Japanese high school equivalent. That is stunning, to say the least. American students continue to be among the poorest achievers in international competitions in math and in science. This is wrong for the Nation and dangerous for the Nation's future.

The Future Teacher Training Corps bill, through Senator BINGAMAN's leadership, recognizes that this is a national crisis and that indeed education must be a national priority. And following from that, there must be a national effort to turn the situation around.

Mr. President, we need to invest in direct incentives to attract the very best, brightest, and most motivated of all of our students to go into the teaching profession. It is not a secret but it is discouraging that our students these days who are studying to be teachers in colleges are not necessarily amongst those with the highest academic ratings. This situation is intolerable and we simply cannot stand for it.

Mr. President, I had the honor to study in Japan at a university for a number of years and had a chance to learn the language and to observe the education system very closely. It has always interested me and still impresses me that in Japan, if you are a teacher, you are granted the respect and placed on the salary scale at about the same level of a Japanese civil servant. About the most prestigious thing one can do in Japan is go in the foreign service. If you are a graduate of a top university and seek a secure life with the highest prestige in Japanese society, you go into the foreign service. Just below the foreign service is teaching. Teaching in Japan is just about the most important thing one can do, and teachers are paid accordingly. Teachers are well paid because the country considers teaching to be an honorable profession, and because the education ethic is so strong the young people aspire to be teachers in the first place. As a consequence they attract their best and brightest.

Mr. President, I am encouraged by the higher standards and expectations being placed on public education by all of us—parents, teachers, students, school systems, and taxpayers. We are recognizing that there is a relationship between the quality of our education system and our position in the world and our future ability to compete in this world. I think we are realizing the importance of education faster than we ever have before, and I suggest to you in the last 4 or 5 years there has been a substantial leap forward in that effort.

Still, are we doing enough about it at the State level and at the Federal level? If one assumes, as I do, that education is the beginning, the base, from which everything else eventually develops, from which all other skills, all other possibilities eventually develop, then we have to do our very best at all levels. Society must pay for what it values.

Mr. President, I submit to you that it is hardly fair to expect our teachers to pass on to their students what teachers themselves may not know. We have an opportunity through this bill to do something which is significant. The most important function that our society can perform, other than defending ourselves as a country, is to educate our children properly to prepare for the rest of their lives and the future of the world. The key to excellence in education is a high-quality teaching force.

I urge our colleagues to support this legislation.

I thank and commend my colleague from New Mexico.

Mr. BINGAMAN. Mr. President, I commend Senator ROCKEFELLER, my colleague from West Virginia, for his excellent statement in support of this bill and for his strong support and help in putting this legislation together, and his great interest which is well known to all on this issue of how to develop excellence in our work force and in our schools.

Mr. President, I yield the floor.

Mr. BOREN. Mr. President, I am pleased to join my colleague, Senator BINGAMAN, by cosponsoring a bill to establish the "Future Teacher Training Corps Fellowship Program."

The need to encourage our best and brightest students into entering teaching careers will be the most important investment we can make in our Nation's future. The need for well-trained teachers to develop our human resources should be our central goal in forming a strong defense and strong domestic economy.

Through this legislation, States will have the ability to reward our students who choose to go into the teaching field with grants for post-baccalaureate study. To have these students then commit to teach in underserviced State school districts, will be a great benefit to improve the academic quality in our schools. It is well-developed, well-thought legislation that should earn the support of all those interested in the needs of education for the next several decades.

I commend Senator BINGAMAN for his initiative and strongly give my support for this effort.

Mr. BYRD. Mr. President, I am pleased to join my colleagues today in cosponsoring the Future Teacher Training Corps Act. I, too, am vitally concerned about the critical teacher

shortage our Nation faces. As early as next year, it is estimated that the shortage will amount to as many as 30,000 teachers nationwide, and the figures for the years beyond grow rapidly because of declining numbers of graduates entering the teaching profession and the number of current teachers retiring from the profession.

Clearly, we as a nation cannot afford a teacher shortage of this magnitude. More importantly, we can not afford a shortage of quality teachers.

The bill being introduced today addresses these two problems. It will provide fellowships at the graduate level to students with outstanding undergraduate records in the arts and sciences who would like to become teachers, to outstanding professionals in midcareer who would like to become teachers, and to current teachers who would like to upgrade their skills. The fellowships would be paid back over time—the time varying according to whether or not the fellowship grantee, after receiving the graduate degree, then teaches in an area of the country which is experiencing a teacher shortage or teaches a subject for which there is a shortage of teachers.

Mr. President, this bill would implement one of the important recommendations of the recent Carnegie Foundation report on teaching as a profession. I strongly support this recommendation as an adjunct to existing Federal level efforts to increase the pool and quality of teachers in our Nation. I look forward to the debate which the introduction of this legislation will occasion. It will be one more opportunity to look at the Federal role in education, and, hopefully, an opportunity to enhance that role and the derivative benefits.

● Mr. GLENN. Mr. President, I am deeply concerned about the serious decline in the quality of math and science education in this country. I believe that we need to take immediate action to address this problem. That is why I have joined by colleague, Senator BINGAMAN, as an original cosponsor of the Future Teacher Training Corps Fellowship Program.

In 1960, John Kennedy called on the American people to join with him in meeting the challenges of the New Frontier. We responded to that call and moved our economy into its most dynamic decade of growth in this century. We did it by expanding opportunities for all of our citizens and by setting new standards of excellence in education, research, and development. The world has changed dramatically since then and so have the challenges that confront us.

Our scientific and technological leadership is being overtaken by competitors throughout the world, the productivity of our workers and industries is lagging behind that of our trading partners, and the foundation of educational excellence upon which we built our international preeminence is being eroded by a rising tide of mediocrity. Our education system is simply not providing the education in science and technology which is required in order for our young people to move into high technology jobs.

In business, in government, and in the military, science is becoming the key to success. My own State of Ohio has come to the realization that even smokestack America is a high technology industry. Just outside of Canton, OH, a steel processing facility has computerized much of its operation and is using sophisticated materials-handling techniques and equipment. Obviously while steelmaking experience is important, high technology education is just as vital for workers at this plant.

As our need for scientific and engineering personnel increases, we are in danger of drawing down our pool of qualified personnel to dangerously low levels. We can no longer tolerate substandard instruction in math and science in our public schools, yet we lack incentives for highly qualified persons to take teaching positions. This legislation addresses this problem by awarding graduate fellowships through a State grant both to outstanding undergraduate students and to those in midcareer. These individuals must devote a specified amount of time to the teaching profession and they teach in subject areas where a teacher shortage exists, or in an area of the State in which there is a teacher shortage. I have long been an advocate of this approach and in previous years introduced similar legislation on this issue.

The challenge of international competition and technological change place a premium on the kind of long-term investments in education that this bill will provide. I urge my colleagues to join me in cosponsoring this important legislation.●

Mr. MELCHER. Mr. President, first of all, I associate myself with the remarks of Senator BINGAMAN and Senator ROCKEFELLER in describing their bill that was just introduced. I am honored and pleased that they accept me as a cosponsor to what I believe is very telling and needed legislation for education.

URGENT SUPPLEMENTAL APPROPRIATIONS BILL

Mr. MELCHER. Mr. President, the urgent supplemental appropriations bill has been under consideration of House and Senate committees or awaiting House and Senate floor consideration since some time in March. So on that basis, it has never seemed very urgent. Now the bill will not be considered until after the Senate returns on June 3 because I objected to immediate consideration of it yesterday. If I had not objected, I am sure others would have, because there are a number of problems with the bill that need to be addressed prior to its consideration on the Senate floor. Of these problems, mine may not be the most serious, but I believe it is prudent for me to explain to the Senate the corrections I would like to see made in the bill prior to considering it here on the Senate floor in June.

Agricultural trade has been held back by the administration to the extent it has worsened our balance of payments and contribution to the low commodity prices agriculatural producers receive for their production. With the enactment of the farm bill last December and President Reagan's recent announcements of increasing both economic and food assistance to the Philippines, I had anticipated that sizeable shipments of both wheat and milk to the Philippines would be recommended and approved by the State Department. Indeed, the Philippine package proposal President Reagan requested of Congress a few weeks ago actually contained some of the parts of the farm bill that are key to agricultural trade enhancement—section 416 and section 1111 of the farm bill, and Food for Progress—all of which are segments within the farm bill that we hope will expand agricultural trade. Having assumed that the administration was intent on moving this Philippine package to match the urgent needs of that exist in the Philippines, I was rather surprised to learn the day before yesterday that the State Department had requested the Senate Appropriations Committee to include one and only one portion of the administration's Philippine package in this urgent supplemental appropriations bill. That portion is for $150 million to be used for economic and military assistance to the Philippines. None of the other items of this Philippine package were requested of the Appropriations Committee.

So that one single item is the only feature out of the administration's request for Philippine assistance that is in this urgent supplemental bill.

That is just not good enough since there is true urgency, and other parts of the administration's proposal should go along with the $150 million in cash. I have previously testified to the House Foreign Relations Asian and Pacific Subcommittee on the Philippine aid package, and I ask unanimous consent that my testimony to that subcommittee be printed in the RECORD following the conclusion of this statement.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See Exhibit 1.)

□ 1520

Mr. MELCHER. Mr. President, prior to taking up this urgent supplemental appropriations bill in June, I shall diligently try to work out with other Senators and get agreement with the State Department on my proposal to expand developmental assistance without significant cost to the United States but with considerable advantage to the Philippines by using large quantities of U.S. surplus wheat and milk shipments to the Philippines over the next 3 years. Wheat and milk are in great surplus in the United States, already under Federal ownership, and under section 416 these Philippine shipments will not be counted as budget outlays subject to Gramm-Rudman restrictions. In the Philippines there is need for the food assistance and for economic development, and part of that can be financed by sales of the wheat and milk in the Philippines—monetization—so that a portion of the commodities can finance economic development.

Specifically, $50 million of each commodity could be utilized each year for the next 3 years; that is, $150 million in additional wheat and $150 million in additional milk which is over and above the milk and wheat that the existing private voluntary organizations can use in their feeding programs. CARE, Catholic Relief Services and World Vision are all operating in the Philippines, and soon the National Cooperative Business Association will have projects in the Philippines. Part of the funds gained by monetizing wheat and milk in the Philippines will be used to set up a foundation or, actually, a bank of cooperatives to provide assistance for rural development within the Philippines.

In turn, CARE, Catholic Relief Services, World Vision, and National Cooperative Business Association can use this assistance from the foundation or a newly formed Philippine bank of the cooperatives to carry out their cooperative development projects.

In addition, the Philippine sugar quota should be increased and that is particularly significant since the most impoverished areas in the Philippines needing economic assistance are in the sugar-producing areas.

All the Philippine assistance package that I have outlined can be in the bill in June and, if approved, the cost would be about the same as the $150 million now in the Philippine aid section, but the actual amount of assistance would be more than tripled using wheat and milk surplus commodities from the United States.

Over the next 10 days I would hope that we can work out the necessary amendments regarding this Philippine package to include in the urgent supplemental and I will be happy to discuss any of these matters with any Senators or their staffs.

EXHIBIT 1

STATEMENT BY SENATOR JOHN MELCHER—ASIAN SUBCOMMITTEE, HOUSE FOREIGN RELATIONS COMMITTEE

There are three essentials needed to revitalize the relationship between the Philippines and the United States. The Philippines are our long-time allies and the mutual interests of our two countries must emphasize the strategic importance of the Philippines for the United States in terms of mutual national defense, mutual cultural ties and mutual trade opportunities.

The three essentials to renew our strong ties are, first, food for the 40 percent of the unemployed or under-employed Filipino families; second, re-invigorating the Philippine economy to permit renewal of normal trade opportunities and resume the interrupted growth pattern of mutual trade; and, third, to utilize these two essentials to quell the insurgents and bring peace and harmony throughout the Philippines.

It is not necessary for me to dwell on the strong historic ties between our two countries, nor could I over-emphasize the United States-Philippine alliance that developed in this century where American and Filipino armed forces fought side by side in three wars in the Pacific, nor can I over-emphasize that in Southeast Asia the Philippines are the gateway for American trade. There are 55 million Filipinos, where strong family ties and the pursuit of education for all children are dominant, where English is the language of education, commerce and government, and where democracy patterned after the U.S. Constitution and Bill of Rights is in the blood of the population of the entire nation.

The recent revolution of the Philippine people to change their government has sparked the renewal of hope and vigor within them. In all the world's history that revolution is without parallel and the presence of the people themselves restrained and inhibited the firing of rifles, automatic weapons and cannon, restrained and inhibited the use of rockets and bombs, restrained and inhibited bloodshed and killing, yet the Filipino revolution succeeded in replacing the government of Marcos with that of Corazon Aquino. At this particular time, stimulated by their victory, there must not be any lull in meeting the needs of Filipino familes. Without U.S. help—substantial help—this transition period, while the Aquino government establishes the procedure and timetable for adoption of a new constitution and filling the vacancies of mayors and governors, could lead to further penetration of both the deteriorating economy and greater insurgent unrest in the Philippines.

Senate Agriculture Committee Chairman Jesse Helms approved my request to send three of the Senate Agriculture Committee staff and one of my own staff to the Philippines for a ten-day visit in early April. The staff assessed the need, in particular, for food assistance, increased developmental aid, particularly in agriculture and food productin, the need for redevelopment of the Philippine sugar industry with an increase in U.S. sugar quotas, and the inner ties of food and economic development in quelling the insurgents.

Their report to the Senate Agriculture Committee emphasizes the urgency of prompt action by the United States, particularly through the use of private voluntary organizations already there—CARE, Catholic Relief Services, and various segments of Caritas operating under the auspices of the Church. Vice President and Foreign Minister Salvador Laurel detailed for President Reagan in their Indonesian visit the need for $2 billion in U.S. assistance. President Corazon Aquino stressed the urgency of substantially greater assistance to Secretary of State George Shultz in his recent Manila visit.

Yet the package recommended by the Administration for the Philippines neither meets the test of urgency expressed by our Filipino friends nor does it meet the test of U.S. vital interests in Southeast Asia in terms of strategic national defense nor in terms of the urgent need of U.S. trade in Southeast Asia. The Administration's proposal as outlined by the State Department would free up withheld funds that are the lease payments for Subic Naval Base and Clark Air Force Base. Their proposal for the sugar compensation program, P.L. 480 and Section 416 would range in food assistance from somewhere between $43 and $58 million. That is equivalent to one glass of milk and one serving of good, nutritious American wheat for each Filipino per year. In addition, it would permit one DPT inoculation for one out of 100 of Filipino babies next year. That, I must emphasize, is like casting one biscuit into the water. The needs are there. The Filipinos are our friends and allies. They are historically our best trading partners in all of Southeast Asia. They are the Americans of the Pacific and they deserve more. We have the food, we have the DPT vaccine and measles vaccine, and other medical supplies, and they need it now.

Two other points should be made about the Administration's assistance package for the Philippines. The State Department requests an additional $100 million in economic support funds and the conversion of $100 million of development assitance funding from loan to grant to provide a total of $140 million in grant development assistance. While new appropriations are hard to come by, let me point out that the $100 million in new appropriations for economic support funds happens to be the same amount of money that the President is asking Congress to appropriate for 15,000 Nicaraguan Contras whose structure, performance and reliability is counted on by President Reagan to overthrow the Nicaraguan government in a country whose population totals about three million people. President Aquino and Vice President Laurel are speaking for a country to which we have close ties with 55 million people attempting to quell an insurgency involving 20,000 armed guerrilla fighters and without assistance from the United States to the government of the Philippines due to the results of depressed economy and shortages of food, could easily lead to an insurgency of 50, 60, or 100 thousand. The Administration's description of requirements for protecting U.S. interests in the friendliest of all of our Pacific trading partners is not only unrealistic, it has a peculiar short-sighted viewpoint and could dearly cost the United States over the next few years untold billions of dollars in readjusting our strategic defense in the Pacific, loss of trade plus the suffering that would occur between our two countries in loss of cultural ties.

We have thousands of Filipinos in our armed forces; we have one million Filipino citizens in the United States, plus another half million Filipinos residing in the United States who seek to be citizens. We have hundreds of U.S. Filipino companies and the opportunity to move forward in addressing their needs to the mutual advantage of the U.S. has never been greater. So the Ad-

ministration's proposal should be promptly relegated to the back rows and the priorities should be assessed by Congress itself, beginning this day with this hearing, by this subcommittee.

First, food assistance should be expedited immediately in quantities proportionate to the dimensions of the need and should be rapidly distributed through the PVO's and the Church in harmony with the Aqunio government. The staff representing the Senate Agriculture Committee can vouch both for the distribution systems through the PVO's and the church in cooperation with the government of immediate food assistance being ready to operate when the food gets there, combined with the long-term development programs essential for economic recovery directly with the people in the areas where food needs are greatest.

Meanwhile, here in the United States there are mountains of food stored in federal warehouses already bought and paid for. In conversation with Cardinal Jaime Sin just this past Monday evening, he confirmed the need for wheat and milk. It is significant that two of our largest federally owned surplus commodities here in the United States are wheat and milk, neither of which can be successfully produced in the tropical climactic conditions of the Philippines. This is particularly relevant both to the present and future needs of the Philippines. First, it is food assistance now, secondly, it is the expansion of the trade potential for these commodities, United States to the Philippines, in the years to come. If it is necessary to put a dollar value on that assistance at this point in time, let us recognize that over the next three years $360 million in wheat and milk should be immediately programmed, will be beneficially used through these organizations, and will be accounted for. Let there be no question that utilization of food assistance does involve 10 to 15 percent monetization of the commodities in the Philippines. Milk is the most easily monetized commodity to be sold on the market in the Philippines to raise the necessary funds to meet the processing, transportation and distribution costs. Using 416 as the Administration finally now recommends, does not pose an immediate budget impact and will be scored as no impact by the CBO and OMB methods of budget bookkeeping in order to comply with Gramm-Rudman restraints. There may be other 416 food assistance needs such as soybeans or butter oil. The Administration package also contains assistance to support private sector development under provision 1111 of the 1985 farm bill that permits the sale of U.S. commodities converted into local currency in the Philippines to finance development programs. Along with the monetization under Section 416, their recommendations should be accepted.

Negros and Panay are two of the hardest hit economically depressed areas in the Philippines with thousands of unemployed families due to the shutdown of about one-half of the Philippine sugar industry. Economic redevelopment should be started immediately and the United States should do so by increasing the Philippine sugar quota. Joined by Senator Inouye, I have introduced in the Senate S. 2451, that would restore to the Philippines part of their lost sugar quota by requiring that those developed countries such as South Africa, Canada and Australia that import into their own countries to meet their own consumers' needs should lose their U.S. export quota in favor of countries such as the Philippines. After all, if a country doesn't produce enough sugar for its own use, imports sugar for its own use at a world price of about 5 cents per pound and then sells part of that to the United States under U.S. quota for 18 cents a pound, the United States is being taken for too much of a Sugar Daddy.

The long history of the U.S. importing sugar from the Philippines commenced in 1796 when the trading clipper Astrea out of Salem, Massachusetts, brought back from the Philippines a cargo of sugar. In the late 1800's the United states averaged 120,000 tons of sugar each year from the Philippines. As our population has grown, so has the sugar produced in the Philippines exported to the U.S. grown to a million tons per year in the 1930's and intervening decades into the 1970's. After the demise of the U.S. Sugar Act in 1974, international sugar traders shifted Philippine sales to Japan and other closer countries, replacing it with sugar from Caribbean countries. Under Secretary of State Haig in 1982, the reestablishment of a country-by-country sugar quota import system for the United States decimated the Philippines by drastically reducing their quota which now amounts to about 300,000 tons, to less than one-third of the historic sugar shipments from the Philippines. Sugar quotas in the United States are established to split up the one-half of the sugar consumed in the United States that we import. The arrangement most developed countries use is to assure supply from developing countries with a stable price for the quota amount. No country, no matter how poor they are, can afford to produce sugar to be dumped on the world market, which is usually at a sacrifice price of 5-6 cents per pound. Production costs in all countries, even with $1.00 per day per worker labor costs, exceed that amount. Hence, sugar quotas to the United States, Europe or other developed countries are the essential life's blood of any sugar-producing nation. The Haig decision to decimate the Philippine sugar quota in the United States effectively and unfairly punished the Philippine sugar workers and their families. The Philippine capacity to produce sugar had to be cruelly and wantonly deteriorated, inflicting stark malnutrition on the sugar workers, particularly in Negros and Panay. The destitution that this has imposed was witnessed a month ago by the staff from the Senate Agriculture Committee. There is no more urgent need for revitalization of the Philippine economy than a restitution of a portion of the U.S. sugar quota that was stripped from them in the early part of this decade.

Nevertheless, Special Envoy Habib, Ambassador to the Philippines Stephen Bosworth and Secretary of State George Shultz have consistently and emphatically told the government of the Philippines that no restitution will be made. This cannot be allowed. Congress must intervene and I strongly urge this subcommittee to include in your bill this year the requirements of restitution. I am submitting with your consent to this hearing record a letter dated this week from Ambassador Palaez stating that urgent based. That urgent request has been reiterated over and over during the past year by Salvador Laurel as the opposition leader of UNIDO, as candidate for the vice presidency, and as vice president. The government of President Corazon Aquino as is stated in the Ambassador's letter views this as of highest urgency. I can only add my own strong recommendation to theirs for prompt restitution and I can only note that on the part of the United States it is absolutely essential for resumption of good economic ties between our two countries that what was unfairly taken from the Filipino people be returned to them now for regaining normalization of trade opportunities for our two countries. After all, they have to sell to us in order to regain trading status with the United States. The Aquino government must have foreign exchange in order to purchase badly needed fertilizer and other supplies to rebuild their economy. This is the positive start that can be met this year and nothing in the recommendations of the Administration would provide that kind of start for 1986 and 1987 that can even compare in any meaningful substance for the balance of 1986 and 1987 than the restitution of sugar quotas to the Philippines in their recovery. We have no time to wait and this is the industry that can provide the first start for economic recovery of the Philippines.

General Fidel Ramos, Chief of the Philippine armed forces, has stressed over the past three years the significance of food assistance for the under-nouished and malnourished and economic opportunity as the best means of ending the insurgency in the Philippines. He has consistently and courageously related these basic needs as fundamental for redressing the causes of insurgency.

I conclude my testimony today by encouraging this subcommittee to accept Eddie Ramos's views, to recognize the practical admonitions of Cardinal Sin and the international private voluntary organizations, and to listen to the polite and respectful requests of the Aquino government on behalf of the Filipino people. They are a friendly, loyal, warm and hospitable people. Despite our shortcomings in dealing with them, the Filipino people are still our best friends. In their very courteous manner they have stated to the U.S. government repeatedly all that I have stated but, because they are so courteous and so friendly, they have not pounded on the table or beat down our doors to emphasize the urgency of their needs. Perhaps it is the American disposition to respond the most to the countries with the loudest squeaking axles, but it is not the Filipino custom to continually badger and berate. That is not their nature. The State Department's package is totally inadequate and those of us in Congress who better understand both the great friendship of the Filipinos and the strategic importance in defense and trade of the Philippines itself must have the foresight and the fortitude to reject the Administration's inadequacies and build on our mutual future by meeting Philippine needs as they exist today.

Mr. MELCHER. Mr. President, I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

□ 1530

Mr. COCHRAN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

NATIONAL TOURISM WEEK

Mr. COCHRAN. Mr. President, it may be surprising to many people that the third largest retail industry in the United States is travel and tourism. This industry accounts for over 4.9 million jobs in America, making it the second largest private employer in the Nation. The tourism industry generates over $25 billion in Federal, State, and local tax revenues each year.

Last year, I was a cosponsor of Senator SASSER's resolution, S.J. Res. 141, proclaiming this week, May 18–24, 1986, as "National Tourism Week." The week is designed to highlight the importance of tourism in the United States and to recognize the achievements of those employed in the industry. Although we all appreciate the significance of the cultural and social attractions found in each of our States, we must also realize the major role these sights and the tourism industry itself play in our Nation's economic picture.

Figures from the Travel and Tourism Government Affairs Council tell us that travel receipts make up over 6 percent of the gross national product. In 1983, domestic and foreign travelers in the United States spent $210 billion and supported 4 million American jobs. Employment in the field has risen 60 percent in the last 10 years. The travel and tourism industry now serves as the first, second, or third largest employer in 41 States. In 14 States, it is the largest employer.

Much of the tourism industry's success is due to international visitors. In 1984, over 21 million foreign vacationers spent $14 billion in the United States According to the U.S. Travel and Tourism Administration, those numbers are expected to increase steadily over the next few years.

In Mississippi, the travel and tourism industry plays a vital role in our States' economy. According to latest figures, the industry is the third largest employer in my State. In 1983, tourism accounted for 29,300 jobs, and tourists spent over $1 billion that, in turn, generated $4 million in local tax revenues. Each year, thousands of tourists visit unique and popular attractions such as the Mississippi Gulf Coast, the Civil War battleground at Vicksburg which is a National Military Park, William Faulkner's home Rowan Oak in Oxford, Jefferson Davis' home Beauvoir, other antebellum homes throughout the State, and numerous State parks and recreation lakes.

Mr. President, this week as we recognize the value and importance of the travel and tourism industry, I congratulate all those whose hard work contributes so much to the success of that industry throughout the United States.

THEODORE H. WHITE: 1915–86

Mr. MOYNIHAN. Mr. President, yesterday at noon, friends of Theodore H. White gathered for a memorial service at New York's incomparable Temple Emanu-El. After an opening hymn by Cantor Howard Nevison and prayers by Dr. Ronald B. Sobel, senior rabbi, there were five eulogies, which I ask unanimous consent to have printed in the RECORD as a mark of respect for this revered American writer who so loved our political institutions, and not least the Senate.

There being no objection, the materials were ordered to be printed in the RECORD, as follows:

THEODORE H. WHITE: 1915–86

(By Senator Daniel Patrick Moynihan)

I met Teddy White first some thirty-five years ago in London. He was then writing his second book, "Fire in the Ashes," asserting with his great gift of prophecy that decent, democratic, reasonably prosperous societies were emerging in Western Europe for all that World War II might be assumed to have made this impossible. He was just back from Italy. There was good news and bad. The Christian Democrats seemed to be holding; the Communists could no longer control the streets. But hunger held on also. In Naples the street urchins had reddish hair. Kwashiakor, he explained. A word I'd never heard.

I was giving a small party, which promptly centered on him and his news from across the Channel. Just as promptly *he* turned to a group of somewhat older English ladies. Three beats. His face radiant in expectation. Then his question. "Tell me. What would you say was the most important event in Britain in your lifetimes?"

The ladies hesitated. Thought. Then the answer: "The General Strike of 1926."

It was an epiphany to me, a young American with no memory much earlier than the war, and London still half rubble from it. But in the minds of these Britons, the war had only affirmed the integrity of the realm. It was the earlier prospect of collapse of law and community that had left horror in their hearts.

Teddy understood. The balance of liberty and order, and the imperiled circumstance of each, had become the central theme of his work; a deeply Hebraic theme, one might add. He develops it most fully in his extraordinary play Caesar at the Rubicon. The precise spot where the thirteenth legion crossed is not clear: "One of three little gullies that fall off the shoulder of Sant' Arcangelo, just north of Rimini. . . ." But the significance is. In a Prologue he writes:

"The Rubicon is more than an event, more even than a watershed. It was tragedy, one of the half-dozen great tragedies of human civilization. With the crossing of the Rubicon in 49 B.C., five hundred years of experiment in self-government failed."

He gives us a Caesar torn with conflict. He must save the Republic. But saving it, he will destroy it. He wishes to return to Rome to run for the office. (Teddy revelled, of course, in the minutae of politics. In the course of his research he discovered that Roman candidates, too, had advance men, nomenclators, fellows who whispered names to candidates as they made their way about the Forum.) The Senate would not allow Caesar to run. This denied him his right, but it was arguably the Senate's prerogative to do so. He waits at Ravenna: Legions ready; able to break the law, but unable. "Slave," he says of himself, "as Caesar is to order."

Tension mounts, the will of the Senate snaps. A national emergency is declared. Law is suspended. Legions march.

The Senate flees, and so now there is no law save Caesar's, and so all is lost. The historian Asinius Pollio has the last lines: ". . . if men cannot agree on how to rule themselves, someone else must rule them."

It would be 1,800 years until the experiment would be tried again, and it would be here in America. In an Epilogue, Teddy writes:

"In Caesar, more clearly than in any other historic character, ancient or modern, one sees the terrible conflict between the idea of liberty and the idea of order. Rarely does any civilization harness the two; but when that happens the results can be as spectacular and magnificent as they were in Republican Rome; in ancient Athens; in England at its apogee; in the United States for how long we do not know."

That closing note soon emerged in his work. For how long we do not know. He had returned home to chronicle the experiment at its center. And oh, what spectacle! What magnificence! Then what riot. Ruin. Then by degrees a measure of reconciliation. The Republic tested? Strengthened? He was not sure.

He was sure that no things mattered more, no institutions could he love more than those of the American democracy. His gifts of love are the magisterial volumes on the making of the Presidents which already have taught a generation of Americans how their politics work and why they must.

In return, no writer has been so loved by those who knew him; no teacher more respected by those he taught.

REMARKS BY RICHARD CLURMAN AT THEODORE H. WHITE MEMORIAL SERVICE

My name is Dick Clurman.

Teddy always said that every chapter should start with a strong topic sentence. Among the hundreds he wrote was one for the opening of "America in Search of Itself." It said: "There is always a first question in telling any story—where to begin."

I have no trouble knowing where to begin today. I have my topic sentence for the beginning of this memorial chapter.

Teddy White was a lover.

Sure, he was many other things. He taught us. Professor White. Rabbi White. Reporter White. Journalist-Historian White. He taught the whole world in his writing. Everyone has said—many very well—that he transformed and energized American political reporting and in so doing the very political process itself. He brought us the touch, sound, feel and the meaning of everything and everyone he ever wrote about. (With the possible exception of Julius Caesar, in the one bomb and only play he ever wrote).

If you were just a caring citizen, one of his friends said the other day, you wanted to read his writing. But if you were a young journalists you aspired to write and report the way he did. In print, he was the greatest explainer of us all. A virtuoso yarn spinner at the loom of modern history. The pre-eminent political writer of his time. All true. You can read all about it. No excesses there. It is a record of journalistic glory. Let it stand and grow.

But I want to talk about another Teddy.

I do not presume to speak for his friends. Only as one of them. I look around this room. I see many of you out there. I think of those who could not be here because they are scattered around the globe doing Teddy's kind of work. I think of others who only read, admired and were inspired by him from afar. All of us who knew him have our stories, our recollections, our luminous and yes, ridiculous and riotous tales. So I'd like to talk about Teddy and us. The many ways that he loved us and we loved him.

Not long ago we were walking down the street after lunch with a few of you. He stopped, turned, grabbed me by the shoulders and said: "You know, the greatest capital asset any of us have, outside our family, is our friends." He meant it as passionately as he said it. Teddy was a sensuous man, his cup was always running over. Full of vitality, mirth, angst, sentiment, and love.

Not that he was profligate with his love. But he wasn't a bit exclusive about it either. You might even say he loved too much, his children, his family, his friends, his country. He suffered for their and our sadnesses, rejoiced in their and our happiness. He gave pieces of himself to everyone who came into his wide embrace. And once you did—friend or acquaintance, giver or taker—he never let anyone go. Some people are kind and caring mostly for their close friends. Teddy was there for everybody—friends, families of friends, friends of friends of friends—or strangers who entered his tender orbit.

To mention only one or two of his kindnesses is to exclude a thousand others. I doubt there is a person here who cannot fill in his or her own touching examples. In Teddy's modest but memorable phrase, he was just "soft on the human race."

He was almost physical about it. A hugger, a kisser, a toucher, in spirit as well as in fact. An enhancer. He raised the temperature of human warmth and passion. The Teddy we remember most today is the man who touched us with that love and caring. Other than my own son, he is the only grown man I have ever known who literally kissed or hugged or said some unembarrassed word of endearment whenever we met or parted.

What a sight he was. Not quite the fly on the wall he professionally pretended to be. Listen to his friend Dick Dougherty, that permanent newspaperman, really describing Teddy at work on the campaign trail: "Teddy White has a mind like a woodland pond—busy with movement and sound: Bird song, bugs, the whir of wings, snaps in the underbrush, fish jumping. Sometimes there are clouds overhead: Gloom and rolls of thunder; sometimes theoretical myths descend: Ideas flash like lightning, insights strike like hailstones. My God, of course why had he not thought of that before? The beaverlike figure sits up, the bright eyes widen behind thick lenses, his mouth opens in unabashed admiration of the mind's fecundity." That was our Teddy.

How he listened, what he saw and reported. He converted the familiar before our eyes to the unfamiliar insight our minds never saw before. Out the window of an airplane, just another flight into La Guardia Airport, coming into the city about which he had written "I've come to love more than any in the world." On the deck of the Missouri. In the midst of a Chinese famine. At Hyannis mourning and forever memorializing a murdered President, from the press gallery at a political convention in San Francisco's Cow Palace or at a street rally on New York's lower East Side.

He liked especially to tell about the last war he ever covered, the 6-day war in the Middle East. He glowed when he recalled how he and I made our way in a Hertz rented car up to the head of an Israeli tank column advancing to 15 miles outside Damascus. Along the route, stopping frequently, Teddy shouted questions in his Talmudic Hebrew to joyous civilians who answered this overflowing journalist with flowers and embraces as he struggled to get it all down in his tattered notebook. If you can love a war—Teddy loved that war.

He never stopped looking, wondering, caring. A month ago on a Sunday, he said, "I haven't seen the changes in our city in a long time." So for half a day we toured lower Manhattan in Teddy's battered car. Teddy all the way inspecting, asking, exclaiming, reminiscing, comparing. We had planned to do it again in June. I doubt I will without him. It would be different—everything will.

Two weeks before he died, he was working on a cover piece about America as a nation of immigrants for the Fourth of July issue of a magazine. I told him it would be "a piece of cake for you, Teddy. You'll never have to move from your chair. You've got it all." Not Teddy. He flew off next day to the Mexican border at Tijuana. When he came back, I could hear him forming the facts for his lead as he told me about it. Twilight. Sad-eyed American border patrolmen, shrouded in black coveralls. Mounted on black horses. The better to blend into the blackness of the night. The drama, the complexity, the anguish of it all. Where did it fit into the Ellis Island of his parents' generation? What was the answer?

Yes, he watched, he saw, he embraced and he wrote. But he was no slouch at talking either. Not always right. Not always beautiful. At times a bit obtuse. Who of his friends hasn't had the experience of Teddy coming into an office or living room, peeling off his jacket, loosening his tie down to mid-chest, hiking up his pants, slouching in a chair or even lying down on the couch? Then hunching up his shoulders in that prefatory body language and starting to talk. But you knew you were really in for it when he got up, started to pace up and down, clouds of smoke billowing around him, and with that slight stammer of sing-song intensity, began to tell you, dammit what you should know.

Once in London, when he was on a postbook vacation and I was working, I rang him up and invited him—why not—to join me at my interview with the Prime Minister. He came along and when I asked the PM my first soft-ball question, Harold Wilson said he'd be more interested in hearing Mr. White's view of that political situation. And so we did for my allotted 1 hour, until I said "thank you, Mr. Prime Minister, and thank you, Mr. White, for telling the Prime Minister and me what we needed to know."

Although he was a vintage quality male chauvinist, women and men alike found him, well, adorable—in the most gentle, authentic sense of that much-abused adjective. He almost totally lacked pretense. It was both beguiling and embarrassing that he handled his celebrity like an awkward amateur. But he had the rollicking sense of his own ridiculousness in the midst of the awe with which strangers often approached him.

His friends and family didn't need to keep him from puffing up. He loved a good jape at his own expense. At the grand old age of 26, he first returned from China to his family in Boston. No longer did he feel like that self-described Harvard meatball, who taught Hebrew on the side to earn his keep. Now he was a famed foreign correspondent and dressed for the part, wearing, of all things, a white tropical sharkskin suit topped by a pith helmet. His sister, Gladys, who is here today, took one look at him and said: "You still look Jewish to me, Teddy."

And so he did our beloved friend with a heart so big it finally overpumped his brain and exploded, then quietly and with loving mercy it stopped, to bring us here today.

It is often said on these occasions, especially about us irreverent journalists, that someone like Teddy, if there ever was someone like him, wherever he is up there would be looking down on what's happening in this sanctuary and be laughing. Not our sentimental Teddy. He would be crying, not with sadness, but just because there is a time to laugh and a time to cry. He knew that better than any of us. Our wonderful, friend, journalist, American, world citizen. Lover. No, he would not be laughing. He would be crying—just as we all are today.

REMARKS OF DR. JOHN K. FAIRBANK

I taught him for two years and learned from him for forty.

I was privileged to be Teddy's tutor at Harvard. My wife Wilma and I were a sort of home base during his transition from scholarship to journalism. Teddy's genius was of course a combination of several extraordinary qualities. They were all there in his vibrant 21-year-old personality when we first met in 1936. First of all, Teddy loved people. He charmed them, sympathized with them, gave himself to them and soon knew what they felt and thought. Second, Teddy's passion was to understand how people interacted to produce events, and how events interacted to produce history. For him philosophy was simply words. A junior year tutorial essay says "Philosophy has been to me, always, an excursion into the realm of things which are not." He wanted no axe to grind but a story to tell.

Third, he excelled in the reporter's task of amassing the historical and current details of a scene by strenuous legwork and then creating concepts that fit the details together. When he saw New York, London, and Paris for the first time on his way to China in 1938, Teddy's letters compared the three cities as parts of a worldwide metropolitan community, as very similar headquarters of power. His memoir "In Search of History" plays himself down as a mere sightseer in 1938 but his talent was already in action. He wrote us how London had more unemployed beggars than New York and Paris combined, but also more construction of new buildings. "I have covered Paris thoroughly," says Teddy, "and have seen not a single new building going up." Paris just after Munich was eroding, it was sick. He calls it "a woman in a silk gown and white fur, and dirty underwear." His eloquence was already producing purple metaphors.

Once arrived in China in January 1939 Teddy became phenomenally enterprising and resourceful. He makes friends of every journalist and editor in Hong Kong, Shanghai, and Peking. He gets himself taken by the Japanese on a tour of Manchukuo, where he finds Japanese Harvard men. Finally he lands a job editing English in the Nationalist propaganda ministry in Chungking.

His preparation for journalism has been to audit a summer course in journalism and work a bit on the college daily while doing

intensive Chinese full time at the University of Michigan in the summer of 1938.

In September 1939 Teddy gets the backing of Time magazine to explore the anti-Japanese front in northwest China. He spends several weeks roughing it on foot and horseback, scores several scoops and returns a certified war correspondent. His report is featured in Time for Dec. 18, 1939. From there he goes on up with Time-Life. The transition from being a summa cum laude scholar to being a top journalist has taken less than two years.

Teddy's greatest contribution to the American people's understanding of China was his 1946 book with Annalee Jacoby, "Thunder out of China." By describing China's revolution in the light of history and the current facts, this best-seller helped General Marshall as secretary of state keep us from intervening in what might have become a super-Vietnam disaster.

Teddy White has been rightly eulogized as a story teller and analyst of institutional processes. But he first came to national attention by breaking the World War II censorship—both Chinese and American—on the facts in China. He set us on the path of our thirty-year-long struggle to accept the Chinese revolution.

REMARKS OF BLAIR CLARK

I'm Blair Clark and I've known Teddy for nearly 34 years. Like all of us here, I admired and respected him—and, like so very many of us here, I also loved him.

It was hard not to. He was the most lovable of men.

He never held a grudge. He was incapable of hatred. Meanness was a stranger wherever Teddy White was.

I once suggested to him that an interesting, even important, piece he could do would be on how Henry Luce dealt with him . . . and with the kind of honest reporting he did. After all, TIME fired Teddy after putting him through the torture of having Whittaker Chambers rewrite his copy from China, reversing the meaning. But Teddy couldn't do that. It wasn't in his nature. He suffered grievously from it (in every way, financially too) but he forgave Luce—his first boss, the remote professional father-figure. And later they were reconciled. There was no calculation on Teddy's part in accepting Luce's overtures. He just treated him as he himself would have wanted to be treated. Golden Rule Teddy.

And in 1965 Henry Luce and Clare Luce came to Teddy's fiftieth birthday, which Nancy and I gave together . . . and both gave warm tributes to the prodigal, now back in the fold from which he'd been driven. Teddy's warm spirit was dominant. And so all of us there that night felt good in his presence.

We all know that the "Making of the President" books were his great, truly original contributions to journalism and to the history of our age. But not everyone knows that the decision to do that wonderful 1960 book was an enormously risky one for Teddy, a chancy leap into the financial void. (Of course it wasn't the first big chance he took on a book—think of the novels!).

In these days of million-dollar advances for mere celebrities, it's hard to believe that Teddy himself took so much of the money risk on those two years of labor (even though he always had the loyal support of his friend and editor Mike Bessie).

This may explain the inscription Teddy wrote on the title page of the copy he gave me of "Making. . . . 1960". It reads "For Blair Clark—my personal consultant—whose persistent provocation and unrelieved bad advice led to the writing of this ridiculous work; without him, I might have committed myself to something worthwhile. With deep distemper and with great ingratitude . . . affectionately, Teddy White." That was Teddy.

No need today for me to rehearse the brilliant career. What we dwell on is the person who made it, the obstacles overcome, the character that triumphed, in his work and in his life. Was there ever such a winning combination of strength and persistence—tempered by gentleness and loyalty? Let's not forget the humor—often acid and profane, funny as could be, but never mean. And always, of course, the intellect, the constantly sharpened wit, the devotion to his country and its sometimes messy democratic ways he understood so well—and loved.

Can I say that I once hired Teddy? Well, when I was a panjandrum at CBS News, I did persuade him in 1962 to be a political consultant and to help work out the new ways of covering elections, instantly. But actually he and I hired and fired each other all the time. It was a game he invented—because Teddy was a great fantasist. He escaped that way from the real world of brilliantly observed reality, close analysis, and moral observation into a never-never land of Pure Power (imaginary, of course). There, on many an evening, we used to found and topple communication empires, hire and fire each other, promote friends, put down adversaries, reorganize corporations, float equities, found dynasties, and always in our play, come out richly on top. Heyden and David were often part of this game, triumphing too. Many a laugh as he staged a coup against me as Chairman, or sometimes vice versa.

I would say a word about Teddy as family man, as father. He was a deeply devoted parent, almost to the point of obsession with ways to help create the happiness of his children, Heyden and David. I'm sure dear Heyden will say someting about that. I loved his two children from infancy on, and he proved often that he loved mine. Family meant nearly everything to him. His sense of obligation was enormous. He rejoiced in their successes and agonized over their problems. No parent ever felt more responsible or tried harder to do the right thing for his children. Their loss, and adorable Beadie's, will be the hardest to bear.

And then there's Teddy the friend. Was anyone ever more loyal and patient with his horde of friends, more helpful, more interested in their lives, successes and failures? He was (in a figure of speech he'd certainly edit out) a Damon to a multitude called Pythias. I see several of that name out there . . . and not all men!

So, finally . . . did Teddy White ever find the history he spent his life searching for? Well, of course not—he would have laughed at such pretension. But he came close, very close, didn't he? And he never quite the strenuous search for that elusive reality, and for its meaning in our lives.

For that, and for the life of this splendid man, we owe him our loving gratitude, enshrined in memory for the rest of our lives.

EULOGY FOR DAD

When I was in China last summer, my tour group spent three days at the Lake of Heaven, which lies near the base of the highest mountain in the Tien Shan range. There, I met a young American who had just finished a year of study at the University of Peking and was on his way to Tibet. I asked what had gotten him started on China and he told me that when he was sixteen, his father had given him "In Search of History," by Theodore White. He decided that if one poor boy from Boston could get to the Yenan caves and meet Mao, another might go as far. I introduced myself and we marvelled at the happy accident which had brought us together: he was there because of my father and I too was most assuredly there because of my father. At the foot of the mountain in the bright sun, I thanked my parents for what they had given me, starting with my life, and for having done the very best they could to allow me to treasure this meeting.

My brother and I have been talking over our memories of Dad during the last few days. Many of them are too pungent for a ceremonial occasion like this, but one of our favorites is his recurrent Sunday lunch fantasy of himself as a courtier of Louis XV. To all the other courtiers, the king is Son Altesse or Sa Majesté, but to Dad, he is, quite simply and intimately, "Quinze". Sitting around the living room in Bridgewater, Dad reveals to us in horribly accented French all sorts of details about "Quinze's" poor personal hygiene "après la chasse."

Our father was a man of extraordinary exuberance and he loved the feel of words. Once at Fire Island, when David was about ten, Dad came home from the Collingwood's riotously drunk. Although there was a fierce storm and the rain was pounding, Dad determined that it was time for an adventure; so he hauled David out of bed in his pyjamas, and they went for a ride in the Bismarck, out small outboard motor boat, wailing the Volga Boat Song and simultaneously shouting crispish naval commands to each other. Dad never noticed the six-inch cut he got when he tripped over some bricks and landed on a clam shell, and David never forgot the night. The single moment I recall whenever I think of my father is an early evening in May when I was thirteen. I came downstairs with my carefully memorized speech from Henry V and found Dad in the garden. As I stood on the little balcony which overlooks it and began to recite to him, he took up the speech and proclaimed it with me. I shall never forget the shared exhilaration of Shakespeare in our hearts and his positively shouting: "For Harry, England and St. George!"

As I have said, my father was a man of words. Two words that stick in my mind are "bloviate" and "lovely". The first he spoke with round-cheeked relish; the second with a wistful caress. He was both of these. Most of all in his own mind, however, he was a pater familias, the original patriarch whose family went far beyond Bede, my brother and me, or his sister Gladys and his brother Bobby. It included anyone lucky enough to be at his oval table at Passover, Thanksgiving or Christmas, or any night for Bede's delicious salads. He made his own Hagada for Passover on 3 x 5 cards and assigned us parts; At Thanksgiving every year—for custom and ceremony were all-important to him—he asked each person at the table what he (or she) was thankful for. We answered him with an ease and unself-consciousness that made clear the spell he could cast over his sources and subjects. But Christmas was his chef d'oeuvre. He was the CEO of the Christmas tree. He made separate piles of presents for each person, distributed his socks full of the accumulated spare change of the year, and provided Hefty trash bags to dispose of wrappings in record time.

My father was like a changeable sky—with the clouds moving across and casting a shadow and then leaving the sun to shine—the sky of early May when his birthday was (though like Eeyore he claimed to hate birthdays). He was truly Taurus—bull-headed and stiff-necked. For better or for worse, he almost never gave up. What we in his family know is that he was incapable of ceasing to love. If he was miffed, like a good Jewish father, because we did't call him enough, he would threaten piteously never to call us again and be on the line to us by the end of the week. I could always tell when Dad had telephoned because the message tape took twice or three times as long to rewind. He liked to think out loud on the machine where no one could interrupt him. My father's love for us more than radiated and reverberated: it enfolded us, taught us, kept us safe, and made us strong. And his death cannot, thank God, ever remove the imprint of that love.

Anyone who ever heard him sing "Jingle Bells" knows that my father was tone deaf even though on the rare occasions when he took out his trumpet, Brahms' Lullaby came out right, if brassy. But he loved music—the campfire tunes of the Union army, the liturgical chants of Yossele Rosenblatt, the folk ballads and protests(!) of Joan Baez, the love songs and laments which my brother composed, and the Renaissance madrigals and motets which I and my friends performed in his house every spring for several years. Because music made him happy, some friends of his and mine are going to sing two motets for you now, one by Heinrich Schütz and the other by Thomas Tallis.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

□ 1550

Mr. SASSER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE ADMINISTRATION'S TRADE POLICIES

Mr. SASSER. Mr. President, I wish to bring to the attention of my colleagues some disturbing consequences of this administration's trade policies. I am referring to the devastating repercussions in our farm communities from the administration's policy on the international debt crisis.

Last week, the Secretary of the Treasury, Mr. Baker, appeared before a joint meeting of the Banking Committee and the Finance Committee to discuss the administration's comprehensive trade plan, commonly referred to as the "Baker plan." A key element of the Baker plan calls for improving growth in those developing nations with a heavy debt burden, and for ensuring that trade is not only free but also fair. Secretary Baker asserted that this policy "Will have long-range positive effects on the U.S. economy and world stability."

I would like very much to believe the Secretary's prognosis, but one needs only to look at America's farms to develop deep skepticism about any positive effects emerging from this administration's international debt repayment initiative.

Let us look at the facts. American farmers rely on world markets to consume about 40 percent of their output. But from an historic peak in 1981 of $43.8 billion and 162 million metric tons of produce, our overseas farm sales are projected to drop to $29 billion and 120 million metric tons this year. Our farmers are facing direct competition from our Latin American and South American neighbors. These same neighbors are targeted by the Baker initiative to receive loans from U.S. commerical banks, the International Monetary Fund, and the World Bank for internal growth-oriented reforms.

Under the guise of so-called growth-oriented reforms, this administration intends to solve the global debt crisis by encouraging our direct competitors in the soybeans market, Brazil and Argentina, to further increase their soybean exports. This approach is particularly evident in the $350 million World Bank loan to Argentina that my distinguished colleague from Alabama, the Honorable HOWELL HEFLIN, so ably examined before this body last week. This loan was made contingent on Argentina reducing its export tax on argicultural commodities. By the World Bank's own projections, this reduction will encourage Argentine farmers to boost agricultural exports, soybeans included, by as much as 6.5 million metric tons.

We can clearly see the implications of this increase simply by looking at soybean markets. Soybeans were the leading cash crop in my native State of Tennessee up until 1984. At its peak in 1979, harvested acres of soybeans in Tennessee reached 2.6 million acres. In 1985, only 1.5 million acres were harvested, a 42-percent decline in a scant 5 years. While the U.S. market share of soybean exports was over 90 percent in the early 1970's, it is now slightly over 80 percent. Since 1981 alone, U.S. soybean exports have fallen 36 percent, or by 9 million metric tons.

No wonder there is gloom and doom and despair down on the farm these days.

Yet during this same period, Argentina's soybean exports doubled—went up 200 percent. Brazilian soybean exports quadrupled—up to 400 percent. While world exports of soybean oil rose from 650,000 million metric tons in 1960 to 3.6 million metric tons in 1983, the U.S. share of the world soybean oil market dropped from 88 percent in 1962 to 22 percent in 1981.

□ 1600

In other words, U.S. farmers have lost 66 percent of the world's soybean market in the space of less than two decades. To be sure, some of that market loss may be attributed to the European Community. Some of it, however, is Brazil's emergence as a major soybean exporter. Brazil and Argentina combined export today more soybean oil and more soybean meal than we do in the United States. Brazil and Argentina have put us in the back of the bus, so far as the export of soybean meal and soybean oil are concerned.

When Secretary Baker came before the combined Finance Committee and Banking Committee, I questioned him on the wisdom of making additional loans to Argentina. He replied that U.S. policy is to vote against any World Bank loan that is tied directly to increasing production of a good currently in oversupply in the United States. However, Mr. Baker went on to add this caveat—that this Argentina loan is a sectoral-type loan, meaning that technically the loan has no such direct tie, being sectorwide in its application to agricultural commodities.

What that says, in simple language, is that the U.S. Government will encourage U.S. commercial banks to make loans to Argentina and will make no connection between the fact that we have a surplus of soybeans in this country, that our farmers are losing out in the international soybean market, and the fact that Argentina is taking away vast shares of our market share in soybeans.

If this is the type of sector loan the administration is encouraging, I fear for our farmers. A staff report produced recently by the Joint Economic Committee provides a useful summary of the impact on Latin American economies of repaying their spiralling debt. Forced into a dramatic expansion of exports in order to earn the hard currency to pay their debts, these countries have flooded world markets with agricultural products. The resulting decline in prices has been a major contributor to the disaster we have on American farms. Yet, with farm foreclosures and bankruptcies hitting historic rates, with agricultural banks falling like flies across this land, this administration's response has been to encourage more debt among Latin American nations, more money flowing from U.S. banks, from the World Monetary Fund, from the World Bank, into these Latin American and South American countries that are taking American farmers' markets away from them.

When we passed the farm bill last year, we had high hopes that by reducing our loan rates we would increase our agricultural export competitiveness. However, this administra-

tion's policy could negate any gains we might make under this farm bill. We cannot afford to continually encourage open-ended exports of agricultural commodities that we have in oversupply at home, running over in our warehouses, rotting in our grain silos. I do not believe that our farmers should, or can, face much further erosion of their export market. Yet, such a result is where I fear this administration's policies are leading us. We cannot solve the global debt crisis at the expense of the American farmer. He cannot afford it any more. He cannot stand it.

In the days ahead, I intend to point out the dire consequences of the administration's policy on American farm commodities. I believe we must forge a solution to the world debt crisis which does not sacrifice America's farm families, which does not sacrifice our great capacity to produce food and fiber in the United States, not just for ourselves but for others in the world, and which does not compromise or damage our capacity to get our fair share of the world's international markets.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. EVANS). The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. MATHIAS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

□ 1700

STATE DEPARTMENT BUDGET

Mr. MATHIAS. Mr. President, in London, an excellent book on the state of military deployment around the world, "The Military Balance," is published each year by the International Institute for Strategic Studies. As my colleagues are aware, it is a thorough, precise account of the armed forces and weaponry of every country from Afghanistan to Zimbabwe, with, of course, an emphasis on the United States and the Soviet Union.

Everything you need to know is there, from the number of Soviet Badger bombers in Irkutsk to the coastal patrol craft deployed by Cape Verde. This reliable manual came to mind the other day as I tried to think of some way that we could quantify the operations of our Department of State. But in the end, aside from a listing of foreign service officers and embassies around the globe, I concluded that there is no definitive manner in which you can offer a quantitative or a qualitative account of the contributions of the department to our national security. How do you ever measure a demarche, a note verbal, a close personal relationship?

The State Department, our first line of defense in effect, is involved in a line of work which does not permit easy and specific summarization. There are, to be sure, annual reviews of performance and periodic up or out requirements. But the business of the department—diplomacy—remains a grey area which does not fit easily between the pages of a book, any book.

Successes and failures, when they occur, are by no means clearcut. Perhaps the best description of the nature of this work was penned a few years ago by James Reston in his "Sketches in the Sand," when he wrote: "Foreign relations are like human relations. They are endless. The solution of one problem usually leads to another." And that is not counting the myriad problems that never get solved.

I raise this issue to highlight the apparent desire to reduce the budget of the State Department by $220 million or 15 percent—cuts that may be well-intentioned but amount to impractical and untimely restraints on the operations of what one could argue is our most important single agency. The first duty of the State, after all, is the security of the Nation. And while our Armed Forces zemain our ultimate line of defense, and they must be fully supplied and trained, our State Department is dedicated to a round-the clock, round-the world effort to make certain that they do not need to be used. After his years at the department, Henry Kissinger observed that it is staffed by "probably the ablest and most professional group of men and women in public services."

Since Ben Franklin and Thomas Jefferson and Thomas Pinckney went off to Europe to represent us in our infancy, our diplomats have trooped off to all four corners of the globe to represent our interests. Two hundred years ago, that meant a small delegation in a few capitals. Today, it means small, medium and large delegations in hundreds of capitals and important cities where we have critical political, economic, military and cultural relations. And I don't need to tell you what that also means in the world of 1986; it means financial sacrifice, family disruption and considerable danger. As the New York Times pointed out last month, more senior diplomats have been murdered than generals and admirals killed in action in Korea and Vietnam.

We are taking steps to protect our diplomats abroad more effectively in the face of a heightened terrorist threat. The Senate Foreign Relations Committee approved $1.1 billion in the next year for embassy security 2 weeks ago. The amount was less than the State Department requested, but our reduction was a judicious one which will meet immediate needs and construction timetables while leaving room for a review of more long-range items.

The Department's budget is another matter. Current proposals to cut the operating budget by 21 to 25 percent would cut right to the heart of our global presence, our ability to conduct foreign policy throughout the world. Preliminary projections indicate that the State Department would be forced to close more than 40 embassies and consulates and fire one of every five of its employees if the $220 million budget reduction is approved. Major programs of the Agency for International Development, some of them in cirtical areas of long-term development, refugee assistance and narcotics control, would have to be curtailed. Many of the successful, new programs of the United States Information Agency, including President Reagan's commitment to an exchange program with the Soviet Union, would have to be put aside.

I do not think that George Shultz is exaggerating when he says that the large cuts under consideration "would ravage this country's international presence and seriously harm our national security."

Is there anyone who believes that we need less information and less intelligence from the South Africas and Philippines and El Salvadors of the world? Is there anyone who believes that we should have a smaller diplomatic delegation in Paris than Japan—or fewer consulates in Europe or some Middle Eastern States than the Soviet Union? Under the Gramm-Rudman ax, State just closed a consulate in Rotterdam, the largest port city in Europe, a city where we fought tooth and nail to block a Soviet consulate. It may be necessary to fortify our embassies; but is there anyone who believes we should begin a retreat into fortess America?

The proposed cuts in the State Department budget are especially disturbing because they come at the same time as a thoroughly ill-timed assault on our foreign aid program. Foreign aid has few friends largely because it has fewer constituents—at least direct constituents who vote and contribute funds. But I hardly need to remind my colleagues that foreign aid is in most cases in our national interest. With few exceptions, the money we send abroad—directly and through multilateral institutions—is used to boost agricultural production, establish critical infrastructures, attack disease and advance literacy. In short, to attack the many basic problems of underdevelopment which often give rise to repression and revolution. In short, to try to tackle problems in a peaceful, economic and essentially diplomatic manner which limits the potential for

conflict and keeps us from military involvement in many areas. And yet for all the talk of vast amounts of foreign aid, the percentage of our gross national product that is devoted to foreign development assistance remains lower than that of all industrialized democracies—for all industrialized democracies.

A great nation, one dedicated as we are to peace and freedom and human rights, can not increase its shipment of Stinger missiles and reduce its export of food and clothing—without suffering a real loss in the credibility of our claim to an exceptional status in the international community.

One of our ablest diplomats, John Kenneth Galbraith, a man who certainly knows a penny-wise, pound-foolish scheme when he sees one, once observed that diplomacy "often involves starting in one direction and moving eventually in another." I hope and trust that this will prove to be the case in our deliberations on the State Department's 1987 operating budget and our allocations for foreign assistance.

THE "PRIDE OF BALTIMORE"

Mr. MATHIAS. Mr. President, it is with sadness that we learned on Monday of the tragic sinking of the *Pride of Baltimore*. This clipper ship caught the imagination of many in this hemisphere and most recently in Europe. It evoked the image of what sailing was when America was just taking its place in the world.

But today our prayers are with the families and friends of the four missing crewmen who were lost when the *Pride* sank in heavy weather last Wednesday on the Atlantic Ocean. We are grateful that eight members of the crew have been rescued after floating in a raft for almost 5 days. We share in their families' joy knowing that they are safe and sound.

The *Pride* was Baltimore's ambassador of goodwill to the world. It brought the message of the city of Baltimore's renaissance to its many admirers. I had hoped it would continue that mission for many years but there are always risks in going to sea. Man's use of the sea has always been fraught with peril.

The circumstances of the loss are not only tragic but ironic. Avoiding the danger of terrorism that shortened her European visit, the *Pride* met another.

Mr. President, I ask that editorials on the *Pride* from yesterday's Baltimore Sun and Evening Sun be printed in the RECORD.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

[From the Evening Sun, May 20, 1986]

LOST PRIDE

The hearts of Baltimorians go out to the families of the missing crewmen of the Pride of Baltimore, and to the survivors. Their harrowing ordeal is too typical of the realities of the age of sail, the romance of which, with the aid of modern safety and navigation features, they carried on.

Questions must be asked and answered by competent authorities about this tragedy, about the communication practice that left the vessel's shore managers blissfully unaware four days after it capsized, and about the degree of risk undertaken. Other craft under sail and other crews at sea are entitled to all that this can teach them. The Pride must be assumed to have been seaworthy, with experienced officers and capable crew. She had been sailing for nine years, through gales and squalls stronger than the one that overturned her. She had run before storms, and lost jib booms, and gone aground off Delaware Bay, and lost radio contact—and her crew and managers gained from these experiences.

The Pride of Baltimore was a successful promotion for the city and its commerce, commanding more attention at ports of call than at home. It attracted local media. Business people entertained clients aboard. Baltimore will always treasure pictures of the Pride sailing under Tower Bridge at London, off Black Rock Castle in Ireland, in rendezvous with the nuclear submarine Baltimore, past the Little Mermaid in Copenhagen, snuggling under tall ships and calling at Gdynia in Poland with videos of Polish-American life in Baltimore.

Useful as the Pride has been since its maiden voyage in May 1977, however, business has never paid all its cost. This replica of an early Nineteenth Century schooner known as a Baltimore clipper was built in the Inner Harbor at city expense and was at first operated that way. In 1980 it was transferred to a corporation able to raise private funds with the aim of self-sufficiency. Yet the Pride was subsidized annually (this year $75,000) by taxpayers as a civic promotion.

The tragedy will mar the imminent launching of a sister vessel, the Lady Maryland, being completed at the same site by some of the same builders. It is a replica Chesapeake pungy, a slightly later version of schooner, intended as a floating classroom for the study of Chesapeake ecology and commerce. The tragedy will also mar the joyful convening of tall ships in Baltimore this summer.

Joining that flotilla was an afterthought. Berthed over the winter in Malaga, Spain, the Pride had originally been scheduled to call at northeastern Mediterranean ports this summer. But because of the terrorism scare, it was diverted home to join the tall ships in New York and Baltimore. The Pride had crossed the Atlantic uneventfully when a "white squall" arose from nowhere in the mythical "Bermuda triangle" and destroyed her. Baltimore's loss is great.

OUR PRIDE IS LOST

From whatever aspect we view it, the sinking of the Pride of Baltimore is a tragedy of unprecedented proportions for her home port. Most deplorable is the loss of life which transcends all the other losses: two of the 12 crew members are apparently dead; two others are unaccounted for. As of today the search for them is continuing with Baltimore's hopes and prayers.

The Pride was the ultimate symbol of a city, plying the Seven Seas to tell the world that Baltimore's seagoing heritage had been reclaimed. She was a worthy re-creation of the revolutionary Baltimore clippers, uniquely evolved in the Chesapeake Bay, that outraced and outmaneuvered anything afloat in the first half of the 19th century.

So devastatingly effective were these topsail schooners as privateers in the War of 1812 that Baltimore was denounced on the floor of the British Parliament as "that nest of pirates." It was in an attempt to bottle up these marauders that the British attacked Baltimore in 1814, and, as we all know, the successful defense of Fort McHenry inspired the National Anthem.

To dramatize Baltimore's renaissance by handcrafting, on the very edge of the Inner Harbor, an authentic reproduction of a Baltimore clipper was an idea that immediately identified the city. Harborplace, the crowning commercial achievement of the Inner Harbor, adopted a line-drawing of the Pride as its emblem. The clipper was to have joined the tall ships that will salute the 100th anniversary of the Statue of Liberty in New York Harbor on July 4. Now all these dreams have been lost in a cruel Atlantic storm somewhere east of the Bahamas.

But even as we mourn, tales of heroism and sacrifice on the part of crew members and Capt. Armin Elsaesser—he is among those missing—are beginning to reach us. The "white squall" that capsized the vessel apparently struck so suddenly that there was no time for emergency measures. Nevertheless, an official inquiry will have to pose the question as to whether these procedures were adequate.

Sadly, the answers to such after-the-fact questions, if they are found, will be of no consolation for the bereaved and for the city. In an actual and symbolic sense, the Pride of Baltimore is lost.

"PATENT PENDING" AND "INVENTION AND ENTERPRISE" EXHIBITS

Mr. MATHIAS. Mr. President, as chairman of the Patents, Copyrights and Trademarks Subcommittee, I want to call the attention of my colleagues to two exhibits opening at the Smithsonian Institution on June 20 to mark the 150th anniversary of the 1836 Patent Act.

"Patent Pending" is an exhibition of almost 100 patent models that represent a broad cross section of 19th century inventions. Among the famous models on display is one of a device used for lifting vessels over shoals which was personally submitted by Abraham Lincoln for the patent he received in 1849. The "Invention and Enterprise" exhibition focuses on 10 major inventions and pays tribute to American ingenuity and our entrepreneurial spirit.

Throughout most of the 19th century, inventors were required to include a model of their invention with their patent application. In those days, exhibitions of patent models were a major attraction of the Patent Office. At one time almost 175,000 were on display, drawing thousands of visitors from all over world who came to admire American know-how.

Tragically, several thousand models were lost in fires during the 1800's. A number of important models that re-

mained made their way to the Smithsonian, but most of those were sold at auction in 1925 by order of Congress due to lack of space and funds to care for them. Today much of this collection—a national treasure—is scattered across the country.

These patent models demonstrate our great American pioneer spirit—a spirit that nurtured such great inventors as Alexander Graham Bell, Samuel B. Morse, the Wright brothers, and Thomas Alva Edison, transforming our Nation from a raw, undeveloped country into an industrial giant and economic leader.

The exhibitions commemorating this spirit are most timely and welcome, for there are signs that today invention is on the wane in America.

Of all the U.S. patents granted last year, only 54 percent went to Americans. In too many fields, we are losing our competitive edge to foreign nationals who are increasingly taking advantage of our patent system and beating us at our own game. Our trade deficit can be partly attributed to a current attitude of complacency toward innovation, new technology, and productivity in America.

With these concerns in mind, a group of public-minded citizens, guided by leaders of industry, education and government, recently established a nonprofit foundation to launch a "Rekindle the Spirit" campaign. The U.S. Patent Model Foundation is enlisting corporate sponsors and plans to raise $20 million to recover the 50,000 to 100,000 surviving original models of 19th century inventions and to provide funding for their care and exhibition by the Smithsonian. Throughout the campaign, the patent models will be used as symbols to inspire a rebirth of American ingenuity and inventiveness. In addition to protecting and studying the patent model collection, the Foundation's plans include educational and public awareness programs, American Ingenuity scholarships and invention awards in coordination with the Smithsonian.

To celebrate the commencement of this campaign, and the sesquicentennial of the 1836 Patent Act, a special selection of the patent models will be featured in the June 20 Smithsonian exhibitions.

I urge Senators to attend the "Patent Pending" and "Invention and Enterprise" exhibits at the Smithsonian. They show the creative eagerness of our Nation's early years and how, in the words of Abraham Lincoln, our patent system "adds the fuel of interest to the fires of genius."

HELEN B. TAUSSIG, M.D.

Mr. MATHIAS. Mr. President, yesterday Dr. Helen B. Taussig died. As a pediatric cardiologist, she attracted worldwide fame for developing the "blue baby" operation that has saved the lives of countless children with congenital heart defects.

Earlier this year, I had the privilege of narrating a network television spot—an "American Portrait"—on Dr. Taussig's remarkable achievements. Her work at the Johns Hopkins Medical School and Hosptial brought the gift of life to untold numbers of children for whom medical science had previously offered no hope.

Mr. President, I ask unanimous consent that an obituary of Dr. Taussig from today's Baltimore Sun be printed in the RECORD.

There being no objection, the obituary was ordered to be printed in the RECORD, as follows:

HOPKINS' HELEN TAUSSIG, NOTED CARDIOLOGIST, DIES

(By David Michael Ettlin)

Dr. Helen Brooke Taussig, who won the nation's and medical world's highest honors for her role as co-developer of the "blue baby" operation at Johns Hopkins Hospital, was killed in an automobile accident yesterday afternoon near her Pennsylvania home.

Dr. Taussig, 87-year-old professor of medicine emeritus at Hopkins, was leaving the parking lot of the Pennsbury Township municipal center—apparently after voting in a local election—when she drove her car into the path of another vehicle on U.S. 1, police said.

She was pronounced dead at 4:42 p.m., an hour after the crash, at the Chester County Hospital. A passenger in her car and the driver of the other vehicle also were injured, police said.

"Helen Taussig is recognized as the first lady of cardiology in the world, and she will be greatly missed," said Dr. Richard Ross, dean of the Hopkins Medical School, where she had been professor emeritus since 1963.

In recent years, Dr. Taussig had lived in the Crosslands retirement community in Kennett Square but remained active in medical and ethical organizations, and in research at the University of Delaware on heart malformations in birds.

She continued to visit in Baltimore with colleagues at Johns Hopkins and, in February, attended a recital at the Peabody Conservatory of Music given in her honor by Samuel Sanders—a pianist who 39 years earlier had undergone the operation developed by Dr. Taussig and the late Dr. Alfred Blalock.

Dr. Taussig was awarded the Medal of Freedom, the nation's highest civilian honor, by President Lyndon B. Johnson for her role in alerting the public to the dangers of the drug thalidomide. She was the first woman elected president of the American Heart Association, and the list of her awards, appointments, society memberships and honorary degress was said to run seven single spaced typed pages.

Yet becoming a doctor had not been easy. She has been told, in applying to the Harvard school of public health in the early 1920s, that she could not get a degreee there because she as a woman.

Dr. Taussig was born in Cambridge, Mass., in 1898, the daughter of Frank William Taussig, a noted Harvard economist, and the granddaughter of William Taussig, a horse and buggy doctor for whom the William Taussig School for handicapped children in St. Louis is named.

Dr. Taussig studied at Radcliffe College and at the University of California, where she earned her bachelor of arts degree in 1921. She took up medical studies at the Boston University Medical School, where she first became interested in heart malformations, and moved to Baltimore in 1923 to attend the Hopkins Medical School.

Dr. Taussig graduated in 1927, and became head of the Hopkins' Harriet Lane pediatric clinic three years later.

After years of research at Hopkins, Dr. Taussig became convinced that "blue babies"—children with congenital heart defects—were "blue" because they did not receive enough oxygen in their blood. The idea led to development of the so-called "blue baby" operation with Dr. Blalock.

After reading of an operation in Boston in which the ductus arteriosus, a blood vessel not needed by babies after birth, had been closed, Dr. Taussig theorized that if an artery to the heart could be closed, one could also be opened.

When Dr. Blalock became chief surgeon at Hopkins in 1941, Dr. Taussig suggested to him that an operation on constricted arteries of blue babies could save these children from enforced inactivity and early death.

The first Taussig-Blalock operation was performed, unsuccessfully, in 1944, but the next operation and 80 percent of those that followed were successful.

Dr. Denton Cooley, now chief of surgery at the Texas Heart Institute and an assistant in the first blue baby operations, said last night that the procedure was "the dawn of pediatric heart surgery" and Dr. Taussig was "an institution in herself . . . the most respected pediatric cardiologist in the world."

Dr. Cooley added that the blue baby operation was "every inspiring—for me, the real dawn of corrective surgery for patients with congenital heart disease," provided the first proof that patients with heart disease could undergo anesthesia and gave inspiration to doctors in the further development of openhear surgery.

A quiet, gracious woman, Dr. Taussig referrd to the hundreds of children who came to her for treatment as "my babies."

She maintained a large correspondence with many of the youngsters and their families and kept a sizable scrapbook containing snapshots of many of her young patients.

Dr. Taussig remained modest about the honors her work earned.

She once remarked, "You have your sadnesses as well as your successes. One reads all about the successful operations, but not about the unsuccessful ones, the sorrow and the background of hard work. It's the clinical errors that keep you humble.

"On the whole, though," she added, "I think I've done more good than harm."

Dr. Taussig was the first American physician to conduct an on-the-spot investigation in West Germany of birth defects caused by thalidomide, a tranquilizing drug.

Her report, published in June 1962, aroused the attention of physicians and the public in the United States and led, two years later, to a $40,000 research fellowship from the National Foundation, which enabled her to direct further studies into the effects of drugs on unborn babies.

A founder of the Heart Association of Maryland, Dr. Taussig served as the organization's president from 1952 to 1954. She had been a member of its executive board since 1952.

She was a member of the international branch of Physicians for Social Responsibil-

ity, a board member of the Right to Die organization and an outspoken critic of the Right to Life movement—and was outspoken to the end with her views on questions of social and medical ethics.

In 1984, Dr. Taussig participated with a panel of distinguished physicians in drawing up guidelines for doctors on life-and-death decisions in the cases of gravely ill patients—including when it is ethical to withhold drugs, and sometimes even food and water.

DEBORAH S. LIPMAN

Mr. DOMENICI. Mr. President, I would like to take a moment to note that the majority staff of the Senate Budget Committee will be losing a valuable member today. Debbie Lipman, the transportation analyst and team leader for the Natural Resources Group, is leaving my budget staff today to join the Washington Area Metropolitan Transit Authority [Metro] as their director of government relations.

Ms. Lipman joined the staff of the committee in the summer of 1981, during the conference on that year's reconciliation bill, the Omnibus Budget Reconciliation Act of 1981. Besides that year's budget, she has worked with us on the completion of four other budget resolutions.

Mr. President, there are numerous examples of her excellent work. One instance that comes to mind is her tireless work on the 1982 gas tax bill. She drew upon her expertise as a budget analyst and her knowledge of transportation programs to provide excellent staffing for this Senator throughout a session that seemed to have no end.

Mr. President, we passed the conference report on the gas tax bill on December 23, 1982, 2 days after the Senate passed its version of the bill. The vote on final passage on the gas tax bill was preceded by 26 separate votes, 9 of these were cloture motions. In addition, there were three motions to waive the Budget Act. During that last-minute rush to pass a bill involving taxing, spending, transportation, and Budget Act issues, Ms. Lipman devoted tireless hours to help us produce a bill.

Ms. Lipman has become an expert analyst on a wide array of transportation and infrastructure issues. Her counsel and guidance has been sought and desired by members of the Budget, Appropriations, and authorizing committees on both sides of the Capitol.

We will miss her. I know I speak for all Members of the Senate when I say we wish her the very best of luck in her new endeavors.

TRIBUTE TO JUDY ROLFE ON RENOMINATION TO NATIONAL ADVISORY COUNCIL

Mr. MELCHER. Mr. President, it is always a pleasure for me to support deserving Montanans for positions with the Federal Government. Such is the case with Judy Rolfe who has been renominated for membership on the National Advisory Council on Women's Educational Programs. I would add that Judy has been elected chairman of this important advisory group by the council itself.

Judy was born in Anaconda, MT, and graduated from high school in Butte, MT. She also attended Montana State University in Bozeman, MT, where she is now active as an automobile dealer.

In fact, Judy has been chairman of the Government Affairs Committee of the Bozeman Area Chamber of Commerce, on the board of directors of the Junior Achievement of Bozeman, and a member of the Bozeman Auto Dealers Association.

She was also selected as an Outstanding Young Woman of America in 1974. She is married and has two children.

Judy has already provided good service to this Advisory Council and I am pleased that her service will continue.

IN MEMORIAM—RICHARD FELDER TURNER, JR.

Mr. DENTON. Mr. President, a great Alabamian passed away last week. Richard Felder Turner, Jr., of Mobile, AL, was great, not because of wealth or fame, but because of what he was as a man, as a father, as a citizen.

Richard was a friend and supporter of mine, but I was not unique in that respect. Richard was a friend and supporter of many people—from all walks of life, at all income levels, without regard to race or station in life.

Richard Turner contributed to many causes, but he contributed something much more precious than gold or silver, though he gave his share of money, too. Richard gave of himself, generously—his time, his advice and his patience.

Politics was Richard's favorite avocation; it was "in his blood," as they say. And rightly it should have been. His grandfather, John McDuffie, was a Congressman from Alabama and later a Federal district court judge. Richard first worked in a political campaign at the age of 12 and remained active in campaigns until the day of his death. But in all his years of political involvement, Richard Turner never, Mr. President, never once asked for anything for himself. The only thing that he sought for his contribution was good government.

As a worker and doer, Richard never considered any task too menial for himself in aid of a friend. Nor was he a "fair weather" friend; even when friends were unkind or uncaring, Richard was always there when they needed him.

In recent years, Richard Turner fought a courageous battle for his own life. In 1978, Richard contracted a rare and incurable lung disease, one that was both debilitating and incapacitating. It slowed him down, but it did not stop him. Richard forged ahead with his work for friends and community.

Last Friday morning, Richard Turner lost that struggle. He was only 44 years old. But in Richard's case, it was not the quantity, but the quality of his years of contribution.

I will remember Richard Turner for what he was and what he did—for his country, for his family, for his fellow man.

My great sympathy goes out to his wife, Rondi, and to his two sons, Pat and Richard III.

THE RETIREMENT OF DR. JOHN W. MANLY

Mr. HOLLINGS. Mr. President, it gives me great pleasure today to recognize and honor Dr. John W. Manly upon his retirement as executive vice president of Tri-County Technical College in Pendleton, SC. He was an early participant in the technical education system of South Carolina.

Dr. Manly's illustrious career as an educator began in 1960 as a teacher of industrial arts in the South Carolina Public School System. His service to the technical education system began in 1964, when he joined Greenville Technical College as an instructor in drafting and design technology.

During his 7 years at Greenville Tech, Dr. Manly served in various capacities from night director to dean of the Health Career Center. Mr. President, it was as dean of the Health Career Center that he developed a health care center that served as a national model.

Dr. Manly joined the staff of Tri-County Technical College in 1971 as executive director and will retire on June 30, 1986, as the executive vice president. During the early days of his tenure at Tri-County Technical College, Dr. Manly established the child development department, a program that coordinates activities with day care services throughout the community.

Working closely with Clemson University, Dr. Manly planned, implemented, and directed a special training program for vocational/technical education teachers which has provided teaching skills to more than 100 South Carolina vocational education teachers.

Mr. President, Dr. Manly's skills were not only strong in developing an outstanding curriculum at Tri-County

Tech, but he has been instrumental in providing pivotal leadership in the preparation of grant applications which have resulted in the construction of four buildings and Federal assistance through title III of the Higher Education Act.

Tri-County Technical College and the State of South Carolina will surely miss the dedicated services of Dr. John Manly when he takes a well-deserved retirement on June 30, 1986. However, his devoted and talented work as an executive officer will continue to be felt through the credible technical education system he helped to create. As the system celebrates its 25th anniversary this year, it is important that we reflect as well on the dedicated men and women like Dr. Manly who have made our system of technical education the success it is today.

Mr. MATHIAS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. BOSCHWITZ). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE PRESIDENTIAL VETO ON THE SAUDI ARMS SALE

Mr. DOLE. Mr. President, it is my understanding that the President has vetoed the resolution of disapproval on the Saudi arms sale, and that somewhere there is a messenger—[laughter]—who has that information. I would say to my distinguished colleagues that I prepared to take up the veto and vote in 30 minute or less and dispose of this matter for a number of reasons.

First of all, we do plan to leave here this evening for the so-called Memorial Day recess and will not return until June 2. At that time, it was my hope that we could take up, if not the tax bill, the higher education bill. And if we delay action on the veto message coming to the Senate, unless we have some unanimous-consent agreement, then the message would be before us and could not be displaced without unanimous consent.

Second, it would seem to me that this matter has been around long enough. There could be an argument made that the White House delayed in vetoing the disapproval resolution until they felt they had the votes, and I think that probably is a just argument. I do not quarrel with the White House for that. After all, I have said a number of times in the past few days that if we had the votes, we would vote before the recess; if we did not have, we would try to work on votes during the recess.

Now I believe—and I do not have any absolute certainty—that we have the votes to sustain the veto, to uphold the President's position. And I would like very much to proceed with that forthwith. Let us proceed with whatever debate on either side, have the debate, and have the vote. We would then have this particular issue behind us, and we could face up to whether it is higher education, the tax bill, the budget resolution, whatever, when we return.

Now I have been advised that it may not be possible to vote this evening. Again, I am not quarreling with that. The opponents have that right. It may be in their interests now to delay, as they may have perceived the White House delaying, until some of the absentees return and until the forces on the other side have an opportunity to see what they can do to prevail on this issue. And it is an important vote.

It would seem to me, though, if we do that, the vote becomes more politicized. I would hope we could have some agreement to vote at 6 o'clock, 6:30, 7 o'clock or 7:30 this evening. I have indicated to the Chief of Staff at the White House that the distinguished minority leader indicated to me, that they were in a caucus and that it was the feeling—I guess nearly a unanimous feeling—of the caucus that because certain Members had to be absent—Senator DECONCINI because of the death of his father, others who had commitments and who had to leave, and that it would not be possible to vote today. Of course, the alternative would be to be here tomorrow and I guess Friday, or whatever.

Mr. President, it would seem to me, under these circumstances, as a practical matter, we are not going to vote. We are prepared to vote. Those who wish to sustain the President's veto are here, as far as I know. We believe that we should act.

I remind my colleagues, that when there was an effort to bring up the resolution of disapproval, I do not believe that this Senator delayed bringing that matter to the floor.

□ 1730

So I think—and I hope—there might be some reciprocity and that we could now act on the disapproval of the resolution.

But having said that, I would be pleased to yield the floor, and yield to the distinguished minority leader who may have other ideas.

I yield the floor.

Mr. BYRD addressed the Chair.
